Samaritan Medical Center (PPS ID:45)

Quarterly Report - Implementation Plan for Samaritan Medical Center

Year and Quarter: DY1, Q1 Application Status: Submitted

Status By Section

Section	Description	Status
Section 01	Budget	Completed
Section 02	Governance	Completed
Section 03	Financial Stability	Completed
Section 04	Cultural Competency & Health Literacy	Completed
Section 05	IT Systems and Processes	Completed
Section 06	Performance Reporting	Completed
Section 07	Practitioner Engagement	Completed
Section 08	Population Health Management	Completed
Section 09	Clinical Integration	Completed
Section 10	General Project Reporting	Completed

Status By Project

Project ID	Project Title	Status
<u>2.a.i</u>	Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management	Completed
<u>2.a.ii</u>	Increase certification of primary care practitioners with PCMH certification and/or Advanced Primary Care Models (as developed under the NYS Health Innovation Plan (SHIP))	☑ Completed
<u>2.a.iv</u>	Create a medical village using existing hospital infrastructure	Completed
<u>2.b.iv</u>	Care transitions intervention model to reduce 30 day readmissions for chronic health conditions	Completed
<u>2.d.i</u>	Implementation of Patient Activation Activities to Engage, Educate and Integrate the uninsured and low/non-utilizing Medicaid populations into Community Based Care	☑ Completed
<u>3.a.i</u>	Integration of primary care and behavioral health services	Completed
<u>3.b.i</u>	Evidence-based strategies for disease management in high risk/affected populations (adult only)	Completed
3.c.i	Evidence-based strategies for disease management in high risk/affected populations (adults only)	Completed
3.c.ii	Implementation of evidence-based strategies to address chronic disease - primary and secondary prevention projects (adults only)	Completed
<u>4.a.iii</u>	Strengthen Mental Health and Substance Abuse Infrastructure across Systems	Completed
4.b.ii	Increase Access to High Quality Chronic Disease Preventive Care and Management in Both Clinical and Community Settings (Note: This project targets chronic diseases that are not included in domain 3, such as cancer	Completed

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Section 01 - Budget

☑ IPQR Module 1.1 - PPS Budget Report

Instructions:

This table contains five budget categories. Please add rows to this table as necessary in order to add your own additional categories and sub-categories. The budget categories used in this table should reflect the budget categories you used in your application. If budget entered varies from PPS application or previous implementation plan submission, please describe changes and justifications in box provided.

Budget Items	DY1 (\$)	DY2 (\$)	DY3 (\$)	DY4 (\$)	DY5 (\$)	Total (\$)
Waiver Revenue	11,689,449	12,457,110	20,144,711	17,838,065	11,689,449	73,818,784
Cost of Project Implementation & Administration	1,461,612	5,310,771	4,860,771	3,460,771	3,360,771	18,454,696
Revenue Loss	0	2,214,563	4,429,127	2,315,548	1,107,282	10,066,520
Internal PPS Provider Bonus Payments	2,338,579	3,431,097	6,041,329	6,242,116	4,092,513	22,145,634
Cost of non-covered services	701,574	1,670,667	2,591,925	2,315,548	1,578,541	8,858,255
Other	756,642	1,624,013	3,764,758	5,546,152	2,602,112	14,293,677
Total Expenditures	5,258,407	14,251,111	21,687,910	19,880,135	12,741,219	73,818,782
Undistributed Revenue	6,431,042	0	0	0	0	2

hsanchez	Plan Draft Estimates - Samaritan Lead.xlsx	to identified discrepancies in the above budget preset calculations.	06/07/2015 07:05 PIVI	

Narrative Text:

The spreadsheet included in the MAPP file above will not function appropriately to reflect unexpended year 1 revenue expenditures across DSRIP years as was submitted in original implementation plan per guidance received. How do you want this to be handled when it is reviewed and revised?

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Page 8 of 418 Run Date: 09/24/2015

Instructions:

☑ IPQR Module 1.2 - PPS Flow of Funds

In the table below, please detail your PPS's projected flow of DSRIP funds for the next five years, splitting out the flow of funds by provider type. The provider types match the categories used for the Speed & Scale portion of your Project Plan Application.

- This table requires your funds flow projections on an annual basis. Subsequent quarterly reports will require you to submit your actual distribution of funds to these provider categories on a quarterly basis.
- These quarterly submissions of actual funds distribution will ultimately be required at the provider level (as opposed to the provider type level required here)

Funds Flow Items	DY1 (\$)	DY2 (\$)	DY3 (\$)	DY4 (\$)	DY5 (\$)	Total (\$)
Waiver Revenue	11,689,449	12,457,110	20,144,711	17,838,065	11,689,449	73,818,784
Primary Care Physicians	368,088	997,578	1,518,154	1,391,609	891,885	5,167,314
Non-PCP Practitioners	105,168	285,022	433,758	397,603	254,824	1,476,375
Hospitals	1,472,354	3,990,311	6,072,615	5,566,438	3,567,542	20,669,260
Clinics	262,920	712,556	1,084,396	994,007	637,061	3,690,940
Health Home / Care Management	52,584	142,511	216,879	198,801	127,412	738,187
Behavioral Health	420,673	1,140,089	1,735,033	1,590,411	1,019,298	5,905,504
Substance Abuse	157,752	427,533	650,637	596,404	382,237	2,214,563
Skilled Nursing Facilities / Nursing Homes	262,920	712,556	1,084,396	994,007	637,061	3,690,940
Pharmacies	52,584	142,511	216,879	198,801	127,412	738,187
Hospice	52,584	142,511	216,879	198,801	127,412	738,187
Community Based Organizations	105,168	285,022	433,758	397,603	254,824	1,476,375
All Other	1,945,611	5,272,911	8,024,527	7,355,650	4,714,253	27,312,952
Total Funds Distributed	5,258,406	14,251,111	21,687,911	19,880,135	12,741,221	73,818,784
Undistributed Revenue	6,431,043	0	0	0	0	0

Current File Uploads

User ID	File Name	File Description	Upload Date
hsanchez	45_MDL0106_1_1_20150924110906_150913 Funds Flow Remediation w %.xlsx	NCI DSRIP Funds with correct estimated undistributed revenue	09/24/2015 11:09 AM

Narrative Text:

Please note the undistributed tab does not calculate correctly to allow undistributed revenuer to be distributed across the 5 years. The attached

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

spreadsheet indicates the correct undistributed revenue calculation. The funds flow has not been finalized and is part of the planning within this implementation. The table below reflects dollars in the budget but until the individual project implementation plans are undertaken and the funds flow activities above are carried out funds flow cannot be accurately placed in the categories identified. All Other is the largest category as this encompasses 1) all project implementation costs and 2) all costs for services not currently covered that the PPS intends to contract for under the NCI governance through the Safety Net lead for all partners as an integrated delivery system. The categories that are provider type specific are based on estimates of incentives, contingency, revenue loss, innovation and high performance buckets but are likely to change as the funds flow activities above are carried out and more accurate estimates are made.

☑ IPQR Module 1.3 - Prescribed Milestones

Instructions:

Please enter baseline target dates and work breakdown tasks with target dates for each of the milestones below.

Milestone/Task Name	Status	Description	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Complete funds flow budget and distribution plan and communicate with network	In Progress	Funds Flow Budget and Distribution Plan, signed off by your Finance Committee, including details of your approach to funds flow on a whole-PPS and project-by-project basis; evidence of involvement of provider network in developing funds flow methodology.	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	YES
Task 1. Develop project by project analysis of what inputs, by which providers will create the highest performing team to accomplish project deliverables and what metrics will measure and be accomplished to attest to the performance. Determine weighting to each deliverable and each provider category within the deliverable to drive funds flow	In Progress	See task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 2. Distribute the project revenue impact assessment (prepared as part of current state financial stability assessment) and the project- by-project analysis to network provider partners with explanation of the purpose of the matrix and how it will 1) be used to finalize revenue loss funds flow 2) expected impact of DSRIP projects and expectations of costs incurred by the PPS and individual provider types and 3) drive incentives	In Progress	See task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 3. Complete a preliminary PPS Level budget for Administration, Implementation, Revenue Loss, Cost of Services not Covered budget categories (Excludes Bonus, Contingency and High Performance categories)	In Progress	See task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task	In Progress	See task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	1

DSRIP Implementation Plan Project

Page 11 of 418

Run Date: 09/24/2015

Milestone/Task Name	Status	Description	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
4. Review the provider level projections of DSRIP impacts and costs. During provider specific budget processes, develop preliminary budgets including completion of Provider Specific funds flow plan							
Task 5. Develop the funds flow approach and distribution plan with drivers and requirements for each of the funds flow budget categories	In Progress	See task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 6. Distribute funds flow approach and distribution plan to Finance Committee and network participating providers for review and input	In Progress	See task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task7. Revise plan based on consultation and finalize; obtain approval from FinanceCommittee	In Progress	See task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 8. Prepare PPS, Provider and Project level funds flow budgets based upon final budget review sessions with network providers for review and approval by Finance Committee	In Progress	See task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 9. Communicate approved Provider Level Funds Flow plan to each network provider. Incorporate agreed upon funds flow plan and requirements to receive funds into the PPS Provider Partner Operating Agreements	In Progress	See task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 10. Distribute Funds Flow policy and procedure, and schedule DSRIP period close requirements, along with expected Funds distribution schedule, to PPS network provider partners	In Progress	See task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 11. Roll out education and training sessions for providers regarding the funds flow plan, the	In Progress	See task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3

Section 02 – Governance

☑ IPQR Module 2.1 - Prescribed Milestones

Instructions:

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Note some milestones include minimum expected completion dates.

Milestone/Task Name	Status	Description	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Finalize governance structure and sub- committee structure	In Progress	This milestone must be completed by 9/30/2015. Governance and committee structure, signed off by PPS Board.	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	YES
Task 1. Outline the PPS governance / organizational structure	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 2. Documented explanation of why selected organizational structure is critical to the success of the PPS	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 3. Identify the size of the 5 primary standing committees: Payer / Finance, HIT Governance, Medical Management(clinical), Compliance, Professional Education and Workforce.	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 4. Select, Appoint and Install all members of the 5 standing committees: Payer / Finance, HIT Governance, Medical Management(clinical), Compliance, Professional Education and Workforce.	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 5. Confirm the composition and membership of the NCI Board of Managers; make adjustments to standing committees as required.	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 6. Develop a written process for collaborative	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2

Milestone/Task Name	Status	Description	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Task 5. Develop regular meeting schedules for Committee and relevant sub-Committees	In Progress	See Task	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 6. Select/Develop initial metrics for tracking performance. "Domain 2-3 Performance Metrics and Goals". Project performance will be managed by appointed Project Leads and reviewed by the Project Management Officer utilizing Performance Logic and Population Health Management tools for accurate and timely metric validation.	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 7. PPS PMO will support continuous clinical quality improvement activities for the Medical Management Committee to evaluate the standards, benchmark training performance, identify and determine best practices. Quality committees will perform routine clinical assessments against performance metrics for the 11 DSRIP Projects.	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Milestone #3 Finalize bylaws and policies or Committee Guidelines where applicable	In Progress	This milestone must be completed by 9/30/2015. Upload of bylaws and policies document or committee guidelines.	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	YES
Task 1. North Country Initiative (NCI) Board of Managers will collaboratively develop and draft PPS bylaws.	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 2. Collaboratively the NCI Board of Managers will review and approve developed Bylaws for the PPS.	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 3. Adopt revised North Country Initiative Board of Managers Bylaws.	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 4. Identify key policies regarding participation in North Country Initiative governance structure	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	

Page 18 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Milestone/Task Name	Status	Description	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Task 5. Draft and adopt dispute resolution policies and procedures that will address: Issue / Conflict resolution by NCI Board of Managers.	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 6. Develop, adopt, and communicate policies and procedures regarding non- or underperforming providers	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 7. Develop and adopt Governance compliance policies and procedures	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Milestone #4 Establish governance structure reporting and monitoring processes	In Progress	This milestone must be completed by 12/31/2015. Governance and committee structure document, including description of two-way reporting processes and governance monitoring processes	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	YES
Task 1. NCI Project Management Office and Project Leads will utilize PMI methodologies and Performance Logic Project Management software to actively manage project performance and produce real-time performance dashboards for controlling, monitoring and reporting purposes to the NCI Board of Managers and Key Stakeholders for approval. Dashboards will be adjusted to meet reporting criteria as determined by the NCI Board of Managers.	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 2. Identify key project metrics to assess project workstream progress: financial management, clinical management, workforce management, IT management and Compliance.	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 3. PMO will create reporting and controlling dashboard structure for milestone completion status reports.	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 4. Develop tools that support data collection and reporting data from participating PPS	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3

Task 6. Finalize contractual / partnership agreements with key CBOs	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 7. Identify appropriate committees for CBO representation, including Finance	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Milestone #7 Finalize agency coordination plan aimed at engaging appropriate public sector agencies at state and local levels (e.g. local departments of health and mental hygiene, Social Services, Corrections, etc.)	In Progress	Agency Coordination Plan.	04/01/2015	06/30/2016	06/30/2016	DY2 Q1	NO
Task 1. Identify appropriate public sector agencies at the state and local level in the NCI service area	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 2. Develop an action plan for coordinating supporting agency activities geographically within the PPS for discussion, review, and adoption by the Agencies and Municipal Authorities	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 3. Include public sector agencies in internal and external committee structures	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 4. Include public sector agency coordination action plan in two-way NCI Communication Plan	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 5. NCI public sector agency coordination plan discussed, reviewed and adopted	In Progress	See Task	04/01/2015	06/30/2016	06/30/2016	DY2 Q1	
Milestone #8 Inclusion of CBOs in PPS Implementation.	In Progress	Explain your plans for contracting with CBOs and their continuing role as your PPS develops over time; detail how many CBOs you will be contracting with and by when; explain how they will be included in project delivery and in the development of your PPS network.	04/01/2015	06/30/2016	06/30/2016	DY2 Q1	NO
Task 1. Identify, assess and stratify CBO's into geographical and services available categories	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	

Page 22 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Milestone/Task Name	Status	Description	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Task 2. Establish linkages with CBO's in the PPS's geographical targeted population areas	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 3. Develop engagement plan that outlines numbers of CBO's required, service requirements and alignment of CBO 's specific roles and responsibilities in achieving DSRIP deliverables.	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 4. Identify and appoint representation from CBO's on governing body and to appropriate committees.	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 5. Partner with and contract CBO's in: care management, community health workers, project 11 navigation, diabetes prevention program, tobacco cessation, cultural competency and health literacy.	In Progress	See Task	04/01/2015	06/30/2016	06/30/2016	DY2 Q1	
Task 6. Utilize existing CBO expertise in the prevention of over-growth or duplication existing services	In Progress	See Task	04/01/2015	03/31/2016	03/31/2016	DY1 Q4	
Task 7. Implement key deliverables and key performance indicators (KPIs) outlined in agreements with CBOs.	In Progress	See Task	04/01/2015	06/30/2016	06/30/2016	DY2 Q1	
Task 8. Implement and utilize communications engagement plan to: inform, improve, sustain two-way communications. Where appropriate and accepted utilize electronic referrals processes.	In Progress	See Task	04/01/2015	06/30/2016	06/30/2016	DY2 Q1	
Task 9. Conduct an assessment of the region on which CBO's are not participating in DSRIP, if any are identified work to gain commitment to join the NCI PPS.	In Progress	See Task	04/01/2015	06/30/2016	06/30/2016	DY2 Q1	

Page 23 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Milestone/Task Name	Status	Description	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #9 Finalize workforce communication and engagement plan	In Progress	Workforce communication & engagement plan, including plans for two-way communication with all levels of the workforce, signed off by PPS workforce governance body (e.g. workforce transformation committee).	04/01/2015	06/30/2016	06/30/2016	DY2 Q1	NO
Task 1. Utilize FDRHPO communication and workforce committee to review and create the communication and engagement plans	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 2. Review committee members to ensure proper representation from the key areas of our PPS. (i.e. employees, unions, fqhc's, providers, cbo's, health homes etc.)	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 3. Communication committee to perform workforce stakeholder assessment in partnership with the workforce committee to identify the key stakeholder groups and evaluate current commitment and level of commitment required for project success	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 4. Define the communication needs and required key messages by workforce audience group, as well as the available communication channels that can be utilized for workforce stakeholder engagement	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 5. Develop two-way workforce communication and engagement plan as component of NCI overall two-way communication plan including: objectives, target audience, channel, barriers and risks, milestones, and measures to evaluate effectiveness	In Progress	See Task	04/01/2015	03/31/2016	03/31/2016	DY1 Q4	
Task 6. Workforce Communication & Engagement section of NCI Communication Plan: signed off by the executive body of the PPS	In Progress	See Task	04/01/2015	06/30/2016	06/30/2016	DY2 Q1

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Finalize governance structure and sub-	
committee structure	
Establish a clinical governance structure,	
including clinical quality committees for each	
DSRIP project	
Finalize bylaws and policies or Committee	
Guidelines where applicable	
Establish governance structure reporting and	
monitoring processes	
Finalize community engagement plan, including	
communications with the public and non-	
provider organizations (e.g. schools, churches,	
homeless services, housing providers, law	
enforcement)	
Finalize partnership agreements or contracts	
with CBOs	
Finalize agency coordination plan aimed at	
engaging appropriate public sector agencies at	
state and local levels (e.g. local departments of	
health and mental hygiene, Social Services,	
Corrections, etc.)	
Finalize workforce communication and	
engagement plan	
Inclusion of CBOs in PPS Implementation.

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 2.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in implementing your governance structure and processes and achieving the milestones described above, as well as potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Risk 1: Due the region's severe health provider shortages, retaining appropriate physician commitment on boards can be difficult. Mitigation:

NCI has a broad range of specialty CBO involved in committees to represent a broad spectrum of the region's needs & resources, so not all responsibilities fall on our primary care physicians. In addition a single clinical governance committee may have the role to serve as the clinical committee for multiple projects within their expertise.

Risk 2: With the large geographic area NCI covers physical attendance to meetings may be difficult.

Mitigation:

The use of video conferencing, teleconferencing, and webcasts has been defined and implemented by PPS.

Risk 3: Collecting participant level data from PPS partners.

Mitigation

- a.) NCI utilize a centralized platform (performance logic) to manage project planning implementation & reporting with real time data.
- b.) NCI will implement population health management tools for monitoring of clinical based data & evidenced based medicine.

Risk 4: Gaining agreement on evidence based clinical guidelines by the Medical Management (Clinical) Committee & the ability to monitor participant's adherence.

Mitigation:

Medical Management Committee will select National accepted evidence based clinical practice guidelines and utilize IT capabilities.

☑ IPQR Module 2.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

1. Practitioner, Community and Workforce Engagement: Across the entire PPS, a community engagement plan, including plans for two-way communication with stakeholders will be developed. This plan will include communication with all levels of the governance, regarding required trainings, recruitment and retention strategies (i.e. alignment with and awareness of federal and state initiatives), and new hires. The PPS governance structure will be responsible for agency coordination plans aimed at engaging appropriate and targeted workers who will most greatly

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

impacted by project implementation. Practitioner engagement and involvement in the DSRIP program will also be a major interdependency with our workforce transformation plans. As such, we will develop training and education plans targeting practitioners and other professional groups, designed to educate them about the DSRIP Program and our PPS-specific quality improvement agenda.

- 2. Financial Sustainability: Key people within organizations will need to be identified and held responsible for the financial sustainability of their entities, incorporating PPS strategies to address important, identified issues related to our network's financial health. The financial sustainability of PPS partners greatly impact governance.
- 3. Cultural Competency and Health Literacy: The implementation of cultural competence and health literacy strategies will require the identification and implementation of assessments and tools to assist patients with self-management of conditions, as well as the utilization of community-based interventions to reduce health disparities and improve outcomes. The PPS Governance will need to adopt a culturally competent training strategy for clinicians focused on evidence-based research addressing the drivers of health disparities for particular groups identified. We will also create training plans for other segments of the workforce (and others, as appropriate) regarding specific population needs and effective patient engagement approaches.
- 4. IT Systems and Processes: All projects and workstreams are dependent on the IT systems and processes, therefore, strategic implementation of these systems and processes is primarily dependent on workforce related to both clinical and technical training. The PPS will develop an IT change management strategy that is focused on a communication plan involving all stakeholders, including users. An education and training plan will be created and workflows for authorizing and implementing IT changes will be defined and standardized across the PPS. This training plan will support the successful implementation of new platforms and processes involving technical standards and implementation guidance for sharing and using a common clinical data set.
- 5. Performance Monitoring: Each entity will be required to report clinical and financial outcomes for specific patient pathways and project milestones. Key personnel will need to be trained to use clinical quality and performance dashboards as well as a centralized, continuously monitored reporting tool. Reporting, tracking, monitoring and course adjustments will need to be made by the organization and their workers, in partnership with the PPS Project Management Officer. The Governance structure will need to be proactive and rapidly reactive with improvement plans for areas of poor performance.

☑ IPQR Module 2.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for the development of your governance structure and processes and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Lead Applicant/Entity	North Country Initiative, LLC with Samaritan as signatory	Bylaw and Policy Development, funding and staff resources
		Oversight and success of all DSRIP Activities
North Country Initiative, LLC Board of Managers	Governance	Policy and Plan Adoption and Executive Sponsorship
North Country Initiative, EEO Board of Managers	Governance	Physician and Provider Champions and Leadership
		Overall DSRIP Performance Monitoring
DSRIP Project Advisory Committee	Multi-organizational	Review and make recommendations to the NCI Board on DSRIP
Bertii Troject/tavisory Committee	Walti Organizational	strategies and Plans
		Clinical Oversight for DSRIP Projects
		Clinical Guideline & Protocol Development and Support
NCI Medical Management (Clinical)Committee	Clinical Governance	Clinical Champions
		Quality of Care and Patient Outcomes
		PHM Disease Registry Quality Measures - Performance Monitoring
		Responsible for reviewing HIT Gap Analysis and Plans
		Championing adoption by clinicians
NCI HIT Governance Committee	HIT Assessment, Plan, Adoption	Patient-Centered Medical Home implementation plan
		EMR and MU
		PHM Disease Registry roll-out
		Review of Financial Sustainability Plans
	Financial Plan Monitoring	Monitoring Fragile Provider Metrics
NCI Finance Committee	Funds Flow Oversight	Review of Funds Flow Plan
	T unds now oversight	Inform and Review Value Based Payment Strategy
		Other financial and value-based planning functions
		Responsible to ensure Compliance Plans, Policies and Training
NCI Compliance Committee	Compliance	are in place including Lead Entity Compliance Plan consistent with
		New York State Social Services Law 363-d
		Development of Health Literacy and Cultural Competency Strategy
NCI Health Literacy & Cultural Competency	Health Literacy & Cultural Competency Plans	Development and oversight of Health Literacy and Cultural
Committee	Treatti Literacy & Cultural Competency Flans	Competency Training Plan in partnership with Workforce
		Committee
NCI Provider Recruitment, GME & Workforce	Workforce	Physician/Provider Recruitment Plan
Governance Committee	WOINIOIG	GME Expansion Analysis

☑ Module 2.6 - IPQR Module 2.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS with regard to your governance structure and processes.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Lead Applicant/Entity	North Country Initiative, LLC with Samaritan as signatory	Bylaw and Policy Development, funding and staff resources
Major hospital partners	Samaritan Medical Center, River Hospital, Claxton-Hepburn Hospital, Clifton-Fine Hospital, Massena Memorial Hospital, Carthage Area Hospital	Board and Committee members, staff support
All PPS Partners	All PPS Partners	Active role in governance, communication, and project activities and deliverables
External Stakeholders		
Fort Drum Regional Health Planning Organization	Workforce Vendor Assistance IT infrastructure Contracted PMO staffing and Support Coordination of Activities	Training and Education IT Partnership Facilitation of Activities Continuity & Credibility
North Country Behavioral Healthcare Network	Project 4.a.iii and 3.a.i. support and assistance	PAC Participation, Project leadership
Non-Partner Community Based Organizations	Engagement	Understanding and buy-in
Medicaid and Uninsured Patients, All Population for Population Health Projects	Participation in neighborhood and community engagement activities, potential community health worker roles of the future	Information to ensure projects and activities are effective and appropriately targeted

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Page 32 of 418 Run Date: 09/24/2015

☑ IPQR Module 2.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream and your ability to achieve the milestones described above.

North Country Initiatives, ability to obtain information quickly on a patient's health, health care, and potential treatments is critically important. Additionally, the ability to share this information in a timely manner with other providers caring for the patient is essential to the delivery of safe, patient-centered, coordinated, and efficient health care. To meet this need, collaboration across the entire PPS is underway to develop and leverage: electronic health record (EHR) systems with decision support for clinicians, a secure platform for the exchange of patient information across health care settings, and data standards that will make shared information understandable to all users. Efforts are also underway to complete the implementation of a population health management tool that will allow our PPS to analyze, and aggregate real time data on our participants and those beneficiaries who opt in. NCI through the use of this tool will also be able to leverage information systems for mental health and substance abuse conditions are aligned with general, medical care needs is essential for improving the quality and continuity of care across the system. NCI's PPS will not be successful within DSRIP or any other Healthcare reform initiative if our information technology cannot produce reports on our ability to deliver safe, effective, patient-centered, timely health care. Those reports will be allow our PPS to take data and turn that information into healthcare decisions which will allow for improved patient outcomes and a reduction in healthcare cost.

All staff and participating providers will need to be trained on protecting health information through appropriate privacy and security practices. They will need to be trained on effective strategies to achieve ongoing, industrywide Health IT standards to include information tools, specialized network functions, and security protections for the interoperable exchange of health information. They will need to learn how to identify health IT standards for use by identifying and prioritizing specific uses for which health IT is valuable, beneficial and feasible. Overall, strong commitment from PPS to train, understand, and embrace the development of a shared, secure IT infrastructure will ultimately impact the successful use of IT functionality to improve outcomes.

It is vital to recognize the importance that our IT infrastructure has on our regions ability to reverse the cost curve and to improve the outcome of all the patients this region serves. Improvement in Information technology has been a commitment this region has made and will maintain throughout the regions transformation.

Instructions:

Please describe how you will measure the success of this organizational workstream.

Run Date: 09/24/2015

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

The success of North Country Initiative governance will be measured against the timely achievement of the creation of the structures (Board of Directors, Committees Organizational chart), the recruitment of Board of Directors and committee members, the development and adoption of bylaws, policies and procedures for all key committees and sub-committees, and the development, negotiation and execution of all required provider agreements to allow NCI to begin operating as a PPS. Additionally, success will be measured by the establishment of the population health management tool and performance management systems (including data collection, analyses and reporting) to support effective and efficient decision-making. Our PPS will rely heavily on the IT infrastructure and tools that will help assist in project management and clinical reviews. Our project management officer and those PPS identified members will utilize a software program to help manage the 11 DSRIP projects, and financial obligations. Our clinical committees including but not limited to medical management, HIT, Care transitions committee will rely on the population health management software to capture data regarding the clinical measures, compliance with EBM (evidence-based medicine) protocol, and ultimately with the impact on the project goals and the overall NYS goal of reduction in avoidable hospital admissions.

North Country Initiative (NCI) has established a Project Management Office (PMO) staffed with a certified Project Management Officer and Program Manager. The PMO will utilize, Performance Logic, a project management performance based software platform for monitoring, controlling and reporting (weekly, monthly, quarterly) status / metrics associated with project milestones / deliverables. Performance Logic is specifically designed to the needs of the PPS with project management, implementation, planning, performance monitoring and results oriented project tracking / reporting. Performance Logic incorporates all aspects of DSRIP tracking enhancing NCI's ability to communicate with multiple team members and essential stakeholders.

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 3.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

There are challenges to implementing the organizational strategies required for the financial sustainability work stream that could impact the PPSs efforts to assess and monitor the financial health of the PPS. These challenges include:

- •Implementation of a financial reporting infrastructure
- •Obtaining buy-in of the NCI PPSs DSRIP project and funds plans
- •Inability to access data to perform or validate analytics related to project performance
- •Failure of PPS providers to meet the DSRIP reporting requirements
- •Fee for service transition to VBP
- Implementation of ICD 10

The IT current state assessment identified varying levels of financial reporting capability. A shared reporting infrastructure is essential to having timely access to the financial metrics needed to monitor the financial health of the PPS. This is therefore a key risk for the PPS's Finance Function and they will be involved in the IT Function's implementation and management of a shared IT infrastructure throughout the network. In addition, links to sources of performance data will enable the PPS finance function to have timely access to both financial and performance data to identify trends that might negatively impact the PPS and to implement plans of corrective action.

The ability to receive financial metrics for PPS providers related to financial health, the timely reporting of data and metrics related to project status and performance is essential to meeting the PPS's DSRIP reporting requirements. The NCI will need to develop a Data and Technology work plan specifically related to the requirements that the finance function for DSRIP project metrics. In addition, NCI will distribute a Finance Calendar to all PPS providers regularly to ensure, partners understand the schedule for reporting information to the PPS as needed for submission to DOH. The NCI PPS recognizes the importance of having buy-in of the PPS partners to the functioning of the integrated delivery network and to the goals and objectives of. To obtain, and sustain, this important buy-in the PPS Board will develop strong lines of informative and meaningful communication to the providers. The NCI will establish a funds distribution plan that is transparent to the providers and ensure that all plan requirements and related processes and payment schedules are clearly understood and communicated regularly.

Transitioning away from a fee-for-service reimbursement methodology toward a VBP model mitigation: create opportunities to obtain outside expertise for education and outreach and through beginning with small wins. As NCI identified previously, NCI will engage partners to develop a flexible, multi-phased approach that enables the most effective method of VBP contracting. To address the complexities of VBP, the NCI will embrace the strong relationships that exist between individual providers and MCOs and we will enable our providers to contract directly with MCOs in our region. To successfully operate in a VBP arrangement, our partners must maintain a firm understanding of the varying degrees of risk sharing, capitation and fee for service. NCI will examine opportunities for standardization in contracting methodologies among MCOs, ultimately streamlining our and our partner's ability to establish VBP arrangements.

Implementation of ICD-10 coding in October 2015 may temporarily shift provider priorities, as payments to providers hinges on accurate coding. Time and resources will need to be spent to train and prepare practices for this conversion, otherwise, practices could experience a potentially devastating loss of productivity and revenue. ICD 10 Risk Mitigation: a) Establish a group to assess and monitor ICD-10 provider readiness and its potential impact on the implementation of chosen projects b) Develop contingency plan in the event that provider focus shifts to ICD-10

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

implementation

Instructions :

IPQR Module 3.4 - Major Dependencies on Organizational Workstreams

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

During NCI's preliminary assessment of the finance function for the NCI PPSs DSRIP application a number of interdependencies were identified with other work streams in the following key areas:

- 1. Governance A fully supportive governance process is essential to establishing the role of the NCI Finance Function. Fully established roles within the governance structure for Finance, Compliance and Audit will inform and drive the finance committee charter, its oversight of the finance function and approach to funds flow.
- 2. DSRIP Network Capabilities and Clinical Integration The successful implementation of the NCI's value based reform strategy, and execution of value based contracts, will require a developed and functioning integrated delivery network and buy-in of the network partners to the value based payment strategy.
- 3. Performance Monitoring The DSRIP process has extensive reporting requirements linked to DSRIP payments such as the quarterly reporting is a dependency for receiving DSRIP Process Payments. This reporting is dependent upon input and submission of reports and data from the individual network providers as well as other sources of data that will require the PPSs IT function to access.
- 4. DSRIP Projects The NCI PPS finance function must have an understanding of projects selected and participation level of providers for each (Provider Participation Matrix) in order to develop a meaningful funds plan for the PPS. In addition, the PPS and the providers must understand project costs, impacts and other needs as part of their process of evaluating financial stability and impact going forward.
- 5. IT Systems & Processes This work stream will be essential to providing technology to access data and to implement shared financial reporting infrastructure that is needed by NCI as well as the technology for reporting project level performance data that is closely linked to the payments received for DSRIP projects.
- 6. Workforce The impact of the DSRIP projects is still being reviewed as is the costs related to those impacts and the strategies of the PPS and each provider to mitigate that impact. NCI will work closely with the workforce work stream to ensure that the appropriate data related to the workforce strategy and impact is being gather and reported to meet the DSRIP requirements. NCI is responsible for communicating these requirements for tracking and reporting to all PPS providers to ensure that the PPS meets its requirement to report this information to DOH.

☑ IPQR Module 3.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role Name of person / organization (if known at this stage)		Key deliverables / responsibilities
NCI Payer/Finance Committee	Multi-Organization	Development of Financial Strategies, including funds flow and VBP.
Lead Entity Chief Financial Officer	Sean Mills	Responsible for the day-to-day oversight of operations of the accounts payable and banking functions, including updating policies and procedures, monitoring the accounts payable system, and developing protocols around reporting and AP check write related to the DSRIP funds distribution. This function includes the maintenance of financial records for reports.
NCI Financial Officer	Unknown at this time. Responsibilities will be fulfilled by Lead Entity CFO and NCI Director until determined.	Responsible for development and management of the Financial objectives. Provides support for Finance/Payer Committee. The individual will provide guidance and oversight around the Funds Flow Plan, the Financial Stability Plan, and other relevant processes. The responsibilities include ensuring that funds are managed and distributed according to the approved plan, that reporting requirements are met and that communication regarding the Finance related functions is timely and accurate.
NCI DSRIP Compliance Officer	TBD will be filled by the Lead Entity Compliance Officer in the interim	Will oversee the development and implementation of the compliance plan of the PPS Lead and related compliance requirements of the PPS as they are defined. Scope would include the PPS Lead compliance plan related to DSRIP. The compliance role will report to the Executive Body.
NCI Compliance Committee	Multi-Organization	Responsible to ensure Compliance programs are in place
Lead Entity Compliance Officer	Barbara Morrow	Will fill Compliance Officer role is completed until NCI Compliance Officer is in place. Will provide oversight to NCI Compliance Officer
NCI Director	Brian Marcolini	Overall NCI Leadership. Coordinate overall development of VBP baseline assessment and plan for achieving value based payments. Coordinate approach and engagement of process to develop PPS VBP Baseline Assessment and Adoption Plan. Ultimately responsible for the development of the PPS VBP Baseline Assessment and Adoption Plan.

Page 49 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
NCI Project Management Officer	Ray Moore	Will ensure the tracking of partner performance for DSRIP performance payments
NCI Financial Consultant	TBD	Will assist with Financial analysis and financial sustainability plans and the development of financial metrics
NCI Data Analyst	Jeff Bazinet	Will ensure data plan to support DSRIP payments, value-based payment and financial metrics is in place
Auditor	TBD	External auditors reporting to the Finance Committee. The firm will perform the audit of the PPS and PPS Lead related to DSRIP services according to the audit plan approved by the Finance Committee and Executive Body

Page 50 of 418

Run Date: 09/24/2015

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 3.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Lead Applicant/Entity	North Country Initiative, LLC with Samaritan as Lead	Policy and Funds Flow Development, Oversight and Responsibility for All DSRIP
Major Safety Net hospital partners	Samaritan Medical Center, River Hospital, Claxton-Hepburn Hospital, Clifton-Fine Hospital, Massena Memorial Hospital, Carthage Area Hospital	Financial Sustainability Plans, Participation in committee sand financial and value-based planning functions as applicable
All PPS Partners	Actively carry out deliverables to ensure funds flow plan implemented	Financial Sustainability Plans, Participation in committees and financial and value-based planning functions as applicable
External Stakeholders		
Fort Drum Regional Health Planning Organization	Financial Plan Assistance IT infrastructure Contracted PMO Staffing and Support Coordination of Activities	IT/Data Partnership Facilitation of Activities Continuity & Credibility
Managed Care Organizations	MCOs identified by PPS for pursuit of PPS Value based reform strategies	The PPS Lead and PPS will have responsibilities related to implementing the PPSs value based strategy
Non-Partner Community Based Organizations	Engagement and Recipients of communication plans.	Understanding and buy-in
Medicaid and Uninsured Patients, Community Members	Engagement to ensure positive impact on beneficiaries. Recipients of communication plans.	Information to ensure projects and activities are effective and appropriately targeted

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 3.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

The development of shared IT infrastructure across the NCI PPS will support the NCI Finance Officer and the financial sustainability of the network by providing the network partners with capability for sharing and submitting reports and data pertaining to project performance and other DSRIP related business in a secure and compliant manner. The NCI has begun the process of establishing a shared reporting platform across the network, which will be utilized to provide access and visibility to updates on key financial sustainability metrics at the provider and PPS level. The NCI also intends to link to the performance reporting mechanisms that will be utilized across the PPS to provide the NCI DSRIP Finance Committee with current data that may be utilized to track project performance levels and expected DSRIP payments.

Other shared IT infrastructure and functionality across the PPS that will support or contribute to the success of the NCI PPS Finance function includes:

- Population Health systems or technology that will support the need to access and report on data related to clinical services and outcomes for DSRIP required metrics and to meet the needs under value based payment arrangements.
- Care Coordination technology and systems that supports broad network integration of services and health management capabilities.

☑ IPQR Module 3.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

The NCI will align our PPS financial management and sustainability progress reporting with the reporting and oversight structures in place for the DSRIP projects, through the NCI PPS Project Management Office. The PMO will be responsible for monitoring progress against project requirements and process measures at a provider level, and the preparation of status reports for the guarterly reporting process for DOH.

The PMO will be utilizing (Performance Logic) a project management performance based software platform for monitoring, controlling and reporting (weekly, monthly, quarterly) status / metrics associated with project milestones / deliverables. Performance Logic is specifically designed to the needs of the PPS with project management, implementation, planning, performance monitoring and results oriented project tracking / reporting. Performance Logic incorporates all aspects of DSRIP tracking enhancing NCI's ability to communicate with multiple team members and essential stakeholders.

The NCI will integrate into this process the financial reporting required to monitor and manage the financial health of the network over the course of the DSRIP program. The NCI PPS Finance Officer will be responsible for consolidating all of the specific financial elements of this project reporting

Page 51 of 418 Run Date: 09/24/2015

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

into specific financial dashboards for the NCI PPS Board and for the tracking of the specific financial indicators the PPS is required to report on as part of the financial sustainability assessments and the ongoing monitoring of the financial impacts of DSRIP on the providers. Through ongoing reporting, if a partner trends negatively or if the financial impacts are not in line with expectations, the NCI PPS Finance Officer will work with the NCI Finance Committee to engage the provider to understand the financial impact and develop plans for corrective action.

The NCI Finance Officer will provide regular reporting to the Lead Entity, the Finance Committee, Executive Body and network partners as applicable regarding the financial health of the NCI PPS and updates regarding the Financially Fragile Watch List and the Distressed Provider Plans currently in place.

Section 04 – Cultural Competency & Health Literacy

☑ IPQR Module 4.1 - Prescribed Milestones

Instructions:

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement. Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Note some milestones include minimum expected completion dates.

Milestone/Task Name	Status	Description	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Finalize cultural competency / health literacy strategy.	In Progress	This milestone must be completed by 12/31/2015. Cultural competency / health literacy strategy signed off by PPS Board. The strategy should: Identify priority groups experiencing health disparities (based on your CNA and other analyses); Identify key factors to improve access to quality primary, behavioral health, and preventive health care Define plans for two-way communication with the population and community groups through specific community forums Identify assessments and tools to assist patients with self-management of conditions (considering cultural, linguistic and literacy factors); and Identify community-based interventions to reduce health disparities and improve outcomes.	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	YES

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 4.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in implementing your cultural competency / health literacy strategy and addressing the specific health disparities you are targeting (based on your CNA), and achieving the milestones described above - including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Risk 1: Perception of importance by providers and stakeholders

Mitigation: Identify Peer Champions, utilize a stratified level of intensity with training appropriate and targeted to population served so value is reinforced by improved patient compliance

Risk 2: Understanding of health literacy and the provider role

Mitigation: Incorporation into overall communication plan/messaging so message is consistently reinforced, use of empirical studies that illustrate effect of health literacy on patient compliance

Risk 3: Clinician availability/time to take training

Mitigation: Align with other training and schedule of training, make training available in multiple formats, stratify level of intensity of training based on level of risk of patient population served

Risk 4: Provider Training overload with multiple DSRIP, ACO and other Clinical Integration requirements

Mitigation: Align trainings to consolidate and reinforce efforts

Risk 5: Technology limitations for online trainings

Mitigation: identification of limitations and resources available to conduct training

Risk 6: Willingness of agencies to adopt policy drafts adopted by board

Mitigation: Communication Plan regarding all DSRIP activities includes Health Literacy and Cultural Competency. Inclusion of Health Literacy and

Cultural competency in contractual participation requirements

☑ IPQR Module 4.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

- 1.Governance: NCI Governance will need to adopt health literacy and cultural competency strategy and training plan and will need to incorporate health literacy and cultural competency policies.
- 2. Workforce: Health Literacy will need to be included as a core component in workforce training strategy so it is critical for the Health Literacy and Cultural Competency Committee work interface closely with the Workforce Committee
- 3. Practitioner Engagement, Clinical Projects, Clinical Integration and Care Coordination: If Clinical outcomes are to be met and care coordination is to meet its goals than the patient must be engaged and able to clearly understand the information provided to them. Also health literacy and cultural competency are a component of PCMH. Therefore health literacy and cultural competency must be recognized for its importance in the clinical work stream.

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

- 4. IT Systems & Processes: Technology provides an efficient means to train multiple people at disparate geographic locations and must be utilized if the PPS is to be successful given the rural geography. Further technology will need to be able to track the training completion and support performance monitoring of improvements in patient outcomes.
- 5. Population Health Management: PHM tools can only be effective if their use drives health behavior change for patients through engagement. If patients do not understand and engage in their care than PHM fails
- 6. Patient Engagement: Patients cannot be engaged in their own care if they do not understand the care instructions being given to them or if they do not have the skills and or tools to carry out the instructions

Page 58 of 418 Run Date: 09/24/2015

☑ IPQR Module 4.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders	,	
NCI Board of Managers	Board Members	Review and adopt policies
NCI Communication Committee	Include HH & CC in Communication Plan	Communication Plan that addresses HH & CC
NCI Director	Responsible for overall oversight of all NCI Activities	Ensure that all workstreams endorse and adopt HH&CC Policies as applicable
NCI Care Management Committee	Include HH & CC in Care Management Plan	Care Management Plan that addresses HH & CC
Safety Net hospital partners	Adopt HH&CC Policies Implement HH & CC Training as applicable	Trained staff, implemented policies to impact improved patient outcomes for disparate populations
All PPS Partners	Adopt HH&CC Policies Implement HH & CC Training as applicable	Trained staff, implemented policies to impact improved patient outcomes for disparate populations
External Stakeholders		
Fort Drum Regional Health Planning Organization	Contracted PMO staffing and Support, Coordination of Activate Community Based Engagement	Facilitation of Activities Data Analytics to identify disparate Hot Spots Continuity & Credibility for Community Engagement with Population Health Improvement Program and other Community Based programs that engage disparate populations
Non-Partner Community Based Organizations	Engagement Potential to provide service	Understanding and buy-in
Medicaid and Uninsured Patients, All Population for Population Health Projects	Participation in neighborhood and community engagement activities, potential community health worker roles of the future	Information to ensure projects and activities are effective and appropriately targeted

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Page 61 of 418 Run Date : 09/24/2015

☑ IPQR Module 4.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support the development and implementation of your cultural competency / health literacy strategy and the achievement of the milestones described above.

North Country Initiatives, ability to obtain information quickly on a patient's health, health care, and potential treatments is critically important. Additionally, the ability to share this information in a timely manner with other providers caring for the patient and the patient themselves is essential to the delivery of safe, patient-centered, coordinated, and efficient health care. To meet this need, collaboration across the entire PPS is underway to develop and leverage: electronic health record (EHR) systems with decision support for clinicians, a secure platform for the exchange of patient information across health care settings, Patient portals for patient engagement in their own care and data standards that will make shared information understandable to all users. Efforts are also underway to complete the implementation of a population health management tool that will allow our PPS to analyze, and aggregate real time data on our participants and those beneficiaries who do not opt out. NCI's PPS will not be successful within DSRIP or any other Healthcare reform initiative if our information technology cannot produce reports on our ability to deliver safe, effective, patient-centered, timely health care. Those reports will be allow our PPS to take data and turn that information into healthcare decisions such as where to focus our Health Literacy and Cultural Competency efforts which will allow for improved patient outcomes and a reduction in healthcare cost for the region. In addition, technology will be utilized to monitor and track training activities across the PPS.

☑ IPQR Module 4.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

The success of North Country Initiative Health Literacy and Cultural Competency Strategy will be ultimately measured by the PPSs ability to engage the patient population in managing their own care and in striving for health and thus achieving 1) reductions in unnecessary exacerbation of existing conditions resulting in ED and inpatient utilization and 2) the avoidance of disease onset/development. The process measures leading to this outcome will be the boards adoption of the Health Literacy and Cultural Competency Strategy and the Health Literacy and Cultural Competency Training Strategy, the numbers of providers and front-line workers trained, the number/percentage of partners to adopt policies, and the development and ongoing review of health education tools to meet the targeted populations needs. All of these measures and Metrics will be monitored by the PMO.

North Country Initiative (NCI) has established a Project Management Office (PMO) staffed with a certified Project Management Officer and Program Manager. The PMO will be utilizing (Performance Logic) a project management performance based software platform for monitoring, controlling and reporting (weekly, monthly, quarterly) status / metrics associated with project milestones / deliverables. Performance Logic is specifically designed to the needs of the PPS with project management, implementation, planning, performance monitoring and results oriented

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

project tracking / reporting. Performance Logic incorporates all aspects of DSRIP tracking enhancing NCI's ability to communicate with multiple team members and essential stakeholders.

☑ IPQR Module 5.1 - Prescribed Milestones

Instructions:

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

Milestone/Task Name	Status	Description	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s).	In Progress	Detailed IT current state assessment. Relevant QEs (RHIOs/HIEs) should be involved in performing this assessment.	04/01/2015	03/31/2016	03/31/2016	DY1 Q4	NO
Task 1 Assemble a team to do the assessments and establish a governance committee to oversee the progress and evaluate results.	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 1a. Finalize the assessment team membership to include the NCQA Certified Content Experts (CCE) for the PCMH portion, the PPS Privacy and Security Officer for the security portion, the HIT specialists for the MU portion and an HealtheConnections implementation Specialist for the HIE portion. This team will report to the PPS/Regional CIO - Corey M. Zeigler	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 2. Develop an assessment tool to gather, evaluate and report findings	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 2a. Finalize the assessment tool to include PCMH, Privacy and Security, EHR utilization, including Meaningful Use (MU) and	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	

Page 64 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Milestone/Task Name	Status	Description	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
interoperability capabilities to connect to the HIE.							
Task 3. Conduct IT Readiness assessment and analyze results (survey to include readiness for data sharing at the provider level and a mapping of the various systems in use throughout the network and their potential interoperability)	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 3a. Assess Specialty Practices for IT Readiness	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 3b. Assess Primary Care Clinics/Practices for IT and PCMH Readiness	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 4. Produce a regional report for the governance committee and individual organizational report for the participant	In Progress	See Task	04/01/2015	03/31/2016	03/31/2016	DY1 Q4	
Task 5. Update and approve IT Strategic Plan	In Progress	See Task	04/01/2015	03/31/2016	03/31/2016	DY1 Q4	
Task 6. Map future state needs articulated in IT Strategic Plan against readiness assessment in order to identify key gaps in IT infrastructure, data sharing and provider capabilities	In Progress	See Task	04/01/2015	03/31/2016	03/31/2016	DY1 Q4	
Milestone #2 Develop an IT Change Management Strategy.	In Progress	IT change management strategy, signed off by PPS Board. The strategy should include: Your approach to governance of the change process; A communication plan to manage communication and involvement of all stakeholders, including users; An education and training plan; An impact / risk assessment for the entire IT change process; and Defined workflows for authorizing and implementing IT changes	04/01/2015	03/31/2016	03/31/2016	DY1 Q4	NO
Task 1. Develop Communication and Change Management Stakeholder List	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2

IPQR Module 5.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in creating and implementing your IT governance structure, your plans for data sharing across your network, your approach to data security and confidentiality, and the achievement of the milestones described above, including the potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The major risks to the IT Systems and Processes are; the disparity in systems and competing priorities. Given these risks, the NCI went through a series of meetings and identified appropriate risk mitigation strategies. The following risks were ranked most significant:

Risk 1: There are still some network partners utilizing paper-based records – these providers will be immediately selecting and purchasing an EHR utilizing CRFP capital funds. If the CRFP funds are unavailable, individual entities may have to cover the investment, which they do not have the capital to do and mya have to be heavily incentivized to do.

Risk 2: With so many partners in the PPS, there are extensive variations with EHR platforms, care management, and population health management systems. Our PPS is seeking financial and technological means to not only create a more standard infrastructure, but also one that will be set-up to meet the PCMH 2014 Level 3 standards by DY3. There is a critical need for a regional registry/PHM, which is currently under development – the PPS will hire 2 reporting analysts to accelerate the implementation and meet the reporting demands that are not supplied by the MAPP tool. The risks related to lack of standardization can also be mitigated by forming workgroups around common issues and initiatives that report up to an advisory group. The risks to effectively integrating care will also be hampered by the state and federal regulations that control what can be shared with whom and for how long, which will be a challenge to accommodate with current technologies. Some of this has been addressed with waivers, but others, especially the federal regulations will require further investigation and possibly additional investments in technology. In addition the PPS will engage a proven resource with extensive PCMH and Practice transformation experience to assist all providers.

Risk 3: Data Security Measures may not be in place. Although we are confident that our partners who have or will be signing data agreements will continue to ensure data security measures are in place, in order to mitigate data security risks, we will work with our partners to perform security audits and mitigate any issues that may arise from those audits. The risks can also be mitigated though a common technical, administrative and physical security framework developed, approved and adopted by all participants.

☑ IPQR Module 5.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

It cannot be over stated that all projects and workstreams are dependent in the IT Systems & Processes. As is described throughout this implementation plan, the development of new and / or improved IT infrastructure is a crucial factor underpinning all other workstreams including, in particular, clinical integration, population health management and performance reporting. However, without the right business and financial support, the North Country Initiative (NCI) PPS will not be able to drive the technological infrastructure development program to ensure the success of these workstreams. The interaction between the NCI and the PPS's clinical governance structure (especially the Practitioner

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Champions) will be vital to ensure that the IT infrastructure developed meets the needs of individual practitioners, providers and – particularly when it comes to population health management – the whole PPS network. During development of the IT future state, NCI will work closely with the NCI Finance Team to review available capital and DSRIP funding resources. Adding new technologies, interfaces, reporting and monitoring solutions, and other engagement channels within our PPS will also require additional IT/protatice transformation staffing, which will depend heavily on the NCI Workforce Strategy team. THe PPS will need additional resources for IT support, analysis, and reporting. Along with the need for new IT staff and systems, training the workforce to use new and expanded systems effectively will be crucial.

Page 74 of 418 Run Date : 09/24/2015

☑ IPQR Module 5.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Regional CIO	Corey M. Zeigler	Executed/approved plans
Data, Infrastructure, and Security Lead	Chris Grieco, FDRHPO Chief Security Officer	Data security and confidentiality plan, Data Exchange Plan
Project Management Officer	Ray Moore	Project plans
Clinical lead(s)	Site Leads	Main driver at each participant site for clinical deliverables
Technical lead(s)	IT Champions	Main driver at each participant site for operational deliverables
Clinical Champion	Provider Champions	Main driver at each participant site for provider engagement
RHIO/HIE	Rob Hack, HealtheConnections RHIO	Delivering interoperability for the region

Page 75 of 418

Run Date: 09/24/2015

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 5.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities	
Internal Stakeholders			
Brian Marcolini, NCI Director	Leading the regional clinical integration	Clinical strategies to guide the technology(ies)	
Jeff Bazinet, NCI Data Analyst & Ray Moore, NCI DSRIP Project Management Officer	Population health management and performance reporting	Regional strategies to guide the technology(ies)	
Charlie McArthur, FDRHPO Quality Analyst	Contracted assitance with Performance reporting	Reporting strategies to change behaviors and guide decisions	
Tracy Leonard, FDRHPO Deputy Director	Workforce and Care Coordination Manager	HIT Workforce plan	
Safety Net hospital & all PPS Partners	Adopt IT Systems and Processes Participate in governance and communication plan	Support staff training, implement policies and workflow changes support IT systems and process	
PPS Partner Providers	Support and adhere to changes in workflow	Participate in and support staff training, implement policies and workflow changes to support IT systems and process	
PPS Partners Support Staff	Support and adhere to changes in workflow	Participate in training, implement policies and workflow changes to support IT systems and process	
External Stakeholders			
Fort Drum Regional Health Planning Organization	Contracted PMO staffing and Support, Coordination of Activate Community Based Engagement	Facilitation of Activities Data Analytics Continuity & Credibility for Community Engagement with Population Health Improvement Program and other Community Based programs	
Non-Partner Community Based Organizations	Engagement	Understanding and buy-in	
Medicaid and Uninsured Patients, All Population for Population Health Projects	Participation in utilization of systems as enabled for patient engagement	Utilize health information to improve QoL and Health Outcomes	

Page 76 of 418

Run Date: 09/24/2015

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

IPQR Module 5.7 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

North Country Initiative (NCI) has established a Project Management Office (PMO) staffed with a certified Project Management Officer and Program Manager. The PMO will be utilizing (Performance Logic) a project management performance based software platform for monitoring, controlling and reporting (weekly, monthly, quarterly) status / metrics associated with project milestones / deliverables. Performance Logic is specifically designed to the needs of the PPS with project management, implementation, planning, performance monitoring and results oriented project tracking / reporting. Performance Logic incorporates all aspects of DSRIP tracking enhancing NCI's ability to communicate with multiple team members and essential stakeholders. All IT metrics and measures as outlined below will be provided to the PMO and incorporated in the performance reporting.

Our IT Governance Committee has established expectations with all partners to supply key artifacts and monthly reports on key performance metrics. We will monitor the development and acquisition of key data sharing capabilities across the network and perform ongoing use and performance reports. These will be necessary to ensure continuing progress against our IT change management strategy. Follow-up specific IT questionnaires and surveys will be used periodically to identify any additional gaps, under/non-utilization, or the need for re-training. The individual partners (as applicable) will be responsible for engaging attributed members in QEs and will report on this to the PPS PMO. The HIT Advisory Committee will also report to the Medical Management Committee on the level of engagement of providers in new / expanded IT systems and processes, including data sharing and the use of shared IT platforms.

In addition, the HIT Advisory Committee will use the following ongoing performance reports to measure continuous performance of all partners:

- 1. Annual Gap Assessment Report Partner adoption of IT infrastructure, enablement of clinical workflows, and application of population analytics
- 2. Annual refresh of IT Strategic Plan
- 3. Annual Data Security Audit Findings and Mitigation Plan
- 4. Quarterly workforce training compliance report
- 5. Monthly Project Portfolio 'Earned Value' report for all IT related projects within DSRIP project portfolio
- 6. Monthly HIE usage report
- 7. Weekly Performance report on vendor agreed SLAs

HIT Advisory Committee will also conduct a quarterly survey of IT stakeholders (in particular the users of new infrastructure / systems) to derive qualitative assessments of user satisfaction.

Section 06 – Performance Reporting

☑ IPQR Module 6.1 - Prescribed Milestones

Instructions:

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

Milestone/Task Name	Status	Description	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Establish reporting structure for PPS-wide performance reporting and communication.	In Progress	Performance reporting and communications strategy, signed off by PPS Board. This should include: The identification of individuals responsible for clinical and financial outcomes of specific patient pathways; Your plans for the creation and use of clinical quality & performance dashboards Your approach to Rapid Cycle Evaluation	04/01/2015	03/31/2016	03/31/2016	DY1 Q4	NO
Task 1. Perform a current state assessment of existing reporting processes across the PPS and define target state outcomes.	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 2. Utilize Performance Logic's performance reporting systems and dashboards that provide multi-level detail for reports to the PMO, NCI Board and PPS entities. Monthly dashboard reports will accurately reflect current performance levels of the PPS. The various dashboards will be linked and will have drill-down capabilities within Performance Logic.	In Progress	See Task	04/01/2015	03/31/2016	03/31/2016	DY1 Q4	
Task 3. Establish regular two-way reporting structure to govern the monitoring of performance based on both claims-based, non-hospital CAHPS DSRIP metrics and DSRIP population health metrics (using NCIs PPS-specific Performance	In Progress	See Task	04/01/2015	03/31/2016	03/31/2016	DY1 Q4

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 6.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in implementing performance reporting structures and processes and effective performance management within your network, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Limits for the maximum degree of risk acceptable per project will be identified, documented and mitigated to reduce the degree of impact to Domain milestones / deliverables / metrics. Inclusion of all medical, behavioral, post-acute, long-term care, community-based and social service providers and payers within the PPS network to support our strategy, as measured by provider network list.(1). The primary risk is the uncertainty of not being able to physically produce final deliverables for each project's established speed-&-scale and detailed criteria. In order to mitigate this risk the North Country Initiative (NCI) has established a Project Management Office (PMO) staffed with a certified Project Management Officer and Program Manager. The PMO will be utilizing a project management performance based software platform to monitor, control and mitigate risks associated with project milestones / deliverables. (2). The PPS geographical location, demographics and large coverage area present a high risk in the reform of advance care coordination, management of chronic diseases, population health management and recruiting of qualified professionals. This risk will be mitigated through improved communications, IT systems upgrades, direct Stakeholder involvement and the NCI Board (s) ability to collaborate and work collectively to make informative strategic decisions and issue resolution. (3.) - Prevention and Quality — The region performs poorly compared to NYS on every single Prevention Quality Indicator. In addition, both Medicaid and uninsured indicate quality of care as the main reason for leaving region for care. Existing providers must modify practice of care to address quality prevention through patient centered medical home (PCMH) and must place a strong focus on cardiac, diabetes, COPD, and mental illness and substance abuse prevention due to the prevalence of these diseases and their impact on avoidable admissions and emergency room visits. NCI will mitigate risk by monitoring clinical performance, providing

☑ IPQR Module 6.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

- 1. Governance: Performance reporting has significant dependence on the Governance workstream. Effective stakeholder involvement and a well defined organizational structure will enhance the PPSs ability to create a value based performance oriented culture that focuses on quality healthcare and establishes clear lines of responsibilities and accountability.
- 2. Workforce: Performance reporting will rely heavily on the abilities of the Workforce Strategy workstream to enhance the PPSs efforts to develop a consistent performance reporting culture that captures detailed training data of training conducted across the PPS network. Training on the use of critical systems and processes that promote operational excellence in quality healthcare will be vital. Organizations, Practitioners and key support staff will promote excellence of quality and will be a focal point of the PPSs training strategy for the Workforce workstream.
- 3. IT Systems and Processes: Accurate Performance reporting will depend on the PPSs ability to validate and verify data provided by Organizations, Practitioners, Clinics and key support staff. There will be a critical dependency for a successful implementation of a performance

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

reporting culture and successful transformation of the PPSs IT Departments to ability customize existing systems, implement the new networks, and IT systems that will be utilized in performance reporting of patient outcome metrics. The project effectiveness and satisfaction will be evaluated in a continuous basis to ensure actual project benefits are being realized.

4. Governance, Finance, Clinical & Practitioner Engagement: It will be critical to Performance Reporting that all workstreams take a holistic 360 project approach and continuously evaluate the effectiveness the project, stakeholder management, project team involvement and whether the project will achieve established / identified goals. Clinical Integration and Practitioner Engagement are essential to the PPSs intent to create a common performance culture throughout the NCI PPS network, and to institute the new performance reporting practices within business, as a standard of excellence clinical practice.

Page 84 of 418 **Run Date**: 09/24/2015

☑ IPQR Module 6.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Project Management Office and Project Management Officer	Ray Moore	Responsible for project management tracking and reporting for the 11 DSRIP projects, including their role in the performance reporting structures and processes in place across the PPS
Program Managers, Project Leads and specified entities (finance)	Overall Leads established, Per Partner Site /Project leadsTBD	Members of Project Teams Ultimately accountable for quality of patient care and financial outcomes per project Accountable for the realization and continuous improvement of the multi-disciplinary care pathways underlying their respective projects
Project Champions	NCI Board	Responsible for promoting a culture of continuous performance and improvement throughout the project. Responsible to ensure practitioners' are involved in the performance monitoring processes and sustainment

Page 85 of 418

Run Date: 09/24/2015

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 6.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Lead Applicant/Entity	North Country Initiative, LLC with Samaritan as signatory	Bylaw and Policy Development, funding and staff resources
Safety Net Hospital partners	Actively and accurately report on deliverables	Active participation in governance and committee activities Meet timelines for deliverables and reporting of deliverables Participate in RCE to improve outcomes and deliverables where/when changes are needed
All PPS Partners	Actively and accurately report on deliverables	Active participation in governance and committee activities Meet timelines for deliverables and reporting of deliverables Participate in RCE to improve outcomes and deliverables where/when changes are needed
External Stakeholders		•
Fort Drum Regional Health Planning Organization	Workforce Vendor Assistance IT infrastructure Contracted PMO staffing and Support, Coordination of Activities	Training and Education IT Partnership Facilitation of Activities Continuity & Credibility
Non-Partner Community Based Organizations	Engagement	Understanding and buy-in
Medicaid and Uninsured Patients, All Population for Population Health Projects	Participation in neighborhood and community engagement activities	Information to ensure projects and activities are effective and appropriately targeted

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 6.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support your approach to performance reporting.

North Country Initiatives ability to obtain information quickly on a patient's health, health care, and potential treatments is critically important. Additionally, the ability to share this information in a timely manner with other providers caring for the patient is essential to the delivery of safe, patient-centered, coordinated, and efficient health care. To meet this need, collaboration across the entire PPS is underway to develop and leverage: electronic health record (EHR) systems with decision support for clinicians, a secure platform for the exchange of patient information across health care settings, and data standards that will make shared information understandable to all users. Efforts are also underway to complete the implementation of a population health management tool that will allow our PPS to analyze, and aggregate real time data on our participants and those beneficiaries who opt in. NCI through the use of this tool will also be able to leverage information systems for mental health and substance abuse providers. Ensuring that the developing systems for mental health and substance abuse conditions are aligned with general, medical care needs is essential for improving the quality and continuity of care across the system. NCI's PPS will not be successful within DSRIP or any other Healthcare reform initiative if our information technology cannot produce reports on our ability to deliver safe, effective, patient-centered, timely health care. Those reports will be allow our PPS to take data and turn that information into healthcare decisions which will allow for improved patient outcomes and a reduction in healthcare cost.

All staff and participating providers will need to be trained on protecting health information through appropriate privacy and security practices. They will need to be trained on effective strategies to achieve ongoing, industrywide Health IT standards to include information tools, specialized network functions, and security protections for the interoperable exchange of health information. They will need to learn how to identify health IT standards for use by identifying and prioritizing specific uses for which health IT is valuable, beneficial and feasible. Overall, strong commitment from PPS to train, understand, and embrace the development of a shared, secure IT infrastructure will ultimately impact the successful use of IT functionality to improve outcomes.

It is vital to recognize the importance that our IT infrastructure has on our regions ability to reverse the cost curve and to improve the outcome of all the patients this region serves. Improvement in Information technology has been a commitment this region has made and will maintain throughout the regions transformation.

Instructions:

Please describe how you will measure the success of this organizational workstream.

Page 86 of 418 Run Date: 09/24/2015

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

North Country Initiative (NCI) has established a Project Management Office (PMO) staffed with a certified Project Management Officer and Program Manager.

The PMO will be utilizing (Performance Logic) a project management performance based software platform for monitoring, controlling and reporting (weekly, monthly, quarterly) status / metrics associated with project milestones / deliverables. Performance Logic is specifically designed to the needs of the PPS with project management, implementation, planning, performance monitoring and results oriented project tracking / reporting. Performance Logic incorporates all aspects of DSRIP tracking enhancing NCI's ability to communicate with multiple team members and essential stakeholders.

Delivering analytics and reports for state submission on milestones by DSRIP year (DY), financial incentives and DSRIP clinical measure domains including: (1) Patient Safety (2) Clinical Process/Effectiveness (3) Efficient Use of Healthcare Resources (4) Population/Public Health (5) Clinical Process/Effectiveness (6) Care Coordination (7) DSRIP Efficiency (8) Speed & Scale Utilization.

Reports and Metrics will be constructed using standard data definitions to facilitate timely, accurate, and clinically informed reporting that provides project oversight and feedback across organizational levels within the PPS. Data will be compiled and formulated to meet the intent of NYS reporting procedures and Achievement Values. Monthly and Quarterly: NCI PMO will evaluate and validate each performance and process measure and milestone on whether the target / milestone was "achieved" or "not achieved". For targets / milestones that are "not achieved" further review will be conducted immediately to determine the root cause for "not achieved" and change management will be instituted if warranted to bring target / milestone to an "achieved" rating.

Domain 1: Project Milestones & Metrics are based largely on investments in technology, provider capacity and training, and human resources that will strengthen the ability of the PPS to serve its target populations and successfully meet DSRIP project goals.PPS project reporting will be conducted in two phases: A detailed Implementation Plan due in April 1, 2015 and ongoing Quarterly Reports throughout the entire DSRIP period. Both the initial Implementation Plan and Quarterly Reports shall demonstrate achievement towards the implementation of the IDS strategy and action plan, governance, completion of project requirements, scale of project implementation, and patient engagement progress in the project.

Quarterly Reports: PPS will submit quarterly reports on progress towards achievement of project requirements as defined in Domain 1 DSRIP Project Requirements Milestones & Metrics. Quarterly reports to the Independent Assessor will include project status and challenges as well as implementation progress. The format and content of the quarterly reports will be developed by the Independent Assessor and the Department of Health for the purpose of driving project payment upon completion of project milestones as indicated in the project application.

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 7.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the current level of engagement of your physician community in the DSRIP program and describe the key challenges or risks that you foresee in implementing your plans for physician engagement and achieving the milestones described above. Describe any potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

1. Risk: Geographic spread of PPS Region fpr Clinical Champions

Mitigation: NCI Board and Committees includes Providers champions from across the PPS geographic region

2. Risk: Geographic spread for training

Mitigation: Training offered at Medical staff and other group settings. In addition a Webinar will be developed that can be utilized and accessed in a lunch and learn format

3. Risk: Change resistance

Mitigation: Diversified Clinical peer leaders, evidence-based changes, regular performance reports, incentives

IPQR Module 7.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

- 1. Performance Reporting and Clinical Integration: NCI communication plans for practitioner engagement depend on effective, rapid communication process and regular two-way communication channels including for performance reporting and clinical integration. If clinical outcomes are to be met, communication of clinical activities through practioner enagement must be utilized to address poor performing areas
- 2. Governance: The role of the Practitioner Champions is central to NCI plans for practitioner engagement. NCI Clinical Champions actively participate in the governance structure including the Executive Body on behalf of the practitioners and will be responsible for communicating information to those practitioners groups effectively. NCI practitioner engagement is dependent on an effective governance structure and processes.
- 3. Financial Sustainability, Budget and Funds Flow: Practioner engagement in the finance committees and the funds flow for performance and value based payment are the keys to changing the healthcare delivery system into a outcome focused system.
- 4. Workforce: Practitioners are a significant component of the helathcare workforce therefore the training of practioners is directly linked to the workforce workstream.
- 5. IT Systems and Processes: EMR, PHM (disease regsitry), and HIE Technology provides the efficient means standardize measure and improve PH outcomes and the information to inform performance reporting for practioner engagement.

Page 93 of 418

☑ IPQR Module 7.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
NCI Board	Board Members	Review and Accept Practitioner Communication and Training Plan
NCI Communication Committee	Include Practitioner Engagement in \two-way Communication Plan	Communication Plan that addresses Practitioner Engagement
NCI Director	Responsible for overall oversight of all NCI Activities	Ensure that all workstreams endorse and adopt plans as applicable
NCI Care Management Committee	Inform training/education for practitioners regarding Care Management Plan	Care Management Plan included in training
Safety Net hospital partners	Adopt and participate in plans and training as applicable	Trained medical professional staff, implemented plans to impact improved practitioner engagement
All PPS Partners	Adopt and participate in plans and training as applicable	Trained medical professional staff, implemented plans to impact improved practitioner engagement
External Stakeholders		
Fort Drum Regional Health Planning Organization	Contracted PMO staffing and Support, Coordination of Activities Community Based Engagement	Facilitation of Activities Data Analytics for performance report Continuity & Credibility for Community Provider Practitioner Engagement
Non-Partner Community Based Organizations	Engagement Potential to provide service	Understanding and buy-in Ability to facilitate larger community understanding
Medicaid and Uninsured Patients, All Population for Population Health Projects	Trained, engaged providers support better outcomes for patients	Feedback on provider through CAHPS

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Page 95 of 418

Run Date: 09/24/2015

Instructions :

IPQR Module 7.7 - IT Expectations

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

Health Information Technology or HIT platforms to support communication between practitioners will be critical for engaging practitioners in DSRIP and for the sharing of best practices. We are developing a PHM platform to support the NCI PPS to provide progress reporting and feedback on measures and chosen protocols.

The ability for providers to share clinical information easily is important, not just for improvements in clinical processes and outcomes but also for the ongoing buy-in of individual practitioners. It is critical that the IT infrastructure developed be integrated into practitioner workflow and is seen as a tool to improve care, not another non-value-add task they need to complete.

Improved IT infrastructure will also be important for the delivery of our practitioner engagement education and training materials. We are integrating telemedicine tools (video conferencing) and other collaborative tools to assist providers in sharing their knowledge, best practices and enhancing the learning environment across the PPS and beyond.

☑ IPQR Module 7.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

NCI will monitor Practioner Engagement through NCI governance inclusion, board and committee meeting attendence, communication plan development and communication plan activites completeion, the trainings/presentations/education developed and conducted for providers groups and the delivery of aggregate p[rovider group reporting.

These activities will be monitored by the PMO utilizing (Performance Logic) a project management performance based software platform for monitoring, controlling and reporting (weekly, monthly, quarterly) status / metrics associated with project milestones / deliverables. Performance Logic is specifically designed to the needs of the PPS with project management, implementation, planning, performance monitoring and results oriented project tracking / reporting. Performance Logic incorporates all aspects of DSRIP tracking enhancing NCI's ability to communicate with multiple team members and essential stakeholders.

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Milestone/Task Name	Status	Description	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
overarching plan to achieve Level 3 certification in all relevant providers							
Task 6. Ensure care guidelines for providers are developed for priority clinical issues as required for PPS projects with clinical metrics to monitor progress in managing population health	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task 7. Reference and incorporate health literacy and cultural competency strategy for targeting and addressing health disparities	In Progress	See Task	04/01/2015	06/30/2016	06/30/2016	DY2 Q1	
Milestone #2 Finalize PPS-wide bed reduction plan.	In Progress	PPS Bed Reduction plan, signed off by PPS Board. This should set out your plan for bed reductions across your network, including behavioral health units/facilities, in line with planned reductions in avoidable admissions and the shift of activity from inpatient to outpatient settings.	04/01/2015	03/31/2017	03/31/2017	DY2 Q4	NO
Task 1. Perform a gap analysis to accurately determine current inpatient bed capacity/bed constraints across the PPS (determine optimal inpatient delivery model)	In Progress	See Task	04/01/2015	03/31/2016	03/31/2016	DY1 Q4	
Task 2. Establish Service Utilization Monitoring Team made up of an assigned lead from each impacted hospital to provide oversight in measuring, evaluating, and recommending excess bed reductions to NCI Governing Board. (determine the number beds that can be reduced vs. percent of staffed beds.)	In Progress	See Task	04/01/2015	06/30/2016	06/30/2016	DY2 Q1	
Task 3. Each participating hospital facility will develop a strategic plan that outlines: medical village services, inpatient capacity transition plan, stakeholder engagement processes, capital improvement requirements, geographical location of medical village, marketing and consumer education and community involvement.	In Progress	See Task	04/01/2015	06/30/2016	06/30/2016	DY2 Q1	

Page 100 of 418 **Run Date**: 09/24/2015

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Milestone/Task Name	Status	Description	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Task 4. The NCI PPS collaboratively compiles a strategic plan that outlines: medical village services, inpatient capacity transition plan, stakeholder engagement processes, capital improvement requirements, geographical locations of medical villages, marketing and consumer education and community involvement.	In Progress	See Task	04/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 5. Each plan will detail community involvement: requirements/roles and responsibilities that will be completed during the project lifecycle	In Progress	See Task	04/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 6. Approval of Individual Strategic Plans by individual hospital boards.	In Progress	See Task	04/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 7. Approval of Individual Strategic Plans by NCI Governing Board	In Progress	See Task	04/01/2015	12/31/2016	12/31/2016	DY2 Q3
Task 8. Approval of NCI PPS collaborative Medical Village strategic Plan by NCI Governing Board.	In Progress	See Task	04/01/2015	12/31/2016	12/31/2016	DY2 Q3

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 8.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

- 1. Population Health Risk: Provider engagement/burnout
- Mitigation: Provide external support to assist practices. Develop by practice project plan to include all PCP DSRIP clinical guidelines, workflow changes and training directly into PCMH implementation (measure twice-cut once approach)
- 2. Population Health Risk: Providers not reporting discreetly in EMRs to allow clinical measures to be mapped to disease registry for reporting and tracking purposes.
- Mitigation: Engage data analysts for data quality analysis of every PHM interface by provider to determine if measure correctly mapped, if software can provide data discreetly and then develop per provider plan to improve discreet data element entry to EMR
- 3. Population Health Risk: PHM vendor inability to meet aggressive DSRIP schedule to deliver by provider reporting to inform incentive plan development. It is so easy to put disease registry capability on pare and a completely different matter to effectively map and launch from multiple disparate EMRs
- Mitigation: Service Level Agreements built into PHM contracts. Understanding and agreement of support level needed by both the PPS and vendor prior to implementation.
- 4. Bed Reduction Risk: Impact is higher or lower than anticipated during planning phase
- Mitigation: Regular ongoing monitoring prepared for RCE
- 5. Bed Reduction Risk: Increased insurance utilization and patient activation through PAM, initially increases instead of decreases bed utilization Mitigation: Performance monitoring identification of trends to inform planning on regular basis

☑ IPQR Module 8.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

- 1. Governance: NCI Governance will need to oversee development of incentive plan to drive improved population health outcomes.
- 2. Financial Sustainability: The Bed Reduction plan is tied directly to the impact analysis and other financial activities being undertaking under the financial sustainability work stream. NCI Finance Committee will need to monitor financial impact assessment and ongoing metrics.
- 3. Budget and Funds Flow: Budget and funds flow are closely tied to both population health activities and bed reduction/revenue losses
- 4. Workforce: Support at provider level (as part of practitioner engagement training plan) to train providers to use and apply information learned from the registry; how to implement established care guidelines developed as part of project implementations will cross into workforce training sector
- 5. Practitioner Engagement, Clinical Projects, Clinical Integration and Care Coordination: If Population Health clinical outcomes are to be met all

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

clinical activities must align and be prepared to address poor performing areas

6. IT Systems and Processes: EMR, PHM, and HIE Technology provides the only efficient means standardize measure and improve PH outcomes.

Page 103 of 418 **Run Date**: 09/24/2015

DSRIP Implementation Plan Project

Page 104 of 418 Run Date : 09/24/2015

☑ IPQR Module 8.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational work stream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities			
NCI Data Analyst	Jeff Bazinet	Inventory available data sets and PHM disease registry capacity			
FDRHPO PHIP Program Manager	Ian Grant	Engage regional Population Health Improvement Program			
Regional Chief Information Officer	Corey Zeigler	Evaluate IT capacity, identify gaps, develop plan			
Senior Nurse Informaticist	Liza Darou	Establish NCI PPS PCMH Certification Team			
NCI Medical Management (clinical) Committee	Committee Members	Ensure care guidelines are developed			
Workforce Lead & Workforce Vendors	Tracy Leonard Greg Dewitt	Ensure workforce assessment includes practice skills/resources			
NCI Health Literacy & Cultural Competency Committee	Committee Members	Ensure target population for health disparities are identified			
NCI Safety Net Hospital Partners	Samaritan Medical Claxton Hepburn Carthage Area River Hospital Massena Memorial Clifton Fine	Assign staff to service utilization monitoring team			
Service Utilization Monitoring Team	TB Assigned	Monitor and report bed utilization and reduction metrics			

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Page 105 of 418 Run Date : 09/24/2015

☑ IPQR Module 8.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
NCI Board of Managers	Board Members	Review and accept plans
NCI Communication Committee	Include PH in Communication Plan	Communication Plan that addresses PH
NCI Director	Responsible for overall oversight of all NCI Activities	Ensure that all work streams endorse and adopt plans as applicable
NCI Care Management Committee	Include PH as Base component for Care Management Plan	Care Management Plan addresses Population Health
Safety Net hospital partners	Adopt and participate in plans and training as applicable	Trained staff, implemented plans to impact improved population health and achievement of bed reductions
All PPS Partners	Adopt and participate in plans and training as applicable	Trained staff, implemented plans to impact improved population health
External Stakeholders		
Fort Drum Regional Health Planning Organization	Contracted PMO staffing and Support, Coordination of Activate Community Based Engagement	Facilitation of Activities Data Analytics to identify Continuity & Credibility for Community Engagement with Population Health Improvement Program and other Community Based programs
Non-Partner Community Based Organizations	Engagement Potential to provide service	Understanding and buy-in
Medicaid and Uninsured Patients, All Population for Population Health Projects	Participation in neighborhood and community engagement activities	Information to ensure projects and activities are effective and appropriately targeted

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Page 106 of 418 Run Date: 09/24/2015

IPQR Module 8.7 - IT Expectations

Instructions:

Please describe the current Population Health Management IT capabilities in place throughout your PPS network and what your plans are at this stage for leveraging these capabilities and/or developing new IT infrastructure.

One of the key principles of our approach to population health management is that all care will become 'data-driven'. Our data & analytics team will be responsible for ensuring that practitioners have the data and the tools available to allow them to develop interventions and services that will address the wider determinants of population health for their local population. This effort will be facilitated by the use of a regional PHM solution and also plan to utilize the MAPP PPS-specific Performance Measurement Portal, which will help our team monitor performance of both claimsbased, non-hospital CAHPS DSRIP metrics AND DSRIP population health metrics. The analysis of population-level outcome data will also be the basis for our assessment of the impact of population health management on the priority groups and clinical areas.

Our PPS is fully partnered with HealtheConnections (HeC), our RHIO, and leadership will require all partners to connect with HeC to service our attributed population. This effort will be conducted in tandem with the EHR platforms, care management, and population health management systems that we have already implemented, or are currently implementing.

IPQR Module 8.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

The NCI will utilize a disease registry to monitor and manage population health from a clinical perspective. These clinical metrics along with all organizational measures and metrics will be monitored and reported by the NCI PMO as outlined below.

The North Country Initiative (NCI) has established a Project Management Office (PMO) staffed with a certified Project Management Officer and Program Manager. The PMO will be utilizing (Performance Logic) a project management performance based software platform for monitoring, controlling and reporting (weekly, monthly, quarterly) status / metrics associated with project milestones / deliverables. Performance Logic is specifically designed to the needs of the PPS with project management, implementation, planning, performance monitoring and results oriented project tracking / reporting. Performance Logic incorporates all aspects of DSRIP tracking enhancing NCI's ability to communicate with multiple team members and essential stakeholders.

Section 09 – Clinical Integration

☑ IPQR Module 9.1 - Prescribed Milestones

Instructions:

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

Milestone/Task Name	Status	Description	Start Date	End Date	Quarter End Date	Reporting Year and Quarter	AV
Milestone #1 Perform a clinical integration 'needs assessment'.	In Progress	Clinical integration 'needs assessment' document, signed off by the Clinical Quality Committee, including: Mapping the providers in the network and their requirements for clinical integration (including clinical providers, care management and other providers impacting on social determinants of health) Identifying key data points for shared access and the key interfaces that will have an impact on clinical integration Identify other potential mechanisms to be used for driving clinical integration	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	NO
Task 1. Map the providers in the network and their requirements for clinical integration (four pillars framework)as it relates to achievement of DSRIP projects - this will be done in partnership and referencing the other assessments/activities (IT, Workforce, VBP, Communication, care management, funds flow) that are being concurrently completed.	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 2. Incorporate clinical integration needs assessment into individual DSRIP project implementation planning and assessments to include the four pillars framework: provider leadership, aligned incentives; clinical and care management programs; technology/ data infrastructure to support integration	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	

Page 109 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Milestone/Task Name	Status	Description	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Determine any gaps based on the four pillars framework to address the project target population needs							
Task 4. Clinical integration 'needs assessment' document, signed off by the Clinical Quality Committee	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Milestone #2 Develop a Clinical Integration strategy.	In Progress	Clinical Integration Strategy, signed off by Clinical Quality Committee, including: Clinical and other info for sharing Data sharing systems and interoperability A specific Care Transitions Strategy, including: hospital admission and discharge coordination; and care transitions and coordination and communication among primary care, mental health and substance use providers Training for providers across settings (inc. ED, inpatient, outpatient) regarding clinical integration, tools and communication for coordination Training for operations staff on care coordination and communication tools	04/01/2015	03/31/2016	03/31/2016	DY1 Q4	NO
Task 1. Utilizing needs assessment, develop clinical integration strategy incorporated into project plans	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 2. Ensure strategy includes the four pillars: provider leadership, aligned incentives; clinical and care management/ transition strategy; technology/ data infrastructure to support integration	In Progress	See Task	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task 3. Include training for operational staff on care coordination and communication tools (this is also included in project implementation plans - it is not expected that training will be duplicative but that training meeting deliverables will be reflected in multiple applicable places in quarterly reports)	In Progress	See Task	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task	In Progress	See Task	04/01/2015	03/31/2016	03/31/2016	DY1 Q4	1

☑ IPQR Module 9.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in improving the level of clinical integration throughout your network and achieving the milestones described above. Describe potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

1. Risk: Geographic spread of Clinical Champion representation

Mitigation: NCI Board and Committees includes Providers champions from across the PPS geographic region

2. Risk: Geographic spread for training

Mitigation: Training offered at Medical staff and other group settings. In addition a Webinar will be developed that can be utilized and accessed in a lunch and learn format

3. Risk: Change resistance

Mitigation: Peer leaders, evidence-based changes, regular performance reports, office champions, incentives

4. Risk: Data gathering and interfaces with Disease registry

Mitigation: Data quality surveillance team deployed and other integration options being utilized like HIE.

IPQR Module 9.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Clinical Integration is what DSRIP is attempting to achieve to improve care and reduce costs for the Medicaid population served. The four pillars of clinical integration are encompassing of all the DSRIP work streams. In particular:

- 1. Performance Reporting and Communication: NCI communication plans for practitioner engagement and clinical integration depends on effective, rapid communication process and regular two-way communication channels including performance reporting and clinical integration.
- 2. IT Systems and Processes: Without IT Systems it is impossible to have the effective clinical performance monitoring processes that are the bedrock of CI.
- 2. Governance: The role of the Practitioner Champions is central to NCI plans for clinical integration. NCI Clinical Champions must be empowered to actively participate in the governance structure including the Executive Body on behalf of the practitioners and communicating information back down to those practitioners effectively. The NCI clinical integration strategy is dependent on an effective governance structure and processes.

Page 113 of 418

Run Date: 09/24/2015

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 9.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
NCI Board	Board Chair, Dr. Collins Kellogg Board Members	Inclusion of Providers in Governance and Committee Structure
NCI Medical Management (Clinical) Committee	Chair, Dr. Steven Lyndaker Members	Review training webinar and material, ensure proper selection and implementation of evidence based guidelines and protocols
NCI Program Manager	Celia Cook	Development of Communication Plan Assistance in webinar and other communication material development
NCI Project Management Officer	Ray Moore	Development of standard performance reports
NCI Data Analyst	Jeff Bazinet	Ensure disease registry capability for quality performance reporting for inclusion in standard reports
NCI Board Provider Champions	Dr. Collins Kellogg Dr. Gary Hart Dr. Steven Lyndaker Dr. David Rechlin Dr. Mario Victoria Dr. Mark Parshall Dr. Michael Seidman Dr. Michael Woznicki Dr. Howard Meny Dr. Jack Rush Dr. Jason White Erin Cooney, LCSW-R Jeff Perrine, FNP Angela Doe, LMHC	Facilitate education of medical staffs and other provider groups on clinical integration
NCI Director	Brian Marcolini	
Regional CIO	Corey Zeigler	Facilitate development of webinar and other education materials
Workforce Lead	Tracy Leonard	

Page 114 of 418

Run Date: 09/24/2015

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 9.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
NCI Board	Board Members	Review and Accept Practitioner Communication and Training Plan
NCI Communication Committee	Include Practitioner Engagement in \two-way Communication Plan	Communication Plan that addresses Practitioner Engagement
NCI Director	Responsible for overall oversight of all NCI Activities	Ensure that all work streams endorse and adopt plans as applicable
NCI Care Management Committee	Inform training/education for practitioners regarding Care Management Plan	Care Management Plan included in training
Safety Net hospital partners	Adopt and participate in plans and training as applicable	Trained medical professional staff, implemented plans to impact improved practitioner engagement
All PPS Partners	Adopt and participate in plans and training as applicable	Trained medical professional staff, implemented plans to impact improved practitioner engagement
External Stakeholders		
Fort Drum Regional Health Planning Organization	Contracted PMO staffing and Support, Coordination of Activate Community Based Engagement	Facilitation of Activities Data Analytics for performance report Continuity & Credibility for Community Provider Practitioner Engagement
Non-Partner Community Based Organizations	Engagement Potential to provide service	Understanding and buy-in Ability to facilitate larger community understanding
Medicaid and Uninsured Patients, All Population for Population Health Projects	Trained, engaged providers support better outcomes for patients	Feedback on provider through CAHPS

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

IPQR Module 9.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

Effective clinical integration will require relevant information to be readily accessible for providers across the patient care spectrum. For the providers, this will mean integration into new or expanded clinical data systems, such as population health management disease registry capability, which NCI will roll out across the primary care provider network. A core element of NCI's clinical integration needs assessment will be identifying where new or expanded data-sharing systems are required or where a different approach is required. At this stage, the immediate priorities (quick wins) include: medication reconciliation, patient transfers and transport, and outpatient clinic scheduling.

Achieving the buy-in of NCI's large community of downstream providers to the new work flows that fall under the clinical integration work stream will greatly depend on the providers and the individual practitioners having easily accessible methods of communicating with one another. We have secure messaging, weekly communication updates and other collaboration tools to ensure providers are aware of the project(s) and have a method to drive the success through their engaged guidance.

IPQR Module 9.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

NCI will use the four pillars of Clinical Integration to monitor and evaluate our networks success. First, NCI will review, evaluate and confirm performance of our network to the standards and measures of DSRIP, specific disease programs, care protocols and clinical metrics utilizing disease registry capability. These will be tracked to ensure NCIs ability to meet the 4 pillars of clinical integration and to ensure incentives are paid out that are aligned with positive patient outcomes.

Secondly, NCI will monitor progress of PPS providers connected to the Health Information Exchange, Disease Registry and those utilizing Patient Portals and secure messaging for Domain 1 metrics through the PMO and performance logic software. Third, NCI will measure success through surveying providers to gain feedback on the effectiveness of clinical integration and care coordination within our region. Finally NCI understands that proper clinical integration within the DSRIP program will reduce hospitalizations (PQI's) and potentially preventable visits. NCI will have a coordinated plan that will monitor and assess our progress towards those milestones.

The North Country Initiative (NCI) has established a Project Management Office (PMO) staffed with a certified Project Management Officer and Program Manager. The PMO will be utilizing (Performance Logic) a project management performance based software platform for monitoring, controlling and reporting (weekly, monthly, quarterly) status / metrics associated with project milestones / deliverables. Performance Logic is specifically designed to the needs of the PPS with project management, implementation, planning, performance monitoring and results oriented project tracking / reporting. Performance Logic incorporates all aspects of DSRIP tracking enhancing NCI's ability to communicate with multiple

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Section 10 – General Project Reporting

☑ IPQR Module 10.1 - Overall approach to implementation

Instructions:

Please summarize your intended approach to the implementation of your chosen DSRIP projects, including considerations around how this approach will allow for the successful development of concurrently implementing DSRIP projects.

The overall approach that the NCI PPS is taking towards the implementation of its 11 DSRIP projects is based on delegated governance, clinical leadership, meaningful communication, transparency, interoperable HIT, standardization of protocols, and aligned incentives with change management as the critical factor.

NCI fully understands the difficulty of what is being undertaken through DSRIP. This is a culture shift that flips the healthcare business model. The only way to successfully and sustainably achieve this shift is to approach it from a change management lens. The NCI implementation team has identified the 10 top keys to NCI's success to be applied to all projects:

- 1.Change management: Every single DSRIP project and workflow requires change management. Managing this type of change requires a shared NCI organizational culture that conveys a sense of identity for NCI partners, facilitates commitment to something larger than self-interest, enhances stability of the system while remaining flexible to change in response to new demands or strategies and serves as a mechanism for decision-making. The NCI will act as an integrated delivery system, adopting system-wide workflows, contracting for system-wide services, and implementing projects systematically across partners.
- 2.Proceed as if success is inevitable: We will proceed as if success is inevitable. And then make sure it is, by utilizing detailed tracking of milestones and metrics to ensure outcomes are being met and RCE course corrections are made.
- 3.Trust each other: NCI cannot and will not know all of the answers, this is new territory. We have to trust each other to watch each other's backs and look ahead for hazards. A strong delegated inclusive governance structure will put in place the processes for trust and decision-making.
- 4.We have the power to engage patients: NCI must identify the patients' needs and align our priorities with those needs. Patient engagement crosses all projects. Two-way patient engagement strategies will contribute to the success of all projects.
- 5. Confidence: We and only we, know how to do this for the population we serve. We will maintain confidence that together we either know or can find the answers we need to be successful. Sharing and adoption of best practices across projects is critical to success.
- 6. Accurate data and analysis of that data: Accurate data will be needed to drive all projects and lead to NCI's future success. That means EMR data going in must be clean, it must be mapped to disease registry accurately and it must be presented in manner that allows it to be used to drive decisions. Thus confidence, see 5.
- 7. Increased primary care access: We cannot succeed unless we expand primary care access in multiple ways. More providers, extended hours, new locations and ensuring physicians practice at the top of their licensure.
- 8. Value community based partners: Hospitals and physicians cannot do this alone. Community based providers must be active and engaged across all projects and involved in governance. They are catalysts and keys to DSRIP success.
- 9. Design for behavior change: When the system, beliefs or knowledge that creates a behavior changes, the behavior changes. This is true for providers, patients and communities. We need to identify design means to make the needed change easy for project success.
- 10. Understand the shared bucket: Transparency of funds flow is critical so that all understand the shared bucket and the expectations for their share. Effort equals reward based on project. In addition, understanding that our MCOs also have a shared bucket and how we can contribute to their success will be critical to VBP in the future.

By approaching the Project Implementations in a cohesive manner the NCI has the most potential to achieve all DSRIP outcomes and to be

Page 118 of 418

Run Date: 09/24/2015

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

prepared to sustain DSRIP created change into the future.

☑ IPQR Module 10.2 - Major dependencies between work streams and coordination of projects

Instructions:

Please describe how your approach will handle interdependencies between complementary projects, as well as between projects and cross-cutting PPS initiatives - for example, an IT infrastructure upgrade, or the establishment of data sharing protocols.

The NCI's approach to handling the major independencies between projects and workstreams is to handle these interdependencies as an integrated delivery system rather in separate partner silos. This approach will ensure that partners will not be working towards similar goals or project requirements independently, thereby doubling effort and potentially creating multiple approaches to solving the same issue. This integrated delivery system approach includes contracting for services in a centralized manner, centralized project leads, identification of clinical workflows and governance.

- 1. The NCI will contract for services in a centralized manner for all PPS partners with similar needs. This includes:
- a. EMR, HIE, PCMH and PHM implementation support. In this manner as the EMR is implement, PCMH workflows are included along with the clinical workflows for the projects under the guidelines identified by the Med Management Committee.
- In addition this ensures that rollout across the PPS is coordinated via a single staggered implementation plan allowing for maximum economy of scale and resources with maximum impact on project success.
- b. Services not currently covered like Diabetes Prevention Programs, Tobacco Cessation Programs, Diabetes and Psychiatry support for practices via telemedicine and care transitions/care management.
- c. Training and education such as PAM, Community Health Worker, Care Management Training, Health Literacy and Cultural Competency. In this manner all PPS staff will have the same training and same understanding creating a truly integrated
 - knowledge set and operational culture.
- 2. The NCI will have a centralized Project Lead for each Major workstream who will coordinate all activities with in that workstream between partners. These major cross cutting workstreams are: Care Coordination/Transitions, Workforce, IT Systems and Processes, Communication Planning, Community Engagement, Finance and Contracting and Population Health.
- 3. The NCI Medical Management Committee is identifying clinical workflow overlap and developing EMR specific toolkits for practices to streamline processes for value add. Clinical Leadership and clinical champions will be key to successful DSRIP implementations and outcomes.
- 4. The NCI has or will establish governance structures for all major workstreams that cut across multi sectors that require governance decisions. This includes clinical governance, HIT governance, data governance, workforce governance, compliance governance, and financial governance.

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 10.3 - Project Roles and Responsibilities

Instructions:

Please outline the key individuals & organizations that play a role in the delivery of your PPS's DSRIP projects, as well as what their responsibilities are regarding governance, implementation, monitoring and reporting on your DSRIP projects.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Safety Lead Applicant	Samaritan Medical Center	Compliance Officer and Plan Fiduciary Lead - funds distribution based on NCI Finance Committee and Board Governance Recommendations
NCI Board Chairman	Board Chair, Dr. Collins Kellogg	Facilitate Board of Manager Activities, Lead Board spokesperson & Clinical Champion
NCI Medical Director	Dr. Steven Lyndaker	Review training webinars and material Ensure selection and implementation of evidence based guidelines and protocols Develop and assist practice workflow strategies Clinical quality measures
NCI Board Provider Champions	Dr. Collins Kellogg Dr. Gary Hart Dr. Steven Lyndaker Dr. David Rechlin Dr. Mario Victoria Dr. Mark Parshall Dr. Michael Seidman Dr. Michael Woznicki Dr. Howard Meny Dr. Jack Rush Dr. Jason White Erin Cooney, LCSW-R Jeff Perrine, FNP Angela Doe, LMHC	Physician/Provider Champions and leadership Facilitate education of medical staffs and other provider groups on clinical integration
NCI Director	Brian Marcolini	Overall NCI Leadership. Coordinate overall development of VBP baseline assessment and plan for achieving value based payments. Coordinate approach and engagement of process to develop PPS VBP Baseline Assessment and Adoption Plan. Ultimately responsible for the development of the PPS VBP Baseline Assessment and Adoption Plan.
NCI Program Manager	Celia Cook	Documentation and facilitation of Communication and Community

Page 120 of 418 **Run Date**: 09/24/2015

DSRIP Implementation Plan Project

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
		Engagement Plans Assistance in webinar and other communication material development Overall POC for site project leads
NCI Project Management Officer	Ray Moore	Development of standard performance reports Maintenance of performance reporting function for PPS
NCI Data Analyst	Jeff Bazinet	Ensure disease registry capability for quality performance reporting for inclusion in standard reports
NCI Director Regional CIO Workforce Lead	Brian Marcolini Corey Zeigler Tracy Leonard	Facilitate development of webinar and other education materials
NCI Finance/Contracting Director	Unknown at this time. Responsibilities will be fulfilled by Lead Entity CFO and NCI Director until determined.	Responsible for development and management of the Financial objectives. Provides support for Finance/Payer Committee. The individual will provide guidance and oversight around the Funds Flow Plan, the Financial Stability Plan, and other relevant processes. The responsibilities include ensuring that funds are managed and distributed according to the approved plan, that reporting requirements are met and that communication regarding the Finance related functions is timely and accurate.
NCI DSRIP Compliance Officer	TBD will be filled by the Lead Entity Compliance Officer in the interim	Will oversee the development and implementation of the compliance plan of the PPS Lead and related compliance requirements of the PPS as they are defined. Scope would include the PPS Lead compliance plan related to DSRIP. The compliance role will report to the Executive Body.
Lead Entity Compliance Officer	Barbara Morrow	Will fill Compliance Officer role is completed until NCI Compliance Officer is in place. Will provide oversight to NCI Compliance Officer
Regional Chief Information Officer (CIO)	Corey M. Zeigler	EMR, HIE, PCMH, PHM Gap Analysis Executed/approved plans for EMR, HIE, PHM and PCMH
Data, Infrastructure, and Security Lead	Chris Grieco, FDRHPO Chief Security Officer	Data security and confidentiality plan, Data Exchange Plan
Regional PCMH Project Lead	Liza Darou, RN, PCMH-CCE	Lead PCMH Implementation Plan Lead Workflow Process Change Initiatives for Primary Care Nurse Informatics
RHIO/HIE	Rob Hack, HealtheConnections RHIO	Providing HIE interoperability for the PPS region
Technical lead(s)	IT Champions	Main driver at each participant site for operational deliverables
Clinical Champion	Provider Champions	Main driver at each participant site for provider engagement
Workforce Project Lead	Tracy Leonard	Lead the development of the PPS Workforce Assessment and Strategy

Run Date: 09/24/2015

☑ IPQR Module 10.4 - Overview of key stakeholders and how influenced by your DSRIP projects

Instructions:

In the below table, please set out who the key stakeholders are that play a major role across multiple DSRIP projects. Please give an indication of the role they play and how they impact your approach to delivering your DSRIP projects.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities				
Internal Stakeholders						
North Country Initiative, LLC Board of Managers	Governance	Oversight and success of all DSRIP Activities Policy and Plan Adoption and Executive Sponsorship Physician and Provider Champions and Leadership Overall DSRIP Performance Monitoring				
DSRIP Project Advisory Committee	Multi-organizational	Review and make recommendations to the NCI Board on DSRIP strategies and Plans				
NCI Medical Management (Clinical) Committee	Clinical Governance	Clinical Oversight for DSRIP Projects Clinical Guideline & Protocol Development and Support Clinical Champions Quality of Care and Patient Outcomes PHM Disease Registry Quality Measures - Performance Monitoring				
NCI HIT Governance Committee	HIT Assessment, Plan, Adoption	Responsible for reviewing HIT Gap Analysis and Plans Championing adoption by clinicians Patient-Centered Medical Home implementation plan EMR and MU PHM Disease Registry roll-out				
NCI Finance Committee	Financial Plan Monitoring Funds Flow Oversight	Review of Financial Sustainability Plans Monitoring Fragile Provider Metrics Review of Funds Flow Plan Inform and Review Value Based Payment Strategy Other financial and value-based planning functions				
NCI Compliance Committee	Compliance	Responsible to ensure Compliance Plans, Policies and Training are in place including Lead Entity Compliance Plan consistent with New York State Social Services Law 363-d				
NCI Health Literacy & Cultural Competency Committee	Health Literacy & Cultural Competency Plans	Development of Health Literacy and Cultural Competency Strategy Development and oversight of Health Literacy and Cultural Competency Training Plan in partnership with Workforce Committee				
NCI Provider Recruitment, GME & Workforce Governance Committee	Workforce	Physician/Provider Recruitment Plan GME Expansion Analysis

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Project 2.a.i – Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management

☑ IPQR Module 2.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

- 1. Risk: Collecting participant level data from PPS partners
- Mitigation: a) Utilize centralized platform to help manage project planning, implementation, monitoring and reporting with real-time data
- b) A standardized process (reporting, timelines, rollout, etc.) will ensure appropriate individuals are aware of when and how trainings will be delivered to ensure we are meeting milestones in alignment with project speed.
- c) Engage staff educators, human resource personnel and management to monitor the entities progress towards achieving milestones.
- 2. Risk: Retaining and applying DSRIP training requirements across PPS
- Mitigation: a) Prioritized timeline based on project speed to ensure training information directly applied
- b) Transparent communication with project partners to facilitate their understanding of what, why and how, and in turn they are informing the process
- c) Active involvement on committees to assist with planning and implementation
- d) Assist employees and entities to balance the responsibilities and needs of their day-to-day operations with PPS training requirements
- 3. Risk: Implementation of ICD-10 coding in October 2015 may temporarily shift provider priorities, as payments to providers hinges on accurate coding. Time and resources will need to be spent to train and prepare practices for this conversion, otherwise, practices could experience a potentially devastating loss of productivity and revenue- enough to jeopardize the financial stability of a practice. The primary changes in ICD-10 are related to organization and structure, code composition, and increased level of detail related to documentation. The time needed to provide the additional documentation support to support the patient's diagnosis could present challenges to IT and PCMH rollouts as well as Provider engagement and training especially in our already lean practices.
- Mitigation: a) Establish a group to assess and monitor ICD-10 provider readiness and its potential impact on the implementation of chosen projects b) Develop contingency plan in the event that provider focus shifts to ICD-10 implementation
- 4. Risk: Primary Care Physician Shortages: Rural, Federally designated Health Professional Shortage Area (HPSA). This challenge of being rural is further exacerbated by harsh winters and limited financial resources to incentivize providers to come and stay in our region. The recruitment and retention of physician and physician extenders to include behavioral health and dental providers remains a significant challenge.

 Mitigation: a) Investment of dollars to incentivize providers, especially those who will serve the Medicaid population
- b) Creation of workforce committee who will focus on GME expansion, physician education and provider recruitment/retention strategies
- c) Increase awareness of, and alignment with federal and state initiative
- 5. Risk: Disparate IT Systems and capability of EMRs across PPS and particular workstreams with no or little EMR capability (i.e. BH, CBOs, LTC)

Page 127 of 418

Run Date: 09/24/2015

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Mitigation: a) Comprehensive needs assessment

b) Staged plan for implementation encompassing largest volume Safety Net providers first

☑ IPQR Module 2.a.i.3 - Prescribed Milestones

Instructions:

Please enter baseline target dates and work breakdown tasks with target dates for each of the milestones below.

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	Project	N/A	In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task PPS includes continuum of providers in IDS, including medical, behavioral health, post-acute, long-term care, and community-based providers.	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task 1. Create a comprehensive Sharepoint master database of all participating providers/partners within the PPS network list	Project		In Progress	07/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task 2. Assign responsibility for maintaining/updating list	Project		In Progress	07/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task 3. Ensure all critical areas are included in list	Project		In Progress	07/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 4. Develop participation agreements	Project		In Progress	07/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 5. Execute agreements	Project		In Progress	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Milestone #2 Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.	Project	N/A	In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS produces a list of participating HHs and ACOs.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Participating HHs and ACOs demonstrate real service integration which incorporates a population management strategy towards evolving into an IDS.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Regularly scheduled formal meetings are held to develop collaborative care practices and integrated service delivery.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task	Project		In Progress	04/01/2015	12/31/2015	12/31/2015	DY1 Q3

Page 131 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Develop and maintain list of participating HH and ACOs.							
Task 2. Integrate Health Home and ACO into PPS Population Health Management strategy for Integrated Delivery System	Project		In Progress	04/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task 3. Develop regularly scheduled meetings which include the Health Home and ACO	Project		In Progress	04/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 4. Create an IDS strategic plan that aligns the ACO, Health Home (HH) and Clinically Integrated Network (CIN) with shared protocols, measures and goals to achieve the objectives of the IDS population health management strategy.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Milestone #3 Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.	Project	N/A	In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Clinically Interoperable System is in place for all participating providers.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS has protocols in place for care coordination and has identified process flow changes required to successfully implement IDS.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS has process for tracking care outside of hospitals to ensure that all critical follow-up services and appointment reminders are followed.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS trains staff on IDS protocols and processes.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 1. Identify appropriate partners for HIE	Project		In Progress	04/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 2. Identify workflow changes to create integrated system	Project		In Progress	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 3. Develop process workflow diagrams demonstrationg IDS processes including responsible providers	Project		In Progress	04/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 4. Identify process to track post-hospitalization discharge plan follow-up care and appointment reminders are followed	Project		In Progress	04/01/2015	12/31/2016	12/31/2016	DY2 Q3
Task 5. Identify critical postions within IDS for training	Project		In Progress	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 6. Develop training materials on integrated delivery system workflow and process	Project		In Progress	04/01/2015	12/31/2016	12/31/2016	DY2 Q3

Run Date: 09/24/2015

	T								1	
Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Milestone #1										
All PPS providers must be included in the Integrated Delivery										
System. The IDS should include all medical, behavioral, post-										
acute, long-term care, and community-based service providers										
within the PPS network; additionally, the IDS structure must										
include payers and social service organizations, as necessary										
to support its strategy.										
Task										
PPS includes continuum of providers in IDS, including medical,										
behavioral health, post-acute, long-term care, and community-										
based providers.										
Task										
Create a comprehensive Sharepoint master database of all										
participating providers/partners within the PPS network list										
Task										
Assign responsibility for maintaining/updating list										
Task										
Ensure all critical areas are included in list										
Task										
Develop participation agreements										
Task										
5. Execute agreements										
Milestone #2										
Utilize partnering HH and ACO population health management										
systems and capabilities to implement the PPS' strategy										
towards evolving into an IDS.										
Task										
PPS produces a list of participating HHs and ACOs.										
Task										
Participating HHs and ACOs demonstrate real service										
integration which incorporates a population management strategy towards evolving into an IDS.										
Task										
Regularly scheduled formal meetings are held to develop										
collaborative care practices and integrated service delivery.										
Task										
Develop and maintain list of participating HH and ACOs.										
Task			1							
2. Integrate Health Home and ACO into PPS Population Health										
Management strategy for Integrated Delivery System										
Task										
Develop regularly scheduled meetings which include the										
Health Home and ACO										
Task										
4. Create an IDS strategic plan that aligns the ACO, Health

Home (HH) and Clinically Integrated Network (CIN) with shared										
protocols, measures and goals to achieve the objectives of the										
IDS population health management strategy.										
Milestone #3										
Ensure patients receive appropriate health care and community										
support, including medical and behavioral health, post-acute										
care, long term care and public health services.										
Task										
Clinically Interoperable System is in place for all participating										
providers.										
Task										
PPS has protocols in place for care coordination and has										
identified process flow changes required to successfully										
implement IDS.										
Task										
PPS has process for tracking care outside of hospitals to										
ensure that all critical follow-up services and appointment										
reminders are followed.										
Task										
PPS trains staff on IDS protocols and processes.										
Task										
Identify appropriate partners for HIE										
Task										
Identify workflow changes to create integrated system										
Task										
Develop process workflow diagrams demonstrationg IDS										
processes including responsible providers										
Task										
4. Identify process to track post-hospitalization discharge plan										
follow-up care and appointment reminders are followed										
Task										
5. Identify critical postions within IDS for training										
Task										
6. Develop training materials on integrated delivery system										
workflow and process										
Task										
1										
7. Conduct/facilitate training on IDS workflow and roles Milestone #4		-				<u> </u>	-		-	
Ensure that all PPS safety net providers are actively sharing										
EHR systems with local health information										
exchange/RHIO/SHIN-NY and sharing health information										
among clinical partners, including directed exchange (secure										
messaging), alerts and patient record look up, by the end of										
Demonstration Year (DY) 3.

Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.										
Task

DSRIP Implementation Plan Project

Project Requirements										
(Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task										
Conduct an assessment of the current practices and clinics										
to determine the needed infrastructure, training and										
implementation required to ensure all providers are fully utilizing										
EHRs to provide coordinated care across the PPS.										
Task										
Perform a gap analysis and a plan with budget to address the identified needs										
Task										
Begin implementations with prioritization based on attributed										
Medicaid population and provider engagement.										
Task										
4. During the implementation phase and all phases that follow,										
prepare a report to the governance committee to ensure that all										
risks, & issues are communicated and a plan is in place to										
address them										
Task 5. Perform a post-go-live gap analysis and a plan with budget										
to address the identified needs										
Task										
6. Facilitate the practice's connection with the regional PHM										
platform to ensure the providers have access to quality										
measures and the ability to risk stratify their population in order										
to provide efficient, effective and high-quality care.										
Task										
7. Perform a continual improvement (PDSA) cycle in order to										
improve documentation and other processes to target gaps in care for high risk patients.										
Milestone #7										
Achieve 2014 Level 3 PCMH primary care certification and/or										
meet state-determined criteria for Advanced Primary Care										
Models for all participating PCPs, expand access to primary										
care providers, and meet EHR Meaningful Use standards by										
the end of DY 3.										
Task										
Primary care capacity increases improved access for patients seeking services - particularly in high-need areas.										
Task										
All practices meet 2014 NCQA Level 3 PCMH and/or APCM	0	0	0	0	0	0	0	0	0	0
standards.	Ĭ									
Task										
EHR meets Meaningful Use Stage 2 CMS requirements (Note:										
any/all MU requirements adjusted by CMS will be incorporated										
into the assessment criteria.)

Task										
Conduct an assessment of the current practices and clinics										
to determine the needed infrastructure, training and										
implementation required to ensure all providers are fully utilizing										
EHRs to provide coordinated care across the PPS.										
Task										
2. Perform a gap analysis and a plan with budget to address										
the identified needs										
Task										
3. Begin implementations with prioritization based on attributed										
Medicaid population and provider engagement.										
Task										
4. During the implementation phase and all phases that follow,										
prepare a report to the governance committee to ensure that all										
risks, & issues are communicated and a plan is in place to										
address them.										
Task										
5. Perform a post-go-live gap analysis and a plan with budget										
to address the identified needs										
Task										
6. Facilitate the practice's connection with the										
HealtheConnections RHIO and the regional PHM platform to										
ensure they have access to all information the patient has										
consented to in order to provide efficient, effective and high-										
quality care.										
Task										
7. Perform a pre-MU and PCMH assessment of the current										
practices and clinics to determine the needed infrastructure,										
training and implementation required to ensure all providers are										
utilizing the EHR and operating as a PCMH in order to attest for										
MU and apply for NCQA PCMH by DSRIP DY3.										
Task										
Begin MU attestations & PCMH recognitions with										
prioritization based on attributed Medicaid population and										
provider engagement.										
Milestone #8										
Contract with Medicaid Managed Care Organizations and other										
payers, as appropriate, as an integrated system and establish										
value-based payment arrangements.										
Task										
Medicaid Managed Care contract(s) are in place that include										
value-based payments.						-				
Task										
1. Develop Value-based payment work plan as delineated										
under the Financial Sustainability Plan

Task										
Develop timeline for VBP adoption as delineated under the										
Financial Sustainability Section										
Task										
3. Finalize VBP Adoption Plan as delineated under Finacial										
Sustainability Section										
Milestone #9										
Establish monthly meetings with Medicaid MCOs to discuss										
utilization trends, performance issues, and payment reform.										
Task										
PPS holds monthly meetings with Medicaid Managed Care										
plans to evaluate utilization trends and performance issues and										
ensure payment reforms are instituted.										
Task										
I. Identify Medicaid MCOs in PPS service area Task										
Outreach to Medicaid MCOs for initial meeting										
Task										
3. Establish monthly meeting schedule with MCO to evaluate										
utilization trends and performance issues to ensure payment										
reforms are instituted										
Task										
4. Develop an agenda for meetings with MCOs to discuss a first										
draft business case that is in the interests of both organizations.										
Milestone #10										
Re-enforce the transition towards value-based payment reform										
by aligning provider compensation to patient outcomes.										
Task										
PPS submitted a growth plan outlining the strategy to evolve										
provider compensation model to incentive-based compensation Task										
Providers receive incentive-based compensation consistent										
with DSRIP goals and objectives.										
Task										
Develop plan to evolve provider compensation model to										
incentive based compensation										
Task										
2. Ensure plan includes incentives based on DSRIP project										
goals and acheivements										
Task										
Implement compensation and performance management										
system utilizing PHM system to drive incentive/compensation										
reward for positive quality improvement and improved patient										
outcomes

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
All PPS providers must be included in the	
Integrated Delivery System. The IDS should	
include all medical, behavioral, post-acute, long-	
term care, and community-based service providers	
within the PPS network; additionally, the IDS	
structure must include payers and social service	
organizations, as necessary to support its strategy.

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	Natiative lext
Utilize partnering HH and ACO population health	
management systems and capabilities to	
implement the PPS' strategy towards evolving into	
an IDS.	
Ensure patients receive appropriate health care	
and community support, including medical and	
behavioral health, post-acute care, long term care	
and public health services.	
Ensure that all PPS safety net providers are	
actively sharing EHR systems with local health	
information exchange/RHIO/SHIN-NY and sharing	
health information among clinical partners,	
including directed exchange (secure messaging),	
alerts and patient record look up, by the end of	
Demonstration Year (DY) 3.	
Ensure that EHR systems used by participating	
safety net providers meet Meaningful Use and	
PCMH Level 3 standards and/or APCM by the end	
of Demonstration Year 3.	
Perform population health management by actively	
using EHRs and other IT platforms, including use	
of targeted patient registries, for all participating	
safety net providers.	
Achieve 2014 Level 3 PCMH primary care	
certification and/or meet state-determined criteria	
for Advanced Primary Care Models for all	
participating PCPs, expand access to primary care	
providers, and meet EHR Meaningful Use	
standards by the end of DY 3.	
Contract with Medicaid Managed Care	
Organizations and other payers, as appropriate, as	
an integrated system and establish value-based	
payment arrangements.	
Establish monthly meetings with Medicaid MCOs to	
discuss utilization trends, performance issues, and	
payment reform.	
Re-enforce the transition towards value-based	
payment reform by aligning provider compensation

IPQR Module 2.a.i.5 - IA Monitoring
Instructions :

Page 158 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Project 2.a.ii – Increase certification of primary care practitioners with PCMH certification and/or Advanced Primary Care Models (as developed under the NYS Health Innovation Plan (SHIP))

☑ IPQR Module 2.a.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

- 1. Risk: Collecting participant level data from PPS partners
 - Mitigation: a) Utilize centralized platform to help manage project planning, implementation, monitoring and reporting with real-time data
- b) A standardized process (reporting, timelines, rollout, etc.) will ensure appropriate individuals are aware of the deliverables to ensure we are meeting milestones in alignment with project speed.
- 2. Risk: Implementation of ICD-10 coding in October 2015 may temporarily shift provider priorities, as payments to providers hinges on accurate coding. Time and resources will need to be spent to train and prepare practices for this conversion, otherwise, practices could experience a potentially devastating loss of productivity and revenue- enough to jeopardize the financial stability of a practice. The primary changes in ICD-10 are related to organization and structure, code composition, and increased level of detail related to documentation. The time needed to provide the additional documentation support to support the patient's diagnosis could present challenges to IT and PCMH rollouts as well as Provider engagement and training especially in our already lean practices.

Mitigation: a) Establish a group to assess and monitor ICD-10 provider readiness and its potential impact on the implementation of chosen projects

- b) Develop contingency plan in the event that provider focus shifts to ICD-10 implementation
- 3. Risk: Primary Care Physician Shortages: Rural, Federally designated Health Professional Shortage Area (HPSA).
- Mitigation: a) Ensure providers are supported by staff to ensure their activities are value-added and not staff-level tasks that can be delegated
 - b) Ensure the EHRs are optimized to efficiently support clinical workflow
 - c) Leverage community assets to support the medical home model.
- 4. Risk: Disparate IT Systems and capability of EMRs across PPS and particular workstreams with no or little EMR capability (i.e. BH, CBOs, LTC)

 Mitigation: a) Comprehensive needs assessment
 - b) Staged plan for implementation encompassing largest volume Safety Net providers first
- 5. Risk: Shortage of NCQA PCMH Content experts to support the primary care practice transformations
 - Mitigation: a) Comprehensive needs assessment
 - b) Staged plan for implementation encompassing largest volume Safety Net providers first

evidence-based preventive and chronic disease management.										
Task										
a. Each Primary Care Site within the PPS will complete NCQA										
standard 3E-Implementing Evidence-based guidelines for a										
mental health condition, a chronic medical condition, and acute										
condition, a condition related to unhealthy behavior, well child										
or adult care, and appropriateness use/Overuse and overuse										
issues										
Task										
a. i. Phase 1 PCPs complete										
a.ii. Phase 2 PCPs complete										
a.iii. Phase 3 PCPs complete										
Task										
All staff members in each role at the Primary Care practice										
will view the educational PCMH 2014 webinar prior to initial										
PCMH Baseline Assessment and will attest to said viewing.										
Task										
b.i. Phase 1 PCPs: Project staff are trained on policies and										
procedures specific to evidence-based preventive and chronic										
disease management.										
Task										
b.ii. Phase 2 PCPs: Project staff are trained on policies and										
procedures specific to evidence-based preventive and chronic										
disease management.										
Task										
b.iii. Phase 2 PCPs: Project staff are trained on policies and										
procedures specific to evidence-based preventive and chronic										
disease management.										
Milestone #8										
Implement preventive care screening protocols including										
behavioral health screenings (PHQ-2 or 9 for those screening										
positive, SBIRT) for all patients to identify unmet needs. A										
process is developed for assuring referral to appropriate care in										
a timely manner.										
Task		1								
Preventive care screenings implemented among participating	0	0	0	0	0	0	0	0	0	0

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Project 2.a.iv – Create a medical village using existing hospital infrastructure

☑ IPQR Module 2.a.iv.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1) Risk: NCI Service region is already operationally lean and geographically large with multiple Critical Access Hospitals. In the DSRIP application, it was noted that while the region needed the Medical Village capability of integrated services there was only an expected 6-8 bed reduction due to the lean environment. With the expected additional service utilization through engagement of additional UI, LU and NU and additional Primary Care/Prevention utilization it is possible that bed utilization could temporarily grow through new identified critical issues.

Mitigation: Continue to critically analyze data to ensure capacity is right-sized to meet need – thus reducing specific bed capacity in a very targeted manner while maintaining ability of the region to retain essential capacity to meet population need.

- 2) Risk: Financially fragile hospital partners will fail prior to ability to change operations through medical village Mitigation: Support financially fragile partners to develop financial sustainability plans in concert with VAPAP
- 3) Risk: Medical villages will be developed and underutilized

Mitigation: Ensure that medical villages are supported by CNA and community to be served through data analysis and community forums

4) Risk: EHR and PCMH implementations within Medical Villages will not be complete/successful

Mitigation: Comprehensive assessment and gap analysis will ensure that a successful implementation plan is carried out so that all PCMH submissions by providers serving Medical Villages are successful

- 5) Risk: Telemedical solutions are not embraced by community and/or providers
- Mitigation: Aggressive education of providers. Public education campaign to engage public. Inclusion of telemedicine discussion in public forums. Telemedical physician champions are identified within medical villages utilizing telemedicine.

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 2.a.iv.3 - Patient Engagement Speed

Instructions:

Please specify how many patients will have become 'Actively Engaged' (as set out in the Project Plan Application) per quarter. These cumulative numbers must align with commitments in the PPS Application. Note: data entered into this table must represent CUMULATIVE figures.

Benchr	narks
100% Actively Engaged By	Expected Patient Engagement
DY3,Q4	5,000

Year,Quarter (DY1,Q1 – DY3,Q2)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 2.a.iv.4 - Prescribed Milestones

Instructions:

Please enter baseline target dates and work breakdown tasks with target dates for each of the milestones below.

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Convert outdated or unneeded hospital capacity into an outpatient services center, stand-alone emergency department/urgent care center or other healthcare-related purpose.	Project	N/A	In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task A strategic plan is in place which includes, at a minimum: - Definition of services to be provided in medical village and justification based on CNA - Plan for transition of inpatient capacity - Description of process to engage community stakeholders - Description of any required capital improvements and physical location of the medical village - Plan for marketing and promotion of the medical village and consumer education regarding access to medical village services	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task Project must reflect community involvement in the development and the specific activities that will be undertaken during the project term.	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task 1. Perform a gap analysis to accurately determine current inpatient bed capacity / bed constraints across the PPS (determine optimal inpatient delivery model)	Project		In Progress	07/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 2. Establish a Service Utilization monitoring team made up of an assigned lead from each impacted hospital to provide oversight in measuring, evaluating, and recommending excess bed reductions to the NCI Governing Board. (determine the number beds that can be reduced vs. percent of staffed beds)	Project		In Progress	07/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 3. Each participating hospital facility will develop a strategic plan that outlines: medical village services, inpatient capacity transition plan, stakeholder engagement processes, capital improvement requirements, geographical location of medical village, marketing and consumer education and community involvement.	Project		In Progress	07/01/2015	06/30/2016	06/30/2016	DY2 Q1

Page 196 of 418 **Run Date**: 09/24/2015

DSRIP Implementation Plan Project

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Task 4. The NCI PPS collaboratively compiles a strategic plan that outlines: medical village services, inpatient capacity transition plan, stakeholder engagement processes, capital improvement requirements, geographical locations of medical villages, marketing and consumer education and community involvement.	Project		In Progress	07/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 5. Each plan will detail community involvement: requirements / roles and responsibilities that will be completed during the project lifecycle	Project		In Progress	07/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 6. Approval of Individual Strategic Plans by individual hospital boards	Project		In Progress	07/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 7. Approval of Individual Strategic Plans by NCI Governing Board	Project		In Progress	07/01/2015	12/31/2016	12/31/2016	DY2 Q3
Task 8. Approval of NCI PPS collaborative Medical Village Strategic Plan by NCI Governing Board	Project		In Progress	07/01/2015	12/31/2016	12/31/2016	DY2 Q3
Task 9. Implementation of Individual Plans at each facility progress via reports tracked bi-monthly for task completion and inclusion in NCI PPS Medical Village plan reporting including community involvement	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Milestone #2 Provide a detailed timeline documenting the specifics of bed reduction and rationale. Specified bed reduction proposed in the project must include active or "staffed" beds.	Project	N/A	In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS has bed reduction timeline and implementation plan in place with achievable targeted reduction in "staffed" beds.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 1. Develop a PPS master plan the specifies bed reductions, facilities affected, and rationale for bed reductions	Project		In Progress	04/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 2. Utilize gap analysis to develop strategic timeline for bed reductions: focusing on low impact / low population facilities first	Project		In Progress	04/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 3. Detail bed reduction transition timeline	Project		In Progress	04/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 4. Realign and Redesign timeline as required to improve transition of care	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Milestone #3 Ensure that all participating PCPs meet NCQA 2014 Level 3 PCMH	Project	N/A	In Progress	04/01/2015	03/31/2018	03/31/2018	DY3 Q4

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Page 197 of 418 **Run Date**: 09/24/2015

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
accreditation and/or meet state-determined criteria for Advanced Primary Care Models by the end of DSRIP Year 3.							
Task All practices meet NCQA 2014 Level 3 PCMH and/or APCM standards.	Provider	Safety Net Primary Care Physicians	On Hold	04/01/2015	03/31/2020	03/31/2020	DY5 Q4
 Task 1. Conduct an assessment of the current practices and clinics to determine the needed infrastructure, training and implementation required to ensure all providers are fully utilizing EHRs to provide coordinated care across the PPS. 	Project		In Progress	04/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task 2. Perform a gap analysis and a plan with budget to address the identified needs	Project		In Progress	04/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 3. Perform a pre-PCMH assessment of the current practices and clinics to determine the needed infrastructure, training and implementation required to ensure all providers are utilizing the EHR and operating as a PCMH in order to apply for NCQA PCMH by DSRIP DY3.	Project		In Progress	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task4. Begin implementations with prioritization based on attributed Medicaid population and provider engagement.	Project		In Progress	04/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 5. During the implementation phase and all phases that follow, prepare a report to the governance committee to ensure that all risks, & issues are communicated and a plan is in place to address them.	Project		In Progress	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 6. Begin PCMH recognitions with prioritization based on attributed Medicaid population and provider engagement.	Project		In Progress	04/01/2015	12/31/2016	12/31/2016	DY2 Q3
Milestone #4 Ensure that all safety net providers participating in Medical Villages are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up.	Project	N/A	In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	Provider	Safety Net Primary Care Physicians	On Hold	04/01/2015	03/31/2020	03/31/2020	DY5 Q4
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	Provider	Safety Net Non-PCP Practitioners	On Hold	04/01/2015	03/31/2020	03/31/2020	DY5 Q4
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	Provider	Safety Net Hospitals	On Hold	04/01/2015	03/31/2020	03/31/2020	DY5 Q4
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	Provider	Safety Net Behavioral Health	On Hold	04/01/2015	03/31/2020	03/31/2020	DY5 Q4

Task										
5. Routinely Measure outcomes through quality assessment										
Milestone #6										
Ensure that EHR systems used in Medical Villages meet										
Meaningful Use Stage 2										
Task										
EHR meets Meaningful Use Stage 2 CMS requirements (Note:										
any/all MU requirements adjusted by CMS will be incorporated										
into the assessment criteria).										
Task										
Perform a pre-MU assessment of the current practices and										
clinics to determine the needed infrastructure, training and										
implementation required to ensure all providers are utilizing the										
EHR and operating in order to attest for MU DSRIP DY3.										
Task										
Perform a post-go-live gap analysis and a plan with budget										
to address the identified needs										
Task										
3. Begin implementations with prioritization based on attributed										
Medicaid population and provider engagement.										
Task										
Facilitate the practice's connection with the										
HealtheConnections RHIO and the regional PHM platform to										
ensure they have access to all information the patient has										
consented to in order to provide efficient, effective and high-										
quality care.										
Task										
5. Begin MU attestations with prioritization based on attributed										
Medicaid population and provider engagement.										
Milestone #7										
Ensure that services which migrate to a different setting or										
location (clinic, hospitals, etc.) are supported by the										
comprehensive community needs assessment.										
Task										
Strategy developed for migration of any services to different										
setting or location (clinic, hospitals, etc.).										
Task										
Utilize the comprehensive community needs assessment that										
demonstrates and documents the needs of the PPSs targeted										

Page 205 of 418 **Run Date**: 09/24/2015

DSRIP Implementation Plan Project

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
population with service area updates in the strategic plan										
Task 2. Ensure that individual and PPS wide medical village strategic plans that migrate services to a different location/setting include utilization of community needs assessment to develop a migration plan										
Task 3. Develop policy/procedure for periodic updates to CNA and service area mapping										

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #1										
Convert outdated or unneeded hospital capacity into an										
outpatient services center, stand-alone emergency										
department/urgent care center or other healthcare-related										
purpose.										
Task										
A strategic plan is in place which includes, at a minimum:										
- Definition of services to be provided in medical village and										
justification based on CNA										
- Plan for transition of inpatient capacity										
- Description of process to engage community stakeholders										
- Description of any required capital improvements and physical										
location of the medical village										
- Plan for marketing and promotion of the medical village and										
consumer education regarding access to medical village										
services										
Task										
Project must reflect community involvement in the										
development and the specific activities that will be undertaken										
during the project term.										
Perform a gap analysis to accurately determine current										
inpatient bed capacity / bed constraints across the PPS										
(determine optimal inpatient delivery model)										
Task										
Establish a Service Utilization monitoring team made up of										
an assigned lead from each impacted hospital to provide										
oversight in measuring, evaluating, and recommending excess										
bed reductions to the NCI Governing Board. (determine the										
number beds that can be reduced vs. percent of staffed beds)										
Task										
3. Each participating hospital facility will develop a strategic										

Page 206 of 418 **Run Date**: 09/24/2015

DSRIP Implementation Plan Project

Desirat Damainamanta										
Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
plan that outlines: medical village services, inpatient capacity										
transition plan, stakeholder engagement processes, capital										
improvement requirements, geographical location of medical										
village, marketing and consumer education and community involvement.										
Task										
4. The NCI PPS collaboratively compiles a strategic plan that										
outlines: medical village services, inpatient capacity transition										
plan, stakeholder engagement processes, capital improvement										
requirements, geographical locations of medical villages,										
marketing and consumer education and community										
involvement.										
5. Each plan will detail community involvement: requirements /										
roles and responsibilities that will be completed during the										
project lifecycle										
Task										
6. Approval of Individual Strategic Plans by individual hospital										
boards										
Task										
7. Approval of Individual Strategic Plans by NCI Governing										
Board										
Task										
8. Approval of NCI PPS collaborative Medical Village Strategic Plan by NCI Governing Board										
Task										
9. Implementation of Individual Plans at each facility progress										
via reports tracked bi-monthly for task completion and inclusion										
in NCI PPS Medical Village plan reporting including community										
involvement										
Milestone #2										
Provide a detailed timeline documenting the specifics of bed										
reduction and rationale. Specified bed reduction proposed in the project must include active or "staffed" beds.										
Task										
PPS has bed reduction timeline and implementation plan in										
place with achievable targeted reduction in "staffed" beds.										
Task										
1. Develop a PPS master plan the specifies bed reductions,										
facilities affected, and rationale for bed reductions										
Task										
Utilize gap analysis to develop strategic timeline for bed										
reductions: focusing on low impact / low population facilities first										
Task										
Detail bed reduction transition timeline										

Page 207 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Project Perminamente										
Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task										
Realign and Redesign timeline as required to improve										
transition of care										
Milestone #3										
Ensure that all participating PCPs meet NCQA 2014 Level 3										
PCMH accreditation and/or meet state-determined criteria for										
Advanced Primary Care Models by the end of DSRIP Year 3.										
Task	0	0	0	0	0	0	0	0	0	0
All practices meet NCQA 2014 Level 3 PCMH and/or APCM standards.	0	0	0	0	0	0	0	0	0	0
Task										
Conduct an assessment of the current practices and clinics										
to determine the needed infrastructure, training and										
implementation required to ensure all providers are fully utilizing										
EHRs to provide coordinated care across the PPS.										
Task										
Perform a gap analysis and a plan with budget to address										
the identified needs										
Task										
3. Perform a pre-PCMH assessment of the current practices										
and clinics to determine the needed infrastructure, training and implementation required to ensure all providers are utilizing the										
EHR and operating as a PCMH in order to apply for NCQA										
PCMH by DSRIP DY3.										
Task										
4. Begin implementations with prioritization based on attributed										
Medicaid population and provider engagement.										
Task										
5. During the implementation phase and all phases that follow,										
prepare a report to the governance committee to ensure that all										
risks, & issues are communicated and a plan is in place to address them.										
Task										
6. Begin PCMH recognitions with prioritization based on										
attributed Medicaid population and provider engagement.										
Milestone #4										
Ensure that all safety net providers participating in Medical										
Villages are actively sharing EHR systems with local health										
information exchange/RHIO/SHIN-NY and sharing health										
information among clinical partners, including direct exchange										
(secure messaging), alerts and patient record look up.										
Task EHR meets connectivity to RHIO's HIE and SHIN-NY	0	0	0	0	0	0	0	0	0	0
requirements.	U	0	o l	U	U				U	١
requirements.

Task										
4. During the implementation phase and all phases that follow,										
prepare a report to the governance committee to ensure that all										
risks, & issues are communicated and a plan is in place to										
address them.										
Task										
Perform a post-go-live gap analysis and a plan with budget										
to address the identified needs										
Task										
6. Facilitate the practice's connection with the										
HealtheConnections RHIO and the regional PHM platform to										
ensure they have access to all information the patient has										
consented to in order to provide efficient, effective and high-										
quality care.										
Milestone #5										
Use EHRs and other technical platforms to track all patients										
engaged in the project.										
Task										
PPS identifies targeted patients and is able to track actively										
engaged patients for project milestone reporting.										
Task										
Identify targeted patient population through data collection										
Task										
Integrate clinical decision support functions based on										
evidence-based guidelines into EHR (i.e., order sets, alerts).										
evidence-based guidennes into ETR (i.e., order sets, alerts).

Instructions :

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Project 2.b.iv – Care transitions intervention model to reduce 30 day readmissions for chronic health conditions

☑ IPQR Module 2.b.iv.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1. Risk: Federal HPSA designation, thus resulting in barriers to access to care, the lack of an assigned provider, or the inability to receive a timely appointment

Mitigation:

- a) Grow primary care capacity through the workforce strategy
- b) Back up providers so clinicians can operate at the top of their license
- c) Integrate behavioral health and primary care
- d) Use telehealth (telemedicine and remote monitoring) to expand access to care and help patients feel connected to care
- 2. Risk: Median household income is at least \$10,000 less than the state average (14-18% below the poverty level) and on average, 10% are unemployed

Mitigation:

- a) Identify supportive services for patients prior to discharge (i.e. health home, community-based organizations) to help address the lack of housing, transportation, or the means to pay a co-pay
- 3. Risk: Health Literacy and Cultural Competency

Mitigation:

- a) Health literacy and cultural competency training for providers
- b) Incorporation of the teach-back method and motivational interviewing
- 4. Risk: Varied, or lack of standardized roles, responsibilities, protocols, policies and procedures related to care coordination/care transitions depending on the time, place or provider
- a) Development of clearly defined roles and responsibilities (i.e. care coordinator, care transition manager, community health worker, patient navigator, etc.)
- b) Development and adoption of standardized protocols, policies and procedures
- 5. Risk: Willingness of partners to adopt standardized protocols, policies and procedures Mitigation:
- a) Engage hospitals, behavioral health agencies, private practices, the health home, FQHC's, long-term care facilities, etc. in multi-level governance structure that not only facilitiates buy-in, but informs the process.
- 6. Risk: Lack of reimbursement/a payment strategy for the transition of care services Mitigation:

Page 214 of 418 Run Date: 09/24/2015

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

- a) Engage with Medicaid Managed Care plans to develop payment agreements
- b) Increase referrals and utilization of the Health Home
- 7. Risk: Systematic Record Transition Process
- a) Increase utilization of E-Discharge for long-term care providers
- b) Ensure medical record is updated in interoperable EHR or updated in primary care provider record

☑ IPQR Module 2.b.iv.4 - Prescribed Milestones

Instructions:

Please enter baseline target dates and work breakdown tasks with target dates for each of the milestones below.

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.	Project	N/A	In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Standardized protocols are in place to manage overall population health and perform as an integrated clinical team are in place.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task1. Ensure standardized protocols are in place to manage overall population health and perform as an integrated clinical team are in place.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 2. Establish Regional Care Transitions Committee with a defined charter and ongoing agendas and minutes	Project		In Progress	04/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task 3. Establish cross functional teams that span the delivery system including hospitals, long-term care, the health home, hospice, and community-based organizations that integrate existing social/community support services, behavioral health agencies, chemical dependency programs, and the expansion of remote monitoring services to enhance patient support.	Project		In Progress	04/01/2015	12/31/2016	12/31/2016	DY2 Q3
Task 4. Document process and workflow including responsible resources at each stage of the workflow, minimum data sets required at each transition of care and the method of information transmission at each stage of the workflow	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 5. Develop assessment and risk stratification tools to be used at hospital admissions and ED visits to target beneficiaries for care coordination (including medical, behavioral and social risks).	Project		In Progress	04/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 6. Ensure early notification of discharges for warm handoff and health record transfer across the care continuum utilizing the RHIO to ensure communication of patient records to receiving community providers	Project		In Progress	04/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4

Page 220 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
7. Documentation of training materials to demonstrate consistent and ongoing efforts related to care coordination							
Milestone #2 Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.	Project	N/A	In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task A payment strategy for the transition of care services is developed in concert with Medicaid Managed Care Plans and Health Homes.	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task Coordination of care strategies focused on care transition are in place, in concert with Medicaid Managed Care groups and Health Homes.	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task PPS has protocol and process in place to identify Health-Home eligible patients and link them to services as required under ACA.	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task 1. Establish agreements with Managed Care Organizations and Health Homes related to coordination of services for high risk populations, including those with mental illness, cardiovascular disease, COPD, diabetes and substance abuse	Project		In Progress	07/01/2015	06/30/2017	06/30/2017	DY3 Q1
Task 2.Ensure a payment strategy for the transition of care services is developed in concert with Medicaid Managed Care Plans and Health Homes.	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task 3. Coordinate care transition strategies including focused referrals and increased utilization of MCO and Health Home services	Project		In Progress	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 4. Document methods and strategies including identification of responsible resources at each stage of the workflow including the identification of health concerns and social disparities before discharge, thus providing continuity of care to enable future early intervention	Project		In Progress	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 5. Conduct periodic assessments and produce updates that provide feedback mechanism and monitor progress	Project		In Progress	07/01/2015	06/30/2017	06/30/2017	DY3 Q1
Task 6. Secure evidence of agreements related to coordination of care transition strategies with Health Homes to ensure patients are identified in the acute care setting and referred to the Health Home based on the presence of one or more chronic condition or one single qualifying condition of either HIV/AIDS or Serious Mental Illness.	Project		In Progress	07/01/2015	03/31/2017	03/31/2017	DY2 Q4

agency.										
Task										
Standardized protocols are in place to manage overall										
population health and perform as an integrated clinical team are										
in place.										
Task										
Ensure standardized protocols are in place to manage										
overall population health and perform as an integrated clinical										
team are in place.										
Task										
Establish Regional Care Transitions Committee with a										
defined charter and ongoing agendas and minutes										
Task										
3. Establish cross functional teams that span the delivery										
system including hospitals, long-term care, the health home,										
hospice, and community-based organizations that integrate										
existing social/community support services, behavioral health										
agencies, chemical dependency programs, and the expansion										
of remote monitoring services to enhance patient support.										
Task										
Document process and workflow including responsible										
resources at each stage of the workflow, minimum data sets										
required at each transition of care and the method of										
information transmission at each stage of the workflow										
Task										
5. Develop assessment and risk stratification tools to be used at										
hospital admissions and ED visits to target beneficiaries for										
care coordination (including medical, behavioral and social										
risks).										
Task										
6. Ensure early notification of discharges for warm handoff and										
health record transfer across the care continuum utilizing the										
RHIO to ensure communication of patient records to receiving										
community providers										
Task										
7. Documentation of training materials to demonstrate										
consistent and ongoing efforts related to care coordination										
Milestone #2										
Engage with the Medicaid Managed Care Organizations and										
Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.										
Task										
A payment strategy for the transition of care services is										
developed in concert with Medicaid Managed Care Plans and										
developed in concert with inedicald Managed Care Plans and		L						L

Health Homes.										
Task										
Coordination of care strategies focused on care transition are in										
place, in concert with Medicaid Managed Care groups and										
Health Homes.										
Task										
PPS has protocol and process in place to identify Health-Home										
eligible patients and link them to services as required under										
ACA.										
Task										
Establish agreements with Managed Care Organizations and										
Health Homes related to coordination of services for high risk										
populations, including those with mental illness, cardiovascular										
disease, COPD, diabetes and substance abuse										
Task										
2.Ensure a payment strategy for the transition of care services										
is developed in concert with Medicaid Managed Care Plans and										
Health Homes.										
Task										
3. Coordinate care transition strategies including focused										
referrals and increased utilization of MCO and Health Home										
services Task										
4. Document methods and strategies including identification of										
responsible resources at each stage of the workflow including										
the identification of health concerns and social disparities										
before discharge, thus providing continuity of care to enable										
future early intervention										
Task										
5. Conduct periodic assessments and produce updates that										
provide feedback mechanism and monitor progress										
Task										
6. Secure evidence of agreements related to coordination of										
care transition strategies with Health Homes to ensure patients										
are identified in the acute care setting and referred to the										
Health Home based on the presence of one or more chronic										
condition or one single qualifying condition of either HIV/AIDS										
or Serious Mental Illness.										
Task										
7.Ensure PPS Protocols and processes in place to identify										
Health Home eligible patients and link them to services as										
required under ACA, thus addressing both clinical and social										
determinants of health that are highly correlated with										
admissions or readmissions.

Task										
8. Train staff on protocols/processes, and include written										
documentation of materials and sign in sheets										
Milestone #3										
Ensure required social services participate in the project.										
Task										
Required network social services, including medically tailored										
home food services, are provided in care transitions.										
Task										
1. Increase awareness of and leverage social service agencies										
such as the two FQHCs, the St. Lawrence Psych Mobile										
Integration Team, the Health Home, the Children's Home Crisis										
Intervention Team, Social Services, the Volunteer										
Transportation Center and medically tailored home food										
services in the care transition process.										
Task										
2. Generate a list of support services that will help facilitate the										
transition of care from the hospital to home or community										
residence, and from the home to primary care, thus ensuring										
services are provided at the right time, in the right place and in										
the most cost effective way.										
Task										
3.Engage community supportive services through meeting										
participation, panel presentations, electronic distribution of										
materials, etc.										
Task										
4.Document process and workflow including responsible										
resources at each stage of the workflow to ensure to ensure										
that patients are effectively, safely, and optimally transitioning										
to, and remaining in outpatient care, thus reducing the										
incidence of hospital or ED use										
Task										
5. Documented evidence of agreements with social support										
services to ensure factors related to non-adherence to										
discharge regiments are addressed (i.e. health literacy,										
language issues, lack of engagement with community health										
care system, etc.)										
Task										
6. Conduct routine assessments and produce periodic reports										
with updates to demonstrate collaborative progress										
Milestone #4										
Transition of care protocols will include early notification of										
planned discharges and the ability of the transition care										
manager to visit the patient in the hospital to develop the										
transition of care services.

Required network social services, including medically tailored										
home food services, are provided in care transitions.										
Task										
Increase awareness of and leverage social service agencies										
such as the two FQHCs, the St. Lawrence Psych Mobile										
Integration Team, the Health Home, the Children's Home Crisis										

Page 233 of 418 **Run Date**: 09/24/2015

DSRIP Implementation Plan Project

Project Requirements	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
(Milestone/Task Name)	D10,Q0	D10,Q4	D14, Q 1	D14,Q2	D14,Q0	D17,Q7	D10,Q1	D10,Q2	D10,Q0	D10,Q1
Intervention Team, Social Services, the Volunteer										
Transportation Center and medically tailored home food										
services in the care transition process.										
Task										
2. Generate a list of support services that will help facilitate the										
transition of care from the hospital to home or community										
residence, and from the home to primary care, thus ensuring										
services are provided at the right time, in the right place and in										
the most cost effective way.										
Task										
3.Engage community supportive services through meeting										
participation, panel presentations, electronic distribution of										
materials, etc.										
4.Document process and workflow including responsible										
resources at each stage of the workflow to ensure to ensure										
that patients are effectively, safely, and optimally transitioning										
to, and remaining in outpatient care, thus reducing the										
incidence of hospital or ED use										
Task										
5. Documented evidence of agreements with social support										
services to ensure factors related to non-adherence to										
discharge regiments are addressed (i.e. health literacy,										
language issues, lack of engagement with community health										
care system, etc.)										
Task										
Conduct routine assessments and produce periodic reports										
with updates to demonstrate collaborative progress										
Milestone #4										
Transition of care protocols will include early notification of										
planned discharges and the ability of the transition care										
manager to visit the patient in the hospital to develop the										
transition of care services.										
Task	_	_	_	_	_	_	_	_	_	_
Policies and procedures are in place for early notification of	0	0	0	0	0	0	0	0	0	0
planned discharges.										
Task										
Policies and procedures are in place for early notification of	0	0	0	0	0	0	0	0	0	0
planned discharges.										
Task										
Policies and procedures are in place for early notification of	0	0	0	0	0	0	0	0	0	0
planned discharges.						-				
Task										
PPS has program in place that allows care managers access to										
visit patients in the hospital and provide care transition services										
violi palionio in the hospital and provide cale transition services		1							l .	

Page 234 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Project Requirements	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
(Milestone/Task Name)	510,40	D10,Q4	D14,Q1	D14,Q2	514,40	D14,Q4	510,41	D10,Q2	D10,Q0	D10,Q7
and advisement.										
Task										
Ensure policies and procedures are in place for early										
notification of planned discharges for warm hand off and health										
record transfer across the care continuum utilizing the RHIO										
Task										
Document early notification of planned discharge process										
and workflow including responsible resources at each stage to										
demonstrate navigation, coordination and transitional care										
management										
Task										
Document written training materials including list of training										
dates and number of staff trained										
Task										
4. Facilitate the transition of care from hospital to home or										
community residence, and from the home to primary care by										
allowing case managers access to visit the patients in the he										
hospital and provide education and advocacy through the										
support and self-management of chronic conditions.										
Task										
5. Document agreement between hospital and care										
management staff/agencies allowing them access to visit										
patients upon admissions and/or prior to discharge, in										
accordance with standardized protocols and processes.										
Task										
6. Generate documentation from vendor systems to support										
training efforts and outcomes Milestone #5										
Protocols will include care record transitions with timely updates provided to the members' providers, particularly primary care										
provider.										
Task										
Policies and procedures are in place for including care										
transition plans in patient medical record and ensuring medical										
record is updated in interoperable EHR or updated in primary										
care provider record.										
Task										
Leverage and expand the use of electronic health records										
and the Population Health Management System to assure that										
patients with chronic diseases are receiving appropriate care										
and preventive care.										
Task										
2. Ensure care transition policies and procedures are										
incorporated into an updated patient medical record and then										1

Page 235 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Project Requirements										
(Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
transferred to receiving community providers including primary										
care providers.										
Task										
3. Document care record transition process and workflow										
including responsible resources at each stage to ensure										
smooth and effective navigation, coordination and transitional										
care management while facilitating integration or re-integration										
with primary care and outpatient mental health services thus										
reducing the rate of hospitalization, readmissions and ED use										
Task										
4. Document written training materials including list of training										
dates and number of staff trained										
Task										
5 Conduct periodic self-audit reports and recommendations to										
ensure engagement and inform, improve and sustain two-way										
communication with patients and providers										
Milestone #6										
Ensure that a 30-day transition of care period is established.										
Task										
Policies and procedures reflect the requirement that 30 day										
transition of care period is implemented and utilized.										
Task										
1. Ensure interdisciplinary care coordination teams are formed										
including nursing staff, pharmacists, dieticians, community										
health workers, health home care managers, physicians, etc. Task										
2.Adopt strategies and implement policies and procedures that										
reflect the standardized 30-day transition of care period										
protocols.										
Task										
3. Adopt improvement processes and plans that address top										
health disparities and improve workflow of the interdisciplinary										
team to include standardized protocols, assessment and risk										
stratification, early notification of discharges for warm handoff,										
health record transfer across the care continuum, self-										
management programs (i.e. remote monitoring), as well as										
patient education (teach back method) and advocacy.										
Task										
4. Documentation of policies, procedures and protocols										
Milestone #7										
Use EHRs and other technical platforms to track all patients										
engaged in the project.										
Task										
PPS identifies targeted patients and is able to track actively										
engaged patients for project milestone reporting.

Task										
Leveraging our technological instrastructure, ensure that										
providers in the PPS can work efficiently and effectively across										
the integrated delivery system to provide a seamless transition										
by and between systems ensure the best patient outcomes.										
Task										
2. Assess, stratify and identify targeted patients and track										
actively engaged patients for project milestone reporting.										
Task										
Provide sample data collection and tracking system to										
ensure the target population is clearly identified for monitoring										
and care based on risk stratification to include medical,										
behavioral and social risks.										
Task										
Provide reports from patient centered records to track										
implementation, progress and outcomes related to project 2biv

Milestone Name	Narrative Text
Develop standardized protocols for a Care	
Transitions Intervention Model with all participating	
hospitals, partnering with a home care service or	
other appropriate community agency.	
Engage with the Medicaid Managed Care	
Organizations and Health Homes to develop	
transition of care protocols that will ensure	
appropriate post-discharge protocols are followed.	
Ensure required social services participate in the	
project.	
Transition of care protocols will include early	
notification of planned discharges and the ability of	
the transition care manager to visit the patient in	
the hospital to develop the transition of care	
services.

Project 2.d.i – Implementation of Patient Activation Activities to Engage, Educate and Integrate the uninsured and low/non-utilizing Medicaid populations into Community Based Care

☑ IPQR Module 2.d.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Risk: The current system is fragmented, severely impacting the lives of those with significant burden of disease. In addition to a lack of linkages between inpatient and outpatient services, there are also disconnects between CBOs and primary care (PC), between preventive services and PC, and between PC and mental health and alcohol and substance abuse.

Mitigation: The PPS anticipates that by developing an intregrated delivery system and by integrating behavioral health and primary care, the region will benefit from reduced system fragmentation.

Risk: Many individuals that are at high risk have families and caregivers that want to help, however, the system is so complex and disconnected that families cannot effectively navigate it.

Mitigation: Community Health Workers/Navigators will be trained and deployed in hot spots to ensure patient activation, education, and connectivity to resources.

Risk: The most significant immediate need when addressing preventive care for the Medicaid and UI population will be to grow the PC, dental and behavioral health licensed health professional workforce. The NCI region has been federally designated a low-income Medicaid Health Professional Shortage Area (HPSA) and we cannot connect people to PC that does not exist.

Mitigation: The NCI workforce strategy will recruit, train and incentivize PCPs to serve our region, specifically the Medicaid population.

Risk: 14% of our population lacks basic literacy skills. The regional illiteracy rates coupled with the fact that NCI residents are older and have lower income levels than NYS highlight the need to improve health literacy in our region, as low literacy is linked to poor health outcomes, higher rates of hospitalizations, and infrequent use of preventive services.

Mitigation: The NCI will formally train on the PAM and regularly update assessments of communities and individual patients to ensure we are engaging and providing quality healthcare to the population. We will also train providers located within hot spots on techniques such as shared decision making, measurements of health literacy, and cultural competency.

☑ IPQR Module 2.d.i.4 - Prescribed Milestones

Instructions:

Please enter baseline target dates and work breakdown tasks with target dates for each of the milestones below.

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Contract or partner with community-based organizations (CBOs) to engage target populations using PAM(R) and other patient activation techniques. The PPS must provide oversight and ensure that engagement is sufficient and appropriate.	Project	N/A	In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task Partnerships with CBOs to assist in patient "hot-spotting" and engagement efforts as evidenced by MOUs, contracts, letters of agreement or other partnership documentation.	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task 1. Identify CBO's in PPS's geographical area that can engage target populations.	Project		In Progress	07/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task 2. Establish linkages with CBO's in the PPS's geographical targeted population areas	Project		In Progress	07/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task 3. Develop engagement plan that outlines numbers of CBO's required, service requirements and alignment of CBO 's specific roles and responsibilities in achieving DSRIP deliverables pertaining to PAM	Project		In Progress	07/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 4. Partner with and contract CBO's to target population through PAM utilization.	Project		In Progress	07/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 5. Implement and utilize communications engagement plan to: inform, improve, sustain two-way communications.	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task 6. NCI provides oversight and ensures sufficient engagement, quality measures and quarterly reporting.	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Milestone #2 Establish a PPS-wide training team, comprised of members with training in PAM(R) and expertise in patient activation and engagement.	Project	N/A	In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Patient Activation Measure(R) (PAM(R)) training team established.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4

Run Date: 09/24/2015

Page 244 of 418

DSRIP Implementation Plan Project

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Task 1. Determine ideal agencies and stakeholders to serve as PPS-wide PAM coaches	Project		In Progress	04/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 2. Identify and train one master PAM coach for the entire PPS	Project		In Progress	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 3. Train PPS-wide training team (PAM coaches) via Insignia Train-the-Trainer sessions	Project		In Progress	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 4. Document names, roles, agencies, and location of PAM coaches	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 5. Archive copies of training materials, sign-in sheets and other documentation	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Milestone #3 Identify UI, NU, and LU "hot spot" areas (e.g., emergency rooms). Contract or partner with CBOs to perform outreach within the identified "hot spot" areas.	Project	N/A	In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Analysis to identify "hot spot" areas completed and CBOs performing outreach engaged.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 1. Using PQI, Census and other DSRIP health data at the zip code level, identify "hot spot" areas and develop a map delineating regions with large populations of UI, NU and LU	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 2. Work with CBOs to develop outreach lists for UI, NU, LU populations and identify outreach strategy in "hot spots"	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Milestone #4 Survey the targeted population about healthcare needs in the PPS' region.	Project	N/A	In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Community engagement forums and other information-gathering mechanisms established and performed.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task a. Develop data collection instrument to gather feedback on healthcare needs in the region	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task b. Organize community forums to gather information from residents about healthcare needs in region	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Milestone #5 Train providers located within "hot spots" on patient activation techniques, such as shared decision-making, measurements of health literacy, and cultural competency.	Project	N/A	In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4

Page 245 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Task PPS Providers (located in "hot spot" areas) trained in patient activation techniques by "PAM(R) trainers".	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task a. Identify providers in "hot spot" areas	Project		In Progress	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task b. Deploy training team to conduct PAM training with PPS providers in "hot spot" areas	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Milestone #6 Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome measurements in #10). • This patient activation project should not be used as a mechanism to inappropriately move members to different health plans and PCPs, but rather, shall focus on establishing connectivity to resources already available to the member. • Work with respective MCOs and PCPs to ensure proactive outreach to beneficiaries. Sufficient information must be provided regarding insurance coverage, language resources, and availability of primary and preventive care services. The state must review and approve any educational materials, which must comply with state marketing guidelines and federal regulations as outlined in 42 CFR §438.104.	Project	N/A	In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Procedures and protocols established to allow the PPS to work with the member's MCO and assigned PCP to help reconnect that beneficiary to his/her designated PCP.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task a. Obtain lists of PCPs assigned to NU and LU enrollees from Managed Care Organizations	Project		In Progress	04/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task b. Work with MCOs, PCPs and Community Health Workers to reconnect beneficiaries to designated PCPs	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Milestone #7 Baseline each beneficiary cohort (per method developed by state) to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for each cohort at the beginning of each performance period.	Project	N/A	In Progress	07/01/2015	03/31/2018	03/31/2018	
Task	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4

Run Date: 09/24/2015

Page 246 of 418

DSRIP Implementation Plan Project

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
For each PAM(R) activation level, baseline and set intervals toward improvement determined at the beginning of each performance period (defined by the state).							
Task a. Develop timeline for PAM assessments (baseline, periodic, annual)	Project		In Progress	07/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task b. Work with CBOs to conduct baseline and periodic PAM assessment for each cohort of beneficiaries	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task c. Analyze data to create a baseline measure for each year's cohort	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task d. Use Flourish portal to assess project implementation and outreach	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Milestone #8 Include beneficiaries in development team to promote preventive care.	Project	N/A	In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Beneficiaries are utilized as a resource in program development and awareness efforts of preventive care services.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task a. Identify patient members to partcipate in program development and awareness efforts	Project		In Progress	04/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task b. Recruit patient members to development team	Project		In Progress	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task c. Establish meeting logistics and goals	Project		In Progress	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Milestone #9 Measure PAM(R) components, including: Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot spot" area for health service. If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using PAM(R) survey and designate a PAM(R) score. Individual member's score must be averaged to calculate a baseline measure for that year's cohort. The cohort must be followed for the entirety of the DSRIP program. On an annual basis, assess individual members' and each cohort's level of engagement, with the goal of moving beneficiaries to a higher level of activation. If the beneficiary is deemed to be LU & NU but has a designated PCP who is not part of the PPS' network, counsel the beneficiary	Project	N/A	In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4

Milestone #1										
Contract or partner with community-based organizations										
(CBOs) to engage target populations using PAM(R) and other										
patient activation techniques. The PPS must provide oversight										
and ensure that engagement is sufficient and appropriate.										
Task										
Partnerships with CBOs to assist in patient "hot-spotting" and										
engagement efforts as evidenced by MOUs, contracts, letters of										
agreement or other partnership documentation.										
Task										
Identify CBO's in PPS's geographical area that can engage										
target populations.										
Task										
Establish linkages with CBO's in the PPS's geographical										
targeted population areas										
Task										
3. Develop engagement plan that outlines numbers of CBO's

required, service requirements and alignment of CBO 's specific										
roles and responsibilities in achieving DSRIP deliverables										
pertaining to PAM Task										
4. Partner with and contract CBO's to target population through										
PAM utilization.										
5. Implement and utilize communications engagement plan to:										
inform, improve, sustain two-way communications.										
Task										
6. NCI provides oversight and ensures sufficient engagement,										
quality measures and quarterly reporting.										
Milestone #2										
Establish a PPS-wide training team, comprised of members										
with training in PAM(R) and expertise in patient activation and										
engagement.										
Task										
Patient Activation Measure(R) (PAM(R)) training team										
established.										
Task										
Determine ideal agencies and stakeholders to serve as PPS-										
wide PAM coaches										
Task										
2. Identify and train one master PAM coach for the entire PPS										
Task										
3. Train PPS-wide training team (PAM coaches) via Insignia										
Train-the-Trainer sessions										
Task										
4. Document names, roles, agencies, and location of PAM										
coaches										
Task										
5. Archive copies of training materials, sign-in sheets and other										
documentation										
Milestone #3										
Identify UI, NU, and LU "hot spot" areas (e.g., emergency										
rooms). Contract or partner with CBOs to perform outreach										
within the identified "hot spot" areas.										
Task										
Analysis to identify "hot spot" areas completed and CBOs										
performing outreach engaged.										
Task										
Using PQI, Census and other DSRIP health data at the zip										
code level, identify "hot spot" areas and develop a map										
delineating regions with large populations of UI, NU and LU

with the member's MCO and assigned PCP to help reconnect that beneficiary to his/her designated PCP.										
Task a. Obtain lists of PCPs assigned to NU and LU enrollees from Managed Care Organizations										
Task b. Work with MCOs, PCPs and Community Health Workers to reconnect beneficiaries to designated PCPs										
Milestone #7 Baseline each beneficiary cohort (per method developed by state) to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for each cohort at the beginning of each performance period.										
Task For each PAM(R) activation level, baseline and set intervals toward improvement determined at the beginning of each performance period (defined by the state).										
Task a. Develop timeline for PAM assessments (baseline, periodic, annual)										
b. Work with CBOs to conduct baseline and periodic PAM assessment for each cohort of beneficiaries										
Task c. Analyze data to create a baseline measure for each year's cohort										
Task d. Use Flourish portal to assess project implementation and outreach										
Milestone #8 Include beneficiaries in development team to promote preventive care.										
Task Beneficiaries are utilized as a resource in program development and awareness efforts of preventive care services.										
Task a. Identify patient members to partcipate in program development and awareness efforts										
b. Recruit patient members to development team										
Task c. Establish meeting logistics and goals Milestone #9										
Measure PAM(R) components, including:

DSRIP Implementation Plan Project

Project Requirements										
	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
 (Milestone/Task Name) Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot spot" area for health service. If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using PAM(R) survey and designate a PAM(R) score. Individual member's score must be averaged to calculate a baseline measure for that year's cohort. The cohort must be followed for the entirety of the DSRIP program. On an annual basis, assess individual members' and each cohort's level of engagement, with the goal of moving beneficiaries to a higher level of activation. If the beneficiary is deemed to be LU & NU but has a designated PCP who is not part of the PPS' network, counsel the beneficiary on better utilizing his/her existing healthcare benefits, while also encouraging the beneficiary to reconnect with his/her designated PCP. The PPS will NOT be responsible for assessing the patient via PAM(R) survey. PPS will be responsible for providing the most current contact information to the beneficiary's MCO for outreach purposes. 	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
 Provide member engagement lists to relevant insurance companies (for NU & LU populations) on a monthly basis, as well as to DOH on a quarterly basis. 										
Task										
Performance measurement reports established, including but not limited to: - Number of patients screened, by engagement level - Number of clinicians trained in PAM(R) survey implementation - Number of patient: PCP bridges established - Number of patients identified, linked by MCOs to which they are associated - Member engagement lists to relevant insurance companies (for NU & LU populations) on a monthly basis - Member engagement lists to DOH (for NU & LU populations) on a monthly basis - Annual report assessing individual member and the overall cohort's level of engagement										
I Identify and contract with Community Health Workers										
Task 2. Train CHWs in connectivity to healthcare coverage, community healthcare resources and patient education

Milestone #15										
Inform and educate navigators about insurance options and										
healthcare resources available to UI, NU, and LU populations.										
Task										
Navigators educated about insurance options and healthcare										
resources available to populations in this project.										
Task										
Include navigator eductaion in workforce education plan										
Task										
2. Include information channel for navigators in NCI DSRIP										
Communication Plan										
Milestone #16										
Ensure appropriate and timely access for navigators when										
attempting to establish primary and preventive services for a										
community member.										
Task										
Timely access for navigator when connecting members to										
services.										
Task										
Work with Med Management Committee to identify Safety										
Net Providers with access for each hot spot										
Task										
Develop protocol with access standard for navigators to										
access services target population										
Milestone #17										
Perform population health management by actively using EHRs										
and other IT platforms, including use of targeted patient										
registries, to track all patients engaged in the project.										
Task										
PPS identifies targeted patients through patient registries and is										
able to track actively engaged patients for project milestone										
reporting.										
Task										
a. Identify target patients using patient registries										
Task										
b. Track actively engaged patients for reporting										

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #1										
Contract or partner with community-based organizations										
(CBOs) to engage target populations using PAM(R) and other										
patient activation techniques. The PPS must provide oversight										
and ensure that engagement is sufficient and appropriate.										

Page 258 of 418 **Run Date**: 09/24/2015

DSRIP Implementation Plan Project

Task										
Partnerships with CBOs to assist in patient "hot-spotting" and engagement efforts as evidenced by MOUs, contracts, letters of agreement or other partnership documentation.										
Task										
Identify CBO's in PPS's geographical area that can engage target populations.										
Task 2. Establish linkages with CBO's in the PPS's geographical targeted population areas										
Task										
Develop engagement plan that outlines numbers of CBO's required, service requirements and alignment of CBO 's specific roles and responsibilities in achieving DSRIP deliverables pertaining to PAM										
Task										
4. Partner with and contract CBO's to target population through PAM utilization.										
Task										
5. Implement and utilize communications engagement plan to: inform, improve, sustain two-way communications.										
Task 6. NCI provides oversight and ensures sufficient engagement, quality measures and quarterly reporting.										
Milestone #2										
Establish a PPS-wide training team, comprised of members with training in PAM(R) and expertise in patient activation and										
engagement. Task										
Patient Activation Measure(R) (PAM(R)) training team established.										
Task										
Determine ideal agencies and stakeholders to serve as PPS-wide PAM coaches										
Task 2. Identify and train one master PAM coach for the entire PPS										
Task 3. Train PPS-wide training team (PAM coaches) via Insignia Train-the-Trainer sessions										
Task 4. Document names, roles, agencies, and location of PAM coaches										
Task 5. Archive copies of training materials, sign-in sheets and other documentation

Milestone #3										
Identify UI, NU, and LU "hot spot" areas (e.g., emergency										
rooms). Contract or partner with CBOs to perform outreach										
within the identified "hot spot" areas.										
Task										
Analysis to identify "hot spot" areas completed and CBOs										
performing outreach engaged.										
Task										
1. Using PQI, Census and other DSRIP health data at the zip										
code level, identify "hot spot" areas and develop a map										
delineating regions with large populations of UI, NU and LU										
Task										
2. Work with CBOs to develop outreach lists for UI, NU, LU										
populations and identify outreach strategy in "hot spots"										
Milestone #4										
Survey the targeted population about healthcare needs in the										
PPS' region.										
Task										
Community engagement forums and other information-										
gathering mechanisms established and performed.										
Task										
a. Develop data collection instrument to gather feedback on										
healthcare needs in the region										
Task										
b. Organize community forums to gather information from										
residents about healthcare needs in region										
Milestone #5										
Train providers located within "hot spots" on patient activation										
techniques, such as shared decision-making, measurements of										
health literacy, and cultural competency.										
Task										
PPS Providers (located in "hot spot" areas) trained in patient										
activation techniques by "PAM(R) trainers".										
Task										
a. Identify providers in "hot spot" areas										
Task										
b. Deploy training team to conduct PAM training with PPS										
providers in "hot spot" areas										
Milestone #6									_	
Obtain list of PCPs assigned to NU and LU enrollees from										
MCOs. Along with the member's MCO and assigned PCP,										
reconnect beneficiaries to his/her designated PCP (see										
outcome measurements in #10).										
This patient activation project should not be used as a										
mechanism to inappropriately move members to different health

plans and PCPs, but rather, shall focus on establishing										
connectivity to resources already available to the member.										
Work with respective MCOs and PCPs to ensure proactive										
outreach to beneficiaries. Sufficient information must be										
provided regarding insurance coverage, language resources,										
and availability of primary and preventive care services. The										
state must review and approve any educational materials,										
which must comply with state marketing guidelines and federal										
regulations as outlined in 42 CFR §438.104.										
Procedures and protocols established to allow the PPS to work										
with the member's MCO and assigned PCP to help reconnect										
that beneficiary to his/her designated PCP.										
Task										
a. Obtain lists of PCPs assigned to NU and LU enrollees from										
Managed Care Organizations										
Task										
b. Work with MCOs, PCPs and Community Health Workers to										
reconnect beneficiaries to designated PCPs										
Milestone #7										
Baseline each beneficiary cohort (per method developed by										
state) to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines,										
as well as intervals towards improvement, must be set for each										
cohort at the beginning of each performance period.										
Task										
For each PAM(R) activation level, baseline and set intervals										
toward improvement determined at the beginning of each										
performance period (defined by the state).										
Task										
a. Develop timeline for PAM assessments (baseline, periodic,										
annual)										
Task										
b. Work with CBOs to conduct baseline and periodic PAM										
assessment for each cohort of beneficiaries Task										
c. Analyze data to create a baseline measure for each year's										
cohort										
Task										
d. Use Flourish portal to assess project implementation and										
outreach										
Milestone #8										
Include beneficiaries in development team to promote										
preventive care.										

Page 261 of 418 Run Date : 09/24/2015

(Milestone/Task Name)	טוט,עט	D13,Q4	D14,Q1	D14,Q2	D14,Q3	D14,Q4	D13,Q1	D13,Q2	טוט,עט	D13,Q4
Task										
Beneficiaries are utilized as a resource in program development										
and awareness efforts of preventive care services.										
Task										
a. Identify patient members to partcipate in program										
development and awareness efforts Task										
b. Recruit patient members to development team Task										
c. Establish meeting logistics and goals										
Milestone #9										
Measure PAM(R) components, including:										
Screen patient status (UI, NU and LU) and collect contact										
information when he/she visits the PPS designated facility or										
"hot spot" area for health service.										
If the beneficiary is UI, does not have a registered PCP, or is										
attributed to a PCP in the PPS' network, assess patient using										
PAM(R) survey and designate a PAM(R) score.										
Individual member's score must be averaged to calculate a										
baseline measure for that year's cohort.										
The cohort must be followed for the entirety of the DSRIP										
program.										
On an annual basis, assess individual members' and each										
cohort's level of engagement, with the goal of moving										
beneficiaries to a higher level of activation. • If the										
beneficiary is deemed to be LU & NU but has a designated										
PCP who is not part of the PPS' network, counsel the										
beneficiary on better utilizing his/her existing healthcare										
benefits, while also encouraging the beneficiary to reconnect										
with his/her designated PCP.										
The PPS will NOT be responsible for assessing the patient via										
PAM(R) survey.										
PPS will be responsible for providing the most current contact										
information to the beneficiary's MCO for outreach purposes.										
Provide member engagement lists to relevant insurance										
companies (for NU & LU populations) on a monthly basis, as										
well as to DOH on a quarterly basis.										
Task										
Performance measurement reports established, including but										
not limited to:										
- Number of patients screened, by engagement level										
- Number of clinicians trained in PAM(R) survey implementation										
- Number of patient: PCP bridges established										
- Number of patients identified, linked by MCOs to which they							<u> </u>

are associated										
- Member engagement lists to relevant insurance companies										
(for NU & LU populations) on a monthly basis										
- Member engagement lists to DOH (for NU & LU populations)										
on a monthly basis										
- Annual report assessing individual member and the overall										
cohort's level of engagement										
Task										
Identify and contract with Community Health Workers										
Task										
2. Train CHWs in connectivity to healthcare coverage,										
community healthcare resources and patient education										
Task										
3. Train CHWs to conduct PAM survey										
Task										
4. Ensure CHWs conduct direct hand-off to navigators and/or										
the appropriate level of care										
Task										
Develop ability to track co-hort										
Task										
Develop process to provide MCO most recent contact										
information										
Task										
7. Develop process to provide member engagement lists to insurance monthly and DOH quarterly										
Milestone #10										
Increase the volume of non-emergent (primary, behavioral,										
dental) care provided to UI, NU, and LU persons.										
Task										
Volume of non-emergent visits for UI, NU, and LU populations										
increased.										
Task										
1. Work with PCPs, dental health providers, behavioral health										
providers and MCOs to identify strategies to expand access to										
care for UI, NU and LU populations										
Task										
2. Work with PCPs, dental health providers, bheavioral health										
providers and MCOs to implement strategies to expand access										
to care for UI, NU and LU populations										
Milestone #11										
Contract or partner with CBOs to develop a group of community										
navigators who are trained in connectivity to healthcare										
coverage, community healthcare resources (including for										
primary and preventive services) and patient education.										

Page 263 of 418 **Run Date**: 09/24/2015

Milestone #14										
Ensure direct hand-offs to navigators who are prominently										
placed at "hot spots," partnered CBOs, emergency										
departments, or community events, so as to facilitate education										
regarding health insurance coverage, age-appropriate primary										
and preventive healthcare services and resources.										
Task										
Community navigators prominently placed (with high visibility)	0	0	0	0	0	0	0	0	0	0
at appropriate locations within identified "hot spot" areas.										
Task										
Develop protocol for hand-offs to identified navigators										
Milestone #15										
Inform and educate navigators about insurance options and										
healthcare resources available to UI, NU, and LU populations.										
Task										
Navigators educated about insurance options and healthcare										
resources available to populations in this project.										
Task										
Include navigator eductaion in workforce education plan										
Task										
Include information channel for navigators in NCI DSRIP										
Communication Plan										
Milestone #16										
Ensure appropriate and timely access for navigators when										
attempting to establish primary and preventive services for a										
community member.										
Task										
Timely access for navigator when connecting members to										
services.										
Work with Med Management Committee to identify Safety										
Net Providers with access for each hot spot										
Task										
Develop protocol with access standard for navigators to										
access services target population										
Milestone #17										
Perform population health management by actively using EHRs										
and other IT platforms, including use of targeted patient										
registries, to track all patients engaged in the project.										
Task										
PPS identifies targeted patients through patient registries and is										
able to track actively engaged patients for project milestone										
reporting.										
Task										
a. Identify target patients using patient registries

Milestone Name	Narrative Text
Contract or partner with community-based	
organizations (CBOs) to engage target populations	
using PAM(R) and other patient activation	
techniques. The PPS must provide oversight and	
ensure that engagement is sufficient and	
appropriate.	
Establish a PPS-wide training team, comprised of	
members with training in PAM(R) and expertise in	
patient activation and engagement.	
Identify UI, NU, and LU "hot spot" areas (e.g.,	
emergency rooms). Contract or partner with CBOs	
to perform outreach within the identified "hot spot"	
areas.	
Survey the targeted population about healthcare	
needs in the PPS' region.	
Train providers located within "hot spots" on patient	
activation techniques, such as shared decision-	
making, measurements of health literacy, and	
cultural competency.	
Obtain list of PCPs assigned to NU and LU	
enrollees from MCOs. Along with the member's	
MCO and assigned PCP, reconnect beneficiaries	
to his/her designated PCP (see outcome	
measurements in #10).	
This patient activation project should not be used	
as a mechanism to inappropriately move members	
to different health plans and PCPs, but rather, shall

LU & NU but has a designated PCP who is not part	
of the PPS' network, counsel the beneficiary on	
better utilizing his/her existing healthcare benefits,	
while also encouraging the beneficiary to reconnect	
with his/her designated PCP.	
The PPS will NOT be responsible for assessing	
the patient via PAM(R) survey.	
PPS will be responsible for providing the most	
current contact information to the beneficiary's	
MCO for outreach purposes.	
Provide member engagement lists to relevant	
insurance companies (for NU & LU populations) on	
a monthly basis, as well as to DOH on a quarterly	
basis.	
Increase the volume of non-emergent (primary,	
behavioral, dental) care provided to UI, NU, and LU	
persons.	
Contract or partner with CBOs to develop a group	
of community navigators who are trained in	
connectivity to healthcare coverage, community	
healthcare resources (including for primary and	
preventive services) and patient education.	
Develop a process for Medicaid recipients and	
project participants to report complaints and	
receive customer service.	
Train community navigators in patient activation	
and education, including how to appropriately	
assist project beneficiaries using the PAM(R).	
Ensure direct hand-offs to navigators who are	
prominently placed at "hot spots," partnered CBOs,	
emergency departments, or community events, so	
as to facilitate education regarding health	
insurance coverage, age-appropriate primary and	
preventive healthcare services and resources.	
Inform and educate navigators about insurance	
options and healthcare resources available to UI,	
NU, and LU populations.

Project 3.a.i – Integration of primary care and behavioral health services

☑ IPQR Module 3.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

- "Risk 1: Disconnect between behavioral health, primary care and social support services (training, referrals and access to care) Mitigation:
- a) NCI's workforce strategy will grow primary care and behavioral health capacity and back up providers so they can operate at the top of their license
- b) Team-base model utilized for PCMH aligns providers
- c) Utilize EHRs, the HIE and the RHIO to ensure secure, systematic record transfer
- d) Increase referrals and utilization of the health home and enhance coordination with community-based organizations to help address the medical or social barriers that often time results in preventable ED visits
- e) Train primary care providers to use evidence-based practices in screening (i.e. SBIRT and PHQ-9) for and treating depression, anxiety or other conditions that can be effectively managed in primary care settings

Risk 2: Behavioral health patients have high rates of co-occurring diabetes, cardiac and respiratory diseases Mitigation:

- a) Develop and implement standardized protocols
- b) Identify the appropriate supportive services for the patient prior to discharge
- c) Incorporate health literacy, cultural competency, motivational interviewing and the teach back method to activate self-care/management
- d) Expand the use of tele-health remote monitoring to help patients feel connected to care

Risk 3: Capital Costs - if capital grants are not awarded, the medical village co-location and FQHC/Primary Care clinic colocation project will be significantly impacted

Mitigation:

a) Seek alternative funding sources other options such as Impact Model expansion vs colocation

Risk 4: Regulatory barriers regarding co-location and patient transfers

Mitigation:

a) Waiver requested - awaiting approval"

Run Date: 09/24/2015

Task										
1.a. All practices meet NCQA 2014 Level 3 PCMH and/or APCM standards.										
Task 1ai. Assess all participating PCPs to determine their preparedness for NCQA 2014 Level 3 PCMH.										
Task 1aii. Preform a gap analysis on the results to determine the scope of work/needed assistance for each PCP.										
Task 1aiii. Create a project plan/timeline for each PCP										
Task 1aiv. Implement the PCMH processes, procedures, protocols and written policies										
Task 1av. Complete the NCQA Level 3 PCMH submissions										
Task 1avi. All practices meet NCQA 2014 Level 3 PCMH and/or APCM standards. Receive the NCQA Level 3 PCMH Recognition Certificates										
Task 2. Working with the NCI 2aii project team, provide list of participating NCQA-certified and/or APC-approved physicians/practitioners including certification documentation										
Task 3. Working with NCI 2aii project team, provide list of practitioners and licensure performing services at behavioral health site including behavioral health practice schedules										
Task Complete site and facility development at Behavioral Health site to accommodate Primary Care										
Task 4a. Ensure regulatory issues are identified and addressed										
Task 4b. Ensure physical plant issues identified and addressed										
Milestone #6 Develop collaborative evidence-based standards of care including medication management and care engagement process.										
Task Regularly scheduled formal meetings are held to develop collaborative care practices.

Project Requirements										
(Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
including behavioral health screenings (PHQ2 or 9 for those										
screening positive, SBIRT)										
Task										
Provide documentation of screening policies and procedures										
1 Tovide documentation of screening policies and procedures										
Task										
Provide screenshots or other evidence of notifications of patient										
identification and screening alerts to include EHR vendor										
documentation										
Task										
Provide roster of identified patients receiving screenings at										
established project sites to include the number of screenings										
completed										
Task										
Provide sample EHR demonstrating that "warm transfer" to										
behavioral health provider occurred if positive screening result				1						
benavioral nealth provider occurred if positive screening result										
Milestone #8										
Use EHRs or other technical platforms to track all patients										
engaged in this project.										
Task										
EHR demonstrates integration of medical and behavioral health										
record within individual patient records.										
Task										
PPS identifies targeted patients and is able to track actively										
engaged patients for project milestone reporting.										
Task										
In collaboration with NCI's IT team and participating providers,										
track engaged patients in this project using EHR documentation										
demonstrating integration of medical and behavioral health										
record within individual patient records										
Task										
Working in collaboration with NCI's IT, data and clinical team,										
gather data and track target patients by using EHR reports.										
Milestone #9										
Implement IMPACT Model at Primary Care Sites.										
Task										
PPS has implemented IMPACT Model at Primary Care Sites.	0	0	0	0	0	0	0	0	0	0
Task										
In collaboration with NCI Workforce, Care Coordination and										
Medical Management Committees, explore and identify										
evidence-based IMPACT Model training programs										
Task										
Secure IMPACT Model training program				1

Project Requirements	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
(Milestone/Task Name) Task										
Identify appropriate project workforce for IMPACT model										
training										
Task										
Document commitment from project workforce for IMPACT										
Model training										
Task										
Develop and implement evidence-based strategies for the										
IMPACT model at identified primary care sites										
Task										
Provide quarterly report narrative demonstrating successful										
implementation of project requirements (IMPACT Model										
implemented at PCP sites)										
Milestone #10										
Utilize IMPACT Model collaborative care standards, including										
developing coordinated evidence-based care standards and										
policies and procedures for care engagement.										
Task										
Coordinated evidence-based care protocols are in place,										
including a medication management and care engagement										
process to facilitate collaboration between primary care										
physician and care manager.										
Task										
Policies and procedures include process for consulting with										
Psychiatrist.										
Task										
In collaboration with NCI Workforce, Care Coordination and										
Medical Management Committees, ensure identified and										
appropriate workforce are IMPACT Model trained and able to										
demonstrate practical, evidence-based approaches to										
recognizing and treating depression in a variety of clinical										
settings, especially with clinically challenging cases (i.e.										
persistent depressions and comorbid or psychiatric conditions)										
Task										
Provide documentation of evidence-based practice guidelines										
and protocols to include medication management and care										
engagement processes to facilitate collaboration between										
primary care physician and care manager										
Task										
Provide documentation of evidence-based practice guidelines										
to include a process for consulting with Psychiatrist										
Task										
100% of practices implementing the IMPACT model have										
adopted evidence-based care standards and policies and

procedures for care engagement										
Milestone #11										
Employ a trained Depression Care Manager meeting requirements of the IMPACT model.										
Task										
PPS identifies qualified Depression Care Manager (can be a nurse, social worker, or psychologist) as identified in Electronic Health Records.										
Task										
Depression care manager meets requirements of IMPACT model, including coaching patients in behavioral activation, offering course in counseling, monitoring depression symptoms for treatment response, and completing a relapse prevention plan.										
Task										
Work with PCP practices to identify and train Depression Care Manager										
Task Work with NCI IT team to ensure Depression Care Manager can be identified in the practice's EHR										
Task Provide documented evidence of IMPACT model training and implementation										
Task Provide sample EHR demonstrating relapse prevention plans, patient coaching and other IMPACT interventions										
Milestone #12 Designate a Psychiatrist meeting requirements of the IMPACT										
Model.										
Task All IMPACT participants in PPS have a designated Psychiatrist.										
Task										
Identify consulting pyschiatrists via telemedicine who will collaborate with PCMH providers and depression care										
managers to provide evidence-based standards of care including medication management, care engagement										
processes, and the integreation of depression treatment into Primary Care to improve physical and social functioning										
Task Work in partnership with NCI IT, Medical Management and										
PCMH teams to ensure technological infrastructure is in place for private, secure tele-medical consults with a identified										
psychiatrists

(Milestone/Task Name) Task	,	,	,	•	,	,	,	,	,	,
Provide documentation related to registration of IMPACT										
participants and designated Psychiatrist										
Task										
Provide documentation of policies and procedures related to										
follow up with care of patients										
Task										
Provide EHR documentation identifying Psychiatrist for eligible										
patients										
Milestone #13										
Measure outcomes as required in the IMPACT Model.										
Task										
At least 90% of patients receive screenings at the established										
project sites (Screenings are defined as industry standard										
questionnaires such as PHQ-2 or 9 for those screening										
positive, SBIRT).										
Task										
Provide roster of screened patients										
Task										
Develop protocols to ensure care managers measure										
depressive symptoms at the start of a patient's treatment and										
regularly thereafter using tools such as the PHQ2/9										
Milestone #14										
Provide "stepped care" as required by the IMPACT Model.										
Task										
In alignment with the IMPACT model, treatment is adjusted										
based on evidence-based algorithm that includes evaluation of										
patient after 10-12 weeks after start of treatment plan.										
Task										
Provide documentation of evidence-based practice guidelines										
for stepped care including implementation plan										
Task										
Documentation of treatment adjusted based on clinical										
outcomes and according to evidence-based algorithms to										
include things such as medication dosages, a change to a										
different medication, addition of psyhotherapy, a combination of										
medication and psychotherapy, or other treatment as										
suggested by the team psychiatrist										
Task										
Working in collaboration with NCI clinical teams, develop										
targets which aim for a certain percentage (i.e. 50%) in the										
reduction of symptoms within a certain time period (i.e. 10-12										
weeks)										
Milestone #15										
Use EHRs or other technical platforms to track all patients

engaged in this project.										
Task EHR demonstrates integration of medical and behavioral health record within individual patient records.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task In collaboration with NCI's IT team and participating providers, track engaged patients in this project using EHR documentation demonstrating integration of medical and behavioral health record within individual patient records										
Task Working in collaboration with NCI's IT, data and clinical team, gather data and track target patients by using EHR reports.										

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #1										
Co-locate behavioral health services at primary care practice sites. All participating primary care practices must meet 2014 NCQA level 3 PCMH or Advance Primary Care Model standards by DY 3.										
Task										
All practices meet NCQA 2014 Level 3 PCMH and/or APCM standards by the end of DY3.	0	0	0	0	0	0	0	0	0	0
Task										
Behavioral health services are co-located within PCMH/APC practices and are available.	0	0	0	0	0	0	0	0	0	0
Task										
1. All participating practices meet NCQA 2014 Level 3 PCMH and/or APCM standards by the end of DY3.										
Task										
a. Assess all participating PCPs to determine their preparedness for NCQA 2014 Level 3 PCMH.										
Task										
b. Preform a gap analysis on the results to determine the scope of work/needed assistance for each PCP.										
Task										
c. Create a project plan/timeline for each PCP										
Task										
 d. Implement the PCMH processes, procedures, protocols and written policies.

Milestone #8 Use EHRs or other technical platforms to track all patients										
engaged in this project.										
Task										
EHR demonstrates integration of medical and behavioral health										
record within individual patient records.										
Task										
PPS identifies targeted patients and is able to track actively										
engaged patients for project milestone reporting.										
Task In collaboration with NCI's IT team and participating providers,										
track engaged patients in this project using EHR documentation										
demonstrating integration of medical and behavioral health										
record within individual patient records										
Task										
Working in collaboration with NCI's IT, data and clinical team,										
gather data and track target patients by using EHR reports.										
N. 10										
Milestone #9										
Implement IMPACT Model at Primary Care Sites.										
PPS has implemented IMPACT Model at Primary Care Sites.	0	0	0	0	0	0	0	0	0	0
Task										
In collaboration with NCI Workforce, Care Coordination and										
Medical Management Committees, explore and identify										
evidence-based IMPACT Model training programs										
Task										
Secure IMPACT Model training program Task										
Identify appropriate project workforce for IMPACT model										
training										
Task										
Document commitment from project workforce for IMPACT										
Model training										
Task										
Develop and implement evidence-based strategies for the										
IMPACT model at identified primary care sites Task										
Provide quarterly report narrative demonstrating successful										
implementation of project requirements (IMPACT Model										
implemented at PCP sites)										
Milestone #10										
Utilize IMPACT Model collaborative care standards, including

developing coordinated evidence-based care standards and										
policies and procedures for care engagement.										
Task										
Coordinated evidence-based care protocols are in place,										
including a medication management and care engagement										
process to facilitate collaboration between primary care										
physician and care manager.										
Task										
Policies and procedures include process for consulting with										
Psychiatrist.										
Task										
In collaboration with NCI Workforce, Care Coordination and										
Medical Management Committees, ensure identified and										
appropriate workforce are IMPACT Model trained and able to										
demonstrate practical, evidence-based approaches to										
recognizing and treating depression in a variety of clinical										
settings, especially with clinically challenging cases (i.e.										
persistent depressions and comorbid or psychiatric conditions)										
persistent depressions and comorbid or psychiatric conditions)										
Task										
Provide documentation of evidence-based practice guidelines										
and protocols to include medication management and care										
engagement processes to facilitate collaboration between										
primary care physician and care manager										
Task										
Provide documentation of evidence-based practice guidelines										
to include a process for consulting with Psychiatrist										
Task										
100% of practices implementing the IMPACT model have										
adopted evidence-based care standards and policies and										
procedures for care engagement										
Milestone #11										
Employ a trained Depression Care Manager meeting										
requirements of the IMPACT model.										
Task										
PPS identifies qualified Depression Care Manager (can be a										
nurse, social worker, or psychologist) as identified in Electronic										
Health Records.										
Task										
Depression care manager meets requirements of IMPACT										
model, including coaching patients in behavioral activation,										
offering course in counseling, monitoring depression symptoms										
for treatment response, and completing a relapse prevention										
plan.					<u> </u>

Task										
Work with PCP practices to identify and train Depression Care										
Manager										
Task										
Work with NCI IT team to ensure Depression Care Manager										
can be identified in the practice's EHR										
Task										
Provide documented evidence of IMPACT model training and										
implementation										
Task										
Provide sample EHR demonstrating relapse prevention plans,										
patient coaching and other IMPACT interventions										
Milestone #12										
Designate a Psychiatrist meeting requirements of the IMPACT										
Model.										
Task										
All IMPACT participants in PPS have a designated Psychiatrist.										
Task										
Identify consulting pyschiatrists via telemedicine who will										
collaborate with PCMH providers and depression care										
managers to provide evidence-based standards of care										
including medication management, care engagement										
processes, and the integreation of depression treatment into										
Primary Care to improve physical and social functioning										
Task										
Work in partnership with NCI IT, Medical Management and										
PCMH teams to ensure technological infrastructure is in place										
for private, secure tele-medical consults with a identified										
psychiatrists Task										
Provide documentation related to registration of IMPACT										
participants and designated Psychiatrist Task										
Provide documentation of policies and procedures related to										
follow up with care of patients										
Task										
Provide EHR documentation identifying Psychiatrist for eligible										
patients Milestone #13										
Measure outcomes as required in the IMPACT Model. Task										
At least 90% of patients receive screenings at the established project sites (Screenings are defined as industry standard										
questionnaires such as PHQ-2 or 9 for those screening										
questionnaires such as FriQ-2 of 9 for those screening			l	l	I .				L

positive, SBIRT).										
Task										
Provide roster of screened patients										
Task										
Develop protocols to ensure care managers measure										
depressive symptoms at the start of a patient's treatment and										
regularly thereafter using tools such as the PHQ2/9										
Milestone #14										
Provide "stepped care" as required by the IMPACT Model.										
Task										
In alignment with the IMPACT model, treatment is adjusted based on evidence-based algorithm that includes evaluation of										
patient after 10-12 weeks after start of treatment plan.										
Task										
Provide documentation of evidence-based practice guidelines										
for stepped care including implementation plan										
Task										
Documentation of treatment adjusted based on clinical										
outcomes and according to evidence-based algorithms to										
include things such as medication dosages, a change to a										
different medication, addition of psyhotherapy, a combination of										
medication and psychotherapy, or other treatment as										
suggested by the team psychiatrist										
Task										
Working in collaboration with NCI clinical teams, develop targets which aim for a certain percentage (i.e. 50%) in the										
reduction of symptoms within a certain time period (i.e. 10-12										
weeks)										
Milestone #15										
Use EHRs or other technical platforms to track all patients										
engaged in this project.										
Task										
EHR demonstrates integration of medical and behavioral health										
record within individual patient records.										
Task										
PPS identifies targeted patients and is able to track actively										
engaged patients for project milestone reporting.										
In collaboration with NCI's IT team and participating providers,										
track engaged patients in this project using EHR documentation										
demonstrating integration of medical and behavioral health

IPQR Module 3.a.i.6 - IA Monitoring

Instructions:

Model 1, Milestone 1: The IA recommends updating the timeline for required tasks with reasonable start and end dates and expanding project tasks to adequately document the process for achieving the Milestone, including: bringing primary care practices in compliance with 2014 standards, monitoring of progress, integrating behavioral health services into the practices.

Model 2, Milestone 5: The IA recommends building out tasks related to the process of practice integration, including addressing regulatory issues, site development, and addressing certification by NCQA of developed sites.

Model 3, Milestone 10: Add task that addresses monitoring process.

Samaritan Medical Center (PPS ID:45)

Project 3.b.i – Evidence-based strategies for disease management in high risk/affected populations (adult only)

☑ IPQR Module 3.b.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1.) Risk: Changing the behavior of Medicaid patients.

Mitigation: a.) Establishing a schedule for community outreach and creating awareness on services and supports available. b.) Providing health literacy and competency training for members providing care, c. coordinating with PHIP activities to ensure the people residing in high-risk hotspots are engaged at the neighborhood and community level.

2.) Risk: Adding clinical decision support into EMR systems

Mitigation: a.)A plan has been established to not turn on all CDS, just those that impact the evidence based guidelines chosen. b.) HIT implementation specialist will work with office to assist in the proper use of CDS

3.) Risk: Adoption of PCMH 2014 standards

Mitigation: a.) PCMH certified content experts will be deployed to assist offices in obtaining PCMH level 3 2014 certification.

4.) Risk: Access to Blood Pressure screenings and variation in screening techniques

Mitigation: Automated blood pressure cuffs for easy screening have been identified by the Medical Management Committee of the PPS with input from the regions cardiologists. This has been included in capital request to ensure uniformity and access to screening.

5.) Risk: Existing provider gaps and access to care issues

Mitigation: a.) The workforce committee has established a plan for recruitment and retainment of new provider's b.) Enhancements to GME program c.) Care coordination to assist the chronically ill with access to care.

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 3.b.i.3 - Patient Engagement Speed

Instructions:

Please specify how many patients will have become 'Actively Engaged' (as set out in the Project Plan Application) per quarter. These cumulative numbers must align with commitments in the PPS Application. Note: data entered into this table must represent CUMULATIVE figures.

Benchn	narks
100% Actively Engaged By	Expected Patient Engagement
DY3,Q4	7,645

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

☑ IPQR Module 3.b.i.4 - Prescribed Milestones

Instructions:

Please enter baseline target dates and work breakdown tasks with target dates for each of the milestones below.

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.	Project	N/A	In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task PPS has implemented program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task 1. Assess and Stratify population into risk categories.	Project		In Progress	07/01/2015	12/31/2016	12/31/2016	DY2 Q3
Task 2. Asses and Stratify population lifestyle approaches to prevent CVD.	Project		In Progress	07/01/2015	12/31/2016	12/31/2016	DY2 Q3
Task 3. Determine other CVD risk-reducing interventions and categorize by priority based on class recommendation.	Project		In Progress	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 4. Develop a program to improve CVD that utilizes evidence-based strategies and stratified data in the ambulatory setting.	Project		In Progress	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 5. Develop a program to improve CVD that utilizes evidence-based strategies and stratified data in community care setting.	Project		In Progress	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 6. Conducting CVD training and awareness for population, ambulatory and community based organizations	Project		In Progress	07/01/2015	06/30/2017	06/30/2017	DY3 Q1
Task 7. Implement program to improve CVD management using evidence-based strategies in the ambulatory and community based setting.	Project		In Progress	07/01/2015	06/30/2017	06/30/2017	DY3 Q1
Task 8. Monitor and control CVD program management in the ambulatory and community based settings.	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Milestone #2 Ensure that all PPS safety net providers are actively connected to EHR systems with local health information exchange/RHIO/SHIN-NY and share	Project	N/A	In Progress	04/01/2015	03/31/2018	03/31/2018	DY3 Q4

Page 314 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the end of DY 3.							
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	Provider	Safety Net Primary Care Physicians	On Hold	04/01/2015	03/31/2020	03/31/2020	DY5 Q4
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	Provider	Safety Net Non-PCP Practitioners	On Hold	04/01/2015	03/31/2020	03/31/2020	DY5 Q4
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	Provider	Safety Net Behavioral Health	On Hold	04/01/2015	03/31/2020	03/31/2020	DY5 Q4
Task PPS uses alerts and secure messaging functionality.	Project		In Progress	04/01/2015	03/31/2018	03/31/2018	DY3 Q4
 Task 1. Conduct an assessment of the current practices and clinics to determine the needed infrastructure, training and implementation required to ensure all providers are fully utilizing EHRs to provide coordinated care across the PPS. 	Project		In Progress	04/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 2. Perform a gap analysis and a plan with budget to address the identified needs	Project		In Progress	04/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 3. Begin implementations with prioritization based on attributed Medicaid population and provider engagement.	Project		In Progress	04/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 4. During the implementation phase and all phases that follow, prepare a report to the governance committee to ensure that all risks, & issues are communicated and a plan is in place to address them.	Project		In Progress	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 5. Perform a post-go-live gap analysis and a plan with budget to address the identified needs	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 6. Facilitate the practice's connection with the HealtheConnections RHIO and the regional PHM platform to ensure they have access to all information the patient has consented to in order to provide efficient, effective and high-quality care.	Project		In Progress	04/01/2015	03/31/2018	03/31/2018	DY3 Q4
Milestone #3 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.	Project	N/A	In Progress	04/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task EHR meets Meaningful Use Stage 2 CMS requirements (Note: any/all MU requirements adjusted by CMS will be incorporated into the assessment	Project		In Progress	04/01/2015	03/31/2018	03/31/2018	DY3 Q4

criteria).							
Task PPS has achieved NCQA 2014 Level 3 PCMH standards and/or APCM.	Provider	Primary Care Physicians	On Hold	04/01/2015	03/31/2020	03/31/2020	DY5 Q4
Conduct an assessment of the current practices and clinics to determine the needed infrastructure, training and implementation required to ensure all providers are fully utilizing EHRs to provide coordinated care across the PPS.	Project		In Progress	04/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 2. Perform a gap analysis and a plan with budget to address the identified needs	Project		In Progress	04/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 3. Perform a pre-MU and PCMH assessment of the current practices and clinics to determine the needed infrastructure, training and implementation required to ensure all providers are utilizing the EHR and operating as a PCMH in order to attest for MU and apply for NCQA PCMH by DSRIP DY3.	Project		In Progress	04/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task4. Begin implementations with prioritization based on attributed Medicaid population and provider engagement.	Project		In Progress	04/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 5. During the implementation phase and all phases that follow, prepare a report to the governance committee to ensure that all risks, & issues are communicated and a plan is in place to address them.	Project		In Progress	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 6. Perform a post-go-live gap analysis and a plan with budget to address the identified needs	Project		In Progress	04/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task 7. Facilitate the practice's connection with the HealtheConnections RHIO and the regional PHM platform to ensure they have access to all information the patient has consented to in order to provide efficient, effective and high-quality care.	Project		In Progress	04/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task 8. Begin MU attestations & PCMH recognitions with prioritization based on attributed Medicaid population and provider engagement.	Project		In Progress	04/01/2015	12/31/2016	12/31/2016	DY2 Q3
Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.	Project	N/A	In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4

Page 316 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Task 1. Identify targeted patient population through data collection	Project		In Progress	04/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 2. Track / Monitor actively engaged patients utilizing designated tracking systems	Project		In Progress	04/01/2015	12/31/2016	12/31/2016	DY2 Q3
Task 3. Report actively engaged patients against milestone completion	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 4. Routinely Measure outcomes through quality assessment	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Milestone #5 Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).	Project	N/A	In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS has implemented an automated scheduling system to facilitate tobacco control protocols.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS provides periodic training to staff to incorporate the use of EHR to prompt the use of 5 A's of tobacco control.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 1. Assess EMR systems limitations and capabilities for incorporation of 5A's	Project		In Progress	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 2. Promote direct conversation of 5A's between patient /clinician	Project		In Progress	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 3. Identify and Stratify population into tobacco use and non-tobacco categories.	Project		In Progress	04/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 4. Formulate data collection to create patient tobacco use listings	Project		In Progress	04/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 5. Train staff to incorporate EHR to prompt the use of 5A's of tobacco control	Project		In Progress	04/01/2015	12/31/2016	12/31/2016	DY2 Q3
Task 6. Implement an automated or work driver scheduling system to facilitate tobacco control protocols.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 7. Practioners and Clinics document in EHR system patient tobacco use status	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Milestone #6 Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.	Project	N/A	In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Practice has adopted treatment protocols aligned with national guidelines, such as the National Cholesterol Education Program (NCEP) or US Preventive Services Task Force (USPSTF).	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4

Milestone #1										
Implement program to improve management of cardiovascular										
disease using evidence-based strategies in the ambulatory and										
community care setting.										
Task										
PPS has implemented program to improve management of										
cardiovascular disease using evidence-based strategies in the										
ambulatory and community care setting.										
Task										
Assess and Stratify population into risk categories.										
Task										
2. Asses and Stratify population lifestyle approaches to prevent										
CVD.										
Task										
Determine other CVD risk-reducing interventions and										
categorize by priority based on class recommendation.										
Task										
4. Develop a program to improve CVD that utilizes evidence-										
based strategies and stratified data in the ambulatory setting.										
Task										
5. Develop a program to improve CVD that utilizes evidence-										
based strategies and stratified data in community care setting.										
Task										
6. Conducting CVD training and awareness for population,										
ambulatory and community based organizations										
Task										
7. Implement program to improve CVD management using										
evidence-based strategies in the ambulatory and community										
based setting.										
Task										
8. Monitor and control CVD program management in the										
ambulatory and community based settings. Milestone #2										
Ensure that all PPS safety net providers are actively connected										
to EHR systems with local health information										
exchange/RHIO/SHIN-NY and share health information among

Task										
Practice has adopted treatment protocols aligned with national										
guidelines, such as the National Cholesterol Education										
Program (NCEP) or US Preventive Services Task Force										
(USPSTF).										
Task										
Practices will provide opportunities for follow-up blood										
pressure checks without a copayment or advanced										
appointment.										
Task										
2. Make hypertension control a priority in practices and health										
systems and identify the protocol's in achieving control of blood										
pressure for hypertensive patients										
Task										
3. Identify patients who have repeated elevated blood pressure										
readings in their medical record but do not have a diagnosis of										
hypertension and schedule them for a hypertension visit.										
Task										
Generate lists of patients with hypertension who have not										
had a recent visit and schedule a follow up visit.										
Task										
Provide training to ensure attainment of correct blood										
pressure measurements										
Task										
6. Conduct pre-visit planning to ensure blood pressure is a										
focus of patient visits										
Task										
7. Incorporate coaching and self-management into patient										
educations and follow-up visits										
Task										
8. Practices will adopt treatment protocols that align with										
national guidelines: US Preventive Task Force (USPSTF) or										
National Cholesterol Education Program (NCEP) Milestone #7										
Develop care coordination teams including use of nursing staff,										
pharmacists, dieticians and community health workers to										
address lifestyle changes, medication adherence, health										
literacy issues, and patient self-efficacy and confidence in self-management.										
Task										
Clinically Interoperable System is in place for all participating										
providers.										
Task										
Care coordination teams are in place and include nursing staff,										
pharmacists, dieticians, community health workers, and Health										
pharmadists, dieticians, community health workers, and fleatth					1

Home care managers where applicable.										
Task										
Care coordination processes are in place.										
Task										
Form care coordination teams that include nursing staff, pharmacists, dieticians, community health workers, and Health Home care managers.										
Task										
 Implement care coordination teams that include nursing staff, pharmacists, dieticians, community health workers, and Health Home care managers where applicable. 										
Task										
3. Validate Care coordination processes are in place.										
Task 4. All participating providers will have a Clinically Interoperable System in place										
Milestone #8										
Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.										
Task										
All primary care practices in the PPS provide follow-up blood pressure checks without copayment or advanced appointments.	0	0	0	0	0	0	0	0	0	0
Task 1. Provide patient training to ensure attainment of correct blood pressure measurements										
Task 2. Practices will provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.										
Task 3. Incorporate coaching and self-management into patient educations and follow-up visits										
Milestone #9 Ensure that all staff involved in measuring and recording blood pressure are using correct measurement techniques and equipment.										
Task PPS has protocols in place to ensure blood pressure measurements are taken correctly with the correct equipment.										
Task Conduct training to ensure attainment of correct blood pressure measurements Task 1. Conduct training to ensure attainment of correct blood pressure measurements										
Task 2. Document blood pressure readings in EMR system										

Page 331 of 418 **Run Date**: 09/24/2015

Task										
3. Conduct annual assessment and attestation of health care										
staffs understanding of correct blood pressure measurement										
techniques and equipment.										
Milestone #10										
Identify patients who have repeated elevated blood pressure										
readings in the medical record but do not have a diagnosis of										
hypertension and schedule them for a hypertension visit. Task										
PPS uses a patient stratification system to identify patients who										
have repeated elevated blood pressure but no diagnosis of										
hypertension.										
Task										
PPS has implemented an automated scheduling system to										
facilitate scheduling of targeted hypertension patients.										
Task										
PPS provides periodic training to staff to ensure effective										
patient identification and hypertension visit scheduling.										
Task										
Generate lists of patients with hypertension who have not										
had a recent visit and schedule a follow up visit.										
Task										
Make hypertension control a priority in practices and health systems and identify the protocol's in achieving control of blood										
pressure for hypertensive patients										
Task										
3. Conduct pre-visit planning to ensure blood pressure is a										
focus of patient visits										
Milestone #11										
Prescribe once-daily regimens or fixed-dose combination pills										
when appropriate.										
Task										
PPS has protocols in place for determining preferential drugs										
based on ease of medication adherence where there are no other significant non-differentiating factors.										
Task										
Encourage patients to use medication reminders.										
Task										
Ensure patients understand their risks if they do not take										
medications as directed.										
Task										
Confirm medication benefits with patients.										
Task										
Educate patients on the use of medication reminders.

Task										
6. Provide once daily regimens or fixed-dosed combination pills										
when appropriate.										
Task										
7. Conduct frequent / routine follow-ups with patients										
Milestone #12										
Document patient driven self-management goals in the medical										
record and review with patients at each visit.										
Task										
Self-management goals are documented in the clinical record.										
Task		1				1				1
PPS provides periodic training to staff on person-centered										
methods that include documentation of self-management goals.										
Task										
Print visit summaries and follow-up guidance for patients.										
Task										
2. Generate lists of patients with hypertension who have missed										
recent appointments. Send phone, mail, e-mail, or text										
reminders.										
Task										
3. Provide patients who have hypertension with a written self-										
management plan at the end of each office visit.										
Task										
4. Encourage or provide patient support groups.										
Task										
5. Use all staff interactions with patients as opportunities to										
assist in self-management goal-setting and practices										
Milestone #13										
Follow up with referrals to community based programs to										
document participation and behavioral and health status										
changes.										
Task

Task										
5. Incorporate regular transmission of patient home blood										
pressure readings through patient portals, telemonitoring, log										
books to clinicians and EHR systems.										
Milestone #15										
Generate lists of patients with hypertension who have not had a										
recent visit and schedule a follow up visit.										
Task										
PPS has implemented an automated scheduling system to										
facilitate scheduling of targeted hypertension patients.										
Task										
1. Generate lists of patients with hypertension who have missed										
recent appointments. Send phone, mail, e-mail, or text										
reminders.										
Task										
2. Print visit summaries and follow-up guidance for patients.										
Task										
3. Implement an automated or work driver scheduling system to										
facilitate scheduling of targeted hypertension patients.										
Milestone #16										
Facilitate referrals to NYS Smoker's Quitline.										
Task										
PPS has developed referral and follow-up process and adheres										
to process.										
Task										
1. Develop a referral and follow-up process and that adheres to										
the 5A's process										
Task										
2. Refer Smokers to NYS Smokers Quit line through EHR/FAX										
Task										
3. Post smoking cessation information in waiting rooms										
Task										
4. Providers will establish and conduct follow-up visits										
Task										
5. Implement EHRs that will require providers to ask and advise										
patients about smoking										
Milestone #17										
Perform additional actions including "hot spotting" strategies in										
high risk neighborhoods, linkages to Health Homes for the										
highest risk population, group visits, and implementation of the										
Stanford Model for chronic diseases.										
Task										
If applicable, PPS has Implemented collection of valid and										
reliable REAL (Race, Ethnicity, and Language) data and uses										
the data to target high risk populations, develop improvement

,										
plans, and address top health disparities.										
Task If applicable, PPS has established linkages to health homes for targeted patient populations.										
Task If applicable, PPS has implemented Stanford Model through partnerships with community-based organizations.										
Task 1. Assess and Stratify population into categories.										
Task 2. Asses and Stratify data collection population based on (Race, Ethnicity, and Language) (REAL).										
Task 3. Develop improvement processes and plans that address top health disparities and improve workflow										
Task 4. Establish linkages to health homes for targeted patient populations										
Task5. Implement Stanford model through partnerships with community based organizations (CBO's).										
Task6. Conduct training on high risk populations, Stanford Model for chronic diseases and linkages to health homes.										
Milestone #18 Adopt strategies from the Million Hearts Campaign.										
Task Provider can demonstrate implementation of policies and procedures which reflect principles and initiatives of Million Hearts Campaign.	0	0	0	0	0	0	0	0	0	0

Hearts Campaign.										
Task										
3. Conduct routine data assessments and produce periodic										
updates that demonstrate an increase in home blood pressure										
monitoring										
Milestone #19										
Form agreements with the Medicaid Managed Care										
organizations serving the affected population to coordinate										
services under this project.										
Task										
PPS has agreement in place with MCO related to coordination										
of services for high risk populations, including smoking										
cessation services, hypertension screening, cholesterol										
screening, and other preventive services relevant to this										
project.										
Task										
Establish agreement's with MCO related to coordination of										
services for high risk populations, including smoking cessation										
services, hypertension screening, cholesterol screening, and										
other preventive services relevant to this project.										
Task										
2. Documented evidence of agreements										
Milestone #20										
Engage a majority (at least 80%) of primary care providers in										
this project.										
Task	0	0	0	0	0	0	0	0	0	0
PPS has engaged at least 80% of their PCPs in this activity.			_	_	_		_	-	_	_
Task										
Utilize FDRHPO Communications Committee to support										
communication needs										
Task										
Utilize Medical Management Committee to support the										
engagement of PPS providers in achieving DSRIP										
transformation.										
Task										
3. Identify PCP's and gain commitment to achieve metrics										
associated with 3.b.i										
Task										
4. Implement and Utilize practioner communications										
engagement plan to: inform, improve, sustain two-way										
communications.										
Task										
5. Evaluate organizational infrastructure and resources required										
to achieve metrics associated with project 3.b.i						1

Milestone #1										
Implement program to improve management of cardiovascular										
disease using evidence-based strategies in the ambulatory and										
community care setting.										
Task										
PPS has implemented program to improve management of										
cardiovascular disease using evidence-based strategies in the										
ambulatory and community care setting.										
Task										
Assess and Stratify population into risk categories.										
Task										
2. Asses and Stratify population lifestyle approaches to prevent										
CVD.										
Task										
3. Determine other CVD risk-reducing interventions and										
categorize by priority based on class recommendation.										
Task										
4. Develop a program to improve CVD that utilizes evidence-										
based strategies and stratified data in the ambulatory setting.										
Task										
5. Develop a program to improve CVD that utilizes evidence-										
based strategies and stratified data in community care setting.										
Task										
6. Conducting CVD training and awareness for population,										
ambulatory and community based organizations										
Task										
7. Implement program to improve CVD management using										
evidence-based strategies in the ambulatory and community										
based setting.										
Task										
8. Monitor and control CVD program management in the										
ambulatory and community based settings.										
Milestone #2										
Ensure that all PPS safety net providers are actively connected										

Page 338 of 418 **Run Date**: 09/24/2015

Task										
PPS identifies targeted patients and is able to track actively										
engaged patients for project milestone reporting.										
Task										
Identify targeted patient population through data collection										
Task										
2. Track / Monitor actively engaged patients utilizing designated										
tracking systems										
Task										
3. Report actively engaged patients against milestone										
completion										
Task										
4. Routinely Measure outcomes through quality assessment										
Milestone #5										
Use the EHR to prompt providers to complete the 5 A's of										
tobacco control (Ask, Assess, Advise, Assist, and Arrange).										
Task										
PPS has implemented an automated scheduling system to										
facilitate tobacco control protocols.										
Task										
PPS provides periodic training to staff to incorporate the use of										
EHR to prompt the use of 5 A's of tobacco control.										
Task										
Assess EMR systems limitations and capabilities for										
incorporation of 5A's										
Task										
2. Promote direct conversation of 5A's between patient										
/clinician										
Task										
3. Identify and Stratify population into tobacco use and non-										
tobacco categories.										
Task										
4. Formulate data collection to create patient tobacco use										
listings										
Task										
5. Train staff to incorporate EHR to prompt the use of 5A's of										
tobacco control										
Task										
6. Implement an automated or work driver scheduling system to										
facilitate tobacco control protocols.										
Task										
7. Practioners and Clinics document in EHR system patient										
tobacco use status										
Milestone #6										
Adopt and follow standardized treatment protocols for										
Auopi and ioliow standardized treatment protocols iol							<u> </u>			

Page 341 of 418 Run Date : 09/24/2015

DSRIP Implementation Plan Project

Project Requirements										
(Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
hypertension and elevated cholesterol.										
Task										
Practice has adopted treatment protocols aligned with national										
guidelines, such as the National Cholesterol Education										
Program (NCEP) or US Preventive Services Task Force (USPSTF).										
Task										
Practices will provide opportunities for follow-up blood										
pressure checks without a copayment or advanced										
appointment.										
Task										
2. Make hypertension control a priority in practices and health										
systems and identify the protocol's in achieving control of blood										
pressure for hypertensive patients										
Task										
3. Identify patients who have repeated elevated blood pressure readings in their medical record but do not have a diagnosis of										
hypertension and schedule them for a hypertension visit.										
Task										
Generate lists of patients with hypertension who have not										
had a recent visit and schedule a follow up visit.										
Task										
5. Provide training to ensure attainment of correct blood										
pressure measurements										
Task										
6. Conduct pre-visit planning to ensure blood pressure is a										
focus of patient visits										
Task										
7. Incorporate coaching and self-management into patient educations and follow-up visits										
Task										
Practices will adopt treatment protocols that align with										
national guidelines: US Preventive Task Force (USPSTF) or										
National Cholesterol Education Program (NCEP)										
Milestone #7										
Develop care coordination teams including use of nursing staff,										
pharmacists, dieticians and community health workers to										
address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-										
management.										
Task									1	1
Clinically Interoperable System is in place for all participating										
providers.		1		1		1		1

DSRIP Implementation Plan Project

Project Requirements	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
(Milestone/Task Name)	,	,	,	,	,	,		,	,	,
Task										
Care coordination teams are in place and include nursing staff,										
pharmacists, dieticians, community health workers, and Health										
Home care managers where applicable. Task										
Care coordination processes are in place.										
Form care coordination teams that include nursing staff,										
pharmacists, dieticians, community health workers, and Health										
Home care managers.										
Task										
2. Implement care coordination teams that include nursing staff,										
pharmacists, dieticians, community health workers, and Health										
Home care managers where applicable.										
Task										
Validate Care coordination processes are in place.										
Task										
4. All participating providers will have a Clinically Interoperable										
System in place										
Milestone #8										
Provide opportunities for follow-up blood pressure checks										
without a copayment or advanced appointment.										
Task										
All primary care practices in the PPS provide follow-up blood	0	0	0	0	0	0	0	0	0	0
pressure checks without copayment or advanced appointments.		0				١	U			
Task										
Provide patient training to ensure attainment of correct blood										
pressure measurements										
Task										
Practices will provide opportunities for follow-up blood										
pressure checks without a copayment or advanced										
appointment.										
Task										
Incorporate coaching and self-management into patient										
educations and follow-up visits										
Milestone #9										
Ensure that all staff involved in measuring and recording blood										
pressure are using correct measurement techniques and										
equipment.										
Task										
PPS has protocols in place to ensure blood pressure										
measurements are taken correctly with the correct equipment.										
Task										
Conduct training to ensure attainment of correct blood										
pressure measurements										

Page 343 of 418 **Run Date**: 09/24/2015

DSRIP Implementation Plan Project

								T		T
Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task										
2. Document blood pressure readings in EMR system										
Task										
3. Conduct annual assessment and attestation of health care										
staffs understanding of correct blood pressure measurement techniques and equipment.										
Milestone #10										
Identify patients who have repeated elevated blood pressure										
readings in the medical record but do not have a diagnosis of										
hypertension and schedule them for a hypertension visit.										
Task										
PPS uses a patient stratification system to identify patients who										
have repeated elevated blood pressure but no diagnosis of hypertension.										
Task										
PPS has implemented an automated scheduling system to										
facilitate scheduling of targeted hypertension patients.										
Task										
PPS provides periodic training to staff to ensure effective										
patient identification and hypertension visit scheduling.										
Task 1. Generate lists of patients with hypertension who have not										
had a recent visit and schedule a follow up visit.										
Task										
2. Make hypertension control a priority in practices and health										
systems and identify the protocol's in achieving control of blood										
pressure for hypertensive patients										
Task 3. Conduct pre-visit planning to ensure blood pressure is a										
focus of patient visits										
Milestone #11										
Prescribe once-daily regimens or fixed-dose combination pills										
when appropriate.										
Task										
PPS has protocols in place for determining preferential drugs										
based on ease of medication adherence where there are no other significant non-differentiating factors.										
Task										
Encourage patients to use medication reminders.										
Task										
Ensure patients understand their risks if they do not take										
medications as directed.										
Task										
Confirm medication benefits with patients.										

Page 344 of 418 Run Date : 09/24/2015

Task										
4. Educate patients on the use of medication reminders.										
Task										
5. Implement protocols for determining preferential drugs based										
on ease of medication adherence where there are no other										
significant non-differentiating factors.										
Task										
6. Provide once daily regimens or fixed-dosed combination pills										
when appropriate.										
Task										
7. Conduct frequent / routine follow-ups with patients Milestone #12										
Document patient driven self-management goals in the medical										
record and review with patients at each visit.										
Task										
Self-management goals are documented in the clinical record.										
Task										
PPS provides periodic training to staff on person-centered										
methods that include documentation of self-management goals.										
Task										
Print visit summaries and follow-up guidance for patients.										
Task										
2. Generate lists of patients with hypertension who have missed										
recent appointments. Send phone, mail, e-mail, or text										
reminders.										
Task										
3. Provide patients who have hypertension with a written self-										
management plan at the end of each office visit.										
Task										
Encourage or provide patient support groups.										
Task										
5. Use all staff interactions with patients as opportunities to										
assist in self-management goal-setting and practices										
Milestone #13										
Follow up with referrals to community based programs to										
document participation and behavioral and health status										
changes.										
Task										
PPS has developed referral and follow-up process and adheres										
to process.										
Task										
PPS provides periodic training to staff on warm referral and										
follow-up process.										
Task										
Agreements are in place with community-based organizations										

Page 345 of 418 **Run Date**: 09/24/2015

and process is in place to facilitate feedback to and from										
community organizations.										
Task										
Establish agreements with community-based organizations.										
Task										
2. Conduct periodic training to staff on warm referral and follow-										
up process.										
Task										
3. Establish a process to facilitate feedback to and from										
community organizations.										
Task										
4. Develop a referral and follow-up process.										
Task										
5. Ensure adherence to CBO referral process.										
Task										
6. When applicable utilize electronic referrals to CBO's from										
primary care offices.										
Milestone #14										
Develop and implement protocols for home blood pressure										
monitoring with follow up support.										
Task										
PPS has developed and implemented protocols for home blood										
pressure monitoring.										
Task										
PPS provides follow up to support to patients with ongoing										
blood pressure monitoring, including equipment evaluation and										
follow-up if blood pressure results are abnormal.										
Task										
PPS provides periodic training to staff on warm referral and										
follow-up process.										
Task										
Medical Management Committee to review and select										
nationally recognized protocols for blood pressure monitoring.										
Task										
2. Provide regular customized support and advice (e.g.,										
medication titration, lifestyle modifications) based on patient										
blood pressure readings.										
Task										
3. Implement clinical support protocols / systems that										
incorporate regular transmission of patients' home blood										
pressure readings and customized clinician feedback into										
patient care.										
Task										
4. Train staff to administer specific clinical support interventions										
as available (e.g., telemonitoring, patient portals, counseling,

Web sites).										
Task										
5. Incorporate regular transmission of patient home blood										
pressure readings through patient portals, telemonitoring, log										
books to clinicians and EHR systems.										
Milestone #15										
Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.										
Task										
PPS has implemented an automated scheduling system to										
facilitate scheduling of targeted hypertension patients.										
Task										
1. Generate lists of patients with hypertension who have missed										
recent appointments. Send phone, mail, e-mail, or text										
reminders.										
Task										
2. Print visit summaries and follow-up guidance for patients.										
Task										
3. Implement an automated or work driver scheduling system to										
facilitate scheduling of targeted hypertension patients.										
Milestone #16										
Facilitate referrals to NYS Smoker's Quitline.										
Task										
PPS has developed referral and follow-up process and adheres										
to process.										
Develop a referral and follow-up process and that adheres to										
the 5A's process										
Task										
Refer Smokers to NYS Smokers Quit line through EHR/FAX										
Task										
Post smoking cessation information in waiting rooms										
Task										
Providers will establish and conduct follow-up visits										
Task										
5. Implement EHRs that will require providers to ask and advise										
patients about smoking										
Milestone #17										
Perform additional actions including "hot spotting" strategies in										
high risk neighborhoods, linkages to Health Homes for the										
highest risk population, group visits, and implementation of the										
Stanford Model for chronic diseases.										
Task										
If applicable, PPS has Implemented collection of valid and]			Ì		İ

3. Conduct routine data assessments and produce periodic										
updates that demonstrate an increase in home blood pressure										
monitoring										
Milestone #19										
Form agreements with the Medicaid Managed Care										
organizations serving the affected population to coordinate										
services under this project.										
Task										
PPS has agreement in place with MCO related to coordination										
of services for high risk populations, including smoking										
cessation services, hypertension screening, cholesterol										
screening, and other preventive services relevant to this										
•										
project.										
Task										
1. Establish agreement's with MCO related to coordination of										
services for high risk populations, including smoking cessation										
services, hypertension screening, cholesterol screening, and										
other preventive services relevant to this project.										
Task										
2. Documented evidence of agreements										
Milestone #20										
Engage a majority (at least 80%) of primary care providers in										
this project.										
Task	_	_	_	_	_	_	_	_	_	_
PPS has engaged at least 80% of their PCPs in this activity.	0	0	0	0	0	0	0	0	0	C
Task										
Utilize FDRHPO Communications Committee to support										
communication needs										
Task										
Utilize Medical Management Committee to support the										
engagement of PPS providers in achieving DSRIP										
transformation.										
Task										
3. Identify PCP's and gain commitment to achieve metrics										
associated with 3.b.i										
Task										
4. Implement and Utilize practioner communications										
engagement plan to: inform, improve, sustain two-way										
communications.										
Task										
5. Evaluate organizational infrastructure and resources required										
to achieve metrics associated with project 3.b.i	1

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Implement program to improve management of	
cardiovascular disease using evidence-based	
strategies in the ambulatory and community care	
setting.	
Ensure that all PPS safety net providers are	
actively connected to EHR systems with local	
health information exchange/RHIO/SHIN-NY and	
share health information among clinical partners,	
including direct exchange (secure messaging),	
alerts and patient record look up, by the end of DY	
3.	
Ensure that EHR systems used by participating	
safety net providers meet Meaningful Use and	
PCMH Level 3 standards and/or APCM by the end	
of Demonstration Year 3.	
Use EHRs or other technical platforms to track all	
patients engaged in this project.	
Use the EHR to prompt providers to complete the 5	
A's of tobacco control (Ask, Assess, Advise, Assist,	
and Arrange).	
Adopt and follow standardized treatment protocols	
for hypertension and elevated cholesterol.

Project 3.c.i – Evidence-based strategies for disease management in high risk/affected populations (adults only)

☑ IPQR Module 3.c.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1.) Risk: Changing the behavior of Medicaid patients.

Mitigation: a.) Establishing a schedule for community outreach and creating awareness on services and supports available. b.) Providing health literacy and competency training for members providing care.

2.) Risk: Adding clinical decision support into EMR systems

Mitigation: a.)A plan has been established to not turn on all CDS, just those that impact the evidence based guidelines chosen. b.) HIT implementation specialist will work with office to assist in the proper use of CDS

3.) Risk: Adoption of PCMH 2014 standards

Mitigation: a.) PCMH certified content experts will be deployed to assist offices in obtaining PCMH level 3 2014 certification.

4) Risk: Only three Certified Diabetes Educators (CDEs) across entire PPS geography and remote clinic locations

Mitigation: The PPS has included Telemedical equipment to deployed across the PPS Provider is the Capital Application to ensure remote video access to CDE for PCMH Teams

5.) Risk: Existing provider gaps and access to care issues

Mitigation: a.) The workforce committee has established a plan for recruitment and retainment of new provider's b.) Enhancements to GME program c.) Care coordination to assist the chronically ill with access to care.

Task 1. EHR meets Meaningful Use Stage 2 CMS requirements (NOTE: any/all MU requirements adjusted by CMS will be incorporated into the assessment criteria).										
Task 2. PPS has achieved NCQA 2014 level 3 PCMH standards and/or APCM.										
Task 3. EHR meets connectivity to RHIO/SHIN-NY requirements.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Implement evidence-based best practices for	
disease management, specific to diabetes, in	
community and ambulatory care settings.	
Engage at least 80% of primary care providers	
within the PPS in the implementation of disease	
management evidence-based best practices.	
Develop care coordination teams (including	
diabetes educators, nursing staff, behavioral health	
providers, pharmacy, community health workers,	
and Health Home care managers) to improve	
health literacy, patient self-efficacy, and patient	
self-management.	
Develop "hot spotting" strategies, in concert with	
Health Homes, to implement programs such as the	
Stanford Model for chronic diseases in high risk

neighborhoods.	
Ensure coordination with the Medicaid Managed	
Care organizations serving the target population.	
Use EHRs or other technical platforms to track all	
patients engaged in this project.	
Meet Meaningful Use and PCMH Level 3	
standards and/or APCM by the end of	
Demonstration Year 3 for EHR systems used by	
participating safety net providers.

DSRIP Implementation Plan Project

Samaritan Medical Center (PPS ID:45)

Project 3.c.ii – Implementation of evidence-based strategies to address chronic disease - primary and secondary prevention projects (adults only)

☑ IPQR Module 3.c.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

"The NCI PPS intends to implement the National Diabetes Prevention Program (NDPP) by leveraging existing partnerships with community-based organizations and by utilizing Electronic Health Records (EHRs) to identify and track pre-diabetic patients and individuals at risk of developing diabetes. Successful project implementation will therefore be contingent upon our partners and upon EHR functionality.

1.) Risk: Risks to implementation presented by our partners include their capacity to offer the class to the high number of regional residents that require intervention, their ability to offer the class at satellite locations (to overcome existing transportation challenges), and the financial sustainability of each program.

Mitigation: NCI is committed to the sustained delivery of the NDPP and will therefore mitigate the outlined risks by using DSRIP funds to offset the cost of expanding the programs and delivering them at the scope required to achieve measurable health improvement.

2.) Risk The region is characterized by a wide variety of EHR platforms, each with unique functionalities and challenges. One major EHR-based risk to implementation is the flexibility of a particular platform to add functionality allowing providers to seamlessly identify and refer high-risk and pre-diabetic patients to existing community-based prevention programming.

Mitigation: Our PPS has decided to mitigate that risk by conducting a comprehensive assessment of EHR functionality and developing a systematic plan to provide technical assistance to practices requiring added functionality to ensure that the target patient population is sufficiently identified, referred to services and tracked.

3.) Risk: Regional healthcare is currently provided in separate silos with limited ability to share records or care plans. Patients with chronic, complex conditions often have multiple and contradictory care plans with little to no communication between providers and settings. There are no agreed upon protocols for care transitions and little care management across the continuum. Due to the rural geography and transience of many high-risk patients once they leave the "teaching/engaging" moment at the hospital, the Health Home care managers are unable to find them to engage them in outpatient services and active participation in their care plans that would prevent future hospitalizations and ED use. In addition, there is a PC workforce shortage that requires a focused cross-system effort to increase capacity in order that we may serve those with chronic disease burdens. Because CBOs have little to no interaction with inpatient settings or PCPs, there is often a gap in leveraging community support services such as the NDPP. Patients need facilitated, smooth transitions and communication across all settings.

Mitigation: Implementation of a regional care transition project (2biv), regional delivery system integration (2ai) and a strategy to improve PCMH status (2aii)."

☑ IPQR Module 3.c.ii.4 - Prescribed Milestones

Instructions:

Please enter baseline target dates and work breakdown tasks with target dates for each of the milestones below.

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Implement Center for Disease Control (CDC)-recognized National Diabetes Prevention Programs (NDPP) and/or create partnerships with community sites to refer patients to CDC-recognized programs.	Project	N/A	In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task PPS has implemented CDC-recognized National Diabetes Prevention Programs (NDPP) and/or create linkages with community program delivery sites to refer patients to CDC - recognized programs in the community such as the National Diabetes Prevention Program (NDPP), Chronic Disease Self- Management Program (CDSMP) and Diabetes Self-Management Education (DSME).	Project		In Progress	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task 1. Identify CBO's in PPS's geographical area that offer evidence-based programs and assess service capacity.	Project		In Progress	07/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task 2. Establish linkages with CBO's in the PPS's geographical targeted population areas	Project		In Progress	07/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task 3. Develop engagement plan that outlines numbers of CBO's required, service requirements and alignment of CBO 's specific roles and responsibilities in achieving DSRIP deliverables pertaining to chronic disease	Project		In Progress	07/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 4. Partner with and contract CBO's in diabetes prevention programs.	Project		In Progress	07/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 5. Incoporate communication of DPP into NCI DSRIP communications plan to: inform, improve, sustain two-way communications.	Project		In Progress	07/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task 6. Utilize existing CBO expertise to prevent overgrowth or duplication of existing services	Project		In Progress	07/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 7. Provide prevention information to CBO's about DPP, recognition process and training opportunities (include in NCI DSRIP Communication Plan	Project		In Progress	07/01/2015	12/31/2016	12/31/2016	DY2 Q3

Run Date: 09/24/2015

Page 379 of 418

DSRIP Implementation Plan Project

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Task 8. Identify appropriate public sector agencies at the state and local level in the NCI service area	Project		In Progress	07/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task 9. Develop an action plan for coordinating supporting agency activities within the PPS for discussion, review, and adoption by the Agencies and Municipal Authorities in advocating early identification of pre-diabetes.	Project		In Progress	07/01/2015	03/31/2016	03/31/2016	DY1 Q4
Milestone #2 Use EHRs or other technical platforms to track all patients engaged in this project.	Project	N/A	In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 1. Identify targeted patient population through data collection	Project		In Progress	04/01/2015	12/31/2016	12/31/2016	DY2 Q3
Task 2. Integrate clinical decision support functions based on evidence-based guidelines into EHR (i.e., order sets, alerts).	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 3. Track / Monitor actively engaged patients utilizing designated tracking systems	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 4. Report actively engaged patients against milestone completion	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 5. Routinely measure outcomes through quality assessment	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Milestone #3 Identify high-risk patients (including those at risk for onset of diabetes or with pre-diabetes) and establish referral process to institutional or community NDPP delivery sites.	Project	N/A	In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task PPS has identified patients and referred them to either institutional or community NDPP delivery sites.	Project		In Progress	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 1. Implement and utilize NCI DSRIP communications plan to: inform, improve, sustain two-way communications. Where appropriate and accepted utilize electronic referrals processes.	Project		In Progress	04/01/2015	09/30/2016	09/30/2016	DY2 Q2
Task 2. Showcase our regions DPP programs, while building support of these programs through introductions of key personnel and sharing of critical	Project		In Progress	04/01/2015	06/30/2016	06/30/2016	DY2 Q1

Task										
Integrate clinical decision support functions based on										
evidence-based guidelines into EHR (i.e., order sets, alerts).										
Task										
3. Track / Monitor actively engaged patients utilizing designated										
tracking systems										
Task										
4. Report actively engaged patients against milestone										
completion										
Task										
5. Routinely measure outcomes through quality assessment										
Milestone #3										
Identify high-risk patients (including those at risk for onset of										
diabetes or with pre-diabetes) and establish referral process to										
institutional or community NDPP delivery sites.										
PPS has identified patients and referred them to either										
institutional or community NDPP delivery sites. Task										
Implement and utilize NCI DSRIP communications plan to:										
inform, improve, sustain two-way communications. Where										
appropriate and accepted utilize electronic referrals processes.										
appropriate and accepted diffize electronic referrals processes.										
Task										
2. Showcase our regions DPP programs, while building support										
of these programs through introductions of key personnel and										
sharing of critical information needed to embrace these										
programs										
Task										
3. Enhance and leverage current systems to include										
identification of pre-diabetes and referral to recognized										
Diabetes Prevention Program										
Task										
4.Plan and execute strategic data-driven actions through a										
network of partners and local organizations to build support for										
NDPP.										
Task										
5. Support local media campaigns aimed at identified priority										
populations to increase awareness of pre-diabetes and										
encourage participation in NDPP.										
Milestone #4										
Ensure collaboration with PCPs and program sites to monitor										
progress and provide ongoing recommendations.

Milestone #5										
Establish lifestyle modification programs including diet, tobacco										
use, and exercise and medication compliance.										
Task										
Lifestyle modification programs that focus on lifestyle										
modification are created and implemented as part of care plan.										
Program recommendations are consistent with community										
resources.										
Task										
Strategic use of health communication and marketing tools to										
raise awareness chronic diseases:										
Task										
2. Enhance public awareness of lifestyle change programs and										
how to enroll in these lifestyle programs										
Task										
Educate employers and wellness professionals utilizing										
CBO's body of knowledge of wellness lifestyles										
Task										
Utilize Social Media to promote healthy lifestyle programs										
Task										
5. Partner with care coordinators on development of lifestyle										
modification programs as to assist in the involvement of all key										
stakeholders and patient advocates										
Task										
6. Educate patients on medication usage and control										
Milestone #6										
Ensure coordination with Medicaid Managed Care										
organizations and Health Homes for eligible/involved patients.										
Task										
PPS has agreement in place with MCO related to coordination										
of services for high risk populations, including smoking										
cessation services, hypertension screening, cholesterol										
screening, and other preventive services relevant to this										
project.

Milestone #1										
Implement Center for Disease Control (CDC)-recognized										
National Diabetes Prevention Programs (NDPP) and/or create										
partnerships with community sites to refer patients to CDC-										
recognized programs.										
Task										
PPS has implemented CDC-recognized National Diabetes										
Prevention Programs (NDPP) and/or create linkages with										
community program delivery sites to refer patients to CDC -										
recognized programs in the community such as the National										
Diabetes Prevention Program (NDPP), Chronic Disease Self-										
Management Program (CDSMP) and Diabetes Self-										
Management Education (DSME).										
Task										
Identify CBO's in PPS's geographical area that offer										
evidence-based programs and assess service capacity.										
Task										
2. Establish linkages with CBO's in the PPS's geographical										
targeted population areas										
1.55.1										
3. Develop engagement plan that outlines numbers of CBO's										
required, service requirements and alignment of CBO 's specific roles and responsibilities in achieving DSRIP deliverables

pertaining to chronic disease										
Task										
Partner with and contract CBO's in diabetes prevention										
programs.										
Task										
5. Incoporate communication of DPP into NCI DSRIP										
communications plan to: inform, improve, sustain two-way										
communications.										
Task										
Utilize existing CBO expertise to prevent overgrowth or										
duplication of existing services										
Task										
7. Provide prevention information to CBO's about DPP,										
recognition process and training opportunities (include in NCI										
DSRIP Communication Plan Task										
Identify appropriate public sector agencies at the state and local level in the NCI service area										
Task										
Develop an action plan for coordinating supporting agency										
activities within the PPS for discussion, review, and adoption by										
the Agencies and Municipal Authorities in advocating early										
identification of pre-diabetes.										
Milestone #2										
Use EHRs or other technical platforms to track all patients										
engaged in this project.										
Task										
PPS identifies targeted patients and is able to track actively										
engaged patients for project milestone reporting.										
Task										
Identify targeted patient population through data collection										
Task										
2. Integrate clinical decision support functions based on										
evidence-based guidelines into EHR (i.e., order sets, alerts).

PPS Defined Milestones Narrative Text

Milestone Name	Narrative Text
Establish or enhance reimbursement and	
incentive models to increase delivery of high-	
quality chronic disease prevention and	
management services	
Offer recommended clinical preventive	
services	
3. Incorporate Prevention Agenda goals and	
objectives into hospital Community Service	
Plans, and coordinate implementation with local	
health departments and community partners	
Adopt and use certified electronic health	
records, especially those with clinical decision	
supports and registry functionality. Send	
reminders to patients for preventive and follow-	
up care, and identify community resources	
available to patients to support disease self-	
management	
5. Adopt medical home or team-based care	
models	
6. Create linkages with and connect patients to	
community prevention resources	
7. Provide feedback to clinicians around clinical	
benchmarks and incentivize quality	
improvement efforts	
Reduce or eliminate out-of-pocket costs for	
clinical and community preventive services

Attestation

The Lead Representative has been designated by the Primary Lead PPS Provider (PPS Lead Entity) as the signing officiate for the DSRIP Quarterly Report. The Lead Representative has the authority to complete this attestation on behalf of the PPS network. The Lead Representative and PPS Lead Entity are responsible for the authenticity and accuracy of the material submitted in this report.

The Lead Representative of the Performing Provider System (PPS) must complete this attestation form in order for the project application to be accepted by the NYS Department of Health. Once the attestation is complete, the Quarterly Report will be locked down from any further editing. Do not complete this section until the entire Quarterly Report is complete.

If the Quarterly Report becomes locked in error and additional changes are necessary, please use the contact information on the Home Page to request that the Quarterly Report be unlocked.

To electronically sign this Quarterly Report, please enter the required information and check the box below:

I here by attest, as the Lead Representative of the 'Samaritan Medical Center', that all information provided on this Quarterly report is true and accurate to the best of my knowledge.

Primary Lead PPS Provider:	SAMARITAN MEDICAL CENTER	
Secondary Lead PPS Provider:		
Lead Representative:	Thomas H Carman	
Submission Date:	09/24/2015 12:16 PM

DSRIP Implementation Plan Project

Section	Module	Status
	IPQR Module 1.1 - PPS Budget Report	Completed
	IPQR Module 1.2 - PPS Flow of Funds	Completed
Section 01	IPQR Module 1.3 - Prescribed Milestones	Completed
	IPQR Module 1.4 - PPS Defined Milestones	Completed
	IPQR Module 1.5 - IA Monitoring	
	IPQR Module 2.1 - Prescribed Milestones	Completed
	IPQR Module 2.2 - PPS Defined Milestones	Completed
	IPQR Module 2.3 - Major Risks to Implementation & Risk Mitigation Strategies	Completed
	IPQR Module 2.4 - Major Dependencies on Organizational Workstreams	Completed
Section 02	IPQR Module 2.5 - Roles and Responsibilities	Completed
	IPQR Module 2.6 - Key Stakeholders	Completed
	IPQR Module 2.7 - IT Expectations	Completed
	IPQR Module 2.8 - Progress Reporting	Completed
	IPQR Module 2.9 - IA Monitoring	
	IPQR Module 3.1 - Prescribed Milestones	Completed
	IPQR Module 3.2 - PPS Defined Milestones	Completed
	IPQR Module 3.3 - Major Risks to Implementation & Risk Mitigation Strategies	Completed
	IPQR Module 3.4 - Major Dependencies on Organizational Workstreams	Completed
Section 03	IPQR Module 3.5 - Roles and Responsibilities	Completed
	IPQR Module 3.6 - Key Stakeholders	Completed
	IPQR Module 3.7 - IT Expectations	Completed
	IPQR Module 3.8 - Progress Reporting	Completed
	IPQR Module 3.9 - IA Monitoring	
	IPQR Module 4.1 - Prescribed Milestones	Completed
	IPQR Module 4.2 - PPS Defined Milestones	Completed
Section 04	IPQR Module 4.3 - Major Risks to Implementation & Risk Mitigation Strategies	Completed
	IPQR Module 4.4 - Major Dependencies on Organizational Workstreams	Completed
	IPQR Module 4.5 - Roles and Responsibilities

DSRIP Implementation Plan Project

Section	Module	Status
	IPQR Module 7.9 - IA Monitoring	
	IPQR Module 8.1 - Prescribed Milestones	Completed
	IPQR Module 8.2 - PPS Defined Milestones	Completed
	IPQR Module 8.3 - Major Risks to Implementation & Risk Mitigation Strategies	Completed
	IPQR Module 8.4 - Major Dependencies on Organizational Workstreams	Completed
Section 08	IPQR Module 8.5 - Roles and Responsibilities	Completed
	IPQR Module 8.6 - Key Stakeholders	Completed
	IPQR Module 8.7 - IT Expectations	Completed
	IPQR Module 8.8 - Progress Reporting	Completed
	IPQR Module 8.9 - IA Monitoring	
	IPQR Module 9.1 - Prescribed Milestones	Completed
Section 09	IPQR Module 9.2 - PPS Defined Milestones	Completed
	IPQR Module 9.3 - Major Risks to Implementation & Risk Mitigation Strategies	Completed
	IPQR Module 9.4 - Major Dependencies on Organizational Workstreams	Completed
	IPQR Module 9.5 - Roles and Responsibilities	Completed
	IPQR Module 9.6 - Key Stakeholders	Completed
	IPQR Module 9.7 - IT Expectations	☑ Completed
	IPQR Module 9.8 - Progress Reporting	Completed
	IPQR Module 9.9 - IA Monitoring	
	IPQR Module 10.1 - Overall approach to implementation	Completed
	IPQR Module 10.2 - Major dependencies between work streams and coordination of projects	Completed
Section 10	IPQR Module 10.3 - Project Roles and Responsibilities	Completed
	IPQR Module 10.4 - Overview of key stakeholders and how influenced by your DSRIP projects	Completed
	IPQR Module 10.5 - IA Monitoring
