Overview

The New York State Accountable Care Organization (ACO) Quality Report is a multi-payer view of performance results on a set of eight quality measures for ACOs that have been issued a certificate of authority by the New York State Department of Health (NYSDOH). Public Health Law (PHL) Article 29-E requires the NYSDOH to establish a program governing the approval of ACOs. PHL § 2999-p defines an ACO as "an organization of clinically integrated health care providers that work together to provide, manage, and coordinate health care (including primary care) for a defined population; with a mechanism for shared governance; the ability to negotiate, receive, and distribute payments; and accountability for the quality, cost, and delivery of health care to the ACO's patients" and that has been issued a certificate of authority by the NYSDOH.

ACO Profile and Quality Report

The ACO profile presented in the following pages is intended to provide consumers with a better understanding of the Adirondacks ACO, LLC's structure as an all payer ACO. The profile includes the following information:

- Type of ACO (e.g., Hospital or Provider led),
- Number of participating providers and suppliers contracted by the ACO,
- Region of services provided,
- Number of patients attributed to the ACO,
- Quality of services provided, and
- The ACO's progress in the implementation of evidence-based care services, telemedicine, use of electronic medical records (EMR), and other initiatives intended to accomplish the goals of accountable care.

Each profile was developed from supplemental, non-confidential information submitted by the ACO through ACO certification, a survey issued by NYSDOH to the ACO, and other public data.

The report displays performance results based on data submitted by payers. Details on how data is collected can be found in the technical notes section of this report. This report does not contain Protected Health Information (PHI) and is shared with each ACO providing the information, prior to publication.

Section 1. Adirondacks ACO, LLC Profile

ACO Type: Hybrid

Provider-Led Practices

Community-Based Hospitals

Service Area: Adirondacks ACO, LLC Providers by County

Table 1. Risk Contracts

MCO	Commercial Contract	Medicaid Contract	Medicare Contract
CDPHP	X	X	X
Empire BlueCross BlueShield	X		
Excellus BlueCross BlueShield	X		
Fidelis Care New York, Inc.		X	
HealthNow New York, Inc.*	X		
MVP Health Plan, Inc.*	X		
UHC Empire Plan Members*	X		

Note: *Indicated having a contract in place, but no risk agreement.

ACO Provided Care Coordination Highlights

Adirondacks ACO, LLC

- Encourages participant organizations to provide mental health services that are integrated with their primary care practice or within their practice to ensure patients' supports and services are as seamless as possible
- Integrates evidence-based care services through utilization of the clinical decision supports available through the EMR system to guide day-to-day workflow
- There is a strong focus on inpatient avoidable admissions and readmissions, as well as patients with high ED utilization, to work collaboratively with community-based organizations to ensure proper supports are provided when issues related to the social determinants of health area identified.

Section 2. Adirondacks ACO, LLC Report

Table 2. Most Common Specialties for Providers in the Adirondacks ACO, LLC’s Network

Classification	Number of Providers
Family Practice	186
Internal Medicine	144
Emergency Medicine	90
Psychiatry	44
Cardiology	40
Other*	318
Grand Total	822

Legend

*The “Other” includes all other specialty types (including but not limited to Endocrinology, Infectious Disease, and Obstetrics/Gynecology).

Note: Provider information was collected in 2019 for the January 1 – December 31, 2018, measurement year.

Table 3. Members Qualifying for a Quality Measure Attributed to a Provider in an MCO That Had a Contract with Adirondacks ACO, LLC; Results by Health Plan and Product

Health Plan	Commercial	Medicaid	Medicare*	Total
All Contracted MCOs	32,666	31,985	1,920	66,521

Legend

* Medicare Advantage results only. See: **Technical Notes**.

Note: This table may not represent all the members in the Adirondacks ACO, LLC’s network. Inclusion criteria was limited to members who met denominator criteria for one or more health care quality measures during the 2018 measurement year. Member attribution to product line was determined in November 2019 based on measurement year 2018. **Member attribution to a given product is not dependent on whether there is a defined contract, as noted in Table 1, between the ACO and the health plan’s product line.**

Adirondacks ACO, LLC
2019 Annual Report

Table 4. 2019 Quality Measure Results for Eligible Members in Adirondacks ACO, LLC, Stratified by Payer

Domain	Measure	ACO Overall			ACO Rates by Payer		
		Denominator	Numerator	Result	Commercial	Medicaid	Medicare*
Prevention	Breast Cancer Screening	8,394	6673	79%	83%	63%	85%
	Cervical Cancer Screening	19,435	13,859	71%	78%	62%	--
	Childhood Immunization Status Combo 3	451	296	66%	57%	69%	--
	Chlamydia Screening in Women (16-24 Years)	2,915	1,695	58%	55%	62%	--
	Colorectal Cancer Screening	18,984	11,747	62%	65%	45%	71%
Chronic Disease	Comprehensive Diabetes Care Eye (Retinal) Exams Performed	4,751	2,742	58%	55%	56%	81%
	Comprehensive Diabetes Care HbA1c Testing	4,400	3,936	89%	89%	90%	--
	Comprehensive Diabetes Care Medical Attention for Nephropathy	4,400	3,912	89%	89%	89%	--

Legend

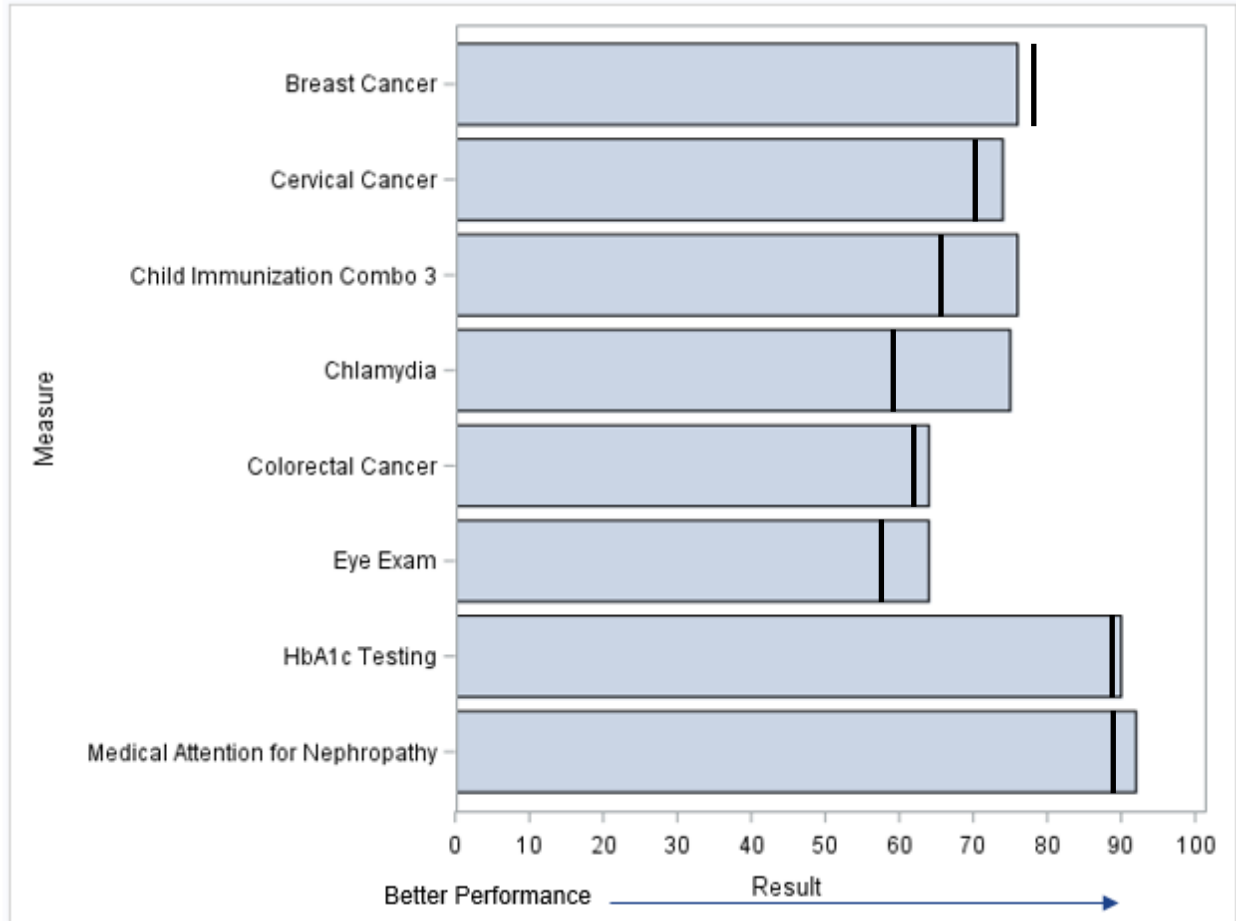

-- Measure result not reported.

* Medicare Advantage results only. See: **Technical Notes**.

Note: Results are based on measurement year 2018

Section 3. Statewide Benchmark Comparisons

Figure 1. 2019 Adirondacks ACO, LLC Results Compared with the Statewide ACO Average (MY 2018)

= Adirondacks ACO, LLC Rate
 = Statewide Average

Note: Results shown are averaged across all product lines (Commercial, Medicaid, Medicare). Results are based on measurement year 2018. This table includes results averaged across all products. For Medicare members, only Medicare Advantage results are included. See: **Technical Notes.**

Technical Notes

DEFINITIONS

Domain

The measures are categorized by two domains: Prevention and Chronic Disease.

Denominator, Numerator, Result

For each measure, the denominator represents the total number of members eligible for specific health care services, and the numerator represents the number of members who received those services. The result is the proportion of members who received recommended health services, out of all eligible members, during the measurement period. Specifically, this is calculated by dividing the numerator by the denominator, multiplying by 100 unless otherwise noted.

Measures

Data included in this report were collected during calendar year 2019, according to the 2019 NYS ACO Core Measurement Set, based on services rendered during the 2018 measurement year.

The quality measures in the NYS ACO Core Measure Set are from the Healthcare Effectiveness Data and Information Set (HEDIS®) measures established by the National Committee for Quality Assurance (NCQA). Please refer to Appendix A of this report for a list of the measures and measure descriptions. Results for these measures were calculated using health plan reported results for members attributed to practices participating in Adirondacks ACO, LLC's network.

Methods

In November 2019, the NYSDOH requested patient-level provider attribution data from 25 health plans operating in New York State. The data submission was voluntary; twenty-three health plans submitted the requested data.

The requested datasets included the following information:

- Members who met denominator criteria for at least one ACO core set measure during the 2018 measurement period
- Denominator and numerator compliance
- National Provider Identifier (NPI) of the physician to whom the member was attributed
- Provider practice Tax Identification Number (TIN) of the provider to whom the member is attributed.
- Additional practice identifiers of the provider

Patient-level data was aggregated across health plans using Practice TIN and ACO TIN to produce ACO-level results on the selected quality measures.

Benchmarks allow ACOs to compare their results to the overall statewide ACO average and to a payer that may better reflect the Adirondacks ACO, LLC's member population. Benchmarks were calculated using the members included in the full data file submitted to NYSDOH, the statewide result for each measure, as well as statewide results by product.

Adirondacks ACO, LLC

2019 Annual Report

Member Attribution

Each health plan employed its own member attribution methodology to link members to practices.

Measure Selection

A parsimonious set of primary care relevant measures were selected for the 2019 NYS ACO Core Measure Set to examine the quality of care for the population attributed to ACO organizations for quality improvement and monitoring. This measure set may be expanded over time. See Appendix A for more detailed descriptions of each of the measures.

Measure Calculation

Administrative data were used to calculate each measure. For measures with both hybrid and administrative specifications, the administrative method was used.

Product results were calculated using all practices for which data were available and were stratified by product (Commercial, Medicaid, Medicare).

Medicare Results

Medicare results shown in this report reflect quality measurement applicable to the Medicare Advantage program and do not represent the Medicare Shared Savings Program (MSSP). This report includes quality scores only in the case of ACO contracts with Medicare Advantage health plans. This report does not include quality scores for Medicare patients covered by the conventional Medicare program (Parts A & B) under ACOs contracts with CMS for the Next Generation ACO program or the Medicare Shared Savings Program (MSSP).

The CMS quality score data for ACOs is available using the following link:

<https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/sharesavingsprogram/Downloads/MSSP-ACO-data.pdf>.

For more information on Medicare fee-for-service, please refer to the CMS website

<https://www.cms.gov/Medicare/Medicare.html>.

Data Sources

Member Data

Member-level detail information was collected from the NYS Patient-Centered Medical Home (PCMH) HEDIS 2019 Member-Level Files submitted by managed care organizations in NYS during 2018, based on measurement year 2018.

Participating Providers

Each ACO provided NYSDOH a list of participating providers and practices. NYSDOH joined the list of ACO-provided practice TINs to the health plan-provided practice TINs from the PCMH HEDIS file to stratify quality results by ACO.

Report Interpretation Limitations

Please note the following limitations of this ACO Report:

1. This ACO report includes claims-based data pooled from multiple payers. The performance results represent the quality of care provided to a larger number of members than reports distributed by individual health plans that reflect the quality of care for members insured by that health plan alone. This report is not a replacement for performance reports or gap analyses provided by individual payers or Medicare Advantage Stars, Medicare ACOs Scorecards, and other transformation or payment programs. The report does not display member-level data.
2. These ACO results do not account for the entire panel population. Only those members meeting continuous enrollment criteria at the payer and plan level were included in these quality measure results.

ACO Program Information

For information about New York State's Accountable Care Program, including information about how to apply for a Certificate of Authority, and to find answers to frequently asked questions, please visit the NYS website at:

Appendix A – 2019 NYS ACO Core Measure Set

MEASURE (NQF#/Developer)	DESCRIPTION
Breast Cancer Screening (2372/HEDIS)	The percentage of women, ages 50 to 74 years, who had a mammogram to screen for breast cancer.
Cervical Cancer Screening (0032/HEDIS)	The percentage of women, ages 21 to 64 years, who were screened for cervical cancer using either of the following criteria: - Women between ages 21 to 64 who had cervical cytology performed every 3 years. - Women between ages 30 to 64 who had cervical cytology/human papillomavirus (HPV) co-testing performed every 5 years.
Childhood Immunization Status – Combo 3 (0038/HEDIS)	The percentage of children, age 2 years, who had four diphtheria, tetanus and acellular pertussis (DtaP); three polio (IPV); one measles, mumps and rubella (MMR); three haemophilus influenza type B (HiB); three hepatitis B (HepB); one chicken pox (VZV); and four pneumococcal conjugate (PCV) vaccines by their second birthday. The measure calculates one combination rate.
Chlamydia Screening for Women (0033/HEDIS)	The percentage of women, ages 16 to 24 years, who were identified as sexually active and who had at least one test for chlamydia during the measurement year. Reported as three rates: 1. Patients between ages 16 to 20 years 2. Patients between ages 21 to 24 years 3. Total
Colorectal Cancer Screening (0034/HEDIS)	The percentage of adults, ages 50 to 75 years, who had appropriate screening for colorectal cancer.
Comprehensive Diabetes Care: HbA1c Testing (0057/HEDIS)	The percentage of members, ages 18 to 75 years, with diabetes (type 1 and type 2) who received a Hemoglobin A1c (HbA1c) test during the measurement year.
Comprehensive Diabetes Care: Eye Exam (Retinal) Performed (0055/HEDIS)	The percentage of members, ages 18 to 75 years, with diabetes (type 1 and type 2) who had an eye exam (retinal) performed.
Comprehensive Diabetes Care: Nephropathy (0062/HEDIS)	The percentage of members, ages 18 to 75 years, with diabetes (type 1 and type 2) who received a nephropathy screening or monitoring test or had evidence of nephropathy during the measurement year.

Appendix B – Quality Measure Results for Commercial Stratified by Contract Arrangement Type

Domain	Measure	Overall Commercial Results			Contracted Results			Non-Contracted results		
		Denominator	Numerator	Result	Denominator	Numerator	Result	Denominator	Numerator	Result
Prevention	Breast Cancer Screening	6,418	5,302	83%	6,155	5,106	83%	263	196	75%
	Cervical Cancer Screening	11,470	8,959	78%	11,035	8,647	78%	435	312	72%
	Childhood Immunization Status Combo 3	126	72	57%	122	70	57%	SS	SS	SS
	Chlamydia Screening in Women (16-24 Years)	1,587	881	56%	1,545	851	55%	42	30	71%
	Colorectal Cancer Screening	14,791	9,489	64%	14,178	9,208	65%	613	281	46%
Chronic Disease	Comprehensive Diabetes Care Eye (Retinal) Exams Performed	2,963	1,633	55%	2,830	1,570	55%	133	63	47%
	Comprehensive Diabetes Care HbA1c Testing	2,963	2,635	89%	2,830	2,529	89%	133	106	80%
	Comprehensive Diabetes Care Medical Attention for Nephropathy	2,963	2,626	89%	2,830	2,512	89%	133	114	86%

Legend

SS= Sample size less than 30.

Note: Overall denominator and numerator results shown represents the eligible population in the ACO. QM results for Contracted MCOs were calculated from eligible population that was in an MCO that had a risk contract with the ACO. QM results for Non-Contracted MCOs were calculated from eligible population that was in an MCO that did not have a risk contract with the ACO.

Appendix C – Quality Measure Results for Medicaid Stratified by Contract Arrangement Type

		Overall Medicaid Results			Contracted Results			Non-Contracted results		
Domain	Measure	Denominator	Numerator	Result	Denominator	Numerator	Result	Denominator	Numerator	Result
Prevention	Breast Cancer Screening	1,677	1,054	63%	1,544	974	63%	133	80	60%
	Cervical Cancer Screening	9,097	5,606	62%	8,400	5,212	62%	697	394	57%
	Childhood Immunization Status Combo 3	355	240	68%	329	226	69%	SS	SS	SS
	Chlamydia Screening in Women (16-24 Years)	1,463	892	61%	1,370	844	62%	93	48	52%
	Colorectal Cancer Screening	3,667	1,645	45%	3,358	1,514	45%	309	131	42%
Chronic Disease	Comprehensive Diabetes Care Eye (Retinal) Exams Performed	1,689	955	57%	1,570	887	56%	119	68	57%
	Comprehensive Diabetes Care HbA1c Testing	1,689	1,512	90%	1,570	1,407	90%	119	105	88%
	Comprehensive Diabetes Care Medical Attention for Nephropathy	1,689	1,509	89%	1,570	1,400	89%	119	109	92%

Legend

SS= Sample size less than 30.

Note: Overall denominator and numerator results shown represents the eligible population in the ACO. QM results for Contracted MCOs were calculated from eligible population that was in an MCO that had a risk contract with the ACO. QM results for Non-Contracted MCOs were calculated from eligible population that was in an MCO that did not have a risk contract with the ACO.

Appendix D – Quality Measure Results for Medicare Stratified by Contract Arrangement Type

Domain	Measure	Overall Medicare Results			Contracted Results			Non-Contracted results		
		Denominator	Numerator	Result	Denominator	Numerator	Result	Denominator	Numerator	Result
Prevention	Breast Cancer Screening	2,665	2,139	80%	695	593	85%	1,970	1,546	78%
	Cervical Cancer Screening	--	--	--	--	--	--	--	--	--
	Childhood Immunization Status Combo 3	--	--	--	--	--	--	--	--	--
	Chlamydia Screening in Women (16-24 Years)	--	--	--	--	--	--	--	--	--
	Colorectal Cancer Screening	6,008	4,009	67%	1,448	1,025	71%	4,560	2,984	65%
Chronic Disease	Comprehensive Diabetes Care Eye (Retinal) Exams Performed	1,786	1,267	71%	351	285	81%	1,435	982	68%
	Comprehensive Diabetes Care HbA1c Testing	--	--	--	--	--	--	--	--	--
	Comprehensive Diabetes Care Medical Attention for Nephropathy	--	--	--	--	--	--	--	--	--

Legend

-- Measure result not reported

Note: Overall denominator and numerator results shown represents the eligible population in the ACO. QM results for Contracted MCOs were calculated from eligible population that was in an MCO that had a risk contract with the ACO. QM results for Non-Contracted MCOs were calculated from eligible population that was in an MCO that did not have a risk contract with the ACO. Also, the results include Medicare Advantage members only (See: **Technical Notes**). Diabetes denominators differ across measures because not all diabetes measures are calculated and reported for all payers.
