

## **MAPP HHTS Release 4.5 System Changes and Enhancements**

Implementation: Spring 2024

- Connect CES Outcome linked to Billing Logic
- Billing Support Upload changes to collect two new fields for HHSC (optional for HHSA)
- Update MCP email notifications to include new or updated POC, when a member is newly HCBS.
  - when new K1 & member either has a POC or a POC is uploaded within 1 month of K1 begin date)
- HH Claims and Encounter Detail File update.
  - expand the claims and encounters included to give providers more insight into whom they've billed for in the past
- Differentiate children's assignments within system files and the Provider Summary Report.
- POC Related Updates to upload and download files (P/G/LAR Signature Date on error file).
- New ability for members that transfer from CYES Case Management to Health Home Case Management and from Health Home Case Management to CYES Case Management
  - This will use existing transfer the functionality within HHTS.
- Changes to Provider Type Download File
  - The Provider Type Download file was changed to add fields for counties served that are identified in the organization's profile in MAPP HHTS, which are displayed on the DOH Health Home website.
- HH CMA Relationship Download file and MCP HH Relationship Download file changes to add provider notes information.
- Update to the Segments Potentially Incompatible File to include members with CES outcome of "E" (end enrollment)
