

PPS Provider Appeals – DY1 Q2

PPS Provider Name: [Bassett Healthcare Network](#) Appeal 1 of 1

Conclusion: -

Provider successfully appealed the Independent Assessor's findings relative to the **speed and scale** requirements for **Projects 2.b.vii.** and **2.c.i.** for DSRIP Year 1, Quarter 2. -

Independent Assessor initially failed the PPS for Projects 2.b.vii. and 2.c.i. on speed and scale - requirements which required the PPS to meet at least 80% of their actively engaged commitment for - patient engagement speed as indicated in the project plan application for each project. The Independent - Assessor's (IA) determined that the PPS did not submit adequate documentation to support that the PPS - met at least 80% of their actively engaged commitment for patient engagement speed. -

Upon appeal, the PPS presented information that the submitted Actively Engaged documentation - format for **Projects 2.b.vii.** and **2.c.i.** differed from the other Actively Engagement documentation as - submitted for other projects, and that the IA misinterpreted the information submitted. In their appeal, - the PPS explained that the requisite information was submitted in a timely manner and pursuant to the - guidance, but, in an inconsistent format from other projects' Actively Engaged documentation. As a - result, the Independent Assessor overturned its original determination and the PPS was successful on - appeal. -
