DO YOUR CHILDREN QUALIFY FOR MEDICAID?

We have recently been informed by the Child Health Plus Program that your family's income appears to be below the Medicaid standard and your child(ren) may be eligible for Medicaid. Medicaid is a program that offers a full range of health care services to eligible people.

If you would like to apply for Medicaid for your children, complete the enclosed application, and gather together proof of income, address, citizenship (for children only), and dates of birth for the children. The enclosed Documentation Checklist will help you decide what items of proof you need to bring in. Then call the following number to get an appointment for an interview:_____.

We are concerned that your child(ren) continue to have access to medical care, so we urge you to apply for Medicaid.

Please Note:

If you want to apply for any children over age fourteen, and/or any adults in your household, you will need a different application form, and more documentation, so please be sure to say this when you call for your appointment.
