Quarterly Report - Implementation Plan for Millennium Collaborative Care

Year and Quarter: DY1, Q2 **Quarterly Report Status:** Adjudicated

Status By Section

Section	Description	Status
Section 01	Budget	Completed
Section 02	Governance	Completed
Section 03	Financial Stability	Completed
Section 04	Cultural Competency & Health Literacy	Completed
Section 05	IT Systems and Processes	Completed
Section 06	Performance Reporting	Completed
Section 07	Practitioner Engagement	Completed
Section 08	Population Health Management	Completed
Section 09	Clinical Integration	Completed
Section 10	General Project Reporting	Completed
Section 11	Workforce	Completed

Status By Project

Project ID	Project Title	Status
2.a.i	Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management	Completed
2.b.iii	ED care triage for at-risk populations	Completed
2.b.vii	Implementing the INTERACT project (inpatient transfer avoidance program for SNF)	Completed
2.b.viii	Hospital-Home Care Collaboration Solutions	Completed
2.d.i	Implementation of Patient Activation Activities to Engage, Educate and Integrate the uninsured and low/non-utilizing Medicaid populations into Community Based Care	Completed
3.a.i	Integration of primary care and behavioral health services	Completed
3.a.ii	Behavioral health community crisis stabilization services	Completed
3.b.i	Evidence-based strategies for disease management in high risk/affected populations (adult only)	Completed
3.f.i	Increase support programs for maternal & child health (including high risk pregnancies) (Example: Nurse-Family Partnership)	Completed
4.a.i	Promote mental, emotional and behavioral (MEB) well-being in communities	Completed
4.d.i	Reduce premature births	Completed

Section 01 – Budget

IPQR Module 1.1 - PPS Budget Report (Baseline)

Instructions :

This table contains five budget categories. Please add rows to this table as necessary in order to add your own sub-categories. The budget categories used in this table should reflect the budget categories you used in your application. If budget entered varies from PPS application or previous implementation plan submission, please describe changes and justifications in the box provided.

Budget Items	DY1 ($)	DY2 ($)	DY3 ($)	DY4 ($)	DY5 ($)	Total ($)
Waiver Revenue	30,318,631	32,309,696	52,248,833	46,266,142	30,318,631	191,461,931
Cost of Project Implementation & Administration	**15,332,744**	**23,504,354**	**34,926,881**	**30,570,359**	**30,098,173**	**134,432,511**
Revenue Loss	**0**	**0**	**0**	**0**	**0**	**0**

IPQR Module 1.3 - PPS Flow of Funds (Baseline)

Instructions :

In the table below, please detail your PPS's projected flow of DSRIP funds for the next five years, splitting out the flow of funds by provider type. The provider types match the categories used for the Speed & Scale portion of your Project Plan Application.

- This table requires your funds flow projections on an annual basis. Subsequent quarterly reports will require you to submit your actual distribution of funds to these provider categories on a quarterly basis.
- These quarterly submissions of actual funds distribution will ultimately be required at the provider level (as opposed to the provider type level required here)

Funds Flow Items	DY1 ($)	DY2 ($)	DY3 ($)	DY4 ($)	DY5 ($)	Total ($)
Waiver Revenue	30,318,630.71	32,309,695.52	52,248,832.58	46,266,141.83	30,318,630.71	191,461,931

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Finalize governance structure and sub-committee structure	
Establish a clinical governance structure, including clinical quality committees for each DSRIP project	The Clinical/Quality Committee has been established, and a charter has been drafted. The membership and charter will be finalized and approved in time for the Dec. 31, 2015 deadline.
Finalize bylaws and policies or Committee Guidelines where applicable	
Establish governance structure reporting and monitoring processes	The Board of Managers has approved several committee charters, and all active committees submit their meeting minutes to the Board for review/acceptance. This milestone is on track to complete as scheduled.

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Finalize community engagement plan, including communications with the public and non-provider organizations (e.g. schools, churches, homeless services, housing providers, law enforcement)	The CBO Task Force and "Voice of the Consumer" Sub-Committee have been established and meet regularly. The remaining tasks in this workstream are progressing as expected.
Finalize partnership agreements or contracts with CBOs	This milestone is progressing as expected.
Finalize agency coordination plan aimed at engaging appropriate public sector agencies at state and local levels (e.g. local departments of health and mental hygiene, Social Services, Corrections, etc.)	The status of this milestone changed due to previous limitations to the MAPP.
Finalize workforce communication and engagement plan	The Workforce Development Work Group has been formed and meets regularly. The remaining tasks in this milestone are progressing as expected.
Inclusion of CBOs in PPS Implementation.	MCC contracted with several CBOs to conduct PAM assessments. The CBO Task Force meets regularly, and other tasks are progressing as expected.

IPQR Module 2.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing your governance structure and processes and achieving the milestones described above, as well as potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Given time constraints of Board of Managers members (many of whom administer healthcare facilities), there is a compelling need to ensure that board meetings are run effectively. Committee reports and reports on process and clinical performance outcomes must be formatted in a manner that will not only allow extensive reporting on all PPS organizational and project components, but also permit board members to readily pinpoint issues that need to be resolved. Use of color-coding, standardized presentation formats, and brief narrative explaining results will grow in importance, particularly as the number of measures to report on increases over time.

A second challenge pertains to maintaining a high level of involvement by board members. One way to meet this objective is to ensure that participation in board and committee meetings results in learning experiences that can be adapted by board members to their own facilities. It will be important to provide continuing education opportunities to board members both inside and outside the context of structured board and committee meetings.

A third risk involves communications. One of the key challenges confronting a PPS is to educate the entire community about DSRIP. Failure to educate the community will hinder the success of the PPS and dilute outcomes. At present, relatively few people in the community have an understanding of the objectives and desired results of DSRIP. As community and healthcare activists, board members are best suited to drive the communication plan and evaluate its effectiveness. They can do so by involving board members from PPS partner institutions in the DSRIP process, closely monitoring the extent to which communication activities and timelines adhere to the overall communication plan, encouraging the active involvement of Medicaid beneficiaries in DSRIP proceedings and affairs, and periodically reviewing survey results which aim to measure the community's level of understanding of the wide-sweeping DSRIP initiative.

IPQR Module 2.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Effective governance of the PPS is dependent upon the success of all other workstreams:

Workforce development will require innovative approaches for retraining inpatient workers for emerging community-based healthcare careers, for filling primary care gaps, and for integrating physical with behavioral health at service sites throughout WNY. All of these workforce development dependencies (among others) must be aligned to meet DSRIP objectives, and the Board of Managers will be responsible for overseeing this work.

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

An IT infrastructure is the backbone of all DSRIP projects, providing the platform for recording, reporting, and analyzing all process and performance outcome measures that must be monitored by and responded to by the Board of Managers.

Clinical Integration will serve as the foundation for ensuring that standardized evidence-based procedures are used to conduct multiple projects at multiple sites. Clinical integration will drive performance, and the board's effectiveness will be dependent upon it.

Maximizing Practitioner Engagement through training and education is another important dependency. Active participation by clinicians is not only essential for meeting DSRIP objectives, but it is also a prerequisite for spearheading innovation that is instrumental to meeting the Triple Aims of improving the patient experience of care, improving the health of the population, and reducing the per capita cost of care.

Active patient engagement is perhaps the most critical factor that will determine the success of the governing board and the entire DSRIP project in WNY. The overwhelming majority of Medicaid beneficiaries are challenged by poor housing, lack of nutritious food, lack of transportation, and unsafe neighborhoods. Engaging these patients in healthcare in the face of these issues will be the biggest challenge confronted by the MCC PPS. The Board of Managers—and the entire organization—will need to prioritize cultural competency and health literacy training, push for the overwhelming success of the patient activation project (2.d.i.), ensure that Medicaid beneficiaries themselves play a meaningful role in PPS operations, and see to it that CBOs that serve Medicaid beneficiaries are a vital part of the DSRIP agenda.

Millennium Collaborative Care (PPS ID:48)

IPQR Module 2.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for the development of your governance structure and processes and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Lead entity	Erie County Medical Center Corporation (ECMCC)	Ensure all governance is in place and functioning to support community projects
MCC executive management	Led by Al Hammonds, Jr. CSSBB (Executive Director)	Provide overall leadership for PPS partners and activities; ensure governance strategy is established and followed
MCC Board of Managers	Chair: Anne Constantino	Facilitate key decisions; lead, develop, and audit/monitor projects
Finance Committee	Richard Braun, Mel Dyster, Colleen Muncy, Mike Sammarco, Chris Koenig, Raj Mehta, Lou Santiago, Christine Kemp, Gregory Turner, Sheila Kee, Katherine Panzarella	Oversee PPS budget and funds flow; ensure financial strategy/operations align with DSRIP goals
Clinical/Quality Committee	Co-chairs: Michael Cummings MD (UBMD Psychiatry); Joanne Haefner FNP (Neighborhood Health Center)	Provide guidance and oversight for 11 MCC projects; develop clinical metrics and processes to support accountability for project outcomes
Family/caretaker support/representation	"Voice of the Consumer" Sub-Committee member: Tasha Moore (Community Health Worker and Medicaid beneficiary)	Serve as a voting member of the Board of Managers; represent Medicaid beneficiaries and their caretakers/families

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Module 2.6 - IPQR Module 2.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS with regard to your governance structure and processes.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
CBO Task Force	Advisory	Lead and develop meaningful community engagement
"Voice of the Consumer" Sub-Committee	Advisory	Capture patients' expectations, preferences, and aversions
Workforce Development Work Group	Advisory	Develop and coordinate overall workforce transformation strategy
External Stakeholders		
Attested CBOs	Advisory	Ensure governance supports DSRIP protocols
Health plans, managed care organizations	Value-based payment reform	Develop committee to support payment reform
Legislators	Regulatory waivers	Support regulatory change; remove barriers to collaboration
NYS DOH	Regulatory oversight	Ensure all laws and regulations are adhered to
NYS Office of Mental Health	Regulatory oversight	Ensure behavioral health regulations are followed; adhere to necessary mandates
OASAS	Regulatory oversight	Ensure all substance abuse laws are adhered to
OPWDD	Regulatory oversight	Ensure patients with developmental and intellectual disabilities are represented
Office of Children and Family Services (OCFS)	Regulatory oversight	Ensure children- and family-related laws are maintained

IPQR Module 2.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream and your ability to achieve the milestones described above.

Committees will communicate utilizing a communication forum developed by IT. Each committee will have dashboards and reporting requirements. A portal on the MCC website will be created for governance, and governance documents will be uploaded as they are approved. The portal will also be used to communicate with the community about the organization of the PPS, and to publish committee meeting schedules and agendas, minutes, and membership rosters as appropriate. A two-way communication system will also be set up for resolving grievances.

We plan to use a cloud-based suite of applications to support communication with, and collaboration among, members of the PPS. This solution includes conferencing and group messaging across the organization. Additional CRM and project management components are currently being evaluated as adjuncts to the existing infrastructure. A cloud-based solution offers the scalability, extensibility, and functionality required for an agile, efficient organization.

IPQR Module 2.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The Governance Committee will regularly report to the Board of Managers on progress in achieving governance milestones. The progress will be measured against the timetable adopted by the Board. Success will be measured initially by finalizing Board of Manager appointments and staffing the committees and sub-committees. For each committee, charters will be drafted, reviewed, and adopted, and reporting and monitoring processes will be defined.

Quarterly reports will describe (but not be limited to):

Changes or updates to committee rosters/charters/by-laws, organizational structure, and policies
Partnership agreements/contracts with CBOs
Agency coordination plan for engaging public sector agencies
The progress/success of these efforts geared towards community engagement and public sector outreach and education will be measured in terms of:
Engagement with the community
Evidence of implementation of the community engagement plan
Community engagement events

Workforce communication and engagement plan

IPQR Module 2.9 - IA Monitoring

Finalize PPS finance structure, including reporting structure	The Finance Committee has met weekly in order to complete tasks #1-7 by 9/30. Task #8 will be completed by 12/31.
Perform network financial health current state assessment and develop financial sustainability strategy to address key issues.	Financial sustainability reviews and discussions are underway. Tasks #1-5 are in process, and the assessment (task #6) is expected to begin on 10/22.
Finalize Compliance Plan consistent with New York State Social Services Law 363-d	The Compliance Officer for the lead entity (ECMCC) is currently working on requirements of 363-d. The individuals or committees responsible for some of these tasks may shift (for example, compliance reporting must go directly to the ECMCC Board of Directors, not the MCC Board of Managers).
Develop detailed baseline assessment of revenue linked to value-based payment, preferred compensation modalities for different provider-types and functions, and MCO strategy.	VBP evaluation process underway.
Finalize a plan towards achieving 90% value-based payments across network by year 5 of the waiver at the latest	The status of this milestone changed due to previous limitations to the MAPP.
Put in place Level 1 VBP arrangement for PCMH/APC care and one other care bundle or subpopulation	
Contract 50% of care-costs through Level 1 VBPs, and >= 30% of these costs through Level 2 VBPs or higher	
>=90% of total MCO-PPS payments (in terms of total dollars) captured in at least Level 1 VBPs, and >= 70% of total costs captured in VBPs has to be in Level 2 VBPs or higher

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 3.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

Reduction in hospitalizations (overall goal of DSRIP projects) will result in revenue losses for hospitals due to decreased utilization. Skilled nursing facilities will also experience a drop in revenue. The shift to VBP will be important for the long-term sustainability of these facilities in spite of reduced utilization. MCC will implement bundled payments, shared savings models, and other VBP approaches to ensure providers can continue to operate beyond the five years of the Waiver.

Difficulty in engaging the payers. The Medicaid MCOs seem reluctant to engage with the PPS and are taking a "wait and see" approach since they will reap the benefits of the DSRIP delivery model whether they actively participate or not. Many of the enhanced services described in the projects (e.g., care coordination, peer navigation, crisis stabilization) are not consistently billed, coded, or reimbursed under current models. Without involvement and investment from the major payers and Medicaid MCOs, providers won't be able to afford to offer enhanced and expanded services. This will make it impossible to earn achievement values for implementation and engagement. Request support from NYS DOH urging payers to participate in DSRIP initiatives. Collaborate with payers on VBP structures, reporting practices, and metrics. The Finance Committee will constantly communicate with the Medicaid MCOs as an attempt to actively engage them in the process. The PPS may require assistance or intervention from NYS DOH with some payers. Several DSRIP projects provide case/care management services to many kinds of patients (e.g., chronic diseases, pregnant women); these services will augment the payers' existing programs, allowing them to benefit from healthier members without adding to their care management staff.

Insufficient DSRIP revenue stream. Lack of revenues could impact project performance and lead to disinterest by providers. Educate providers that VBP is a long-term solution for achieving financial sustainability that is not dependent on DSRIP revenues.

Partners' inability to provide data or reluctance to share data. Inability to access data or validate analytics. Constant communication with the partners who are unable or unwilling to provide data. Communications will explain the rationale and necessity for data sharing to meet project goals and metrics, and will ultimately impact or inhibit the flow of funds to PPS partners who are most in need. Appropriate security and privacy policies will be established and enforced across the PPS. Partners will be involved in the establishment of these policies, to encourage widespread buy-in.

PPS providers are not compliant with PPS provider agreements and reporting requirements. Reporting requirements are overwhelming or unclear to providers. If providers do not fulfill their reporting requirements, performance levels across the PPS will suffer. Provide timely and clear communication with and among PPS stakeholders. Offer simple, easy-to-follow instructions and training sessions. Conduct test runs of reporting and data functions to meet quarterly and semi-annual reporting.

Reports are confusing, and PPS participants don't look at them. To create a reporting culture throughout MCC, all stakeholders will need an easy, clear means for understanding whether targets are being met or not. Simplify this process for partners.

Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 3.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Finance Committee members will be actively engaged with all PPS committees and project leaders. The finance function will need to understand the requirements and participation level for all projects, project performance measurement and reporting, and project costs and impacts. Finance team members will also actively participate in clinical discussions related to PPS projects.

The IT Systems & Processes workstream is dependent on Financial Sustainability: Once providers have adopted the technologies required under DSRIP, the costs do not go away. It will be important that providers are able to meet the continuing costs of additional and updated IT assets. As security and privacy regulations grow in complexity and scope, the costs of maintaining a secure system that shares data and meets regulatory/confidentiality requirements will only increase. Finance will also support access to data regarding project performance, platform integration, and Rapid Cycle Evaluation.

Governance: Well-defined roles and responsibilities for the PPS lead, partners, and in particular for finance, compliance, and audit, will need to be established. Financial sustainability will be necessary to maintain a governance structure for continued improvements and common goals with the Medicaid populations in the future post-DSRIP transformation.

Workforce: The finance team will need to understand the workforce strategy and plans, as well as related transition costs. Finance will support the tracking of costs and impact on full-time equivalents, compare actual to projected, and define how workforce spending will be tracked/reported to PPS and DOH.

Performance Reporting: The analytics software used for DSRIP needs to be available and maintained by the lead entity. It needs to have software upgrades and be available for continued use by the practices for continued performance reporting and quality needs.

Provider Engagement: Ongoing community-wide provider engagement for the Medicaid population is critical. Financial Sustainability needs to be linked to improvement in outcomes ongoing. Financial sustainability will be affected by continuation of a community-wide forum. With new alliances being formed, the hope is they will continue to expand and flourish with a new sense of purpose.

Population Health Management: Population health management and stratification of registries is not possible without robust clinical analytic software. The financial sustainability of this is tied with performance reporting and ongoing management of the software.

Millennium Collaborative Care (PPS ID:48)

IPQR Module 3.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Project managers for each project	Priti Bangia, Tammy Fox, Catherine Lewis, Sandy McDougal, Saralin Tiedeman, Andrea Wanat, Don Vincent, Kim Backey, Janet Stoeckl	Develop implementation and operational budgets necessary for project success
MCC Director of Finance	Katherine Panzarella	Manage finance functions of the PPS; oversee receipt, distribution, and safekeeping of DSRIP funds; hold responsibility for reporting, both externally to NYS DOH and other regulatory bodies, and internally to the governing committee and work groups
Accounting Manager	Tronconi Segarra & Associates	Develop infrastructure for finance office including general ledger, accounts payable, and payroll functions
Accounts Payable	Tronconi Segarra & Associates	Day-to-day accounts payable function, including obtaining approval of invoices, processing for payment, check printing, and reporting
Payroll	PPC Strategic Services LLC; Grider Support Services LLC	Payroll processing function, including timekeeping, obtaining approval for payment, processing payroll, check distribution, and reporting
MCC Compliance Officer	New hire	Oversee compliance programs of PPS activities, including adherence to the compliance requirements of the lead entity
Audit	McGladrey, LLP	Perform audits according to standard accounting principles
Value-Based Payment (VBP) subject matter expertise	VBP Sub-Committee (Kristen Davis, Mel Dyster, Sheila Kee, Mike Sammarco)	Develop VBP Transition Plan; oversee implementation of the plan
Health plans	Christine Blidy (Blue Cross Blue Shield); Anthony Montagna (Independent Health); Carla D'Angelo (YourCare); John Place (Fidelis Care)	Establish VBP partnership with MCC; submit claims accounting for payment reconciliation

Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 3.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Tronconi Segarra & Associates	Accounting firm contracted by MCC	Financial management and auditing
Finance Committee (Richard Braun, Mel Dyster, Colleen Muncy, Mike Sammarco, Chris Koenig, Raj Mehta, Lou Santiago, Christine Kemp, Gregory Turner, Sheila Kee, Katherine Panzarella)	Oversight and direction	Review/approve MCO Strategy for VBP Transition and VBP Transition Plan; ensure VBP initiatives are aligned to DSRIP goals; review, approve and monitor implementation of financial stability plan, distressed provider plan, project impact matrix, and financially fragile watch list
Board of Managers (chair: Anne Constantino)	Oversight	Review/approve VBP Transition Plan; monitor and audit fiscal operations; resolve conflicts; adopt Finance Committee charter; adopt financial stability plan; adopt distressed provider plan; review and approve project impact matrix; approve financially fragile watch list; adopt MCO Strategy for VBP Transition
MCC Finance Director (Katherine Panzarella)	Lead implementation	Management and distribution of project funds; oversee all financial operations of PPS; oversee implementation of financial stability plan, and distressed provider plan; continually update financial status of providers; monitor financially fragile watch list; ensure sound financial reporting
Executive leadership and board members of provider partners (Andrew Boser, Richard Cleland, Timothy Finan, Clare Haar, Mary Hoffman, Sheila Kee, Norma Kerling, Kristin Kight, Cheryl Klass, Joseph Ruffolo, Michael Whyte, Christopher Lane, Allegra Jaros, Richard Braun)	Oversight and participation in decision-making	Stay involved in financial activities of MCC PPS; actively participate in development of VBP Plan; as appropriate, report on financial status of their institutions and on efforts to improve financial performance
External Stakeholders		
McGladrey, LLP	External audit	Perform audit of PPS financial operation including internal controls and financial reporting
Brigida Scholten and Allison Shelton (KPMG)	Liaison	Serve as liaison between NYS DOH and PPS; provide updates on NYS DOH expectations and deliverables
Community representatives: Susan Barlow, Ellen Breslin, Kerri Brown, Lucy Candelario, Mindy	Provider partners and representatives	Regular, timely, effective communication with community groups and organizations

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Cervoni, William Covington, Mary Craig, Charlotte Crawford, Robert DeBereaux, Ricardo Herrera, Diann Holt, Traci Hopkins, Anna Ireland, Dee Johnson, George Kennedy, Pattie Kepner, Robyn Krueger, Keith Lindsay, Robert Lowery, Francesca Mesiah, Jack Norton, Kinzer Pointer, Marcia Restivo, Ezra Scott, Suzanne Shears, Grace Tate, Lesley Thompson-Farrell, Charles Walker II, Ava White, Carrie Whitwood, Lynn Wir		
Health foundations/grant coalitions: Health Foundation for Western and Central New York (Ann Monroe); Oshei Foundation (Robert Goia); Towers Foundation (Tracy Sawicki)	Bridge funding	Fund MCC initiatives via coalition grants
Christine Blidy (Blue Cross Blue Shield); Anthony Montagna (Independent Health); Carla D'Angelo (YourCare); John Place (Fidelis Care)	VBP transformation	Establish VBP partnerships with MCC providers; share essential data with MCC to facilitate development of VBP strategies

Millennium Collaborative Care (PPS ID:48)

IPQR Module 3.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

The finance workstream will require a suite of standard accounting applications as well as the ability to pull in data from providers across the PPS. MCC will use existing hardware and software, where possible, for basic financial reporting. It will be critical to be able to bring in progress indicators from other workstreams/projects to convey to finance; this may be done manually at first (similar to the initial financial health assessment), but ultimately we envision a central, integrated repository MCC can use to monitor PPS financial stability. It may be necessary to establish a "reporting portal" for partner organizations to submit financial performance information easily on an ongoing basis. The financial performance of MCC will also be reliant upon IT innovations that support population health and care coordination performance and drive financial results for the MCC PPS.

IPQR Module 3.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Progress reporting will be aligned with a phased approach to implementing the overall financial sustainability strategy. Success will be measured initially by finalizing appointments, staffing the Finance Committee, completing a financial health current state assessment of providers, adopting distressed provider plans, establishing a financially fragile watch list, and developing an MCO Strategy for VBP Transition as well as VBP Transition Plan. These efforts will culminate into a financial sustainability strategy, which will be used to report quarterly project- and unit-level progress.

The progress of MCC's financial sustainability efforts will be measured by:

Finalized finance structure, including reporting structure approved by the Board of Managers

Finalized Compliance Plan consistent with NYS Social Services Law 363-d approved by the Finance Committee and Board of Managers

Development of a VBP Sub-Committee charter to be approved by the Finance Committee and Board of Managers

Development of a set of principles to guide development of multi-year strategic plan to transition to a system that has 90% of Medicaid payment under a VBP system to be approved by the Finance Committee and Board of Managers

Development of a systematic approach to designing and conducting annual provider financial health evaluation policies and procedures approved by the Finance Committee and Board of Managers

Millennium Collaborative Care (PPS ID:48)

A network financial health current state assessment

Provider willingness and readiness assessments within the network to engage in various levels of VBP contracting

Development of communication and education plans explaining NYS DOH's VBP agenda and goals

Quarterly project- and unit- level reports to mark progress towards financial sustainability will include but are not limited to:

Finance Committee charter, meeting schedule, and minutes

Finance structure/organizational chart and reporting flowchart

Number of financial policies and procedures developed

Number and type of changes and updates to charters, schedules, organizational or reporting structure, policies, and procedures

Number/percent of providers in network that are financially fragile

Progress towards the implementation of a finalized compliance plan for NYS Social Services Law 363-d

Progress towards implementation of a finalized MCO strategy for VBP transition and the VBP transition plan

Percent of care costs going through VBPs (Level 1 and Level 2)

Status of the PPS's financially fragile providers (as defined by specific financial indicators including but not limited to days cash on hand, debt ratio, operating margin, and current ratio); how their financial status affects performance; identification of additional financial fragile partners; actions taken to improve these providers' financial status

All progress reports relating to the Finance workstream will be forwarded to the Finance Committee and the MCC Board of Managers.

MCC will utilize a central data warehouse and document archive to manage and track project and workstream requirements across the organization, including internal and external milestones, policies and procedures, and other key documents. This central repository will form the basis of our overall project tracking and reporting infrastructure and will allow users to access information appropriate to their role within the organization. Such a system will support project and program management by being a source for regularly scheduled reports and searchable information as dictated by project and program management requirements. This data source will be maintained as part of the PPS's critical operational infrastructure and will enable auditing, version control, and other project tracking functions across the organization.

IPQR Module 4.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement. Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Note some milestones include minimum expected completion dates.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Finalize cultural competency / health literacy strategy.	In Progress	This milestone must be completed by 12/31/2015. Cultural competency / health literacy strategy signed off by PPS Board. The strategy should: -- Identify priority groups experiencing health disparities (based on your CNA and other analyses); -- Identify key factors to improve access to quality primary, behavioral health, and preventive health care -- Define plans for two-way communication with the population and community groups through specific community forums -- Identify assessments and tools to assist patients with self-management of conditions (considering cultural, linguistic and literacy factors); and -- Identify community-based interventions to reduce health disparities and improve outcomes.	05/30/2015	12/31/2015	05/30/2015	12/31/2015	12/31/2015	DY1 Q3	YES
Task 1. Using the Community Needs Assessment (CNA) as a foundation, MCC will work to uncover health disparities among different cultural, socioeconomic, and linguistic groups by extracting profiles of Medicaid enrollees attributed to MCC by race, ethnicity, primary language, and rural/urban status. IPQR Module 4.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing your cultural competency / health literacy strategy and addressing the specific health disparities you are targeting (based on your CNA), and achieving the milestones described above - including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

PPS provider receives revenue from MCC without Cultural Competency/Health Literacy training. Provide classes with continuing education credits and celebrate all providers who complete training in PPS publications and on social media.

CBOs are not compensated or recognized for their participation in training. Include training compensation and recognition. Create an accreditation (e.g., CBOs of Health Excellence).

Training is considered unnecessary or a waste of time. The training design is to teach and entertain in order to create memorable moments. We will use the Program to Enhance Relational and Communication Skills (PERCS) model of realistic enactments with professional actors, collaborative learning, reflection, and feedback.

Stability of CBOs. Many CBOs are small, with a small staff who are already multi-tasking, and insecure funding. This project requires stable, experienced CBOs so clients have confidence in them being there when they need them. We also need to know that the trainers we invest in are going to able to attend "train the trainer" sessions and consistently serve as lead trainers. Include an organizational profile which includes financials and staffing as part of the RFP process for selecting CBOs who will serve as lead trainers. Also consider the number of clients they serve and whether or not they have multiple sites. Identifying these organizations as primary training sites would increase our opportunity to reach the underserved/uninsured population we are seeking.

An individual's literacy level is a highly personal and sensitive area that requires building trust with a nonjudgmental approach. In addition to the CBOs, we also need to provide in-community health literacy collaborations which include public libraries and faith-based sites to make health literacy a community initiative. The objective will be to reach community members in the diverse environments where they are already comfortable, to maximize consumer engagement.

Overlapping PPSs in WNY. Work with Community Partners of WNY (led by Catholic Medical Partners) and Finger Lakes PPS to coordinate efforts. MCC has met with the other PPSs and with the Population Health Improvement Program grantee in WNY (P2 Collaborative of WNY) to identify potential areas of collaboration including conducting focus groups; designing training programs; and collecting quality metrics related to race, ethnicity, and language.

Lack of patient engagement. Changes are made "in a vacuum" and do not meet actual patient/caregiver needs. Community participants play vital roles in the cultural competency and health literacy training development and its successful implementation. Their participation and feedback in assessments, through focus groups, on social media, and in face-to-face meetings will instruct us on what will work, what does not, and how we should change things in order to make this healthcare transformation meet their needs.

IPQR Module 4.4 - Major Dependencies on Organizational Workstreams

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

There are several interdependencies between the cultural competency and health literacy workstream and other workstreams and project initiatives:

Cultural competency and health literacy training will be a key element of clinical integration activities. The aim is to give providers the training they need to be sensitive and responsive to the cultural needs of their patients, a key element for promoting ongoing patient engagement with the healthcare system.

The cultural competency and health literacy program will buttress the project 2.d.i. (Patient Activation). All patient activation coaches will be required to complete cultural competency and health literacy training as a means for improving their effectiveness in motivating patients and making sure they understand medication and plan of care instructions.

The effectiveness of the cultural competency and health literacy program will be dependent upon a supportive governing body that elevates the importance of this work.

The cultural competency and health literacy effort will be dependent upon the strength of CBOs. At least 12 CBOs will serve as cultural competency and health literacy trainers, and the CBO community will be tapped to promote participation in this essential training.

The effectiveness of the PPS's communication strategies will be dependent upon the use of health literate educational materials and other communications that can be readily understood by diverse cultural and ethnic communities across WNY.

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 4.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
MCC Director of Community-Based Initiatives	Catherine Lewis	Solicit and engage CBOs; secure master agreements; coordinate "Voice of the Consumer" Sub-Committee and CBO Task Force
Workforce vendor selected via RFP process	Rural AHEC (Valerie Putney, David Prete)	Implement PPS workforce development and training strategies, incorporating cultural competency and health literacy topics
MCC Operations Director	Juan Santiago	Manage RFP/procurement process
Cultural competency champions	CBOs, PPS partners selected via RFP process	Attend "train the trainer" classes; coordinate and deliver cultural competency/health literacy activities to community members at their respective sites
Minority business relations	Janique Curry	Facilitate inclusion of Minority- and Women-Owned Business Enterprises (MBE/WBEs); support organizations seeking MBE/WBE certification

IPQR Module 4.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Providers	Patient care	Ensure office practices are sensitive to cultural diversity and health concerns of their population; deliver culturally sensitive care
MCC Continuing Education Manager	Training oversight	Ensure all training is conducted with cultural sensitivity; develop training necessary for raising awareness on cultural diversity and health literacy; consider a dissemination plan for education developed
Staff	Consumer and patient administrative support	Ensure staff conducts business with astuteness for cultural diversity and various health literacy levels; deliver culturally sensitive care
"Voice of the Consumer" Sub-Committee	Community participation	Encourage awareness of cultural norms; support diversity; provide feedback on training and other materials
CBO Task Force	Services	Encourage awareness of cultural norms; support diversity; provide feedback on training and other materials
CBO staff trained to serve as trainers	Services	Provide culturally aware and health literacy-appropriate services; coordinate with MCC physicians to ensure care addresses barriers to care
External Stakeholders		
Patients, families, caregivers	Care seekers	Remove barriers to effective care due to cultural sensitivities; strive towards personal success goals
211 resource directory	Consumer resource information	Provide links to and information about culturally aware and health literacy-appropriate services
Literacy Volunteers of Buffalo	Educational resource	Include topic of health and cultural diversity in literacy education
Centers for Disease Control and Prevention	Resource for patients and caregivers	Provide free educational materials for varied cultural ethnicities and languages
Safety net primary care practices (e.g., Jericho Road)	PCP/FQHC	Provide medical care in a transcultural, diverse, and culturally sensitive medical home especially for refugees and low-income community members
Various organizations: International Institute; Journey's End; Jewish Family Services; Hispanics United of Buffalo (HUB); Native American	Support, outreach, advocacy	Provide support and outreach services tailored to specific populations and groups; ensure services are offered in culturally sensitive and linguistically appropriate formats; promote community

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Community Services; area Indian reservations; Olmsted Center for the Blind; Deaf Access Services; St. Mary's School for the Deaf; Gay/Lesbian Youth Services (GLYS); Pride Center of WNY; Autism Services Inc. of WNY; etc.		awareness and understanding of specific populations/groups
UB Educational Opportunity Center	Literacy and workforce development	Literacy for adults; culturally sensitive workforce development services
Local school districts, BOCES	Education resources	Literacy for adults and children
Community-based organizations (e.g., Catholic Charities)	Social determinant of health support services, i.e., counseling, housing, etc.	Offer supportive guidance services with cultural diversity and literacy sensitivity
Community health workers	Care coordination	Provide care coordination/navigation services in culturally and linguistically appropriate formats/settings
Behavioral health providers (e.g., Lakeshore Behavioral Health)	Behavioral health services	Work with refugee population
Retired Peace Corps Volunteer Group	Speakers for community forums	Assist with cultural awareness discussions, forums, and roundtables
Local government units	Education resources	Offer publicly available culturally sensitive educational materials and services (if applicable)

IPQR Module 4.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support the development and implementation of your cultural competency / health literacy strategy and the achievement of the milestones described above.

A shared IT infrastructure will be used to store and disseminate standardized health education and sample conversation scripts that will be used by providers throughout the PPS. This information will be pre-authorized with respect to meeting cultural competency and health literacy standards. A shared IT structure will also be used to track and monitor partner engagement in cultural competency and health literacy training.

IPQR Module 4.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Progress reporting will be aligned with the phased approach to implementing the overall cultural competency strategy. Establishment of project- and unit-level reporting frequency will be based on the internal and external reporting requirements to ensure the success of the PPS-wide cultural competency strategy which will be consistent with cultural and linguistic needs of the population.

The progress of MCC's cultural competency and health literacy efforts will be measured by:
Finalizing the makeup of various committees/groups (CBO Task Force, etc.)
Designing and administering stakeholder and health literacy assessments
Aggregating and analyzing responses to identify gaps and areas of focus
Communicating the results
Developing a comprehensive training strategy to address drivers of health disparities to be approved by the Board of Managers
Progress towards these overall goals will be reported quarterly based on several indicators, such as:
Percentage of assessments completed
Health disparities relating to access to care among uninsured and low/non-utilizing Medicaid patients
The percentage of uninsured and low/non-utilizing Medicaid patients who completed a patient activation screen and are connected to care

The progress of the MCC cultural competency training plans will be analyzed and reports will be developed to assess the following:
Number of training programs delivered each quarter
Geographical locations of trainings
Number of CBOs serving as cultural competency/health literacy trainers
Number of CBO staff trained to serve as trainers
Percentage of total PPS partners who participated in cultural competency/health literacy training

Millennium Collaborative Care (PPS ID:48)

Percentage of partner staff who completed training
Training outcomes (use pre- and post-training assessments to determine effectiveness)
Training satisfaction rate

Monthly and quarterly reports will track development of materials/programs/publications and the status of efforts to test these materials in pilots or focus groups.

MCC will utilize a central data warehouse and document archive to manage and track project and workstream requirements across the organization, including internal and external milestones, policies and procedures, and other key documents. This central repository will form the basis of our overall project tracking and reporting infrastructure and will allow users to access information appropriate to their role within the organization. Such a system will support project and program management by being a source for regularly scheduled reports and searchable information as dictated by project and program management requirements. This data source will be maintained as part of the PPS's critical operational infrastructure and will enable auditing, version control, and other project tracking functions across the organization.

IPQR Module 4.9 - IA Monitoring

Milestone Name	Narrative Text
Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s).	As part of our involvement with the IT TOM workgroup and our own development of an Enterprise DSRIP Solution Roadmap, we have identified a vision and approach for the future. We will require our selected solutions partner to complete an assessment/due diligence in determining best approach for delivering future state. This should be completed in early DY2. We will be issuing an RFP for the Enterprise DSRIP Solution in November 2015. We have performed a high-level assessment of HEALTHeLINK, our RHIO. This activity will be completed in early DY2.
Develop an IT Change Management Strategy.	The status of this milestone changed due to previous limitations to the MAPP.
Develop roadmap to achieving clinical data sharing and interoperable systems across PPS network	We have developed a high-level IDS solution roadmap, which we call the Enterprise DSRIP Solution. This roadmap will be completed after final selection of an enterprise solution partner. The RFP is scheduled to be released in November 2015. The roadmap will be completed with the selected solution partner's assistance.
Develop a specific plan for engaging attributed members in Qualifying Entities	The status of this milestone changed due to previous limitations to the MAPP.
Develop a data security and confidentiality plan.	We are currently working with our lead PPS entity, ECMCC, to develop the data security and confidentiality plan per the 18 workbook requirements as specified by the NYS DSRIP CIO Data Security workgroup. For DY1, Q2, Workbooks #1-4 are attached.

IPQR Module 5.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in creating and implementing your IT governance structure, your plans for data sharing across your network, your approach to data security and confidentiality, and the achievement of the milestones described above, including the potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Gap analysis for EHR and data exchange connectivity is not completed in a timely manner. If the gap analysis is delayed, remaining IT implementation steps will be delayed. PMO will clearly define goals and requirements at the beginning of the project, including timelines and key milestones. PMO will report to Board of Managers and if there are issues concerning deadlines, resources will be applied to verify targets are met.

Without dedicated, supporting MCC IT leadership and staff, there will be significant delay in deployment of the infrastructure, IDS, HIE, and data analytics systems; as a result analytics and clinical data required to improve quality of care and obtain desired community outcomes will not be available. Engage MCC IT resources by DY1, Q2.

MCC needs to assign responsibility for IT security and privacy and draft a charter/policies/procedures. Without these policies and procedures, infrastructure might be non-compliant with state or federal regulations. A member of MCC staff will be assigned duties of Privacy/Security Officer to ensure systems and interfaces meet regulations and develop/obtain consensus on security controls in use by all PPS members.

EHR solution is not affordable by providers. Without an EHR or access to one, providers will not be able to leverage the information delivered by the IDS, HIE, and data analytics. Secure value-based performance contracts which provide bonus payments for use of EHR system.

IT security tools cannot be designed until EHR adoption and IDS solution is implemented. IT security tools need to be implemented first so that they are imbedded in the architecture of the IT solutions. Those with duties/roles related to MCC privacy and security will be involved with all architecture and design solutions for EHR and IDS.

Disparate IT systems being used by partners could cause a delay in integration. The IT solution has to address multiple EHRs and provider data repositories. This includes a tiered approach to deployment of connectivity and integration of provider EHR and data repositories, dependent upon individual capabilities.

EHR vendors may not support interoperability with the RHIO at a reasonable cost, slowing implementation. Have representatives from the IT Data Committee participate in regional, state, and national conversations on this issue; apply pressure to the industry to actively support free flow of patient data.

Data is not consistent across practices and EHR vendors. This affects providers trying to interpret data from other practices and impedes population health analytics. Include EHR data standards implementation in with practice support services. Implement a data standardization/validation function.

To address cost constraints by PPS members and partners to purchase needed technology or connectivity, any IT solutions for providers must have a low cost per patient charge. Partner incentives must be structured to compel providers and PPS partners to implement the proposed solutions.

Millennium Collaborative Care (PPS ID:48)

Possible conflicts from administration of services from overlapping WNY PPSs. MCC will verify that all basic clinical patient data is flowing appropriately to and from the RHIO so patient data will be available to any provider regardless of PPS affiliation. If all WNY PPSs follow this model, delivery of the required and relevant information will benefit all and assist in delivery of desired goals and outcomes.

HEALTHeLINK and MCC training/support staff operate independent of each other. Multiple, uncoordinated outreach can cause confusion or distrust. Active, up-front coordination of activities to embed engagement of HEALTHeLINK services into the broader PPS practice transformation service.

Local HIE cannot meet requirements of the MCC HIE. Complete HIE gap analysis. Approach HEALTHeLINK with a contract to deliver on specific requirements.

IPQR Module 5.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

All workstreams are impacted by IT. Performance reporting and population health management in particular are nearly impossible without the technology in place to support them. In addition, all projects require participating providers to track patients using electronic systems. Many of the projects also require providers to not only have an EHR system in place, but to achieve MU and/or Patient-Centered Medical Home (PCMH) status. This will require extensive support and infrastructure from the central PPS IT organization.

Workforce: While technology can enable change, it is essential that the workforce strategy is defined and in place to support PPS membership through the required change. In addition, the clinical advisory committee will provide oversight and guidance in the design and development of the IDS, HIE, and data analytics systems and programs. This is to verify the IT solutions will be able to assist providers, partners, and organizations deliver on their desired outcomes and goals.

Clinical integration: Providers will need help in their offices to make this transformation, as well as receive ongoing support to sustain changes and deliver results.

Governance: The MCC leadership and governance structure has to be in place before IT processes and security/privacy policies can be finalized and approved.

Financial sustainability: Following initial implementation, it will be imperative that the PPS become financially sustainable so that the continuing costs of additional and updated IT assets can be met.

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 5.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
MCC Administrative Director	Gregory Turner	Set current and future MCC IT strategy; oversee MCC IT operations; deliver on a day-to-day basis; remediate identified IT risks and elevate to IT Data Committee and MCC governance where appropriate
MCC Compliance Officer	To be hired	Implement compliance controls and compliance program; oversee MCC privacy/security and IT change management platform
MCC IT personnel (various titles)	New hire(s)	Architect and design data exchange and interface topologies and strategies within MCC partners and members and with external entities; develop database architecture and environment for MCC; provide operational support, integration, and interoperability with MCC partners and external data sources; manage infrastructure teams; support IT architecture and systems
MCC IT privacy/security staff	To be assigned	Implement privacy/security controls and standards; monitor security controls including data security and confidentiality plans and strategy; monitor security controls; manage IT change management program; report to MCC Compliance Officer
IT TOM Development Team	From MCC: Bob Vail, John Cumbo, Priti Bangia, John J. Bono, Gregory Turner	Ensure IT initiatives align with MCC's IT TOM plan and support MCC's business and strategic vision
Clinical/Quality Committee	Co-chairs: Michael Cummings MD (UBMD Psychiatry); Joanne Haefner FNP (Neighborhood Health Center)	Provide input and guidance to IT strategy and development and design of IDS, HIE, and data analytics systems
IT Data Committee	Gregory Turner, John J. Bono, Anthony Billittier MD, Michele Mercer RN, HEALTHeLINK representatives, Community Partners of WNY (led by Catholic Medical Partners) representatives, Vicki Landes (NFMMC health home), Gail Mayeaux (Universal Primary Care)	Oversee IT program including approval of IT strategy and verification of appropriateness of vendor relationships; develop and adopt IT strategies; monitor progress and delivery to IT systems project deadlines; provide assistance if deadline or timelines are in jeopardy; remediate identified IT risks and elevate where appropriate; oversee IT Change Management Strategy
MCC Chief Clinical Integration Officer	Michele Mercer RN	Establish business and functional direction of integrated delivery model

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 5.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Board of Managers (chair: Anne Constantino, Horizon Health)	Executive governance	Address risks identified by IT Data Committee
"Voice of the Consumer" Sub-Committee	Community participation	Encourage awareness of cultural norms; support diversity; provide feedback on training and other materials
All participating organizations	Full participation	Connect to other MCC providers in order to coordinate care across the region, support ongoing interconnectivity enhancements
PPS partner IT security representatives	Varies by organization	Verify and approve security controls and data exchange requirements
Data analysis tool vendors/staff (e.g., patient activation, HEDIS, population health, 3M, Coordination of Care, etc.)	Data analytics	Support use of data analysis tools at the central PPS level as well as at individual practices (as appropriate), ensure software is tested and meets MCC needs
External Stakeholders		
RHIOs (HEALTHeLINK, Rochester, etc.)	Data sharing, connectivity	Provide community-wide exchange of patient data, facilitate patient consent, provide connectivity to the SHIN-NY; assigned as guests to IT Data Committee; assist Clinical Integration Officer in an advisory capacity
Specialized software user groups (e.g., EHRs)	Support	User support
External consulting groups	Technical support	Provide technical expertise, staff, and services as needed to assist in meeting MCC objectives
NYS Health Commerce System/MAPP	Reporting	Provide consistent reporting capabilities
Patients, families, caregivers	Care seekers, data owners	Consent to share data across MCC providers/partners; utilize patient portals as available to engage in two-way communication with providers
SHIN-NY	Connectivity	Provide secure network for exchange of information across the state
WNY Rural Broadband Network	Telemedicine	Ensure rural communities are able to connect to broadband to facilitate telemedicine needs
Payers: Blue Cross Blue Shield; Independent Health; YourCare; Fidelis Care	Data communication	Share claims and provider data with MCC to assist in meeting and measuring project objectives

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Network connectivity providers	Connectivity	Ensure all members are able to connect to broadband to facilitate telemedicine needs
NY e-Health Collaborative	Strategic direction, IT tools	Provide continued support for IT initiatives (e.g., patient portal, statewide provider directory), establish statewide technical standards/policies that enable secure exchange of patient data
External databases (e.g., health homes, MAPP)	Data	Advance their systems to ensure appropriate connectivity to MCC activity and dashboards
Salient	Data	Provide clean, consistent Medicaid provider data
Departments of health and mental health from each MCC PPS county (Allegany, Cattaraugus, Chautauqua, Erie, Genesee, Niagara, Orleans, Wyoming)	Region-specific support and services	Communication to constituents of IT capabilities of DSRIP; provide access to social determinant data
NYS DOH, OMH, OASAS	State and federal support services	Review and determine regulatory waiver requests; provide IT data, security, and consent leadership

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 5.7 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Progress reporting will be aligned with the phased approach to implementing the overall IT systems and processes strategy. Success will be measured initially by finalizing appointments, staffing the IT Data Committee, and completing an IT current state assessment. These efforts will culminate into an EHR/IDS strategy; an implementation plan; an engagement strategy/plan; a data security and confidentiality plan; and an IT infrastructure development plan for interoperability, clinical integration, and population health management which will be used to report quarterly project- and unit-level progress.

The progress of MCC's IT system and processes efforts will be measured by:
Determining the current state assessment approach
Performing risk analysis and current state assessment of IT capabilities across MCC network
Aggregated, analyzed results of the assessment identifying gaps and areas of focus in the strategic plan
Establishing an IT governance structure representative of the entities in MCC, including reporting structure
Development of data security, confidentiality, IT strategy, IT implementation, and data governance plans
Development of a change management strategy and culture
A roadmap for achieving clinical data sharing and interoperable systems
Execution of legal requirements/documents for data sharing agreements
A comprehensive training plan to support implementation of new platforms
IT requirements and specifications for key data sharing across the IDS during transitions
Establishing reporting mechanisms to IT Data Committee and Board of Managers

Quarterly project- and unit-level reports will mark progress towards IT systems and processes strategy. These reports will include but are not limited to:
Reporting structure document
Regular audits of the change management process
MCC IT gap analysis results
Approved implementation plan
Approved change management strategy
Finalized/approved engagement strategy and plan
Approved MCC data governance plan
Data sharing policies and procedures document
Clinical interoperability system is in place for all participating providers
Approve roadmap with overarching rules of the road for interoperability and clinical data sharing
Approved plans for establishing data exchange agreements between all providers within the PPS
Equipment specifications (meeting certified standards for interoperability and communications) and rationale documented
Number of signed/executed DEAAs

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

MCC will utilize a central data warehouse and document archive to manage and track project and workstream requirements across the organization, including internal and external milestones, policies and procedures, and other key documents. This central repository will form the basis of our overall project tracking and reporting infrastructure and will allow users to access information appropriate to their role within the organization. Such a system will support project and program management by being a source for regularly scheduled reports and searchable information as dictated by project and program management requirements. This data source will be maintained as part of the PPS's critical operational infrastructure and will enable auditing, version control, and other project tracking functions across the organization.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Establish reporting structure for PPS-wide performance reporting and communication.	Initial process is in place and policies are being developed as new information, data, and guidelines are made available by the DOH/IA. Milestone depends significantly on the progress of IT and Provider Engagement workstreams to establish business context, resources, and overall organizational strategy. Significant progress has been made on DEAA, BAA, and other data sharing arrangements as well as defining a minimum data set for reporting. Current data sharing and reporting processes are compliant with DOH standards. The Clinical/Quality Committee is working to help define scope and key measures. A Rapid Cycle Evaluation team is still being formed. With regards to Early Elective Delivery, six delivery hospitals under MCC with confirmation of HCS recorder/main contact. Verbal confirmation of process in place, and we will continue to support hospitals as barriers are identified. The main contacts are as follows: Eastern Niagara Hospital: Becky Kucharczak Olean General Hospital: Karen McGovern-Graham

New York State Department Of Health

IPQR Module 6.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing performance reporting structures and processes and effective performance management within your network, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Performance data cannot be obtained from partner organizations because of technical (IT) roadblocks. If partner organizations lack the technical and human resources to accurately collect and transmit the required performance data in a timely manner, blind spots will form where we cannot measure our RCE metrics with confidence. This is mitigated at the earliest stages by identifying the data collection and sharing capabilities of PPS members. Once identified and a gap analysis is performed, we can begin our implementation with partners already sharing or prepared to share data. Concurrently, we will work with the overall Clinical Integration strategy to prioritize their inclusion in implementation plans.

Performance data cannot be obtained and normalized in a timely manner due to the implementation timeline and, therefore, reports cannot be submitted to the DOH on time. Early and aggressive efforts to enlist partners who can be champions for this effort. Also, the Physician Steering Committee and Physician Performance Sub-Committee will play key roles in establishing the need for timely reporting. Lastly, remediation strategies consistent with PPS bylaws will be implemented.

Performance data is obtained but is incorrect, incomplete, or corrupted. If data is delivered in non-standardized formats, the effort needed to acquire relevant data could surpass existing human and IT resources and lead to data with significant gaps and quality concerns. This may require additional resources for data extraction, transformation, and loading. Data reporting standards and practices must be defined in the policies and procedures and addressed in any project participation agreements with providers. A comprehensive data specification that aligns with data normalization and integration processes identified in the IT infrastructure strategy will be developed. Lastly, best practices for data extraction, transmission, and loading will be included in training and information materials developed to enrich a culture of performance monitoring.

Culture is resistant to change. A culture resistant to change or inundated with training requirements is less likely to deliver quality data, take the time to process findings from analyses, and implement continuous quality improvement projects. We will coordinate with the Workforce Development Work Group to streamline or better integrate performance improvement training into other education efforts, particularly those aimed at new staff. We will solicit input from provider organizations and project leads on how to better integrate performance reporting processes into existing workflows. Our communication and provider outreach teams will continuously reinforce the relationship between performance monitoring, funds flow, patient outcomes, and process improvement.

IPQR Module 6.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

IT systems & processes: IT will serve as the backbone for data collection and reporting. IT systems must be designed to accommodate

performance reporting.

Clinical integration: Clinical integration facilitates the coordination of patient care across the PPS and drives improved outcomes that must be collected, analyzed, and reported through an effective performance reporting system.

Population health management: Performance reporting will provide for monitoring and assessment of population health performance, using outcomes to guide population health improvement activities.

Governance: The Board of Managers will be the ultimate entity responsible for ensuring that outcome data is used to determine incentive rewards.

Patient activation: Performance outcomes that will be reported from project 2.d.i. (Patient Activation) will determine the extent to which patient activation and motivation techniques leads to primary care connections for the uninsured and low and non-utilizing Medicaid beneficiaries.

Finance: The flow of funds provides immediate and irrefutable evidence of one key benefit of continuous quality measurement and improvement: the ability to see real dollar amounts attached to specific outcomes and goals. Funds flow also plays a significant role in dictating the speed and scale of project implementation, the ability to hire and retrain staff required to monitor and report on quality data, and the PPS's ability to meet the overall DSRIP goals.

Clinical quality: Performance reporting is closely linked with clinical quality in terms of both its goals and processes. Evidence-based medicine will guide the establishment, evaluation, and analyses of key performance metrics. These metrics will be established and approved through close coordination with the Chief Medical Officer, Physician Performance Sub-Committee, project leads, and other subject matter experts.

IPQR Module 6.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
MCC Chief Reporting Officer	John J. Bono	Oversee development and operation of an effective system for reporting and responding to process and performance outcomes; oversee and coordinate all reporting functions including data acquisition, report collection, specifications identification, and continuous quality improvement
MCC Administrative Director, data analysts, IT resources	Gregory Turner and various individuals	Implement reporting and communication technologies; provide hardware, software, networking, and security support for performance reporting, data collection, and analytics
Gatekeeper/IT Security Officer (ECMCC)	Robert Vail	Ensure compliance with all statutes and regulations for data handling, security, destruction, and access; coordinate HCS access with ECMCC
MCC Compliance Officer	New hire	Audit and monitor network to ensure objectives are being met
MCC Clinical Integration Officer	Michele Mercer RN	Establish performance goals; integrate population health and data tools into performance metrics
MCC Chief Medical Officer	Anthony Billittier MD	Define clinical metrics, liaise between medical community and MCC leadership
MCC Population Health Manager	Priti Bangia MSc MBA	Assist with development of population health metrics; monitor data and statistics necessary to prove outcomes
Physician Steering Committee	Chair: Frances Ilozue MD	Advise Board of Managers on clinical and quality issues; ensure physician community is represented and reports accurately reflect physicians and practices
Physician Performance Sub-Committee	Members of the Physician Steering Committee	Review provider metrics, determine remediation approach for under-performing providers
Rapid Cycle Evaluation (RCE) support team	Various individuals	Establish the goals and objectives of the RCE program
Performance monitoring champions	Various individuals	Coordinate with CRO, Physician Steering Committee, Clinical/Quality Committee, external stakeholders, and PMO to identify metrics, goals, and means to facilitate PPS-wide culture of performance monitoring and continuous quality improvement
MCC Director of Community-Based Initiatives	Catherine Lewis	Ensure community network has adequate access to computer systems to support reporting of results
Clinical/Quality Committee	Co-chairs: Michael Cummings MD (UBMD Psychiatry); Joanne	Provide subject matter expertise on measure identification and

Millennium Collaborative Care (PPS ID:48)

IPQR Module 6.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
MCC Executive Director, Al Hammonds, Jr. CSSBB	Oversight	Ensure all reporting and measurement is meeting DSRIP objectives; ensure timely submission of all reporting
Physician Steering Committee Chair (Frances Ilozue MD)	Physician engagement	Ensure physician community is represented and reports accurately reflect physicians and practices
Finance Committee (Richard Braun, Mel Dyster, Colleen Muncy, Mike Sammarco, Chris Koenig, Raj Mehta, Lou Santiago, Christine Kemp, Gregory Turner, Sheila Kee, Katherine Panzarella)	Finance reporting	Coordinate all reporting related to financial sustainability, budget, and funds flow
Governance Committee	Oversight	Approve proposed goals and objectives of MCC RCE program
IT Data Committee	IT coordination and data standards	Ensure performance monitoring and reporting meet industry standards; enable coordination of IT and data resources across PPS
All MCC practitioners	Engagement, reporting, acting on reports	Provide feedback on the effectiveness of training and reports; provide input on reporting needs relevant to their particular area of practice; participate in data collection activities and change management, including remediation
Workforce Development Work Group	Workforce reporting	Coordinate all reporting and data collection for hiring, training, reassignment, and other personnel-related initiatives; coordinate deployment of training in performance reporting and quality improvement
External Stakeholders		
Patients, families, caregivers	Data owners	Consent to exchange of data to facilitate accurate reporting across PPS
Local government agencies	Regulatory oversight	Support PPS reporting by considering regulatory waivers where needed
Local chapters of national professional societies and associations	Subject matter expertise	Provide input on reporting needs relevant to their particular area of practice
Medicaid MCOs: Blue Cross Blue Shield; Independent Health; YourCare; Fidelis Care	Data, expertise	Provide data on attributed recipients; advise on population health best practices; supply baselines for their population
HEALTHeLINK	RHIO/QE	Coordinate and collaborate on collection of EHR, CCD, and ADT

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
		data across the PPS and region; provide connectivity to SHIN-NY
New York State DOH	Regulatory body	Provide data required to identify attributed recipients; collect claims-based measures; report on all measures identified in Reporting Measures and Specifications Manual as DOH reporting responsibility

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 6.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support your approach to performance reporting.

It is expected that the shared IT infrastructure will form the backbone of the performance reporting effort. As the central conduit for data flow both from and to the providers, it is essential that IT projects be coordinated with requirements for collecting performance data.

IT will be required for:

Data collection and transmission: Electronic health record, claims, and other data will have to be communicated securely and in a timely manner in adherence to the PPS data governance plan. Leveraging the RHIO to facilitate the exchange and delivery of encounter information will be crucial.

Data warehousing: Data, once collected, will have to be aggregated in a central location for analysis. This will require hardware, software, and technical expertise.

Data normalization and acquisition: Data acquisition across types and sources are all dependent on the IT infrastructure. Collaboration and coordination with other area PPSs as well as the local RHIO will further enhance performance improvement, regionally.

Communications infrastructure for transmitting reports to providers, the DOH, and key stakeholders: This includes the ability to host dynamic dashboards and, eventually, real-time streaming analytics. This will require resources such as web hosting, platform selection and acquisition, technical expertise from web services, or other development efforts.

Extract, transform, and load (ETL) processes and data integration: Effectively leverage data sources provided by NYS DOH via Salient Interactive Miner and the MAPP. Define ETL processes for making best use of that data and integrating it into internal PPS analytics, reports, and dashboards.

IPQR Module 6.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Progress reporting will be aligned with the phased approach to implementing the overall performance reporting strategy. Establishment of project- and unit-level reporting frequency will be based on the internal and external reporting requirements to ensure the success of MCC-wide performance reporting strategy. Success will be measured initially by finalizing appointments, staffing the Clinical/Quality Committee, and completing a comprehensive network assessment. The progress of MCC's performance reporting and communications efforts will be measured by

Millennium Collaborative Care (PPS ID:48)

a performance reporting and communications strategy approved by the Board of Managers.

The strategy will at minimum include the following:
Roles and responsibilities
Creation of clinical and quality dashboards
Defined RCE approach
Creation of RCE support team
Policies and procedures for continuous and systematic data collection and rapid feedback including remediation strategies approved by Board of Managers
A reporting schedule aligned with finance, governance, and cultural competency/health literacy
A comprehensive training program

Overall project- and unit-level reports to mark progress towards performance reporting and communication will include but are not limited to:
RCE support team meeting schedule and minutes
RCE goals
Gap assessment results
Data collection policies and procedures
Reporting guidebook
Sample scorecard and report templates; examples of deliverables presented to partners
Training curriculum including materials
Participant/attendance record
Training outcomes

MCC will utilize a central data warehouse and document archive to manage and track project and workstream requirements across the organization, including internal and external milestones, policies and procedures, and other key documents. This central repository will form the basis of our overall project tracking and reporting infrastructure and will allow users to access information appropriate to their role within the organization. Such a system will support project and program management by being a source for regularly scheduled reports and searchable information as dictated by project and program management requirements. This data source will be maintained as part of the PPS's critical operational infrastructure and will enable auditing, version control, and other project tracking functions across the organization.

Milestone Name	Narrative Text
Develop Practitioners communication and engagement plan.	We have a structure in place to identify PPS wide professional groups in collaboration with CPWNY via the Physician Leadership Committee. We are working closely with 2di project leadership and Chief Reporting officer to obtain reporting metrics from the Clinical/Quality Committee. MCC is in the planning phases to develop a portal to make reporting available to all PPS partners. The Practitioner Communication and Engagement Plan document/outline is in development. Task #1 is complete. Planning for task #2 is in process. We have collected and categorized all of the engagement and communication touchpoints across the 11 projects throughout the life of DSRIP. Task #3 is being addressed through the adoption and implementation of Salesforce.com, which will serve as Millennium's CRM. We are exploring a partnership with a vendor to articulate our practitioner communication strategy and identify mechanisms/technology for bi-directional information sharing. We are utilizing the community-wide Physician Steering Committee to identify a cardiovascular advisory group to establish and promote standards of care in our community. We are meeting with faculty at a local college to explore trainings and a curriculum for effective teaching and motivation of practitioners. We are planning our first CME for early 2016 based on the PCMH 2014 Standards. Payer meetings have very full agendas, and the topic of engaging/influencing practitioners has not been fully addressed to date. The Southern Tier is engaged, however we are challenged finding a representative from the Northern counties.
Develop training / education plan targeting practioners and other professional groups, designed to educate them about the DSRIP program and your PPS-specific quality improvement agenda.	The Chief Medical Officer and Practitioner Engagement Coordinator are in the early planning phases of the training and education plan. We are exploring the need for a learning management system and developing a communication to the practitioners about DSRIP. A series of community events and grand rounds has been completed. Various online CME programs have been explored. We will also be leveraging training and education requirements from the 11 projects. Development of prerecorded webinars and letter to DSRIP physicians offering an onsite meeting. Practitioner Engagement Coordinator attends biweekly project standup meetings with the project managers to discuss and identify educational needs.

Millennium Collaborative Care (PPS ID:48)

IPQR Module 7.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the current level of engagement of your physician community in the DSRIP program and describe the key challenges or risks that you foresee in implementing your plans for physician engagement and achieving the milestones described above. Describe any potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Practitioners receive continuous and extensive external personal and professional communications from multiple sources; addition of DSRIP communications could further overwhelm these already busy individuals. Uniquely engage, incentivize, and provide value-add to help ensure meaningful and effective engagement. Consider small financial incentives, free Continuing Medical Education (CME) credits, office detailing used by pharmaceutical and medical equipment representatives, dinners, and other innovative methods. Engage other entities similarly trying to engage and influence practitioner behaviors (e.g., payers). Partner/collaborate with like-minded entities to leverage strength in numbers, share costs and resources, and ultimately achieve more effective interaction.

Practitioners may disagree and/or take offense with, and perhaps actively resist DSRIP initiatives (e.g., established standards of care and quality of care reporting) which could be viewed as encroachment in the doctor-patient relationship. Make every effort to ensure inclusivity, transparency, evidence-based justification, and other consensus-building techniques to maximize practitioner buy-in and ownership of DSRIP efforts and the DSRIP program itself.

The MCC network includes a wide range of types of practitioners and participants, and serves a diverse patient population across a large and varied geographical area. There is potential fragmentation among physicians and between community resources and physicians. Providers in other areas feel this is an Erie County initiative and their voices are not being heard. Maintain a physical and virtual presence. Engage geographic councils to ensure the Southern Tier and Niagara/Orleans counties are represented.

MCC practitioners vary greatly in terms of the level of resources available to them. For example, practices that have already achieved Patient-Centered Medical Home (PCMH) certification will be in a much better position to meet DSRIP project requirements (e.g., exchange patient data via EHR) than those practices that are understaffed, and those located in areas without robust community-level resources available. These disadvantaged practices will struggle to implement the same strategies in the time allowed. Allocate resources to fill in gaps. Offer meaningful incentives (cash, workforce, or equipment). Provide IT support, software, hardware, and/or videoconferencing capability. Provide onsite outreach. Engage practitioners virtually via social media, EHR alerts, virtual CME, and videoconferencing. Provide resources through HEALTHeLINK.

There is considerable county overlap with two adjacent PPSs in WNY. Among practices there are varying degrees of clinical standards, especially in outpatient/primary care. The patient experience should be relatively uniform regardless of PPS. Ultimately it would be ideal across the PPS (and the region) to achieve consensus on clinical guidelines/protocols. Minimally we want to ensure uniformity to create a seamless experience for the patient, regardless of where he or she seeks care. PPSs will agree to share registry information, use standardized referral protocols, utilize uniform tracking and reporting systems and procedures, and maintain common messaging to educate/communicate with patients. MCC will work with Finger Lakes PPS and Community Partners of WNY (led by Catholic Medical Partners) to establish common protocols for referrals (inside or outside the PPS).

IPQR Module 7.4 - Major Dependencies on Organizational Workstreams

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

IT Systems & Processes: IT capabilities will be central to the achievement of major practice/workflow transformations related to PCMH. Specific to practitioner engagement, we will need a technical solution (platform) to engage physicians and share PPS-wide and practice-specific information/messaging. This may involve utilizing existing channels (such as social media) and developing new ones that meet the participants' needs. We will establish two-way communication and use a virtual presence to share information about different workstreams within the PPS. We will host regularly scheduled virtual meetings. To communicate and share lessons learned with physicians across the state, we will encourage practitioners to use MIX (or other state-provided venues, as appropriate).

Performance Reporting: It will be critical to implement dashboards for monitoring at a central level as well as self-monitoring at the practice level.

Governance: Make certain physicians are involved in decision-making. Have physicians in different specialties (e.g., pulmonary, cardiology, etc.) review clinical guidelines. These could be ad hoc or limited-time sub-committees, formed as required.

Finance and Flow of Funds: Performance is tied to finance/flow of funds. Reduced funds flow due to lackluster or nonperformance will be passed through from PPS to practitioners, potentially resulting in practitioners not getting paid.

Workforce: Workforce redevelopment strategy involves significant redeployment and retraining.

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 7.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
MCC Chief Medical Officer	Anthony Billittier MD	Ensure policies affecting physicians are evidence-based guidelines selected with sound medical judgment; serve as provider liaison
Practitioner engagement liaison	Jillian Barone	Implement; direct; manage; monitor; and improve practitioner communication, engagement, empowerment, and ongoing relations
MCC Clinical Integration Officer	Michele Mercer RN	Ensure providers and their support staff are aware of DSRIP policies and clinical workflows
Physician Steering Committee	Chair: Frances Ilozue MD	Ensure MCC physicians are represented and support decisions
MCC Communications Director	Kelly Showard	Coordinate with practitioner engagement liaison to implement effective outreach strategies specifically targeted at practitioners
Geographic councils	Niagara Orleans Healthcare Organization (led by Sheila Kee, Niagara Falls Memorial Medical Center) and Southern Tier Council (led by Richard Braun, Olean General Hospital)	Implement practitioner engagement strategies in the Northern and Southern Tier counties of the PPS; report progress, challenges, and appropriate solutions to the Physician Steering Committee

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 7.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
All MCC practitioners	Participants	Engage in MCC projects, deliverables, and action plans
Primary care safety net practices (including SNAPCAP, VAP)	Participants	Engage safety net practices in the MCC projects, deliverables, and action plans
Primary care private practices	Participants	Engage in MCC projects
"Voice of the Consumer" Sub-Committee	Advisory	Ensure patients', families', and caregivers' voices are heard in relation to all MCC activities
Community-Based Organization (CBO) Task Force	Advisory, training	Ensure community action plans are in line with community needs; ensure selected CBO institutions are appropriate for MCC initiatives
Regional Perinatal Center of WNY	Education/training	Education of OB/GYN on use of progesterone etc.
External Stakeholders		
Local chapters of national professional societies and associations (e.g., Buffalo Chapter of National Association of Black Social Workers)	Training, outreach	Education to members regarding MCC initiatives
ASAP and NYS Council for Community Behavioral Healthcare	Regulatory oversight	Regulatory waivers
Rural health networks	Outreach	Ensure rural physicians' communication and action plans are aligned with MCC initiatives
NY Care Coordination Program (Rochester), Departments of Mental Health	Training	Regional training
Nursing organizations	Training	Nursing education
Labor partners	Outreach	Encourage buy-in and engagement from nurses and other practitioners
Patients, families, caregivers (via groups like the Parent Network of WNY)	Advocacy	Help providers understand importance of DSRIP initiatives
Physician groups/clubs (e.g., P2 Collaborative of WNY, HEALTHeLINK Physician Committee)	Outreach	Encourage buy-in and engagement from physicians
HEALTHeLINK	RHIO	Ensure providers in network are gathering consent and information is flowing across network

IPQR Module 7.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

IT capabilities to achieve major practice/workflow transformations related to PCMH

Physician participation in the development of the IT strategy and implementation plan

Technical platform to engage physicians and share PPS-wide and practice-specific information/messaging; this may involve utilizing existing channels (such as social media) and developing new ones that meet PPS needs

Easy-to-use reporting systems for practices to submit quality data; dashboard technology to share/display performance data

Patient and provider portals to facilitate communication and data sharing among providers and between providers and patients

Teleconferencing, videoconferencing, and other technology capabilities to support effective two-way communication with providers dispersed across a broad geographical area, including those with limited access to broadband

Connectivity through HEALTHeLINK, integration with EHR systems to support sharing of data across the region

Technical support and training for practices related to use of PPS-specific tools (e.g., reporting interface), RHIO connectivity/capabilities, data collecting and reporting practices, EHR/Meaningful Use, PCMH certification

IPQR Module 7.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Progress reporting will be aligned with the phased approach to implementing the overall practitioner engagement strategy. Project success and governance will be measured by the penetration within the provider community.

As the practitioner engagement strategy is developed, quarterly progress reports will include:
Hiring of a practitioner engagement liaison responsible for practitioner communication, engagement, empowerment, and ongoing relations
Development of a comprehensive practitioner network registry
A Practitioner Communication and Engagement Plan to be reviewed and approved by MCC governance

Millennium Collaborative Care (PPS ID:48)

A regular meeting schedule; meeting minutes
Comprehensive practitioner training strategy to address MCC quality improvement agenda and continuing DSRIP education

Quarterly reports will track the progress of practitioner network development, implementation, and education against project goals. Reports will include analyses of, but not be limited to, the following:
Number of practitioners in the network
Primary care capacity for both safety net and non-safety net organizations
Number of practitioners by groupings (e.g., cardiovascular, diabetes, behavioral health)

The progress of the practitioner engagement training/education plans will be analyzed and reports will be developed to assess the following:
Number of training programs delivered each quarter
Geographical locations of trainings
Number of participants per training session
Percentage of practitioners who completed training
Training satisfaction rate

MCC will utilize a central data warehouse and document archive to manage and track project and workstream requirements across the organization, including internal and external milestones, policies and procedures, and other key documents. This central repository will form the basis of our overall project tracking and reporting infrastructure and will allow users to access information appropriate to their role within the organization. Such a system will support project and program management by being a source for regularly scheduled reports and searchable information as dictated by project and program management requirements. This data source will be maintained as part of the PPS's critical operational infrastructure and will enable auditing, version control, and other project tracking functions across the organization.

Millennium Collaborative Care (PPS ID:48)

IPQR Module 8.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

Excess bed capacity. MCC hospitals have an occupancy rate of 71% that translates into 511 beds not in use, and the NYS DOH projected (2016) 499 excess beds for residential healthcare facilities in WNY. Resolve excess bed capacity in inpatient and SNF facilities by in-depth fact-finding followed by a collective recommendation process and phased-in implementation.

Gaps in RHIO interoperability. Enhanced communication and care management data sharing among primary care and specialists, mental health, health homes (HHs), and community support agencies does not exist, and the interoperability among hospitals and pharmacies needs to be enhanced. There is a lack of universal protocols across settings. We lack an interoperable HIE to make care management data accessible in real time. Activate a continuum of providers in the IDS including medical, behavioral, and community to increase HIE use and area-wide patient consent along with massive RHIO enhancements to support population health management in the PCMH connected across settings.

Gaps in primary care infrastructure. PCMH/APCM status is low within MCC, with only 36% of primary care locations (85 out of 235) currently NCQA recognized as PCMH facilities. Achieve PCMH/APCM standards and MU requirements in all safety net primary care locations. Achieve EHR connectivity to RHIO's HIE for all safety net primary care locations. Achieve health IT integrated population health management in all safety net primary care locations.

Gaps in PCP settings. There are virtually no PCP personnel devoted exclusively to care management of the high-risk complex population associated with avoidable admissions and readmissions. Establish risk stratification built into the IDS. Embed new care management teams in safety net locations that provide care management services across settings between office encounters with the highest risk population. Engage patients in the IDS at all levels. Achieve real service integration with HHs.

Workforce competency gaps. A crucial component of population health management to achieve DSRIP goals will be establishing PCMH teams devoted exclusively to care management of the high-risk complex population associated with avoidable admissions and readmissions. The roles, responsibilities, skills, and competencies for this have not yet been defined. We will address these gaps by building training into the practice transformation process used by the primary care locations in the MCC network to achieve PCMH 2014 recognition.

Barriers to patient engagement in population self-management. Broadly, we will engage patients in the IDS at all levels. Operationally, we will embed patient engagement and activation into the practice transformation process used by primary care locations in the MCC network to achieve PCMH 2014 recognition.

Failure of the multiple PPS organizations in WNY to cooperate through the use of common protocols, standardized reporting requirements, and sharing lessons learned will negatively impact the primary care transformation process because providers will become confused by inconsistent or even contradictory instructions that will impede their performance. MCC, Community Partners of WNY (led by Catholic Medical Partners), and the Finger Lakes PPS will hold routine meetings and share information and ideas. Wherever possible, the three PPS organizations will develop standards and procedures that will guide implementation of the population health roadmap in a unified way.

Millennium Collaborative Care (PPS ID:48)

Attributed patients do not provide consent to allow sharing of clinical data, causing inaccurate data analytics and population health information and an inability to provide quality, coordinated care for the community. Develop materials to outline benefits of sharing clinical data and require all patient access points to educate and capture patient consent documents.

IPQR Module 8.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Population health management that is capable of reducing avoidable admissions and readmissions is highly dependent on all elements of the PPS.

Population health management is dependent upon PPS-wide clinical integration and protocol for defining risk stratification so that care management intensity and scope is stepped according to level of patient need.

Interoperability across settings for population health is dependent upon massive IT/HIE systems and processes enhancements.

Population health management of high-risk panels must be high-touch and active across settings using new roles and responsibilities that are not found in encounter-based, office-based care. To be effective, the new high-risk care management must function outside the office under the direction of the PCMH. This new out-of-office intensive care management is not currently covered by encounter-based reimbursement, so it is highly dependent upon financial sustainability through value-based payments.

Population health management is dependent upon a trained primary care, behavioral health, and HH workforce and, therefore, must rely on the expertise, planning, and work of the workforce workstream.

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 8.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational work stream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
IT Data Committee	Gregory Turner, John J. Bono, Anthony Billittier MD, Michele Mercer RN, HEALTHeLINK representatives, Community Partners of WNY (led by Catholic Medical Partners) representatives, Vicki Landes (NFMMC health home), Gail Mayeaux (Universal Primary Care)	Identify sources of data
MCC Clinical Integration Officer	Michele Mercer RN	Establish performance goals, integrate population health and data tools into performance metrics
Physician Steering Committee	Chair: Frances Ilozue MD	Implement strategy for ensuring physician engagement
Chief Medical Officer	Anthony Billittier MD	Oversee strategy for ensuring physician engagement
Physician Performance Sub-Committee	Members of Physician Steering Committee	Review provider metrics, determine remediation approach for under-performing providers
MCC Administrative Director, data analysts, IT resources	Gregory Turner and various individuals	Implement reporting and communication technologies, risk stratification, and data sharing across PPS
Governance Committee	Various individuals	Establish goals and objectives of MCC Rapid Cycle Evaluation (RCE) program with assigned representation from Physician Performance Subcommittee and Clinical/Quality Committee
Clinical/Quality Committee	Co-chairs: Michael Cummings MD (UBMD Psychiatry); Joanne Haefner FNP (Neighborhood Health Center)	Develop clinical metrics and processes to support accountability for population outcomes
MCC Population Health Manager	Priti Bangia MSc MBA	Develop clinical and community metrics for projects, support the community in education and implementation of population health techniques, work closely with clinical integration and IT business owners, monitor/ensure all metrics from the community are uploaded in a clean, secure manner allowing for accurate reporting and data collection
Other MCC staff/population health team	To be designated	Support/educate community providers on conducting and uploading population health data for successful reporting
MCC care transition coordinators	To be designated	Support outreach to patients and complete necessary metrics to measure effectiveness
Population health vendor(s)	To be selected by RFP	Supply systems that support population health management, execution, and measurement
Workforce Development Work Group	R-AHEC	Provide guidance and training/retraining as needed in relation to

Millennium Collaborative Care (PPS ID:48)

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
		the PPS-wide bed reduction plan

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 8.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Primary care practices	Care providers	Reduce avoidable admissions, ensure high-risk patients are monitored according to care plan, prevent patients from entering high-risk populations by deploying prevention and medicine based on evidence-based guidelines
Hospital/emergency department (ED) discharge staff	Care transition	Follow approved policies and procedures, especially when discharging high-risk patients; link all patients to PCPs and secure appointments
ED care coordinators/navigators	Care coordination	Intercept high-risk patients, follow approved protocols to identify and remove barriers to care
Community-Based Organization (CBO) Task Force	Patient outreach	Coordinate medically-appropriate and culturally-sensitive interventions with high-risk patients
MCC Administrative Director (Gregory Turner)	Lead MCC IT strategy; coordinate with lead entity (ECMCC) for IT alignment	Ensure IT solution meets clinical integration and population health business requirements
External Stakeholders		
Urgent care centers	Care access, care coordination	Ensure communication to PCPs, contribute to coordination of care
Health homes (adult and pediatric)	Care coordination	Document interventions and care coordination activities for sharing among health homes to manage populations holistically and enhance reporting
Health plans and Medicaid managed care organizations	Risk management	Risk stratification
CBOs	Patient outreach	Deploy resources to intervene with high-risk patients, follow approved protocols to identify and remove barriers to care
P2 Collaborative of WNY	Education	Educate patients and providers
Rural health networks	Patient outreach, care coordination	Ensure rural populations are supported by MCC and care is rendered
Pharmacies	Education	Educate patients and providers
School-based health services	Care access, care coordination	Provide improved access to care for school-aged population to prevent them from entering high-risk groups, connect students (and families) with primary care

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
All health service providers and community-based services	Community services	Community support of population health
Retail-based medical services ("minute clinics")	Care access	Provide medical services (including vaccinations) especially for uninsured or low utilizing patients in the community
HEALTHeLINK	Connectivity	Provide communication platform for essential clinical data to manage populations
FQHCs	Population health	Support impoverished and uninsured populations to decrease risk and improve health

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 8.7 - IT Expectations

Instructions :

Please describe the current Population Health Management IT capabilities in place throughout your PPS network and what your plans are at this stage for leveraging these capabilities and/or developing new IT infrastructure.

Maturation of the existing HIE. The HIE (HEALTHeLINK) is well developed in terms of its capability to collect data from hospitals, laboratories, and radiology facilities. Hospital data about admissions, discharges, and transfers is critical for identifying target populations and is available from every hospital in the region. However, population health interventions across an integrated delivery system, especially for high-risk patients, require bi-directional HIE in primary care, long-term care, and home care settings. While many primary care settings have access to read data from HEALTHeLINK, very few have the ability to feed data in so that it can be accessed in other settings. Long-term care settings currently have little connectivity. WNY was one of the first communities in the nation to establish HIE connections with home care but the data shared is limited. If these connections cannot be made in a timely fashion, there is a risk that coordination of care across the system for population health will be impaired. This will limit the ability to reduce hospitalizations. To mitigate this risk, we will encourage and support the use of Direct communication, which provides a means of secure clinical communication among organizations without the use of an HIE and therefore does not depend on the ability to create the bi-directional connections to the RHIO outlined above.

EHR implementation across the system is particularly problematic in long-term settings where EHR adoption has been slower than in other settings.

Integration of primary care and behavioral health: if it is not in place then population health efforts for patients with mental health and chronic disease will be much more difficult.

IPQR Module 8.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Progress reporting will be aligned with the phased approach to implementing the overall population health management direction. Project success and governance will be measured by the establishment of a population health roadmap which identifies the IT infrastructure necessary to support data analytics for MCC including targeted patient registries and their care management which supports primary care transformation. MCC will track its performance on domain 2 and 3 metrics (for all projects) to measure improvement over DY1 baselines. Scores will be used to determine which aspects of the population's health to focus on and to track improvement of the population health related-metrics over time. The progress of population health management will be presented to the Clinical/Quality Committee on a monthly basis. This will then be reported from the Clinical/Quality Committee to the Board of Managers on a quarterly basis.

Progress towards the development and approval of this roadmap will be reported quarterly (projected timeline versus actual implementation

Millennium Collaborative Care (PPS ID:48)

timeline/percent complete of implementation of the approved roadmap). Quarterly reports will describe progress at the project and unit level including development of the population health management roadmap approved by the Board of Managers.

The roadmap will at minimum include the following items:
Development of physician and patient communication and education plans
RFP process for selection of vendor
Implementation and deployment of population health management data analytics tools
Development of business intelligence and other data analytics reporting at the project and unit levels
Communicating results of population health management to appropriate committees and sub-committees

Population health management project- and unit-level progress reports will measure the status of the following:
Population health roadmap designed to meet PCMH 2014 requirements and reduce avoidable utilization
Risk stratification criteria: definition of priority target population; rubric for risk stratification; pilot test of risk stratification criteria
Patient registries for risk stratification, pushed electronically to physicians
Percent of primary care offices submitting NCQA application for 2014 PCMH recognition
Percent of primary care offices obtaining NCQA 2014 PCMH level 3 recognition

MCC will utilize a central data warehouse and document archive to manage and track project and workstream requirements across the organization, including internal and external milestones, policies and procedures, and other key documents. This central repository will form the basis of our overall project tracking and reporting infrastructure and will allow users to access information appropriate to their role within the organization. Such a system will support project and program management by being a source for regularly scheduled reports and searchable information as dictated by project and program management requirements. This data source will be maintained as part of the PPS's critical operational infrastructure and will enable auditing, version control, and other project tracking functions across the organization.

IPQR Module 9.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in improving the level of clinical integration throughout your network and achieving the milestones described above. Describe potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Over-reliance on hospital-employed physicians makes it difficult to achieve full CI across the community; they lack the breadth to serve as a foundation for building the clinically integrated, performance-focused platform. Include/engage a cross-section of both independent community-based and hospital-employed physicians in all programming.

Independent (community-based) physicians have limited availability, staff, and financial resources to implement changes in workflow to accommodate new care coordination processes and other DSRIP requirements. Provide centralized support/resources (e.g., physician assistance, care management, PCMH expertise, IT support) for CI efforts.

Stakeholders (e.g. ancillary providers, community-based organizations (CBOs), faith-based organizations, etc.) are too diffuse for organized performance achievements. Develop organized approach for connecting these stakeholders to hospital-based and independent primary care practices (e.g., by leveraging and automating the 211 resource directory). Promote collaboration among these stakeholders via the CBO Task Force. Review progress reports; identify "problem areas" and low-performing organizations for additional support/intervention.

Failure to engage contracted physician groups. Some physician groups may be resistant to the changes proposed. Include contracted physician groups in all clinical implementation strategies. Implement a comprehensive practitioner engagement strategy. Represent a variety of provider types on the Physician Steering Committee to ensure a wide range of voices are heard.

Technology/data integration is not available/ready for deployment in a timely manner. Develop interim technology and data strategies to communicate data to practitioners. For example, leverage existing hospital admission, discharge, and transfer data and push to primary care offices. Work with IT Data Committee on interim steps to integration.

HEALTHeLINK (RHIO) training staff and PPS practice support staff operate independent of each other. Practices receive multiple, uncoordinated, outreach related to practice workflow transformation, causing confusion or distrust. Active, up-front coordination of activities to embed engagement of HEALTHeLINK services into the broader PPS practice transformation service as practices are engaged.

Data is not consistent across practices and EHR vendors. This affects providers trying to interpret Continuity of Care Document data from another practice and impedes the ability to perform analytics across a population whose data is sourced from many practice settings. Practice clinical transformation staff must include EHR data standards implementation in their practice support services integrated with data upload and aggregation capabilities. Implement a data standardization function to validate CCDs from practices at go-live.

EHR vendors may not support interoperability with the RHIO at a reasonable cost, slowing the pace of implementation of interoperability. Have MCC representatives from the IT Data Committee participate in regional, state, and national conversations on this issue; apply pressure to the industry to actively support the free flow of patient data.

Confusion, misinformation, and lack of understanding could cause delays in deployment and integration. MCC will provide detailed education and in-servicing to providers, partners, and their staff about change management, IT security/privacy policies, and other compliance and operational policies and programs.

IPQR Module 9.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Practitioner engagement: Successful CI implementation is dependent on active practitioner engagement
Population health strategy: CI is a means to population health
IT systems and processes: Data integration and interoperability are essential components of CI
Performance reporting: CI progress is informed by accurate performance reporting
Financial sustainability: CI transformation depends on financial sustainability for such items as interoperability and practitioner incentives
Workforce strategy: CI resources, such as care coordinators, are essential to successful CI implementation
11 projects: An interdependency exists between CI and the MCC clinical projects

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 9.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Clinical/Quality Committee	Co-chairs: Michael Cummings MD (UBMD Psychiatry); Joanne Haefner FNP (Neighborhood Health Center)	Oversight and approval of Clinical Integration (CI) Strategy and CI Work Plan
IT Data Committee	Gregory Turner, John J. Bono, Anthony Billittier MD, Michele Mercer RN, HEALTHeLINK representatives, Community Partners of WNY (led by Catholic Medical Partners) representatives, Vicki Landes (NFMMC health home), Gail Mayeaux (Universal Primary Care)	Ensure that the IT infrastructure meets the needs of the clinically integrated network
Community-Based Organization (CBO) Task Force	Coordinated by Catherine Lewis, MCC Director of Community-Based Initiatives	Provide advisory feedback on CI Strategy and CI Work Plan
Geographic councils	Niagara Orleans Healthcare Organization (led by Sheila Kee, Niagara Falls Memorial Medical Center) and Southern Tier Council (led by Richard Braun, Olean General Hospital)	Implement CI strategies in the Northern and Southern sub-regions of the PPS; report on progress, challenges, and appropriate solutions
Clinical integration liaisons	Representatives from primary care, specialties, behavioral health, CBOs, care coordination, hospice/palliative care, and population health	Act as liaisons between their respective disciplines and the CI process

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 9.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Chief Clinical Integration Officer (Michele Mercer RN)	Lead development and implementation of CI Strategy and Work Plan	Develop CI Strategy and Work Plan; present to oversight committees and work groups for feedback and approval; oversee implementation of work plan; report on progress of implementation
Chief Medical Officer (Anthony Billittier MD)	Medical oversight; input into CI Strategy and Work Plan	Work with Chief Clinical Integration Officer to develop CI Strategy and Work Plan; present to oversight committees and work groups for feedback and approval; oversee implementation of Work Plan; report on progress of implementation
Chief Reporting Officer (John J. Bono)	Development of clinical metrics	Develop and implement mutually agreed-upon CI metrics; provide input into measurement criteria and development of reports to the Clinical Quality/Committee, Board of Managers, and NYS DOH.
Representatives from each partner hospital	Buy-in/support of new pathways, lines of accountability, responsibilities, and communications	Engagement in the process, including consultation and training
FQHCs	Buy-in/support of new pathways, lines of accountability, responsibilities, and communications	Engagement in the process, including consultation and training
Behavioral health providers	Buy-in/support of new pathways, lines of accountability, responsibilities, and communications	Engagement in the process, including consultation and training
Health homes	Buy-in/support of new pathways, lines of accountability, responsibilities, and communications	Engagement in the process, including consultation and training
Post-acute providers	Buy-in/support of new pathways, lines of accountability, responsibilities, and communications	Engagement in the process, including consultation and training
Physician networks	Buy-in/support of new pathways, lines of accountability, responsibilities, and communications	Engagement in the process, including consultation and training
MCC Administrative Director (Gregory Turner)	Lead MCC IT strategy; coordinate with lead entity (ECMCC) for IT alignment	Ensure IT solution meets clinical integration and population health business requirements
External Stakeholders		
Departments of Health from each MCC PPS county	Buy-in/support of new pathways, lines of accountability, responsibilities, and communications	Engagement in the process, including consultation and training
Patients	Beneficiary of care improvements driven by CI	Response to consultation on CI Strategy
Family members	Communication with practitioners, particularly on behalf of children, the elderly, or those without mental capacity	Response to consultation on CI Strategy

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Hospice/palliative care providers	Buy-in/support of new pathways, lines of accountability, responsibilities, and communications	Engagement in the process, including consultation and training
CBOs	Buy-in and support of CI Work Plan including new pathways, lines of accountability, responsibility, and communication	Engagement in the process, including consultation and training

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 9.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

Effective CI will require relevant information to be readily accessible for all providers across the patient care spectrum. For some providers this will mean integration into new or expanded clinical data systems. For other providers in our network, effective CI is likely to rely more heavily on the coordinated use of patient registries and risk stratification. A core element of our CI needs assessment will be identifying where new or expanded data-sharing systems are required and where a different approach is required. The involvement of the IT Data Committee will be important in ensuring that our plans for developing IT infrastructure across the PPS support better CI.

The following areas that will require IT assessment and requirement definition for CI include:
The architecture of the PPS to support a clinically integrated system
The data sharing and confidentiality protocols in place for the PPS
What platforms are being used to support the PPS (EHRs, etc.)
How will the PPS integrate manual processes
Data reporting and performance monitoring
Secure messaging and alerts
Patient and physician portals

Achieving the buy-in from our large community of downstream providers to the new ways of working that fall under the CI workstream will greatly depend on the providers and the individual practitioners having easily accessible methods of communicating with one another.

IPQR Module 9.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Progress reporting will be aligned with the phased approach to implementing the overall CI Strategy, including clinical integration progress within the network. This will be measured by increased adoption of evidence-based clinical pathways by participating PCPs. Clinical integration will also be measured by determining the increased adoption of care coordination within PC practices and across the network. Project success and governance will be measured by the completion of a clinical IT needs assessment, current state assessment of the PPS network, and establishment of a best practice data model flow. Quarterly reports at the project level will include a validated CI needs assessment tool approved by the Clinical/Quality Committee and aggregated analyzed results of the responses to identify gaps and CI focus areas.

Results of the CI needs assessment will be utilized in the development of the CI Strategy. The strategy will include, but not be limited to, the following items:

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Inventory of all data sources
A comprehensive training program
A reporting schedule aligned with finance, governance, cultural competency/health literacy, and performance monitoring

Quarterly project- and unit-level reports will mark progress towards full implementation of the IT infrastructure development plan for interoperability, CI, and population health management.

MCC will utilize a central data warehouse and document archive to manage and track project and workstream requirements across the organization, including internal and external milestones, policies and procedures, and other key documents. This central repository will form the basis of our overall project tracking and reporting infrastructure and will allow users to access information appropriate to their role within the organization. Such a system will support project and program management by being a source for regularly scheduled reports and searchable information as dictated by project and program management requirements. This data source will be maintained as part of the PPS's critical operational infrastructure and will enable auditing, version control, and other project tracking functions across the organization.

IPQR Module 9.9 - IA Monitoring:

Instructions :

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Section 10 – General Project Reporting

IPQR Module 10.1 - Overall approach to implementation

Instructions :

Please summarize your intended approach to the implementation of your chosen DSRIP projects, including considerations around how this approach will allow for the successful development of concurrently implementing DSRIP projects.

Open, frequent communication is key to successful projects, and MCC is dedicated to a transparent communication process across the PPS. Project activities to improve the healthcare of the targeted population while decreasing overall admission rates will not only affect Medicaid patients attributed to MCC, but the overall health of WNY. As MCC conducts training/education and implements care improvements throughout the community, it will have a secondary effect across all segments of the population. Providers will become more educated in the use of population management metrics and "Plan, Do, Study, Act" (PDSA) cycles, causing a transformation in healthcare. Communication strategies will be critical to all projects, but are particularly important in those that span multiple disciplines or require collaboration among a broad group of stakeholders.

The 11 projects selected by MCC will require major changes—broad, systemic changes at the network level as well as specific alterations in the day-to-day lives of patients and providers. The disruptions caused by these changes, however minute, will be felt throughout the PPS. Eventually, the results (such as improved health outcomes) will stimulate increased patient buy-in and provider involvement. But as these outcomes may take a long time to observe, community-based organizations (CBOs) will be mobilized immediately to help promote the practices and principles of DSRIP. Through community-based organizations the PPS will conduct outreach education, networking, and PCP coordination to ensure patients outside of the PPS will be engaged and linked to a PCP.

The development of a shared IT infrastructure and data sharing ensures the patient information is shared and securely transferred to referring providers and members of the PPS. The ability to share data among care rending groups will enhance the care coordination and decrease risk for the patient for readmission and enhance positive outcomes. Through the IT infrastructure, notifications of care transitional protocols will be established. Data sharing and notifications will support improved care transitions, which are critical to several projects.

MCC, through the Clinical/Quality Committee, will standardize clinical and operational flows to support Patient-Centered Medical Home (PCMH) and patient-focused models. The activities will drive the foundational steps for moving towards a value-based model through improved outcomes. Through PCMH and NYS Advanced Primary Care Model principles the PPS will set standards for identifying high-risk patients, addressing barriers for compliance, and initiating activities to effect change. These activities will be measured and shared across the PPS. PDSA cycles will be initiated to evaluate improvement activities set forth from the practice to meet the quality measures and quickly revise as necessary to continue positive growth.

MCC will work with neighboring PPSs Community Partners of WNY (led by Catholic Medical Partners) and Finger Lakes PPS to create comprehensive healthcare transformations in the region. Close coordination will be assured by encouraging the use of standardized referral protocols, utilizing uniform tracking and reporting systems, adopting universal alert messaging via the RHIO, maintaining common messaging to patients, and sharing lessons learned.

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 10.2 - Major dependencies between work streams and coordination of projects

Instructions :

Please describe how your approach will handle interdependencies between complementary projects, as well as between projects and cross-cutting PPS initiatives - for example, an IT infrastructure upgrade, or the establishment of data sharing protocols.

FINANCIAL

Financial concerns cut across all projects, as practices and facilities are dependent upon financial sustainability. MCC will work with payers to enhance reimbursement strategies to provide sustainability to providers within the PPS. (all projects, Financial Sustainability).

EDUCATION

Education for patients, as well as providers, is key to empowering patients to drive their own healthcare needs as well as instilling confidence in medical staff to utilize new programs/strategies/procedures (2.d.i., Practitioner Engagement, 2.b.iii., 2.b.viii., 3.a.i.)

Gaps in knowledge could hinder outcomes of programs, such as INTERACT (2.b.vii.)

Educating Medicaid beneficiaries on established alternatives to ED will reduce non-emergent ED visits. (2.b.iii., 2.b.vii., 2.b.viii., 3.a.ii.)

Culturally, Linguistically Appropriate Services (CLAS) are very important in patient engagement. (Cultural Competency and Health Literacy, all projects but particularly 2.d.i., 3.b.i., 3.f.i., 4.a.i., 4.d.i.)

STAFFING

This PPS will be seeking highly educated and skilled resources within the PPS area to staff key support roles for all projects and workstreams. (all projects, Workforce Strategy)

The PPS is dependent upon well trained, funded staff availability, and primary physicians trained in areas with current shortages, especially in behavioral health. (2.b.iii., 2.d.i., 3.a.i., 3.b.i., Practitioner Engagement)

PATIENT COORDINATION WITHIN PPS

All providers are highly dependent upon increased levels of communication and coordination for their patients. This is especially challenging due to the current highly fragmented delivery system, the target population's size, and the region's large geographical area. (2.a.i., IT Systems & Processes, Population Health Management)

Connectivity with health home and ACO population management systems will impact ED triage. (2.a.i., 2.b.iii., Population Health Management)
Note: There are no ACOs in WNY participating with MCC.

Millennium Collaborative Care (PPS ID:48)

Hospitals must help coordinate safe and successful discharges, while passing along all crucial information when patients return to skilled nursing facilities or other facilities. (2.b.iii., 2.b.vii., 2.b.viii.)

Crisis Stabilization is dependent upon ED triage to identify patients who do not need urgent care. (2.b.iii., 3.a.ii.)

IT INFRASTRUCTURE

Connectivity is the backbone for which all providers will be dependent. The ability to safely and easily access patient records is key to improving patient outcomes. (2.a.i., IT Systems & Processes)

All projects are dependent upon the PPS's ability to define data gaps, and implement data quality and content standards at the practice level. This directly impacts the PPS's practice clinical transformation and EHR utilization activities at the practice level. In particular, defining data rules and standards around Continuity of Care Documents (CCDs) as these tend to have a high rate of variability across practices and EHR vendors. This will directly impact the ability to perform population analytics across many practices. (2.a.i., IT Systems & Processes)

Cardiac project is dependent upon project 2.a.i. (Integrated Delivery System) requirement to establish disease registries. (2.a.i., IT Systems & Processes, 3.b.i.)

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 10.3 - Project Roles and Responsibilities

Instructions :

Please outline the key individuals & organizations that play a role in the delivery of your PPS's DSRIP projects, as well as what their responsibilities are regarding governance, implementation, monitoring and reporting on your DSRIP projects.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
IT Data Committee	Gregory Turner, John J. Bono, Anthony Billittier MD, Michele Mercer RN, HEALTHeLINK representatives, Community Partners of WNY (led by Catholic Medical Partners) representatives, Vicki Landes (NFMMC health home), Gail Mayeaux (Universal Primary Care)	Technical oversight/direction/coordination [all projects as needed]
MCC Clinical Integration Officer	Michele Mercer RN	Achieve clinical integration through the use of best practices and techniques by healthcare facilities and primary care practices throughout WNY
MCC Director of Community-Based Initiatives	Catherine Lewis	Cultural competency, health literacy, collaboration with CBOs [especially 2.b.iii. (ED Care Triage), 2.d.i. (Patient Activation), 3.a.ii. (Crisis Stabilization), 3.f.i. (Maternal and Child Health), domain 4 projects]
MCC Continuing Education Manager	New hire	Devise strategies to meet training needs through cooperative arrangements with community partners
Project co-sponsor	Community Partners of WNY (led by Catholic Medical Partners)	Provide joint funding; collaborate on standardized cross-PPS protocols and policies; participate in open, frequent communication about project status and objectives [4.a.i. (Promote MEB Well-Being), 3.f.i. (Maternal and Child Health)]
All active project participants (e.g., SNFs implementing INTERACT, individuals being trained on PAM, PCPs offering Million Hearts)	Per project	Meet project requirements according to established timeline, follow any protocols agreed to at PPS level, accept performance-based incentives, use electronic systems to track patients as required [all projects]
MCC Chief Reporting Officer	John J. Bono	Develop and implement plan specifying process and performance metrics to be reported, manner in which data will be reported, designating entities which will receive data, systems for analyzing and responding to data and reporting date to committees and governing board.
MCC Project Management Office	Led by Tammy Fox	Ensure workstreams and projects are coordinated, meet objectives, and contribute to the overall success of the PPS [all projects]

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 10.4 - Overview of key stakeholders and how influenced by your DSRIP projects

Instructions :

In the below table, please set out who the key stakeholders are that play a major role across multiple DSRIP projects. Please give an indication of the role they play and how they impact your approach to delivering your DSRIP projects.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Home care providers	Participating home health agencies	Provide/promote home healthcare as alternative to hospitalization/SNF admission
CBO Task Force	Coordination of community resources	Coordinate services provided by CBOs to prevent gaps or unnecessary duplication of services
"Voice of the Consumer" Sub-Committee	Patient advocacy and engagement	Obtain direct input from Medicaid recipients
MCC Administrative Director (Gregory Turner)	Reporting oversight	Provide oversight for reporting as it relates to projects
External Stakeholders		
Legislators	Regulatory waivers	Waive regulations that prevent project from achieving objectives
HEALTHeLINK and other RHIOs	HIE	Integration, connectivity, consent [especially project 2.a.i., Integrated Delivery System]
Departments of health from each MCC PPS county (Allegany, Cattaraugus, Chautauqua, Erie, Genesee, Niagara, Orleans, Wyoming)	Region-specific support/services	Assist in implementation of community health improvement strategies, provide region-specific support and services [especially 3.a.i. (Integration of Behavioral Health and Primary Care), 3.a.ii (Crisis Stabilization)]
Health plans and Medicaid managed care organizations	Reimbursement	Provide appropriate reimbursement based on project strategies and objectives, streamline authorization processes to facilitate project success, support value-based payment
Finger Lakes PPS	Coordination	Collaborate on standardized cross-PPS protocols and policies
Community-based and faith-based organizations	Service providers	Provide culturally appropriate services to various populations to support patient engagement/activation and adherence to care plans
Patients, families, caregivers	Care seekers	Care seekers

Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 10.5 - IT Requirements

Instructions :

Information technology will play a crucial role in the development of an effective, integrated performing provider system. It is likely that most projects will require some level of supporting IT infrastructure. Please describe the key elements of IT infrastructure development that will play a role in multiple projects.

MCC is in the process of developing requirements for an Enterprise DSRIP Solution, the technical infrastructure that will support MCC's project and workstream activities. A vendor/partner will be selected via RFP to provide the enabling infrastructure and analytics foundation to pull data and push content and insights across MCC's network.

MCC intends to leverage aggregated patient data available through HEALTHeLINK and augment it with information from other service providers in the PPS such as social service agencies, schools, CBOs, and other providers that do not use electronic patient records. The infrastructure and data foundation provided by HEALTHeLINK will enable the functional capabilities of performance management, decision support, care delivery, care management, population health management, patient engagement, and support services.

The enabling infrastructure which will support implementation of all 11 MCC projects includes the following elements: EMRs, rules engine, network connectivity and security, remote monitoring and mHealth applications, enterprise data warehouse, process automation, reporting tools, portals, advanced analytic tools, and geospatial analysis tools.

A comprehensive service provider network will be created and maintained. The network will be accessible and responsive to identified member needs. This includes use of geospatial mapping to identify "hot spots" and network coverage issues. A provider/network directory will offer a streamlined, electronic means for primary care practices to connect patients to community-based services in their own neighborhoods and communities. This will enable PPS partners to coordinate medical, mental health, and non-medical care efforts (e.g., temporary housing).

A patient registry will be developed which includes patient name, address, CIN number, sex, race, top diagnoses codes, primary care provider of record, payer, risk score, and projects in which they have been engaged. Patient-level clinical data should include additional elements such as BMI, smoking status, cholesterol level, blood sugar level, PAM survey date and score, pregnancy status, most recent encounters, most recent discharge diagnosis, and date of discharge. Registry data will be used to identify care gaps for treatment of identified chronic or acute conditions and for preventative and wellness services.

A Member portal is also envisioned that will enable beneficiaries to look up their own information online and make service requests from their portals. Since most Medicaid members may not have smart phones or computers, MCC seeks to explore the use of secure text messaging to remind members of upcoming appointments or to call their care team for other information or follow up.

Community health workers (CHWs) will perform vital services in connection to several projects (e.g., 3.f.i., Support for Maternal and Child Health). MCC intends to equip CHWs with laptops, tablets, smart phones, or other mobile devices to capture data and share content with Medicaid members. This technology will facilitate easy documentation of home/remote visits, improve communication across the care continuum, provide educational material for members, and keep CHWs in the field connected to the PPS as needed. This will be facilitated through access to a Service Provider portal. MCC will engage with the CBOs to design structured documentation templates that can be accessed in their portal. As the

Millennium Collaborative Care (PPS ID:48)

CHWs open their template they will query MCC's EMPI solution using name, address and CIN number if known to determine whether the member has an existing EMPI number. The form will automatically be populated with EMPI or a new identifier if the patient is not known. This capability is foundational to creating a 360-degree view of each member.

IPQR Module 10.6 - Performance Monitoring

Instructions :

Please explain how your DSRIP projects will fit into your development of a quality performance reporting system and culture.

A workgroup composed of members of the Physician Performance Sub-Committee, IT Data Committee, Clinical/Quality Committee, and Finance Committee, with input from the Chief Reporting Officer, Chief Integration Officer, and Finance Director, will develop a performance measurement program, including incentive payment provisions. The workgroup will direct the IT Data Committee in implementation of project-specific performance dashboards. These dashboards will be populated with internal and external data, including the domain 1–4 measures identified in the DSRIP Measure Specification and Reporting Manual and subsequent guidance. The workgroup will develop additional measures and milestones to measure project implementation, quality, and integration and milestones/measures that will be tied to financial incentives.

MCC will establish and identify quality standards using NYS DOH metrics as a starting point. The PPS may add metrics that it deems necessary to successfully meet provider adoption and patient engagement targets for all projects.

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 10.7 - Community Engagement

Instructions :

Please describe your PPS's planned approach for driving community involvement in the DSRIP projects, how you will contract with CBOs for these projects, how community engagement will contribute to the success of the projects, and any risks associated with this.

The importance of member involvement in self-care is well documented. MCC will play a vital role in improving health literacy and motivating Medicaid members to improve their overall health and wellness. This includes sharing of appropriate content about their conditions that need to be managed, information about where non-emergent care can be accessed that is closest to them, and how they can be contacted.

MCC will reach out to the public directly by hosting informative events (for example, a wellness expo was hosted in September), appearing regularly in the media (e.g., weekly radio show on WUFO, appearances on television talk shows), implementing publicity/media campaigns, establishing a "Voice of the Consumer" Sub-Committee made up of Medicaid beneficiaries, and appointing a member of this sub-committee as a voting member of the Board of Managers. MCC will these channels to engage the community and to explain DSRIP initiatives to WNY residents.

MCC will also leverage community-based organizations (CBOs) as an indispensable resource for reaching the community at large and specific targeted populations (e.g., refugees). MCC's strategy is to build a broad CBO network that is representative of all of WNY, that will play a vital role in engaging the Medicaid population in the delivery and implementation of DRSIP goals. During the first quarter of 2015, MCC conducted a major outreach campaign to urge CBOs to join the network. MCC directly contacted organizations by telephone and email and encouraged CBO involvement through its website. A total of 280 CBOs were added to the MCC PPS as a result of these outreach efforts. MCC will determine the adequacy of its CBO network as part of the additional community needs assessment work it will conduct to identify health disparities and factors causing poor health outcomes. The plan is to identify additional CBOs which currently exist or which are emerging, particularly in immigrant neighborhoods. As additional CBOs are identified, MCC will enroll them as partners and seek to involve them in PPS work.

In addition to building a broad network of CBOs, MCC will also execute contracts with individual CBOs to provide services related to the projects. Each DSRIP project team is being charged with the responsibility of identifying key CBOs that will assist with project work. A determination will be made as to the number of such CBOs required and the specific services they will perform. MCC will utilize the RFP process as the mechanism for evaluating the capacity of CBOs to provide services. Selection criteria will include experience, references, leadership/administrative capacity, financial viability, cultural and linguistic capabilities, and other characteristics as appropriate.

MCC used this process to select four CBOs to provide patient activation services in connection with the 11th project (2.d.i., Patient Activation). These CBOs, in turn, subcontracted with several additional organizations to reach the patient engagement targets for this project. Dozens of community health workers have been deployed to administer PAM surveys and help connect members with needed services.

MCC is in the process of selecting CBOs to provide services related to Cultural Competency and Health Literacy. CBOs will also be relied upon for projects 3.f.i. (Support for Maternal and Child Health), and 4.d.i. (Reduce Premature Births).

CBOs also provide advice and counsel to MCC's Board of Managers and committees via the CBO Task Force. Over 35 CBO representatives have been appointed to the Task Force, which has been meeting monthly since July. Among other things, the Task Force is responsible for tracking and

monitoring CBO involvement in project work and pinpointing new and evolving opportunities for CBO engagement.

IPQR Module 11.4 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges and risks that you foresee in achieving the milestones set out above, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

MCC may have difficulty recruiting sufficient numbers of staff needed. This will be an issue with lower-paying community-based positions (e.g., CHWs) and positions where a high level of education/certification/licensure is required (e.g. Licensed Clinical Social Worker). This is especially problematic since two other PPSs in WNY will be competing for the same resources. Determine appropriate incentives and promote career ladder pathways. Work with local colleges, universities, and other educational resources to build a pipeline of qualified workers. Establish retraining programs to facilitate redeployment. Consider retention bonuses for lower-paying positions. Work with other PPSs to host joint job fairs and training/retraining sessions.

Resistance to change: staff, labor representatives, workforce, and key stakeholders will resist the workforce changes needed for success. Engage all participants throughout the process through assessment, communication, and training. These efforts will promote openness and transparency and involve affected members in the decision-making process.

Managing the differences in HR policies between facilities could become a barrier to inter-PPS movement. Employees moved between organizations, even affiliated organizations, could have different in-house HR services available to support the changes. The Workforce Development Work Group, with support from the workforce vendor and in close collaboration with facility HR departments, will provide clear and consistent protocols to support the changes and address challenges across the PPS. The Work Group will facilitate the establishment of protocols for implementing and monitoring the workforce transition process.

Lack of compatible technological infrastructure for data sharing, reporting, and communication, as well as a lack of appropriately trained staff. MCC will use a phased approach to project rollout, IT development, and reporting. Early reliance on free, open source solutions for data collection and analysis provides a "fallback" option for maintaining continuity of operations. MCC will grow our internal capacities and help direct the development of IT resources across the region. Appropriate training will be offered to staff members.

Negative ramifications for employees who refuse retraining/redeployment. A segment of the employee population will find the changes untenable. In facilities that are unionized, employees may seek to avoid the changes through grievances and refusal to cooperate. The PPS will refer employees to their HR department and/or union pursuant to existing agreements. The PPS will also engage the workforce vendor to provide input into the process of addressing staffing gaps and addressing retraining/redeployment refusals. Disciplinary action will be considered only as a last resort.

Funding received is insufficient to achieve the PPS' stated achievement goals. All projects will utilize flexible, phased project plans that can be adjusted as needed. MCC will engage no-cost training provided by community experts and will share project resources when applicable (e.g., INTERACT coaches for both 2bvii and 2bviii). MCC will also work towards value-based payment reform in order to control costs and ensure sustainability.

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 11.5 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The workforce implementation plan is interrelated with every workstream and every DSRIP project. As a general overarching reality, without an effective, comprehensive workforce strategy, no workstream can be successful.

The IT Systems and Processes workstream is dependent upon an effective workforce strategy to recruit staff to build and manage systems, and to train IT staff on effective use of varied software.

Cultural Competency and Health Literacy need to be integrated into each aspect of the workforce strategy. Whether staff are retained, hired, retrained, or redeployed, it will be necessary for the workforce to be culturally competent.

Financial Sustainability: Adequate resources are key to successful transformation. Funds need to be available to support all aspects of the recruitment, training, and redeployment processes. In addition, financial delays could be detrimental to small partners attempting to participate in workforce transformation if resources are unavailable to provide needed training programs and develop required career and academic pathways.

Governance and Performance Reporting are also critical to the success of the transformation. Each participating partner needs to fully understand and participate in the process. Success is dependent upon active participation and engagement, including responding to required data needs for reporting.

Clinical Integration is dependent upon a successful transformation of the workforce. Training programs and new operational procedures will have a significant impact on successful integration into the care process.

In addition, Practitioner Engagement, through effective integration of communication processes as outlined in the Practitioner Communication and Engagement Plan, is critical for success. Continued transformation of the workforce and the care process requires active participation.

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 11.6 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
MCC Workforce Development Director	Juan Santiago	Oversee, develop, and implement workforce transformation plans; oversee development of job descriptions, workflow procedures, and recruitment; provide information and assure continuous communication among employees, labor reps, community-based organizations (CBOs), and MCC
Workforce vendor	Western New York Rural Area Health Education Center (R-AHEC)	Sub-contract with MCC for a variety of services including, but not limited to, co-chairing the Workforce Work Group, identifying local and regional training providers, assessing and delivering various trainings, assessing current healthcare workforce needs, providing job coaching and case management for workforce program participants, and acting as a data warehouse for training information and workforce survey information
Workforce Development Work Group (members will be added or removed as needed)	Co-Chairs: Valerie Putney (R-AHEC), Juan Santiago (MCC) Members: Bono, Jamie (MCC); Bright, Carolyn (NYSDOL); Canazzi, Richard (AFSCME); Craig, Mary (ENAHEC); Culkin-Jacobia, Julia (ECMCC); DiCanio-Clarke, Carla (ECMCC); Donahue, Laura (Kaleida); Freer, Tim (NFMMC); Graham, Michael (NYSNA); Hammonds, Al (MCC); Hayes, Debra (CWA); Huff, Cathy (R-AHEC); Kemblowski, Siobhain (SEIU 1199); Kemp, Christine (SNAPCAP); McNamara, Tim (UAHS); Mendola, Isabella (CSEA); Prete, Dave (R-AHEC); Scordato, Jim (SEIU 1199); Sull, Nathan (NYSNA); Swartz, Karen (Kaleida); Szymura, Denise (CSEA); Turner, Greg (MCC); Wilkinson, Bill (CSEA)	Facilitate employee data collection; monitor and report to Board of Managers; assist in development of job descriptions, workflow procedures, and recruitment; promote and manage communication among employees, labor reps, CBOs, and MCC
Current Workforce/Compensation/ Benefit Survey (a sub-committee of the Workforce Development Work Group)	Juan Santiago (ECMCC/MCC), Valerie Putney (R-AHEC), Julia Calkin-Jacobia (ECMCC), Bella Mendolla (CSEA)	Conduct Current Workforce/Compensation/Benefit Survey
Future State Workforce (a sub-committee of the Workforce Development Work Group)	Siobhain Kemblowski (SEIU 1199), Laura Donahue (Kaleida), Debbie Hayes (CWA), Juan Santiago (ECMCC/MCC), Valerie Putney (R-AHEC)	Determine Future State Workforce
Practitioner Engagement Coordinator	Jillian Barone	Help coordinate training for providers; identify appropriate training offerings and incentives; collaborate on communication to providers

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 11.7 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved in your workforce transformation plans, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Training departments/programs within PPS partner organizations	Training providers/partners	Coordinate to deliver needed training to partner staff
MCC project managers	Project managers	Identify training needs specific to projects and workstreams; coordinate with Workforce Development Director to ensure training fills these needs
Chief Medical Officer	Supervision/oversight	Coordinate with other practitioner engagement and communication activities
External Stakeholders		
Buffalo Niagara HR Associates	Professional association	Support HR activities and leadership
Training agencies	Training provider	Offer variety of training programs
1199 SEIU, NYSNA, AFSCME, CSEA, CWA, and others as identified	Labor representatives	Provide communication among employees and workforce team; provide expertise and insight into effective processes
PX 21 Coalition, Buffalo	Coalition of substance abuse/mental health agencies	Provide training (via training committee)
Community Health Workers of Buffalo, Jessica Bauer Walker, Executive Director	Training	Provide CHW training with emphasis on health education and promotion, community building, and advocacy; offer CHW certificate in partnership with Canisius
R-AHEC, Cathy Huff, CEO	Training	Provide training in rural areas
Staff education departments; nursing in-service education departments	Education	Provide clinical/nursing education; educate staff for DSRIP protocols
Colleges and universities with certificate/education programs (e.g., D'Youville, Daemen, UB, NU, Medaille, ECC, NCCC, Trocaire, BOCES, Harkness)	Education	Provide workforce education for DSRIP protocols
UB School of Social Work; Office of Continuing Education	Training and certification/credentialing support	Support DSRIP policy and procedures
Millard Fillmore College	Adult education on practice transformation	Offer certificate program (practice transformation based on AHRQ curriculum)
Empire State College; Jewish Community Center of Greater Buffalo	Adult education	Offer adult education classes

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Infant community programs (e.g., Healthy Babies, Maternal and Infant Community Health Collaborative---MICHC)	Program-specific training programs	Provide training/orientation related to specific programs
Vocational and Educational Services for Individuals with Disabilities (VESID)	Training	Provide education opportunities to disabled individuals
Other PPSs	Networking; collaboration	Collaborate with other PPSs in developing ideas, sharing, networking, and learning across the state

IPQR Module 11.8 - IT Expectations

Instructions :

Please describe how the development of shared IT infrastructure across the PPS will support your plans for workforce transformation.

Data around workforce transformation will be collected, analyzed, and reported upon in order to determine the success and progress of the workforce development efforts. Appropriate data controls, collection, and analytical platforms will be needed to support these efforts. Dashboard or report card capabilities will help PPS partners understand current status/progress and highlight issues that need attention. IT support is also required to facilitate required data collection/reporting/export. It will also be important to track staff movement and changes across the PPS. A learning management system may be required to coordinate and record training/educational efforts.

IPQR Module 11.9 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Progress reporting will be aligned with the phased approach to implementing the overall Workforce Strategy. As the Workforce Strategy is developed and refined, quarterly project and unit level progress reports will include:

A list of Workforce Development Work Group members and key stakeholders

A regular meeting schedule and meeting minutes

A documented assessment of project workforce needs and Target Workforce State

A Workforce Transition Roadmap, submitted to and approved by the Board of Managers

A documented Compensation and Benefit Analysis Report

Comprehensive Training Strategy

A reporting schedule aligned with finance, governance, cultural competency/health literacy, and performance monitoring

Quarterly reports help partners to gain meaningful status on their own progress towards goals. Overall project and workstream success will be reported to partners and NYS DOH. Reports will include analyses of, but not be limited to, the following:

Number of people retrained, redeployed, and hired

Millennium Collaborative Care (PPS ID:48)

Training programs/sessions conducted

Breakdown of full (95–100% of previous compensation) vs. partial (less than 95%) placement

Breakdown of new hires by staff type

Summary of compensation/benefit impacts

Specifically, we will report progress of the workforce strategy on three levels. First, working collaboratively with partnering facilities who will identify employees affected by the DSRIP project, we will be able to ensure that the proper people receive the proper training and that both employee and facility profit from the educational endeavor. For example, the INTERACT program will be rolled out to care staff at participating SNFs. A trained staff will reduce the number of acute care transfers; therefore benefiting facility, employee, and patient.

Secondly, we will evaluate progress on the percentage of workforce need that has been met. We will do that by surveying partnering facilities and reevaluating what positions have been filled and where the greatest demand/vacancies lie. After which we will change our approach to recruitment and training if needed.

Finally, we will conduct a quantitative evaluation assessing the success of each project based on collected numbers of consumers reached and reduction of ED visits.

MCC will utilize a central data warehouse and document archive to manage and track project and workstream requirements across the organization, including internal and external milestones, policies and procedures, and other key documents. This central repository will form the basis of our overall project tracking and reporting infrastructure and will allow users to access information appropriate to their role within the organization. Such a system will support project and program management by being a source for regularly scheduled reports and searchable information as dictated by project and program management requirements. This data source will be maintained as part of the PPS's critical operational infrastructure and will enable auditing, version control, and other project tracking functions across the organization.

IPQR Module 11.11 - IA Monitoring:

Instructions :

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project 2.a.i – Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management

IPQR Module 2.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Data is not consistent across practices and EHR vendors. This affects providers trying to interpret Continuity of Care Document (CCD) data from another practice and impedes the ability to perform analytics across a population whose data is sourced from many practice settings. Practice clinical transformation staff must include EHR data standards implementation in their practice support services integrated with data upload and aggregation capabilities. Implement a data standardization function to validate CCDs from practices at go-live (this could be done at the RHIO level). Feedback to practice clinical transformation staff for intervention.

EHR vendors may not support interoperability with the RHIO at a reasonable cost, slowing the pace of implementation of interoperability. Have MCC representatives from the IT Data Committee participate in regional, state, and national conversations on this issue; apply pressure to the industry to actively support the free flow of patient data.

HEALTHeLINK (RHIO) training staff and PPS practice support staff operate independent of each other. Practices receive multiple, uncoordinated, outreach related to practice workflow transformation, causing confusion or distrust. Active, up-front coordination of activities to embed engagement of HEALTHeLINK services into the broader PPS practice transformation service as practices are engaged. Include HEALTHeLINK as part of the broader PPS activities.

Current fragmentation of services delivered in the market and wide geographic distribution of the PPS pose a risk to successful and timely development of an IDS. Clearly define goals and requirements up front, have a strong Program Management Office (PMO) and a timely and clearly defined communication plan to address at-risk activities.

The PPS's extensive and diverse membership cannot agree to appropriate IT security controls required for data exchange. A lack of confidence in the MCC PPS could cause providers and organizations to exit the PPS or not become fully committed. Establish openness, direct engagement, and strong communications between MCC and its partners' representatives. Initiate Active Monitoring of systems and make reports available to all PPS members.

Enterprise DSRIP solution cannot be completed until gap analysis concerning data capabilities and connectivity requirements is completed. Likewise, required security controls cannot be designed until the state of security is accessed via the gap analysis. Any delay will cause a cascade effect. Develop a strong PMO; clearly define goals and requirements; provide regular reports to MCC governance.

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 2.a.i.2 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement.
Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	Project	N/A	In Progress	04/01/2015	03/31/2017	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS includes continuum of providers in IDS, including medical, behavioral health, post-acute, long-term care, and community-based providers.	Project		In Progress	04/01/2015	03/31/2017	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 1. Create list of participating providers across the network.	Project		Completed	04/01/2015	09/30/2015	04/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task 2. Perform initial gap assessment to identify any gaps in the PPS network, particularly among community-based organizations (CBOs), pharmacists, dentists, behavioral health providers, and key primary care providers (PCPs). Utilize the Community Needs Assessment to identify key areas of focus.	Project		Completed	04/01/2015	09/30/2015	04/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task 3. Identify additional gaps by gathering information and recommendations from existing partners/members, the CBO Task Force, the "Voice of the Consumer" Sub-Committee, and geographic councils.	Project		Completed	04/01/2015	09/30/2015	04/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task 4. Issue requests for proposals (RFPs) for services to be performed by CBOs, including (but not limited to) cultural competency and health literacy training, Patient Activation coaching, and other services in connection with specific DSRIP projects (see Governance milestone #6).	Project		In Progress	04/01/2015	12/31/2015	04/01/2015	10/03/2015	12/31/2015	DY1 Q3
Task	Project		In Progress	04/01/2015	12/31/2015	04/01/2015	12/31/2015	12/31/2015	DY1 Q3

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
5. Implement a strategy to maximize participation of all PPS partners in MCC projects and activities, provide frequent communication and education through a variety of channels including (but not limited to) biweekly newsletters emailed directly to participating providers and regular updates to the website. Conduct quarterly touchpoints to connect partners to projects and educate them on techniques for referring patients to other MCC partners.									
Task 6. As part of governance structure, establish a process to conduct periodic (quarterly) assessments of provider network in geographic areas throughout WNY to ensure that Medicaid beneficiaries have access to service providers.	Project		In Progress	04/01/2015	12/31/2015	04/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task 7. Perform gap analysis of PPS providers' capabilities for EHR and data exchange (possess full EHR system, possess some EHR capabilities, or no EHR capabilities).	Project		In Progress	04/01/2015	12/31/2015	04/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task 8. Develop comprehensive PPS partner database to house all data for readiness, implementation, and ongoing reporting. Partner database will have the capability to produce the provider network list and demonstrate changes to the network list.	Project		In Progress	04/01/2015	03/31/2016	04/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 9. Develop ongoing review procedures to ensure that network partners have completed the necessary privacy and participation agreements to serve as a provider in the MCC network. Establish contractual agreements with partners.	Project		In Progress	08/01/2015	03/31/2016	08/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 10. Use these gaps, along with results of the Clinical Integration Needs Assessment, to develop a high-level roadmap for inclusion and integration of all partner organizations in the integrated delivery system (IDS).	Project		Not Started	10/01/2015	03/31/2016	10/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 11. Engage with local RHIO to develop increased EMR capacity.	Project		In Progress	04/01/2015	06/30/2016	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 12. Work with HEALTHeLINK to deploy data exchange alerts and messaging environment.	Project		In Progress	04/01/2015	06/30/2016	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 13. Establish and maintain working relationships with payers to engage them to support IDS strategy.	Project		In Progress	04/01/2015	09/30/2016	04/01/2015	09/30/2016	09/30/2016	DY2 Q2

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Task 14. Identify payers and ancillary social service organization connectivity requirements; build data interfaces for these entities (if applicable).	Project		In Progress	04/01/2015	09/30/2016	04/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 15. Establish reports and secure dashboards so providers and stakeholders can monitor success and quality of data exchange and integration and make recommendations to the MCC IT Data Committee and individual providers to improve data exchange and integration.	Project		Not Started	01/01/2016	12/31/2016	01/01/2016	12/31/2016	12/31/2016	DY2 Q3
Task 16. IT Data Committee monitors reports and dashboards to identify trends and makes recommendations for improved data access, exchange, integration, and use. Recommendations are reported to the Board of Managers.	Project		In Progress	01/01/2016	03/31/2017	01/01/2016	03/31/2017	03/31/2017	DY2 Q4
Milestone #2 Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.	Project	N/A	In Progress	04/01/2015	03/31/2017	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS produces a list of participating HHs and ACOs.	Project		In Progress	04/01/2015	03/31/2017	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Participating HHs and ACOs demonstrate real service integration which incorporates a population management strategy towards evolving into an IDS.	Project		In Progress	04/01/2015	03/31/2017	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Regularly scheduled formal meetings are held to develop collaborative care practices and integrated service delivery.	Project		In Progress	04/01/2015	03/31/2017	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 1. Produce and maintain list of the major health home (HH) organizations in WNY (five organizations). (There are no ACOs in WNY participating with MCC.)	Project		Completed	04/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task 2. Finalize and maintain written agreements with protocols for coordinating care.	Project		In Progress	07/27/2015	09/30/2016	07/27/2015	09/30/2016	09/30/2016	DY2 Q2
Task 3. Assess HH population health management systems and capabilities. Implement evidence-based models to establish linkages with HH population health and care management services. Create system for informing PPS partners of availability	Project		In Progress	05/01/2015	09/30/2016	07/01/2015	09/30/2016	09/30/2016	DY2 Q2

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
of these services.									
Task 4. Meet regularly with leadership from HHs to continue to refine collaborative care practices and integrated service delivery. Discuss how and the extent to which their care management services are connected to EDs, hospital discharge planning, behavioral health, home care services, and safety net PCPs and develop care management linkage recommendations. Maintain evidence of interaction.	Project		In Progress	05/01/2015	12/31/2016	07/01/2015	12/31/2016	12/31/2016	DY2 Q3
Task 5. Conduct gap analysis to identify gaps in HH members' data exchange and data access capabilities. Verify MCC IDS and EHR solution appropriately addresses these outliers, safety net organizations, behavioral health providers, and patient support members.	Project		In Progress	04/01/2015	12/31/2016	07/01/2015	12/31/2016	12/31/2016	DY2 Q3
Task 6. Begin providing periodic progress reports to demonstrate service integration; incorporate a population management strategy towards evolving into an IDS.	Project		Not Started	01/01/2016	03/31/2017	01/01/2016	03/31/2017	03/31/2017	DY2 Q4
Milestone #3 Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.	Project	N/A	In Progress	04/01/2015	03/31/2017	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Clinically Interoperable System is in place for all participating providers.	Project		In Progress	04/01/2015	03/31/2017	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS has protocols in place for care coordination and has identified process flow changes required to successfully implement IDS.	Project		In Progress	04/01/2015	03/31/2017	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS has process for tracking care outside of hospitals to ensure that all critical follow-up services and appointment reminders are followed.	Project		In Progress	04/01/2015	03/31/2017	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS trains staff on IDS protocols and processes.	Project		In Progress	04/01/2015	03/31/2017	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 1. Recruit and appoint qualified individual to oversee care management across PPS, enable development and dissemination of consistent information/processes, manage care	Project		Completed	05/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
management process, and promote integration and coordination among entities delivering care management.									
Task 2. Develop Care Transitions Strategy, as required in Clinical Integration, including process flow changes required to successfully implement IDS. Develop process flow diagrams demonstrating IDS processes. Leverage Community Health Workers (defined in detail in projects 2.b.iii. ED Care Triage, 2.b.vii. INTERACT, and 2.b.viii. Hospital/Home Care).	Project		In Progress	04/01/2015	03/31/2016	07/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 3. Work with project directors, Workforce Development Work Group, and others to determine the knowledge, competencies, and licensures required for care management to effectively work with patients to ensure they receive appropriate healthcare and community support.	Project		In Progress	06/01/2015	03/31/2016	07/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 4. Using CNA and other inputs, finalize inventory of WNY agencies providing care management services, including HHs, WNY Care Management Coalition, etc. Identify PPS partners and hospitals that must be linked for effective transitions of care.	Project		Not Started	01/01/2016	03/31/2016	01/01/2016	03/31/2016	03/31/2016	DY1 Q4
Task 5. Define care management continuum. For each role along the care continuum, describe criteria for patient referral, workflows, care planning process, responsibilities associated with transitions of care, policies and procedures, outcome measure reporting techniques, etc.	Project		In Progress	07/27/2015	03/31/2016	07/27/2015	03/31/2016	03/31/2016	DY1 Q4
Task 6. Identify cultural and language issues that must be addressed in care management, linkages with medical home care management services, and system for informing PPS partners of availability of chronic disease self-management services.	Project		In Progress	07/27/2015	03/31/2016	07/27/2015	03/31/2016	03/31/2016	DY1 Q4
Task 7. Convene three sub-regional meetings of individuals with knowledge of hospital-to-home transitions, hospital-to-nursing home transitions, and nursing home-to-skilled nursing facility (SNF) transitions to assess current practices, identify data needs, review root cause analyses, and develop standards for maximizing effectiveness of transitions of care across the PPS. Maintain records including meeting schedules, agendas,	Project		In Progress	04/01/2015	06/30/2016	07/01/2015	06/30/2016	06/30/2016	DY2 Q1

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
minutes, and lists of attendees.									
Task 8. Finalize protocols for warm hand-offs of patients from intensive 30-day post-discharge care planning to HH care management services.	Project		In Progress	07/27/2015	09/30/2016	07/27/2015	09/30/2016	09/30/2016	DY2 Q2
Task 9. Engage trainers to provide introductory and ongoing care management training on policies and procedures to care managers. Provide written training materials, list of training dates, and number of staff trained.	Project		In Progress	07/27/2015	09/30/2016	07/27/2015	09/30/2016	09/30/2016	DY2 Q2
Task 10. Develop standards for utilizing existing EHR systems to capture key data and process measures related to DSRIP goals for reporting on care management.	Project		In Progress	04/01/2015	09/30/2016	07/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 11. Implement process for tracking care outside of hospital to ensure that all critical follow-up services and appointment reminders are followed. Process will include contract, report, periodic reporting of discharge plans uploaded into EHR, and other means of demonstrating implementation of the system.	Project		In Progress	07/27/2015	03/31/2017	07/27/2015	03/31/2017	03/31/2017	DY2 Q4
Task 12. In concert with IT, develop short- and mid-term IT platforms to use for tracking, monitoring, and reporting on care coordination transition processes and outcomes to ensure interoperability for all participating providers. Leverage existing PPS data exchange capabilities; reduce data redundancies.	Project		In Progress	07/27/2015	03/31/2017	07/27/2015	03/31/2017	03/31/2017	DY2 Q4
Task 13. Work with payers and others to clarify and develop care coordination and transition management billing processes; provide such information to providers.	Project		In Progress	07/27/2015	03/31/2017	07/27/2015	03/31/2017	03/31/2017	DY2 Q4
Task 14. Using evidence-based models, develop a plan to establish a chronic disease self-management program for use by providers throughout the PPS. Include catalog of existing chronic disease self-management providers. Collaborate with existing chronic disease self-management providers (CDSMP) to identify program offerings.	Project		In Progress	07/27/2015	03/31/2017	07/27/2015	03/31/2017	03/31/2017	DY2 Q4

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
1. Establish VBP Sub-Committee under MCC's Finance Committee with representatives from finance, legal, medical staff, executive leadership, and others, to formulate a multi-year VBP transition plan.									
Task 2. Engage external expert/consultant to assist in and provide recommendations for development of five-year plan for transitioning to value-based reform system.	Project		In Progress	07/27/2015	12/31/2015	07/27/2015	12/31/2015	12/31/2015	DY1 Q3
Task 3. As part of plan, summarize process measures and clinical outcome benchmarks that will guide PPS's work over five years.	Project		In Progress	07/27/2015	06/30/2016	07/27/2015	06/30/2016	06/30/2016	DY2 Q1
Task 4. Based on data from population health, data analytics, PAM, coordination of care, HEDIS, predictive monitoring, risk stratification, and other systems, establish PPS provider compensation tables and incentives. Develop compensation model and implementation plan.	Project		In Progress	07/27/2015	06/30/2016	07/27/2015	06/30/2016	06/30/2016	DY2 Q1
Task 5. Develop a methodology to calculate criteria for distribution of incentive pool monies to reward performance of PPS partners.	Project		In Progress	04/01/2015	06/30/2016	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 6. Obtain both Finance Committee and Board of Managers approval of VBP transition plan.	Project		Not Started	01/01/2016	09/30/2016	01/01/2016	09/30/2016	09/30/2016	DY2 Q2
Task 7. Share transition plan with MCOs and secure their buy-in.	Project		Not Started	03/01/2016	12/31/2016	03/01/2016	12/31/2016	12/31/2016	DY2 Q3
Task 8. Engage MCOs and payers to agree to specific VBP rates. Specific rates and duration are contractually established.	Project		Not Started	06/01/2016	12/31/2016	06/01/2016	12/31/2016	12/31/2016	DY2 Q3
Task 9. Utilize feedback from PPS providers to ensure that improvement of desired patient outcomes, patient engagement, positive interventions, and avoidance of negative patient events are included in analysis of MCC programs and delivery models. Establish MCC provider compensation for patient outcomes.	Project		Not Started	06/01/2016	03/31/2017	06/01/2016	03/31/2017	03/31/2017	DY2 Q4
Task 10. Communicate agreed-upon payment rates and procedures to PPS members.	Project		Not Started	06/01/2016	03/31/2017	06/01/2016	03/31/2017	03/31/2017	DY2 Q4
Task 11. Continuously monitor outcomes, trends, and other sources to verify agreed-upon measures are on target. Provide contracts,	Project		Not Started	06/01/2016	03/31/2017	06/01/2016	03/31/2017	03/31/2017	DY2 Q4

are engaged with community health workers.									
Task 8. Verify patient engagement is having the desired positive impact on outcomes and interventions.	Project		In Progress	07/01/2015	03/31/2019	07/01/2015	03/31/2019	03/31/2019	DY4 Q4
Task 9. Adjust MCC processes and procedures to address gaps in patient engagement, outcomes, and other results via the PSC and Physician Performance Sub-Committee.	Project		In Progress	07/01/2015	03/31/2019	07/01/2015	03/31/2019	03/31/2019	DY4 Q4

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.										
Task PPS includes continuum of providers in IDS, including medical, behavioral health, post-acute, long-term care, and community-based providers.										
Task 1. Create list of participating providers across the network.										
Task 2. Perform initial gap assessment to identify any gaps in the PPS network, particularly among community-based organizations (CBOs), pharmacists, dentists, behavioral health providers, and key primary care providers (PCPs). Utilize the Community Needs Assessment to identify key areas of focus.										
Task 3. Identify additional gaps by gathering information and recommendations from existing partners/members, the CBO Task Force, the "Voice of the Consumer" Sub-Committee, and geographic councils.										
Task 4. Issue requests for proposals (RFPs) for services to be performed by CBOs, including (but not limited to) cultural competency and health literacy training, Patient Activation coaching, and other services in connection with specific DSRIP projects (see Governance milestone #6).										
Task 5. Implement a strategy to maximize participation of all PPS										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
partners in MCC projects and activities, provide frequent communication and education through a variety of channels including (but not limited to) biweekly newsletters emailed directly to participating providers and regular updates to the website. Conduct quarterly touchpoints to connect partners to projects and educate them on techniques for referring patients to other MCC partners.										
Task 6. As part of governance structure, establish a process to conduct periodic (quarterly) assessments of provider network in geographic areas throughout WNY to ensure that Medicaid beneficiaries have access to service providers.										
Task 7. Perform gap analysis of PPS providers' capabilities for EHR and data exchange (possess full EHR system, possess some EHR capabilities, or no EHR capabilities).										
Task 8. Develop comprehensive PPS partner database to house all data for readiness, implementation, and ongoing reporting. Partner database will have the capability to produce the provider network list and demonstrate changes to the network list.										
Task 9. Develop ongoing review procedures to ensure that network partners have completed the necessary privacy and participation agreements to serve as a provider in the MCC network. Establish contractual agreements with partners.										
Task 10. Use these gaps, along with results of the Clinical Integration Needs Assessment, to develop a high-level roadmap for inclusion and integration of all partner organizations in the integrated delivery system (IDS).										
Task 11. Engage with local RHIO to develop increased EMR capacity.										
Task 12. Work with HEALTHeLINK to deploy data exchange alerts and messaging environment.										
Task 13. Establish and maintain working relationships with payers to engage them to support IDS strategy.										
Task 14. Identify payers and ancillary social service organization connectivity requirements; build data interfaces for these entities (if applicable).										
Task 15. Establish reports and secure dashboards so providers and stakeholders can monitor success and quality of data exchange										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
and integration and make recommendations to the MCC IT Data Committee and individual providers to improve data exchange and integration.										
Task 16. IT Data Committee monitors reports and dashboards to identify trends and makes recommendations for improved data access, exchange, integration, and use. Recommendations are reported to the Board of Managers.										
Milestone #2 Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.										
Task PPS produces a list of participating HHs and ACOs.										
Task Participating HHs and ACOs demonstrate real service integration which incorporates a population management strategy towards evolving into an IDS.										
Task Regularly scheduled formal meetings are held to develop collaborative care practices and integrated service delivery.										
Task 1. Produce and maintain list of the major health home (HH) organizations in WNY (five organizations). (There are no ACOs in WNY participating with MCC.)										
Task 2. Finalize and maintain written agreements with protocols for coordinating care.										
Task 3. Assess HH population health management systems and capabilities. Implement evidence-based models to establish linkages with HH population health and care management services. Create system for informing PPS partners of availability of these services.										
Task 4. Meet regularly with leadership from HHs to continue to refine collaborative care practices and integrated service delivery. Discuss how and the extent to which their care management services are connected to EDs, hospital discharge planning, behavioral health, home care services, and safety net PCPs and develop care management linkage recommendations. Maintain evidence of interaction.										
Task 5. Conduct gap analysis to identify gaps in HH members' data exchange and data access capabilities. Verify MCC IDS and EHR solution appropriately addresses these outliers, safety net

organizations, behavioral health providers, and patient support members.										
Task 6. Begin providing periodic progress reports to demonstrate service integration; incorporate a population management strategy towards evolving into an IDS.										
Milestone #3 Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.										
Task Clinically Interoperable System is in place for all participating providers.										
Task PPS has protocols in place for care coordination and has identified process flow changes required to successfully implement IDS.										
Task PPS has process for tracking care outside of hospitals to ensure that all critical follow-up services and appointment reminders are followed.										
Task PPS trains staff on IDS protocols and processes.										
Task 1. Recruit and appoint qualified individual to oversee care management across PPS, enable development and dissemination of consistent information/processes, manage care management process, and promote integration and coordination among entities delivering care management.										
Task 2. Develop Care Transitions Strategy, as required in Clinical Integration, including process flow changes required to successfully implement IDS. Develop process flow diagrams demonstrating IDS processes. Leverage Community Health Workers (defined in detail in projects 2.b.iii. ED Care Triage, 2.b.vii. INTERACT, and 2.b.viii. Hospital/Home Care).										
Task 3. Work with project directors, Workforce Development Work Group, and others to determine the knowledge, competencies, and licensures required for care management to effectively work with patients to ensure they receive appropriate healthcare and community support.										
Task 4. Using CNA and other inputs, finalize inventory of WNY agencies providing care management services, including HHs, WNY Care Management Coalition, etc. Identify PPS partners and

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
hospitals that must be linked for effective transitions of care.										
Task 5. Define care management continuum. For each role along the care continuum, describe criteria for patient referral, workflows, care planning process, responsibilities associated with transitions of care, policies and procedures, outcome measure reporting techniques, etc.										
Task 6. Identify cultural and language issues that must be addressed in care management, linkages with medical home care management services, and system for informing PPS partners of availability of chronic disease self-management services.										
Task 7. Convene three sub-regional meetings of individuals with knowledge of hospital-to-home transitions, hospital-to-nursing home transitions, and nursing home-to-skilled nursing facility (SNF) transitions to assess current practices, identify data needs, review root cause analyses, and develop standards for maximizing effectiveness of transitions of care across the PPS. Maintain records including meeting schedules, agendas, minutes, and lists of attendees.										
Task 8. Finalize protocols for warm hand-offs of patients from intensive 30-day post-discharge care planning to HH care management services.										
Task 9. Engage trainers to provide introductory and ongoing care management training on policies and procedures to care managers. Provide written training materials, list of training dates, and number of staff trained.										
Task 10. Develop standards for utilizing existing EHR systems to capture key data and process measures related to DSRIP goals for reporting on care management.										
Task 11. Implement process for tracking care outside of hospital to ensure that all critical follow-up services and appointment reminders are followed. Process will include contract, report, periodic reporting of discharge plans uploaded into EHR, and other means of demonstrating implementation of the system.										
Task 12. In concert with IT, develop short- and mid-term IT platforms to use for tracking, monitoring, and reporting on care coordination transition processes and outcomes to ensure interoperability for all participating providers. Leverage existing

PPS data exchange capabilities; reduce data redundancies.										
Task 13. Work with payers and others to clarify and develop care coordination and transition management billing processes; provide such information to providers.										
Task 14. Using evidence-based models, develop a plan to establish a chronic disease self-management program for use by providers throughout the PPS. Include catalog of existing chronic disease self-management providers. Collaborate with existing chronic disease self-management providers (CDSMP) to identify program offerings.										
Task 15. Clinical/Quality Committee, PSC, and Physician Performance Sub-Committee will monitor reports and dashboards to identify trends and make recommendations for improved data access, exchange, integration, and use.										
Milestone #4 Ensure that all PPS safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including directed exchange (secure messaging), alerts and patient record look up, by the end of Demonstration Year (DY) 3.										
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	0	0	0	15	30	45	60	75	90	102
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	0	0	0	30	60	90	120	150	180	210

- Is the practice/providers/patients currently connected to the HIE? - If not, is an agreement in place? - If so, what is the scope of the connectivity (% of providers; % of patients)? - Does EHR meet connectivity requirements of RHIO/SHIN-NY? - Name of EHR, version, and electronic functionalities in use										
Task 2. Develop strategy for low-cost data connectivity between Internet Service Providers (ISPs) (e.g., WNY R-AHEC) and local practice plans to determine minimum hardware and software requirements.										
Task 3. Gather results from readiness assessments already conducted.										
Task 4. Issue request for applications (RFA) or other action step for readiness assessment and transformation support services.										
Task 5. Select vendor or implement other structure for readiness assessment and transformation support services.										
Task 6. Identify funding model and/or PPS provider incentive model for EHR with the Finance Committee.										
Task 7. Connect PPS providers to enterprise DSRIP solution.										
Task 8. Systematically contact PPS providers to provide the recommended enterprise DSRIP solution.										
Task 9. Facilitate QE participation agreements with MCC providers.										
Task 10. Develop and implement training on use of enterprise DSRIP solution, including development of written materials. Track training dates and number of staff trained.										
Task 11. Implement and deploy alerts. Provide EHR vendor documentation, screenshots, and/or evidence of use of alerts.										
Task 12. Implement and deploy secure Direct messaging. Provide EHR vendor documentation, screenshots, and/or evidence of use of secure Direct messaging.										
Task 13. Implement and deploy patient record look-up. Provide EHR vendor documentation, screenshots, and/or evidence of use of patient record look-up.

Task 14. Implement and deploy public health reporting capabilities. Provide EHR vendor documentation, screenshots, and/or samples of transactions to public health registries.										
Task 15. Continuously add PPS members when their EHR and data exchange capabilities reach the minimal level required to connect to the enterprise DSRIP solution.										
Task 16. PPS providers who are not actively exchanging systems will be addressed by the Physician Performance Sub-Committee. Corrective actions will be implemented for those PPS members found noncompliant.										
Milestone #5 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.										
Task EHR meets Meaningful Use Stage 2 CMS requirements (Note: any/all MU requirements adjusted by CMS will be incorporated into the assessment criteria).										
Task PPS has achieved NCQA 2014 Level 3 PCMH standards and/or APCM.	0	0	0	15	30	45	60	75	90	105
Task 1. Conduct Safety Net MU stage 2 CMS/PCMH level 3 readiness assessment: a. Identify site-specific IT/care management leadership b. Determine current EHR PCMH/MU certification status c. Identify site-specific barriers and risks to implementing a MU/PCMH Level 3 certified EHR system										
Task 2. Facilitate engagement with MU/PCMH-certified EHR vendors as needed.										
Task 3. Establish PCMH/MU project implementation plan based on primary care practice readiness and certification status.										
Task 4. Review PCMH implementation plan for approval by the Clinical Quality Committee										
Task 5. Ensure practices have support through the PCMH implementation process either through a vendor or through MCC PCMH coordinators.										
Task 6. Establish a monthly review and measurement process of

implementation progress and report to Clinical/Quality Committee.										
Task 7. Modify implementation plan as needed based on monthly review process.										
Task 8. Practices provide MU and PCMH Level 3 certification documentation to the PPS.										
Milestone #6 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.										
Task PPS identifies targeted patients through patient registries and is able to track actively engaged patients for project milestone reporting.										
Task 1. Define IT requirements for initializing/maintaining/communicating risk stratification across settings, including means for electronic interfacing to the participating provider community and key data sharing.										
Task 2. Implement and deploy population health management risk stratification models and data analytics system leveraging data from the MCC integrated EHR and data exchange/HIE environments.										
Task 3. Identify gaps in care based on established clinical practice guidelines.										
Task 4. Define priority target population, pilot test, and implement risk-stratified patient registries (high risk, moderate risk, low risk, and well).										
Task 5. Track and monitor registry results and reductions in gaps in care to verify continuous improvement.										
Task 6. Establish the capabilities to report on patient engagement according to project reporting requirements.										
Milestone #7 Achieve 2014 Level 3 PCMH primary care certification and/or meet state-determined criteria for Advanced Primary Care Models for all participating PCPs, expand access to primary care providers, and meet EHR Meaningful Use standards by the end of DY 3.

Task Primary care capacity increases improved access for patients seeking services - particularly in high-need areas.										
Task All practices meet 2014 NCQA Level 3 PCMH and/or APCM standards.	0	0	0	10	20	30	105	180	255	330
Task EHR meets Meaningful Use Stage 2 CMS requirements (Note: any/all MU requirements adjusted by CMS will be incorporated into the assessment criteria.)										
Task 1. Perform PCMH and MU readiness assessment and transformation support services for primary care practices: a. Issue RFA or other action step for readiness assessment and transformation support services; b. Select vendor(s).										
Task 2. Identify site-specific physician champions and site-specific IT/care management leadership. Determine PCMH/MU current status and identify site-specific barriers and risks to transformation.										
Task 3. Gather results from readiness assessments already conducted.										
Task 4. Based on CNA results and current data, identify primary care shortages in high-need areas.										
Task 5. Complete gap analysis for all MU/PCMH level 3 elements based on readiness assessment results.										
Task 6. Each site will change policy/procedures, roles/responsibilities, workflow for population health management/care management/care coordination during transitions, performance measurement, CAHPS measurement as needed to meet PCMH/MU standards.										
Task 7. Implement strategies to recruit PCPs to serve high-need areas. Provide status reporting of recruitment of PCPs, particularly in high-need areas, and monitor improvements in access via CAHPS measurement.										
Task 8. Practices provide MU and PCMH Level 3 certification documentation to the PPS.										
Task 9. Maintain list of current/updated NCQA certified practices and EHR MU certifications.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task 10. Initiate PPS monitoring, oversight, and corrective action: a. PSC and Physician Performance Sub-Committee monitor reports and dashboards to identify trends in adherence to MU and PCMH level 3 standards b. Results will drive recommendations to improve meeting MU and PCMH measures c. Non-responsive PCPs will be addressed by the Physician Performance Sub-Committee with corrective action										
Milestone #8 Contract with Medicaid Managed Care Organizations and other payers, as appropriate, as an integrated system and establish value-based payment arrangements.										
Task Medicaid Managed Care contract(s) are in place that include value-based payments.										
Task 1. Assess ability for MCC to contract as IDS with MCOs.										
Task 2. Elicit input from MCOs on elements of a multi-year plan to transition to VBP system; present MCC's proposed multi-year plan to MCOs.										
Task 3. Depending on MCO cooperation, establish work plan that addresses establishing VBP arrangements, and goals to accomplish milestone 8.										
Task 4. Seek and obtain MCOs' revisions to plan. Secure MCOs' approval of plan. Catalog main issues/data needs that require resolution as part of the plan approval process.										
Task 5. Establish partner-specific incentives based on established utilization and quality metrics.										
Task 6. Utilize approved value-based payment (VBP) transition plan to guide agenda-setting in monthly meetings with MCOs.										
Task 7. Provide documentation of executed Medicaid Managed Care contracts.										
Task 8. Set up system to monitor progress with respect to evaluating the VBP transition plan's guideposts against actual results. Provide reports demonstrating percentage of total provider Medicaid reimbursement using value-based payments.										
Task 9. MCOs make recommendations to MCC on VBP										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
arrangements. Implement programs, in-servicing information, and proposals for MCC partners based on MCO recommendations via the Physician Steering Committee.										
Milestone #9 Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform.										
Task PPS holds monthly meetings with Medicaid Managed Care plans to evaluate utilization trends and performance issues and ensure payment reforms are instituted.										
Task 1. Establish VBP Sub-Committee to include representation from behavioral health, adult- and child-care providers, and peers.										
Task 2. Charge VBP Sub-Committee (see Milestone #10) with responsibility of recommending structure and process to meet regularly with MCOs to review and evaluate costs, quality, utilization, and other relevant topics.										
Task 3. For each of the top four MCOs serving WNY (Independent Health, Fidelis, Blue Cross Blue Shield, and YourCare) define the following: participants, meeting schedule, agenda items, and other relevant processes for building PPS partnerships. Establish a process of reporting meeting outcomes/recommendations to stakeholders and PPS leadership. Maintain records of meeting agendas, attendees, minutes, and materials.										
Task 4. Ascertain from NYS DOH what recourses are available to PPS if an MCO does not agree to meet regularly or to engage in an organized VBP agenda with PPS.										
Task 5. Devise and secure buy-in from MCOs that they will adhere to a timetable for transitioning to a VBP system.										
Task 6. Establish agreed-upon data sources, utilization and performance metrics, reports, and dashboard.										
Task 7. Report Medicaid managed care metrics and opportunities to MCC Board of Manager committees.										
Task 8. Publish dashboards to MCC intranet for transparency with partners.										
Task 9. Identify opportunities for improvement based on the agreed-upon metrics and reports and develop process improvement strategies.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task 10. Measure and report progress of process improvement plans to MCC governance on a quarterly basis.										
Milestone #10 Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes.										
Task PPS submitted a growth plan outlining the strategy to evolve provider compensation model to incentive-based compensation										
Task Providers receive incentive-based compensation consistent with DSRIP goals and objectives.										
Task 1. Establish VBP Sub-Committee under MCC's Finance Committee with representatives from finance, legal, medical staff, executive leadership, and others, to formulate a multi-year VBP transition plan.										
Task 2. Engage external expert/consultant to assist in and provide recommendations for development of five-year plan for transitioning to value-based reform system.										
Task 3. As part of plan, summarize process measures and clinical outcome benchmarks that will guide PPS's work over five years.										
Task 4. Based on data from population health, data analytics, PAM, coordination of care, HEDIS, predictive monitoring, risk stratification, and other systems, establish PPS provider compensation tables and incentives. Develop compensation model and implementation plan.										
Task 5. Develop a methodology to calculate criteria for distribution of incentive pool monies to reward performance of PPS partners.										
Task 6. Obtain both Finance Committee and Board of Managers approval of VBP transition plan.										
Task 7. Share transition plan with MCOs and secure their buy-in.										
Task 8. Engage MCOs and payers to agree to specific VBP rates. Specific rates and duration are contractually established.										
Task 9. Utilize feedback from PPS providers to ensure that improvement of desired patient outcomes, patient engagement, positive interventions, and avoidance of negative patient events are included in analysis of MCC programs and delivery models.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Establish MCC provider compensation for patient outcomes.										
Task 10. Communicate agreed-upon payment rates and procedures to PPS members.										
Task 11. Continuously monitor outcomes, trends, and other sources to verify agreed-upon measures are on target. Provide contracts, reports, payment vouchers, and/or other evidence demonstrating implementation of the compensation and performance management system.										
Task 12. Identify PPS providers who are not actively attempting to meet compensation and outcomes established by the Governance Committee. Corrective actions will be implemented for those PPS providers found noncompliant.										
Milestone #11 Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate.										
Task Community health workers and community-based organizations utilized in IDS for outreach and navigation activities.										
Task 1. Initiate outreach and navigation activities; partner with CBOs to implement patient activation activities.										
Task 2. Document partnerships with CBOs.										
Task 3. Define roles for, hire, and train navigators. Provide evidence of community health worker hiring, co-location agreements, and/or job descriptions.										
Task 4. Create communication and education plans for patients for inclusion in the Engagement Strategy and Plan (see IT Systems & Processes, milestone #3).										
Task 5. Implement and deploy patient engagement systems including the patient portal, leveraging data from the MCC integrated EHR and data exchange/HIE environments.										
Task 6. Leverage the communication capabilities available in the patient portal to increase and improve patient-to-caregiver communications.										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task 7. Utilize monitoring in population health management and data analytics for formative evaluation. Report on how many patients are engaged with community health workers.										
Task 8. Verify patient engagement is having the desired positive impact on outcomes and interventions.										
Task 9. Adjust MCC processes and procedures to address gaps in patient engagement, outcomes, and other results via the PSC and Physician Performance Sub-Committee.										

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.										
Task PPS includes continuum of providers in IDS, including medical, behavioral health, post-acute, long-term care, and community-based providers.										
Task 1. Create list of participating providers across the network.										
Task 2. Perform initial gap assessment to identify any gaps in the PPS network, particularly among community-based organizations (CBOs), pharmacists, dentists, behavioral health providers, and key primary care providers (PCPs). Utilize the Community Needs Assessment to identify key areas of focus.										
Task 3. Identify additional gaps by gathering information and recommendations from existing partners/members, the CBO Task Force, the "Voice of the Consumer" Sub-Committee, and geographic councils.										
Task 4. Issue requests for proposals (RFPs) for services to be performed by CBOs, including (but not limited to) cultural competency and health literacy training, Patient Activation coaching, and other services in connection with specific DSRIP projects (see Governance milestone #6).										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 5. Implement a strategy to maximize participation of all PPS partners in MCC projects and activities, provide frequent communication and education through a variety of channels including (but not limited to) biweekly newsletters emailed directly to participating providers and regular updates to the website. Conduct quarterly touchpoints to connect partners to projects and educate them on techniques for referring patients to other MCC partners.										
Task 6. As part of governance structure, establish a process to conduct periodic (quarterly) assessments of provider network in geographic areas throughout WNY to ensure that Medicaid beneficiaries have access to service providers.										
Task 7. Perform gap analysis of PPS providers' capabilities for EHR and data exchange (possess full EHR system, possess some EHR capabilities, or no EHR capabilities).										
Task 8. Develop comprehensive PPS partner database to house all data for readiness, implementation, and ongoing reporting. Partner database will have the capability to produce the provider network list and demonstrate changes to the network list.										
Task 9. Develop ongoing review procedures to ensure that network partners have completed the necessary privacy and participation agreements to serve as a provider in the MCC network. Establish contractual agreements with partners.										
Task 10. Use these gaps, along with results of the Clinical Integration Needs Assessment, to develop a high-level roadmap for inclusion and integration of all partner organizations in the integrated delivery system (IDS).										
Task 11. Engage with local RHIO to develop increased EMR capacity.										
Task 12. Work with HEALTHeLINK to deploy data exchange alerts and messaging environment.										
Task 13. Establish and maintain working relationships with payers to engage them to support IDS strategy.										
Task 14. Identify payers and ancillary social service organization connectivity requirements; build data interfaces for these entities (if applicable).										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 15. Establish reports and secure dashboards so providers and stakeholders can monitor success and quality of data exchange and integration and make recommendations to the MCC IT Data Committee and individual providers to improve data exchange and integration.										
Task 16. IT Data Committee monitors reports and dashboards to identify trends and makes recommendations for improved data access, exchange, integration, and use. Recommendations are reported to the Board of Managers.										
Milestone #2 Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.										
Task PPS produces a list of participating HHs and ACOs.										
Task Participating HHs and ACOs demonstrate real service integration which incorporates a population management strategy towards evolving into an IDS.										
Task Regularly scheduled formal meetings are held to develop collaborative care practices and integrated service delivery.										
Task 1. Produce and maintain list of the major health home (HH) organizations in WNY (five organizations). (There are no ACOs in WNY participating with MCC.)										
Task 2. Finalize and maintain written agreements with protocols for coordinating care.										
Task 3. Assess HH population health management systems and capabilities. Implement evidence-based models to establish linkages with HH population health and care management services. Create system for informing PPS partners of availability of these services.										
Task 4. Meet regularly with leadership from HHs to continue to refine collaborative care practices and integrated service delivery. Discuss how and the extent to which their care management services are connected to EDs, hospital discharge planning, behavioral health, home care services, and safety net PCPs and develop care management linkage recommendations. Maintain evidence of interaction.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 5. Conduct gap analysis to identify gaps in HH members' data exchange and data access capabilities. Verify MCC IDS and EHR solution appropriately addresses these outliers, safety net organizations, behavioral health providers, and patient support members.										
Task 6. Begin providing periodic progress reports to demonstrate service integration; incorporate a population management strategy towards evolving into an IDS.										
Milestone #3 Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.										
Task Clinically Interoperable System is in place for all participating providers.										
Task PPS has protocols in place for care coordination and has identified process flow changes required to successfully implement IDS.										
Task PPS has process for tracking care outside of hospitals to ensure that all critical follow-up services and appointment reminders are followed.										
Task PPS trains staff on IDS protocols and processes.										
Task 1. Recruit and appoint qualified individual to oversee care management across PPS, enable development and dissemination of consistent information/processes, manage care management process, and promote integration and coordination among entities delivering care management.										
Task 2. Develop Care Transitions Strategy, as required in Clinical Integration, including process flow changes required to successfully implement IDS. Develop process flow diagrams demonstrating IDS processes. Leverage Community Health Workers (defined in detail in projects 2.b.iii. ED Care Triage, 2.b.vii. INTERACT, and 2.b.viii. Hospital/Home Care).										
Task 3. Work with project directors, Workforce Development Work Group, and others to determine the knowledge, competencies, and licensures required for care management to effectively work with patients to ensure they receive appropriate healthcare and community support.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 4. Using CNA and other inputs, finalize inventory of WNY agencies providing care management services, including HHs, WNY Care Management Coalition, etc. Identify PPS partners and hospitals that must be linked for effective transitions of care.										
Task 5. Define care management continuum. For each role along the care continuum, describe criteria for patient referral, workflows, care planning process, responsibilities associated with transitions of care, policies and procedures, outcome measure reporting techniques, etc.										
Task 6. Identify cultural and language issues that must be addressed in care management, linkages with medical home care management services, and system for informing PPS partners of availability of chronic disease self-management services.										
Task 7. Convene three sub-regional meetings of individuals with knowledge of hospital-to-home transitions, hospital-to-nursing home transitions, and nursing home-to-skilled nursing facility (SNF) transitions to assess current practices, identify data needs, review root cause analyses, and develop standards for maximizing effectiveness of transitions of care across the PPS. Maintain records including meeting schedules, agendas, minutes, and lists of attendees.										
Task 8. Finalize protocols for warm hand-offs of patients from intensive 30-day post-discharge care planning to HH care management services.										
Task 9. Engage trainers to provide introductory and ongoing care management training on policies and procedures to care managers. Provide written training materials, list of training dates, and number of staff trained.										
Task 10. Develop standards for utilizing existing EHR systems to capture key data and process measures related to DSRIP goals for reporting on care management.										
Task 11. Implement process for tracking care outside of hospital to ensure that all critical follow-up services and appointment reminders are followed. Process will include contract, report, periodic reporting of discharge plans uploaded into EHR, and other means of demonstrating implementation of the system.										
Task 12. In concert with IT, develop short- and mid-term IT platforms										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
to use for tracking, monitoring, and reporting on care coordination transition processes and outcomes to ensure interoperability for all participating providers. Leverage existing PPS data exchange capabilities; reduce data redundancies.										
Task 13. Work with payers and others to clarify and develop care coordination and transition management billing processes; provide such information to providers.										
Task 14. Using evidence-based models, develop a plan to establish a chronic disease self-management program for use by providers throughout the PPS. Include catalog of existing chronic disease self-management providers. Collaborate with existing chronic disease self-management providers (CDSMP) to identify program offerings.										
Task 15. Clinical/Quality Committee, PSC, and Physician Performance Sub-Committee will monitor reports and dashboards to identify trends and make recommendations for improved data access, exchange, integration, and use.										
Milestone #4 Ensure that all PPS safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including directed exchange (secure messaging), alerts and patient record look up, by the end of Demonstration Year (DY) 3.										
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	120	135	150	200	225	252	252	252	252	252
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	240	270	300	330	340	343	343	343	343	343
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	16	18	20	22	24	25	25	25	25	25
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	56	72	82	87	90	92	92	92	92	92
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	53	59	60	62	65	69	69	69	69	69
Task PPS uses alerts and secure messaging functionality.										
Task 1. Conduct gap analysis to determine which providers have										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
already completed PCMH/MU or other connectivity readiness assessment. - Is the practice/providers/patients currently connected to the HIE? - If not, is an agreement in place? - If so, what is the scope of the connectivity (% of providers; % of patients)? - Does EHR meet connectivity requirements of RHIO/SHIN-NY? - Name of EHR, version, and electronic functionalities in use										
Task 2. Develop strategy for low-cost data connectivity between Internet Service Providers (ISPs) (e.g., WNY R-AHEC) and local practice plans to determine minimum hardware and software requirements.										
Task 3. Gather results from readiness assessments already conducted.										
Task 4. Issue request for applications (RFA) or other action step for readiness assessment and transformation support services.										
Task 5. Select vendor or implement other structure for readiness assessment and transformation support services.										
Task 6. Identify funding model and/or PPS provider incentive model for EHR with the Finance Committee.										
Task 7. Connect PPS providers to enterprise DSRIP solution.										
Task 8. Systematically contact PPS providers to provide the recommended enterprise DSRIP solution.										
Task 9. Facilitate QE participation agreements with MCC providers.										
Task 10. Develop and implement training on use of enterprise DSRIP solution, including development of written materials. Track training dates and number of staff trained.										
Task 11. Implement and deploy alerts. Provide EHR vendor documentation, screenshots, and/or evidence of use of alerts.										
Task 12. Implement and deploy secure Direct messaging. Provide EHR vendor documentation, screenshots, and/or evidence of use of secure Direct messaging.										
Task 13. Implement and deploy patient record look-up. Provide EHR										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
vendor documentation, screenshots, and/or evidence of use of patient record look-up.										
Task 14. Implement and deploy public health reporting capabilities. Provide EHR vendor documentation, screenshots, and/or samples of transactions to public health registries.										
Task 15. Continuously add PPS members when their EHR and data exchange capabilities reach the minimal level required to connect to the enterprise DSRIP solution.										
Task 16. PPS providers who are not actively exchanging systems will be addressed by the Physician Performance Sub-Committee. Corrective actions will be implemented for those PPS members found noncompliant.										
Milestone #5 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.										
Task EHR meets Meaningful Use Stage 2 CMS requirements (Note: any/all MU requirements adjusted by CMS will be incorporated into the assessment criteria).										
Task PPS has achieved NCQA 2014 Level 3 PCMH standards and/or APCM.	120	135	150	200	225	252	252	252	252	252
Task 1. Conduct Safety Net MU stage 2 CMS/PCMH level 3 readiness assessment: a. Identify site-specific IT/care management leadership b. Determine current EHR PCMH/MU certification status c. Identify site-specific barriers and risks to implementing a MU/PCMH Level 3 certified EHR system										
Task 2. Facilitate engagement with MU/PCMH-certified EHR vendors as needed.										
Task 3. Establish PCMH/MU project implementation plan based on primary care practice readiness and certification status.										
Task 4. Review PCMH implementation plan for approval by the Clinical Quality Committee										
Task 5. Ensure practices have support through the PCMH implementation process either through a vendor or through MCC PCMH coordinators.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 6. Establish a monthly review and measurement process of implementation progress and report to Clinical/Quality Committee.										
Task 7. Modify implementation plan as needed based on monthly review process.										
Task 8. Practices provide MU and PCMH Level 3 certification documentation to the PPS.										
Milestone #6 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.										
Task PPS identifies targeted patients through patient registries and is able to track actively engaged patients for project milestone reporting.										
Task 1. Define IT requirements for initializing/maintaining/communicating risk stratification across settings, including means for electronic interfacing to the participating provider community and key data sharing.										
Task 2. Implement and deploy population health management risk stratification models and data analytics system leveraging data from the MCC integrated EHR and data exchange/HIE environments.										
Task 3. Identify gaps in care based on established clinical practice guidelines.										
Task 4. Define priority target population, pilot test, and implement risk-stratified patient registries (high risk, moderate risk, low risk, and well).										
Task 5. Track and monitor registry results and reductions in gaps in care to verify continuous improvement.										
Task 6. Establish the capabilities to report on patient engagement according to project reporting requirements.										
Milestone #7 Achieve 2014 Level 3 PCMH primary care certification and/or meet state-determined criteria for Advanced Primary Care Models for all participating PCPs, expand access to primary care providers, and meet EHR Meaningful Use standards by the end										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
of DY 3.										
Task Primary care capacity increases improved access for patients seeking services - particularly in high-need areas.										
Task All practices meet 2014 NCQA Level 3 PCMH and/or APCM standards.	405	480	555	630	650	653	653	653	653	653
Task EHR meets Meaningful Use Stage 2 CMS requirements (Note: any/all MU requirements adjusted by CMS will be incorporated into the assessment criteria.)										
Task 1. Perform PCMH and MU readiness assessment and transformation support services for primary care practices: a. Issue RFA or other action step for readiness assessment and transformation support services; b. Select vendor(s).										
Task 2. Identify site-specific physician champions and site-specific IT/care management leadership. Determine PCMH/MU current status and identify site-specific barriers and risks to transformation.										
Task 3. Gather results from readiness assessments already conducted.										
Task 4. Based on CNA results and current data, identify primary care shortages in high-need areas.										
Task 5. Complete gap analysis for all MU/PCMH level 3 elements based on readiness assessment results.										
Task 6. Each site will change policy/procedures, roles/responsibilities, workflow for population health management/care management/care coordination during transitions, performance measurement, CAHPS measurement as needed to meet PCMH/MU standards.										
Task 7. Implement strategies to recruit PCPs to serve high-need areas. Provide status reporting of recruitment of PCPs, particularly in high-need areas, and monitor improvements in access via CAHPS measurement.										
Task 8. Practices provide MU and PCMH Level 3 certification documentation to the PPS.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

Task 9. Maintain list of current/updated NCQA certified practices and EHR MU certifications.										
Task 10. Initiate PPS monitoring, oversight, and corrective action: a. PSC and Physician Performance Sub-Committee monitor reports and dashboards to identify trends in adherence to MU and PCMH level 3 standards b. Results will drive recommendations to improve meeting MU and PCMH measures c. Non-responsive PCPs will be addressed by the Physician Performance Sub-Committee with corrective action										
Milestone #8 Contract with Medicaid Managed Care Organizations and other payers, as appropriate, as an integrated system and establish value-based payment arrangements.										
Task Medicaid Managed Care contract(s) are in place that include value-based payments.										
Task 1. Assess ability for MCC to contract as IDS with MCOs.										
Task 2. Elicit input from MCOs on elements of a multi-year plan to transition to VBP system; present MCC's proposed multi-year plan to MCOs.										
Task 3. Depending on MCO cooperation, establish work plan that addresses establishing VBP arrangements, and goals to accomplish milestone 8.										
Task 4. Seek and obtain MCOs' revisions to plan. Secure MCOs' approval of plan. Catalog main issues/data needs that require resolution as part of the plan approval process.										
Task 5. Establish partner-specific incentives based on established utilization and quality metrics.										
Task 6. Utilize approved value-based payment (VBP) transition plan to guide agenda-setting in monthly meetings with MCOs.										
Task 7. Provide documentation of executed Medicaid Managed Care contracts.										
Task 8. Set up system to monitor progress with respect to evaluating the VBP transition plan's guideposts against actual results. Provide reports demonstrating percentage of total provider

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Medicaid reimbursement using value-based payments.										
Task 9. MCOs make recommendations to MCC on VBP arrangements. Implement programs, in-servicing information, and proposals for MCC partners based on MCO recommendations via the Physician Steering Committee.										
Milestone #9 Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform.										
Task PPS holds monthly meetings with Medicaid Managed Care plans to evaluate utilization trends and performance issues and ensure payment reforms are instituted.										
Task 1. Establish VBP Sub-Committee to include representation from behavioral health, adult- and child-care providers, and peers.										
Task 2. Charge VBP Sub-Committee (see Milestone #10) with responsibility of recommending structure and process to meet regularly with MCOs to review and evaluate costs, quality, utilization, and other relevant topics.										
Task 3. For each of the top four MCOs serving WNY (Independent Health, Fidelis, Blue Cross Blue Shield, and YourCare) define the following: participants, meeting schedule, agenda items, and other relevant processes for building PPS partnerships. Establish a process of reporting meeting outcomes/recommendations to stakeholders and PPS leadership. Maintain records of meeting agendas, attendees, minutes, and materials.										
Task 4. Ascertain from NYS DOH what recourses are available to PPS if an MCO does not agree to meet regularly or to engage in an organized VBP agenda with PPS.										
Task 5. Devise and secure buy-in from MCOs that they will adhere to a timetable for transitioning to a VBP system.										
Task 6. Establish agreed-upon data sources, utilization and performance metrics, reports, and dashboard.										
Task 7. Report Medicaid managed care metrics and opportunities to MCC Board of Manager committees.										
Task 8. Publish dashboards to MCC intranet for transparency with partners.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 9. Identify opportunities for improvement based on the agreed-upon metrics and reports and develop process improvement strategies.										
Task 10. Measure and report progress of process improvement plans to MCC governance on a quarterly basis.										
Milestone #10 Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes.										
Task PPS submitted a growth plan outlining the strategy to evolve provider compensation model to incentive-based compensation										
Task Providers receive incentive-based compensation consistent with DSRIP goals and objectives.										
Task 1. Establish VBP Sub-Committee under MCC's Finance Committee with representatives from finance, legal, medical staff, executive leadership, and others, to formulate a multi-year VBP transition plan.										
Task 2. Engage external expert/consultant to assist in and provide recommendations for development of five-year plan for transitioning to value-based reform system.										
Task 3. As part of plan, summarize process measures and clinical outcome benchmarks that will guide PPS's work over five years.										
Task 4. Based on data from population health, data analytics, PAM, coordination of care, HEDIS, predictive monitoring, risk stratification, and other systems, establish PPS provider compensation tables and incentives. Develop compensation model and implementation plan.										
Task 5. Develop a methodology to calculate criteria for distribution of incentive pool monies to reward performance of PPS partners.										
Task 6. Obtain both Finance Committee and Board of Managers approval of VBP transition plan.										
Task 7. Share transition plan with MCOs and secure their buy-in.										
Task 8. Engage MCOs and payers to agree to specific VBP rates. Specific rates and duration are contractually established.

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 9. Utilize feedback from PPS providers to ensure that improvement of desired patient outcomes, patient engagement, positive interventions, and avoidance of negative patient events are included in analysis of MCC programs and delivery models. Establish MCC provider compensation for patient outcomes.										
Task 10. Communicate agreed-upon payment rates and procedures to PPS members.										
Task 11. Continuously monitor outcomes, trends, and other sources to verify agreed-upon measures are on target. Provide contracts, reports, payment vouchers, and/or other evidence demonstrating implementation of the compensation and performance management system.										
Task 12. Identify PPS providers who are not actively attempting to meet compensation and outcomes established by the Governance Committee. Corrective actions will be implemented for those PPS providers found noncompliant.										
Milestone #11 Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate.										
Task Community health workers and community-based organizations utilized in IDS for outreach and navigation activities.										
Task 1. Initiate outreach and navigation activities; partner with CBOs to implement patient activation activities.										
Task 2. Document partnerships with CBOs.										
Task 3. Define roles for, hire, and train navigators. Provide evidence of community health worker hiring, co-location agreements, and/or job descriptions.										
Task 4. Create communication and education plans for patients for inclusion in the Engagement Strategy and Plan (see IT Systems & Processes, milestone #3).										
Task 5. Implement and deploy patient engagement systems including the patient portal, leveraging data from the MCC integrated EHR and data exchange/HIE environments.

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 6. Leverage the communication capabilities available in the patient portal to increase and improve patient-to-caregiver communications.										
Task 7. Utilize monitoring in population health management and data analytics for formative evaluation. Report on how many patients are engaged with community health workers.										
Task 8. Verify patient engagement is having the desired positive impact on outcomes and interventions.										
Task 9. Adjust MCC processes and procedures to address gaps in patient engagement, outcomes, and other results via the PSC and Physician Performance Sub-Committee.

All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	We have completed tasks #1, 2, and 3 in this milestone and the remaining tasks are progressing as expected.
Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.	We completed task #1 in this milestone and the remaining tasks are progressing as expected.
Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.	We have completed task #1 in this milestone and the remaining tasks are progressing as expected.
Ensure that all PPS safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including directed exchange (secure messaging), alerts and patient record	This milestone is progressing as expected.

look up, by the end of Demonstration Year (DY) 3.	
Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.	This milestone is progressing as expected.
Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.	This milestone is progressing as expected.
Achieve 2014 Level 3 PCMH primary care certification and/or meet state-determined criteria for Advanced Primary Care Models for all participating PCPs, expand access to primary care providers, and meet EHR Meaningful Use standards by the end of DY 3.	This milestone is progressing as expected.
Contract with Medicaid Managed Care Organizations and other payers, as appropriate, as an integrated system and establish value-based payment arrangements.	We completed task #1 in this milestone and the remaining tasks are progressing as expected.
Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform.	This milestone is progressing as expected.
Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes.	This milestone is progressing as expected.
Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate.	We completed tasks #1-2 in this milestone and the remaining tasks are progressing as expected.

Project 2.b.iii – ED care triage for at-risk populations

IPQR Module 2.b.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Financial distributions from the NYS DOH may be impacted if quarterly goals are not attained. Resistance to change and IT system limitations may impact ability to attain project goals.

Site-specific challenges may interfere with the successful implementation and integration of this project at each site and the ability of the initiative to achieve project milestones. MCC will develop the project in a way that allows flexibility and accommodates variability across sites while ensuring each site follows uniform procedures and reports on standardized metrics.

Limited availability of primary care appointments within four weeks of an ED visit for high-risk ED patients will negatively impact the project's ability to meet quarterly performance deliverables. The broader DSRIP initiative will address availability of primary care in the region.

Insurance will not pay unless the patient sees their identified PCP. If an appointment with the patient's identified PCP is not available within four weeks, he or she must contact the insurance company, change PCPs, then make the appointment. Reach out to insurance companies to streamline process or adjust policies.

Inadequate staffing/resources at each site will affect ability to reach goals and target. Start by implementing the project at EDs with higher volume. Develop and utilize virtual care coordinator/CHW resources to allow "sharing" of resources between high and low ED volume sites.

Lack of access to 24x7 primary care scheduling systems will affect the project's ability to schedule PCP appointments for patients and communicate this information to patients at the time of their ED visit. Work with sites for real-time access to scheduling systems, starting with safety net providers.

As the CHW will be a new role for most of the EDs, there is risk of confusion about this new role, duplication, and lack of support. The role of the CHW and other staff in the ED must be well defined and shared with all ED personnel.

Lack of availability (or awareness) of community resources to address barriers to access will affect the patient's ability to get to the scheduled PCP appointments. Develop partnerships with community service providers. Work with health literacy experts to publicize available resources.

Inadequate communication between the ED and PCPs creates discontinuity of care, causes potential duplication of tests, and affects timely treatment of patient issues at the appropriate setting. Transmit patient ED visit information to PCPs. Patients will receive a healthcare folder with discharge summary/instructions to take to PCP.

Failure to provide consistent messaging for patients regarding appropriate use of healthcare services at all points of access will negatively impact

the ability of MCC to change patient utilization behavior. Coordinate with other PPSs in WNY to develop standardized messaging.

High-risk ED patients are often difficult to engage and contact for follow-up. CHWs go into the field when necessary to "find" patients; partner with other agencies that may be serving the patient to reconnect them to care.

CHW and ED staff are not properly trained to engage patients, identify barriers to care, refer patients to needed services, and motivate patients to utilize PCP services. CHWs will receive training to prepare them and educate them on processes and procedures.

Lack of communication or inadequate processes could lead to patients falling through the cracks or duplication of services. Each site will facilitate a monthly meeting to discuss processes for identifying patients, roles, missed patients, referrals, challenges, and develop corrective action plans.

A new application built on the Salesforce.com platform to supports patient encounter tracking and the project is transitioning to the automated tool. It has been piloted at the first ED to work through the usual issues.

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 2.b.iii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Patient Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q3 should include patients previously reported in DY1 Q2 plus new patients engaged in DY1 Q3. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
100% Actively Engaged By	**Expected Patient Engagement**
DY4,Q4	14,300

Patient Update		% of Semi-Annual Commitment To-Date	Semi-Annual Variance of Projected to Actual	% of Total Actively Engaged Patients To-Date
DY1, Q1	DY1,Q2			
0	1,221	122.10%	-221	8.54%

Establish ED care triage program for at-risk populations	Tasks 1-12 were completed on schedule. Task 13 was moving slowly at quarter end but is now on track; other in-progress tasks are on schedule.
Participating EDs will establish partnerships to community primary care providers with an emphasis on those that are PCMHs and have open access scheduling. a. Achieve NCQA 2014 Level 3 Medical Home standards or NYS Advanced Primary Care Model standards by the end of DSRIP Year 3. b. Develop process and procedures to establish connectivity between the emergency department and community primary care	Task 1 was completed on schedule and in-progress tasks are on schedule.

Millennium Collaborative Care (PPS ID:48)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
providers. c. Ensure real time notification to a Health Home care manager as applicable	
For patients presenting with minor illnesses who do not have a primary care provider: a. Patient navigators will assist the presenting patient to receive an immediate appointment with a primary care provider, after required medical screening examination, to validate a non-emergency need. b. Patient navigator will assist the patient with identifying and accessing needed community support resources. c. Patient navigator will assist the member in receiving a timely appointment with that provider's office (for patients with a primary care provider).	Tasks 1-7 were completed on schedule and in-progress tasks are on schedule.
Established protocols allowing ED and first responders - under supervision of the ED practitioners - to transport patients with non-acute disorders to alternate care sites including the PCMH to receive more appropriate level of care. (This requirement is optional.)	not applicable (optional)
Use EHRs and other technical platforms to track all patients engaged in the project.	Tasks 1, 3 & 4 were completed on schedule. Task #2 in moving slowly and is late. Other in-progress tasks are on schedule.

Project 2.b.vii – Implementing the INTERACT project (inpatient transfer avoidance program for SNF)

IPQR Module 2.b.vii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

INTERACT relies on care coordination of patients across varying levels of care which is currently not always effective. Coordination is often impeded by lack of care coordination technology, varied EHR capabilities, and difficulties relaying data to a centralized system. Ensure protocols for care transition are clearly defined. Invest in care coordination technology and train staff to coordinate patient transitions among various levels of care; tie care coordination technology into EHR systems and the RHIO to improve current connectivity standards. Negotiate a group purchasing rate with EHR provider to receive most competitive price for providers. Ensure that information transfer includes patient EHR data which is shared among all stakeholders.

Lack of viable discharge locations for severely ill community-dwelling individuals due to lack of resources and support. Engage CBOs in project. Work through the CBO Task Force to connect patients to community health workers who can get the patients set up for appropriate care outside the SNF/hospital.

Lack of payer reimbursement for activation of INTERACT; potential for a decrease in reimbursement to SNF facilities as a result of not activating skilled services which is currently required; increased SNF costs due to higher levels of acuity among SNF residents. Continue to engage third-party payers to activate a higher level of reimbursement for treating in place vs. sending a patient to the hospital. Evaluate shared savings and bundled payment value-based performance models.

NYS DOH survey exposure related to not sending patients to ED; increase in SNF liability due to higher levels of SNF resident acuity. MCC has submitted appropriate regulatory waivers to help mitigate some of this risk. Staff from the Nursing Home Division of the Western Regional Office of the NYS DOH will be engaged to review potential impact on survey process and impact on resident-related care that could result.

Lack of buy-in from medical directorships and resident families. Some providers may resist INTERACT protocols. Inconsistent adoption will impact MCC's ability to provide effective care, negatively impacting DSRIP metrics. Encourage physicians to participate in policy planning. Offer INTERACT educational seminars to physicians and families to make them more comfortable with the process. Train INTERACT champions to provide additional support for providers who are particularly resistant. Provide opportunities for providers to engage in discussion about the implementation of INTERACT at their facilities. Increase level of expertise of facility practitioners with other interventions such as telemedicine.

There is considerable county overlap with two adjacent PPSs in WNY, so hand-offs from one provider to another may cross PPS "lines." Provide a relatively uniform experience for patients regardless of where they receive care. Patient choice and patient satisfaction must remain a high priority. If a patient is handed off to a provider outside the PPS, ideally the patient would not even need to be aware of this crossover. To create a seamless transition for patients, PPSs will agree to share registry information, use standardized referral protocols, utilize uniform tracking and reporting systems, and maintain common messaging to educate patients.

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

INTERACT project consumes a disproportionate amount of limited staff resources which are not reimbursed by payers. PPS formulating plan to provide incentive payments to INTERACT participants and to provide direct payments to offset initial costs of retraining staff. Hire and train a centralized PPS coaching team to assist with providing continued training to all SNF partners after initial partner education has been completed. Organize periodic ongoing in-service training for all staff of participating facilities.

IPQR Module 2.b.vii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Patient Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q3 should include patients previously reported in DY1 Q2 plus new patients engaged in DY1 Q3. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

10. Conduct training										
Task 11. Development of SNF direct care educational materials regarding INTERACT principles										
Task 12. INTERACT PM and coach provide facility INTERACT in-service to direct care staff following I-TEAM training										
Task 13. Direct Care Staff complete written test/assessment of INTERACT tools and process knowledge upon completion of in-service										
Task 14. Evaluation tool is created to assess facility implementation of INTERACT protocol and to identify areas of improvement										
Task 15. INTERACT coach and PM perform quarterly evaluations of each facility and use of INTERACT tools and protocol										
Task 16. SNF MD/PA/NP education developed regarding INTERACT protocol and process										
Task 17. SNF MD/PA/NP education provided regarding INTERACT protocol and process										
Task 18. Develop recording template in Excel for data collection of each SNF metrics										
Task 19. INTERACT coach records transfer data at each quarterly SNF visit										
Task 20. Quarterly summary report created compiling results of each facility separately and collectively to analyze effectiveness of program										
Task 21. Facility needs assessment created to determine EMR/hardware/software capabilities and potential IT/operational barriers										
Task 22. Facility needs assessment completed by each facility and reviewed by PM										
Task 23. Implementation plan for INTERACT toolkit integration created										
Task 24. Develop recording measure for SNF staff to use when referencing INTERACT Toolkit										

New York State Department Of Health

Task 25. INTERACT PM and coach to educate necessary SNF staff regarding use of recording measure										
Task 26. INTERACT coach and PM to create Toolkit Sharing System for each facility										
Task 27. INTERACT coach and PM to distribute Toolkit Sharing System and educate necessary SNF staff in use at each facility										
Task 28. INTERACT coach records Toolkit usage data at each quarterly visit										
Milestone #2 Identify a facility champion who will engage other staff and serve as a coach and leader of INTERACT program.										
Task Facility champion identified for each SNF.	0	3	10	25	40	53	53	53	53	53
Task 1. Facility champion description to be developed and distributed to SNFs										
Task 2. Each SNF to select facility champion										
Task 3. Facility champion to sign participation contract										
Task 4. Record facility champion name and contact information into master list										
Task 5. Arrange meeting opportunities for facility champions to meet and discuss implementation successes and barriers, share lessons learned.										
Milestone #3 Implement care pathways and other clinical tools for monitoring chronically ill patients, with the goal of early identification of potential instability and intervention to avoid hospital transfer.										
Task Care pathways and clinical tool(s) created to monitor chronically-ill patients.										
Task PPS has developed and implemented interventions aimed at avoiding eventual hospital transfer and has trained staff on use of interventions in alignment with the PPS strategic plan to monitor critically ill patients and avoid hospital readmission.										
Task 1. Collaborate with SNFs to analyze INTERACT Care Pathway materials and develop reference materials for each facility

Task 3. Collaborate with DSRIP project 2ai to understand capabilities										
Task 4. Develop a plan for implementation across SNFs										
Task 5. Execute the implementation plan										
Milestone #9 Measure outcomes (including quality assessment/root cause analysis of transfer) in order to identify additional interventions.										
Task Membership of quality committee is representative of PPS staff involved in quality improvement processes and other stakeholders.										
Task Quality committee identifies opportunities for quality improvement and use of rapid cycle improvement methodologies, develops implementation plans, and evaluates results of quality										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
improvement initiatives.										
Task PPS evaluates and creates action plans based on key quality metrics, to include applicable metrics in Attachment J.										
Task Service and quality outcome measures are reported to all stakeholders.										
Task 1. Create quality committee for INTERACT project.										
Task 2. Schedule quarterly INTERACT quality committee meetings.										
Task 3. Create presentation of quarterly metrics and statistics from aggregated data collected at quarterly SNF contact and site visits										
Task 4. Present findings to INTERACT quality committee, discuss problem areas, areas of success that could be applied to other facilities.										
Task 5. Create quarterly improvement plans based on quarterly program outcomes from each SNF. INTERACT quality committee will provide quarterly reports to the MCC Clinical/Quality Committee.										
Task 6. Schedule trainings with applicable SNFs who require implementation of improvement plans.										
Task 7. Hold improvement trainings at each applicable SNF with direct care staff.										
Task 8. Administer facility evaluation one month post improvement training to analyze success of remediation.										
Task 9. Distribute improvement plans to members of quality committee via email or MCC website.										
Task 10. Distribute results of improvement plan implementation within facilities and lessons learned via email or MCC website.										
Milestone #10 Use EHRs and other technical platforms to track all patients engaged in the project.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 11. Development of SNF direct care educational materials regarding INTERACT principles										
Task 12. INTERACT PM and coach provide facility INTERACT in-service to direct care staff following I-TEAM training										
Task 13. Direct Care Staff complete written test/assessment of INTERACT tools and process knowledge upon completion of in-service										
Task 14. Evaluation tool is created to assess facility implementation of INTERACT protocol and to identify areas of improvement										
Task 15. INTERACT coach and PM perform quarterly evaluations of each facility and use of INTERACT tools and protocol										
Task 16. SNF MD/PA/NP education developed regarding INTERACT protocol and process										
Task 17. SNF MD/PA/NP education provided regarding INTERACT protocol and process										
Task 18. Develop recording template in Excel for data collection of each SNF metrics										
Task 19. INTERACT coach records transfer data at each quarterly SNF visit										
Task 20. Quarterly summary report created compiling results of each facility separately and collectively to analyze effectiveness of program										
Task 21. Facility needs assessment created to determine EMR/hardware/software capabilities and potential IT/operational barriers										
Task 22. Facility needs assessment completed by each facility and reviewed by PM										
Task 23. Implementation plan for INTERACT toolkit integration created										
Task 24. Develop recording measure for SNF staff to use when referencing INTERACT Toolkit										
Task 25. INTERACT PM and coach to educate necessary SNF staff										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
regarding use of recording measure										
Task 26. INTERACT coach and PM to create Toolkit Sharing System for each facility										
Task 27. INTERACT coach and PM to distribute Toolkit Sharing System and educate necessary SNF staff in use at each facility										
Task 28. INTERACT coach records Toolkit usage data at each quarterly visit										
Milestone #2 Identify a facility champion who will engage other staff and serve as a coach and leader of INTERACT program.										
Task Facility champion identified for each SNF.	53	53	53	53	53	53	53	53	53	53
Task 1. Facility champion description to be developed and distributed to SNFs										
Task 2. Each SNF to select facility champion										
Task 3. Facility champion to sign participation contract										
Task 4. Record facility champion name and contact information into master list										
Task 5. Arrange meeting opportunities for facility champions to meet and discuss implementation successes and barriers, share lessons learned.										
Milestone #3 Implement care pathways and other clinical tools for monitoring chronically ill patients, with the goal of early identification of potential instability and intervention to avoid hospital transfer.										
Task Care pathways and clinical tool(s) created to monitor chronically-ill patients.										
Task PPS has developed and implemented interventions aimed at avoiding eventual hospital transfer and has trained staff on use of interventions in alignment with the PPS strategic plan to monitor critically ill patients and avoid hospital readmission.										
Task 1. Collaborate with SNFs to analyze INTERACT Care Pathway materials and develop reference materials for each facility

Task 2. Develop recording measure for SNF staff to use when referencing INTERACT Care pathways and Tools										
Task 3. INTERACT Coach and PM to create Care pathway sharing system for use while providing direct patient care										
Task 4. INTERACT Coach and PM to distribute Care pathway reference materials and sharing system to each SNF										
Task 5. INTERACT coach records Care pathway usage data at each quarterly visit										
Task 6. Facility participation in ITEAM training										
Task 7. Facility identification of Nurse Champion										
Task 8. Collaboration with each SNF Nurse Champion and other necessary staff to strategize effective course of action to monitor critically ill patients										
Task 9. Development of implementation plan created for hospital avoidance and chronic condition monitoring										
Task 10. Educational materials created for direct care staff in-service on hospital avoidance and chronic condition monitoring plan										
Task 11. Education provided to facility direct care staff regarding hospital avoidance and chronic condition monitoring plan and process										
Task 12. Quarterly evaluations of SNF implementation of hospital avoidance and chronic condition monitoring plan										
Task 13. Quarterly report written documenting progress and impediments to program										
Task 14. As needed consultations with PM at each SNF regarding areas of weakness in program implementation										
Milestone #4 Educate all staff on care pathways and INTERACT principles.										
Task Training program for all SNF staff established encompassing care pathways and INTERACT principles.	53	53	53	53	53	53	53	53	53	53
Task 1. Facility direct care staff care pathway and INTERACT principle

in-service is created										
Task 2. INTERACT PM to develop training material regarding INTERACT toolkit and Care pathways to be included in each facility's orientation materials for new employees										
Task 3. INTERACT Coach and PM to provide education to direct care staff of each facility regarding Care pathways and use in everyday practice										
Task 4. INTERACT Coach and PM to provide education to direct care staff of each facility regarding Toolkit and use in everyday practice										
Milestone #5 Implement Advance Care Planning tools to assist residents and families in expressing and documenting their wishes for near end of life and end of life care.										
Task Advance Care Planning tools incorporated into program (as evidenced by policies and procedures).										
Task 1. Form Palliative Care Committee to identify gaps in Advance Care Planning Process and formulate policy for Advance Care Planning Procedure										
Task 2. Collaborate with other palliative care resources within community (e.g., The Conversation Project, Hospice Buffalo) to identify areas of overlap and/or barriers to progress										
Task 3. Advance care planning toolkit developed by PM using INTERACT tools and other palliative/geriatric care resources as reference (The Conversation Project, The Coalition for Compassionate Care, Closure.org, Caring Connections of the National Hospice Org)										
Task 4. Advance care planning toolkit distributed to SNFs										
Task 5. Social work and other applicable direct care staff educated on Advance care planning toolkit by either PM or INTERACT coach										
Task 6. Develop recording measure for SNF staff to use when referencing Advanced Care Planning Tools										
Task 7. Educate necessary SNF staff regarding use of Advance Care Planning recording measure

Task 8. INTERACT coach and PM to record Advance Care Planning metrics quarterly										
Task 9. Measure effectiveness of Advance Care Planning tool and adjust as needed based on results										
Milestone #6 Create coaching program to facilitate and support implementation.										
Task INTERACT coaching program established at each SNF.	53	53	53	53	53	53	53	53	53	53
Task 1. INTERACT Coach Job description written										
Task 2. INTERACT Coach position(s) approved										
Task 3. INTERACT Coach position(s) posted										
Task 4. INTERACT Coach position(s) candidates interviewed										
Task 5. INTERACT Coach position(s) hired										
Task 6. PM creates schedule for SNF training and quarterly visits to each facility										
Task 7. INTERACT Coach and PM collaborate with each SNF to provide initial INTERACT training to direct care staff										
Task 8. INTERACT Coach and PM perform quarterly visits to each SNF for data gathering and on site training when required										
Milestone #7 Educate patient and family/caretakers, to facilitate participation in planning of care.										
Task Patients and families educated and involved in planning of care using INTERACT principles.										
Task 1. Collaborate with community providers regarding current state processes and engagement of family and resident in planning of care; review resources and educational materials available										
Task 2. Collaborate with "Voice of the Consumer" sub-committee to ensure cultural competence within educational materials and program										
Task 3. Create informational resources for resident and family										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
regarding advance care planning and hospital avoidance, benefits to patient remaining in house										
Task 4. Educate Social Work and other applicable direct care staff on resident/family education and informational resource hand off to resident/family										
Task 5. Create documentation tool for staff to record when family education using provided tools has been completed										
Task 6. Educate staff in use of documentation tool for data recording										
Milestone #8 Establish enhanced communication with acute care hospitals, preferably with EHR and HIE connectivity.										
Task EHR meets Meaningful Use Stage 2 CMS requirements (Note: any/all MU requirements adjusted by CMS will be incorporated into the assessment criteria.)										
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	25	25	25	25	25	25	25	25	25	25
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	49	49	49	49	49	49	49	49	49	49
Task 1. Collaborate with community providers to define SNF business requirements for EHR										
Task 2. Share requirements with 2ai IDS project										
Task 3. Collaborate with DSRIP project 2ai to understand capabilities										
Task 4. Develop a plan for implementation across SNFs										
Task 5. Execute the implementation plan										
Milestone #9 Measure outcomes (including quality assessment/root cause analysis of transfer) in order to identify additional interventions.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Implement INTERACT at each participating SNF, demonstrated by active use of the INTERACT 3.0 toolkit and other resources available at http://interact2.net.	The I-TEAM INTERACT training was held from August 17-21,2015; therefore tasks #1-10 have been completed. We have also completed tasks 11, 18, 21, 23-24 in this milestone, and the remaining tasks are progressing as expected. The Implementation Survey/Needs Assessment has been sent multiple times to all SNF facilities. We have received 35 out of 52 surveys/assessments back. It is taking extended time to outreach to facilities who have yet to respond.
Identify a facility champion who will engage other staff and serve as a coach and leader of INTERACT program.	We completed task #1 in this milestone and the remaining tasks are progressing as expected.
Implement care pathways and other clinical tools for monitoring chronically ill patients, with the goal of early identification of potential instability and intervention to avoid hospital transfer.	All scheduled tasks have been initiated and are progressing as anticipated. Task #6 has been completed.
Educate all staff on care pathways and INTERACT principles.	Care pathways have been distributed to facilities who have participated in direct care staff trainings.
Implement Advance Care Planning tools to assist residents and families in expressing and documenting their wishes for near end of life and end of life care.	All scheduled tasks have been initiated and are progressing as anticipated.
Create coaching program to facilitate and support implementation.	We have completed tasks #1-6 in this milestone and the remaining tasks are progressing as expected.
Educate patient and family/caretakers, to facilitate participation in planning of care.	The status of this milestone changed due to previous limitations to the MAPP.
Establish enhanced communication with acute care hospitals, preferably with EHR and HIE connectivity.	All scheduled tasks have been initiated and are progressing as anticipated. Task #1 was incorporated into the Implementation Survey/Needs Assessment task and therefore has been started early.
Measure outcomes (including quality assessment/root cause	We have completed task #1 in this milestone and the remaining tasks are progressing as expected. The first two meetings of the Long-Term Care Work

analysis of transfer) in order to identify additional interventions.	Group Committee were held on August 6 and October 22, 2015.
Use EHRs and other technical platforms to track all patients engaged in the project.	All scheduled tasks have been initiated and are progressing as anticipated. Patient tracking requirements and metrics have been shared with consultant group responsible for development of Enterprise DSRIP Solution. Project 2ai manager attended meeting in which patient tracking requirements and metrics were shared and discussed with consultant group.

Project 2.b.viii – Hospital-Home Care Collaboration Solutions

IPQR Module 2.b.viii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

In order for a patient who presents to an emergency department (ED) to safely transition back into the community and avoid a hospital admission, a physician-ordered plan of care needs to be established. ED/hospital physicians may be reluctant to sign orders to initiate the community-based plan of care for patients without a PCP. Link patients to a PCP who will assume responsibility of managing patient collaboratively with community-based resources. Educate ED/hospital physicians regarding their temporary role of initiating orders and care management until patient is linked with a PCP. Identify need for PCP linkage at ED intake. Develop a centralized PCP group that is available on short notice to see patient, sign orders, and manage case.

Changing the ED utilization culture will be challenging. ED physicians do not feel confident that redirecting patient to a community-based plan of care will be safe or effective. Conduct outreach and advertising in the community to educate on the alternatives to ED visits. Educate ED/hospital physicians and staff on capabilities of community providers. Communicate expected timeliness to initiate treatment. Describe expectations for follow-up and ongoing communication between the provider and the physician.

Lack of a multidisciplinary hospital admission avoidance process. Develop a rapid response team that coordinates many organizations across the continuum of care. Initiates the process that triages patient and implements a plan of care to safely address the needs in the home to avoid an unnecessary hospitalization.

Insurance considerations become an operational challenge due to the time-of-day and urgency of delivering skilled services; insurances may not be readily accessible to grant prior authorization for the ordered services, which could lead to financial liability for the patient and providers. Work with payers to develop reimbursement authorization procedures and drug coverage protocols that will ensure the best possible outcomes for stakeholders.

Medications and medical equipment may not be dispensed soon enough to accommodate a change in treatment plan for the home care patient. Establish procedures that address "first-dose" accommodations at the facility where the patient presents. This will allow for adequate preparation of complex services that will be subsequently provided in the patient's home. Work with payers to develop protocols for medication/DME authorization.

Patients residing in rural areas have difficulty accessing their PCPs; due to lack of periodic monitoring and medical intervention of chronic conditions, rural patients may be prone to utilize the ED. Establish/access a "mobile physician" group to perform medical assessment in the home. Educate physicians on how and when to link the patient with a home care agency. Utilize tele-monitoring programs to remotely allow for patient/provider interaction. Establish regional triage satellites.

The high volume of patients with behavioral health needs in the WNY region require a more specialized approach. Develop behavioral health

home care teams. Coordinate services and orders between the patient's psychiatrist and PCP. Increase communication among behavioral health clinics, the health home, and home care teams.

Grand scale implementation of this project can lead to failure and a loss of confidence in the home care/hospital collaboration process. Maintain consistent performance throughout the project to gain buy-in and communicate that the initiatives are safe, efficient, and patient-centric. Roll out the project in well-defined steps. Evaluate the processes' effectiveness regularly. Encourage participation from multiple providers.

Millennium Collaborative Care (PPS ID:48)

IPQR Module 2.b.viii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Patient Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q3 should include patients previously reported in DY1 Q2 plus new patients engaged in DY1 Q3. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

TEAM training.										
Task 2. Collaborate with Project 2bvii to obtain a contract with INTERACT training vendor.										
Task 3. Develop Home Health specific INTERACT training material.										
Task 4. Identify training participants.										
Task 5. Develop communication for participants to be informed of I-TEAM training.										
Task 6. Secure I-TEAM training locations.										
Task 7. Schedule I-TEAM training.										
Task 8. Conduct I-TEAM training.										
Task 9. INTERACT PM and Coach create schedule for HHA training and quarterly visits to each agency.										
Task 10. INTERACT PM and Coach collaborate with each HHA to provide initial INTERACT training to direct care staff following certified I-TEAM training.										
Task 11. INTERACT Coach and PM perform quarterly visits to each HHA for data gathering and onsite training when required.										
Task 12. Development of evidence-based medicine (EBM) guidelines for chronic condition management through research and collaboration of INTERACT toolkit and AHRQ Toolbox, as well as other EBM resources available.										
Task 13. Provider direct care staff educated on use of evidence-based guidelines for chronic-condition management.										
Task 14. Develop recording measure for staff to use when referencing EBM guidelines for chronic condition management.										
Task 15. Educate necessary HHA staff regarding use of recording measure.										
Task 16. INTERACT Coach and PM to create uniform reference materials for each HHA.

Task 17. INTERACT Coach and PM to distribute reference materials to each agency.										
Task 18. INTERACT Coach records EBM usage data at each quarterly visit.										
Milestone #3 Develop care pathways and other clinical tools for monitoring chronically ill patients, with the goal of early identification of potential instability and intervention to avoid hospital transfer.										
Task Care pathways and clinical tool(s) created to monitor chronically-ill patients.										
Task PPS has developed and implemented interventions aimed at avoiding eventual hospital transfer and has trained staff on use of interventions in alignment with the PPS strategic plan to monitor critically ill patients and avoid hospital readmission.	0	1	2	5	8	11	11	11	11	11
Task 1. Collaborate with HHAs to analyze INTERACT Care Pathway materials and develop reference materials for each facility										
Task 2. Collaborate with Project 2bvii to develop recording measure for HHA staff to use when referencing INTERACT care pathways and tools.										
Task 3. Collaborate with Project 2bvii to create care pathway sharing system for use while providing direct patient care										
Task 4. INTERACT Coach and PM to distribute home health care specific care pathway and chronic condition monitoring reference materials and sharing system to each SNF										
Task 5. INTERACT Coach and PM to educate provider direct care staff on care pathway and chronic condition monitoring material										
Task 6. INTERACT Coach records care pathway usage data at each quarterly visit.										
Task 7. Agency participation in home health specific I-TEAM training.										
Task 8. Agency identification of nurse champion.										
Task 9. Collaboration with each agency nurse champion and other necessary staff to strategize effective course of action to monitor critically ill patients.

Task 10. Development of implementation plan created for hospital avoidance and chronic condition monitoring.										
Task 11. Educational materials created for direct care staff in-service on hospital avoidance and chronic condition monitoring plan.										
Task 12. Education provided to facility direct care staff regarding hospital avoidance and chronic condition monitoring plan and process.										
Task 13. Quarterly evaluations of agency implementation of hospital avoidance and chronic condition monitoring plan.										
Task 14. Quarterly report written documenting progress and impediments to program.										
Task 15. As needed consultations with PM at each agency regarding areas of weakness in program implementation.										
Milestone #4 Educate all staff on care pathways and INTERACT-like principles.										
Task Training program for all home care staff established, which encompasses care pathways and INTERACT-like principles.	0	2	6	10	15	21	21	21	21	21
Task 1. Agency direct care staff care pathway and INTERACT principle In-Service is created, customized to home health care practice.										
Task 2. INTERACT PM to develop training material regarding INTERACT toolkit and care pathways to be included in each home health agency's orientation materials for new employees.										
Task 3. INTERACT Coach and PM to provide education to direct care staff of each agency regarding Care pathways and use in everyday practice.										
Task 4. INTERACT Coach and PM to provide education to direct care staff of each agency regarding Toolkit and use in everyday practice.										
Milestone #5 Develop Advance Care Planning tools to assist residents and families in expressing and documenting their wishes for near end of life and end of life care.

Task Advance Care Planning tools incorporated into program (as evidenced by policies and procedures).										
Task 1. Collaborate with Project 2bvii in forming Palliative Care Committee to identify gaps in Advance Care Planning Process within the home health setting and formulate policy for Advance Care Planning Procedure for home health care.										
Task 2. Collaborate with Project 2bvii and other palliative care resources within community (e.g., The Conversation Project, Hospice Buffalo) to identify areas of overlap and/or barriers to progress.										
Task 3. Advance care planning toolkit developed by PM using INTERACT tools and other palliative/geriatric care resources as reference (The Conversation Project, The Coalition for Compassionate Care, Closure.org, Caring Connections of the National Hospice Org).										
Task 4. Advance care planning toolkit distributed to HHAs.										
Task 5. Social Work and other applicable direct care staff educated on Advance care planning toolkit by either PM or INTERACT coach.										
Task 6. Develop recording measure for HHA staff to use when referencing Advanced Care Planning Tools.										
Task 7. Educate necessary HHA staff regarding use of Advance Care Planning recording measure.										
Task 8. INTERACT coach and PM to record Advance Care Planning metrics quarterly.										
Task 9. Measure effectiveness of Advance Care Planning tool and adjust as needed based on results.										
Milestone #6 Create coaching program to facilitate and support implementation.										
Task INTERACT-like coaching program has been established for all home care and Rapid Response Team staff.	0	2	6	10	15	21	21	21	21	21
Task 1. Collaborate with Project 2bvii to leverage INTERACT Coach resource for home health consultation initially.

Task 2. Hire INTERACT Coach specific to home health practice.										
Task 3. INTERACT PM creates schedule for agency training and quarterly visits to each facility.										
Task 4. INTERACT Coach and PM collaborate with each agency to provide initial INTERACT training to direct care staff.										
Task 5. INTERACT Coach and PM perform quarterly visits to each agency for data gathering and onsite training when required.										
Milestone #7 Educate patient and family/caretakers, to facilitate participation in planning of care.										
Task Patients and families educated and involved in planning of care using INTERACT-like principles.										
Task 1. Collaborate with community providers regarding current state processes and engagement of family and resident in planning of care specific to the home health care setting. Review resources and education materials available.										
Task 2. Collaborate with "Voice of the Consumer" Sub-Committee to ensure cultural competence within educational materials and program.										
Task 3. Collaborate with Project 2bvii to create informational resources for resident and family regarding advance care planning, chronic condition symptoms and expected course, and hospital avoidance.										
Task 4. Educate Social Work and other applicable direct care staff on resident/family education and informational resource hand off to resident/family.										
Task 5. Collaborate with Project 2bvii to create documentation tool for staff to record when family education using provided tools has been completed.										
Task 6. Educate staff in use of documentation tool for data recording.										
Milestone #8 Integrate primary care, behavioral health, pharmacy, and other services into the model in order to enhance coordination of care and medication management.

Task All relevant services (physical, behavioral, pharmacological) integrated into care and medication management model.										
Task 1. Collaborate with community providers to analyze current integration of multidisciplinary team within the home health setting.										
Task 2. Identify needs and barriers to coordinating primary care, behavioral health, pharmacy, and other specialty services into the home health care model.										
Task 3. Develop implementation plan and methodology for care coordination across multidisciplinary team throughout the home health care setting.										
Task 4. Collaborate with Project 2biii to facilitate primary care physician engagement in the home health setting.										
Task 5. Implement care coordination plan throughout providers in the community.										
Milestone #9 Utilize telehealth/telemedicine to enhance hospital-home care collaborations.										
Task Telehealth/telemedicine program established to provide care transition services, prevent avoidable hospital use, and increase specialty expertise of PCPs and staff.										
Task 1. Collaborate with community providers to identify current utilization and anticipated future projections for telehealth capabilities in home health practice.										
Task 2. Share information from community providers with payers.										
Task 3. Develop a plan for implementation of telehealth/telehealth medicine program across participating providers.										
Task 5. Execute the telehealth implementation plan.										
Milestone #10 Utilize interoperable EHR to enhance communication and avoid medication errors and/or duplicative services.										
Task Clinical Interoperability System in place for all participating providers. Usage documented by the identified care coordinators.

Task 8. Conduct I-TEAM training.										
Task 9. INTERACT PM and Coach create schedule for HHA training and quarterly visits to each agency.										
Task 10. INTERACT PM and Coach collaborate with each HHA to provide initial INTERACT training to direct care staff following certified I-TEAM training.										
Task 11. INTERACT Coach and PM perform quarterly visits to each HHA for data gathering and onsite training when required.										
Task 12. Development of evidence-based medicine (EBM) guidelines for chronic condition management through research and collaboration of INTERACT toolkit and AHRQ Toolbox, as well as other EBM resources available.

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 13. Provider direct care staff educated on use of evidence-based guidelines for chronic-condition management.										
Task 14. Develop recording measure for staff to use when referencing EBM guidelines for chronic condition management.										
Task 15. Educate necessary HHA staff regarding use of recording measure.										
Task 16. INTERACT Coach and PM to create uniform reference materials for each HHA.										
Task 17. INTERACT Coach and PM to distribute reference materials to each agency.										
Task 18. INTERACT Coach records EBM usage data at each quarterly visit.										
Milestone #3 Develop care pathways and other clinical tools for monitoring chronically ill patients, with the goal of early identification of potential instability and intervention to avoid hospital transfer.										
Task Care pathways and clinical tool(s) created to monitor chronically-ill patients.										
Task PPS has developed and implemented interventions aimed at avoiding eventual hospital transfer and has trained staff on use of interventions in alignment with the PPS strategic plan to monitor critically ill patients and avoid hospital readmission.	11	11	11	11	11	11	11	11	11	11
Task 1. Collaborate with HHAs to analyze INTERACT Care Pathway materials and develop reference materials for each facility										
Task 2. Collaborate with Project 2bvii to develop recording measure for HHA staff to use when referencing INTERACT care pathways and tools.										
Task 3. Collaborate with Project 2bvii to create care pathway sharing system for use while providing direct patient care										
Task 4. INTERACT Coach and PM to distribute home health care specific care pathway and chronic condition monitoring reference materials and sharing system to each SNF										
Task 5. INTERACT Coach and PM to educate provider direct care										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
staff on care pathway and chronic condition monitoring material										
Task 6. INTERACT Coach records care pathway usage data at each quarterly visit.										
Task 7. Agency participation in home health specific I-TEAM training.										
Task 8. Agency identification of nurse champion.										
Task 9. Collaboration with each agency nurse champion and other necessary staff to strategize effective course of action to monitor critically ill patients.										
Task 10. Development of implementation plan created for hospital avoidance and chronic condition monitoring.										
Task 11. Educational materials created for direct care staff in-service on hospital avoidance and chronic condition monitoring plan.										
Task 12. Education provided to facility direct care staff regarding hospital avoidance and chronic condition monitoring plan and process.										
Task 13. Quarterly evaluations of agency implementation of hospital avoidance and chronic condition monitoring plan.										
Task 14. Quarterly report written documenting progress and impediments to program.										
Task 15. As needed consultations with PM at each agency regarding areas of weakness in program implementation.										
Milestone #4 Educate all staff on care pathways and INTERACT-like principles.										
Task Training program for all home care staff established, which encompasses care pathways and INTERACT-like principles.	21	21	21	21	21	21	21	21	21	21
Task 1. Agency direct care staff care pathway and INTERACT principle In-Service is created, customized to home health care practice.										
Task 2. INTERACT PM to develop training material regarding INTERACT toolkit and care pathways to be included in each home health agency's orientation materials for new employees.

Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 3. INTERACT Coach and PM to provide education to direct care staff of each agency regarding Care pathways and use in everyday practice.										
Task 4. INTERACT Coach and PM to provide education to direct care staff of each agency regarding Toolkit and use in everyday practice.										
Milestone #5 Develop Advance Care Planning tools to assist residents and families in expressing and documenting their wishes for near end of life and end of life care.										
Task Advance Care Planning tools incorporated into program (as evidenced by policies and procedures).										
Task 1. Collaborate with Project 2bvii in forming Palliative Care Committee to identify gaps in Advance Care Planning Process within the home health setting and formulate policy for Advance Care Planning Procedure for home health care.										
Task 2. Collaborate with Project 2bvii and other palliative care resources within community (e.g., The Conversation Project, Hospice Buffalo) to identify areas of overlap and/or barriers to progress.										
Task 3. Advance care planning toolkit developed by PM using INTERACT tools and other palliative/geriatric care resources as reference (The Conversation Project, The Coalition for Compassionate Care, Closure.org, Caring Connections of the National Hospice Org).										
Task 4. Advance care planning toolkit distributed to HHAs.										
Task 5. Social Work and other applicable direct care staff educated on Advance care planning toolkit by either PM or INTERACT coach.										
Task 6. Develop recording measure for HHA staff to use when referencing Advanced Care Planning Tools.										
Task 7. Educate necessary HHA staff regarding use of Advance Care Planning recording measure.										
Task 8. INTERACT coach and PM to record Advance Care Planning metrics quarterly.

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 9. Measure effectiveness of Advance Care Planning tool and adjust as needed based on results.										
Milestone #6 Create coaching program to facilitate and support implementation.										
Task INTERACT-like coaching program has been established for all home care and Rapid Response Team staff.	21	21	21	21	21	21	21	21	21	21
Task 1. Collaborate with Project 2bvii to leverage INTERACT Coach resource for home health consultation initially.										
Task 2. Hire INTERACT Coach specific to home health practice.										
Task 3. INTERACT PM creates schedule for agency training and quarterly visits to each facility.										
Task 4. INTERACT Coach and PM collaborate with each agency to provide initial INTERACT training to direct care staff.										
Task 5. INTERACT Coach and PM perform quarterly visits to each agency for data gathering and onsite training when required.										
Milestone #7 Educate patient and family/caretakers, to facilitate participation in planning of care.										
Task Patients and families educated and involved in planning of care using INTERACT-like principles.										
Task 1. Collaborate with community providers regarding current state processes and engagement of family and resident in planning of care specific to the home health care setting. Review resources and education materials available.										
Task 2. Collaborate with "Voice of the Consumer" Sub-Committee to ensure cultural competence within educational materials and program.										
Task 3. Collaborate with Project 2bvii to create informational resources for resident and family regarding advance care planning, chronic condition symptoms and expected course, and hospital avoidance.										
Task 4. Educate Social Work and other applicable direct care staff on resident/family education and informational resource hand off to										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
resident/family.										
Task 5. Collaborate with Project 2bvii to create documentation tool for staff to record when family education using provided tools has been completed.										
Task 6. Educate staff in use of documentation tool for data recording.										
Milestone #8 Integrate primary care, behavioral health, pharmacy, and other services into the model in order to enhance coordination of care and medication management.										
Task All relevant services (physical, behavioral, pharmacological) integrated into care and medication management model.										
Task 1. Collaborate with community providers to analyze current integration of multidisciplinary team within the home health setting.										
Task 2. Identify needs and barriers to coordinating primary care, behavioral health, pharmacy, and other specialty services into the home health care model.										
Task 3. Develop implementation plan and methodology for care coordination across multidisciplinary team throughout the home health care setting.										
Task 4. Collaborate with Project 2biii to facilitate primary care physician engagement in the home health setting.										
Task 5. Implement care coordination plan throughout providers in the community.										
Milestone #9 Utilize telehealth/telemedicine to enhance hospital-home care collaborations.										
Task Telehealth/telemedicine program established to provide care transition services, prevent avoidable hospital use, and increase specialty expertise of PCPs and staff.										
Task 1. Collaborate with community providers to identify current utilization and anticipated future projections for telehealth capabilities in home health practice.										
Task 2. Share information from community providers with payers.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 3. Develop a plan for implementation of telehealth/telehealth medicine program across participating providers.										
Task 5. Execute the telehealth implementation plan.										
Milestone #10 Utilize interoperable EHR to enhance communication and avoid medication errors and/or duplicative services.										
Task Clinical Interoperability System in place for all participating providers. Usage documented by the identified care coordinators.										
Task 1. Collaborate with community providers to define business requirements for EHR.										
Task 2. Share requirements with 2ai IDS project.										
Task 3. Collaborate with DSRIP project 2ai to understand capabilities.										
Task 4. Develop a plan for implementation across participating providers.										
Task 5. Execute the implementation plan.										
Milestone #11 Measure outcomes (including quality assessment/root cause analysis of transfer) in order to identify additional interventions.										
Task Membership of quality committee is representative of PPS staff involved in quality improvement processes and other stakeholders.										
Task Quality committee identifies opportunities for quality improvement and use of rapid cycle improvement methodologies, develops implementation plans, and evaluates results of quality improvement initiatives.										
Task PPS evaluates and creates action plans based on key quality metrics, to include applicable metrics in Attachment J.										
Task Service and quality outcome measures are reported to all stakeholders.										
Task 1. Create communication regarding implementation of home health care quality committee for 2bviii project to administer to community providers.

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 2. Formulate 2bviii home health care quality committee from respondents to communication, assuring variety of individuals from differing provider systems are accounted for.										
Task 3. Schedule quarterly home health care quality committee meetings.										
Task 4. Create presentation of quarterly metrics and statistics from aggregated data collected at quarterly HHA contact and site visits.										
Task 5. Present findings to home health care quality committee; discuss problem areas and areas of success that could be applied to other facilities.										
Task 6. Create quarterly improvement plans based on quarterly program outcomes from each HHA. Home health care quality committee will provide quarterly reports to the MCC Clinical/Quality Committee.										
Task 7. Schedule trainings with applicable HHAs/providers who require implementation of improvement plans.										
Task 8. Hold improvement trainings at each applicable HHA/providers with direct care staff.										
Task 9. Administer HHA evaluation one month post improvement training to analyze success of remediation.										
Task 10. Distribute improvement plans to members of home health care quality committee via email or MCC website.										
Task 11. Distribute results of improvement plan implementation within facilities and lessons learned via email or MCC website.										
Milestone #12 Use EHRs and other technical platforms to track all patients engaged in the project.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task 1. Define patient tracking requirements and metrics for enterprise DSRIP solution.										
Task 2. Share requirements with 2ai IDS project.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Assemble Rapid Response Teams (hospital/home care) to facilitate patient discharge to home and assure needed home care services are in place, including, if appropriate, hospice.	NFMMH ED staff education and orientation of Rapid Response Team Coordinator at NFMMH have taken place. Tasks #2–7 have therefore been completed. Data collection template has been created in Excel. Procedure and process documents remain in progress as pilot matures. Rapid Response Team Coordinator has been trained on use of Excel file for data collection. We have also completed tasks 1 and 9 in this milestone, and the remaining tasks are progressing as expected.
Ensure home care staff have knowledge and skills to identify and respond to patient risks for readmission, as well as to support evidence-based medicine and chronic care management.	We have completed tasks #1–8 in this milestone and the remaining tasks are progressing as expected. Home Health I-TEAM INTERACT training was held on September 15, 2015. VNA Direct Care Staff and Telehealth team educated on EBM.
Develop care pathways and other clinical tools for monitoring chronically ill patients, with the goal of early identification of potential instability and intervention to avoid hospital transfer.	All tasks have been initiated on schedule and are progressing as expected.
Educate all staff on care pathways and INTERACT-like principles.	All scheduled tasks have been initiated on schedule and are progressing as expected.
Develop Advance Care Planning tools to assist residents and families in expressing and documenting their wishes for near end of life and end of life care.	All scheduled tasks have been initiated on schedule and are progressing as expected.
Create coaching program to facilitate and support implementation.	Most tasks are progressing as expected. Scheduling initial in-person visits with home care agencies has taken longer than initially anticipated due to home care staff schedules.
Educate patient and family/caretakers, to facilitate participation in planning of care.	The status of this milestone changed due to previous limitations to the MAPP.
Integrate primary care, behavioral health, pharmacy, and other services into the model in order to enhance coordination of care and medication management.	All scheduled tasks have been initiated on schedule and are progressing as expected.
Utilize telehealth/telemedicine to enhance hospital-home care	All scheduled tasks have been initiated on schedule and are progressing as expected.

Instructions :

Millennium Collaborative Care (PPS ID:48)

Project 2.d.i – Implementation of Patient Activation Activities to Engage, Educate and Integrate the uninsured and low/non-utilizing Medicaid populations into Community Based Care

IPQR Module 2.d.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

MCC is unable to locate enough Community Based Organizations (CBOs) with the capacity to provide culturally competent education, outreach, and navigation to meet the speed and scale targets. Through an RFP process, MCC has identified CBOs to perform this work. The CBO Task Force has also been activated to build connections to CBOs.

Patient activation efforts do not account for the cultural and linguistic diversity and health literacy needs of the region. Beneficiary may not be willing to provide baseline information or participate in reassessments. Create a cross-cultural, multilingual training team to provide IT support and training where CBOs and their teams are located. Provide cultural competency and health literacy training to CBOs, utilize "train the trainer" techniques, and include key staff to assure cultural and linguistic diversity is addressed. Work with the Cultural Competency/Health Literacy workstream to design communication materials that are effective for their intended audiences. Equip CBOs and their community health workers (CHWs) with culturally sensitive engagement tools, including understandable health education materials to encourage an individual to participate in the PAM survey. CHWs must create a trusting, working relationship to facilitate and encourage reassessment at prescribed intervals over the course of the project.

There is considerable county overlap with two adjacent PPSs in WNY. It will be important to provide a relatively uniform/transparent experience for patients regardless of where they seek care. MCC will work with area PPSs to coordinate logistics including registry information, standardized referral protocols, uniform tracking and reporting systems, universal alert messaging via the RHIO, and common messaging to educate patients about patient activation.

Medicaid managed care organizations (MMCOs) may be reluctant to disclose/distribute data about non-utilizing beneficiaries. Develop memoranda of understanding with MMCOs addressing privacy, security, and consent concerns related to acquiring non-utilizing (NU) member data.

The lack of up-to-date patient information coupled with the transient nature of the NU population makes it difficult to locate and reconnect this population to PCPs. Engagement efforts with community partners in navigation while assisting to create useful tools that provide community-oriented lists of PCPs with capacity to take new patients. Additionally assistive efforts to cross-reference MMCO data against a variety of databases to obtain current contact information.

NUs remain dissatisfied with their current PCP or MMCO, which accounts for their disengagement. Provide training how beneficiaries can appropriately change their provider.

Complaints and grievances about the project and other service components of the PPS, when not addressed and resolved, lead to consumer dissatisfaction. Create a process to handle complaints quickly and effectively. Convene the "Voice of the Consumer" Sub-Committee as a patient

advocacy team and to ensure representation from a broad range of culturally diverse patients. Lack of common EHR and IT system to manage and track patients and provide assessment and feedback to PCPs and MMCOs. Develop a common EHR and IT system for sharing of data, communication, and feedback that allow evaluation of the success. Organize user groups to discuss issues and share lessons learned. Periodically assess tools to determine consistency and effectiveness; provide follow-up training as needed.

Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 2.d.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Patient Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q3 should include patients previously reported in DY1 Q2 plus new patients engaged in DY1 Q3. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
100% Actively Engaged By	**Expected Patient Engagement**
DY4,Q4	81,000

Patient Update		% of Semi-Annual Commitment To-Date	Semi-Annual Variance of Projected to Actual	% of Total Actively Engaged Patients To-Date
DY1, Q1	DY1,Q2			
0	4,816	80.27%	1,184	5.95%

Warning: Please note that your patients engaged to date does not meet your committed amount (6,000)

IPQR Module 2.d.i.3 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement.
Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Contract or partner with community-based organizations (CBOs) to engage target populations using PAM(R) and other patient activation techniques. The PPS must provide oversight and ensure that engagement is sufficient and appropriate.	Project	N/A	In Progress	05/28/2015	03/31/2017	05/28/2015	03/31/2017	03/31/2017	DY2 Q4
Task Partnerships with CBOs to assist in patient "hot-spotting" and engagement efforts as evidenced by MOUs, contracts, letters of agreement or other partnership documentation.	Project		In Progress	05/28/2015	03/31/2017	05/28/2015	03/31/2017	03/31/2017	DY2 Q4
Task 1. Launch community awareness and communication regarding DSRIP. Identify key areas in the north, south, and central areas to hold community forums to bring awareness to DSRIP. Hold community forums throughout the eight counties to provide community education regarding DSRIP.	Project		Completed	05/28/2015	08/31/2015	05/28/2015	08/31/2015	09/30/2015	DY1 Q2
Task 2. Work with CBO Task Force to provide outreach and education regarding DSRIP.	Project		Completed	05/28/2015	08/31/2015	05/28/2015	08/31/2015	09/30/2015	DY1 Q2
Task 3. Create CBO Implementation Plan.	Project		Completed	07/13/2015	08/31/2015	07/13/2015	08/31/2015	09/30/2015	DY1 Q2
Task 4. Select CBOs to serve as PAM vendor(s) via RFQ/RFP process.	Project		Completed	05/28/2015	08/31/2015	05/28/2015	08/31/2015	09/30/2015	DY1 Q2
Task 5. Develop materials to support PAM vendors including patient-level reporting tool; train vendors on use of materials/tools.	Project		Completed	07/20/2015	08/31/2015	07/20/2015	08/31/2015	09/30/2015	DY1 Q2
Task 6. Host first quarterly meeting with "Voice of the Consumer" Sub-Committee and MCC/PPS team.	Project		Completed	05/28/2015	06/30/2015	05/28/2015	06/30/2015	06/30/2015	DY1 Q1
Task 7. Develop and execute contracts with CBOs.	Project		In Progress	07/15/2015	08/31/2015	07/15/2015	10/30/2015	12/31/2015	DY1 Q3

improvement over time.									
Task 9. Continue to offer training as needed.	Project		Not Started	01/01/2016	03/31/2017	01/01/2016	03/31/2017	03/31/2017	DY2 Q4
Milestone #6 Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome measurements in #10). • This patient activation project should not be used as a mechanism to inappropriately move members to different health plans and PCPs, but rather, shall focus on establishing connectivity to resources already available to the member. • Work with respective MCOs and PCPs to ensure proactive outreach to beneficiaries. Sufficient information must be provided regarding insurance coverage, language resources, and availability of primary and preventive care services. The state must review and approve any educational materials, which must comply with state marketing guidelines and federal regulations as outlined in 42 CFR §438.104.	Project	N/A	In Progress	06/01/2015	03/31/2017	06/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Procedures and protocols established to allow the PPS to work with the member's MCO and assigned PCP to help reconnect that beneficiary to his/her designated PCP.	Project		In Progress	06/01/2015	03/31/2017	06/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 1. Work with Independent Health IT security, reporting, and MCO to develop a secure file transfer process and data formats.	Project		In Progress	07/01/2015	12/31/2015	07/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task 2. Develop and execute a signed BAA addendum with Independent Health MCO.	Project		In Progress	07/01/2015	10/30/2015	07/01/2015	10/30/2015	12/31/2015	DY1 Q3

Task 3. Create CBO Implementation Plan.										
Task 4. Select CBOs to serve as PAM vendor(s) via RFQ/RFP process.										
Task 5. Develop materials to support PAM vendors including patient-level reporting tool; train vendors on use of materials/tools.										
Task 6. Host first quarterly meeting with "Voice of the Consumer" Sub-Committee and MCC/PPS team.										
Task 7. Develop and execute contracts with CBOs.										
Task 8. Develop reporting requirements and metrics for each CBO. Continue to monitor metrics throughout project.										
Task 9. Identify a PAM Administrator within each CBO.										
Task 10. For target population Non-Utilizers: Work with DOH to obtain a listing of PAM-eligible non-utilizers; distribute report to CBOs.										
Task 11. Initiate PDSA cycles to evaluate improvement activities, determine effectiveness of approach, and allow for continuous improvement over time.										
Milestone #2 Establish a PPS-wide training team, comprised of members with training in PAM(R) and expertise in patient activation and engagement.										
Task Patient Activation Measure(R) (PAM(R)) training team established.										
Task 1. Establish PPS-wide training team (ensure participation from candidates who represent all of MCC's geographic areas); identify training team goals.										
Task 2. Contact Insignia about conducting PAM training. Resolve the number of Flourish (PAM) licenses across the state.										
Task 3. Develop plan for training (e.g., train the trainer). Plan to offer training in a variety of formats (onsite, web-based, teleconference).										
Task 4. Work with selected CBOs/vendors to identify training participants.

Task 5. Insignia contract signed.										
Task 6. Develop training materials for community health workers who will be administering PAM.										
Task 7. Identify training locations covering the 8 counties of WNY; schedule training sessions.										
Task 8. Hold first PAM training session for community health workers.										
Task 9. Initiate PDSA cycles to evaluate improvement activities, determine effectiveness of training, and allow for continuous improvement over time.										
Task 10. Continue to offer training as needed.										
Milestone #3 Identify UI, NU, and LU "hot spot" areas (e.g., emergency rooms). Contract or partner with CBOs to perform outreach within the identified "hot spot" areas.										
Task Analysis to identify "hot spot" areas completed and CBOs performing outreach engaged.										
Task 1. Develop hot spot maps; provide maps with zip codes to CBOs that requested the information.										
Task 2. For target population Uninsured: Develop plan to outreach to and communicate with the uninsured population.										
Task 3. Promote / focus outreach efforts on target areas including local festivals, fairs, church groups, and the part-time workforce.										
Task 4. Continue conducting outreach.										
Task 5. Develop market share model to understand location and distribution of UI and NU populations.										
Task 6. Develop CBO workforce model to ensure adequate coverage is available to engage the target populations. Engage additional CBOs as necessary (See also Milestone#1).										
Task 7. Collaborate with ED Care Triage project team to include PAM® as appropriate in "hot spot" EDs.										
Task 8. Renew market share model annually and assess progress vs.

milestone goals and adjust plan accordingly.										
Milestone #4 Survey the targeted population about healthcare needs in the PPS' region.										
Task Community engagement forums and other information-gathering mechanisms established and performed.										
Task 1. Review community needs assessment, and collaborate with CBOs, P2 Collaborative, and county community action plans to update the targeted population's healthcare needs in MCC network.										
Milestone #5 Train providers located within "hot spots" on patient activation techniques, such as shared decision-making, measurements of health literacy, and cultural competency.										
Task PPS Providers (located in "hot spot" areas) trained in patient activation techniques by "PAM(R) trainers".										
Task 1. Develop plan for training (e.g., train the trainer). Plan to offer training in a variety of formats (onsite, web-based, teleconference).										
Task 2. Develop a list of targeted providers with the "hot spots" areas.										
Task 3. Develop communication to providers.										
Task 4. Ensure BAA is in place with all providers.										
Task 5. Develop training material for PPS providers. Obtain state review/approve of any educational materials as required; ensure materials comply with state marketing guidelines and federal regulations as applicable.										
Task 6. Identify training locations covering the 8 counties of WNY; schedule training sessions.										
Task 7. Hold first provider training session.										
Task 8. Initiate PDSA cycles to evaluate improvement activities, determine effectiveness of training, and allow for continuous improvement over time.										
Task 9. Continue to offer training as needed.

Milestone #6 Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome measurements in #10). • This patient activation project should not be used as a mechanism to inappropriately move members to different health plans and PCPs, but rather, shall focus on establishing connectivity to resources already available to the member. • Work with respective MCOs and PCPs to ensure proactive outreach to beneficiaries. Sufficient information must be provided regarding insurance coverage, language resources, and availability of primary and preventive care services. The state must review and approve any educational materials, which must comply with state marketing guidelines and federal regulations as outlined in 42 CFR §438.104.										
Task Procedures and protocols established to allow the PPS to work with the member's MCO and assigned PCP to help reconnect that beneficiary to his/her designated PCP.										
Task 1. Work with Independent Health IT security, reporting, and MCO to develop a secure file transfer process and data formats.										
Task 2. Develop and execute a signed BAA addendum with Independent Health MCO.										
Task 3. Receive data from Independent Health.										
Task 4. Match internal PPS attribution reporting (from DOH) against Independent Health data.										
Task 5. Finalize Independent Health report with PAM candidates identified.										
Task 6. Deliver Independent Health Non-Utilizers report to CBOs/vendors.										
Task 7. Receive ongoing Independent Health data feed to support measurement process (refreshed on a quarterly basis).										
Task 8. Work with HealthNow IT security, reporting, and MCO to develop a secure file transfer process and data formats.										
Task 9. Develop and execute a signed BAA addendum with

Task 27. Deliver YourCare Non-Utilizers report to CBOs/vendors.										
Task 28. Receive ongoing YourCare data feed to support measurement process (refreshed on a quarterly basis).										
Milestone #7 Baseline each beneficiary cohort (per method developed by state) to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for each cohort at the beginning of each performance period.										
Task For each PAM(R) activation level, baseline and set intervals toward improvement determined at the beginning of each performance period (defined by the state).										
Task 1. Complete PAM target goal; determine baseline PAM scores.										
Task 2. Update baseline annually; re-PAM same beneficiaries.										
Task 3. Continue to monitor scores.										
Milestone #8 Include beneficiaries in development team to promote preventive care.										
Task Beneficiaries are utilized as a resource in program development and awareness efforts of preventive care services.										
Task 1. Populate CBO Task Force (as described in Governance requirement #5) by conducting outreach at community forums across PPS region and receiving nominations for CBO representatives. Ensure representation from all eight counties of WNY.										
Task 2. Populate "Voice of the Consumer" Sub-Committee (as described in Governance requirement #5) by conducting outreach at community forums and receiving nominations for Medicaid beneficiaries. Create protocols for engaging PAM beneficiaries in "Voice of the Consumer" Sub-Committee.										
Task 3. "Voice of the Consumer" Sub-Committee will review materials to be presented to beneficiaries to ensure appropriateness of message, evaluate effectiveness, and account for variations in health literacy.										
Task 4. Attend first quarterly CBO Task Force/"Voice of the Consumer"

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Sub-Committee meeting. Meetings will continue quarterly.										
Milestone #9 Measure PAM(R) components, including: • Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot spot" area for health service. • If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using PAM(R) survey and designate a PAM(R) score. • Individual member's score must be averaged to calculate a baseline measure for that year's cohort. • The cohort must be followed for the entirety of the DSRIP program. • On an annual basis, assess individual members' and each cohort's level of engagement, with the goal of moving beneficiaries to a higher level of activation. • If the beneficiary is deemed to be LU & NU but has a designated PCP who is not part of the PPS' network, counsel the beneficiary on better utilizing his/her existing healthcare benefits, while also encouraging the beneficiary to reconnect with his/her designated PCP. • The PPS will NOT be responsible for assessing the patient via PAM(R) survey. • PPS will be responsible for providing the most current contact information to the beneficiary's MCO for outreach purposes. • Provide member engagement lists to relevant insurance companies (for NU & LU populations) on a monthly basis, as well as to DOH on a quarterly basis.										
Task Performance measurement reports established, including but not limited to: - Number of patients screened, by engagement level - Number of clinicians trained in PAM(R) survey implementation - Number of patient: PCP bridges established - Number of patients identified, linked by MCOs to which they are associated - Member engagement lists to relevant insurance companies (for NU & LU populations) on a monthly basis - Member engagement lists to DOH (for NU & LU populations) on a monthly basis - Annual report assessing individual member and the overall cohort's level of engagement										
Task 1. Establish protocol for data collection and reporting of

screenings and bridges.										
Task 2. Ensure details are included in training program for CBOs.										
Task 3. Establish procedures for obtaining data for quarterly reporting including PAM data by activation level and scoring, clinicians trained, and CBO/CHW evidence of patient bridges established.										
Task 4. Establish procedures for obtaining quarterly refresh of MCO data feeds with visit information (include in report per requirement 10).										
Task 5. Finalize reporting processes and procedures; produce quarterly report.										
Task 6. Continue to refine quarterly reporting process and produce quarterly reports.										
Milestone #10 Increase the volume of non-emergent (primary, behavioral, dental) care provided to UI, NU, and LU persons.										
Task Volume of non-emergent visits for UI, NU, and LU populations increased.										
Task 1. Obtain quarterly visit info from MCOs based on original target population membership (or from DOH as available); calculate volume of non-emergent visits and report quarterly.										
Task 2. Leverage efforts (Cultural Competency, milestone #1) to improve overall health literacy of targeted populations (e.g., when to use the ED, importance of primary care, overcoming mental health stigma, navigating the health system, and questions to ask your provider).										
Task 3. Develop materials with input from patients. Distribute materials at locations appropriate to the target population (Cultural Competency, milestone #1).										
Task 4. Use public awareness, education, and other programs to address and increase the volume of non-emergent visits in the targeted population groups.										
Milestone #11 Contract or partner with CBOs to develop a group of community navigators who are trained in connectivity to healthcare coverage, community healthcare resources (including for primary

and preventive services) and patient education.										
Task Community navigators identified and contracted.	0	6	10	15	20	21	21	21	21	21
Task Community navigators trained in connectivity to healthcare coverage and community healthcare resources, (including primary and preventive services), as well as patient education.	0	6	10	15	20	21	21	21	21	21
Task 1. Per the steps defined for requirement #1, ensure CBO contracts are completed and CBOs are engaged.										
Task 2. Continuously monitor CBO performance. Make adjustments to partnerships and/or contracts as needed.										
Task 3. Per tasks in milestones 2, 13, and 15, training for navigators is planned, organized, monitored, and controlled.										
Milestone #12 Develop a process for Medicaid recipients and project participants to report complaints and receive customer service.										
Task Policies and procedures for customer service complaints and appeals developed.										
Task 1. PPS will research leading practice models to inform development of protocols.										
Task 2. PPS will develop protocols for complaints and customer service to support PPS-wide complaint communication and individual complaint follow-up.										
Task 3. Review protocols with "Voice of the Consumer" Sub-Committee.										
Task 4. Determine process owner and MCC lead.										
Task 5. Determine platform for complaint tracking.										
Task 6. Obtain MCC Board of Managers and PMO approvals.										
Task 7. Implement complaint tracking and follow-up processes.										
Task 8. Initiate PDSA cycles to assess customer satisfaction and allow for continuous improvement over time.										
Milestone #13 Train community navigators in patient activation and education,

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Management of CVD) and care transition coordinators (identified in Population Health Management).										
Task 5. Use the referral process (defined under project 3.b.i.) for warm referrals to CBOs and partners, pharmacies, dietitians, and community health workers.										
Milestone #15 Inform and educate navigators about insurance options and healthcare resources available to UI, NU, and LU populations.										
Task Navigators educated about insurance options and healthcare resources available to populations in this project.										
Task 1. Provide training to community health workers about insurance options and healthcare resources.										
Task 2. Develop reporting requirements for CHW placement.										
Task 3. Monitor placement and make adjustments as appropriate.										
Task 4. Continue to offer training for community health workers to maintain up-to-date knowledge of changing options and resources.										
Milestone #16 Ensure appropriate and timely access for navigators when attempting to establish primary and preventive services for a community member.										
Task Timely access for navigator when connecting members to services.										
Task 1. Develop policies and procedures for intake and/or scheduling staff to receive navigator calls.										
Task 2. Work with clinical integration team to improve physicians' understanding of this effort and willingness to provide access.										
Task 3. Initiate PDSA cycles to assess the accessibility of primary and preventive services. Continue to refine policies and procedures as needed.										
Milestone #17 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, to track all patients engaged in the project.										
Task PPS identifies targeted patients through patient registries and is										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
able to track actively engaged patients for project milestone reporting.										
Task 1. Obtain registry lists from MCOs (per requirement #2).										
Task 2. CHWs utilize the automated PAM system to record patent encounters.										
Task 3. CBOs download patient engagement information from PAM on a monthly basis and forward to project champion for quarterly reporting.										

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #1 Contract or partner with community-based organizations (CBOs) to engage target populations using PAM(R) and other patient activation techniques. The PPS must provide oversight and ensure that engagement is sufficient and appropriate.										
Task Partnerships with CBOs to assist in patient "hot-spotting" and engagement efforts as evidenced by MOUs, contracts, letters of agreement or other partnership documentation.										
Task 1. Launch community awareness and communication regarding DSRIP. Identify key areas in the north, south, and central areas to hold community forums to bring awareness to DSRIP. Hold community forums throughout the eight counties to provide community education regarding DSRIP.										
Task 2. Work with CBO Task Force to provide outreach and education regarding DSRIP.										
Task 3. Create CBO Implementation Plan.										
Task 4. Select CBOs to serve as PAM vendor(s) via RFQ/RFP process.										
Task 5. Develop materials to support PAM vendors including patient-level reporting tool; train vendors on use of materials/tools.										
Task 6. Host first quarterly meeting with "Voice of the Consumer" Sub-Committee and MCC/PPS team.										
Task 7. Develop and execute contracts with CBOs.

Task 8. Develop reporting requirements and metrics for each CBO. Continue to monitor metrics throughout project.										
Task 9. Identify a PAM Administrator within each CBO.										
Task 10. For target population Non-Utilizers: Work with DOH to obtain a listing of PAM-eligible non-utilizers; distribute report to CBOs.										
Task 11. Initiate PDSA cycles to evaluate improvement activities, determine effectiveness of approach, and allow for continuous improvement over time.										
Milestone #2 Establish a PPS-wide training team, comprised of members with training in PAM(R) and expertise in patient activation and engagement.										
Task Patient Activation Measure(R) (PAM(R)) training team established.										
Task 1. Establish PPS-wide training team (ensure participation from candidates who represent all of MCC's geographic areas); identify training team goals.										
Task 2. Contact Insignia about conducting PAM training. Resolve the number of Flourish (PAM) licenses across the state.										
Task 3. Develop plan for training (e.g., train the trainer). Plan to offer training in a variety of formats (onsite, web-based, teleconference).										
Task 4. Work with selected CBOs/vendors to identify training participants.										
Task 5. Insignia contract signed.										
Task 6. Develop training materials for community health workers who will be administering PAM.										
Task 7. Identify training locations covering the 8 counties of WNY; schedule training sessions.										
Task 8. Hold first PAM training session for community health workers.										
Task 9. Initiate PDSA cycles to evaluate improvement activities, determine effectiveness of training, and allow for continuous

improvement over time.										
Task 10. Continue to offer training as needed.										
Milestone #3 Identify UI, NU, and LU "hot spot" areas (e.g., emergency rooms). Contract or partner with CBOs to perform outreach within the identified "hot spot" areas.										
Task Analysis to identify "hot spot" areas completed and CBOs performing outreach engaged.										
Task 1. Develop hot spot maps; provide maps with zip codes to CBOs that requested the information.										
Task 2. For target population Uninsured: Develop plan to outreach to and communicate with the uninsured population.										
Task 3. Promote / focus outreach efforts on target areas including local festivals, fairs, church groups, and the part-time workforce.										
Task 4. Continue conducting outreach.										
Task 5. Develop market share model to understand location and distribution of UI and NU populations.										
Task 6. Develop CBO workforce model to ensure adequate coverage is available to engage the target populations. Engage additional CBOs as necessary (See also Milestone#1).										
Task 7. Collaborate with ED Care Triage project team to include PAM® as appropriate in "hot spot" EDs.										
Task 8. Renew market share model annually and assess progress vs. milestone goals and adjust plan accordingly.										
Milestone #4 Survey the targeted population about healthcare needs in the PPS' region.										
Task Community engagement forums and other information-gathering mechanisms established and performed.										
Task 1. Review community needs assessment, and collaborate with CBOs, P2 Collaborative, and county community action plans to update the targeted population's healthcare needs in MCC network.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #5 Train providers located within "hot spots" on patient activation techniques, such as shared decision-making, measurements of health literacy, and cultural competency.										
Task PPS Providers (located in "hot spot" areas) trained in patient activation techniques by "PAM(R) trainers".										
Task 1. Develop plan for training (e.g., train the trainer). Plan to offer training in a variety of formats (onsite, web-based, teleconference).										
Task 2. Develop a list of targeted providers with the "hot spots" areas.										
Task 3. Develop communication to providers.										
Task 4. Ensure BAA is in place with all providers.										
Task 5. Develop training material for PPS providers. Obtain state review/approve of any educational materials as required; ensure materials comply with state marketing guidelines and federal regulations as applicable.										
Task 6. Identify training locations covering the 8 counties of WNY; schedule training sessions.										
Task 7. Hold first provider training session.										
Task 8. Initiate PDSA cycles to evaluate improvement activities, determine effectiveness of training, and allow for continuous improvement over time.										
Task 9. Continue to offer training as needed.										
Milestone #6 Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome measurements in #10). • This patient activation project should not be used as a mechanism to inappropriately move members to different health plans and PCPs, but rather, shall focus on establishing connectivity to resources already available to the member. • Work with respective MCOs and PCPs to ensure proactive outreach to beneficiaries. Sufficient information must be provided regarding insurance coverage, language resources, and

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
availability of primary and preventive care services. The state must review and approve any educational materials, which must comply with state marketing guidelines and federal regulations as outlined in 42 CFR §438.104.										
Task Procedures and protocols established to allow the PPS to work with the member's MCO and assigned PCP to help reconnect that beneficiary to his/her designated PCP.										
Task 1. Work with Independent Health IT security, reporting, and MCO to develop a secure file transfer process and data formats.										
Task 2. Develop and execute a signed BAA addendum with Independent Health MCO.										
Task 3. Receive data from Independent Health.										
Task 4. Match internal PPS attribution reporting (from DOH) against Independent Health data.										
Task 5. Finalize Independent Health report with PAM candidates identified.										
Task 6. Deliver Independent Health Non-Utilizers report to CBOs/vendors.										
Task 7. Receive ongoing Independent Health data feed to support measurement process (refreshed on a quarterly basis).										
Task 8. Work with HealthNow IT security, reporting, and MCO to develop a secure file transfer process and data formats.										
Task 9. Develop and execute a signed BAA addendum with HealthNow MCO.										
Task 10. Receive data from HealthNow.										
Task 11. Match internal PPS attribution reporting (from DOH) against HealthNow data.										
Task 12. Finalize HealthNow report with PAM candidates identified.										
Task 13. Deliver HealthNow Non-Utilizers report to CBOs/vendors.										
Task 14. Receive ongoing HealthNow data feed to support measurement process (refreshed on a quarterly basis).

Task 15. Work with Fidelis IT security, reporting, and MCO to develop a secure file transfer process and data formats.										
Task 16. Develop and execute a signed BAA addendum with Fidelis MCO.										
Task 17. Receive data from Fidelis.										
Task 18. Match internal PPS attribution reporting (from DOH) against Fidelis data.										
Task 19. Finalize Fidelis report with PAM candidates identified.										
Task 20. Deliver Fidelis Non-Utilizers report to CBOs/vendors.										
Task 21. Receive ongoing Fidelis data feed to support measurement process (refreshed on a quarterly basis).										
Task 22. Work with YourCare IT security, reporting, and MCO to develop a secure file transfer process and data formats.										
Task 23. Develop and execute a signed BAA addendum with YourCare MCO.										
Task 24. Receive data from YourCare.										
Task 25. Match internal PPS attribution reporting (from DOH) against YourCare data.										
Task 26. Finalize YourCare report with PAM candidates identified.										
Task 27. Deliver YourCare Non-Utilizers report to CBOs/vendors.										
Task 28. Receive ongoing YourCare data feed to support measurement process (refreshed on a quarterly basis).										
Milestone #7 Baseline each beneficiary cohort (per method developed by state) to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for each cohort at the beginning of each performance period.										
Task For each PAM(R) activation level, baseline and set intervals toward improvement determined at the beginning of each performance period (defined by the state).

Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 1. Complete PAM target goal; determine baseline PAM scores.										
Task 2. Update baseline annually; re-PAM same beneficiaries.										
Task 3. Continue to monitor scores.										
Milestone #8 Include beneficiaries in development team to promote preventive care.										
Task Beneficiaries are utilized as a resource in program development and awareness efforts of preventive care services.										
Task 1. Populate CBO Task Force (as described in Governance requirement #5) by conducting outreach at community forums across PPS region and receiving nominations for CBO representatives. Ensure representation from all eight counties of WNY.										
Task 2. Populate "Voice of the Consumer" Sub-Committee (as described in Governance requirement #5) by conducting outreach at community forums and receiving nominations for Medicaid beneficiaries. Create protocols for engaging PAM beneficiaries in "Voice of the Consumer" Sub-Committee.										
Task 3. "Voice of the Consumer" Sub-Committee will review materials to be presented to beneficiaries to ensure appropriateness of message, evaluate effectiveness, and account for variations in health literacy.										
Task 4. Attend first quarterly CBO Task Force/"Voice of the Consumer" Sub-Committee meeting. Meetings will continue quarterly.										
Milestone #9 Measure PAM(R) components, including: • Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot spot" area for health service. • If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using PAM(R) survey and designate a PAM(R) score. • Individual member's score must be averaged to calculate a baseline measure for that year's cohort. • The cohort must be followed for the entirety of the DSRIP program. • On an annual basis, assess individual members' and each

Task 2. Develop reporting requirements for CHW placement.										
Task 3. Monitor placement and make adjustments as appropriate.										
Task 4. Continue to offer training for community health workers to maintain up-to-date knowledge of changing options and resources.										
Milestone #16 Ensure appropriate and timely access for navigators when attempting to establish primary and preventive services for a community member.										
Task Timely access for navigator when connecting members to services.										
Task 1. Develop policies and procedures for intake and/or scheduling staff to receive navigator calls.										
Task 2. Work with clinical integration team to improve physicians' understanding of this effort and willingness to provide access.										
Task 3. Initiate PDSA cycles to assess the accessibility of primary and preventive services. Continue to refine policies and procedures as needed.										
Milestone #17 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, to track all patients engaged in the project.										
Task PPS identifies targeted patients through patient registries and is able to track actively engaged patients for project milestone reporting.										
Task 1. Obtain registry lists from MCOs (per requirement #2).										
Task 2. CHWs utilize the automated PAM system to record patent encounters.										
Task 3. CBOs download patient engagement information from PAM on a monthly basis and forward to project champion for quarterly reporting.

Survey the targeted population about healthcare needs in the PPS' region.	jbono	Meeting Materials	48_PMDL3603_1_2_20151030104206_2di_04_01 Community Forums DY1Q2.xlsx	List/inventory of community forums held detailing locations, agenda, and presenters	10/30/2015 10:42 AM

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Contract or partner with community-based organizations (CBOs) to engage target populations using PAM(R) and other patient activation techniques. The PPS must provide oversight and ensure that engagement is sufficient and appropriate.	Tasks 1-6, 8, and 9 were completed on schedule; task 7 was late as of quarter end, but is on track as of 10/30.
Establish a PPS-wide training team, comprised of members with training in PAM(R) and expertise in patient activation and engagement.	Tasks 1-8 were completed on schedule; in-progress tasks are on track.
Identify UI, NU, and LU "hot spot" areas (e.g., emergency rooms). Contract or partner with CBOs to perform outreach within the identified "hot spot" areas.	Tasks 1 and 5 were completed on schedule; in-progress tasks are on track.
Survey the targeted population about healthcare needs in the PPS' region.	
Train providers located within "hot spots" on patient activation techniques, such as shared decision-making, measurements of health literacy, and cultural competency.	Task 2 was completed on schedule; some in-progress tasks are moving slowly but not yet late.
Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome measurements in #10). • This patient activation project should not be used as a mechanism to inappropriately move members to different health plans and PCPs, but rather, shall focus on establishing connectivity to resources already available to the member. • Work with respective MCOs and PCPs to ensure proactive outreach to beneficiaries. Sufficient information must be provided regarding insurance coverage, language resources, and availability of primary and preventive care services. The state must review and approve any educational materials, which must comply with state marketing guidelines and federal regulations as outlined in 42 CFR §438.104.	Tasks 1-3 were completed on schedule; in-progress tasks are on track, but lack of BAAs may ultimately cause delays.
Baseline each beneficiary cohort (per method developed by state)	In-progress tasks are on track.

Millennium Collaborative Care (PPS ID:48)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for each cohort at the beginning of each performance period.	
Include beneficiaries in development team to promote preventive care.	Tasks 1 and 2 were completed on schedule; in-progress tasks are on track.
Measure PAM(R) components, including: • Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot spot" area for health service. • If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using PAM(R) survey and designate a PAM(R) score. • Individual member's score must be averaged to calculate a baseline measure for that year's cohort. • The cohort must be followed for the entirety of the DSRIP program. • On an annual basis, assess individual members' and each cohort's level of engagement, with the goal of moving beneficiaries to a higher level of activation. • If the beneficiary is deemed to be LU & NU but has a designated PCP who is not part of the PPS' network, counsel the beneficiary on better utilizing his/her existing healthcare benefits, while also encouraging the beneficiary to reconnect with his/her designated PCP. • The PPS will NOT be responsible for assessing the patient via PAM(R) survey. • PPS will be responsible for providing the most current contact information to the beneficiary's MCO for outreach purposes. • Provide member engagement lists to relevant insurance companies (for NU & LU populations) on a monthly basis, as well as to DOH on a quarterly basis.	Tasks 1 and 2 were completed on schedule; in-progress tasks are on track.
Increase the volume of non-emergent (primary, behavioral, dental) care provided to UI, NU, and LU persons.	
Contract or partner with CBOs to develop a group of community navigators who are trained in connectivity to healthcare coverage, community healthcare resources (including for primary and preventive services) and patient education.	Task #1 was completed on schedule; in-progress tasks are on track.

Milestone Name	Narrative Text
Develop a process for Medicaid recipients and project participants to report complaints and receive customer service.	Tasks 1-3 were completed on schedule. Task 4 is moving slowly and is late; remaining in-progress tasks are on track.
Train community navigators in patient activation and education, including how to appropriately assist project beneficiaries using the PAM(R).	Tasks 1, 3-5 were completed on schedule; in-progress tasks are on track.
Ensure direct hand-offs to navigators who are prominently placed at "hot spots," partnered CBOs, emergency departments, or community events, so as to facilitate education regarding health insurance coverage, age-appropriate primary and preventive healthcare services and resources.	Task #2 was completed on schedule; in-progress tasks are on track.
Inform and educate navigators about insurance options and healthcare resources available to UI, NU, and LU populations.	Task #2 was completed on schedule; in-progress tasks are on track.
Ensure appropriate and timely access for navigators when attempting to establish primary and preventive services for a community member.	In-progress tasks are on track.
Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, to track all patients engaged in the project.	In-progress tasks are on track.

Project 3.a.i – Integration of primary care and behavioral health services

IPQR Module 3.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Many programs have shown that integration of behavioral health (BH) and primary care (PC) services improves quality of care and decreases total cost of care. However, there are many risks associated with the implementation of these programs. MCC has identified these risks and some mitigation strategies below.

Financial challenges exist to achieve the goals to embed BH specialists into safety net PC practices and PC into BH sites. Millennium will help ease this financial burden by facilitating the use of shared therapists and psychiatric providers among multiple PC sites. Instruction on how to properly bill for services, while ensuring adequate funding is in place to support outcomes. Exploring satellite MH/CD clinics embedded into PC practices so both Medicaid and commercial insurance can be billed, or enhanced rapid access referral process from PMC to BH clinics will also be implemented. Through a value-based payment (VBP) transition plan, MCC will prioritize the planning/execution of agreements to ensure that integration of PC and BH services does not simply become co-location.

PC practices are unfamiliar with BH services and support and vice-versa. In addition, staff turnover and shortage are common concerns. MCC will provide technical assistance and financial support utilizing a staffing plan to incorporate shared coverage across sites and telemedicine to stretch available resources. Failure to build bridges with area colleges could result in longer-term gaps in availability of BH professionals. MCC's workforce development plan will incorporate short and long-term strategies to fill gaps.

Limited access to psychiatric services exist in our region and hinders the ability of providers to acquire consultations/medication recommendations for patients in need of services. BH organizations, private practice psychiatry, and PC practices will meet to discuss tele-medicine services to fulfill this need. If telemedicine is not feasible, agreements for phone consultations, rapid access referrals, and exchange of information through EMR and the RHIO will be established.

Regulatory barriers may restrict or prohibit provision of PC services within BH settings and vice versa. MCC will review basic requirements to be achieved and identify regulations that need to be changed so services can be offered in a shared setting and remain reimbursable.

BH clients not connected to PC may be reluctant, therefore MCC will offer trainings in Motivational Interviewing, Patient Activation Measures, and person-centered approach to ensure client engagement.

Exchange of information across physical and mental health disciplines is lacking. MCC will work with partners to incorporate a multidisciplinary approach to case conferences sessions; warm hand-offs, and other strategies. This coordinated approach is necessary to address the high-risk BH population, and will help provide a uniform experience for patients regardless of where they receive care. Close coordination with bordering PPSs will include standardized referral protocols, uniform tracking/reporting systems, universal alert messaging via the RHIO, common messaging, and sharing of lessons learned.

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Protocols for integrated service delivery/reporting may differ from one PPS to another. MCC will work with bordering PPS's to institute policies for identifying PCPs participating in more than one PPS, and to standardize protocols for consistent reporting. True service integration is dependent upon integration of client records so providers take a holistic approach to client care. MCC's IT program will develop interim plans to achieve this standard.

Laboratory collection services may not be available onsite at PC offices requiring clients to be referred for testing. MCC will explore opportunities for incorporating lab testing and educational materials at participating sites.

Millennium Collaborative Care (PPS ID:48)

IPQR Module 3.a.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Patient Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q3 should include patients previously reported in DY1 Q2 plus new patients engaged in DY1 Q3. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task 9. Organize and convene the first of several monthly workgroup meetings of Behavioral Health and Primary Care Programs of WNY counties (meeting and phone-in option), led by teams of physician, BH leader, MCC, and CPWNY representatives.										
Task 10. Continue to meet with key stakeholders at regular intervals (bi-monthly) for those identified as ready to implement integrated model based on survey and meeting information.										
Task 11. Perform hot spotting analysis of current practices delivered in the eight WNY counties and gaps in services for the region and evaluate the gaps.										
Task 12. Coordinate messaging and communication strategy with MCC Communications Director and CPWNY to engage PC sites unsure of participation.										
Task 13. Evaluate budget of project to support gaps in service.										
Task 14. Ongoing communication and collaboration with MCC management and 2ai project director, who are working to establish PCMH/MU project implementation plan based on PC practice readiness, certification status, and related activities as referenced in 2.a.i. Requirement #7.										
Task 15. In collaboration with MCC Management and 2ai project director, analyze current status of EMR systems as outlined in 2.a.i. Requirement #7.										
Milestone #2 Develop collaborative evidence-based standards of care including medication management and care engagement process.										
Task Regularly scheduled formal meetings are held to develop collaborative care practices.										
Task Coordinated evidence-based care protocols are in place, including medication management and care engagement processes.										
Task 1. Investigate various collaborative care models, review SAMHSA best practices, and arrange phone meetings with experts at University of Washington AIMS Center.										
Task 2. Work with MCC Clinical Director, Chief Medical Officer (CMO)										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
and Clinical Quality Committee with sign-off by the Physician Steering Committee (PSC) to devise protocols utilizing chosen evidence-based standards in regards to care management protocols such as warm hand-offs.										
Task 3. Coordinate care management protocols with CPWNY, where applicable to ensure that services across the eight WNY counties are provided under one set of evidence-based standards.										
Task 4. Begin to convene monthly provider stakeholder meetings with BH and PC partners; share ideas and provide feedback back to CMO.										
Task 5. Draft final plan with MCC Clinical Director, CMO, and CPWNY partners where applicable and share with key stakeholders for feedback.										
Task 6. Finalize implementation plan with partners.										
Task 7. Project manager will meet with each integrated site staff and leadership at least quarterly to mutually assess and problem-solve (where necessary) the established evidence-based protocols that support integrated treatment and practice.										
Milestone #3 Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.										
Task Policies and procedures are in place to facilitate and document completion of screenings.										
Task Screenings are documented in Electronic Health Record.										
Task At least 90% of patients receive screenings at the established project sites (Screenings are defined as industry standard questionnaires such as PHQ-2 or 9 for those screening positive, SBIRT).										
Task Positive screenings result in "warm transfer" to behavioral health provider as measured by documentation in Electronic Health Record.	0	2	5	10	15	27	52	92	510	602
Task 1. PC and BH practices jointly surveyed by MCC and CPWNY, where applicable to assess which preventive screenings are currently being implemented routinely for patients in both PC and BH practices.

Task At least 90% of patients receive screenings at the established project sites (Screenings are defined as industry standard questionnaires such as PHQ-2 or 9 for those screening positive, SBIRT).										
Task Positive screenings result in "warm transfer" to behavioral health provider as measured by documentation in Electronic Health Record.	602	602	602	602	602	602	602	602	602	602
Task 1. PC and BH practices jointly surveyed by MCC and CPWNY, where applicable to assess which preventive screenings are currently being implemented routinely for patients in both PC and BH practices.										
Task 2. MCC 2ai team to identify best practice physical health preventive care screenings to be adopted by BH providers across and PC practices.										
Task 3. Develop a training plan for PC and BH practices to support adoption of best practice screenings where there are current gaps in identified PCPs and BH providers. Training plan includes educating practices on the billing codes for PHQ-9 and SBIRT screens (many practices are unaware of ability to bill for these screens, and absence of billing is a barrier).										
Task 4. MCC clinical integration teams provides training to PCPs and BH providers PPSs.

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 5. Ensure PHQ-9, SBIRT, or other behavioral health screenings are documented in participating provider EMRs.										
Task 6. Clinical integration training teams (with CPWNY counterparts for joint PPS membership) incorporate reviews of screening protocols and implementation with quarterly technical assistance meetings with providers.										
Milestone #8 Use EHRs or other technical platforms to track all patients engaged in this project.										
Task EHR demonstrates integration of medical and behavioral health record within individual patient records.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task 1. Ongoing communication and collaboration with MCC management and 2.a.i. project team manager who are working to establish PCMH/MU project implementation plan including EHR requirement.										
Task 2. Information will be shared monthly at BH and PCP stakeholder meetings.										
Task 3. Project manager or designee will meet with each integrated site staff and leadership at least quarterly to mutually assess and problem-solve where necessary.										
Task 4. Collaborate with 2.a.i. clinical integration team and IT Data Committee to discuss any issues and to brainstorm and problem-solve any shared data issues.										
Milestone #9 Implement IMPACT Model at Primary Care Sites.										
Task PPS has implemented IMPACT Model at Primary Care Sites.	0	0	0	0	0	0	0	0	0	0
Milestone #10 Utilize IMPACT Model collaborative care standards, including developing coordinated evidence-based care standards and policies and procedures for care engagement.										
Task Coordinated evidence-based care protocols are in place, including a medication management and care engagement process to facilitate collaboration between primary care physician and care manager.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task Policies and procedures include process for consulting with Psychiatrist.										
Milestone #11 Employ a trained Depression Care Manager meeting requirements of the IMPACT model.										
Task PPS identifies qualified Depression Care Manager (can be a nurse, social worker, or psychologist) as identified in Electronic Health Records.										
Task Depression care manager meets requirements of IMPACT model, including coaching patients in behavioral activation, offering course in counseling, monitoring depression symptoms for treatment response, and completing a relapse prevention plan.										
Milestone #12 Designate a Psychiatrist meeting requirements of the IMPACT Model.										
Task All IMPACT participants in PPS have a designated Psychiatrist.										
Milestone #13 Measure outcomes as required in the IMPACT Model.										
Task At least 90% of patients receive screenings at the established project sites (Screenings are defined as industry standard questionnaires such as PHQ-2 or 9 for those screening positive, SBIRT).										
Milestone #14 Provide "stepped care" as required by the IMPACT Model.										
Task In alignment with the IMPACT model, treatment is adjusted based on evidence-based algorithm that includes evaluation of patient after 10-12 weeks after start of treatment plan.										
Milestone #15 Use EHRs or other technical platforms to track all patients engaged in this project.										
Task EHR demonstrates integration of medical and behavioral health record within individual patient records.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.

Milestone Name	Narrative Text
Co-locate behavioral health services at primary care practice sites. All participating primary care practices must meet 2014 NCQA level 3 PCMH or Advance Primary Care Model standards by DY 3.	Tasks are being worked on, lists being created, partnerships formed, and workgroups started.
Develop collaborative evidence-based standards of care including medication management and care engagement process.	Tasks #1-5 are underway. Workgroups have formed. Held initial meetings with Community Medical Partners of WNY PPS (CMP), the Physician Steering Committee, and Chief Medical Officer to discuss protocols.
Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.	Partners introduced to project and importance of screenings. Meetings to discuss tracking.
Use EHRs or other technical platforms to track all patients engaged in this project.	Continued conversations with 2ai project director on progress in this area. Protocols just being developed.
Co-locate primary care services at behavioral health sites.	Tasks #1-16 are underway. Provider lists are being finalized, surveys are being developed, and partners engaged. We are collaborating with CMP, and the workgroup has met.
Develop collaborative evidence-based standards of care including medication management and care engagement process.	Tasks #1-7 are underway. Best practices/models have been researched. Have met with Physician Steering Committee and CMP on sharing ideas and on implementation plans.
Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.	Survey is being developed and best practices identified/training plans created.
Use EHRs or other technical platforms to track all patients engaged in this project.	Working with 2ai clinical director to ensure these tasks are on track. This is in the beginning phases.
Implement IMPACT Model at Primary Care Sites.	
Utilize IMPACT Model collaborative care standards, including developing coordinated evidence-based care standards and policies and procedures for care engagement.	
Employ a trained Depression Care Manager meeting requirements of the IMPACT model.	
Designate a Psychiatrist meeting requirements of the IMPACT Model.	
Measure outcomes as required in the IMPACT Model.	
Provide "stepped care" as required by the IMPACT Model.	
Use EHRs or other technical platforms to track all patients engaged in this project.

Project 3.a.ii – Behavioral health community crisis stabilization services

IPQR Module 3.a.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Resistance to change or failure to adopt consistent clinical guidelines will negatively impact DSRIP shared outcome metrics. A clinical readiness needs assessment for each participating provider will be completed. Joint efforts to ensure inclusivity, transparency, evidence-based justification, and other consensus-building techniques to maximize practitioner buy-in and ownership. Provider performance and compliance with standards will be monitored by the Physician Performance Sub-Committee (as described in project 2.a.i.), and the PPS will work with providers with low performance scores to address the gaps.

Crisis intervention resources are inconsistent and poorly understood across WNY. Additionally, first responders typically respond to behavioral health calls by transporting individuals to the ED, often resulting in an unnecessary ED visit and/or admission. MCC will lead a cross-organizational work group to assess and evaluate efforts aimed at consistent goals and outcomes. Collaborative efforts and leveraging of services towards modeling a crisis intervention team approach will assist law enforcement and providers to direct the care needed. Consideration for outreach capabilities to consult with psychiatrists/medical provider prior to taking action and sending a patient to the hospital.

Lack of established central triage system/model that will serve all eight WNY counties. One mitigation strategy would be to identify one provider as the central triage service for this model. Another possibility is for all crisis centers for designated counties to collaboratively develop a central triage tool that will be implemented to provide consistent response to crisis stabilization. Once developed, all behavioral health providers in the respective counties will be trained on the behavioral health triage system to utilize crisis/emergency services effectively. Create triage tool for project use.

The lack of respite services and emergency housing in WNY could impede the effectiveness of the crisis stabilization project. Utilization of these services are a key component to advoiding unnecessary and costly hospital services. Partner with existing housing and care agencies to expand services to help establish options.

Crisis stabilization services require a high level of service and are not consistently reimbursed by Medicaid managed care organizations. Collaborate with payers on payment structures, reporting practices, and metrics. Evaluate billing options based on regulations. Assist in translation to providers to assure clarity in procedures.

There is a shortage of behavioral health specialists and services in WNY. Work with area colleges and universities to determine how many students are in the pipeline, review curriculum options, discuss expanding clinical training opportunities, and encourage behavioral health-related internships. Assist in placement students/interns/fellows enhancing the pool of available and qualified personnel. With an expanded pool of providers much needed services can also be expanded.

Due to compatibility and regulatory issues, EHR systems may be difficult to use. Map existing EHR options and points in the crisis stabilization model where information sharing fails. Evaluate options to help eliminate the gasp and/or develop compliant options for proper hand-off of

information. Establish consistent mechanism for communication and guidance tools.

It will be important to provide a relatively uniform/transparent experience for patients regardless of where they seek care. MCC will work with Finger Lake PPS and Community Partners of WNY (led by Catholic Medical Partners) to share registry information, use standardized referral protocols, utilize uniform tracking and reporting systems, adopt universal alert messaging via the RHIO, and maintain common messaging to educate patients about crisis stabilization servi

IPQR Module 3.a.ii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Patient Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q3 should include patients previously reported in DY1 Q2 plus new patients engaged in DY1 Q3. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
100% Actively Engaged By	**Expected Patient Engagement**
DY4,Q4	12,750

Patient Update		% of Semi-Annual Commitment To-Date	Semi-Annual Variance of Projected to Actual	% of Total Actively Engaged Patients To-Date
DY1, Q1	DY1,Q2			
0	3,103	81.12%	722	24.34%

Warning: Please note that your patients engaged to date does not meet your committed amount (3,825)

Milestone #1 Implement a crisis intervention program that, at a minimum, includes outreach, mobile crisis, and intensive crisis services.										
Task PPS has established a crisis intervention program that includes outreach, mobile crisis, and intensive crisis services.										
Task 1. Convene Crisis Stabilization and Crisis Center Workgroup to plan out review of project (first meeting scheduled for 08/19/2015).										
Task 2. Establish Crisis Stabilization Advisory Group membership list.										
Task 3. Host the first quarterly advisory meeting (person/phone call in).										
Task 4. Develop monthly learning exchange meetings/calls with all crisis program providers.										
Task 5. Create map of current services delivered by program by county.										
Task 6. Evaluate gaps in services.										
Task 7. Evaluate budget of project to support gaps in service.

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task 8. Map out capacity-building plan of existing programs and implementation plan of new services.										
Task 9. Research and review EBP and established models that share dynamics specific to rural area challenges.										
Task 10. Develop expanded crisis intervention model based on strengths identified in current model.										
Task 11. Utilize Crisis Services as lead facilitators to train partners identified to expand outreach mobile crisis and/or intensive crisis services.										
Task 12. Provide ongoing training and support to partners as needed.										
Milestone #2 Establish clear linkages with Health Homes, ER and hospital services to develop and implement protocols for diversion of patients from emergency room and inpatient services.										
Task PPS has implemented diversion management protocol with PPS Hospitals (specifically Emergency Departments).										
Task 1. Evaluate gaps in services.										
Task 2. Map out capacity-building plan of existing programs and implementation plan of new services.										
Task 3. Develop crisis stabilization algorithm protocol for hospital diversion for Crisis Centers, Mobile Services, Health Homes, law enforcement, other providers.										
Task 4. Convene Health Home leaders to review algorithm and solidify linkages.										
Task 5. Review algorithm with following stakeholder groups: Crisis Stabilization Advisory Committee, Crisis Center Provider committee, Crisis Center Police Mental Health Coordination Project for community feedback.										
Task 6. Utilize feedback and begin to test protocols at two identified sites.										
Milestone #3 Establish agreements with the Medicaid Managed Care organizations serving the affected population to provide coverage for the service array under this project.

Task PPS has engaged MCO in negotiating coverage of services under this project and/or MCO provides coverage for services in project.										
Task 1. MCC leadership to arrange meetings with payers to evaluate current requirements and reimbursement rates for existing services.										
Task 2. MCC leadership establishes agreed upon rates for existing and for any new services defined.										
Task 3. Partners informed of rates and agreements and MCC signs agreements.										
Milestone #4 Develop written treatment protocols with consensus from participating providers and facilities.										
Task Regularly scheduled formal meetings are held to develop consensus on treatment protocols.										
Task Coordinated treatment care protocols are in place.										
Task 1. Coordinate with project 2.b.iii. (ED Care Triage) to establish central triage service with agreements among participating psychiatrists, mental health, behavioral health, and substance abuse providers.										
Task 2. Meet with 2biii Project Manager to review protocols developed for ED Triage and discuss implementation strategies, lessons learned, etc. as it relates to 3aii project.										
Task 3. Begin to implement protocols leveraged from the ED Triage 2biii project										
Task 4. Monitor changes on a quarterly basis and/or as needed.										
Milestone #5 Include at least one hospital with specialty psychiatric services and crisis-oriented psychiatric services; expansion of access to specialty psychiatric and crisis-oriented services.										
Task PPS includes at least one hospital with specialty psychiatric services and crisis-oriented psychiatric services in provider network										
Task PPS evaluates access to psychiatric services (in terms of	0	2	3	4	5	6	7	8	9	10

Milestone #11 Use EHRs or other technical platforms to track all patients engaged in this project.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task 1. Confirm that providers participating in this project are using EHRs and other technical platforms to track patients. (Coordinate with project 2ai and other PPS-wide integration efforts.)										
Task 2. Ongoing communication and collaboration with MCC management and 2ai project manager who are working to establish EHR requirement										
Task 3. In collaboration with MCC Management and 2ai project director, analyze current status of EMR systems as outlined in 2ai requirement 7.										

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #1 Implement a crisis intervention program that, at a minimum, includes outreach, mobile crisis, and intensive crisis services.										
Task PPS has established a crisis intervention program that includes outreach, mobile crisis, and intensive crisis services.										
Task 1. Convene Crisis Stabilization and Crisis Center Workgroup to plan out review of project (first meeting scheduled for 08/19/2015).										
Task 2. Establish Crisis Stabilization Advisory Group membership list.										
Task 3. Host the first quarterly advisory meeting (person/phone call in).

Task 4. Develop monthly learning exchange meetings/calls with all crisis program providers.										
Task 5. Create map of current services delivered by program by county.										
Task 6. Evaluate gaps in services.										
Task 7. Evaluate budget of project to support gaps in service.										
Task 8. Map out capacity-building plan of existing programs and implementation plan of new services.										
Task 9. Research and review EBP and established models that share dynamics specific to rural area challenges.										
Task 10. Develop expanded crisis intervention model based on strengths identified in current model.										
Task 11. Utilize Crisis Services as lead facilitators to train partners identified to expand outreach mobile crisis and/or intensive crisis services.										
Task 12. Provide ongoing training and support to partners as needed.										
Milestone #2 Establish clear linkages with Health Homes, ER and hospital services to develop and implement protocols for diversion of patients from emergency room and inpatient services.										
Task PPS has implemented diversion management protocol with PPS Hospitals (specifically Emergency Departments).										
Task 1. Evaluate gaps in services.										
Task 2. Map out capacity-building plan of existing programs and implementation plan of new services.										
Task 3. Develop crisis stabilization algorithm protocol for hospital diversion for Crisis Centers, Mobile Services, Health Homes, law enforcement, other providers.										
Task 4. Convene Health Home leaders to review algorithm and solidify linkages.										
Task 5. Review algorithm with following stakeholder groups: Crisis

Stabilization Advisory Committee, Crisis Center Provider committee, Crisis Center Police Mental Health Coordination Project for community feedback.										
Task 6. Utilize feedback and begin to test protocols at two identified sites.										
Milestone #3 Establish agreements with the Medicaid Managed Care organizations serving the affected population to provide coverage for the service array under this project.										
Task PPS has engaged MCO in negotiating coverage of services under this project and/or MCO provides coverage for services in project.										
Task 1. MCC leadership to arrange meetings with payers to evaluate current requirements and reimbursement rates for existing services.										
Task 2. MCC leadership establishes agreed upon rates for existing and for any new services defined.										
Task 3. Partners informed of rates and agreements and MCC signs agreements.										
Milestone #4 Develop written treatment protocols with consensus from participating providers and facilities.										
Task Regularly scheduled formal meetings are held to develop consensus on treatment protocols.										
Task Coordinated treatment care protocols are in place.										
Task 1. Coordinate with project 2.b.iii. (ED Care Triage) to establish central triage service with agreements among participating psychiatrists, mental health, behavioral health, and substance abuse providers.										
Task 2. Meet with 2biii Project Manager to review protocols developed for ED Triage and discuss implementation strategies, lessons learned, etc. as it relates to 3aii project.										
Task 3. Begin to implement protocols leveraged from the ED Triage 2biii project										
Task 4. Monitor changes on a quarterly basis and/or as needed.

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #5 Include at least one hospital with specialty psychiatric services and crisis-oriented psychiatric services; expansion of access to specialty psychiatric and crisis-oriented services.										
Task PPS includes at least one hospital with specialty psychiatric services and crisis-oriented psychiatric services in provider network										
Task PPS evaluates access to psychiatric services (in terms of community needs assessment, geographic access, wait times, and other measures), identifies improvement areas, and implements improvement steps.	11	11	11	11	11	11	11	11	11	11
Task 1. ECMCC CPEP is our designated hospital with specialty psychiatric services and crisis-oriented psychiatric services.										
Task 2. Hot spot analysis and provider surveys will be completed, sent out, and reviewed by MCC leadership										
Task 3. Expansion of services to be determined as a goal by MCC leadership and ECMCC leadership as a result of reviewing data gathered from CNA, hotspot analysis and provider surveys.										
Milestone #6 Expand access to observation unit within hospital outpatient or at an off campus crisis residence for stabilization monitoring services (up to 48 hours).										
Task PPS includes hospitals with observation unit or off campus crisis residence locations for crisis monitoring.										
Task PPS evaluates access to observation unit or off campus crisis residence services (in terms of community needs assessment, geographic access, wait times, and other measures), identifies improvement areas, and implements improvement steps.	11	11	11	11	11	11	11	11	11	11
Task PPS evaluates access to observation unit or off campus crisis residence services (in terms of community needs assessment, geographic access, wait times, and other measures), identifies improvement areas, and implements improvement steps.	40	40	40	40	40	40	40	40	40	40

Task 1. Key stakeholder provider group is developed and convened to discuss and identify existing gaps in services and barriers to access.										
Task 2. Key stakeholder group identifies community strengths and devises a collaborative plan to address barriers and how observation beds and crisis residence beds will be coordinated.										
Task 3. Locations identified to expand services identified by key stakeholders (City Mission, HOME – in Niagara, Chautauqua and Cattaraugus Counties).										
Task 4. Agreements to be negotiated among MCC leadership and identified providers in regards to expansion of services.										
Task 5. Crisis residential beds and chemical dependency services to be established at Buffalo City Mission in partnership with ECMCC CPEP and Crisis Services Mobile Outreach Services.										
Task 6. HOME to establish Rose House Model Peer Respite Services in Erie County.										
Task 7. HOME to establish Rose House Model Peer Respite Services in Randolph, NY to serve Chautauqua/Cattaraugus Counties.										
Task 8. Niagara County to establish a Rose House Plus type service of crisis respite services.										
Task 9. Evaluation protocols developed by key stakeholder team and MCC leadership.										
Task 10. Evaluate protocols reviewed and data collected quarterly and/or as required.										
Milestone #7 Deploy mobile crisis team(s) to provide crisis stabilization services using evidence-based protocols developed by medical staff.										
Task PPS includes mobile crisis teams to help meet crisis stabilization needs of the community.										
Task Coordinated evidence-based care protocols for mobile crisis teams are in place.										
Task 1. Identify existing mobile teams in Erie, Niagara, and

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Chautauqua counties.										
Task 2. Review criteria for protocol (NYS Mental Hygiene Law-9.45).										
Task 3. Assess mobile team services in Cattaraugus, Allegany, Wyoming, Genesee, and Orleans counties to determine gaps in service to meet this requirement.										
Task 4. Identify implementation of new mobile services based on review of need, data evaluation, and budget.										
Task 5. Utilize Crisis Services to develop training on new protocols, EBP, and existing resources.										
Task 6. Crisis Services staff will implement and train new partners on identified protocols and resources										
Milestone #8 Ensure that all PPS safety net providers have actively connected EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up by the end of Demonstration Year (DY) 3.										
Task EHR demonstrates integration of medical and behavioral health record within individual patient records.										
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	100	126	126	126	126	126	126	126	126	126

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 2. In collaboration with MCC Management and 2ai project director, analyze current status of EMR systems as outlined in 2ai requirement 7.										
Milestone #9 Establish central triage service with agreements among participating psychiatrists, mental health, behavioral health, and substance abuse providers.										
Task PPS has implemented central triage service among psychiatrists and behavioral health providers.										
Task 1. Collect triage tool examples for Crisis Center provider group to review.										
Task 2. Evaluate and assess current tools, policies, and resources and commit to consistent model for all providers to use.										
Task 3. Coordinate training on model for all Crisis Center providers; consider targeting specific protocols for targeted participants such as Schools, Shelters, law enforcement, etc.										
Task 4. Implement universal triage tool for Crisis Stabilization providers.										
Task 5. Coordinate and help secure partner agreements with providers as outlined in 2ai Requirement 8.										
Milestone #10 Ensure quality committee is established for oversight and surveillance of compliance with protocols and quality of care.										
Task PPS has created an active quality subcommittee that reports to PPS quality committee that is representative of medical and behavioral health staff and is specifically focused on integration of primary care and behavioral health services within practice sites and other behavioral health project initiatives. Note: Only one quality sub-committee is required for medical and behavioral health integration projects in Domain 3a.										
Task Quality committee identifies opportunities for quality improvement and use of rapid cycle improvement methodologies, develops implementation plans, and evaluates results of quality improvement initiatives.										
Task PPS evaluates and creates action plans based on key quality metrics, to include applicable metrics listed in Attachment J

Millennium Collaborative Care (PPS ID:48)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Implement a crisis intervention program that, at a minimum, includes outreach, mobile crisis, and intensive crisis services.	Tasks #1-11 are underway. Workgroup developed, advisory group chosen, services and gaps/barriers analysis and capacity assessments underway. Begun to research EBP models.
Establish clear linkages with Health Homes, ER and hospital services to develop and implement protocols for diversion of patients from emergency room and inpatient services.	Services/gaps analysis and capacity assessment has started and is being reviewed. Algorithm protocol discussion has started.
Establish agreements with the Medicaid Managed Care organizations serving the affected population to provide coverage for the service array under this project.	The status of this milestone changed due to previous limitations to the MAPP.
Develop written treatment protocols with consensus from participating providers and facilities.	Existing protocols are in place (per mental hygiene law) and are being reviewed by workgroups.
Include at least one hospital with specialty psychiatric services and crisis-oriented psychiatric services; expansion of access to specialty psychiatric and crisis-oriented services.	CPEP assessment and hot spot analysis is in progress based on the gaps/barriers analysis.
Expand access to observation unit within hospital outpatient or at an off campus crisis residence for stabilization monitoring services (up to 48 hours).	Tasks 1-9 are underway. Gaps and Barriers analysis has assisted in this milestone. HOME and ECMC/Crisis Services/City Mission have opened/expanded services.
Deploy mobile crisis team(s) to provide crisis stabilization services using evidence-based protocols developed by medical staff.	Tasks #1-6 are underway. The gaps and barriers analysis has been worked on at workgroup meetings and is helping identify gaps with mobile services.
Ensure that all PPS safety net providers have actively connected EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up by the end of Demonstration Year (DY) 3.	Tasks #1-2 are underway with the 2ai project and Clinical Integration Officer. Communication among project managers via regular meetings.
Establish central triage service with agreements among participating psychiatrists, mental health, behavioral health, and substance abuse providers.	Tasks #1, 2, 3, and 5 are underway. Workgroup was presented sample triage tools to review and to help create universal tool.
Ensure quality committee is established for oversight and surveillance of compliance with protocols and quality of care.	Tasks #1-3 are underway. MCC leadership has established a clinical quality team that has begun to discuss this project and brainstorm ideas/strategies.
Use EHRs or other technical platforms to track all patients engaged in this project.	Tasks #1-3 are underway. MCC leadership and the 2aii project is working on this and communicating with the project manager regularly.

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project 3.b.i – Evidence-based strategies for disease management in high risk/affected populations (adult only)

IPQR Module 3.b.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Existing and new guidelines with differing recommendations has led to confusion among practitioners. Practice transformation includes embedding and reinforcing the Million Hearts (MH) Program goals, practice guidelines and tools into each practice. We will use a combination of academic detailing, practice facilitation, collaborative learning groups, and patient engagement.

Training is a core part of the care team reorientation. A comprehensive training initiative will serve as the backbone of the CVD management project. Other educational media will vary based on the practice location and characteristics: for large urban centers, onsite training is feasible. For rural practices, collaborative learning models and content will be communicated through meetings, written documents and embedded in the medical decision support systems of the regional EHRs.

The role, responsibilities, workflow, protocols, and performance evaluation of the CVD initiative will be accessible by each office. Use of the CVD endpoints addresses Standard 3D (population health management) of 2014 PCMH requirements. Longer-term, participation will improve provider reimbursement rates via specific programs such as Meaningful Use of EHR and PCMH. Providers who attend training sessions may also be compensated for their time.

Sustained progress in cardiovascular health requires a campaign to change deeply ingrained beliefs and behaviors in providers and patients. MCC will identify areas of overlap and mutual interest among the 11 projects and foster collaboration whenever possible. New scientific developments will be communicated to providers at meetings and educational sessions on the website. Current CVD care/treatment guidelines will be instituted PPS-wide by building them into the practice transformation described above to meet level 3 PCMH.

The absence of a functional database would impede reporting and present significant obstacles to physician feedback. Participating PCMH locations will use electronic health registries to record, track, analyze, and report on clinical data. Project 2.a.i will build RHIO connectivity, enhanced communication, and care management data-sharing between primary care and cardiovascular specialists, mental health, health homes, and community support agencies. The meaningful use of this electronic clinical data will be built into the practice transformation to meet level 3 PCMH.

It may be difficult for some providers to accept and use blood pressure data generated at home. Periodic educational programs will emphasize the need for non-office blood pressure determination. In addition, home blood pressure monitoring is not reimbursable to physicians. Practice transformation will include the phase-in of home blood pressure monitoring to meet level 3 PCMH. Reimbursement changes will also be required for physicians.

Project 2.a.i is expected to support easy-to-use point-of-care decision support based on evidence-based algorithms to make actionable information available for the practice team. Clinical integration of multiple data sources (e.g., laboratory data) will be critical to present the "ABCs" metrics for

blood pressure and cholesterol control.

Close coordination with bordering Community Partners of WNY (CPWNY, led by Catholic Medical Partners) will be necessary to address CVD in the Medicaid target population. To avoid conflicting or inconsistent messages regarding cardiovascular disease and risk factor management, PPSs will use materials developed by and made available through the MH Program. Following MH protocols will further ensure that patients encounter a comparable experience regardless of where they seek care. Representatives from MCC will meet regularly with CPWNY to coordinate timing of messaging, address issues, and share lessons learned.

Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

IPQR Module 3.b.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Patient Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q3 should include patients previously reported in DY1 Q2 plus new patients engaged in DY1 Q3. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
100% Actively Engaged By	**Expected Patient Engagement**
DY3,Q4	32,800

Patient Update		% of Semi-Annual Commitment To-Date	Semi-Annual Variance of Projected to Actual	% of Total Actively Engaged Patients To-Date
DY1, Q1	DY1,Q2			
0	2,288	91.52%	212	6.98%

Warning: Please note that your patients engaged to date does not meet your committed amount (2,500)

Millennium Collaborative Care (PPS ID:48)

IPQR Module 3.b.i.3 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement.
Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.	Project	N/A	In Progress	08/03/2015	09/30/2017	08/03/2015	09/30/2017	09/30/2017	DY3 Q2
Task PPS has implemented program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.	Project		In Progress	08/03/2015	09/30/2017	08/03/2015	09/30/2017	09/30/2017	DY3 Q2
Task 1. Develop comprehensive MCC partner database for MCC partners included in the management of CVD. Partner database will categorize partners by provider type (including ambulatory care or community care partner) and demonstrate changes to the network list.	Project		In Progress	08/03/2015	09/30/2016	08/03/2015	09/30/2016	09/30/2016	DY2 Q2
Task 2. Collect appropriate clinical tools necessary for the different goals of the Million Hearts Program (MHP): blood pressure guidelines, cholesterol management guidelines, and the tools for smoking cessation.	Project		In Progress	08/03/2015	09/30/2016	08/03/2015	09/30/2016	09/30/2016	DY2 Q2
Task 3. Disseminate written evidence-based treatment protocols for managing CVD using the techniques and resources provided on the Million Hearts Campaign program website.	Project		Not Started	01/01/2016	09/30/2016	01/01/2016	09/30/2016	09/30/2016	DY2 Q2
Task 4. Define priority target population, and develop a framework for patient database to include risk stratified registries and blood pressure measurements.	Project		In Progress	09/02/2015	09/30/2016	09/02/2015	09/30/2016	09/30/2016	DY2 Q2
Task 5. Identify pilot PCP sites to implement MHP.	Project		In Progress	09/01/2015	12/31/2015	09/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task 6. Meet with each practice site on identified list.	Project		Not Started	01/01/2016	03/31/2016	01/01/2016	03/31/2016	03/31/2016	DY1 Q4

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
1. Conduct gap analysis to determine which providers have already completed PCMH/MU or other connectivity readiness assessment. Include the following questions: Is the practice/providers/patients currently connected to the HIE? If not, is an agreement in place? If so, what is the scope of the connectivity (% of providers; % of patients)? Does EHR meet connectivity requirements of RHIO/SHIN-NY? Name of EHR, version, and electronic functionalities in use									
Task 2. Develop strategy for low-cost data connectivity between ISPs (e.g., WNY R-AHEC) and local practice plans to determine minimum hardware and software requirements.	Project		In Progress	09/07/2015	06/30/2016	09/07/2015	06/30/2016	06/30/2016	DY2 Q1
Task 3. Gather results from readiness assessments already conducted.	Project		In Progress	09/07/2015	06/30/2016	09/07/2015	06/30/2016	06/30/2016	DY2 Q1
Task 4. Issue request for applications (RFA) or other action step for readiness assessment and transformation support services.	Project		Not Started	10/05/2015	06/30/2016	10/05/2015	06/30/2016	06/30/2016	DY2 Q1
Task 5. Select vendor or implement other structure for readiness assessment and transformation support services.	Project		Not Started	07/01/2016	09/30/2016	07/01/2016	09/30/2016	09/30/2016	DY2 Q2
Task 6. Identify funding model and/or PPS provider incentive model for EHR with the Finance Committee.	Project		Not Started	10/03/2016	03/31/2017	10/03/2016	03/31/2017	03/31/2017	DY2 Q4
Task 7. Connect PPS providers to MCC enterprise DSRIP solution.	Project		Not Started	10/03/2016	06/30/2017	10/03/2016	06/30/2017	06/30/2017	DY3 Q1
Task 8. Implement enterprise DSRIP solution and start data exchange.	Project		Not Started	01/01/2017	06/30/2017	01/01/2017	06/30/2017	06/30/2017	DY3 Q1
Task 9. Implement PPS providers in waves grouped by the partner's ability to connect and integrate into the solution; start with the most able to connect; add others as they establish their capabilities.	Project		Not Started	01/01/2017	06/30/2017	01/01/2017	06/30/2017	06/30/2017	DY3 Q1
Task 10. Systematically contact PPS providers to provide the recommended enterprise DSRIP solution.	Project		Not Started	01/02/2017	06/30/2017	01/02/2017	06/30/2017	06/30/2017	DY3 Q1
Task 11. Facilitate QE participation agreements with MCC providers.	Project		Not Started	04/04/2017	09/30/2017	04/04/2017	09/30/2017	09/30/2017	DY3 Q2

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
assessment: (a) identify site-specific IT/care management leadership, (b) determine current EHR PCMH/MU certification status, and (c) identify site-specific barriers and risks to implementing a MU/PCMH Level 3 certified EHR system.									
Task 2. Facilitate engagement with MU/PCMH-certified EHR vendors as needed.	Project		Not Started	10/03/2016	03/31/2017	10/03/2016	03/31/2017	03/31/2017	DY2 Q4
Task 3. Establish PCMH/MU project implementation plan based on primary care practice readiness and certification status.	Project		Not Started	10/03/2016	03/31/2017	10/03/2016	03/31/2017	03/31/2017	DY2 Q4
Task 4. Review PCMH implementation plan for approval by the Clinical/Quality Committee.	Project		Not Started	10/03/2016	03/31/2017	10/03/2016	03/31/2017	03/31/2017	DY2 Q4
Task 5. Ensure practices have support through the PCMH implementation process either through a vendor or through MCC PCMH coordinators.	Project		Not Started	01/02/2017	06/30/2017	01/02/2017	06/30/2017	06/30/2017	DY3 Q1
Task 6. Establish a monthly review and measurement process of implementation progress and report to Clinical/Quality Committee.	Project		Not Started	01/02/2017	09/30/2017	01/02/2017	09/30/2017	09/30/2017	DY3 Q2
Task 7. Modify implementation plan as needed based on monthly review process.	Project		Not Started	02/02/2017	09/30/2017	02/02/2017	09/30/2017	09/30/2017	DY3 Q2
Task 8. Practices provide MU and PCMH Level 3 certification documentation to the PPS.	Project		Not Started	01/03/2017	03/31/2018	01/03/2017	03/31/2018	03/31/2018	DY3 Q4
Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.	Project	N/A	In Progress	08/03/2015	03/31/2017	08/03/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.	Project		In Progress	08/03/2015	03/31/2017	08/03/2015	03/31/2017	03/31/2017	DY2 Q4
Task 1. Define IT requirements for initializing/maintaining/communicating risk stratification across settings, including means for electronic interfacing to the participating provider community and key data sharing.	Project		Not Started	03/31/2016	06/30/2016	03/31/2016	06/30/2016	06/30/2016	DY2 Q1
Task 2. MCC vendor solution will include communication channels to	Project		Not Started	03/31/2016	06/30/2016	03/31/2016	06/30/2016	06/30/2016	DY2 Q1

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
track targeted patients in the database for monitoring blood pressure, cholesterol, smoking status, and cardiovascular medications.									
Task 3. MCC vendor solution will implement and deploy population health management by leveraging data from the data exchange/HIE environments.	Project		Not Started	07/01/2016	09/30/2016	07/01/2016	09/30/2016	09/30/2016	DY2 Q2
Task 4. Select pilot test sites for Million Hearts implementation of patient engagement registries.	Project		Not Started	09/30/2016	12/31/2016	09/30/2016	12/31/2016	12/31/2016	DY2 Q3
Task 5. Review Million Hearts program goals and work with PCMH coordinator to get buy-in to implement as a QI program for PCMH accreditation.	Project		Not Started	09/30/2016	12/31/2016	09/30/2016	12/31/2016	12/31/2016	DY2 Q3
Task 6. Identify criteria required to develop registry and create patient registries.	Project		Not Started	01/01/2017	03/31/2017	01/01/2017	03/31/2017	03/31/2017	DY2 Q4
Task 7. Work with identified practices on Million Hearts focused clinical criteria on monitoring registries at PCP offices for care coordination outreach (PCMH Standard 4 requirement) and verify engagement.	Project		Not Started	01/01/2017	03/31/2017	01/01/2017	03/31/2017	03/31/2017	DY2 Q4
Task 8. Report on patient engagement and engaged safety net practices according to project milestone reporting requirements.	Project		Not Started	10/02/2016	03/31/2017	10/02/2016	03/31/2017	03/31/2017	DY2 Q4
Task 9. Assess continuous improvement by monitoring clinical quality measures (PCMH Standard 6).	Project		Not Started	01/01/2017	03/31/2017	01/01/2017	03/31/2017	03/31/2017	DY2 Q4
Milestone #5 Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).	Project	N/A	In Progress	09/01/2015	03/31/2017	09/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS has implemented an automated scheduling system to facilitate tobacco control protocols.	Project		In Progress	09/01/2015	03/31/2017	09/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS provides periodic training to staff to incorporate the use of EHR to prompt the use of 5 A's of tobacco control.	Project		In Progress	09/01/2015	03/31/2017	09/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 1. Engage NYS Quitline to ensure that resources are available and referral information can be shared with primary care practice	Project		In Progress	09/01/2015	12/31/2015	09/01/2015	12/31/2015	12/31/2015	DY1 Q3

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
staff for referral of patients to community-based smoking cessation resources.									
Task 2. Develop written training materials, resources, list training dates.	Project		Not Started	01/01/2016	03/31/2016	01/01/2016	03/31/2016	03/31/2016	DY1 Q4
Task 3. Work with Quitline team to offer primary care practice staff trainings on available Quitline resources.	Project		Not Started	04/01/2016	09/30/2016	04/01/2016	09/30/2016	09/30/2016	DY2 Q2
Task 4. Work with Quitline team to develop training modules for practices (on available patient engagement resources, telephonic motivational coaching, web-based peer coaching, personalized text messaging, and screening for NRT eligibility).	Project		Not Started	04/01/2016	09/30/2016	04/01/2016	09/30/2016	09/30/2016	DY2 Q2
Task 5. Promote Opt to Quit™ opt-out policy at practices. Promote integration of Tobacco Use screening workflows (including EHR prompt within practice EHRs to automate completion of 5As of Tobacco control).	Project		Not Started	07/01/2016	12/30/2016	07/01/2016	12/30/2016	12/31/2016	DY2 Q3
Task 6. Use EHR to build automated referral processes to facilitate coordination of care and transition through Quitline referrals.	Project		Not Started	09/01/2016	03/31/2017	09/01/2016	03/31/2017	03/31/2017	DY2 Q4
Task 7. Integrate tobacco cessation counseling in PCMH 2014 Level 3 accreditation workflow for managing CVD including assessment and monitoring of tobacco use (PCMH Std 3 includes recording comprehensive health assessment, using data in EB decision support).	Project		Not Started	09/01/2016	03/31/2017	09/01/2016	03/31/2017	03/31/2017	DY2 Q4
Milestone #6 Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.	Project	N/A	In Progress	09/30/2015	03/31/2017	09/30/2015	03/31/2017	03/31/2017	DY2 Q4
Task Practice has adopted treatment protocols aligned with national guidelines, such as the National Cholesterol Education Program (NCEP) or US Preventive Services Task Force (USPSTF).	Project		In Progress	09/30/2015	03/31/2017	09/30/2015	03/31/2017	03/31/2017	DY2 Q4
Task 1. Request an American Heart Association (AHA) Spotlight Series Speaker offering CME/CE and grand rounds presentation on topics related to cardiovascular disease in a hospital setting in collaboration with partner PPS organizations (FLPPS and	Project		Not Started	04/01/2016	06/30/2016	04/01/2016	06/30/2016	06/30/2016	DY2 Q1

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
CPWNY).									
Task 2. Define the need to adhere to clinical algorithms in master services agreement (MSA) for all PCPs participating in Domain 3 projects.	Project		In Progress	09/30/2015	12/31/2015	09/30/2015	12/31/2015	12/31/2015	DY1 Q3
Task 3. Support MCC PCP partners who have signed MSA by educational detailing to make practices aware of the Million Hearts website resources (patient education web, video tools and printed materials, practice management tools, lifestyle management website resources).	Project		Not Started	01/01/2016	06/30/2016	01/01/2016	06/30/2016	06/30/2016	DY2 Q1
Task 4. Define protocols in EHR at participating PCPs to identify patients in the Million Hearts registry.	Project		Not Started	06/30/2016	09/30/2016	06/30/2016	09/30/2016	09/30/2016	DY2 Q2
Task 5. Conduct analysis to see if clinical protocols exist and determine if gaps are present.	Project		Not Started	06/30/2016	09/30/2016	06/30/2016	09/30/2016	09/30/2016	DY2 Q2
Task 6. Plan to close gaps in workflows and protocols to support patients in the Million Hearts registry at participating sites.	Project		Not Started	06/30/2016	09/30/2016	06/30/2016	09/30/2016	09/30/2016	DY2 Q2
Task 7. To close gaps, support MCC PCP partners by educational detailing for decision support tools and treatment algorithms to assess CVD including clinical treatment algorithms/guideline pocket cards for cholesterol, blood pressure, lifestyle management, and obesity management.	Project		Not Started	06/30/2016	09/30/2016	06/30/2016	09/30/2016	09/30/2016	DY2 Q2
Task 8. Evaluate the need to offer CME to clinical teams for training related to the use of clinical treatment algorithms to manage blood pressure.	Project		Not Started	06/30/2016	09/30/2016	06/30/2016	09/30/2016	09/30/2016	DY2 Q2
Task 9. List all training dates and number of staff trained along with training materials provided.	Project		Not Started	06/30/2016	09/30/2016	06/30/2016	09/30/2016	09/30/2016	DY2 Q2
Task 10. Build MCC partner database to include CBOs with health, wellness, and prevention programs. MCC will document evidence of agreement to allow CBOs to accept warm referrals. Partner database available to all MCC PCP sites and updated on a quarterly basis as new partners are added.	Project		Not Started	10/02/2015	03/31/2017	10/02/2015	03/31/2017	03/31/2017	DY2 Q4
Task	Project		Not Started	10/03/2016	12/30/2016	10/03/2016	12/30/2016	12/31/2016	DY2 Q3

Millennium Collaborative Care (PPS ID:48)

including community programs such as free or low-cost community wellness classes.									
Task 6. For ongoing care coordination, facilitate a referral process for warm referrals to CBOs (who have signed agreements with MCC) and partners (health home care managers where applicable, pharmacists, dietitians, and community health workers).	Project		Not Started	07/01/2016	12/30/2016	07/01/2016	12/30/2016	12/31/2016	DY2 Q3
Task 7. MCC to develop a PPS partner database for coordination resources available outside the practice setting (e.g., CDSMP/Stanford model, tobacco cessation classes, Baby and Me Tobacco Free, nutrition counseling, community cooking classes).	Project		In Progress	09/07/2015	03/31/2016	09/07/2015	03/31/2016	03/31/2016	DY1 Q4
Task 8. MCC PCMH project lead to document workflows to increase referrals to resources such as medication therapy management, dietician referrals, community health workers (and health homes if eligibility requirements are met).	Project		Not Started	03/31/2016	09/30/2016	03/31/2016	09/30/2016	09/30/2016	DY2 Q2
Task 9. MCC partner database will be disseminated to practice champions. MCC partner database will contain regional categories of partners, provider type and primary contacts for these referral services. Database will be updated as new partners are engaged	Project		Not Started	04/01/2016	12/30/2016	04/01/2016	12/30/2016	12/31/2016	DY2 Q3
Task 10. MCC Clinical Outreach team will support the PCMH project lead in monitoring and tracking the number and location of primary care practices using the team-based care model for managing cardiovascular disease.	Project		Not Started	07/01/2016	03/31/2017	07/01/2016	03/31/2017	03/31/2017	DY2 Q4
Task 11. MCC will work with the PCMH project lead to ensure that practices are documenting self management goals in medical record (diet, exercise, medication management, nutrition, etc.).	Project		Not Started	03/31/2016	09/30/2016	03/31/2016	09/30/2016	09/30/2016	DY2 Q2
Task 12. MCC will collaborate with the RHIO, HEALTHeLINK, to establish a clinically interoperable system for data sharing with participating providers.	Project		In Progress	08/03/2015	03/31/2017	08/03/2015	03/31/2017	03/31/2017	DY2 Q4
Milestone #8 Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.	Project	N/A	Not Started	10/03/2016	09/30/2017	10/03/2016	09/30/2017	09/30/2017	DY3 Q2

document participation and behavioral and health status changes.									
Task PPS has developed referral and follow-up process and adheres to process.	Project		Not Started	04/01/2016	09/30/2017	04/01/2016	09/30/2017	09/30/2017	DY3 Q2
Task PPS provides periodic training to staff on warm referral and follow-up process.	Project		Not Started	04/01/2016	09/30/2017	04/01/2016	09/30/2017	09/30/2017	DY3 Q2
Task Agreements are in place with community-based organizations and process is in place to facilitate feedback to and from community organizations.	Project		Not Started	04/01/2016	09/30/2017	04/01/2016	09/30/2017	09/30/2017	DY3 Q2
Task 1. MCC will document evidence of agreement with CBOs. Partner database list will be available to MCC PCP sites.	Project		Not Started	04/01/2016	12/31/2016	04/01/2016	12/31/2016	12/31/2016	DY2 Q3
Task 2. If patient is eligible for health home, MCC clinical outreach team will work with PCP practices on a workflow or warm referrals to health homes.	Project		Not Started	01/02/2017	09/29/2017	01/02/2017	09/29/2017	09/30/2017	DY3 Q2
Task 3. Maintain a list of MCC PCP sites who have established a process for warm referrals.	Project		Not Started	06/30/2016	09/29/2017	06/30/2016	09/29/2017	09/30/2017	DY3 Q2
Task 4. Develop process to track referrals made to community-based programs and health homes by MCC PCP practices.	Project		Not Started	09/30/2016	12/30/2016	09/30/2016	12/30/2016	12/31/2016	DY2 Q3
Task 5. Practices will be provided with an MCC partner database for direct referral for CBO services (for patients who may not be eligible for health home interventions).	Project		Not Started	09/30/2016	03/31/2017	09/30/2016	03/31/2017	03/31/2017	DY2 Q4
Task 6. Train practices on making warm referrals to health homes and CBOs. Maintain list of training dates for each PCP site.	Project		Not Started	09/30/2016	03/31/2017	09/30/2016	03/31/2017	03/31/2017	DY2 Q4
Task 7. MCC clinical outreach team will provide written training materials on making warm referrals.	Project		Not Started	09/30/2016	03/31/2017	09/30/2016	03/31/2017	03/31/2017	DY2 Q4
Task 8. Evaluate and track warm referrals made by each MCC PCP practice to health homes and/or community based organizations every quarter. Review count of referrals made to CBOs to facilitate feedback. Report to Clinical/Quality Committee on	Project		Not Started	03/31/2017	09/30/2017	03/31/2017	09/30/2017	09/30/2017	DY3 Q2

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
count of warm referrals made to CBOs and health homes by PCP practice sites.									
Milestone #14 Develop and implement protocols for home blood pressure monitoring with follow up support.	Project	N/A	Not Started	01/01/2016	03/31/2017	01/01/2016	03/31/2017	03/31/2017	DY2 Q4
Task PPS has developed and implemented protocols for home blood pressure monitoring.	Project		Not Started	01/01/2016	03/31/2017	01/01/2016	03/31/2017	03/31/2017	DY2 Q4
Task PPS provides follow up to support to patients with ongoing blood pressure monitoring, including equipment evaluation and follow-up if blood pressure results are abnormal.	Project		Not Started	01/01/2016	03/31/2017	01/01/2016	03/31/2017	03/31/2017	DY2 Q4
Task PPS provides periodic training to staff on warm referral and follow-up process.	Project		Not Started	01/01/2016	03/31/2017	01/01/2016	03/31/2017	03/31/2017	DY2 Q4
Task 1. Identify which MCOs in the MCC network cover the majority of the attributed members and work with the benefit managers of these plans to promote coverage for validated Self Monitoring of Blood Pressure (SMBP) monitors.	Project		Not Started	01/01/2016	12/31/2016	01/01/2016	12/31/2016	12/31/2016	DY2 Q3
Task 2. MCC Clinical Outreach team will identify and work with academic detailers to support primary care practice team on securing and using SMBP monitors.	Project		Not Started	01/01/2016	12/31/2016	01/01/2016	12/31/2016	12/31/2016	DY2 Q3
Task 3. MCC Clinical outreach team to facilitate trainings for PCP team to teach cuff selection, patient positioning, measurement without talking, and accurate blood pressure observation.	Project		Not Started	04/01/2016	12/31/2016	04/01/2016	12/31/2016	12/31/2016	DY2 Q3
Task 4. Trainings for the practice team on ways to support self monitoring including educating patients about the importance of self monitoring for BP, training patient on using the device, and providing BP logs to the care team.	Project		Not Started	04/01/2016	12/31/2016	04/01/2016	12/31/2016	12/31/2016	DY2 Q3
Task 5. Development of workflows and policies to support patients on self monitoring of BP at home: during follow up visits, PCP team will review patient SMBP readings, request medication fills, provide summaries of clinic visits.	Project		Not Started	10/03/2016	03/31/2017	10/03/2016	03/31/2017	03/31/2017	DY2 Q4

6. Determine number of MCC PCP sites engaged in Million Hearts and conduct annual reviews to identify new PCP sites for ongoing support/outreach/training until 80 % of PCPs are engaged.									

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Milestone #1 Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.										
Task PPS has implemented program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.										
Task 1. Develop comprehensive MCC partner database for MCC partners included in the management of CVD. Partner database will categorize partners by provider type (including ambulatory care or community care partner) and demonstrate changes to the network list.										
Task 2. Collect appropriate clinical tools necessary for the different goals of the Million Hearts Program (MHP): blood pressure guidelines, cholesterol management guidelines, and the tools for smoking cessation.										
Task 3. Disseminate written evidence-based treatment protocols for managing CVD using the techniques and resources provided on the Million Hearts Campaign program website.										
Task 4. Define priority target population, and develop a framework for patient database to include risk stratified registries and blood pressure measurements.										
Task 5. Identify pilot PCP sites to implement MHP.										
Task 6. Meet with each practice site on identified list.										
Task 7. List all PCP sites that plan on using Million Hearts registries and work on process flows at each PCP site to manage CVD population using Million Hearts criteria.

Task 8. Develop process and identify vendor for patient registry/database development. Vendor to interface with data points available through the regional RHIO (HEALTHeLINK) to integrate information from disparate EHRs from primary care offices.										
Task 9. Pilot test patient database to integrate EHR data points from a variety of Primary Care offices relevant to risk stratification, blood pressure, and cardiovascular medications.										
Task 10. Track and monitor patient engagement at each PCP practice site and build quarterly performance metrics related to the four program areas in Million Hearts to verify continuous improvement.										
Task 11. Begin reporting on implementation of project requirements quarterly according to project milestone reporting requirements.										
Milestone #2 Ensure that all PPS safety net providers are actively connected to EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the end of DY 3.										
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	0	2	6	10	20	30	40	50	60	80
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	0	0	0	0	5	10	15	20	25	30
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	0	0	0	10	20	30	40	50	55	60
Task PPS uses alerts and secure messaging functionality.										
Task 1. Conduct gap analysis to determine which providers have already completed PCMH/MU or other connectivity readiness assessment. Include the following questions: Is the practice/providers/patients currently connected to the HIE? If not, is an agreement in place? If so, what is the scope of the connectivity (% of providers; % of patients)? Does EHR meet connectivity requirements of RHIO/SHIN-NY? Name of EHR, version, and electronic functionalities in use

Task 2. Develop strategy for low-cost data connectivity between ISPs (e.g., WNY R-AHEC) and local practice plans to determine minimum hardware and software requirements.										
Task 3. Gather results from readiness assessments already conducted.										
Task 4. Issue request for applications (RFA) or other action step for readiness assessment and transformation support services.										
Task 5. Select vendor or implement other structure for readiness assessment and transformation support services.										
Task 6. Identify funding model and/or PPS provider incentive model for EHR with the Finance Committee.										
Task 7. Connect PPS providers to MCC enterprise DSRIP solution.										
Task 8. Implement enterprise DSRIP solution and start data exchange.										
Task 9. Implement PPS providers in waves grouped by the partner's ability to connect and integrate into the solution; start with the most able to connect; add others as they establish their capabilities.										
Task 10. Systematically contact PPS providers to provide the recommended enterprise DSRIP solution.										
Task 11. Facilitate QE participation agreements with MCC providers.										
Task 12. Implement and deploy patient record look-up training.										
Task 13. Implement and deploy MCC DSRIP dashboard reporting capabilities. Provide EHR vendor documentation, screenshots, and/or samples of transactions to public health registries. Designate experts at each PCP site for ongoing support.										
Task 14. Implement and deploy alerts. Provide EHR vendor documentation, screenshots, and/or evidence of use of alerts.										
Task 15. Implement and deploy secure Direct messaging. Provide EHR vendor documentation, screenshots, and/or evidence of use of secure Direct messaging.										
Task 16. Continuously add MCC providers when their EHR and data

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
exchange capabilities reach the minimal level required to connect to the MCC EHR and data exchange/HIE.										
Task 17. Maintain list of all PPS safety net providers with secure Direct messaging capabilities who completed training. Report to Physician Performance Sub-Committee.										
Task 18. MCC providers who are not actively exchanging systems will be reviewed by the Physician Performance Sub-Committee. Corrective actions will be implemented for those members found noncompliant.										
Milestone #3 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.										
Task EHR meets Meaningful Use Stage 2 CMS requirements (Note: any/all MU requirements adjusted by CMS will be incorporated into the assessment criteria).										
Task PPS has achieved NCQA 2014 Level 3 PCMH standards and/or APCM.	0	2	5	10	15	27	52	92	200	300
Task 1. Conduct Safety Net MU stage 2 CMS/PCMH level 3 readiness assessment: (a) identify site-specific IT/care management leadership, (b) determine current EHR PCMH/MU certification status, and (c) identify site-specific barriers and risks to implementing a MU/PCMH Level 3 certified EHR system.										
Task 2. Facilitate engagement with MU/PCMH-certified EHR vendors as needed.										
Task 3. Establish PCMH/MU project implementation plan based on primary care practice readiness and certification status.										
Task 4. Review PCMH implementation plan for approval by the Clinical/Quality Committee.										
Task 5. Ensure practices have support through the PCMH implementation process either through a vendor or through MCC PCMH coordinators.										
Task 6. Establish a monthly review and measurement process of implementation progress and report to Clinical/Quality Committee.

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task 7. Modify implementation plan as needed based on monthly review process.										
Task 8. Practices provide MU and PCMH Level 3 certification documentation to the PPS.										
Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task 1. Define IT requirements for initializing/maintaining/communicating risk stratification across settings, including means for electronic interfacing to the participating provider community and key data sharing.										
Task 2. MCC vendor solution will include communication channels to track targeted patients in the database for monitoring blood pressure, cholesterol, smoking status, and cardiovascular medications.										
Task 3. MCC vendor solution will implement and deploy population health management by leveraging data from the data exchange/HIE environments.										
Task 4. Select pilot test sites for Million Hearts implementation of patient engagement registries.										
Task 5. Review Million Hearts program goals and work with PCMH coordinator to get buy-in to implement as a QI program for PCMH accreditation.										
Task 6. Identify criteria required to develop registry and create patient registries.										
Task 7. Work with identified practices on Million Hearts focused clinical criteria on monitoring registries at PCP offices for care coordination outreach (PCMH Standard 4 requirement) and verify engagement.										
Task 8. Report on patient engagement and engaged safety net practices according to project milestone reporting requirements.										
Task 9. Assess continuous improvement by monitoring clinical quality										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
measures (PCMH Standard 6).										
Milestone #5 Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).										
Task PPS has implemented an automated scheduling system to facilitate tobacco control protocols.										
Task PPS provides periodic training to staff to incorporate the use of EHR to prompt the use of 5 A's of tobacco control.										
Task 1. Engage NYS Quitline to ensure that resources are available and referral information can be shared with primary care practice staff for referral of patients to community-based smoking cessation resources.										
Task 2. Develop written training materials, resources, list training dates.										
Task 3. Work with Quitline team to offer primary care practice staff trainings on available Quitline resources.										
Task 4. Work with Quitline team to develop training modules for practices (on available patient engagement resources, telephonic motivational coaching, web-based peer coaching, personalized text messaging, and screening for NRT eligibility).										
Task 5. Promote Opt to Quit™ opt-out policy at practices. Promote integration of Tobacco Use screening workflows (including EHR prompt within practice EHRs to automate completion of 5As of Tobacco control).										
Task 6. Use EHR to build automated referral processes to facilitate coordination of care and transition through Quitline referrals.										
Task 7. Integrate tobacco cessation counseling in PCMH 2014 Level 3 accreditation workflow for managing CVD including assessment and monitoring of tobacco use (PCMH Std 3 includes recording comprehensive health assessment, using data in EB decision support).										
Milestone #6 Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.										
Task Practice has adopted treatment protocols aligned with national										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
guidelines, such as the National Cholesterol Education Program (NCEP) or US Preventive Services Task Force (USPSTF).										
Task 1. Request an American Heart Association (AHA) Spotlight Series Speaker offering CME/CE and grand rounds presentation on topics related to cardiovascular disease in a hospital setting in collaboration with partner PPS organizations (FLPPS and CPWNY).										
Task 2. Define the need to adhere to clinical algorithms in master services agreement (MSA) for all PCPs participating in Domain 3 projects.										
Task 3. Support MCC PCP partners who have signed MSA by educational detailing to make practices aware of the Million Hearts website resources (patient education web, video tools and printed materials, practice management tools, lifestyle management website resources).										
Task 4. Define protocols in EHR at participating PCPs to identify patients in the Million Hearts registry.										
Task 5. Conduct analysis to see if clinical protocols exist and determine if gaps are present.										
Task 6. Plan to close gaps in workflows and protocols to support patients in the Million Hearts registry at participating sites.										
Task 7. To close gaps, support MCC PCP partners by educational detailing for decision support tools and treatment algorithms to assess CVD including clinical treatment algorithms/guideline pocket cards for cholesterol, blood pressure, lifestyle management, and obesity management.										
Task 8. Evaluate the need to offer CME to clinical teams for training related to the use of clinical treatment algorithms to manage blood pressure.										
Task 9. List all training dates and number of staff trained along with training materials provided.										
Task 10. Build MCC partner database to include CBOs with health, wellness, and prevention programs. MCC will document evidence of agreement to allow CBOs to accept warm referrals. Partner database available to all MCC PCP sites and updated on a quarterly basis as new partners are added.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task 11. Begin providing periodic reports of the clinical quality measures for CVD management to the Clinical/Quality Committee. Work with Practitioner Engagement Liaison to track adoption of protocols that are aligned with national guidelines.										
Milestone #7 Develop care coordination teams including use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-management.										
Task Clinically Interoperable System is in place for all participating providers.										
Task Care coordination teams are in place and include nursing staff, pharmacists, dieticians, community health workers, and Health Home care managers where applicable.										
Task Care coordination processes are in place.										
Task 1. MCC PCMH project lead will identify and recruit a project champion at PCP site to assist with EHR integration to MCC HIE and RHIO for building a clinically interoperable system.										
Task 2. MCC PCMH project lead to assist with identifying practice champions at PCP sites to support MHP goals for PCMH Std 4 (care management support). Establish practice level workflows to identify patients in CVD registry, address and record patient goals. Create a list of participating PCP partner sites.										
Task 3. Build training on BP and LDL management protocols to help identified PCP partners develop workflows and treatment protocols for care management. Use AHA-approved protocols and MHP clinical treatment algorithms. List all training dates for offered trainings.										
Task 4. Increase the adoption of standard clinical protocols and treatment plans available for CVD management through MHP.										
Task 5. Provide a list of care coordination resources in the community including community programs such as free or low-cost community wellness classes.										
Task 6. For ongoing care coordination, facilitate a referral process for warm referrals to CBOs (who have signed agreements with MCC) and partners (health home care managers where applicable,										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
pharmacists, dietitians, and community health workers).										
Task 7. MCC to develop a PPS partner database for coordination resources available outside the practice setting (e.g., CDSMP/Stanford model, tobacco cessation classes, Baby and Me Tobacco Free, nutrition counseling, community cooking classes).										
Task 8. MCC PCMH project lead to document workflows to increase referrals to resources such as medication therapy management, dietician referrals, community health workers (and health homes if eligibility requirements are met).										
Task 9. MCC partner database will be disseminated to practice champions. MCC partner database will contain regional categories of partners, provider type and primary contacts for these referral services. Database will be updated as new partners are engaged										
Task 10. MCC Clinical Outreach team will support the PCMH project lead in monitoring and tracking the number and location of primary care practices using the team-based care model for managing cardiovascular disease.										
Task 11. MCC will work with the PCMH project lead to ensure that practices are documenting self management goals in medical record (diet, exercise, medication management, nutrition, etc.).										
Task 12. MCC will collaborate with the RHIO, HEALTHeLINK, to establish a clinically interoperable system for data sharing with participating providers.										
Milestone #8 Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.										
Task All primary care practices in the PPS provide follow-up blood pressure checks without copayment or advanced appointments.	0	0	5	10	15	27	52	92	200	300
Task 1. Work on sustainable strategies with the Health Plans for PCP practice sites to offer blood pressure checks to patients without a copayment or appointment.										
Task 2. Train care coordination team and other non-clinical practice team members in proper blood pressure measurement technique so patients can obtain drop in blood pressure readings.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task 3. Work with each participating PCP site to develop EHR alerts to the site if blood pressure check is overdue.										
Task 4. At each practice, update patient registry with blood pressure check dates recorded. Update patient roster at regular intervals to monitor patients at different practice sites who have received follow up blood pressure checks.										
Task 5. Ask PCP sites to run quarterly reports for patients who have received follow up blood pressure checks										
Milestone #9 Ensure that all staff involved in measuring and recording blood pressure are using correct measurement techniques and equipment.										
Task PPS has protocols in place to ensure blood pressure measurements are taken correctly with the correct equipment.										
Task 1. Practice-wide policy instituted to ensure that practice staff are trained in BP measurement. MCC Clinical Outreach team to build workflow to recheck BP reading and establish future interventions/self management goals if blood pressure above goal.										
Task 2. To track accurate measurement of blood pressure by staff, workflows will be established within the practice to alert team members about patterns of high blood pressure taken by support team.										
Task 3. Offer CME to coordination team members for blood pressure measurement technique, AHA guidelines for BP management, and develop training protocol for BP measurement. List of training dates and staff in attendance for all trainings.										
Milestone #10 Identify patients who have repeated elevated blood pressure readings in the medical record but do not have a diagnosis of hypertension and schedule them for a hypertension visit.										
Task PPS uses a patient stratification system to identify patients who have repeated elevated blood pressure but no diagnosis of hypertension.										
Task PPS has implemented an automated scheduling system to facilitate scheduling of targeted hypertension patients.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task PPS provides periodic training to staff to ensure effective patient identification and hypertension visit scheduling.										
Task 1. Create process to monitor in PPS patient database, targeted registry for patients at PCP offices with elevated BP (SBP >140 mmHg and DBP >90 mmHg) but no diagnosis of hypertension (indicated in the medical record).										
Task 2. Work with PCP champion identified at each practice site on workflows for team to identify, target, and schedule appointment for patients with repeated elevated BP (SBP >140 mmHg and DBP >90 mmHg) but no diagnosis of hypertension is indicated in the medical record.										
Task 3. Offer training to staff to ensure effective patient identification and visit scheduling for documentation of hypertension visit. List all training dates and number of staff trained along with written training materials provided.										
Milestone #11 Prescribe once-daily regimens or fixed-dose combination pills when appropriate.										
Task PPS has protocols in place for determining preferential drugs based on ease of medication adherence where there are no other significant non-differentiating factors.										
Task 1. MCC Clinical Outreach team working with the PCP should ensure that a medical management policy is in place for primary care practice partners.										
Task 2. Get list of PCP offices with signed medical management policy.										
Task 3. Policy should include adoption of workflows on medication adherence/reminders, potential side effects of medication, prescription of medications included in patient covered formulary, fixed dose combination pills or once daily regimen (if possible to promote medication adherence), refill strategy to manage medication refills as necessary.										
Task 4. Run a query using MCC HIE solution for Rx claims data for each PCP site to identify list of PCP offices instituting medical management policy.										
Task 5. Obtain a list of participating PCPs who have not prescribed										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
once-daily regimens or fixed combination therapy for MCC recipients.										
Task 6. Set up appointments at each PCP site to review results on an annual basis. Record all dates for medication review and report annually to the Clinical/Quality Committee.										
Milestone #12 Document patient driven self-management goals in the medical record and review with patients at each visit.										
Task Self-management goals are documented in the clinical record.										
Task PPS provides periodic training to staff on person-centered methods that include documentation of self-management goals.										
Task 1. MCC Clinical Outreach team will help develop web-based training modules on PCMH Stds for PCP partners (non-safety net and safety net PCP). Training module includes documenting patient self-engagement goals and periodic self audit.										
Task 2. Work with MCC Clinical Director to identify PCMH practices seeking PCMH accreditation and interested in adopting Million Hearts as the Quality Improvement program.										
Task 3. Create a list of practices using the Million Hearts program and conduct a needs assessment to determine gaps in each practice for processes, clinical tools and workflows.										
Task 4. Use findings from Needs Assessment to support MCC PCMH lead in implementation of MHP interventions for PCMH Std 4 - Care Management measures. (PCMH Measure 4 Element B includes practice team documenting patient self-management goals in the EHR.)										
Task 5. Monitor PCMH accreditation process and workflows to incorporate MH protocols and processes at determined PCP sites.										
Task 6. Use EHR to establish registries of patients eligible for the MH interventions and monitor documentation required (self-management goals in the medical record) to meet requirements for Patient Engagement Speed.										
Task 7. A list of resources to support the patient's self-management goals should be offered and noted in the medical record. May include referrals for CDSMP/Stanford Model, tobacco cessation

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
resources, nutrition counseling, and community cooking classes.										
Task 8. MCC Clinical Outreach team will periodically facilitate training on motivational interviewing strategies to improve patient self-management.										
Task 9. A list of training dates and staff trained should be maintained by the PPS and reported periodically to the practice engagement team.										
Milestone #13 Follow up with referrals to community based programs to document participation and behavioral and health status changes.										
Task PPS has developed referral and follow-up process and adheres to process.										
Task PPS provides periodic training to staff on warm referral and follow-up process.										
Task Agreements are in place with community-based organizations and process is in place to facilitate feedback to and from community organizations.										
Task 1. MCC will document evidence of agreement with CBOs. Partner database list will be available to MCC PCP sites.										
Task 2. If patient is eligible for health home, MCC clinical outreach team will work with PCP practices on a workflow or warm referrals to health homes.										
Task 3. Maintain a list of MCC PCP sites who have established a process for warm referrals.										
Task 4. Develop process to track referrals made to community-based programs and health homes by MCC PCP practices.										
Task 5. Practices will be provided with an MCC partner database for direct referral for CBO services (for patients who may not be eligible for health home interventions).										
Task 6. Train practices on making warm referrals to health homes and CBOs. Maintain list of training dates for each PCP site.										
Task 7. MCC clinical outreach team will provide written training										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
materials on making warm referrals.										
Task 8. Evaluate and track warm referrals made by each MCC PCP practice to health homes and/or community based organizations every quarter. Review count of referrals made to CBOs to facilitate feedback. Report to Clinical/Quality Committee on count of warm referrals made to CBOs and health homes by PCP practice sites.										
Milestone #14 Develop and implement protocols for home blood pressure monitoring with follow up support.										
Task PPS has developed and implemented protocols for home blood pressure monitoring.										
Task PPS provides follow up to support to patients with ongoing blood pressure monitoring, including equipment evaluation and follow-up if blood pressure results are abnormal.										
Task PPS provides periodic training to staff on warm referral and follow-up process.										
Task 1. Identify which MCOs in the MCC network cover the majority of the attributed members and work with the benefit managers of these plans to promote coverage for validated Self Monitoring of Blood Pressure (SMBP) monitors.										
Task 2. MCC Clinical Outreach team will identify and work with academic detailers to support primary care practice team on securing and using SMBP monitors.										
Task 3. MCC Clinical outreach team to facilitate trainings for PCP team to teach cuff selection, patient positioning, measurement without talking, and accurate blood pressure observation.										
Task 4. Trainings for the practice team on ways to support self monitoring including educating patients about the importance of self monitoring for BP, training patient on using the device, and providing BP logs to the care team.										
Task 5. Development of workflows and policies to support patients on self monitoring of BP at home: during follow up visits, PCP team will review patient SMBP readings, request medication fills, provide summaries of clinic visits.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task 6. MCC clinical outreach team will support staff on referral mechanisms for ongoing patient outreach support and follow up if blood pressure results above goal through periodic recording of self-recorded BP.										
Task 7. Support for the PCP team to include resources for patient referrals to community classes for lifestyle management (CDSMP/Stanford model programs, dietician referrals, Quitline resources, and medication therapy education).										
Task 8. PCP team trainings on protocols to review patient support tools (such as written information or videos on how to self monitor blood pressure, a contact for patients at the practice to call with questions).										
Task 9. Clinical outreach team to support PCP practice staff through training for protocols during follow up visits including reviewing patient SMBP readings, requesting medication fills, providing summaries of clinic visits.										
Task 10. List training dates and number of MCC PCP partners attending training sessions. Record all additional resources provided to trainees including a list of community based classes available through the MCC Partner Database.										
Task 11. Work with MCC vendor solution to build alerts into patient registry for patients diagnosed with high blood pressure but no documentation of recent PCP visit in rolling six-month timeframe.										
Milestone #15 Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.										
Task PPS has implemented an automated scheduling system to facilitate scheduling of targeted hypertension patients.										
Task 1. MCC clinical outreach team schedule training sessions for primary care practice team on workflows to outreach to roster of identified patients who need to schedule a follow up visit.										
Task 2. MCC Clinical outreach team help develop workflows for (a) reminder calls for follow up visit and (b) a system to connect with external MCC care coordination team (community health workers) to engage patients if practice is unsuccessful in telephonic outreach.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task 3. MCC will document list of practices trained on scheduling follow up visit.										
Task 4. Documentation of patients engaged through a follow up visit to manage their hypertension will be recorded in the vendor system.										
Milestone #16 Facilitate referrals to NYS Smoker's Quitline.										
Task PPS has developed referral and follow-up process and adheres to process.										
Task 1. MCC will collaborate with Health Systems Centers for a Tobacco Free WNY (Roswell Park) to assist in creation and adoption of policies and programs to help patients quit using tobacco products.										
Task 2. Maintain a list of MCC PCP sites participating in the Million Hearts program to target for ongoing training on warm referrals.										
Task 3. Facilitate training sessions for MCC primary care practice partners on available NYS Quitline cessation resources.										
Task 4. Implement training at participating MCC PCP sites (on NYS Quitline and cessation services offered through the program). Maintain a list primary care practice sites trained in making warm referrals.										
Task 5. MCC will monitor a list of PCP sites demonstrating evidence of warm referrals to the NYS Quitline.										
Milestone #17 Perform additional actions including "hot spotting" strategies in high risk neighborhoods, linkages to Health Homes for the highest risk population, group visits, and implementation of the Stanford Model for chronic diseases.										
Task If applicable, PPS has Implemented collection of valid and reliable REAL (Race, Ethnicity, and Language) data and uses the data to target high risk populations, develop improvement plans, and address top health disparities.										
Task If applicable, PPS has established linkages to health homes for targeted patient populations.										
Task If applicable, PPS has implemented Stanford Model through partnerships with community-based organizations.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task 1. MCC to implement collection of REAL (Race Ethnicity and Language) data via the EHR vendor systems of MCC PCP partners. REAL data collection is critical for Population Health in 2014 Level 3 PCMH Std and MU Stage 2 core requirement.										
Task 2. Demographic information and REAL data are collected as structured data to be imported into the MCC Population Health management system to target high risk populations.										
Task 3. REAL data collected will be used by MCC in understanding health education needs in "hot spot" areas.										
Task 4. REAL data collection will guide MCC population health program delivery and education through partnering with cultural CBOs in hot spot areas.										
Task 5. REAL data collection will help MCC connect PCP practices to local MCC cultural CBO partners. MCC to maintain documentation of training support including written training materials and training dates along with number of staff trained.										
Task 6. If patient is eligible for health home services, MCC Clinical Outreach Team will work with PCP practices on workflows for warm referrals to Health Homes.										
Task 7. The warm referral to Health Home Case management will leverage information from the RHIO, HEALTHeLINK.										
Task 8. The referral process will secure complete and signed PHI disclosure for referral to Health Home Case management.										
Task 9. Training dates will be recorded along with the number of primary care practice staff and trained in making linkages to health homes for care coordination. All trainings will be reported to the Practice Engagement team.										
Task 10. MCC Partner Database to list all CDSMP/Stanford Model CBO sites.										
Task 11. Community program sites listed by county and region are available through the NY State Health Data. Program training for the Stanford model is available through the New York State Quality and Technical Assistance Center (NYS _QTAC).										
Task 12. For ongoing care coordination, facilitate a referral process for										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
warm referrals to CBOs (who have signed agreements with MCC) to enroll patients in CDSMP/Stanford Model.										
Task 13. MCC will provide training on the referral process and written training materials on available CDSMP resources , program locations, how to explain the program to patients, and how to refer patients to the programs.										
Task 14. MCC will record all training dates and number of staff trained along with written training materials provided to the primary care practice teams. All trainings will be reported to the Practice Engagement team.										
Milestone #18 Adopt strategies from the Million Hearts Campaign.										
Task Provider can demonstrate implementation of policies and procedures which reflect principles and initiatives of Million Hearts Campaign.	0	0	5	10	15	27	52	92	200	300
Task Provider can demonstrate implementation of policies and procedures which reflect principles and initiatives of Million Hearts Campaign.	0	0	0	0	5	10	15	25	75	150
Task Provider can demonstrate implementation of policies and procedures which reflect principles and initiatives of Million Hearts Campaign.	0	0	1	2	4	8	12	20	45	70
Task 1. MCC will identify PCP sites and maintain a list of sites implementing the four main program components of MHP. The MHP initiatives will be used to meet PCMH 2014 level 3 Std 4 (care management of chronic conditions) and Std 6 (Evaluating quality improvement).										
Task 2. PCMH lead will work with sites to create a workflow that includes identification, tracking, and outreach for patients with a diagnosis of hypertension and who have not had a PCP visit within the last six months. PCMH lead will maintain a list of all PCP sites trained in workflow implementation.										
Task 3. Policies and workflows developed will ensure that patients are contacted to confirm appointments and instructed to bring in all their medication for review at their appointment.										
Task 4. Policies will be established to record BP measurement at each PCP visit as well as screen patients for cholesterol and tobacco use according to the MHP.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task 5. The workflow will detail monitoring patients with vascular disease for Aspirin use. Patients at high risk for ASCVD using the risk calculator tool will be treated according to goal based on the established treatment guidelines.										
Task 6. A self management plan will be provided to each patient at the end of each office visit.										
Task 7. Training will be offered to PCP staff on warm transfers to MCC CBOs on customized self management support for lifestyle changes (CDSMP Programs), medication adherence, NYS Quitline, and other resources as needed.										
Task 8. Workflows will detail warm transfer to MCC CBO partners for ongoing MCC CBO support and documentation of referrals made.										
Task 9. Written training materials will also be provided: training to the clinical care coordination team on BP measurement, motivational interviewing strategies, and workflows for warm transfer of patients for ongoing community support.										
Task 10. Training will be provided to MCC partners on accepting a warm transfer from the primary care practices.										
Task 11. All trainings dates and locations will be recorded and a list of trainings dates and written materials provided will be reported to the Practice Engagement Team on an ongoing basis.										
Milestone #19 Form agreements with the Medicaid Managed Care organizations serving the affected population to coordinate services under this project.										
Task PPS has agreement in place with MCO related to coordination of services for high risk populations, including smoking cessation services, hypertension screening, cholesterol screening, and other preventive services relevant to this project.										
Task 1. Assess ability to contract with MCOs for coordination of services (hypertension screening, smoking cessation referral, cholesterol screening and other preventative services) related to CVD management.										
Task 2. Elicit input from MCOs on elements of a multi-year plan to transition to VBP system; present proposed plan (including

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
coordination of services for high-risk populations) to MCOs.										
Task 3. Explain to MCOs the goals for managing high-risk population through collaboration: a) educating providers on MHP components, b) support implementation of MHP to manage patients for Level 3 2014 PCMH accreditation, c) refer patients to MCC CBO partners.										
Task 4. Seek MCOs' revisions and approval of plan to coordinate services under this project. Catalog the main issues and data needs necessary for resolution as a part of the plan approval process.										
Task 5. Establish incentives based on utilization and quality metrics related to managing cardiovascular disease in the affected Medicaid population.										
Task 6. Use the VBP transition plan to guide agenda in monthly MCO meetings.										
Task 7. Obtain signed agreement with MCOs and list dates of signed agreements. Medicaid Managed care metrics and opportunities reported to MCC Board of Manager committees.										
Milestone #20 Engage a majority (at least 80%) of primary care providers in this project.										
Task PPS has engaged at least 80% of their PCPs in this activity.	0	0	5	10	15	27	52	92	200	300
Task 1. Design project goals, interventions, metrics, and reporting measures; work with PCMH coordinator to implement these interventions as a part of the QI standards (Standard 6) required for Level 3 PCMH certification.										
Task 2. Create a list of providers engaged in PCMH accreditation using the Million Hearts Quality Improvement Program.										
Task 3. Assess percentage of providers engaged using the Million Hearts/Cardiovascular disease management as a QI project for Level 3 PCMH certification.										
Task 4. Work with Clinical Outreach team and PCMH practice engagement coordinator to implement MH interventions and record staff trainings. Provide MCC Partner database of community resources as a continued resource.

Task 5. Establish quarterly touch points to PCP to communicate with providers on a) Performance measures related to the MHP, b) ongoing management as a QI program for Standard 6 Level 3 PCMH accreditation, and c) referral of patients to community resources.										
Task 6. Determine number of MCC PCP sites engaged in Million Hearts and conduct annual reviews to identify new PCP sites for ongoing support/outreach/training until 80 % of PCPs are engaged.										

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #1 Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.										
Task PPS has implemented program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.										
Task 1. Develop comprehensive MCC partner database for MCC partners included in the management of CVD. Partner database will categorize partners by provider type (including ambulatory care or community care partner) and demonstrate changes to the network list.										
Task 2. Collect appropriate clinical tools necessary for the different goals of the Million Hearts Program (MHP): blood pressure guidelines, cholesterol management guidelines, and the tools for smoking cessation.										
Task 3. Disseminate written evidence-based treatment protocols for managing CVD using the techniques and resources provided on the Million Hearts Campaign program website.										
Task 4. Define priority target population, and develop a framework for patient database to include risk stratified registries and blood pressure measurements.										
Task 5. Identify pilot PCP sites to implement MHP.										
Task 6. Meet with each practice site on identified list.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 7. List all PCP sites that plan on using Million Hearts registries and work on process flows at each PCP site to manage CVD population using Million Hearts criteria.										
Task 8. Develop process and identify vendor for patient registry/database development. Vendor to interface with data points available through the regional RHIO (HEALTHeLINK) to integrate information from disparate EHRs from primary care offices.										
Task 9. Pilot test patient database to integrate EHR data points from a variety of Primary Care offices relevant to risk stratification, blood pressure, and cardiovascular medications.										
Task 10. Track and monitor patient engagement at each PCP practice site and build quarterly performance metrics related to the four program areas in Million Hearts to verify continuous improvement.										
Task 11. Begin reporting on implementation of project requirements quarterly according to project milestone reporting requirements.										
Milestone #2 Ensure that all PPS safety net providers are actively connected to EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the end of DY 3.										
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	100	126	126	126	126	126	126	126	126	126
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	35	43	43	43	43	43	43	43	43	43
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	65	70	70	70	70	70	70	70	70	70
Task PPS uses alerts and secure messaging functionality.										
Task 1. Conduct gap analysis to determine which providers have already completed PCMH/MU or other connectivity readiness assessment. Include the following questions: Is the practice/providers/patients currently connected to the HIE? If not, is an agreement in place? If so, what is the scope of the connectivity (% of providers; % of										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
patients)? Does EHR meet connectivity requirements of RHIO/SHIN-NY? Name of EHR, version, and electronic functionalities in use										
Task 2. Develop strategy for low-cost data connectivity between ISPs (e.g., WNY R-AHEC) and local practice plans to determine minimum hardware and software requirements.										
Task 3. Gather results from readiness assessments already conducted.										
Task 4. Issue request for applications (RFA) or other action step for readiness assessment and transformation support services.										
Task 5. Select vendor or implement other structure for readiness assessment and transformation support services.										
Task 6. Identify funding model and/or PPS provider incentive model for EHR with the Finance Committee.										
Task 7. Connect PPS providers to MCC enterprise DSRIP solution.										
Task 8. Implement enterprise DSRIP solution and start data exchange.										
Task 9. Implement PPS providers in waves grouped by the partner's ability to connect and integrate into the solution; start with the most able to connect; add others as they establish their capabilities.										
Task 10. Systematically contact PPS providers to provide the recommended enterprise DSRIP solution.										
Task 11. Facilitate QE participation agreements with MCC providers.										
Task 12. Implement and deploy patient record look-up training.										
Task 13. Implement and deploy MCC DSRIP dashboard reporting capabilities. Provide EHR vendor documentation, screenshots, and/or samples of transactions to public health registries. Designate experts at each PCP site for ongoing support.										
Task 14. Implement and deploy alerts. Provide EHR vendor documentation, screenshots, and/or evidence of use of alerts.										
Task 15. Implement and deploy secure Direct messaging. Provide EHR vendor documentation, screenshots, and/or evidence of use										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
of secure Direct messaging.										
Task 16. Continuously add MCC providers when their EHR and data exchange capabilities reach the minimal level required to connect to the MCC EHR and data exchange/HIE.										
Task 17. Maintain list of all PPS safety net providers with secure Direct messaging capabilities who completed training. Report to Physician Performance Sub-Committee.										
Task 18. MCC providers who are not actively exchanging systems will be reviewed by the Physician Performance Sub-Committee. Corrective actions will be implemented for those members found noncompliant.										
Milestone #3 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.										
Task EHR meets Meaningful Use Stage 2 CMS requirements (Note: any/all MU requirements adjusted by CMS will be incorporated into the assessment criteria).										
Task PPS has achieved NCQA 2014 Level 3 PCMH standards and/or APCM.	450	600	600	600	600	600	600	600	600	600
Task 1. Conduct Safety Net MU stage 2 CMS/PCMH level 3 readiness assessment: (a) identify site-specific IT/care management leadership, (b) determine current EHR PCMH/MU certification status, and (c) identify site-specific barriers and risks to implementing a MU/PCMH Level 3 certified EHR system.										
Task 2. Facilitate engagement with MU/PCMH-certified EHR vendors as needed.										
Task 3. Establish PCMH/MU project implementation plan based on primary care practice readiness and certification status.										
Task 4. Review PCMH implementation plan for approval by the Clinical/Quality Committee.										
Task 5. Ensure practices have support through the PCMH implementation process either through a vendor or through MCC PCMH coordinators.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 6. Establish a monthly review and measurement process of implementation progress and report to Clinical/Quality Committee.										
Task 7. Modify implementation plan as needed based on monthly review process.										
Task 8. Practices provide MU and PCMH Level 3 certification documentation to the PPS.										
Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task 1. Define IT requirements for initializing/maintaining/communicating risk stratification across settings, including means for electronic interfacing to the participating provider community and key data sharing.										
Task 2. MCC vendor solution will include communication channels to track targeted patients in the database for monitoring blood pressure, cholesterol, smoking status, and cardiovascular medications.										
Task 3. MCC vendor solution will implement and deploy population health management by leveraging data from the data exchange/HIE environments.										
Task 4. Select pilot test sites for Million Hearts implementation of patient engagement registries.										
Task 5. Review Million Hearts program goals and work with PCMH coordinator to get buy-in to implement as a QI program for PCMH accreditation.										
Task 6. Identify criteria required to develop registry and create patient registries.										
Task 7. Work with identified practices on Million Hearts focused clinical criteria on monitoring registries at PCP offices for care coordination outreach (PCMH Standard 4 requirement) and verify engagement.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 8. Report on patient engagement and engaged safety net practices according to project milestone reporting requirements.										
Task 9. Assess continuous improvement by monitoring clinical quality measures (PCMH Standard 6).										
Milestone #5 Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).										
Task PPS has implemented an automated scheduling system to facilitate tobacco control protocols.										
Task PPS provides periodic training to staff to incorporate the use of EHR to prompt the use of 5 A's of tobacco control.										
Task 1. Engage NYS Quitline to ensure that resources are available and referral information can be shared with primary care practice staff for referral of patients to community-based smoking cessation resources.										
Task 2. Develop written training materials, resources, list training dates.										
Task 3. Work with Quitline team to offer primary care practice staff trainings on available Quitline resources.										
Task 4. Work with Quitline team to develop training modules for practices (on available patient engagement resources, telephonic motivational coaching, web-based peer coaching, personalized text messaging, and screening for NRT eligibility).										
Task 5. Promote Opt to Quit™ opt-out policy at practices. Promote integration of Tobacco Use screening workflows (including EHR prompt within practice EHRs to automate completion of 5As of Tobacco control).										
Task 6. Use EHR to build automated referral processes to facilitate coordination of care and transition through Quitline referrals.										
Task 7. Integrate tobacco cessation counseling in PCMH 2014 Level 3 accreditation workflow for managing CVD including assessment and monitoring of tobacco use (PCMH Std 3 includes recording comprehensive health assessment, using data in EB decision support).										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #6 Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.										
Task Practice has adopted treatment protocols aligned with national guidelines, such as the National Cholesterol Education Program (NCEP) or US Preventive Services Task Force (USPSTF).										
Task 1. Request an American Heart Association (AHA) Spotlight Series Speaker offering CME/CE and grand rounds presentation on topics related to cardiovascular disease in a hospital setting in collaboration with partner PPS organizations (FLPPS and CPWNY).										
Task 2. Define the need to adhere to clinical algorithms in master services agreement (MSA) for all PCPs participating in Domain 3 projects.										
Task 3. Support MCC PCP partners who have signed MSA by educational detailing to make practices aware of the Million Hearts website resources (patient education web, video tools and printed materials, practice management tools, lifestyle management website resources).										
Task 4. Define protocols in EHR at participating PCPs to identify patients in the Million Hearts registry.										
Task 5. Conduct analysis to see if clinical protocols exist and determine if gaps are present.										
Task 6. Plan to close gaps in workflows and protocols to support patients in the Million Hearts registry at participating sites.										
Task 7. To close gaps, support MCC PCP partners by educational detailing for decision support tools and treatment algorithms to assess CVD including clinical treatment algorithms/guideline pocket cards for cholesterol, blood pressure, lifestyle management, and obesity management.										
Task 8. Evaluate the need to offer CME to clinical teams for training related to the use of clinical treatment algorithms to manage blood pressure.										
Task 9. List all training dates and number of staff trained along with training materials provided.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 10. Build MCC partner database to include CBOs with health, wellness, and prevention programs. MCC will document evidence of agreement to allow CBOs to accept warm referrals. Partner database available to all MCC PCP sites and updated on a quarterly basis as new partners are added.										
Task 11. Begin providing periodic reports of the clinical quality measures for CVD management to the Clinical/Quality Committee. Work with Practitioner Engagement Liaison to track adoption of protocols that are aligned with national guidelines.										
Milestone #7 Develop care coordination teams including use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-management.										
Task Clinically Interoperable System is in place for all participating providers.										
Task Care coordination teams are in place and include nursing staff, pharmacists, dieticians, community health workers, and Health Home care managers where applicable.										
Task Care coordination processes are in place.										
Task 1. MCC PCMH project lead will identify and recruit a project champion at PCP site to assist with EHR integration to MCC HIE and RHIO for building a clinically interoperable system.										
Task 2. MCC PCMH project lead to assist with identifying practice champions at PCP sites to support MHP goals for PCMH Std 4 (care management support). Establish practice level workflows to identify patients in CVD registry, address and record patient goals. Create a list of participating PCP partner sites.										
Task 3. Build training on BP and LDL management protocols to help identified PCP partners develop workflows and treatment protocols for care management. Use AHA-approved protocols and MHP clinical treatment algorithms. List all training dates for offered trainings.										
Task 4. Increase the adoption of standard clinical protocols and treatment plans available for CVD management through MHP.										
Task 5. Provide a list of care coordination resources in the community										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
including community programs such as free or low-cost community wellness classes.										
Task 6. For ongoing care coordination, facilitate a referral process for warm referrals to CBOs (who have signed agreements with MCC) and partners (health home care managers where applicable, pharmacists, dietitians, and community health workers).										
Task 7. MCC to develop a PPS partner database for coordination resources available outside the practice setting (e.g., CDSMP/Stanford model, tobacco cessation classes, Baby and Me Tobacco Free, nutrition counseling, community cooking classes).										
Task 8. MCC PCMH project lead to document workflows to increase referrals to resources such as medication therapy management, dietician referrals, community health workers (and health homes if eligibility requirements are met).										
Task 9. MCC partner database will be disseminated to practice champions. MCC partner database will contain regional categories of partners, provider type and primary contacts for these referral services. Database will be updated as new partners are engaged										
Task 10. MCC Clinical Outreach team will support the PCMH project lead in monitoring and tracking the number and location of primary care practices using the team-based care model for managing cardiovascular disease.										
Task 11. MCC will work with the PCMH project lead to ensure that practices are documenting self management goals in medical record (diet, exercise, medication management, nutrition, etc.).										
Task 12. MCC will collaborate with the RHIO, HEALTHeLINK, to establish a clinically interoperable system for data sharing with participating providers.										
Milestone #8 Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.										
Task All primary care practices in the PPS provide follow-up blood pressure checks without copayment or advanced appointments.	450	600	600	600	600	600	600	600	600	600
Task 1. Work on sustainable strategies with the Health Plans for PCP practice sites to offer blood pressure checks to patients without a

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
copayment or appointment.										
Task 2. Train care coordination team and other non-clinical practice team members in proper blood pressure measurement technique so patients can obtain drop in blood pressure readings.										
Task 3. Work with each participating PCP site to develop EHR alerts to the site if blood pressure check is overdue.										
Task 4. At each practice, update patient registry with blood pressure check dates recorded. Update patient roster at regular intervals to monitor patients at different practice sites who have received follow up blood pressure checks.										
Task 5. Ask PCP sites to run quarterly reports for patients who have received follow up blood pressure checks										
Milestone #9 Ensure that all staff involved in measuring and recording blood pressure are using correct measurement techniques and equipment.										
Task PPS has protocols in place to ensure blood pressure measurements are taken correctly with the correct equipment.										
Task 1. Practice-wide policy instituted to ensure that practice staff are trained in BP measurement. MCC Clinical Outreach team to build workflow to recheck BP reading and establish future interventions/self management goals if blood pressure above goal.										
Task 2. To track accurate measurement of blood pressure by staff, workflows will be established within the practice to alert team members about patterns of high blood pressure taken by support team.										
Task 3. Offer CME to coordination team members for blood pressure measurement technique, AHA guidelines for BP management, and develop training protocol for BP measurement. List of training dates and staff in attendance for all trainings.										
Milestone #10 Identify patients who have repeated elevated blood pressure readings in the medical record but do not have a diagnosis of hypertension and schedule them for a hypertension visit.										
Task PPS uses a patient stratification system to identify patients who

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
have repeated elevated blood pressure but no diagnosis of hypertension.										
Task PPS has implemented an automated scheduling system to facilitate scheduling of targeted hypertension patients.										
Task PPS provides periodic training to staff to ensure effective patient identification and hypertension visit scheduling.										
Task 1. Create process to monitor in PPS patient database, targeted registry for patients at PCP offices with elevated BP (SBP >140 mmHg and DBP >90 mmHg) but no diagnosis of hypertension (indicated in the medical record).										
Task 2. Work with PCP champion identified at each practice site on workflows for team to identify, target, and schedule appointment for patients with repeated elevated BP (SBP >140 mmHg and DBP >90 mmHg) but no diagnosis of hypertension is indicated in the medical record.										
Task 3. Offer training to staff to ensure effective patient identification and visit scheduling for documentation of hypertension visit. List all training dates and number of staff trained along with written training materials provided.										
Milestone #11 Prescribe once-daily regimens or fixed-dose combination pills when appropriate.										
Task PPS has protocols in place for determining preferential drugs based on ease of medication adherence where there are no other significant non-differentiating factors.										
Task 1. MCC Clinical Outreach team working with the PCP should ensure that a medical management policy is in place for primary care practice partners.										
Task 2. Get list of PCP offices with signed medical management policy.										
Task 3. Policy should include adoption of workflows on medication adherence/reminders, potential side effects of medication, prescription of medications included in patient covered formulary, fixed dose combination pills or once daily regimen (if possible to promote medication adherence), refill strategy to manage medication refills as necessary.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 4. Run a query using MCC HIE solution for Rx claims data for each PCP site to identify list of PCP offices instituting medical management policy.										
Task 5. Obtain a list of participating PCPs who have not prescribed once-daily regimens or fixed combination therapy for MCC recipients.										
Task 6. Set up appointments at each PCP site to review results on an annual basis. Record all dates for medication review and report annually to the Clinical/Quality Committee.										
Milestone #12 Document patient driven self-management goals in the medical record and review with patients at each visit.										
Task Self-management goals are documented in the clinical record.										
Task PPS provides periodic training to staff on person-centered methods that include documentation of self-management goals.										
Task 1. MCC Clinical Outreach team will help develop web-based training modules on PCMH Stds for PCP partners (non-safety net and safety net PCP). Training module includes documenting patient self-engagement goals and periodic self audit.										
Task 2. Work with MCC Clinical Director to identify PCMH practices seeking PCMH accreditation and interested in adopting Million Hearts as the Quality Improvement program.										
Task 3. Create a list of practices using the Million Hearts program and conduct a needs assessment to determine gaps in each practice for processes, clinical tools and workflows.										
Task 4. Use findings from Needs Assessment to support MCC PCMH lead in implementation of MHP interventions for PCMH Std 4 - Care Management measures. (PCMH Measure 4 Element B includes practice team documenting patient self-management goals in the EHR.)										
Task 5. Monitor PCMH accreditation process and workflows to incorporate MH protocols and processes at determined PCP sites.										
Task 6. Use EHR to establish registries of patients eligible for the MH interventions and monitor documentation required (self-

management goals in the medical record) to meet requirements for Patient Engagement Speed.										
Task 7. A list of resources to support the patient's self-management goals should be offered and noted in the medical record. May include referrals for CDSMP/Stanford Model, tobacco cessation resources, nutrition counseling, and community cooking classes.										
Task 8. MCC Clinical Outreach team will periodically facilitate training on motivational interviewing strategies to improve patient self-management.										
Task 9. A list of training dates and staff trained should be maintained by the PPS and reported periodically to the practice engagement team.										
Milestone #13 Follow up with referrals to community based programs to document participation and behavioral and health status changes.										
Task PPS has developed referral and follow-up process and adheres to process.										
Task PPS provides periodic training to staff on warm referral and follow-up process.										
Task Agreements are in place with community-based organizations and process is in place to facilitate feedback to and from community organizations.										
Task 1. MCC will document evidence of agreement with CBOs. Partner database list will be available to MCC PCP sites.										
Task 2. If patient is eligible for health home, MCC clinical outreach team will work with PCP practices on a workflow or warm referrals to health homes.										
Task 3. Maintain a list of MCC PCP sites who have established a process for warm referrals.										
Task 4. Develop process to track referrals made to community-based programs and health homes by MCC PCP practices.										
Task 5. Practices will be provided with an MCC partner database for direct referral for CBO services (for patients who may not be eligible for health home interventions).										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Task 6. Train practices on making warm referrals to health homes and CBOs. Maintain list of training dates for each PCP site.										
Task 7. MCC clinical outreach team will provide written training materials on making warm referrals.										
Task 8. Evaluate and track warm referrals made by each MCC PCP practice to health homes and/or community based organizations every quarter. Review count of referrals made to CBOs to facilitate feedback. Report to Clinical/Quality Committee on count of warm referrals made to CBOs and health homes by PCP practice sites.										
Milestone #14 Develop and implement protocols for home blood pressure monitoring with follow up support.										
Task PPS has developed and implemented protocols for home blood pressure monitoring.										
Task PPS provides follow up to support to patients with ongoing blood pressure monitoring, including equipment evaluation and follow-up if blood pressure results are abnormal.										
Task PPS provides periodic training to staff on warm referral and follow-up process.										
Task 1. Identify which MCOs in the MCC network cover the majority of the attributed members and work with the benefit managers of these plans to promote coverage for validated Self Monitoring of Blood Pressure (SMBP) monitors.										
Task 2. MCC Clinical Outreach team will identify and work with academic detailers to support primary care practice team on securing and using SMBP monitors.										
Task 3. MCC Clinical outreach team to facilitate trainings for PCP team to teach cuff selection, patient positioning, measurement without talking, and accurate blood pressure observation.										
Task 4. Trainings for the practice team on ways to support self monitoring including educating patients about the importance of self monitoring for BP, training patient on using the device, and providing BP logs to the care team.										
Task 5. Development of workflows and policies to support patients on										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
self monitoring of BP at home: during follow up visits, PCP team will review patient SMBP readings, request medication fills, provide summaries of clinic visits.										
Task 6. MCC clinical outreach team will support staff on referral mechanisms for ongoing patient outreach support and follow up if blood pressure results above goal through periodic recording of self-recorded BP.										
Task 7. Support for the PCP team to include resources for patient referrals to community classes for lifestyle management (CDSMP/Stanford model programs, dietician referrals, Quitline resources, and medication therapy education).										
Task 8. PCP team trainings on protocols to review patient support tools (such as written information or videos on how to self monitor blood pressure, a contact for patients at the practice to call with questions).										
Task 9. Clinical outreach team to support PCP practice staff through training for protocols during follow up visits including reviewing patient SMBP readings, requesting medication fills, providing summaries of clinic visits.										
Task 10. List training dates and number of MCC PCP partners attending training sessions. Record all additional resources provided to trainees including a list of community based classes available through the MCC Partner Database.										
Task 11. Work with MCC vendor solution to build alerts into patient registry for patients diagnosed with high blood pressure but no documentation of recent PCP visit in rolling six-month timeframe.										
Milestone #15 Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.										
Task PPS has implemented an automated scheduling system to facilitate scheduling of targeted hypertension patients.										
Task 1. MCC clinical outreach team schedule training sessions for primary care practice team on workflows to outreach to roster of identified patients who need to schedule a follow up visit.										
Task 2. MCC Clinical outreach team help develop workflows for (a) reminder calls for follow up visit and (b) a system to connect with external MCC care coordination team (community health

workers) to engage patients if practice is unsuccessful in telephonic outreach.										
Task 3. MCC will document list of practices trained on scheduling follow up visit.										
Task 4. Documentation of patients engaged through a follow up visit to manage their hypertension will be recorded in the vendor system.										
Milestone #16 Facilitate referrals to NYS Smoker's Quitline.										
Task PPS has developed referral and follow-up process and adheres to process.										
Task 1. MCC will collaborate with Health Systems Centers for a Tobacco Free WNY (Roswell Park) to assist in creation and adoption of policies and programs to help patients quit using tobacco products.										
Task 2. Maintain a list of MCC PCP sites participating in the Million Hearts program to target for ongoing training on warm referrals.										
Task 3. Facilitate training sessions for MCC primary care practice partners on available NYS Quitline cessation resources.										
Task 4. Implement training at participating MCC PCP sites (on NYS Quitline and cessation services offered through the program). Maintain a list primary care practice sites trained in making warm referrals.										
Task 5. MCC will monitor a list of PCP sites demonstrating evidence of warm referrals to the NYS Quitline.										
Milestone #17 Perform additional actions including "hot spotting" strategies in high risk neighborhoods, linkages to Health Homes for the highest risk population, group visits, and implementation of the Stanford Model for chronic diseases.										
Task If applicable, PPS has Implemented collection of valid and reliable REAL (Race, Ethnicity, and Language) data and uses the data to target high risk populations, develop improvement plans, and address top health disparities.										
Task If applicable, PPS has established linkages to health homes for targeted patient populations.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task If applicable, PPS has implemented Stanford Model through partnerships with community-based organizations.										
Task 1. MCC to implement collection of REAL (Race Ethnicity and Language) data via the EHR vendor systems of MCC PCP partners. REAL data collection is critical for Population Health in 2014 Level 3 PCMH Std and MU Stage 2 core requirement.										
Task 2. Demographic information and REAL data are collected as structured data to be imported into the MCC Population Health management system to target high risk populations.										
Task 3. REAL data collected will be used by MCC in understanding health education needs in "hot spot" areas.										
Task 4. REAL data collection will guide MCC population health program delivery and education through partnering with cultural CBOs in hot spot areas.										
Task 5. REAL data collection will help MCC connect PCP practices to local MCC cultural CBO partners. MCC to maintain documentation of training support including written training materials and training dates along with number of staff trained.										
Task 6. If patient is eligible for health home services, MCC Clinical Outreach Team will work with PCP practices on workflows for warm referrals to Health Homes.										
Task 7. The warm referral to Health Home Case management will leverage information from the RHIO, HEALTHeLINK.										
Task 8. The referral process will secure complete and signed PHI disclosure for referral to Health Home Case management.										
Task 9. Training dates will be recorded along with the number of primary care practice staff and trained in making linkages to health homes for care coordination. All trainings will be reported to the Practice Engagement team.										
Task 10. MCC Partner Database to list all CDSMP/Stanford Model CBO sites.										
Task 11. Community program sites listed by county and region are available through the NY State Health Data. Program training for the Stanford model is available through the New York State

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Quality and Technical Assistance Center (NYS _QTAC).										
Task 12. For ongoing care coordination, facilitate a referral process for warm referrals to CBOs (who have signed agreements with MCC) to enroll patients in CDSMP/Stanford Model.										
Task 13. MCC will provide training on the referral process and written training materials on available CDSMP resources , program locations, how to explain the program to patients, and how to refer patients to the programs.										
Task 14. MCC will record all training dates and number of staff trained along with written training materials provided to the primary care practice teams. All trainings will be reported to the Practice Engagement team.										
Milestone #18 Adopt strategies from the Million Hearts Campaign.										
Task Provider can demonstrate implementation of policies and procedures which reflect principles and initiatives of Million Hearts Campaign.	450	600	600	600	600	600	600	600	600	600
Task Provider can demonstrate implementation of policies and procedures which reflect principles and initiatives of Million Hearts Campaign.	300	415	415	415	415	415	415	415	415	415
Task Provider can demonstrate implementation of policies and procedures which reflect principles and initiatives of Million Hearts Campaign.	100	165	165	165	165	165	165	165	165	165
Task 1. MCC will identify PCP sites and maintain a list of sites implementing the four main program components of MHP. The MHP initiatives will be used to meet PCMH 2014 level 3 Std 4 (care management of chronic conditions) and Std 6 (Evaluating quality improvement).										
Task 2. PCMH lead will work with sites to create a workflow that includes identification, tracking, and outreach for patients with a diagnosis of hypertension and who have not had a PCP visit within the last six months. PCMH lead will maintain a list of all PCP sites trained in workflow implementation.										
Task 3. Policies and workflows developed will ensure that patients are contacted to confirm appointments and instructed to bring in all their medication for review at their appointment.										

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task 4. Policies will be established to record BP measurement at each PCP visit as well as screen patients for cholesterol and tobacco use according to the MHP.										
Task 5. The workflow will detail monitoring patients with vascular disease for Aspirin use. Patients at high risk for ASCVD using the risk calculator tool will be treated according to goal based on the established treatment guidelines.										
Task 6. A self management plan will be provided to each patient at the end of each office visit.										
Task 7. Training will be offered to PCP staff on warm transfers to MCC CBOs on customized self management support for lifestyle changes (CDSMP Programs), medication adherence, NYS Quitline, and other resources as needed.										
Task 8. Workflows will detail warm transfer to MCC CBO partners for ongoing MCC CBO support and documentation of referrals made.										
Task 9. Written training materials will also be provided: training to the clinical care coordination team on BP measurement, motivational interviewing strategies, and workflows for warm transfer of patients for ongoing community support.										
Task 10. Training will be provided to MCC partners on accepting a warm transfer from the primary care practices.										
Task 11. All trainings dates and locations will be recorded and a list of trainings dates and written materials provided will be reported to the Practice Engagement Team on an ongoing basis.										
Milestone #19 Form agreements with the Medicaid Managed Care organizations serving the affected population to coordinate services under this project.										
Task PPS has agreement in place with MCO related to coordination of services for high risk populations, including smoking cessation services, hypertension screening, cholesterol screening, and other preventive services relevant to this project.										
Task 1. Assess ability to contract with MCOs for coordination of services (hypertension screening, smoking cessation referral, cholesterol screening and other preventative services) related to

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
CVD management.										
Task 2. Elicit input from MCOs on elements of a multi-year plan to transition to VBP system; present proposed plan (including coordination of services for high-risk populations) to MCOs.										
Task 3. Explain to MCOs the goals for managing high-risk population through collaboration: a) educating providers on MHP components, b) support implementation of MHP to manage patients for Level 3 2014 PCMH accreditation, c) refer patients to MCC CBO partners.										
Task 4. Seek MCOs' revisions and approval of plan to coordinate services under this project. Catalog the main issues and data needs necessary for resolution as a part of the plan approval process.										
Task 5. Establish incentives based on utilization and quality metrics related to managing cardiovascular disease in the affected Medicaid population.										
Task 6. Use the VBP transition plan to guide agenda in monthly MCO meetings.										
Task 7. Obtain signed agreement with MCOs and list dates of signed agreements. Medicaid Managed care metrics and opportunities reported to MCC Board of Manager committees.										
Milestone #20 Engage a majority (at least 80%) of primary care providers in this project.										
Task PPS has engaged at least 80% of their PCPs in this activity.	450	600	600	600	600	600	600	600	600	600
Task 1. Design project goals, interventions, metrics, and reporting measures; work with PCMH coordinator to implement these interventions as a part of the QI standards (Standard 6) required for Level 3 PCMH certification.										
Task 2. Create a list of providers engaged in PCMH accreditation using the Million Hearts Quality Improvement Program.										
Task 3. Assess percentage of providers engaged using the Million Hearts/Cardiovascular disease management as a QI project for Level 3 PCMH certification.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.	Tasks #1-2 are progressing as expected with the development of MCC partner database and collection of clinical tools for the Million Hearts Program. Tasks #4-5 are progressing with identifying pilot sites and defining the priority target population criteria.
Ensure that all PPS safety net providers are actively connected to EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the end of DY 3.	Tasks #1-4 are in progress and will follow the timeline established for the 2ai IDS project.
Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.	Task #1 (Safety Net MU stage 2 CMS/PCMH level 3 readiness assessment) will follow timeline established for the 2ai IDS project.
Use EHRs or other technical platforms to track all patients engaged in this project.	EHR platforms are supporting the tracking of patients for actively engaged reporting.
Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).	NYS Quitline has been engaged in this project per task #1.

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.	MCC is currently defining clinical algorithms and treatment guidelines which will be outlined in a master participation agreement (MPA) per task #2. MCC is collaborating with NYS Quality Technical Assistance Center to identify and support CBOs delivering health and wellness programs/CDSMP per task #10.
Develop care coordination teams including use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-management.	Task #7 is in progress with identification of care coordination resources outside the practice setting. Task #12 is in progress and will be implemented as outlined in the 2ai IDS project.
Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.	Milestone start has been phased to a later date as Master Participation Agreements with pilot sites and agreements with Managed Care Organizations are being finalized.
Ensure that all staff involved in measuring and recording blood pressure are using correct measurement techniques and equipment.	The status of this milestone changed due to previous limitations to the MAPP.
Identify patients who have repeated elevated blood pressure readings in the medical record but do not have a diagnosis of hypertension and schedule them for a hypertension visit.	
Prescribe once-daily regimens or fixed-dose combination pills when appropriate.	
Document patient driven self-management goals in the medical record and review with patients at each visit.	
Follow up with referrals to community based programs to document participation and behavioral and health status changes.	
Develop and implement protocols for home blood pressure monitoring with follow up support.	
Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.	
Facilitate referrals to NYS Smoker's Quitline.	
Perform additional actions including "hot spotting" strategies in high risk neighborhoods, linkages to Health Homes for the highest risk population, group visits, and implementation of the Stanford Model for chronic diseases.	Tasks #10-11 are in progress to identify CBOs using the Stanford Model.
Adopt strategies from the Million Hearts Campaign.	
Form agreements with the Medicaid Managed Care organizations serving the affected population to coordinate services under this project.	Collaboration with MCOs to support Million Hearts goals in progress.
Engage a majority (at least 80%) of primary care providers in this project.

Millennium Collaborative Care (PPS ID:48)

IPQR Module 3.b.i.5 - IA Monitoring

Instructions :

Millennium Collaborative Care (PPS ID:48)

Project 3.f.i – Increase support programs for maternal & child health (including high risk pregnancies) (Example: Nurse-Family Partnership)

IPQR Module 3.f.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Patient hand-off not always consistent or effective between varying levels of care. Establish clearly defined care transition with training available. Ensure information transfer includes the timely exchange of patient data among all stakeholders.

The lack of centralized information on the status of clients could lead to service duplication or gaps. The MCC IT program will provide for the use of standardized care coordination software to be utilized across DSRIP projects. Selection criteria for this software include ease of use (so as to minimize the amount of time it takes to train a cross-section of workers) and interoperability (improving its applicability to practices). Project timeliness will require a short-term electronic solution that will be developed to track and report on the status of clients. An interim solution is essential since it will pave the way for the use of standard workflows that will be a crucial part of utilizing the software. Participation in the Maternal and Child Health (MCH) project by community-based organizations and other entities will be predicated on their willingness to utilize the prescribed software.

Failure to consistently deploy evidence based techniques associated with MCH (e.g., Healthy Families) will lead to poor outcomes that fall short of targeted metrics. Project team will reach out to regional MCH experts to seek their input on the use of a set of evidence-based techniques that will guide operation of the project both administratively and in the field. Project team members will receive training on evidence-based standards initially and throughout the duration of the project.

Insufficient pool of community health workers (CHWs) to support MCH programs due to large geographical and culturally diverse regions of WNY. Implement strategies identified in MCC's Workforce Strategy Roadmap to recruit CHWs from urban and rural communities throughout WNY that comprise diverse racial and ethnic compositions. Tap the expertise of existing agencies that have a proven track record for training and retaining CHWs in target key geographical areas, including the ability to host training at locations throughout WNY.

State funding for current programs proposed will be pooled in "maternal and infant health block grants" in 2015 NYS budget. Continue to lobby the state to maintain current funding methodologies for MCH programs.

Failure to provide third-party payer reimbursement for MCH CHW services will not sustain the program after the waiver period. Rank value-based payments (VBP) for MCH project as a priority in MCC's VBP Transition plan. As part of this plan, work with local payers to create reimbursement methodologies to support the outreach services provided by CHWs.

MCC and Community Partners of WNY (led by Catholic Medical Partners) will both implement project 3.f.i., utilizing different models (CHW vs. nurse/family partnership). Cooperation in the form of mutual referrals will be necessary to provide comprehensive support across the whole region and ensure patients are matched up with the most appropriate services. If providers are reluctant to refer patients out of network, the effectiveness of the programs could be reduced. To create a seamless transition for patients, MCC will work with our partnering PPSs to standardize processes,

tracking mechanisms, and reporting tools while maintaining common messaging to educate/communicate with patients. MCC will work collaboratively with WNY PPSs to expand the scope and expertise of the Regional Perinatal Center and the Regional Perinatal Outreach grant.

IPQR Module 3.f.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Patient Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q3 should include patients previously reported in DY1 Q2 plus new patients engaged in DY1 Q3. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks

Milestone #1 Implement an evidence-based home visitation model, such as the Nurse Family Partnership, for pregnant high- risk mothers including high-risk first time mothers.										
Task PPS has developed a project plan that includes a timeline for implementation of an evidence-based home visiting model, such as Nurse-Family Partnership visitation model, for this population.										
Milestone #2 Develop a referral system for early identification of women who are or may be at high-risk.										
Task PPS has developed a referral system for early identification of women who are or may be at high-risk.										
Milestone #3 Establish a quality oversight committee of OB/GYN and primary care providers to monitor quality outcomes and implement new or change activities as appropriate.										
Task Membership of quality committee is representative of PPS staff involved in quality improvement processes and other stakeholders.										
Task Quality committee identifies opportunities for quality improvement and use of rapid cycle improvement methodologies, develops implementation plans, and evaluates results of quality improvement initiatives.										
Task PPS evaluates and creates action plans based on key quality metrics, to include applicable metrics listed in Attachment J Domain 3 Perinatal Care Metrics.										
Task Service and quality outcome measures are reported to all stakeholders.										
Milestone #4 Use EHRs or other IT platforms to track all patients engaged in this project.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Milestone #5 Identify and engage a regional medical center with expertise in management of high-risk pregnancies and infants (must have Level 3 NICU services or Regional Perinatal Center).										
Task PPS has identified and engaged with a regional medical center to

address the care of high-risk pregnancies and infants (must have Level 3 NICU services or Regional Perinatal Center). Assessment of the volume of high-risk pregnancies to be obtained through the CNA.										
Milestone #6 Develop a multidisciplinary team of experts with clinical and social support expertise who will co-manage care of the high-risk mother and infant with local community obstetricians and pediatric providers.										
Task PPS has assembled a team of experts, including the number and type of experts and specialists and roles in the multidisciplinary team, to address the management of care of high-risk mothers and infants.										
Task PPS has established MOUs or joint operating agreements with substantive multidisciplinary team responsible for co-managing care of high-risk mothers and infants.										
Milestone #7 Develop service MOUs between multidisciplinary team and OB/GYN providers.										
Task PPS has identified and established MOUs or joint operating agreements between multidisciplinary team and OB/GYN providers.										
Milestone #8 Utilize best evidence care guidelines for management of high risk pregnancies and newborns and implement uniform clinical protocols based upon evidence-based guidelines.										
Task PPS has developed/adopted uniform clinical protocols guidelines based upon evidence-based standards agreed to by all partners.										
Task PPS has established best practice guidelines, policies and procedures, and plans for dissemination and training for interdisciplinary team on best practices.										
Task Training has been completed.										
Milestone #9 Ensure that all PPS safety net providers are actively sharing EHR systems or other IT platforms with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the end of DY 3.										
Task EHR or other IT platforms, meets connectivity to RHIO's HIE and	0	0	0	0	0	0	0	0	0	0

Milestone #10 Ensure that EHR systems or other IT platforms used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.										
Task EHR or other IT platforms meets Meaningful Use Stage 2 CMS requirements (Note: any/all MU requirements adjusted by CMS will be incorporated into the assessment criteria).										
Task PPS has achieved NCQA 2014 Level 3 PCMH standards and/or APCM.	0	0	0	0	0	0	0	0	0	0
Milestone #11 Use EHRs or other IT platforms to track all patients engaged in this project.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Milestone #12 Develop a Community Health Worker (CHW) program on the model of the Maternal and Infant Community Health Collaboratives (MICHC) program; access NYSDOH-funded CHW training program.										
Task PPS developed a work plan to use NYSDOH CHW training program and ensure CHW-trained members are integrated into the multidisciplinary team. PPS has obtained DOH funding for CHW training.										
Task 1. Select vendor(s) via RFQ/RFP process.										
Task 2. Identify work team participants.										
Task 3. Design CHW model program.										
Task 4. Define CHW role within the multidisciplinary team.

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task 5. Define training needs for each role. Coordinate with the Workforce Development Work Group, as appropriate.										
Task 6. Work in partnership with Cultural Competency/Health Literacy workstream to address cultural and linguistic needs.										
Task 7. Schedule/conduct onboarding training.										
Task 8. Assure training plan is in place for ongoing needs.										
Task 9. Define ongoing education requirements. Coordinate with the Workforce Development Work Group, as appropriate.										
Task 10. Assure funding for training in place.										
Task 11. Complete work plan document.										
Milestone #13 Employ a Community Health Worker Coordinator responsible for supervision of 4 - 6 community health workers. Duties and qualifications are per NYS DOH criteria.										
Task PPS has named assigned CHW Coordinator(s) or timeline for hiring CHW Coordinator(s).										
Task 1. Identify workgroup team.										
Task 2. Work in partnership with Cultural Competency/Health Literacy workstream to address cultural and linguistic needs.										
Task 3. Develop job description for CHW coordinator (supervisory).										
Task 4. Define staffing model utilizing DOH standards (1 supervisor to 4-6 CHWs).										
Task 5. Utilize data, CNA, and patient input to determine number of teams needed.										
Task 6. Develop employee evaluation process.										
Task 7. Employ qualified candidates.										
Task 8. Define training needs for role.										
Task 9. Schedule/conduct onboarding training.

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task 10. Assure training plan is in place for ongoing needs.										
Task 11. Evaluate effectiveness and adjust as needed.										
Task 12. Complete staffing roster.										
Milestone #14 Employ qualified candidates for Community Health Workers who meet criteria such as cultural competence, communication, and appropriate experience and training.										
Task PPS has developed a CHW workforce strategy and attendant qualifications of CHW(s) who meet the following criteria: 1) Indigenous community resident of the targeted area; 2) Writing ability sufficient to provide adequate documentation in the family record, referral forms and other service coordination forms, and reading ability to the level necessary to comprehend training materials and assist others to fill out forms; 3) Bilingual skills, depending on the community and families being served; 4) Knowledge of the community, community organizations, and community leaders; 5)Ability to work flexible hours, including evening and weekend hours.										
Task 1. Design workplan for deployment of CHW (workforce strategy).										
Task 2. Work in partnership with Cultural Competency/Health Literacy workstream to address cultural and linguistic needs.										
Task 3. Develop job description.										
Task 4. Develop employee evaluation process.										
Task 5. Employ qualified candidates.										
Task 6. Schedule/conduct onboarding training.										
Task 7. Assure training plan is in place for ongoing needs.										
Milestone #15 Establish protocols for deployment of CHW.										
Task PPS has established timelines to complete protocols (policies and procedures) for CHW program, including methods for new and ongoing training for CHWs.										
Task PPS has developed plans to develop operational program										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
components of CHW.										
Task 1. Create list of needed policies/protocols with completion timeline.										
Task 2. Develop policies and protocols.										
Task 3. Approval process.										
Task 4. Coordinate with the Workforce Development Work Group as appropriate to determine training needs.										
Task 5. Schedule/conduct training.										
Task 6. Assure training plan is in place for ongoing needs.										
Task 7. Implement training for CHW.										
Task 8. Utilize planning team to develop workplan.										
Task 9. Work in partnership with 4.d.i. (Reduce Premature Births) and care management (ability to re-enforce applicable education).										
Task 10. Implement training (work in partnership with Cultural Competency/Health Literacy workstream to ensure training addresses cultural and linguistic needs).										
Task 11. Operationalize plan.										
Task 12. Deploy workers.										
Task 13. Develop QA process.										
Task 14. Implement QA process.										
Task 15. Update workplan document (deployment outlined).										
Milestone #16 Coordinate with the Medicaid Managed Care organizations serving the target population.										
Task PPS has established agreements with MCOs demonstrating coordination regarding CHW program, or attestation of intent to establish coverage agreements, as well as progress to date.										
Task 1. Coordinate Medicaid MCO outreach with project 2.a.i.										

Millennium Collaborative Care (PPS ID:48)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
(Integrated Delivery System) and the Value-Based Payment (VBP) Sub-Committee to coordinate and prioritize efforts across the projects.										
Task 2. Coordinate discussions with partnering PPSs as appropriate.										
Task 3. Present project and objectives to top four Medicaid MCOs serving WNY (Independent Health, Fidelis, Blue Cross Blue Shield, YourCare) within the monthly schedules and priorities created in 2.a.i. (coordinated effort with higher level leadership coordination).										
Task 4. Engage Medicaid MCOs in discussion for coverage agreements within the monthly schedules and priorities created in 2.a.i. (coordinated effort with higher level leadership coordination).										
Task 5. Continue dialogue to meet objectives including the metrics and outcomes to be evaluated.										
Task 6. Complete coverage agreements.										
Milestone #17 Use EHRs or other IT platforms to track all patients engaged in this project.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task 1. Define metrics.										
Task 2. Work in partnership with project 2.a.i. (Integrated Delivery System).										
Task 3. Determine data elements required.										
Task 4. Complete gap analysis (partner/CBO capabilities for EHR and data exchange).										
Task 5. Determine strategy.										
Task 6. Design training requirements.										
Task 7. Identify equipment needs.										
Task 8. Obtain and deploy equipment.

Task 11. Design dashboard strategy for monitoring and QA.										

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #1 Implement an evidence-based home visitation model, such as the Nurse Family Partnership, for pregnant high- risk mothers including high-risk first time mothers.										
Task PPS has developed a project plan that includes a timeline for implementation of an evidence-based home visiting model, such as Nurse-Family Partnership visitation model, for this population.										
Milestone #2 Develop a referral system for early identification of women who are or may be at high-risk.										
Task PPS has developed a referral system for early identification of women who are or may be at high-risk.										
Milestone #3 Establish a quality oversight committee of OB/GYN and primary care providers to monitor quality outcomes and implement new or change activities as appropriate.										
Task Membership of quality committee is representative of PPS staff involved in quality improvement processes and other stakeholders.										
Task Quality committee identifies opportunities for quality improvement and use of rapid cycle improvement methodologies, develops implementation plans, and evaluates results of quality improvement initiatives.										
Task PPS evaluates and creates action plans based on key quality metrics, to include applicable metrics listed in Attachment J Domain 3 Perinatal Care Metrics.										
Task Service and quality outcome measures are reported to all stakeholders.										
Milestone #4 Use EHRs or other IT platforms to track all patients engaged in

this project.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Milestone #5 Identify and engage a regional medical center with expertise in management of high-risk pregnancies and infants (must have Level 3 NICU services or Regional Perinatal Center).										
Task PPS has identified and engaged with a regional medical center to address the care of high-risk pregnancies and infants (must have Level 3 NICU services or Regional Perinatal Center). Assessment of the volume of high-risk pregnancies to be obtained through the CNA.										
Milestone #6 Develop a multidisciplinary team of experts with clinical and social support expertise who will co-manage care of the high-risk mother and infant with local community obstetricians and pediatric providers.										
Task PPS has assembled a team of experts, including the number and type of experts and specialists and roles in the multidisciplinary team, to address the management of care of high-risk mothers and infants.										
Task PPS has established MOUs or joint operating agreements with substantive multidisciplinary team responsible for co-managing care of high-risk mothers and infants.										
Milestone #7 Develop service MOUs between multidisciplinary team and OB/GYN providers.										
Task PPS has identified and established MOUs or joint operating agreements between multidisciplinary team and OB/GYN providers.										
Milestone #8 Utilize best evidence care guidelines for management of high risk pregnancies and newborns and implement uniform clinical protocols based upon evidence-based guidelines.										
Task PPS has developed/adopted uniform clinical protocols guidelines based upon evidence-based standards agreed to by all partners.										
Task PPS has established best practice guidelines, policies and procedures, and plans for dissemination and training for

Project 4.a.i – Promote mental, emotional and behavioral (MEB) well-being in communities

IPQR Module 4.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Mental, emotional, and behavioral (MEB) well-being media campaign fails to attain awareness levels among target audiences. Provide evidence-based (Substance Abuse and Mental Health Services Administration-approved) programs at targeted locations. Work with health literacy subject matter experts to develop programs that reflect cultural health literacy issues of target audiences. Test/pilot campaigns with focus groups to ensure effectiveness and appropriateness across various cultures, languages, socioeconomic, and geographic subgroups. Align with experts in public relations and marketing fields. Collaborate with established social science evaluators and website analytics experts to gather baseline data. Assess effectiveness of media campaign quarterly.

Programs are not age and/or culturally appropriate. Test/pilot programs with focus groups to gauge appropriateness. Provide cultural diversity and health literacy training to staff involved with the MEB well-being project. Leverage training and other activities that are part of project 2.d.i. (Patient Activation). Develop/facilitate initial training and provide ongoing training opportunities to staff at least quarterly. MEB well-being project leaders will meet routinely with members of the "Voice of the Consumer" Sub-Committee and CBO Task Force to obtain insights on what services will best meet the needs of those in specific community settings.

School-based MEB disorder prevention programs do not meet the projected level of engagement of clients and provide fewer than anticipated levels of referrals due to scheduling or engagement conflicts. Phase in programs over multiple years to lessen the risks of not reaching target audiences in educational settings. If school-based program schedules do not allow for engagement, target nearby community-based locations for programming, including after-school programs, YMCA recreational activities, sports programs, community centers, etc.

MEB health programs and services are duplicated by other agencies. Meet with Mental Health Association, ECCPASA, health plans, and other organizations to present details of the MEB well-being strategy, share information on targeted audiences, and explain messaging. The aim of sharing information on programs and targeted audiences will be to devise a comprehensive program that eliminates the possibility of service duplication and maximizes the benefits of a coordinated effort. This will be in coordination with the DOH Population Health Improvement Program which covers the same eight counties in the MCC PPS. The exchange of information on program activities and results among the MEB well-being program, health plans, and other groups will occur at least twice annually throughout this five-year project.

Stigma about accessing mental health or addiction treatment services prevents patients from taking advantage of these services. Lessen stigma via appropriate evidence-based messaging that is incorporated into wellness programs and media campaigns. Adapt programs to reflect demographic/cultural considerations; offer incentives to encourage participation. Test effectiveness of stigma-related messaging using focus groups, and partner with agencies experienced with multicultural populations to obtain continuous feedback. Support and empower MEB champions across the network to encourage participation among their peers. In the event that focus group results and outcome data show that existing stigma-related messaging is not effective, be prepared to examine shortfalls in existing strategy and make necessary revisions to messaging and program approaches.

PPS Defined Milestones Narrative Text

Milestone Name	Narrative Text
[4ai_01] Identify and implement evidence-based practices and environmental strategies that promote MEB health. A menu of interventions is found on the Prevention Agenda website.	MCC worked in cooperation with Community Medical Partners of WNY (CMP) PPS to develop a regional approach to MEB well-being and leverage existing resources. MCC will not be issuing an RFP or contracting with a vendor as CMP will take the lead on this project.
[4ai_02] Support and facilitate quality improvement of evidence-based practices and environmental strategies that promote MEB health.	Tasks under this milestone are progressing as expected.

Project 4.d.i – Reduce premature births

IPQR Module 4.d.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Some at-risk pregnant women may not comply with prenatal care standards. Sufficient resources must be allocated to provide management and support of at-risk pregnant women. Community health workers (CHWs) will be utilized to decrease barriers including referral to services and system navigation as well as to reinforce health education and preventive strategies. CHWs will be trained in and utilize Patient Activation Measures software to assess client motivation levels and guide appropriate interventions.

Without a central repository where project-specific outcome data is stored and analyzed, prenatal agencies serving the community are unable to measure how their work is contributing to overall metrics reported on by the NYS DOH. This project will establish data collection and reporting requirements and provide instruction to participating agency personnel on data analysis techniques so analytical functions can be integrated in their daily work and improvement strategies.

CHW is a lower-paid position which may experience high turnover rates; this can disrupt program operations, particularly when pregnant women lose their assigned workers. The project will require CHWs to complete training and certification. Certification will increase the status of workers, elevate their self-esteem, and curb turnover. Working in concert with the Workforce Development Work Group, CHWs will be encouraged to continue their education as pathways for advancement to supervisory positions or other related careers.

CHWs will not be able to adequately communicate with clients about risks that could endanger their or their baby's health if the training approach is over-generalized—not geared to the special needs of the population. It will be critical to develop and include specific modules in the training curriculum.

Third-party payer reimbursement for CHW services provided to pregnant women is imperative to the survival of the program at the end of the five-year waiver period. With its adherence to evidence-based protocols and heavy reliance on outcomes data, the project will routinely report outcomes to payers so they become well-educated on the effectiveness of the CHW approach to reducing premature births.

Project outcomes can be negatively impacted by reluctance among third-party payers to pay for at-home nursing care for pregnant women and to approve authorizations for prescription treatments that help maintain pregnancy to full-term. The project will prepare and submit information to health plans on the value of at-home nursing care and treatments for pregnant women and how this is an important component of a standardized, evidence-based protocol for avoiding premature births. Additionally, to increase accessibility to home nursing services and appropriate treatments, the project will work with health plans on streamlining the prior approval process for these services.

A lack of cooperation among WNY PPSs regarding the use of standardized protocols and policies related to this project could cause confusion among providers, prevent referrals, negatively impact reporting of data, and generally result in poor outcomes. The project is designed to serve all Medicaid-funded pregnant women regardless of what PPS they or their providers are affiliated with. To create a seamless transition for patients,

New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Millennium Collaborative Care (PPS ID:48)

MCC will work with partnering PPSs to utilize standardized referral protocols, use uniform tracking and reporting systems and procedures, and maintain common messaging to educate and communicate with patients.

PPS Defined Milestones Narrative Text

Milestone Name	Narrative Text
[4di_01] Ask all pregnant women about tobacco use and provide augmented, pregnancy-tailored counseling for smokers.	Research initiated regarding smoking-related resources and contacts. Provider list in process.
[4di_02] Provide timely, continuous and comprehensive prenatal care services to pregnant women in accordance with NYS Medicaid prenatal care standards and other professional guidelines.	Working with physician engagement team on strategy. Initial work with review of NYS Medicaid prenatal care standards.
[4di_03] Work with paraprofessionals, including peer counselors, lay health advisors, and community health workers to reinforce health education and health care service utilization and enhance social support to high-risk pregnant women.	Partnership with 3fi outlines with workgroup spanning both projects, workgroup kick-off to be conducted with completion of the RFP process determining lead CBOs for CHWs.
[4di_04] Implement innovative models of care that demonstrated to improve preterm birth rates, and other adverse pregnancy outcomes (prenatally, post-partum, family planning).	Pre-work documents initiated. Researching models of care with the goals/objectives currently in use.
[4di_05] Provide clinical management of preterm labor in accordance with current clinical guidelines.	Meeting with Perinatal Center to determine gaps and needs.

Attestation

The Lead Representative has been designated by the Primary Lead PPS Provider (PPS Lead Entity) as the signing officiate for the DSRIP Quarterly Report. The Lead Representative has the authority to complete this attestation on behalf of the PPS network. The Lead Representative and PPS Lead Entity are responsible for the authenticity and accuracy of the material submitted in this report.

The Lead Representative of the Performing Provider System (PPS) must complete this attestation form in order for the project application to be accepted by the NYS Department of Health. Once the attestation is complete, the Quarterly Report will be locked down from any further editing. Do not complete this section until the entire Quarterly Report is complete.

If the Quarterly Report becomes locked in error and additional changes are necessary, please use the contact information on the Home Page to request that the Quarterly Report be unlocked.

To electronically sign this Quarterly Report, please enter the required information and check the box below:

☐ **I here by attest, as the Lead Representative of the 'Millennium Collaborative Care ', that all information provided on this Quarterly report is true and accurate to the best of my knowledge, and that, following initial submission in the current quarterly reporting period as defined by NY DOH, changes made to this report were pursuant only to documented instructions or documented approval of changes from DOH or DSRIP Independent Assessor.**
