Quarterly Report - Implementation Plan for SBH Health System

Year and Quarter: DY1, Q2 **Quarterly Report Status:** Adjudicated

Status By Section

Section	Description	Status
Section 01	Budget	Completed
Section 02	Governance	Completed
Section 03	Financial Stability	Completed
Section 04	Cultural Competency & Health Literacy	Completed
Section 05	IT Systems and Processes	Completed
Section 06	Performance Reporting	Completed
Section 07	Practitioner Engagement	Completed
Section 08	Population Health Management	Completed
Section 09	Clinical Integration	Completed
Section 10	General Project Reporting	Completed
Section 11	Workforce	Completed

Status By Project

Project ID	Project Title	Status
2.a.i	Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management	Completed
2.a.iii	Health Home At-Risk Intervention Program: Proactive management of higher risk patients not currently eligible for Health Homes through access to high quality primary care and support services	Completed
2.b.iii	ED care triage for at-risk populations	Completed
2.b.iv	Care transitions intervention model to reduce 30 day readmissions for chronic health conditions	Completed
3.a.i	Integration of primary care and behavioral health services	Completed
3.b.i	Evidence-based strategies for disease management in high risk/affected populations (adult only)	Completed
3.c.i	Evidence-based strategies for disease management in high risk/affected populations (adults only)	Completed
3.d.ii	Expansion of asthma home-based self-management program	Completed
4.a.iii	Strengthen Mental Health and Substance Abuse Infrastructure across Systems	Completed
4.c.ii	Increase early access to, and retention in, HIV care	Completed

Section 01 – Budget

IPQR Module 1.1 - PPS Budget Report (Baseline)

Instructions :

This table contains five budget categories. Please add rows to this table as necessary in order to add your own sub-categories. The budget categories used in this table should reflect the budget categories you used in your application. If budget entered varies from PPS application or previous implementation plan submission, please describe changes and justifications in the box provided.

Budget Items	DY1 ($)	DY2 ($)	DY3 ($)	DY4 ($)	DY5 ($)	Total ($)

IPQR Module 1.3 - PPS Flow of Funds (Baseline)

Instructions :

In the table below, please detail your PPS's projected flow of DSRIP funds for the next five years, splitting out the flow of funds by provider type. The provider types match the categories used for the Speed & Scale portion of your Project Plan Application.

- This table requires your funds flow projections on an annual basis. Subsequent quarterly reports will require you to submit your actual distribution of funds to these provider categories on a quarterly basis.
- These quarterly submissions of actual funds distribution will ultimately be required at the provider level (as opposed to the provider type level required here)

Funds Flow Items	DY1 ($)	DY2 ($)	DY3 ($)	DY4 ($)	DY5 ($)	Total ($)

Narrative Text :

Funds flow previously stated as Case Management under 3.a.i were miscategorized and have been relabeled as Mental Health.
Funds previously stated as All Other have been moved to Hospital, per NYS DOH remediation instructions. Slight additional alterations may be required in DY1 Q3 reporting, given the new guidance around classifications.

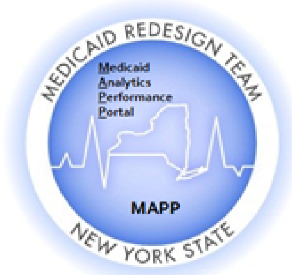
IPQR Module 1.7 - IA Monitoring

Instructions :

The IA has added guidance to modules 1,2,3, and 4.



Section 02 – Governance

IPQR Module 2.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.
Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Note some milestones include minimum expected completion dates.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Finalize governance structure and sub-committee structure	Completed	This milestone must be completed by 9/30/2015. Governance and committee structure, signed off by PPS Board.	04/01/2015	05/01/2015	04/01/2015	05/01/2015	06/30/2015	DY1 Q1	YES
Task Establish committee charters	Completed	Develop and finalize charters for Executive Committee, Nominating Committee, Quality and Care Innovation Sub-Committee, Finance and Sustainability Sub-Committee, Workforce Sub-Committee and Information Technology Sub-Committee (collectively, the "Governance Charters"). The Governance Charters will describe the responsibilities of each committee, the process for appointing members to each committee, meeting frequency and the consensus-based decision making process of each committee.	04/01/2015	05/01/2015	04/01/2015	05/01/2015	06/30/2015	DY1 Q1	
Task Appoint EC members	Completed	Appoint members of the Executive Committee.	04/23/2015	05/01/2015	04/23/2015	05/01/2015	06/30/2015	DY1 Q1	
Task Initiate EC work	Completed	Convene Executive Committee, provide orientation to Executive Committee on roles and responsibilities, and initiate Committee work.	04/23/2015	04/23/2015	04/23/2015	04/23/2015	06/30/2015	DY1 Q1	
Task Appoint Sub-Committee members	Completed	Appoint members of the Quality and Care Innovation Sub-Committee, Finance and Sustainability Sub-Committee, Workforce Sub-Committee and Information Technology Sub-Committee (collectively, the "Sub-Committees").	04/23/2015	05/01/2015	04/23/2015	05/01/2015	06/30/2015	DY1 Q1	
Milestone #2 Establish a clinical governance structure, including clinical quality committees for each DSRIP project	In Progress	This milestone must be completed by 12/31/2015. Clinical Quality Committee charter and committee structure chart	04/01/2015	12/31/2015	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	YES
Task	Completed	Develop and finalize charter for Quality and Care Innovation	04/01/2015	05/01/2015	04/01/2015	05/01/2015	06/30/2015	DY1 Q1

Task Create an inventory of CBO services.	Completed	Finalize and administer survey to create an inventory of services offered by CBOs within the PPS area that participate in activities that impact population health. The PPS area covers all the neighborhoods and communities of the Bronx. The CSO implemented a survey of current CBO members of our PPS to profile their services, interest and capacity to participate as partner organizations in our DSRIP projects. Our current CBO members encompass a wide array of service providers, including services for intellectual and development disabilities(IDD); food banks, community gardens and farmer's markets; foster children agencies; HIV prevention/outreach and social services; housing services, including advocacy groups, housing providers and homeless services; individual employment support services; financial assistance and support, including clothing and furniture banks; not-for profit health and welfare agencies; nutrition and exercise programs; peer, family support, training and self advocacy organizations; reentry organizations and alternatives to incarceration; transportation services; youth development programs; syringe access programs; and services for special populations, including immigrants, LGBT, seniors, uninsured and women.	04/01/2015	09/30/2015	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Recruit CBO representatives for engagement in committee work	Completed	Director of Collaboration to recruit representatives from CBOs to participate in patient engagement groups, Sub-Committees and the Executive Committee, as appropriate.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Develop community engagement strategy	Completed	Identify strategies to facilitate connections with the community and develop associated time line.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Establish community engagement plan	Completed	Draft community engagement plan and obtain feedback from patient engagement group and Executive Committee.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2

quality committees for each DSRIP project	tasks are on track for completion in DY1, Q3 as scheduled.
Finalize bylaws and policies or Committee Guidelines where applicable	Update: All three tasks due in DY 1, Q2 under this milestone were completed. This milestone is now completed.
Establish governance structure reporting and monitoring processes	Update: Of the 13 tasks under this milestone, eight have been completed. The remaining five are on track to be completed in DY 1, Q3 as scheduled.
Finalize community engagement plan, including communications with the public and non-provider organizations (e.g. schools, churches, homeless services, housing providers, law enforcement)	Update: All six tasks under this milestone were due and completed in Q 2. This milestone is now completed.
Finalize partnership agreements or contracts with CBOs	Update: Of the seven tasks under this milestone, four have been completed. The last three, which concern developing and finalizing, then negotiating and executing project schedules with CBOs, are on track to complete by DY 2, Q1 as scheduled.
Finalize agency coordination plan aimed at engaging appropriate public sector agencies at state and local levels (e.g. local departments of health and mental hygiene, Social Services, Corrections, etc.)	Update: The first of four tasks under this milestone was completed in Q2. The other three are on track to be completed as scheduled – two in DY 1, Q3 and the final deliverable, the Agency Coordination Plan, in DY 1, Q4.
Finalize workforce communication and engagement plan	Update: Of the six tasks under this milestone, two have been completed. The other four, which culminate in the finalization of the workforce communication and engagement plan, are on track to be completed as scheduled. Note: The Workforce Subcommittee in conjunction with Workforce Communications Workgroup and Workforce Planning Workgroup (all of which have been established and convened) and Workforce Advisory Workgroup (to be convened) function as the Workforce Project Team as referred to in completed task 8.1.
Inclusion of CBOs in PPS Implementation.	Update: Of the seven tasks under this milestone, three have been completed. The other four are on track to be completed as scheduled.

IPQR Module 2.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing your governance structure and processes and achieving the milestones described above, as well as potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

One challenge will be developing and negotiating the Base Agreement, the project schedules and funding schedules among the partners due to the broad range of partners by type and size. The various partners will have different interests, capabilities and limitations. The planned review of the Base Agreement and project schedules with partners' legal counsel will be transparent and will aim to reach mutually agreeable terms among all partners.

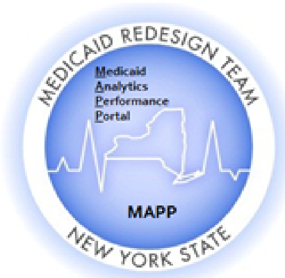
Another challenge will be engaging members of the Committees/Sub-Committees in a meaningful and productive way to achieve the PPS's goals over a short timeline. In order to build a strong and working governance structure, the members appointed to the various committees must prepare for meetings (e.g., read materials distributed in advance of meetings), attend and be attentive during meetings and otherwise be actively involved in the committees. However, SBH recognizes that committee members have significant obligations to their organizations outside of the PPS and will aim to be respectful of their time commitments. To ensure that committee and subcommittee members are able to stay abreast of PPS developments, SBH will utilize a wide range of online tools to support efficient information sharing. Specifically, SBH has already developed a BPHC website (www.bronxphc.org) to provide information about PPS activities to PPS members and the community. SBH has also developed a PAC member portal through the platform Directors Desk, where meeting materials are posted and stored. Additionally, SBH has begun hosting all-member and PAC webinars to inform and engage its members.

Additionally, the management of partner organizations must be willing to make the investments and changes needed to transform the way care is delivered in the Bronx. Their buy-in is crucial to the success of DSRIP. To ensure buy-in at the highest levels within partner organizations, BPHC has designed a highly inclusive governance structure which enables meaningful participation in PPS decision making by leaders (as well as staff) within partner organizations. In addition, BPHC central staff is establishing member profiles and engaging in one-on-one meetings with partner organizations to help understand their capacity, priorities and potential barriers to success. These findings will inform the design and deployment of PPS programs and policies. Finally, the structure of the MDSA will enable agreements to be tailored to the terms of each member organization and will be negotiated with partner management, requiring sign-off of executive management to execute.

Given that BPHC will be implementing ten clinical projects, another challenge is creating an administratively simple clinical governance structure that reduces the burden on major practitioner groups/CBOs that are supporting the clinical operational planning. To mitigate this risk, BPHC is grouping clinical projects that require similar thought leadership and that are providing care in similar settings (e.g., hospital, home-based). For example, ED triage and care transitions are grouped because they are both hospital-based interventions.

IPQR Module 2.4 - Major Dependencies on Organizational Workstreams

Instructions :



Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The ability to develop the project schedules that are part of the partnership agreements with CBOs will depend on the development of Clinical Operational Plans which will detail work plans and partner obligations by DSRIP project. Creation of the funding schedules is dependent upon outputs of the finance workstream, which will include the funding amount that the SBH will receive, the distribution of Participants among the projects and the allocation of funding to each project-level budget.

Additionally, SBH and its partners will need to engage frontline workers to ensure the success of each DSRIP project. To achieve this, SBH will need to, among other things, forge strong relationships with the unions.

Finally, it is critical that the IT systems and processes are capable of collecting key data in a timely fashion so that SBH can monitor its performance on an ongoing basis and target areas in need of improvement.

IPQR Module 2.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for the development of your governance structure and processes and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
SBH COO	Len Walsh	BPHC governance strategy and fiduciary oversight, including policymaking and policy execution
Executive Director, BPHC CSO	Irene Kaufmann	Organize and facilitate committee meetings - Provides committees with relevant data, reports and communications - Records/files meeting minutes - Responsible for policy execution
BPHC Executive Committee	Len Walsh, Chair	Oversight of all aspects of deployment of DSRIP projects and evolution of BPHC into fully integrated delivery network - Responsible for policymaking
BPHC Nominating Committee	Chair, Nominating Committee	Recommend members of committees and Sub-committees to Executive committee - Responsible for policymaking
BPHC Finance & Sustainability Subcommittee	David Menashy, Co-Chair, Montefiore Medical Center Todd Gorlewski, Co-Chair, SBH Health System	Make recommendations on distribution of project Partner implementation funds - Monitor budget and compliance - Review financial Oversight structure - Oversee provision of assistance to financially frail Partners - Advise on development and implementation of sustainability and financial compliance plans - Responsible for policymaking
BPHC Information Technology Sub-Committee	Dr. Jitendra Barmecha, Chair, SBH Health System	Create and update processes and protocols for adoption and use of information technology that will be applicable to all members -Responsible for policymaking
BPHC Quality & Care Innovation Sub-Committee	Co-Chairs, Quality & Care Innovation Sub-Committee, David Collymore & Debbie Pantin	Establish evidence-based practice and quality standards and metrics - Oversee clinical management processes - Hold providers and PPS accountable for achieving targeted metrics and clinical outcomes - Responsible for policymaking
Workforce Sub-Committee	Mary Morris, Co-Chair, SBH Health System	Develop and implement comprehensive workforce strategy to

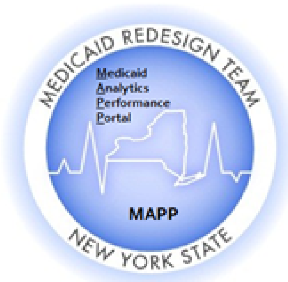
DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
	Rosa Mejias, Co-Chair, 1199 TEF	ensure BPHC retains, trains and hires staff needed to support implementation of DSRIP projects - Responsible for policymaking
BPHC Compliance Officer	TBD	Review and evaluate compliance issues/concerns within BPHC to ensure compliance with the rules and regulations of regulatory agencies and that BPHC's bylaws and policies and procedures are being followed - Responsible for policy execution
CEO of PPS Lead Organization	Dr. Scott Cooper	Make final determination of removal of committee members recommended for removal by Executive Committee



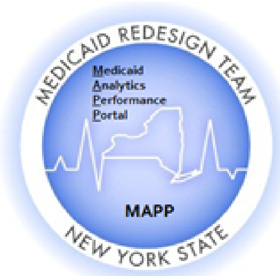
Module 2.6 - IPQR Module 2.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS with regard to your governance structure and processes.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Attributed Patients and Families/Caregivers	Recipients of and partners in care, social and other services delivered by BPHC members	- Interaction sufficient to participate and take limited accountability for health, healthcare and other services activities
BPHC CSO Senior Staff (Irene Kaufmann, Executive Director; Janine Dimitrakakis, Senior Director for Analytics; Robin Moon, Senior Director for Care Delivery and Practice Innovations, Amanda Ascher, Chief Medical Officer; Benny Turner, Director of Capital Projects an Vendor Services, and Mary Morris, Dirctor of Workforce Innovation)	Facilitate evolution of BPHC into Integrated Delivery System	- Conduct operations, communication and coordination with BPHC Partners and other stakeholders to support all DSRIP-related activities
BPHC Member Organizations	Participation in BPHC projects	- Commit resources and provide BPHC project-related data to BPHC - participate in BPHC governance committees and work groups as opportunities exist
SEIU 1199 Labor Union (Tom Cloutier, Teresa Pica, Gladys Wrenick, and Rosa Mejias)	Collaborate with BPHC on workforce strategy and implementation	- 1199 SEIU Labor Management Project will facilitate Workforce Advisory Workgroup of Workforce Sub-Committee - Project Advisory Committee member
External Stakeholders		
Bronx RHIO (Charles Scaglione, Executive Director)	Accountable for integration of Bronx RHIO-supplied HIE functionality for BPHC support	- Oversight and integration of Bronx RHIO HIE technology into BPHC operations - Training staff of BPHC Partners on use of Bronx RHIO system - Executive Committee member - IT Sub-Committee member
SEIU 1199 Training and Employment Fund (TEF) (Rosa Mejias, co-chair of the Workforce Sub-Committee)	Collaborate with BPHC on workforce strategy and implementation	- Work with Workforce Sub-Committee to identify competency and training gaps, provide trainers and training to meet identified training needs, hold joint training sessions and coordinate recruitment strategies
Other Bronx PPS	Collaborate with BPHC to identify commonalities for more effective use of resources	- Collaborate with BPHC on Bronx-wide force and DSRIP communication strategies, e.g., a single tool for communications

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
		and messaging to public and possibly unified workforce recruitment strategies and training initiatives



IPQR Module 2.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream and your ability to achieve the milestones described above.

Shared IT infrastructure will be important because it will enable the Executive Committee and the Sub-Committees to analyze data obtained from all participating providers in order to effectively monitor and improve the PPS's performance. SBH has created a public-facing website for the PPS (www.bronxphc.org), on which materials from all-Member meetings, updates from the Rapid Deployment Collaboratives, and other important documents will be posted. The website contains a calendar of key events for stakeholders, and a jobs page to connect community members and frontline workers to DSRIP-related employment opportunities. In addition, SBH has created a member portal for PAC members through the platform Directors Desk. Materials and minutes from all Committee and Sub-Committee meetings will be posted to the PAC portal unless deemed confidential.

IPQR Module 2.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Success will be measured by (1) the occurrence of meetings of the Executive Committee, Finance and Sustainability Sub-Committee, Workforce Sub-Committee, Quality and Care Innovation Sub-Committee, Information Technology Sub-Committee, and Nominating Committee at a frequency in accordance with the applicable charter, (2) implementation of PPS policies and procedures, and (3) execution of the Base Agreement and project schedules by SBH and Participants (including CBOs) and performance by SBH and Participants (including CBOs) of obligations against the Base Agreement. We will also monitor the performance reporting dashboard in order to track the progress of each DSRIP project against key quarterly milestones and metrics and produce progress reports that summarize the status for review by the Executive Committee and the Sub-Committees. A subset of key indicators will be posted to the BPHC website to ensure all PPS members and the community are kept up to speed on PPS progress.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Finalize PPS finance structure, including reporting structure	Update: Finance structure is complete and has been reviewed by the Committee.
Perform network financial health current state assessment and develop financial sustainability strategy to address key issues.	Update: In progress. Assessment tool is being reviewed after discussion in the F&S subcommittee meeting and will be sent to PPS for their response by November 15th. The results will be evaluated. Strategies to monitor and sustain those financially fragile providers will be developed. Milestone is on track for completion.
Finalize Compliance Plan consistent with New York State Social Services Law 363-d	Update: The compliance plan is under development with the SBH compliance team. A full time BPHC compliance officer will arrive in early November to finalize the plan. Milestone is on track for completion.
Develop detailed baseline assessment of revenue linked to value-based payment, preferred compensation modalities for different provider-types and functions, and MCO strategy.	Update: BPHC is partnering with MCO to develop baseline revenue that will link to VBP. Strategies to reduce cost but not compromising with overall health of its PPS will be developed. Milestone is on track for completion.
Finalize a plan towards achieving 90% value-based payments across network by year 5 of the waiver at the latest	Update: BPHC is working on a timeline that will initiate plan for VBP in year 3 and 4 and 90% by Year 5. Milestone is on track for completion.
Put in place Level 1 VBP arrangement for PCMH/APC care and one other care bundle or subpopulation	Awaiting guidance from NYSDOH.
Contract 50% of care-costs through Level 1 VBPs, and >= 30% of these costs through Level 2 VBPs or higher	Awaiting guidance from NYSDOH.
>=90% of total MCO-PPS payments (in terms of total dollars) captured in at least Level 1 VBPs, and >= 70% of total costs captured in VBPs has to be in Level 2 VBPs or higher	Awaiting guidance from NYSDOH

IPQR Module 3.3 - Major Risks to Implementation & Risk Mitigation Strategies

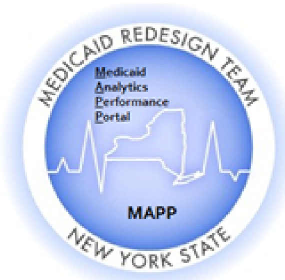
Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

(1) Provider Engagement: PPS must meaningfully engage and communicate individual PPS funding schedules at outset of DSRIP implementation to ensure partners and providers understand the process and project milestones tied to payment. As PPS engages partners in clinical operational and project readiness planning, and introduces partners to the Master Services Agreement (MSA), it will educate partners on DSRIP funds flow and funding schedules contained in the MSA. By DY1,Q3 PPS plans to develop a provider education and engagement strategy. (2) Availability of DSRIP Waiver Funds/Ability of PPS to Achieve and Draw Down Incentive Payments: PPS must achieve and report on state-established milestones and metrics to draw down incentive payments and subsequently distribute funds to partners. PPS has and will continue to engage in a thoughtful planning process to ensure it achieves DSRIP milestones and metrics efficiently and effectively. (3) Availability of Capital Funds: Timing and availability of capital funds will impact PPS project implementation and performance, as some projects require capital investments not covered by DSRIP waiver funds. Moreover, the timing of capital funds flows may create cash flow risks, especially for financially frail partners. PPS will work to identify additional sources of funding for capital-intensive projects. (4) Financial Frailty of Partners: Initial assessment of the financial health of its partner organizations showed the majority were "not immediately fragile." However, some key partners were identified as moderately. PPS, through its Finance and Sustainability Sub-Committee and CSO Provider Engagement Team, will develop partner reporting requirements and a process for monitoring and assisting financially frail partners. (5) MCO Engagement: The transition to value-based payment (VBP) across the PPS will require engagement and willingness from Medicaid managed care organizations (MCOs) to transform existing contracts into DSRIP-aligned VBP contracts over 5 years. PPS will continue engaging MCOs through DSRIP implementation planning and monthly meetings to ensure MCOs are meaningfully engaged in developing transition plans and have time to prepare for the transition to VBP. (6) Social Services and CBOs: Several third-party groups will have a significant impact on patient outcomes and overall success of the PPS, but their existence depends on extraneous revenue streams. NYC-run social service agencies and CBOs are dependent on city and state funding and charitable support. While MCOs will be supported by NYS in this restructuring, local community and county agencies face a host of outside influences that could impair their ability to support the PPS in a meaningful way. (7) Federally Qualified Health Centers ("FQHC"): Reimbursement methodologies within the FQHC business paradigm may not be in sync as DSRIP initiatives evolve. Wraparound payments under the 1115 Waiver depend on legislation that expires during DSRIP period and the administrative costs/burdens and financial reporting that HRSA requires is inconsistent with population health scoring and financial review. FQHC have no margins and access to capital involves bureaucratic and public finance hurdles. (8) Ability to Access Data for Financial Reporting: For PPS to meet reporting requirements, PPS needs access to data for financial reporting. This requires that appropriate processes and mechanisms to allow providers to perform and provide timely information. PPS intends to create buy-in by engaging PPS participants to assist in the development and implementation of appropriate reporting requirements and structures. (9) Physician Engagement: PPS must effectively engage and educate physicians regarding DSRIP's incentive-based funding structure.

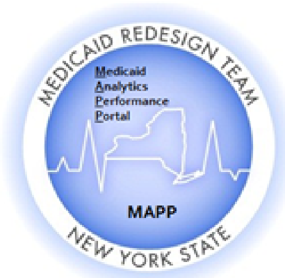
IPQR Module 3.4 - Major Dependencies on Organizational Workstreams

Instructions :



Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

• Performance Reporting: Identify point-of-contact in each partner organization for finance-related matters (e.g., reporting and policies/procedures); base partner reporting requirements on DSRIP reporting milestones/metrics; performance reporting infrastructure that supports provider, practice, and organization-level reporting and evaluation to drive DSRIP incentive payments (note: performance reporting and incentive payments will be detailed in each Participant's Master Services Agreement).
• Governance: The PPS governance structure must be capable of executing financial responsibilities; the PPS governance structure must evolve to incorporate Medicaid MCOs to support transition to value-based payment.
• IT: The PPS IT systems must support central finance and performance reporting to inform and track PPS and project-level budgets and funds flow; the PPS IT systems must support population health management to enable partners to improve patient outcomes that will drive the transition to value-based payment with Medicaid MCOs and other payers.
• Physician Engagement: The PPS must effectively engage and educate physicians regarding DSRIP's incentive-based funding structure, including contractual obligations associated with project-specific clinical interventions, Domain 1 requirements and their relationship to incentive payments.

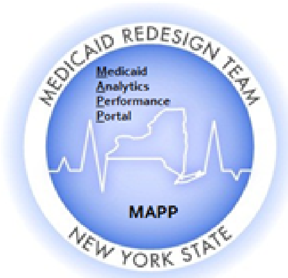


IPQR Module 3.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
BPHC Executive Director	Irene Kaufmann	Overall financial sustainability plan
BPHC Director of Financial Planning	Ronald Sextus	Overall implementation of financial strategy and sustainability plan
SBH CFO	Todd Gorlewski	Oversight of the sustainability plan
BPHC Sr. Accountant	Janneth Gaona	Setting up GL and maintenance of all BPHC revenue and expense accounts. Reconciling and Managing BPHC Bank accounts.
Interim SBH Compliance Advisor	Deborah Schneider (BPHC Compliance Officer recruitment in Progress)	Oversight of the compliance strategy
BPHC External Independent Auditor	Ernst & Young	Independent auditor will audit annually and report to the Finance and Executive Committee that the recording of accounting are done according to GAAP and are in compliance.

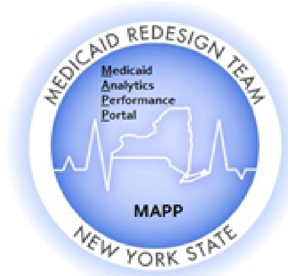


IPQR Module 3.6 - Key Stakeholders

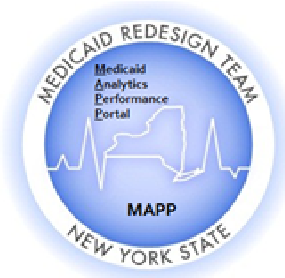
Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
BPHC CSO Business Staff	Accountable for integration and effective financial plan	Oversight and integration of finances into BPHC operations
BPHC Finance and Sustainability Sub-Committee	Governance for effective integration and use of IT, centrally and across partners	Oversight and integration of finance plan into BPHC operations
SBH Management/Leadership	Fiduciary oversight for effective financial plans	Oversight of BPHC financial operations
BPHC Executive Committee	Governance for effective and sustainable financial strategy	Governance structure with PPS-wide representation, makes policy decisions and provides direction for effective and sustainable financial strategy
BPHC Compliance Officer (TBD)	Oversight and advice on the compliance plan and audits	Oversight and advice on financial compliance and audit
BPHC Senior Director of Quality Management and Analytics	Accountable for providing required quality data in a timely manner	Quality data support
SBH IT team	Support the financial functions with the existing IT infrastructure and data streams	Support with the technical infrastructure
BPHC member organizations	Work within financial models to ensure BPHC success	Provide services according to master contract requirements
External Stakeholders		
External Auditor - Ernyst & Young	Conduct the annual audit	Complete audit documentation and recommendation
Hudson Valley PPS	Align financial models for paying and incenting providers and provider organizations with those developed by BPHC	Financial models and master contract agreements
Bronx Chamber of Commerce	Coordinate with the BCC in order for local businesses to increase employment opportunities for the local community.	Participating in events geared towards employment opportunities that foster local community development.
Bronx Business Improvement Districts	Working with Bronx BIDs and local CBOs to increase their involvement in local economic empowerment of the community.	Meeting with Bronx BIDs such as Fordham BID, Belmont BID and others to identify programs and opportunities that the community can benefit from.
Community Boards	Community Boards will participate in identifying the local community needs and concerns.	BPHC will participate in Local Community Board Meeting, Educate them about DSRIP and learn from them about the community needs and how to improve them.
Bronx Elected Officials	Work with the various Bronx Elected Officials and CBOs to address social determinants of health to improve the overall health of Bronx residents.	Work with Bronx Elected Officials and CBOs to host forums in addressing how to improve the overall health and economics of the community.



Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Medicaid Managed Care Health Plans	Monitor performance of financial models and use them to develop value-based contracting	Initiate development of value-based contracting with PPS hospitals and their providers



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

IPQR Module 3.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

The PPS will require appropriate IT systems to support central and PPS-wide reporting capabilities to support performance reporting, track PPS and project-level budgets and funds flow, and monitor financial sustainability. The systems will need to support PPS financial analysis reports, performance metrics reporting, and PPS-specific financial statements. When conducive, BPHC will leverage existing back-office systems within St. Barnabas Hospital and Montefiore. In terms of funds flow, treasury and general ledger, however, SBH will create a separate general ledger platform and banking arrangement to ensure that the restrictive nature and purpose of the intended funds are directed accurately with complete documentation for audit purposes. PPS-wide IT systems and health information exchanges that support care management and population health management will be required to enable partners to improve patient outcomes that will drive the transition to value-based payment with Medicaid MCOs and other payers.

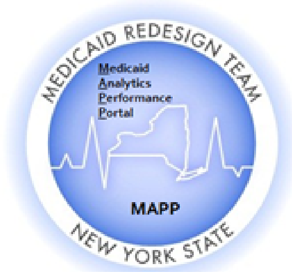
IPQR Module 3.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The success of this workstream will be measured on the financial stability of the participants in the PPS, PPS adherence to a compliance plan consistent with NY State Social Services Law 363-d, and the migration from the current level of VBP across PPS provider participants to 90% of the total MCO-PPS payments captured in at least Level 1 VBPs, with more than 70% in Level 2 VBPs or higher.
The PPS has already done an initial assessment of the financial stability of its lead organization and its partners. It will expand this initial assessment to new partners that have joined the PPS since the first assessment was completed. The assessment itself will be evaluated for potential updates and will be administered to all PPS participants annually. The Finance and Sustainability Sub-Committee will charged with updating the assessment as required, administering the evaluation and analyzing the results of the assessments. It will determine the need for potential interventions and initiate more robust monitoring of any financial fragile partners. The provider engagement team of the CSO and the Finance and Sustainability Sub-Committee will report findings from the assessment and monitoring activities regularly to the Executive Committee.

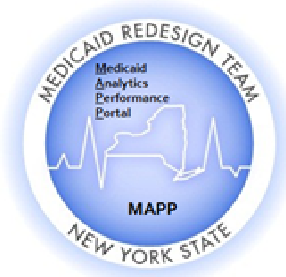
The PPS will publish its compliance plan and conduct quarterly compliance meetings. There will be quarterly and annual compliance reports as well as an annual review of the compliance plan itself to determine if additional changes are required.
The PPS has good visibility into the VBPs of its lead organization as well as some of the larger provider organizations participating in the PPS. It will develop an initial assessment to develop a complete baseline assessment of revenue linked to VBPs across all participants. The PPS will implement reporting requirements to monitor revenue linked to VBPs to regularly assess our performance against our plan to achieving 90% VBPs.



Starting in DY1, Q3 the PPS will engage MCOs and providers to develop the appropriate reporting requirements and procedures to meet the quarterly reporting requirements to the state.

IPQR Module 3.9 - IA Monitoring

Instructions :



Section 04 – Cultural Competency & Health Literacy

IPQR Module 4.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement. Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Note some milestones include minimum expected completion dates.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Finalize cultural competency / health literacy strategy.	In Progress	This milestone must be completed by 12/31/2015. Cultural competency / health literacy strategy signed off by PPS Board. The strategy should: -- Identify priority groups experiencing health disparities (based on your CNA and other analyses); -- Identify key factors to improve access to quality primary, behavioral health, and preventive health care -- Define plans for two-way communication with the population and community groups through specific community forums -- Identify assessments and tools to assist patients with self-management of conditions (considering cultural, linguistic and literacy factors); and -- Identify community-based interventions to reduce health disparities and improve outcomes.	04/01/2015	12/31/2015	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	YES
Task Initiate QCIS to support CC/HL strategy.	Completed	Establish and convene a Quality and Care Innovation Sub-Committee (QCIS) to support development of a PPS-wide cultural competency and health literacy strategy (CC/HL).	06/05/2015	06/30/2015	06/05/2015	06/30/2015	06/30/2015	DY1 Q1	
Task Inventory existing CC/HL programs in PPS	Completed	Conduct an inventory of existing CC/HL programs across PPS members and identify assets and gaps that should be addressed in CC/HL strategy.	04/01/2015	06/30/2015	04/01/2015	06/30/2015	06/30/2015	DY1 Q1	
Task Identify priority populations and locations	Completed	Through CNA and PPS member surveys, identify priority populations and neighborhoods experiencing health disparities and having low literacy. Particular attention to be focused on immigrant populations and populations	05/18/2015	09/30/2015	05/18/2015	09/30/2015	09/30/2015	DY1 Q2

		experiencing food and/or housing insecurity. Furthermore the strategy should target neighborhoods designated as Medically Underserved Areas and populations residing along the corridor of concentrated preventable admissions, stretching from Fordham-Bronx Park, down the Grand Concourse, to the South Bronx.							
Task Identify best practices in interventions to reduce health disparities	Completed	Gather information from key stakeholders with expertise on CC/HL to identify PPS and community-based interventions to reduce health disparities and improve outcomes.	05/18/2015	09/30/2015	05/18/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Develop CC/HL strategy and action plan	In Progress	Convene a CC/HL work group including co-chairs of the QCIS and CBO member leadership supported by the Director of Collaboration and the Director of Workforce Innovation. This group will utilize findings from CNA, inventory of providers, best practice experts and stakeholders to develop a CC/HL strategy and action plan. Strategy and action plan will include 1) specific initiatives such as remote simultaneous medical interpretation, 2) identified stigmatized populations such as the mentally ill and SUD, 3) standards for member organizations and 4) requirements and timing for training and re-training staff, in concert with implementation of the clinical projects.	05/18/2015	12/31/2015	05/18/2015	12/31/2015	12/31/2015	DY1 Q3	
Task Partner with CBOs	In Progress	In conjunction with the Director of Collaboration, seek partnerships with CBOs with experience and success in cultural competency and health literacy strategies (e.g. Health People, etc) to participate in the implementation of the CC/HL strategy.	05/18/2015	12/31/2015	05/18/2015	12/31/2015	12/31/2015	DY1 Q3	
Task Develop an evaluation plan	Not Started	Develop a plan for evaluating the effectiveness of the CC/HL strategy.	10/01/2015	12/31/2015	10/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task Obtain approval for CC/HL strategy and action plan	Not Started	Present CC/HL plan to Quality and Care Innovation Sub-Committee then Executive Committee for approval	10/06/2015	12/17/2015	10/06/2015	12/17/2015	12/31/2015	DY1 Q3	
Milestone #2 Develop a training strategy focused on addressing the drivers of health disparities (beyond the availability of language-appropriate material).	In Progress	This milestone must be completed by 6/30/2016. Cultural competency training strategy, signed off by PPS Board. The strategy should include: -- Training plans for clinicians, focused on available evidence-based research addressing health disparities for particular	04/01/2015	06/30/2016	04/01/2015	06/30/2016	06/30/2016	DY2 Q1	YES

Milestone Name	Narrative Text
Finalize cultural competency / health literacy strategy.	Update: We have convened a workgroup to support the development of a cultural competency strategy, including members of CBOs and institutional representatives. Our work will engage community groups in dialogue and will build from existing good practices among organizations. Our overall PPS objective for cultural responsiveness is to integrate care providers knowledge, skills and attitudes, together with organizational practices and policies to work effectively in cross cultural situations. Milestone is on track for completion.
Develop a training strategy focused on addressing the drivers of health disparities (beyond the availability of language-appropriate material).	Update: The Cultural Responsiveness Workgroup that has been established to support development of a strategy will also outline the requirements and timing for integration of cultural competency in the training and retraining strategies linked to the implementation of clinical projects and community initiatives. Based on the strategy developed in this initial period, a set of specific training strategies for clinicians, other staff and program managers will be designed to address cultural competence and health equity goals. Milestone is on track for completion.

IPQR Module 4.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing your cultural competency / health literacy strategy and addressing the specific health disparities you are targeting (based on your CNA), and achieving the milestones described above - including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Extremely Diverse Linguistic Requirements and Low Literacy: The Bronx is one of the most diverse counties in NYS, and this rich diversity demands a culturally responsive system of care. However, CNA findings indicate that immigrant and limited English-speaking populations in the Bronx experience barriers to accessing health care, including low quality language services, lack of culturally and linguistically competent providers, low literacy, and distrust of the healthcare system. Such barriers are particularly challenging among smaller populations, including Albanian, Bengali, Chinese, Creole, Korean, Mandingo, and Russian speakers. Together, these issues could undermine the PPS's ability to engage patients in care. BPHC has developed mitigation strategies to address patient engagement, including plans to develop and disseminate plain-language, accessible, and culturally competent materials at 4th– to 6th-grade reading levels across the PPS; convene a work group to identify best practices on Patient Engagement led by an expert practitioner to develop, test, and promote health literacy standards and advise partner organizations on best practices; and develop culturally competent training materials that meet the needs of various subpopulations, such as age, language, and ethnic groups. PPS plans to deploy community health workers (CHWs) or health educators on site in provider offices. Recruiting and Workforce Challenges: Securing a culturally competent workforce is key to patient engagement and DSRIP's success more broadly. Yet hiring and recruiting locally-based, bilingual and/or otherwise culturally identifying frontline workers will be challenging, due both to the general shortage of qualified health workers and competition for similar workers among PPSs. BPHC has developed mitigation strategies to address recruiting and workforce issues, including working with local colleges to promote community-based English Speakers of Other Languages (ESOL) and GED training programs for new workers; working with 1199 TEF and PPS member organizations that have expertise recruiting local, peer-based, and other frontline staff; developing culturally competent training materials that address the health, cultural, and linguistic needs of various subpopulations; and recruiting community members to enroll in healthcare worker training courses. Recruitment of community members, particularly through CBOs, applies particularly to CHWs, critical to our cultural competency strategy. Provider Engagement: Clinical and administrative leadership within organizations may become overtaxed and resistant to adopting new protocols, which could in turn reduce providers' participation in and compliance with health literacy and cultural competency standards. In addition, some providers may have insufficient time and resources for training. BPHC will incorporate cultural competency and health literacy training and standards into the design of DSRIP projects and project-based trainings to minimize the number of trainings in which PPS providers must participate. BPHC's Director of Collaboration and Senior Director of Care Delivery and Practice Innovations will be responsible for conducting ongoing assessment of the PPS's cultural competency activities and will provide technical assistance to providers in need of additional resources and support.

IPQR Module 4.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

BPHC's cultural competency and health literacy strategy has interdependencies with the workforce, IT, and clinical project workstreams.
• Workforce Workstream Dependencies: The provision of culturally competent care will depend on the success of the PPS's Bronx-centric recruitment and training strategy. As discussed, the PPS will work with 1199 TEF, CUNY, and contracted CBOs to develop training curricula that meet cultural competency and health literacy standards and incorporate these trainings into all new hire orientations, refresher courses, and provider agreements.
• Practitioner Engagement Workstream Dependencies: Practitioners play a key role in providing culturally competent care to patients. The importance of providing culturally competent care and best practices for how to do so will be a key part of the practitioner communication and engagement plan, which will include regular webinars, in-person, peer-to-peer learning forums, and participation in project-specific and a Patient Engagement-focused Rapid Deployment Collaborative. It will also be included in the training/education plan targeting practitioners and other professional groups as part of educating them about the DSRIP program and the PPS-specific quality improvement agenda.
• IT and Population Health Management Workstream Dependencies: Connecting patients to culturally competent resources is critical to improving patient outcomes. BPHC's care management technology will include fields to record patients' linguistic and cultural needs so that patients are matched to care managers, providers, and community-based organizations that can appropriately serve them.
• Clinical Workstreams Dependencies: The PPS's success will be heavily reliant on the success of its clinical projects. The PPS's project referral protocols and resources must be able to address the social, linguistic, cultural, behavioral and physical needs of patients. The PPS will make available a Web-based PPS-wide directory of CBOs. These efforts will help to ensure PPS-wide tools and resources meet health literacy/cultural competency standards and address patients' social needs in a culturally competent manner.

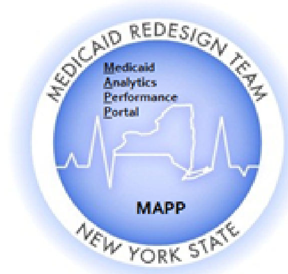
IPQR Module 4.5 - Roles and Responsibilities

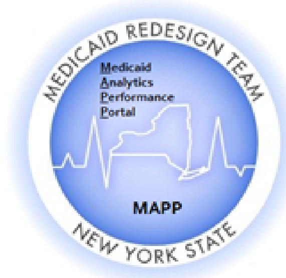
Instructions :

Please list and elaborate upon the key people/organizations responsible for this workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Co-Chairs, Quality and Care Innovation Sub-Committee (QCIS)	Debbie Pantin, SAED, VIP Community Services, Dr. David Collymore, Medical Director, Acacia	Development and implementation of cultural competency/health literacy ("CC/HL") strategy
Quality and Care Innovation Sub-Committee	QCIS has 15 members with clinical experience relative to the specific projects. Membership includes: David Collymore, MD Acacia Network Megan Fogarty BronxWorks Pablo Idez, LMSW The Institute for Family Health Kenneth Jones, MD Morris Heights Health Center Loredan Ladogana, MD UCP of NYC Frank Maselli, MD Bronx United IPA Anne Meara, RN Montefiore Medical Center Beverly Mosquera, MD Comunilife Chris Norwood Health People Todd Ostrow CenterLight Health Center Debbie Pantin, LMSW VIP Community Services Rona Shapiro 1199SEIU Ed Telzak, MD SBH Health System Lizica Troneci, MD SBH Health System Dharti Vaghela Essen Medical Associates, P.C. Committee will review recommendations made by CWG, and make final decisions about PPS strategy for cultural competency/health literacy	Strategy for CC/HL, Practitioner Communication & Education, EB practice guidelines/clinical practices & protocols
Senior Director, DSRIP Care Delivery & Practice Innovations, BPHC CSO	Dr. J. Robin Moon	Advisor to the development of the CC/HL strategy
Director of Collaboration, BPHC CSO	Albert Alvarez	Develop outreach to CBOs to identify CC/HL needs for specific sub populations, diseases and locations in the Bronx
Workforce Sub-Committee	Mary Morris, Co-Chair, SBH Health System Rosa Mejias, Co-Chair, 1199 TEF	Training strategy for CC/HL
Cultural Competency/Health Literacy Work Group	Includes key players listed above including: Debbie Pantin, SAED VIP Community Services (co-chair of QCIS), Charmaine Ruddock, Project Director, Bronx REACH, Barbara Hart, Executive Director, The Bronx Health Link, Albert Alvarez, BPHC Director of	CC/HL strategy and standards developed and signed off by Executive Committee



Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
	Collaboration, Mary Morris, BPHC Director of Workforce Innovation and Rosa Mejias, TEF (co-chair of the Workforce Subcommittee)	
DSRIP Coordinator	Lawrence Robertson	Coordination of management analytics

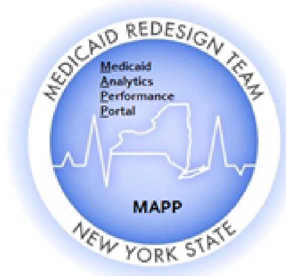


IPQR Module 4.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Partner organization Providers and Staff	Participate and contribute to CC/HL PPS initiatives	Comply with identified standards
CBO partner liaisons that represent a range of socioeconomic, cultural and demographic backgrounds	Provide input and feedback to create CC/HL initiatives and strategy	Community stakeholder participation in meetings, town halls, focus groups and BPHC Cultural Competency/Health Literacy Work Group
Dr. Nicole Hollingsworth	Advisor	Best practice guidance
Arlene Allende, SBH	Advisor	Best practice guidance
Leanette Alvarado	Advisor	Best practice guidance
External Stakeholders		
BPHC patients	Provide feedback by participating in surveys and focus groups	Focus groups and patient satisfaction survey responses
Other Bronx PPSs	Potential collaboration in developing Bronx-wide CC/HL strategy	Bronx-wide CC/HL strategy
Bronx Community at large	Greater use of primary care providers, health self-management for chronic conditions & participation in educational programs sponsored by the PPS	Improved health outcomes, more jobs with "living wages"
TEF-Rosa Mejias, Co Chair, BPHC workforce Subcommittee	Best practice training research and programming	Support for training strategy for CC/HL



IPQR Module 4.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support the development and implementation of your cultural competency / health literacy strategy and the achievement of the milestones described above.

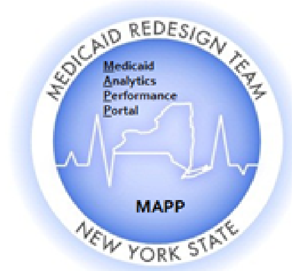
Community health workers and other PPS care management staff will use a planned commercial care coordination management solution (CCMS) to support culturally competent outreach, education, care coordination referral, advocacy and other information provided to PPS patients. Based on protocols tailored to patient cultural cohorts, and on individual care plans where available, the CCMS will be used for such activities as: • Running periodic reports to monitor cultural makeup and requirements of PPS patients, based on data collected in screenings, assessments, etc. • Providing multilingual, multicultural care navigation and support • Tracking and assisting patients with practice selection, active engagement in DSRIP programs, utilization tracking and pediatric-adult transitions • Assisting patients with locating and accessing community resources, including for palliative care • Supporting transitions and warm handoffs at discharge, with follow-up tracking • Educating patients and families about wellness and care, and supporting patients in self-management and shared decision making related to their health needs • Surveying patients and families regarding care experience. Providers and staff in other workforce segments will be trained regarding specific population needs and effective patient engagement approaches.

IPQR Module 4.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

BPHC will measure the success of our cultural competency/health literacy strategy through members' successful achievement of the Domain 1 CC/HL milestones as well as the milestones referenced above. BPHC will also measure progress through providers' participation in contracting agreements, which will incorporate the PPS's health literacy and cultural competency standards. The Senior Director for Quality Management and Analytics within the CSO will be responsible for conducting ongoing assessment of the PPS's cultural competency activities and related quality-improvement efforts. Related to patient engagement and clinical improvement, BPHC's QCIS will be charged with overseeing implementation of clinical projects and holding providers and the PPS accountable for achieving targeted metrics and clinical outcomes. Further, because all BPHC projects were selected based on health disparities data within the CNA, achieving broader clinical targets will reflect favorably upon the PPS's success reducing health disparities and creating a culturally competent and linguistically appropriate system of care.



Additionally, BPHC will obtain feedback from providers on the effectiveness of cultural competency strategies and training programs. BPHC will also include cultural competency in BPHC patient satisfaction surveys in order to understand BPHC patient needs.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s).	IT database has been established and continued efforts are ongoing to broaden and enrich it through various outreach efforts. Milestone is on track for completion.
Develop an IT Change Management Strategy.	IT governance is being established and is evident in the contracting process with vendors. Milestone is on track for completion.
Develop roadmap to achieving clinical data sharing and interoperable systems across PPS network	Evaluation of current state of interoperability has been conducted and some strategy for data exchange formulated. CCMS implementation strategy has been formulated. Milestone is on track for completion.
Develop a specific plan for engaging attributed members in Qualifying Entities	Review of QE process and challenges is being conducted at member sites and plan for subscription alerts formulated. Milestone is on track for completion.
Develop a data security and confidentiality plan.	We are submitting the first section of the SSP this quarter. Milestone is on track for completion.

IPQR Module 5.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in creating and implementing your IT governance structure, your plans for data sharing across your network, your approach to data security and confidentiality, and the achievement of the milestones described above, including the potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Based on collaborative IT planning work to-date, we feel well-prepared for managing the challenges in evolving BPHC's current multi-stakeholder IT governance into an operational IT change management framework. While we anticipate reluctance on the part of some partners to agree to certain elements of network IT governance and requirements, we will educate partners on the need and justification for all requirements, processes and IT change management governance and incorporate provisions for complying with them into Master DSRIP Service Agreements (MSAs) with them to eliminate ambiguity and make compliance contractually obligated.

Partners may be challenged to comply with data sharing obligations, especially those that had not previously participated in data exchange or whose IT infrastructures may not meet certified EHR MU requirements. Again, we will educate all partners on the importance of data sharing and compliance with data security and confidentiality policies and incorporate data sharing agreements into their MSAs.

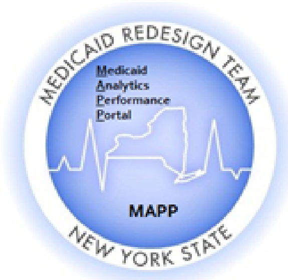
We will work with Bronx RHIO, our predominant QE and a close partner of SBH and Montefiore, among other BPHC participants, to understand gaps in patient engagement, as measured by consent, and to implement targeted strategies for obtaining consent from more attributed patients. Partners may be challenged, however, to participate in the Bronx RHIO, to interface their disparate IT systems for health information exchange or to acquire certified EHR solutions capable of interoperating. Failure to achieve connectivity and data sharing objectives will have particular impact on Project 2.a.i, since clinical interoperability is critical to development of an integrated delivery system. BPHC will establish programs to assist in these areas, including monitoring and direct assistance to partners in achieving these interoperability and data sharing objectives.

IPQR Module 5.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The IT workstream is dependent on strategies and requirements developed in the Performance Reporting, Clinical Integration and Population Health Management workstreams primarily, and to a lesser extent in all other organizational workstreams to the extent they identify IT expectations (e.g., for financial system enhancements in the Financial Sustainability workstream, or for workforce training and enablement using the planned care coordination management solution). In addition, the IT workstream will be highly interdependent with General Project Implementation and in particular for Domain 2 & 3 project-specific strategies and their Domain 1 requirements. Elements of IT governance may be dependent on the Governance workstream since the IT Sub-Committee and other elements of IT governance will be integrated into overall BPHC governance. BPHC considers IT integral to all aspects of PPS performance.

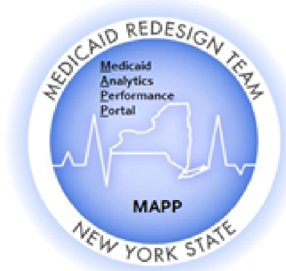


IPQR Module 5.5 - Roles and Responsibilities

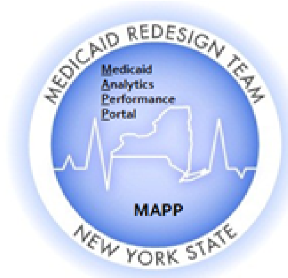
Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Chief Information Officer	Dr. Jitendra Barmecha, MD, MPH, FACP, Chief Information Officer, SVP—IT & Clinical Engineering, SBH	• BPHC IT strategy • Overall IT implementation • Data security and confidentiality planning and compliance • Partner and patient engagement technologies
Chief Information Security Officer	Sam Cooks - AVP-IT	• IT Infrastructure, • Data Security • Communication
IT Analyst for Information Security	Chris Delgado	Support the CSO on IT infrastructure/strategy, data security, communication
Senior Director, Quality Mgmt & Analytics, CSO	Janine Dimitrakakis	Overall delivery of QM and analytics reporting
Director of Partner Connectivity BxRHIO Partners	Greg Malloy, SBH IT Kathy Miller, Bronx RHIO Dr. Terri Elman, Bronx RHIO	• Partner connectivity strategy • Bronx RHIO and other QE relationships • Partner connectivity adoption, implementation and support
Director of Care Management Technologies	Zane Last, SBH IT	• Care management / population health management requirements definition • Care management / population health management IT implementation and support
Associate Director of HealthCare Data and Analytics	Jonathan Ong, SBH IT	IT infrastructure support and implementation
Montefiore Medical Center IT Liaison	Brian Hoch, MMC IT Chuck Anderson, MMC IT Jack Wolf, MMC IT	• Implementation, integration and support of critical IT systems and functions supporting BPHC
Key point person/project manager from provider organizations	Nicolette Guillou, Montefiore David Collymore, Acacia Eric Appelbaum, SBH Maxine Golub, IFH Fernando Oliver, Bronx United IPA Tosan Oruwariye, Morris Heights Douglas York, Union	• Connectivity adoption, implementation, integration and support at own organization (for participation in BPHC) • Data exchange support
IT Subcommittee	Nicole Atanasio, Lott, Inc.	IT governance



Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
	Jitendra Barmecha, SBH Health System Helen Dao, Union Community Health Center Brian Hoch, Montefiore Medical Center Jeeny Job, SBH Health System Tracie Jones, BronxWorks Vipul Khamar, Visiting Nurse Service of New York Elizabeth Lever, The Institute for Family Health Uday Madasu, Coordinated Behavioral Care IPA Mike Matteo, Centerlight Health System Kathy Miller, Bronx RHIO Edgardo Nieves, Morris Heights Health Center Anthony Ramirez, Acacia Network Sam Sarkissian, University Behavioral Associates Yvette Walker, AllMed Medical & Rehabilitation Centers Nicole Atanasio, Lott, Inc. Jitendra Barmecha, SBH Health System Helen Dao, Union Community Health Center Brian Hoch, Montefiore Medical Center Jeeny Job, SBH Health System	

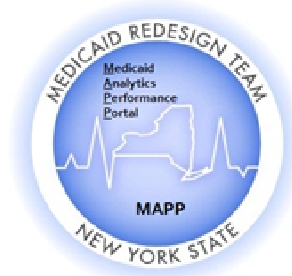


IPQR Module 5.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Attributed Patients and Families/Caregivers	Recipient of care services delivered with support of effective IT	• Interaction sufficient to participate and take limited accountability for health and care-related activities
BPHC CSO Business Staff	Accountable for integration and effective use of IT in PPS services	• Oversight and integration of IT into BPHC operations
BPHC Governance Committee Members	Governance for effective integration and use of IT, centrally and across partners	• Oversight and integration of IT into BPHC operations
SBH Management/Leadership	Fiduciary oversight for effective integration and use of IT in BPHC operations	• Oversight and integration of IT into BPHC and SBH operations
SBH IT Leadership and Staff	Primary leadership, project management and support	• Coordinate, support and maintain coordinated BPHC (and SBH) IT solutions
Montefiore Management/Leadership	Accountable for integration of key Montefiore-supplied IT functionality for BPHC support	• Oversight and integration of Montefiore IT into BPHC operations
Montefiore CMO Staff	Effective use of BPHC IT to deliver care management services to patients	• Effective use of BPHC (and Montefiore) IT solutions
Montefiore Bronx Accountable Health Network Staff	Effective use of BPHC IT to deliver Health Home services to patients	• Effective use of BPHC (and Montefiore) IT solutions
Montefiore IT Leadership and Staff	Project management and support for integrated Montefiore IT	• Coordinate, support and maintain integrated Montefiore IT solutions
Partner Organization Providers and Staff	Integration, connectivity and effective use of BPHC IT solutions	• Adopt, implement use and support integrated BPHC IT solutions
External Stakeholders		
Bronx RHIO Management/Leadership and Staff	Accountable for integration of key Bronx RHIO-supplied IT functionality for BPHC support	• Oversight and integration of Bronx RHIO IT into BPHC operations
Bronx Community Advocates/Leaders/Elected Officials	Awareness of how IT is being used to effectively support BPHC and Bronx patients	• Consume stakeholder communication and participation in stakeholder events
Bronx Community Members/Public At-Large	Awareness of how IT is being used to effectively support BPHC and Bronx patients	• Consume stakeholder communication and participation in stakeholder events
Non-Partner Providers	Awareness of how IT is being used to effectively support Bronx patients and how they can participate in Bronx RHIO and other IT solutions related to BPHC	• Bronx RHIO or other QE participation as warranted to effectively treat patients
CBO partners with experience in MH/BH, I/DD and	Curriculum Development and/or training	Serve as subject matter experts to the vendor(s) or partner(s)

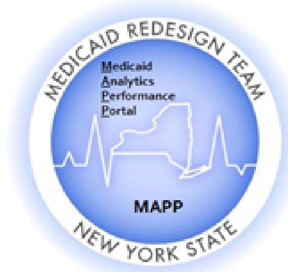


New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
SAS (e.g., ACMH, Community Access, Communilife, Cardinal McCloskey Community Services, EAC, Inc., St. Ann's Corner of Harm Reduction)		involved in curriculum development and training.
Medicaid Managed Care Organizations (MCOs)	Awareness of how IT is/can be used to serve covered members	• Contribute data and participate in RHIO or other IT solutions as warranted to effectively serve members
NYCDOH	Awareness of how IT is being used by BPHC	• Offer solutions, participate in BPHC IT solutions in order to serve Bronx residents
NYSDOH	Provide guidance and tools, including MAPP/SIM, to support BPHC use of IT	• Guidance and tools to support BPHC IT use, including for efficient performance management and DOH reporting
Organized Labor	Awareness of how IT is being used by BPHC	• Member labor support for and training on BPHC IT solutions, as warranted
Other Bronx PPSs	Awareness of how IT is being used to effectively support Bronx patients and how multiple PPSs may be able to support each other's or share IT solutions	• Participation in joint IT planning and solution development as warranted



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

IPQR Module 5.7 - Progress Reporting

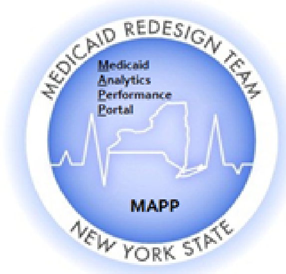
Instructions :

Please describe how you will measure the success of this organizational workstream.

IT workstream success will be measured according to following: • Governance – Multi-stakeholder representation and participation in IT Sub-Committee meetings, with timely decision-making for IT-related issues • Strategy/Solution Development – Timely completion of current state assessment, IT connectivity roadmap, data sharing plan, etc. • Strategy Monitoring – Progress against IT strategy objectives and milestones • QE Adoption and Integration – Percentages of providers using Bronx RHIO and patients consenting to disclosure • Partner IT Capabilities – Percentages of providers using certified EHR technology, Meaningful Use attestation, and PCMH 2014 recognition • Patient Engagement – Progress against achieving patient engagement goals and documented use of IT in achieving goals

IPQR Module 5.8 - IA Monitoring

Instructions :



Section 06 – Performance Reporting

IPQR Module 6.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.
Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Establish reporting structure for PPS-wide performance reporting and communication.	In Progress	Performance reporting and communications strategy, signed off by PPS Board. This should include: -- The identification of individuals responsible for clinical and financial outcomes of specific patient pathways; -- Your plans for the creation and use of clinical quality & performance dashboards -- Your approach to Rapid Cycle Evaluation	04/01/2015	03/31/2016	04/01/2015	03/31/2016	03/31/2016	DY1 Q4	NO
Task Establish reporting oversight responsibilities	Completed	Designate reporting oversight responsibilities to Executive Committee, Quality and Care Innovation Sub-Committee and Finance and Sustainability Sub-Committee. BPHC Senior Director for Quality Management and Analytics will be responsible for working with the Quality and Care Innovation Sub-Committee on performance reporting activities.	04/01/2015	06/30/2015	04/01/2015	06/30/2015	06/30/2015	DY1 Q1	
Task Develop reporting and communication requirements	Completed	Complete analysis of state guidance to develop comprehensive requirements related to reporting and communication across all workstreams and projects.	04/01/2015	06/30/2015	04/01/2015	06/30/2015	06/30/2015	DY1 Q1	
Task Define performance reporting categories	Completed	Define categories of reporting (beyond those that are state-mandated) necessary for PPS performance management and operations, including Rapid Cycle Evaluation and monitoring of overall performance of BPHC and its network partners.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Analyze reporting capacities across PPS	Completed	Assess existing reporting capabilities of BPHC and its network partners to identify gaps between requirements and current capabilities.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Analyze MCO data exchange capacity	Completed	Assess MCO capabilities for data exchange relative to requirements for performance metric submission.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2

Milestone Name	Narrative Text
Establish reporting structure for PPS-wide performance reporting and communication.	Update: BPHC has formed a governance structure that will oversee performance reporting. The PPS has defined reporting categories for rapid cycle evaluation, assessed reporting capabilities within the network, and formulated a strategy for beta-testing technical platforms used for reporting. Milestone on track for completion.
Develop training program for organizations and individuals throughout the network, focused on clinical quality and performance reporting.	Update: BPHC is in the process of defining clinical quality and performance reporting goals for the PPS, to be used in determining site-specific reporting roles and training needs. Milestone on track for completion.

SBH Health System (PPS ID:36)

IPQR Module 6.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing performance reporting structures and processes and effective performance management within your network, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

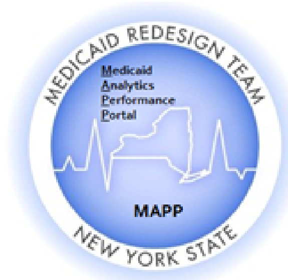
Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets. 1. Partners have varying levels of reporting capacity as well as interoperability, making it challenging to exchange standardized data and reports within BPHC's PPS. BPHC's assessment of partners' reporting capabilities as well as activities in the IT workstream will identify gaps in capabilities and BPHC will work closely with partners to close such gaps in time to meet DSRIP goals. 2. Partners have varying levels of analytical capabilities and will need to be brought up to a standard level of functioning in order to understand how to interpret reports and use them to improve clinical and financial outcomes. BPHC's training program will educate key personnel within each network partner and ongoing trainings will be made available as new personnel join or existing personnel have questions or require support with respect to performance reporting. In addition, staff from the CSO will supplement formal trainings by providing "on the ground" support for data collection and quality control while partner staff ramp up their reporting and interpretation skills. 3. It will be important to define and communicate the PPS's priorities and performance expectations throughout the CSO and between the CSO and network partners. Lack of understanding of the goals of BPHC and/or lack of understanding of how the day-to-day work of staff connects to those goals will lead to wasted and ineffective effort and will negatively affect the pace at which the goals of DSRIP are met. Because performance reporting and accountabilities are connected to every aspect of DSRIP implementation, there is a great need for an overarching vision for data analytics that serves the goals of the BPHC PPS. This vision must include clearly defined and articulated performance standards and expectations as well as a performance improvement strategy that articulates a feedback process between network partners and the CSO. 4. Because the PPSs will evolve and be a "learning entity," it will be challenging for the CSO to maintain focus on those goals and to orient new staff to the culture shift. BPHC is in the process of developing a PPS-wide communication plan that will address performance reporting expectations and processes. The communication plan will be continuously evaluated and updated to ensure BPHC is effectively reaching its partners through a range of methods (e.g., in-person meetings and webinars, newsletters and e-blasts, website updates, desk-side training and mentorship, etc.).

IPQR Module 6.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

A clinical quality and performance reporting program will touch every aspect of the PPS. The PPS goals and performance standards, which will influence the structure of reporting, will be developed and approved by the committee structure implemented under the governance workstream. System improvements will be planned, deployed and monitored through the IT workstream. To be effective, the clinical quality and performance reporting program must be developed in tandem with the clinicians' engagement strategy because the reporting tools developed must be



championed by clinicians in order for the culture of change to take root. BPHC's approach to care management and population health management will inform the content of the dashboards and reports and the capabilities of the IT infrastructure will influence the types and timing of data available to be reported and analyzed. The program must also be developed with an eye towards the evolution of the PPS's workforce and serve the defined financial sustainability goals.

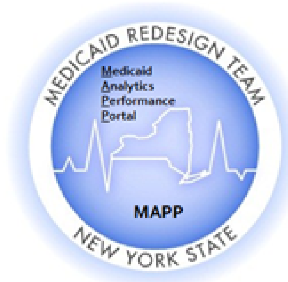
SBH Health System (PPS ID:36)

IPQR Module 6.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Executive Director, CSO	Irene Kaufmann	BPHC overall performance management
Chief Financial Officer, CSO	Todd Gorlewski	Oversee financial metrics and outcome accountability
Senior Director, Quality Mgmt & Analytics, CSO	Dr. Amanda Ascher, CMO BPHC	Overall delivery of QM and analytics reporting
Senior Director, Care Delivery & Practice Innovations, CSO	Dr. J. Robin Moon	Seamless connecting with and strategy for the QM and clinical projects
Associate Director, Information Services, SBH (IT)	Jonathan Ong	IT infrastructure support and implementation
Key point person/project manager from provider organizations	Nicolette Guillou, Montefiore David Collymore, Acacia Eric Appelbaum, SBH Maxine Golub, IFH Fernando Oliver, Bronx United IPA Tosan Oruwariye, Morris Heights Douglas York, Union	Integration and support of the reporting functions, reporting requirement adoption, implementation and communication with BPHC

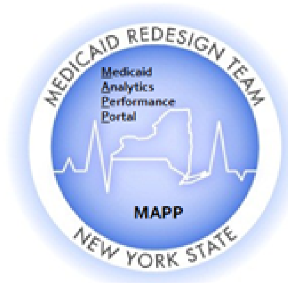


IPQR Module 6.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Executive Committee: Eric Appelbaum, SBH; Maxine Golub, IFH; Marianne Kennedy, VNSNY; Pamela Mattel, Acacia; Fernando Oliver, Bronx United; Tosan Orwariye, MHHC; Amanda Parsons, MMC; Paul Rosenfield, Centerlight; Stephen Rosenthal MMC; Charles Scaglione, Bronx RHIO; Eileen Torres, BronxWorks; Len Walsch, SBH; Pat Wang, HealthFirst; Gladys Wrenwick, 1199; Douglas York, UCHC	Leadership on all performance reporting areas	Overall oversight of reporting process, including IT infrastructure, clinical quality metrics and financial issues
IT Sub-Committee members Nicole Atanasio, Lott Residence; Jitendra Barmecha, SBH; Helen Dao, UCHC; Brian Hoch, MMC; Jeeny Job, SBH; Tracie Jones, BronxWorks; Kate Nixon, VNSNY; Elizabeth Lever, IFH; Uday Madasu, Jewish Board; Michael Matteo, CenterLight; Kathy Miller, Bronx RHIO; Edgardo Nieves, MHHC; Anthony Ramirez, Acaia; Sam sarkissian, UBA	Leadership on tech decisions around the reporting process	Oversight and integration of the reporting infrastructure for BPHC PPS
Quality and Care Innovation Sub-Committee members Todd Ostrow, CenterLight; Kenneth Jones, MHHC; Dharti Vaghela, Essen; Frank Maseli, Bronx United; Chris Norwood, HealthPeople; Megan Fogarty, BronxWorks; Michele Quigley, United Cerebral Palsy Assoc; Debbie Pantin, VIP; Pablo Idez, IFH; Anne Meara, MMC; David Collymore, Acacia; Ed Telzak, DBH; Beverly Mosquera, Communilife; Rona Shapiro, 1199; Lizica Troneci, SBH	Leadership over the QA team at BPHC CSO	Oversight of defining quality report requirement and logistics



New York State Department Of Health

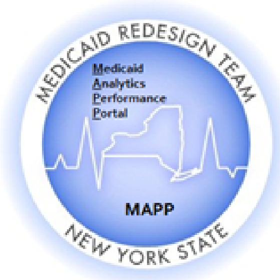
DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Finance and Sustainability Sub-Committee members Carol Bouton, IFH; Carol Cassell, ArchCare; Tomas Del Rio, Acacia; Max Francios, Bronx United; Marcus Freeman, MHHC; Donna Friedman, RMHA; Todd Gorlewski, SBH; Mary Hartnett, UCHC; Josephine Incorvaia, CenterLight; David Koschitzki, MJHS; David Menashy, MMC; Kity Khudkar, Schevier Nursing; Denise Nunez, Divino Nino;l Ravi Ramaswamy, Families on the Move	Leadership on financial metrics	Oversight of financial reporting issues
Montefiore leadership Amanda Parsons, Stephen Rosenthal, Anne Meara	Accountable for integrating Montefiore quality measures with BPHC	Oversight and coordination of quality reporting to BPHC PPS
BPHC CSO clinical team staff Amanda Ascher, Janine Dimitrikakis, J Robin Moon	Accountable for timely communication and coordination with the QM team	Oversight and integration of the reporting into the QM
BPHC Executive Committee members Eric Appelbaum, SBH; Maxine Golub, IFH; Marianne Kennedy, VNSNY; Pamela Mattel, Acacia; Fernando Oliver, Bronx United; Tosan Orwariye, MHHC; Amanda Parsons, MMC; Paul Rosenfield, Centerlight; Stephen Rosenthal MMC; Charles Scaglione, Bronx RHIO; Eileen Torres, BronxWorks; Len Walsch, SBH; Pat Wang, HealthFirst; Gladys Wrenwick, 1199; Douglas York, UCHC	Leadership over the entire DY1 planning process	Oversight of quality reporting into BPHC
Partner organization providers and staff, including DSRIP Program Managers/Directors	Accountable for meeting the PPS partnership requirement	Delivery of quality reporting requirements to BPHC
External Stakeholders		
Bronx RHIO Leadership and staff Charles Scaglione, Kathy Miller, Nance Shatkin, Keela Shatkin	Accountable for integration of key Bronx RHIO-supplied IT functionality for BPHC support	Oversight and integration of Bronx RHIO IT into BPHC operations
Other PPSs in NYC: Bronx Lebanon, OneCity, Staten Island, Advocate, Mount Sinai (initial idea exchange)	Exchange of ideas and plans utilized and potentially share solutions	Participation in joint planning, requirement development and mitigation strategies
1199SEIU TEF (Training vendor)	Accountable for training partners for reporting requirement and compliance	Fully developed training program. Train all partners.



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

IPQR Module 6.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support your approach to performance reporting.

BPHC intends to leverage one of two shared data management and analytics infrastructures already present in the PPS, from either Bronx RHIO or Montefiore Medical Center. St. Barnabas Health System (SBH) has a close working and governance relationship with Bronx RHIO, as do Montefiore and Bronx Lebanon Hospital Center. Together, these organizations and others in the Bronx are already contributing data to Bronx RHIO, which manages the data for health information exchange and analytics, the latter under an ongoing Health Care Innovation Award from CMS. The PPS has conducted initial due diligence on the Bronx RHIO's data management capabilities and determined that it is a viable partner for DSRIP central data management and analytics. Over the course of continued implementation planning before April 2015, the PPS will continue due diligence while investigating the functionality and capability present in the Montefiore Enterprise Data Warehouse (EDW) to determine if it is a viable shared infrastructure as an alternative or complementary to Bronx RHIO. In either instance, the NYSDOH MAPP and Salient Interactive Miner (SIM) component is also being evaluated for integration into BPHC's analytics strategy.

IPQR Module 6.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The success of this organizational workstream will be measured as follows:
Metric Submission – Successful and timely submission to DOH of performance measures and metrics that accurately reflect the progress of BPHC.
Rapid Cycle Evaluation – Effectiveness of clinical quality and performance dashboard tools in enabling BPHC to monitor progress and identify areas of strength and areas for improvement.
Analytics Staff Engagement and Communication – Training analytics staff to use the tools, to understand the goals of clinicians and leadership, and to communicate results to effectively translate metrics and measures into improved outcomes. This includes training on performance improvement and continuous quality improvement so that teams can take data that reflects poor or less-than-ideal performace and translate that into a PI project that will result in improved outcomes. As data reflects improved (or static) outcomes, continuous quality improvement strategies resule in further PI projects.
Staff and Leadership Engagement – Participation of clinicians and leadership in using clinical quality and performance measurement dashboards developed to improve care delivery and financial outcomes.
Informed Decision-Making – Integration of performance reporting into decision-making through the governance process to drive improvements, deploy resources, and assess progress against overall program goals.
Project level quality reporting--Successful and timely reporting to DOH of project level processes, outcomes, measures and metrics that accurately reflect the progress of each project.

Develop Practitioners communication and engagement plan.	BPHC partner representatives, including clinical practitioners, have formed a Quality and Care Innovation Sub-Committee, which reviews reports, and reviews and approves clinical elements (including evidence-based guidelines for clinical practice) of the Clinical Operations Plans (COPs) developed in project-specific workgroups. These workgroups also have clinical practitioner engagement; these practitioners and CBO representatives are invited to stay on to form rapid deployment collaboratives (aka Implementation Work Groups, or IWG), which will serve as project-specific clinical quality councils. Milestone on track for completion.

IPQR Module 7.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the current level of engagement of your physician community in the DSRIP program and describe the key challenges or risks that you foresee in implementing your plans for physician engagement and achieving the milestones described above. Describe any potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

BPHC has included both primary care and subspecialist clinicians from key partners throughout the application planning process. A sample of clinicians participating include:

• Cardiovascular, diabetes, and asthma projects: Dr. Eric Appelbaum, Associate Medical Director at SBH Health System; Dr. David Collymore, Chief Medical Officer at Acacia Network; and Dr. Vanessa Pratomo, Associate Medical Director of Montefiore's Care Management Organization

• Primary care/behavioral health integration project: Dr. Brian Wong, Director of Adult Behavioral Health Services for the Montefiore Medical Group and Dr. Thomas Betzler, Executive Clinical Director, Montefiore Behavioral Health Center

• Care transitions, emergency department triage, and Health Home at-risk projects: Alex Alvarez, BSN, Senior Director, Network Care Management of Montefiore's Care Management Organization; Neil Pessin, Ph.D. of psychology, Vice President, Community Mental Health Services at Community Care Management Partners; Wanda Kelly, Director of Case Management, SBH Health System; and Donna Friedman, Ph.D. of psychology and LCSW, Deputy Executive Director of the Riverdale Mental Health Association

Overall, the range of practitioner types represented includes nurses, social workers, health educators, mental health professionals, and substance abuse professionals.

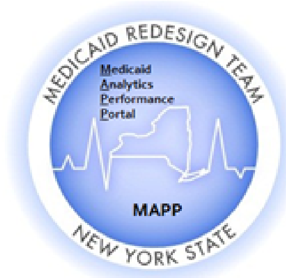
The PPS has held numerous "all member" webinars to educate practitioners about the transformative nature and resources that DSRIP will bring to the Bronx health care delivery system. We are expanding the number and types of practitioners included in the implementation planning process to include a broader group that has more physicians, nurses, social workers, care managers and behavioral health professionals.

The biggest risk to achieving the milestones is that practitioners will not feel able to take the time from their practice to participate in the Quality and Care Innovation Sub-Committee and/or to attend the educational and training sessions provided for each of the projects in which they have committed to participate. This is especially a risk for primary care practitioners (PCP) and their care team members to whom much of the training will be directed; virtually all of the DSRIP projects BPHC has selected impact PCPs in some way. BPHC hopes to mitigate this risk by offering trainings at various times and by potentially compensating practitioners who may be impacted by loss of income related to the training or participation in governing Committees, Sub-Committees, and/or Rapid Deployment Collaboratives. Provider turnover during the DSRIP period could also pose a risk to achieving DSRIP performance goals. We will implement a practitioner tracking system and provide regularly repeated orientations and briefings on the complexities of project implementation, which will be accompanied by a comprehensive implementation manual for new practitioners to use as a guide.

Another risk is that many BPHC practitioners will be participating in multiple clinical projects within our PPS and may also be participating in projects run by other PPSs. The sheer number of new projects to implement may be overwhelming for practitioners. To mitigate this risk, BPHC has conducted joint clinical planning efforts with other Bronx PPSs to align projects and project interventions. We plan to continue joint planning discussions over the course of DY1.

IPQR Module 7.4 - Major Dependencies on Organizational Workstreams

Instructions :



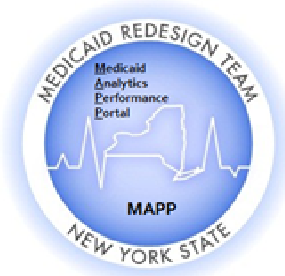
New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

It is difficult to point to a DSRIP workstream for which practitioner engagement is not interdependent. For example, IT use is fundamental to: practitioners adopting population health management, the CSO tracking quality metrics, practitioners monitoring patient activity between visits, and practitioners receiving alerts that enable quick follow up and communication when patients are in the hospital or emergency department. All of these capabilities advance BPHC's abilities to improve quality of care and patient outcomes that ultimately lead to cost reductions and financial sustainability. The long term success of clinical improvement projects in Domain 3 depends on practitioner willingness across the PPS network to adopt standardized clinical guidelines, processes and protocols proven to result in lower costs and better outcomes. Funds flow also is crucial for all practitioners' implementation of clinical projects, both for project operationalization and as a mechanism to reward practitioners for their commitment to the DSRIP projects. Finally, practitioners are a fundamental portion of the DSRIP workforce, and practitioner engagement is crucial to practitioner recruitment and retention efforts.



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

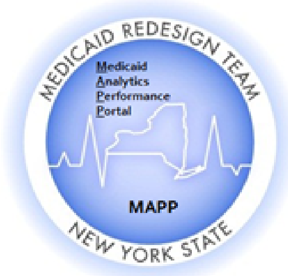
SBH Health System (PPS ID:36)

IPQR Module 7.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
BPHC CMO	Dr. Amanda Ascher	Provide oversight in the areas of the provider engagement and clinical/delivery strategy
Senior Director, Care Delivery and Practice Innovations	Dr. J. Robin Moon	Develop communication and support plans that are project-specific
BPHC Workforce Sub-Committee Co-Chairs	Mary Morris, Co-Chair, SBH Health System Rosa Mejias, Co-Chair, 1199 TEF	• Develop curriculum to support the quality agenda • Develop training materials that are project specific
Implementation Workgroups	Chairs of the IWGs	Solicit feedback from provider community on curriculum and quality agenda
Montefiore provider engagement liaison	Laura DeMaria	Assist in development and implementation of the communication and engagement plan
Bronx United IPA	Frank Maselli	Assist in development and implementation of the communication and engagement plan
NYSNA	Lourdes Blanco	Assist in development and implementation of the communication and engagement plan



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

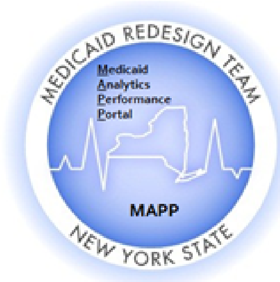
SBH Health System (PPS ID:36)

IPQR Module 7.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Provider partners	Recipients of training and education in BPHC's quality goals	Participate in the training sessions and demonstrate practice change in support of BPHC's quality agenda
CBO partners with experience in MH/BH, I/DD and SAS (e.g., ACMH, Community Access, Communilife, Cardinal McCloskey Community Services, EAC, Inc., St. Ann's Corner of Harm Reduction)	Curriculum Development and/or training	Serve as subject matter experts to the vendor(s) or partner(s) involved in curriculum development and training.
BPHC training vendors (including 1199 TEF), Montefiore CMO, Institute for Family Health, a.i.r. NYC	Training and retraining of the work force	• Develop curriculum to support the quality agenda • Develop training materials that are project specific
Provider partners: Amanda Parsons, Montefiore Medical Group; Frank Maselli, Bronx United IPA; David Collymore, Acacia; Erica Gayle, IFH; Nelson Eng, UCHC; Dr. Tosan Oruwariye, MHHC	Management staff of these key providers will lead organization efforts to engage practitioners in critical trainings	Practitioners participate in the training sessions and demonstrate practice change in support of BPHC's quality agenda
Quality and Care Innovation Sub-Committee members Chairs: Dr. David Collymore, Acacia; Debbie Pantin, VIP Community Services	Provide quality standards and strategy	Approve the strategy and content for communication and engagement plan
External Stakeholders		
Other PPSs Damara Gutnick, MHV PPS; Kallanna Manjunath, Albany PPS; Anna Flatteau, OneCity Health	Sharing best practices	Regular communication stream
GNYHA--Mary-Ann Etiebet	Convener of all PPS CMO/Medical Directors' meetings	Regular communication stream
Bronx Medical Society	Provide discussion and feedback on clinical changes.	Help to engage provider partners in transformation (PCMH)



IPQR Module 7.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

BPHC will implement and utilize a commercial customer relationship management (CRM) system such as from Salesforce.com to manage our physician network, including support for physician communication and engagement.
BPHC will demo and otherwise build awareness among physicians of the capabilities of the planned commercial care coordination management solution (CCMS), focusing on how the infrastructure will be used to provide better service and outcomes to their patients and make their practices more efficient, allowing them to deliver higher quality patient care, along with:
• Providing multi-lingual, multi-cultural care navigation and support
• Tracking and assisting patients with practice selection, active engagement in DSRIP programs, utilization tracking and pediatric-adult transitions

• Assisting patients with locating and accessing community resources
• Support transitions and warm handoffs at discharge, with follow-up tracking
• Educating patients and families about wellness and care, and supporting patients in self-management and shared decision making related to their health needs
• Surveying patients and families regarding care experience
In addition, physician training in evidence-based medicine, care coordination, population health management and other topics pertinent to BPHC and DSRIP will be scheduled, delivered and tracked using a learning management system (LMS) administered by the BPHC CSO.

IPQR Module 7.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The PPS will measure the success of this workstream in four ways. First, at the most basic level, we will monitor attendance at education and training sessions, all-member webinars, and other learning forums provided by the CSO. We will track attendance at clinical governance meetings, including our implementation and quality workgroups. Second, we will develop CME-type post-training testing for practitioners to measure the success and effects of the training. Third, to track long-term success of the practitioner engagement trainings, the CSO will be tracking practitioner performance on each project through rapid cycle evaluation (RCE) and auditing adherence to evidence-based guidelines and processes and protocols on a periodic basis. (e.g. Behavioral Health Integration into Primary Care, Care Management referrals, Diabetic Outcomes, etc.) Fourth, we will periodically bring RCE results to the Rapid Deployment Collaboratives to gain knowledge about provider experiences and concerns regarding DSRIP project implementation and impact on them and their patients.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop population health management roadmap.	Update: BPHC has developed, vis-à-vis its work on committees, subcommittees, and workgroups, an overarching vision for the future state PHM for the PPS. These committees and groups have also been working to define interventions for priority populations of patients with a high degree of risk and utilization. PCMH consultants, hired by BPHC, are conducting site-specific gap analyses with BPHC PCPs and formulating a strategy for their achievement of PCMH 2014 Level 3 certification. IT infrastructure needs for PHM are also being evaluated. Milestone on track for completion. Adjustment: Completion of task "conduct gap analysis" has been pushed to DY1 Q3. Gap analysis depends on facility-specific information. Previous surveys were unable to capture the breadth of information required to fully assess the gaps and barriers to achieving our PHM vision. We have redesigned our gap analysis tools, and are deploying them through our PCMH consultants.
Finalize PPS-wide bed reduction plan.	Update: The Executive Committee is set to begin discussions of the Bed Reduction Plan during DY1 Q3. Milestone on track for completion.

IPQR Module 8.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

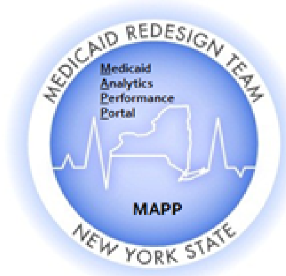
BPHC anticipates it will have to manage a number of risks while instituting population health management strategies.
(1) Many primary care providers and community-based organizations lack an understanding of how to achieve population health management. While achieving NCQA Level 3 PCMH recognition significantly moves practices towards full population health management, it does not completely achieve this goal. This lack of understanding among providers may impede provider acceptance of the need to adopt new technologies and workflows to support population health management. To mitigate this risk, the CSO will implement a communications and education strategy to enhance providers' understanding and acceptance of population health management. The CSO will also develop and centralize resources and technologies to support providers' transition to population health management.
(2) Providers' adoption of new technology will be slow and will require significant resources devoted to training and oversight to ensure optimization. Slow uptake of technology could result in delays in meeting DSRIP speed and scale targets for patient engagement and achievement of Domain 1 project requirements. To mitigate these risks, BPHC will be prepared to use a variety of training methods to reach providers, including in-person, web-based, and call-in technical support, to provide training and technical assistance during off-hours to meet provider needs. Further, challenges with RHIO and patient engagement are outlined in our IT workstream and overcoming these barriers as outlined there will be key to success of our PHM registries.
(3) There is a risk that not all primary care provider sites will achieve NCQA PCMH Level 3 recognition by the end of DY3. The process for achieving 2014 NCQA PCMH Level 3 recognition is time consuming and requires strong support from leadership. Many primary care practice organizations have small numbers of personnel in leadership and administrative positions, creating a risk that they will not be able to devote sufficient attention to the process for attaining PCMH recognition. Some of the smaller practices may not have adequate staffing to meet all of the NCQA Level 3 2014 requirements. To mitigate these risks, BPHC will provide technical assistance to and invest resources in practices to ensure that there is sufficient internal and external leadership support and basic staff resources to meet the NCQA 2014 PCMH goal within the DSRIP-required time period.
(4) Our PPS has not fully assessed the capabilities of its network, including providers and community-based organizations. To mitigate this risk, as part of developing our population health management roadmap, we will assess the current state of population health management capabilities across our PPS.

IPQR Module 8.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Population health management has the following major interdependencies with other workstreams.

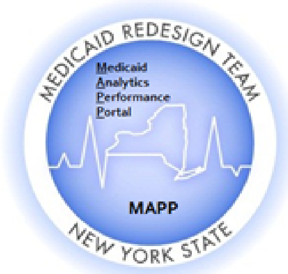


New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Dependency #1: While IT systems alone will not yield a highly functioning population health management-based primary care practice, they are a necessary component of the change that will need to occur if population health management is to be successfully embedded into the daily workflows of a primary care practice. Close alignment of IT architecture and its components with population health management goals must be central to planning. The selection of IT applications and phasing in of new technologies, along with training capabilities, are key to success in population health management.
Dependency #2: Clinical integration and the PCMH roadmap intersect with the population health management roadmap in multiple areas, specifically regarding conducting readiness assessments and the identification of data needs. For example, these workstreams require BPHC to integrate data from social service organizations, supportive housing providers and other community-based organizations into care planning and registry tools.
Dependency #3: BPHC's ability to achieve its vision of population health management will depend on its success at engaging and educating practitioners on how to use data effectively in improving outcomes and in implementing common protocols and processes to achieve DSRIP goals. In addition, BPHC must be successful in its performance reporting efforts.
Dependency #4: Timely implementation of our population health management roadmap is heavily dependent on our workforce strategy. For example, moving all primary care practices to NCQA Level 3 PCMH recognition by the end of DY3 will require adequate healthcare worker capacity in primary care sites and training to ensure that staff are functioning as a care team as envisioned by NCQA. In addition, the BPHC workforce will be heavily involved in planning efforts regarding PPS bed reduction. Finally, successful implementation of cultural competency and health literacy training and recruitment of culturally competent staff will be critical to patient engagement.
Dependency #5: The development of care coordination and care management programs as part of our clinical project implementation will be critical to the success of our primary care providers attaining Level 3 PCMH recognition and our PPS's success in moving to an integrated delivery system.

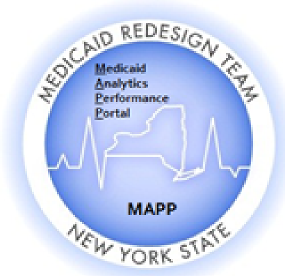


IPQR Module 8.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational work stream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Quality and Care Innovation Sub-Committee	Sub-Committee members	Develop strategy for deploying effective population health for BPHC attributed patients and the communities it serves
CSO	n/a	Conduct assessment and gap analysis of BPHC provider capabilities in implementing population health strategies
CIO, BPHC	Dr. Jitendra Barmecha, CIO, SBH	Develop architecture of IT applications that can automate PHM functions, and integrate care management software with provider IT technologies
Senior Director, Quality Management and Analytics	Dr. Amanda Ascher, CMO BPHC	Produce patient cohorts that will be targeted for population health interventions including tactics surrounding predictive modeling and risk stratification
Senior Director, Care Delivery & Practice Innovations	Dr. J. Robin Moon	Deploy evidence-based tools and care management functions that support patient engagement and activation
IT Sub-Committee	Dr. Jitendra Barmecha, Chair, SBH Health System	Assist in selecting PHM related applications, developing phase in implementation schedule
Executive Committee	Len Walsh, Chair	Develop a bed reduction plan for BPHC member hospitals
Partner IT Liaisons	Nicole Atansasio, Lott, Inc; Helen Dao, Union; Brian Hoch, Montefiore; Jeeny Job, SBH; Tracie Jones, BronxWorks; Vipul Khamar, VNSNY; Elizabeth Lever, The Institute for Family Health; Uday Madasu, CBC IPA; Mike Matteo, Centerlight; Kathy Miller, Bronx RHIO; Edgardo Nieves, Morris Heights; Anthony Ramirez, Acacia; Sam Sarkissian, UBA; Uvette Walker, Allmed	Implement, adopt and integrate with BPHC population health tools

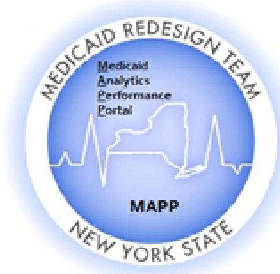


IPQR Module 8.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Attributed patients	Recipients of services	Participate in care management
Providers in BPHC	Identify patients for care management	Participate in training on clinical and billing documentation to enable appropriate population identification and selection for PHM. Participate in technical assistance and project management for PCMH NCQA certification.
Care managers at partner organizations, including BAHN, CCMP and CBC	Manage risk reduction in identified populations	Create care plans and manage populations to reduce adverse outcomes including reductions in disease burden
CBOs	Promote health by actively engaging patient on social determinants	Intervene on patients identified with social determinants
External Stakeholders		
NYCDOHMH	Coordinating Domain 4 goal achievement	Coordinates and collaborates with NYC PPSs in developing strategies to improve MHSA infrastructure and retention in HIV care
State DOH	Oversees state DSRIP implementation and effectiveness	Creates timelines and deliverables for DSRIP program
Other PPSs participating in the same Domain 4 projects: OneCity, Community Care Brooklyn, Bronx Health Access, Mount Sinai, Brooklyn Bridges, NewYork Hospital Queens	Collaboration, information exchange, shared workforce development	Key deliverables/resps: Collaborate on shared projects and organizational initiatives, strategize on information exchange, and collaborate on shared workforce development



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

IPQR Module 8.7 - IT Expectations

Instructions :

Please describe the current Population Health Management IT capabilities in place throughout your PPS network and what your plans are at this stage for leveraging these capabilities and/or developing new IT infrastructure.

Current population health management IT capabilities in place in BPHC include Montefiore CMO's comprehensive care management system which is being used by 400 care management employees to coordinate care for more than 300,000 individuals across employer-sponsored coverage and Medicare and Medicaid managed care. In addition, care management agencies supporting our partner Health Home populations are using smaller scale care management solutions, while other partners are using homegrown analytics to track patients across settings and within condition cohorts. Finally, the Bronx RHIO has developed the Bronx Regional Analytics Database (BRAD) under a multi-year grant from the CMS Center for Medicare and Medicaid Innovation.

A primary BPHC objective is to develop a standardized approach to population health management on behalf of our attributed population across all PPS participants based on a new IT infrastructure – portions of which are being selected in collaboration with Montefiore CMO and Montefiore's Hudson Valley PPS and portions of which build on existing capabilities. Our plans for leveraging and developing a new and integrated IT infrastructure for population health management are based on the following:

• Central data management and analytics through the Bronx RHIO.
• Patient and provider matching and master data management through Bronx RHIO to provide a single integrated view of each patient and a unified, standard and navigable view of participating partners to each other.
• A common commercial care coordination management solution (CCMS) selected from among three finalist vendors being assessed by a cross-functional team of Montefiore and BPHC clinical, operational and technology subject matter experts.
• Health information exchange through Bronx RHIO to achieve required data sharing between electronic medical records and the CCMS, across BPHC and potentially with other PPSs.
• Performance management and metrics (analytics) for internal analysis and reporting and NYSDOH reporting, based on Bronx RHIO and Montefiore Enterprise Data Warehouse capabilities.
• Assessment, monitoring and support programs and resources to help partners implement certified EHRs, adopt and integrate with RHIO services and, if eligible, use the combined IT infrastructure to achieve PCMH 2014 recognition.
• A digital health strategy for patient engagement, including telehealth, remote monitoring, a patient portal and personal health record sharing and digital health apps that are culturally competent.

IPQR Module 8.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

BPHC will measure the success of the population health management workstream using the following metrics:
• The number of primary care practice team members who have begun training on population health management applications
• The number of primary care practice team members who have completed training on population health management applications
• The number of providers (primary care team, behavioral health teams and others) that actively use electronic medical records, care planning tools, and patient registries
• The number of primary care practices that have submitted to the CSO work plans and timelines for attaining NCQA 2014 PCMH recognition

• The number of primary care practices that have begun the process per their work plan for achieving NCQA Level 1, 2 or 3 PCMH recognition

• The number of primary practices that achieved NCQA Level 1, 2 or 3 PCMH recognition
• The approval of a bed reduction plan by the Executive Committee
• DSRIP project-specific metrics such as PQIs, PDIs, PPRs, PPVs, and HEDIS metrics such as hemoglobin A1c, LDL, flu shots, and others

Milestone Name	Narrative Text
Perform a clinical integration 'needs assessment'.	Update: BPHC has been working with its committees, sub-committees and workgroups to define the PPS's vision for an end-state clinical integration model. Network mapping and gap analyses are underway, which will inform the development of a needs assessment. Milestone on track for completion.
Develop a Clinical Integration strategy.	Update: The CSO has developed crosswalks between the DSRIP project requirements, as well as between PCMH requirements and DSRIP measures / project requirements. BPHC is actively exploring IT platforms for data sharing and interoperability (including RHIO, Acupera CCMS, Healthify, and Salesforce) and nearing agreements for their PPS-wide utilization. Project-specific workgroups have developed care coordination and care management strategies and protocols, and the CSO is with working in tandem with the Montefiore CMO to develop a standard care transitions strategy (workgroup to kickoff in late-October). Clinical initiatives are vetted by the Quality and Care Innovation Sub-Committee prior to implementation. Milestone on track for completion.

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

IPQR Module 9.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in improving the level of clinical integration throughout your network and achieving the milestones described above. Describe potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

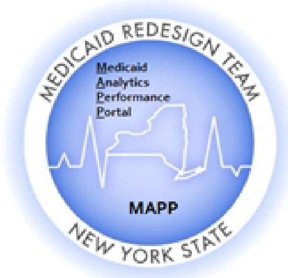
Due to the cooperative nature of our partner relationship, we expect that network participants will embrace collaborative clinical integration assessment and strategy activities, and that they are eager to engage in greater clinical integration. We recognize, however, that our partners often already feel stretched thin by the operating requirements of their existing organizations and that creating and managing an effective integrated workflow across a high number of partners may present a challenge. The greatest risk will be to attempt to "boil the ocean" regarding clinical integration. We will mitigate against this risk by basing integration goals on specific project and organizational requirements identified in other workstreams, and on measures specified in program terms and conditions that can be measured to provide quantitative evidence of integration improving patient outcomes. We will also seek to define common and standardized workflows and protocols that make clinical integration achievable for all partners, without creating a substantial additional burden. Additional risks may arise from disparate technology and data sets and an inadequate workforce and resources. We will mitigate these risks by thoroughly assessing and analyzing partner interoperability and staff capabilities and readiness, as described in the IT Systems & Processes workstream, and providing formal PPS program support for achieving EHR implementation and integration, QE participation and PCMH recognition.

IPQR Module 9.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The strategies developed in the Clinical Integration workstream are closely related to requirements and strategies that will be identified in the Workforce Strategy, IT Systems and Processes, Performance Reporting, Physician Engagement and Population Health Management workstreams. In addition, the Clinical Integration workstream will be highly interdependent with General Project Implementation and in particular for Domain 2 & 3 project-specific strategies and their Domain 1 requirements, including primary care providers attaining 2014 Level 3 PCMH recognition. Many of the goals and requirements of project 2.a.i are closely related to clinical integration. Finally, physician engagement will be a core component and prerequisite for establishing a clinically integrated network.

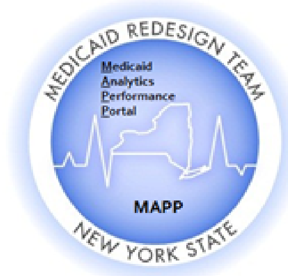


IPQR Module 9.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Senior Director, Care Delivery & Practice Innovations	Dr. J. Robin Moon	• Oversight of project management and clinical integration • Clinical integration strategy
Clinical Project Directors, CSO	Vitaly Chibisov, Benny Turner, Caitlin Verrilli, Monica Chierici	• Completed and analyzed provider and CBO surveys • Clinical Integration strategy
Executive Committee, BPHC	Len Walsh, Chair	• Oversight of clinical integration
QCI Subcommittee	Co-chairs: Dr. David Collymore, Acacia Debbie Pantin, VIP Community Services	• Oversight of performance reporting structure and plan
Workforce Subcommittee	Mary Morris, Co-Chair, SBH Health System Rosa Mejias, Co-Chair, 1199 TEF	• Provider training plan and tools
Key Point Person/DSRIP Project Managers	Nicolette Guillou, Montefiore David Collymore, Acacia Eric Appelbaum, SBH Maxine Golub, IFH Fernando Oliver, Bronx United IPA Tosan Oruwariye, Morris Heights Douglas York, Union	• Regular communication • Timely reporting on pertinent data • Feedback on the integration process
Clinical Liaisons	Site-Specific Medical Directors/Designees	• Regular communication • Timely reporting on pertinent data • Feedback on the integration process
Montefiore CMO Liaisons	Anne Meara, Associate Vice President, Network Care Management, Montefiore Care Management Organization Alex Alvarez, Director, Care Management Resource Unit	• Regular communication • Timely reporting on pertinent data • Feedback on the integration process
IT team, CSO	SBH IT Team led by Dr. Jitendra Barmecha, CIO	• IT infrastructure to support the data integration
Mental Health Liasions	Virna Little, IFH Dr. Lizica Troneci, Chair Psychiatry, SBH	BH clinical integration
Substance Use Liaisons	Debbie Pantin, SAED, VIP Pam Mattel, CEO, Acacia,	Substance Use clinical integration

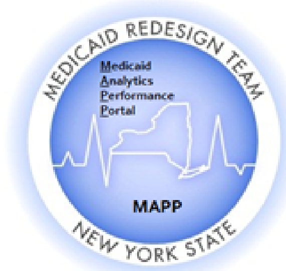


IPQR Module 9.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Bronx RHIO leadership: Kathryn Miller, Charles Scaglione	Health information exchange provider	Support in analyzing current state of IT interoperability and developing strategies to support, broaden and enhance future clinical integration with data exchange
IT team, SBH: Dr. Jitendra Barmecho, CIO, Jonathan Ong, Zane Last, Gregg Malloy	Provide data exchange, IT interoperability and systems integration strategy and support	Alignment with IT systems and processes related to clinical integration; input into data sharing and interoperability strategies, including IT interfaces and messaging to support clinical integration
Montefiore CMO: Anne Meara, Alex Alvarez, Peggy Czinger, John Willeford	Provide clinical integration experience and expertise from ongoing care	Lessons learned from and input into future team-based care management, care coordination and organizational supports (e.g., staffing, IT, contact center, etc.)
External Stakeholders		
NYC DOHMH	Support for the Domain 3 project's planning and execution	Domain 3 projects planning process
Other Bronx PPSs: Advocate PPS OneCity Health PPS Bronx Lebanon PPS	Accountability and sharing of best practices	Regular communication stream
OASAS	Support for PC/BH Integration and MHSA	Support with review of clinical guidelines to align with best practices.



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

IPQR Module 9.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

Nearly all components of BPHC's shared IT infrastructure will support and are critical to clinical integration:
• Central data management and analytics through the Bronx RHIO will provide common data and outcomes measurement to bind together partners and help them track common integration results in a standardized way.
• Patient and provider matching and master data management through Bronx RHIO will provide a single integrated view of each patient and a unified, standard and navigable view of participating partners to each other.
• A common care coordination management solution (CCMS) will further present an integrated view of the patient and provide a common tool for interacting with patients and with other partners
• Data sharing and interoperability standards and protocols embedded in partner contracts will support transitions and care management and promote an integrated and longitudinal view of the patient through secure messaging, event notification and potential aggregated portal data sets and other patient- and provider-facing applications.

IPQR Module 9.8 - Progress Reporting

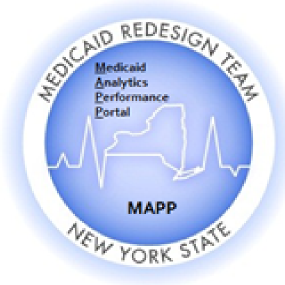
Instructions :

Please describe how you will measure the success of this organizational workstream.

Clinical integration will be measured by: evidence of high value treatment protocols implemented by providers across the PPS; improvements in clinical outcomes (e.g., improved rates of LDL and HTN control in CVD patients, improved A1C rates in Diabetics, improved depression screening and improving PHQ9 scores in patients receiving care in a BH integrated model.) Clinical integration success will also be measured by the level of Provider based engagement in Continuous Quality improvement, as measured by our workgroups which serve as project-specific quality councils.

IPQR Module 9.9 - IA Monitoring:

Instructions :



Section 10 – General Project Reporting

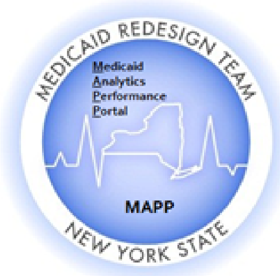
IPQR Module 10.1 - Overall approach to implementation

Instructions :

Please summarize your intended approach to the implementation of your chosen DSRIP projects, including considerations around how this approach will allow for the successful development of concurrently implementing DSRIP projects.

BPHC intends to establish a care delivery model with mutually reinforcing resources and capabilities across the PPS. These aim to measurably improve patient satisfaction, improve outcomes, lower costs and enable the transition from volume to value-based care. To this end: 1) BPHC is establishing a population health management-driven HIT architecture to allow electronic data sharing across providers and access to patient-level information. This will facilitate rapid treatment and care management decisions among collaborating providers and beneficiaries about physical, behavioral, and social problems that impact beneficiaries' lives and support attainment of PCMH Level 3 2014 standards. 2) BPHC is creating an analytics capability for access to timely performance reports, to help accountable parties measure and track the impact of their actions on both a patient and population level and identify areas for improvement. The analytics arm will monitor the PPS and partners' progress towards meeting project metrics. 3) BPHC is developing a workforce recruitment and retention strategy including career paths, higher education incentives, and excellent training and competitive salaries for a culturally and linguistically competent care management staff to engage, educate, and support individuals in need of assistance in managing both medical and social chronic conditions. 4) BPHC is leveraging the clinical and administrative leadership within each PPS partner and will ensure they have adequate dedicated time to drive overall DSRIP implementation. Partners' clinical and administrative leadership will: educate and motivate staff to embrace evidence-based practices; use technology to help improve patient outcomes; ensure that staff engage in DSRIP project-related training; provide quality oversight; and oversee the achievement of PCMH NCQA Level 3 2014 recognition. 5) BPHC is establishing a Quality and Care Innovation Sub-Committee (QCIS) to act as BPHC's clinical governance body. The QCIS draws from key partners and include diverse, well-informed, activist practitioner thought leaders, ranging from PCPs, subspecialists, nurses, mental health professionals, and social workers. The QCIS analytics support team will acquire and present data to rapidly and decisively direct attention to high performers for best practices and to low performers for remediation. The clinical governance body will: provide clear direction and a strong voice in defining and implementing change at the provider level to create a culture of quality and accountability; advocate for clinical integration to improve care; and seize opportunities to collaborate with other PPSs. 6) BPHC is developing a financial sustainability plan that begins with a transparent and coordinated inter-project budgeting system that: supports DSRIP central services; accurately reflects needed investments in PPS provider staffing and IT infrastructure; accounts for overlapping project personnel and training curricula; and moves in phases to a total cost of care model that expands upon the risk-based model now in place for some PPS providers via Healthfirst contracts. 7) BPHC is actively collaborating with other Bronx PPSs, including the HHC and Bronx-Lebanon-led PPSs and the Advocate Community Providers PPS, on multiple areas including clinical planning, workforce development, community engagement, and information sharing. 8) BPHC has established a Central Services Organization (CSO)to provide a range of services to PPS partners, including clinical supervision, information technology, financial, training, analytics, administrative, and care management/care coordination infrastructure services. The CSO will also ensure partners' compliance with project requirements and track the project implementation and patient engagement speed commitments across all projects.

IPQR Module 10.2 - Major dependencies between work streams and coordination of projects



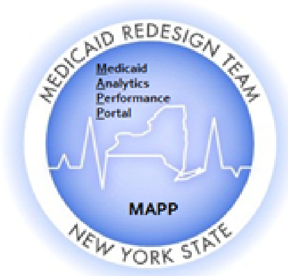
DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Instructions :

Please describe how your approach will handle interdependencies between complementary projects, as well as between projects and cross-cutting PPS initiatives - for example, an IT infrastructure upgrade, or the establishment of data sharing protocols.

BPHC sees its DSRIP projects as a suite of programs that enable one another and magnify the impact of individual projects and workstreams. Some of the major dependencies include the following: Population health management and IT systems & processes: Attaining PCMH Level 3 recognition is widely viewed among clinicians who have been involved in DSRIP planning as the "master DSRIP project milestone" off of which virtually all other DSRIP projects and elements are built, including patient engagement and follow up. The BPHC HIT architecture is geared to providing IT capabilities that support work flows and protocols used by high-functioning Level 3 PCMHs to transition to population health management, such as electronic medical records, best practice alerts, care planning systems, patient registries, and tracking and stratification tools. Underlying these capabilities are a central data storage and management plan, robust data governance, and RHIO connectivity. Project implementation, IT systems & processes, and financial sustainability: Clinical improvement projects focused on cardiovascular disease, diabetes, asthma, and behavioral health will be built upon the chronic care management foundation provided by a high functioning Level 3 PCMH. Key PCMH features that promote effective chronic care management include use of evidence-based guidelines selected by consensus of the clinical governance body and data sharing that enables practitioners and embedded care managers to assess and develop effective care plans for the target populations. Ultimately, the establishment of Level 3 PCMHs across the PPS will be the impetus for moving to value-based payments that build a sustainable delivery system. Implementation of clinical improvement projects will be designed to build upon IT, workflows and clinical training used in the NCQA PCMH recognition process. Performance reporting, clinical integration and practitioner engagement: Practitioner accountability will be built on performance reporting that provides provider-specific and comparative performance data on the patient, practice and population level. Performance reporting is a key provider engagement tactic. Workforce strategy: A robust and well-trained workforce, rooted in the diverse communities of the Bronx, and engaged in the transformative change required under DSRIP will be central to the success of DSRIP project implementation. BPHC has identified a four-part workforce strategy that will be fleshed out based on the needs of our clinical projects. Our strategy includes: (1) redeployment of workers to respond to shifting staffing needs and ensure any displaced workers are connected to new employment; (2) training and education to address the needs for both retraining of existing staff and onboarding those newly hired under DSRIP; (3) robust recruitment to attract new workers; and (4) active engagement of labor and frontline staff.

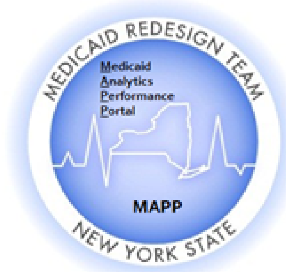


IPQR Module 10.3 - Project Roles and Responsibilities

Instructions :

Please outline the key individuals & organizations that play a role in the delivery of your PPS's DSRIP projects, as well as what their responsibilities are regarding governance, implementation, monitoring and reporting on your DSRIP projects.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Executive Director, CSO	Irene Kaufmann	• Oversee all of the PPS work and CSO activities to accomplish all of the projects' implementation. • Communicate with the Executive Committee, and represent the CSO to all of the Sub-Committees. • Project monitoring and performance reporting. • Support and report to BPHC governance. • Act as liaison to NYSDOH and other PPSs.
Chief Medical Officer, CSO	Dr. Amanda Ascher	• Oversee project-specific provider engagement and clinical/delivery strategies and monitoring of performance/ outcomes. • Collaborate with BPHC members' CMOs. • Liaison with other PPSs on evidence-based practice implementation.
Senior Director, Care Delivery & Practice Innovations, CSO	Dr. J. Robin Moon	• Oversee all of the clinical projects implementation (Domains 1-4), including monitoring and reporting. • Work closely with the Quality Management team. • Monitor speed and scale • Identify and promote care delivery and practice innovations.
Senior Director, Quality Management & Informatics, CSO	Janine Dimitrakakis	• Oversee the development of quality metrics, and monitoring and reporting of them. • Work closely with the clinical projects team and the SBH IT team.
BPHC Workforce Liaison	Mary Morris	• Work with project participants to implement workforce implementation plans to meet participants' recruitment, training and worker retention needs. • Collect and analyze workforce data and report on training effectiveness.
BPHC Director of Financial Planning	Ronald Sextus	• Conduct financial evaluation of each project. • Develop, implement and manage funds distribution methodologies.



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
		• Develop value-based payment models. • Produce quarterly reports for Executive Director and governance.
BPHC Chief Technology Officer	TBD	• Work with project participants to develop and implement IT components of project plans. • Advise governance, Executive Director and Director of Finance of resource gaps that may impede IT implementation. • Liaison with Bronx RHIO and other PPSs.
BPHC Compliance Officer	TBD	• Monitor and develop corrective action plans as needed to ensure member compliance with rules and regulations of regulatory agencies and with BPHC's by-laws and policies & procedures. • Disseminate current, revised and new policies and procedures.
BPHC Director of Collaboration	Albert Alvarez	• Manage BPHC member engagement and outreach to CBOs and community stakeholders. • Manage website, social media and communications for and within BPHC.
BPHC Executive Committee Chair	Leonard Walsh	• Governance: Oversight of and support for all aspects of deployment of DSRIP projects.
BPHC Partners' Project Liaisons	Akwasiba Rafaelin, Montefiore Nicolette Guillou, Montefiore Irene Borgen, SBH Project liaisons for 4-5 additional partner sites are in the midst of the interview process and will be placed in Q3.	• Coordinate with project transitional work groups and CSO project directors to oversee implementation activities at participating sites.

Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

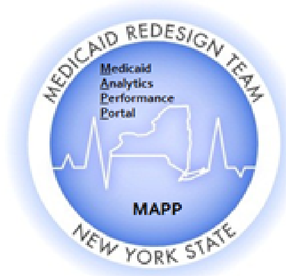
SBH Health System (PPS ID:36)

IPQR Module 10.4 - Overview of key stakeholders and how influenced by your DSRIP projects

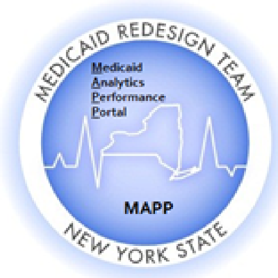
Instructions :

In the below table, please set out who the key stakeholders are that play a major role across multiple DSRIP projects. Please give an indication of the role they play and how they impact your approach to delivering your DSRIP projects.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
SBH Health System Leonard Walsh Eric Appelbaum	Lead Applicant	Fiduciary for DSRIP; Chair of Executive Committee for BPHC
Montefiore Medical Center Steven Rosenthal Amanda Parsons	Largest provider in BPHC	Member of Executive Committee of BPHC; contractor to provide key technical assistance on projects 2.b.iii and 2.b.iv; committed provider in all DSRIP projects
Institute for Family Health Maxine Golub	FQHC providing primary care services in several high-need areas of the Bronx	Member of Executive Committee of BPHC; contractor to provide technical assistance on project 3.a.i; committed provider in DSRIP projects 2.a.i, 2.a.iii, 3.a.i, 3.b.i, 3.c.i, 3.d.ii
Acacia Network Pam Mattel	FQHC providing primary care services in several high-need areas of the Bronx; behavioral health provider, SNF and respite housing provider	Member of Executive Committee of BPHC; contractor to provide technical assistance on project 3.a.i; committed provider in DSRIP projects 2.a.i, 2.a.iii, 3.b.i, 3.c.i, 3.d.ii
Union Community Health Center Doug York	FQHC providing primary care services in several high-need areas of the Bronx	Member of Executive Committee of BPHC; contractor to provide technical assistance on project 3.a.i; committed provider in DSRIP projects 2.a.i, 2.a.iii, 3.b.i, 3.c.i, 3.d.ii
Bronx United IPA Fernando Oliver	IPA group providing primary care services in several high-need areas of the Bronx	Member of Executive Committee of BPHC; contractor to provide technical assistance on project 3.a.i; committed provider in DSRIP projects 2.a.i, 2.a.iii, 2.b.iv, 3.b.i, 3.c.i, 3.d.ii
Morris Heights Health Center Tosan Oruwariye	FQHC providing primary care services in several high-need areas of the Bronx	Member of Executive Committee of BPHC; contractor to provide technical assistance on project 3.a.i; committed provider in DSRIP projects 2.a.i, 2.a.iii, 2.b.iii, 3.b.i, 3.c.i, 3.d.ii
Health People Chris Norwood	CBO providing evidence-based education to patients in the Bronx with chronic illnesses	Member of DSRIP Quality and Care Innovation Sub-Committee and clinical work group; contractor for delivering Stanford Model program to target groups for projects 3.b.i and 3.c.i
VNSNY Marianne Kennedy	Home care provider and MLTC provider	Member of the BPHC Executive Committee; committed partner in project 2.b.iv
Bronx Works Eileen Torres	CBO that provides numerous support and social services	Member of the BPHC Executive Committee
Bronx RHIO Charles Scaglione	Non-profit organization that provides health information exchange, shared data management and supporting data analytics, and	Member of the BPHC Executive Committee



Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
	performance monitoring	
CenterLight Paul Rosenfeld	Home care and MLTC provider	Member of the BPHC Executive Committee; committed partner in projects 2.a.iii and 2.b.iv
1199 TEF	Workforce vendor that will support execution of workforce planning and training related activities including participation on the Sub-Committee, best practices, information from other PPSs, helping to screen candidates for new hires, assessment, remediation and culture change, preparation of reports to the State and dispute resolution.	Member of BPHC Executive Committee; committed to being primary vendor for implementing BPHC workforce strategy including training, re-training, education programs and re-deployment support
Healthfirst Pat Wang	Managed care organization providing coverage to a majority of patients attributed to BPHC	Member of Executive Committee of BPHC; will work with PPS on movement to full risk-based contracting
External Stakeholders		
1199 TEF	Workforce vendor that will support execution of workforce planning and training related activities including participation on the Sub-Committee, best practices, information from other PPSs, helping to screen candidates for new hires, assessment, remediation and culture change, preparation of reports to the State and dispute resolution.	Committed to being primary vendor for implementing BPHC workforce strategy including training, re-training, education programs and re-deployment support



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

IPQR Module 10.5 - IT Requirements

Instructions :

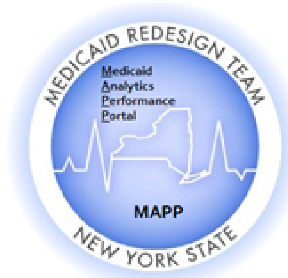
Information technology will play a crucial role in the development of an effective, integrated performing provider system. It is likely that most projects will require some level of supporting IT infrastructure. Please describe the key elements of IT infrastructure development that will play a role in multiple projects.

In order to support its projects and to act as an effective integrated performing provider system, BPHC will require and implement the following IT infrastructure: Care coordination & management: Collaboratively with the Montefiore CMO and the Montefiore-sponsored Hudson Valley PPS, BPHC is in the process of evaluating and procuring a care coordination management solution (CCMS) for population stratification, patient engagement, patient assessment, care planning, clinical and social service navigation, care transition management, patient registries and care management workflow, capacity and task management. Health information exchange (HIE): BPHC will build on the close governance and working relationship that SBH and key PPS partners have with Bronx RHIO to achieve project milestones related to health information exchange and data sharing. Bronx RHIO enjoys significant penetration with Bronx providers, including BPHC members. BPHC has been meeting with Bronx RHIO to perform due diligence on its HIE capacity and capabilities and will undertake further assessment of PPS partners' current level of integration with the RHIO and their readiness to achieve the level of integration required by BPHC projects. In addition, BPHC and Bronx RHIO are meeting to make arrangements for cross-PPS/QE collaboration and will co-develop interfaces to the CCMS. Connections to the SHIN-NY are also being explored. Central data management: Utilizing the Bronx RHIO and/or Montefiore's Enterprise Data Warehouse, pending further due diligence on both organizations' capabilities and capacity to support the PPS, BPHC will rely on one or both to provide data governance, data specification and acquisition capabilities, data normalization/quality, patient and provider matching, master data management (MDM), central data storage and authorized access in an operational data store, and bi-directional data sharing with BPHC partners. Performance management and metrics (analytics): While much NYSDOH DSRIP metric reporting will be claims-based, and will be performed by the DOH in the Salient MAPP system, BPHC will need to identify its own required level of detail for performance monitoring. In conjunction with assessing the Bronx RHIO and Montefiore's Enterprise Data Warehouse for central data management services, BPHC is also assessing their capacity to provide analytics and reporting services, based on their current and planned tools and capabilities. BPHC may decide to use one or both and will determine a strategy for which tools and capabilities to use, including using only infrastructure or utilizing the organizations' staff as well to perform analytics or reporting. Assessment, monitoring and support programs and resources: Based on a current state assessment of PPS partner capabilities against BPHC and DOH requirements, the BPHC CSO will establish program management services for monitoring or assisting PPS partners as required with acquiring EHRs certified for Meaningful Use attestation, achieving PCMH 2014 recognition and participating and integrating with the Bronx RHIO for health information exchange. Digital health strategy for patient engagement: Beyond the IT discussed above, BPHC will develop a strategy for implementing patient engagement and activation mechanisms to promote patient self-management in PPS/IDS programs. This will include developing a comprehensive strategy for telehealth, remote monitoring and patient engagement through digital health apps that are culturally competent and sensitive to patient circumstances and needs. In addition, BPHC will explore opportunities for connecting community-based organizations to the PPS's IT infrastructure to facilitate patient engagement.

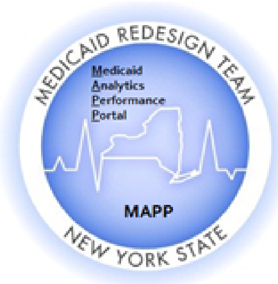
IPQR Module 10.6 - Performance Monitoring

Instructions :

Please explain how your DSRIP projects will fit into your development of a quality performance reporting system and culture.



The PPS's CSO analytics and IT staff, BPHC Chief Medical Officer, the CSO's Senior Director of Quality Management & Informatics, and the Quality & Care Innovation Sub-Committee (QCI) will work together closely to design reporting formats for three audiences—providers, CSO clinical project team members and QCI Sub-Committee members—that integrate Domain 1 process metrics, Domain 2 and 3 quality and outcome metrics, and other internal PPS reporting metrics selected by the QCI into its performance reporting dashboard and resulting performance reports to be shared with PPS members. The rapid cycle evaluation process will be the basic method used to monitor progress and identify providers that appear to be at risk of missing performance targets. We will also work with our partners at the provider level to ensure that they have a continuous quality improvement process in place to detect and address operational problems in each of the projects they participate in on an ongoing basis. Under the leadership of the BPHC CMO and Senior Director of Quality Management & Informatics, the CSO will organize and support a continuous quality improvement process to be carried out both centrally and internally by participants. The continuous quality improvement process will include identifying areas for both partner-specific and cross-partner improvement strategies and tactics, monitoring progress against improvement targets, assisting with root cause analysis, and convening cross-PPS work groups on special topics that emerge from reporting via the analytics team.



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

IPQR Module 10.7 - Community Engagement

Instructions :

Please describe your PPS's planned approach for driving community involvement in the DSRIP projects, how you will contract with CBOs for these projects, how community engagement will contribute to the success of the projects, and any risks associated with this.

Throughout implementation, BPHC will continue its extensive community involvement from the planning phase, which included representation from 56 diverse Bronx provider & community-based organizations (CBOs) in its project advisory committee. BPHC has hired a multilingual Director of Collaboration with deep roots in the community, responsible for managing outreach to community stakeholders & CBOs. Our community engagement efforts will provide bidirectional dialogue to ensure project implementation is achieving results & allow for course correction & innovation. These efforts will develop capacity within the community to ensure sustainability. We will create new connections & resources through sharing of information, skills & tools, & collaboration with other Bronx PPSs. In addition, we will create job opportunities & career pathways for community members. BPHC is undertaking the following steps to ensure that the Bronx community continues to be deeply involved. PPS has conducted a survey to enhance our knowledge of the services offered by & capacity of CBOs in our PPS, which will provide the basis for a web-based CBO service directory to facilitate direct referrals to support services. BPHC meets regularly with CBOs to gain input & build a community engagement strategy. Through Community-based Discussion Sessions, members of the organizations defined aim-focused, common issues among licensed & grant-funded CBOs & organizations providing community-based services & to express participation needs & questions. Targeted participants included CBOs providing senior care, food pantries, social services, home health, legal, farmers markets, housing, education, behavioral health, developmental disabilities, & family & children services. Minutes & common themes from the sessions were distributed to participants, followed by an invitation to join the Community Engagement Plan Workgroup. The Workgroup identified the need for 3 additional groups: Communications Strategies (to create efficient & effective methods of communication from CBO to CBO & from CBO to PPS constituent, with additional focus on consumer involvement & patient engagement); Outreach & Engagement (conduct networking events, define level of CBO participation, & build proactive relationships on behalf of the PPS with new & existing CBOs); & Interconnectivity (continue to work on connecting CBO resources via available technology). These groups will begin meeting in November & all CBOs are invited to join. To engage the community stakeholders further, BPHC will encourage & solicit feedback through its website, presentations, publications, social media platforms, & public fora. BPHC will produce & publish a biweekly bulletin & a quarterly newsletter & will continue to host all-Member webinars. BPHC will contract with CBOs (initial 2 described below) that will be major contributors to the success of our DSRIP projects. BPHC is contracting with Health People: Community Preventive Health Institute (CBO specializing in evidence-based patient education for chronic disease management) & a.i.r. nyc (a CBO providing home-based services to families with asthma). In the Bronx, the biggest risk associated with community engagement is that the level of need for community resources, such as behavioral health & social support services, exceeds the resources available. Other risks may include insufficient infrastructure to manage the number of CBOs & people engaged, address the complexity associated with serving a diverse population in culturally meaningful ways, ensure rapid response to community need & suggestions, & support communication at the community level via information technology. However, DSRIP provides a unique opportunity to increase the reach & impact of existing resources & improve & build new infrastructure to engage our community in efforts to improve health.

IPQR Module 11.2 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.
Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Please note some milestones include minimum expected completion dates.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Define target workforce state (in line with DSRIP program's goals).	In Progress	Finalized PPS target workforce state, signed off by PPS workforce governance body.			07/01/2015	03/31/2016	03/31/2016	DY1 Q4	NO
Task Establish and convene Workforce Project Team	Completed	Establish and convene Workforce Project Team (including Workforce Sub-Committee, Workforce Workgroups, workforce liaison and other supportive staff from the CSO, 1199 SEIU Training and Employment Funds (TEF), subject matter experts and stakeholders) responsible for implementing, executing and overseeing workforce activities.			07/01/2015	07/01/2015	09/30/2015	DY1 Q2	
Task Identify the requirements for each DSRIP project	In Progress	Identify the requirements for each DSRIP project and the new services that will be delivered, in conjunction with the Quality and Care Innovation Sub-Committee.			07/17/2015	03/31/2016	03/31/2016	DY1 Q4	
Task Identify types and numbers of workers needed for each DSRIP project	In Progress	Identify the types and numbers of workers needed for each DSRIP project.			07/17/2015	03/31/2016	03/31/2016	DY1 Q4

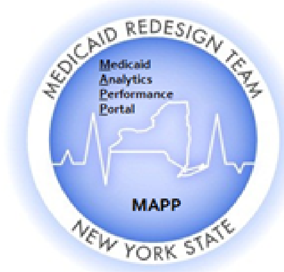
Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Define target workforce state (in line with DSRIP program's goals).	Update: The Workforce Project Team was established in April 2015 and is being led by the Workforce Subcommittee (see attached roster) chaired by the BPHC CSO's Director of Workforce Innovation, Mary Morris and Rosa Mejias from the 1199 Training and Employment Fund (TEF). The project team has met as a whole three times (5/22/15, 7/08/15, 9/09/15). Work groups have been created to address planning, communications, and labor relations (Ad Hoc). The planning



Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	work group has met four times (7/20/15, 8/10/15, 9/21, 10/5) to work on the implementation plan and discuss consultant group to support workforce milestones, and identify areas where workforce policies for the PPS are needed. The communications work group has met four times (7/31/15, 8/14/15, 9/11/15, 10/9/15) to establish a workforce engagement and communication plan, an outline of which has been approved by the workforce subcommittee. The PPS has led a consortium with a total of 7 NYC PPSs to collaborate on the selection of a workforce vendor to support our work with all of the milestones, including defining the target workforce state. The seven participating PPSs are Bronx Partners for Healthy Communities, Advocate Community Partners, Bronx Lebanon Hospital Center PPS, One City Health, Community Care of Brooklyn, New York Presbyterian PPS and NYU/Lutheran PPS. Milestone is on track for completion.
Create a workforce transition roadmap for achieving defined target workforce state.	Update: The Workforce transition roadmap will be created by the workforce subcommittee and workforce planning work group with support from the workforce vendor. We plan to utilize information derived from the current state survey, the target state assessment and the gap analysis to identify and prioritize transition steps. We will identify short and long term steps to address workforce gaps through training of existing staff and hiring additional staff. We will also develop sustainability strategies. Milestone is on track for completion.
Perform detailed gap analysis between current state assessment of workforce and projected future state.	
Produce a compensation and benefit analysis, covering impacts on both retrained and redeployed staff, as well as new hires, particularly focusing on full and partial placements.	BPHC has engaged a vendor with healthcare compensation and benefit expertise to assist with the compensation and benefit analysis. We will need the data from our current state survey, which will be distributed during the 3rd or 4th week in January, 2016, to contribute to this analysis.
Develop training strategy.

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

IPQR Module 11.4 - Major Risks to Implementation & Risk Mitigation Strategies

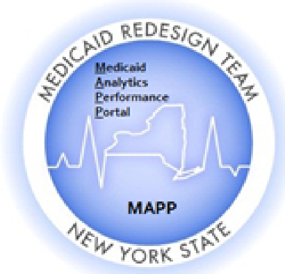
Instructions :

Please describe the key challenges and risks that you foresee in achieving the milestones set out above, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

A robust & well-trained workforce, rooted in the diverse communities of the Bronx & engaged in the transformative change required under DSRIP is central to the success of BPHC. There will be 3 major workforce challenges to address: 1) BPHC has a diverse, largely unionized workforce of approximately 35,000. Partner orgs have unique cultures, policies & collective bargaining agreements. These factors make engaging the workforce a challenge. The greatest risk to workforce strategy deployment is potential lack of buy-in from staff. The PPS will provide ongoing communication specifically geared to the workforce & continued opportunities for input & resolution of disputes with unions, employee groups & individuals. For unionized partners, staff engagement will be closely coordinated with union leadership, within the context of collective bargaining agreements. In addition to the Workforce Sub-Committee (made up of union, workforce experts including TEF, HR & training representatives from member orgs & frontline staff), three additional work groups have been formed to work with and be monitored by the sub-committee: the Workforce Communication Workgroup for development & implementation of communication/engagement strategies – including regular bulletins, new media campaigns, speakers at labor-management & town hall meetings and the Workforce Planning Work Group which meets regularly to analyze internal and external recruitment and training strategies for recommendations to the Workforce subcommittee. A third group, the Advisory Group (facilitated by the TEF Labor-Management Project) will provide a forum for input, dispute resolution & problem solving as needed. 2) BPHC has intense retraining and training needs. We anticipate 5,000-10,000 existing staff will need retraining to implement the PPS' clinical projects. BPHC also anticipates up to 750 new jobs created within the PPS, all of which will require training. To address the needs for both retraining of existing staff & onboarding new hires, BPHC will undertake a large-scale training initiative addressing care coordination, patient engagement, motivational interviewing, cultural competence, inter-disciplinary team care planning, chronic disease management, virtual & cross-sector communications & use of health information technology, as well as protocols associated with specific project interventions. Some training will result in certification/licensing for existing employees. 3) There is difficulty in recruitment & hiring. BPHC will need to recruit & hire staff for new positions. Historically, the Bronx has had difficulty recruiting healthcare professionals. The Bronx is the least healthy county in NYS & ranks worst in social & economic factors. These factors make Bronx residents an especially challenging population to treat, hindering recruitment efforts. In addition, compensation for Bronx health providers is reported to be less than surrounding counties in NY & NJ, so qualified candidates are lost to other locales. BPHC plans to develop common templates for job descriptions & postings for use by partners, create a job board on its website, provide technical assistance to partners on sourcing, recruiting, onboarding & retention strategies, & partner with local colleges, CBOs (e.g. Phipps Neighborhood & Bronx-Westchester Area Health Education Center), local high schools, & TEF to develop new & sustainable workforce talent pools. Because workforce challenges are consistent throughout the Bronx, BPHC also intends to collaborate with the other PPSs in the Bronx to develop & implement joint workforce strategies to the maximum extent possible. The Workforce Sub-Committee will be charged with monitoring the comprehensive workforce strategy to ensure BPHC retains, trains, & hires the staff necessary to support successful implementation of DSRIP projects & to mitigate associated risks.

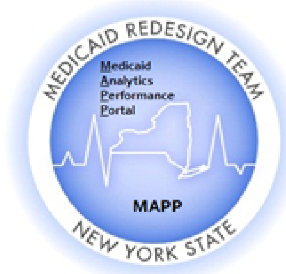
IPQR Module 11.5 - Major Dependencies on Organizational Workstreams

Instructions :



Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

BPHC's workforce strategy has interdependencies with many workstreams, including clinical project implementation, cultural competency, IT systems and processes, and finance and budgeting.
• Project Implementation Interdependencies: The number and types of staff that must be retrained or redeployed and the number and type of staff that needs to be newly hired depend on the needs and services of the clinical projects. As the implementation of the clinical projects evolves, it will be important to closely monitor any changes that could impact workforce needs.
• Cultural Competency Workstream Interdependencies: The success of the PPS' recruitment and training strategy will impact the provision of culturally competent care. The PPS will work with 1199 TEF, CUNY, and contracted CBOs to develop training curricula that meet cultural competency and health literacy standards and incorporate these trainings into all new hire orientations, refresher courses, and provider agreements.
• IT Systems & Processes: To support a robust IT infrastructure, BPHC is planning to implement an electronic care planning tool across the PPS. The success of this tool is heavily dependent on the ability of the healthcare workforce to use this platform to track and manage care. BPHC's CSO will institute extensive training for the care management workforce on the use of the care planning tool.
• Finance and Budgeting: BPHC anticipates that partners will require funding to hire and deploy additional staff and potentially to adjust compensation for existing staff critical to successful implementation of the DSRIP projects.
• Governance: Establishment of the Workforce Sub-committee will be critical to engaging workers and thus ensuring the success of each DSRIP project.

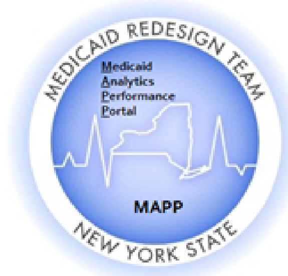


IPQR Module 11.6 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Director of Workforce Innovation, BPHC	Mary Morris	Responsible for the development and implementation of all workforce implementation plans including providing leadership and advisement to the Workforce Sub-Committee, reporting to the Executive Committee.
Director of Collaboration	Albert Alvarez	Responsible for obtaining input from the community on workforce needs.
Workforce Sub-Committee	The WSC has 12-15 voting members including representation from unions, HR, workforce experts, frontline staff (for all names, please see Membership Template in Governance workstream).	Responsible for implementing the workforce strategy, including Workforce Communication and Workforce Advisory facilitated by the 1199 Labor Management staff to ensure workforce input and identify concerns and structural barriers for collaborative decision making.
Workforce Training Vendor	1199 Training and Employment Funds (Rosa Mejias)	TEF will support execution of workforce training related activities including participation on the Sub-Committee, providing research on training vendors, best practices, information from other PPSs, helping to screen candidates for new hires, assessment, remediation and case management for candidates, culture change, preparation of reports to the State and dispute resolution.
Labor Representatives	Representatives from 1199 SEIU, NYSNA and CIR (Tom Cloutier, Teresa Pica, Gladys Wrenick, Rosa Mejias, and others)	Provide expertise on CBAs, and insight in retraining, redeployment and hiring needs.



IPQR Module 11.7 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved in your workforce transformation plans, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Linda Reid, Annie Wiseman, Susan Roti	Training Leads in Partner Organizations	Provide best practice training approaches and guidance in program implementation
Erlinda Girado, Victoria Izaylevsky, Katrina Jones, Marc Wolf, Gloria Kenny	HR Leads in Partner Organizations	Support data collection for staff FTEs, comp and benefits, CBO information, hiring needs
Patricia Belair	SVP, Ambulatory Services and Strategy	Advisor on ambulatory care competencies/jobs
External Stakeholders		
1199 SEIU, NYSNA, CIR	Labor Union Representatives	Facilitate worker engagement
Curtis Dann-Messier	CUNY liaison	Coordinate curriculum development, supply talent
Marilyn Aquirre-Molina, Executive Director, CUNY Institute for Health Equity	Connection to Bronx Borough President Ruben Diaz's Not 62 Campaign	Input for curriculum development. Provide action-research on the social determinants of health that contribute to the high rates of morbidity and mortality in the Bronx, and technical support for training curriculum to enable us to better address health equity.
Swawna Trager, Executive Director of the NY Alliance for Health Careers	Provide talent pool of new staff for CHWs and other "peer" roles.	Potential training funding source-city and federal funding including stipends for training, tuition reimbursement, wrap arounds and paid internships, Curriculum development consultation.
Jessica Hill, Director Bronx-Westchester AHEC	Provides Bronx resident talent pipelines for various PPS staff positions.	Creates community-based health professional training opportunities and public health programs. Strengthens community networks to increase minority representation in all healthcare professions.
GNYHA	Provide training on key areas of care coordination teams and cultural competency.	Provide research findings on NYC health issues.

IPQR Module 11.8 - IT Expectations

Instructions :

Please describe how the development of shared IT infrastructure across the PPS will support your plans for workforce transformation.

The development of shared IT infrastructure across the PPS will be important in storing information, tracking progress on workforce transitions, and delivering and tracking training to ensure success of the DSRIP clinical projects. Shared IT infrastructure will be especially important given the high volume of training, redeployment and new hires that needs to take place in order to implement the DSRIP projects.
1) Storing Information. BPHC will need to document information from all of the PPS Partners regarding their current workforce state, including volume, competencies and skills. It will be important to have an IT platform that will store this large volume of information in an organized way.
2) Tracking. BPHC anticipates that there will be extensive movement and changes in the workforce that will need to be tracked over time in order to ensure that BPHC reaches the future targeted workforce state. It will be crucial to track these changes across the PPS. The IT infrastructure will be key in reporting workforce process measures in the quarterly reports.
3) Training. Providers and staff will be trained regarding specific population needs and effective patient engagement approaches. Training will be scheduled, delivered and tracked using a learning management system (LMS) administered by the BPHC CSO.
4) Job Listings. BPHC will also use the IT infrastructure to post job openings on the "job board" across the PPS in order to recruit and hire qualified staff.

IPQR Module 11.9 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

BPHC will measure the success of its workforce strategy through the milestones listed above. BPHC will focus on monitoring key workforce measures, such as the number and type of staff who are retrained or redeployed as well as new hires. The Workforce Sub-Committee will be charged with monitoring the comprehensive workforce strategy to ensure that BPHC retains, trains, and hires the staff necessary to support successful implementation of DSRIP projects. The Workforce Sub-Committee will be supported by two workgroups: 1) Workforce Communications Workgroup and 2) Workforce Advisory Workgroup that will support workforce efforts.

Project 2.a.i – Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management

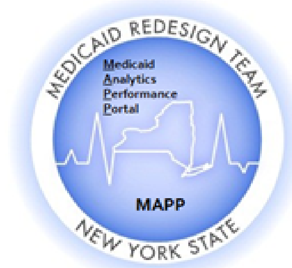
IPQR Module 2.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

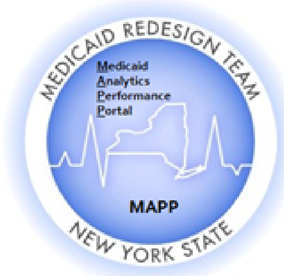
Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Providers & BPHC may not agree on contract terms due to uncertainty around DSRIP. Potential Impact (PI): Providers cannot fully engage in BPHC; PPS cannot reach provider participation goal. Mitigation (M): BPHC works to understand provider capabilities & sets clear expectations. Providers enter into a standard pro forma Master Services Agreement early, deferring agreement on detailed requirements until they are known & incorporated in rolling Statement of Works addenda.
Payers/social service agencies not yet identified may need to participate in BPHC. PI: BPHC will not achieve its fullest potential in meeting IDS goals. M: BPHC collaborates with Coalition of NYS Public Health Plans to explore payer participation, undertakes/documents formal processes to identify & pursue payers/social service agencies for inclusion in PPS.
ACO/HHs may not have IT capabilities to implement IDS strategy. PI: ACO/HHs cannot fully participate in the IDS. M: BPHC assesses population health management (PHM) systems & capabilities of each attested ACO/HH, offering its own systems as needed.
Patients do not engage sufficiently to benefit from care delivery improvements. PI: BPHC may not achieve DSRIP health improvement goals for the community. M: BPHC offers focused, culturally relevant, evidence-based, easy-to-understand education to patients, integrates relevant materials into care management (CM) staff training. PCP team members, CBOs, patient educators, CHWs engage patients.
Providers do not fully embrace CM or PHM. PI: PCPs continue to provide patients non-coordinated care encouraged by fee-for-service system. M: BPHC provides training, support, tools for CM & PHM.
Providers/BPHC do not fully achieve DSRIP & PPS goals. PI: BPHC/State do not achieve performance goals, jeopardizing DSRIP funding & health system transformation. M: BPHC and partners select and vet evidence-based protocols via appropriate governance structures. Implementation of same protocols contractually required. PPS provides training, follow-up to ensure effective protocols deployment.

Providers do not implement EHR systems that meet MU & PCMH Level 3 standards &/or do not achieve PCMH 2014 Level 3 recognition by DY3Q4. PI: Providers cannot fully participate in planned interventions, CM, PHM across the IDS. M: BPHC uses gap analysis to develop a program to monitor & deploy assistance to providers at risk. BPHC supports practices; deploys internal community, external consulting resources; provides customized technical assistance, coaching, & care team training modules.
BxRHIO fails to develop services/satisfy partner demand for secure messaging, alerts & patient record look up, or Providers do not integrate & use secure messaging, alerts & patient record look up by DY3Q4. PI: Providers cannot fully participate in planned interventions, CM & PHM across the IDS; BPHC may fail/be delayed in achieving this IDS goal & state may fail to achieve a full return on its investment in RHIO development. M: BPHC completes due diligence regarding BxRHIO HIE capabilities & contracts to develop/deliver at risk services. Partner contracts with BPHC will include terms obliging them to integrate/adopt BxRHIO services. CSO monitors, assists PPS partners to participate/integrate with BxRHIO for HIE.
BPHC will not attract/train sufficient management/workforce talent. PI: BPHC may fail/be delayed in reaching care transformation goals. M: BPHC coordinates with community colleges, 1199 Job Security Fund, Montefiore CMO, & NYSNA to identify and attract a braod pool of capable workers & use alternative employment tactics. Regulatory barriers may impede planned activities. PI: Care transformation goals are not met. M: BPHC applied for regulatory relief in various areas and included potential alternatives in its Organizational Application. Continue to monitor potential



barriers in regulation/DSRIP guidance.



IPQR Module 2.a.i.2 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement.
Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	Project	N/A	In Progress	04/01/2015	06/30/2016	04/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task PPS includes continuum of providers in IDS, including medical, behavioral health, post-acute, long-term care, and community-based providers.	Project		Not Started	04/01/2015	03/31/2020	01/01/2016	03/31/2016	03/31/2016	DY1 Q4
Task Define pro forma role of all PPS providers in BPHC's network model of care (prioritized programs/projects, target patient populations, interventions, accountabilities, use of care plans, funds flow, etc.) to establish BPHC-wide expectations, building on clinical planning to date and planned population health management, clinical integration and IT assessment and planning detailed in those work streams	Project		In Progress	04/01/2015	03/31/2020	08/01/2015	06/15/2016	06/30/2016	DY2 Q1
Task Draft Master Services Agreement (MSA) and exhibits, which will describe legal terms and conditions of partner participation in the PPS and governance structure	Project		Completed	04/01/2015	05/21/2015	04/01/2015	05/21/2015	06/30/2015	DY1 Q1
Task Solicit comments on MSA from partners through distribution to members, opportunity to submit written comments, and review in Committee and Sub-Committee meetings.	Project		Completed	05/21/2015	06/08/2015	05/21/2015	06/08/2015	06/30/2015	DY1 Q1
Task Finalize MSA agreement	Project		Completed	07/01/2015	08/31/2015	07/01/2015	07/23/2015	09/30/2015	DY1 Q2
Task Develop and finalize project schedules in concert with Clinical	Project		In Progress	06/01/2015	12/31/2015	06/01/2015	12/31/2015	12/31/2015	DY1 Q3

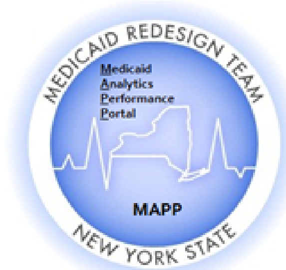
Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers										

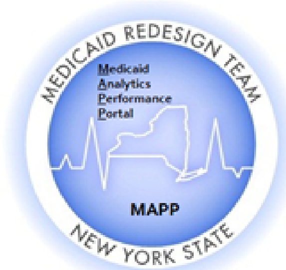


New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.										
Task PPS includes continuum of providers in IDS, including medical, behavioral health, post-acute, long-term care, and community-based providers.										
Task Define pro forma role of all PPS providers in BPHC's network model of care (prioritized programs/projects, target patient populations, interventions, accountabilities, use of care plans, funds flow, etc.) to establish BPHC-wide expectations, building on clinical planning to date and planned population health management, clinical integration and IT assessment and planning detailed in those work streams										
Task Draft Master Services Agreement (MSA) and exhibits, which will describe legal terms and conditions of partner participation in the PPS and governance structure										
Task Solicit comments on MSA from partners through distribution to members, opportunity to submit written comments, and review in Committee and Sub-Committee meetings.										
Task Finalize MSA agreement										
Task Develop and finalize project schedules in concert with Clinical Operations Plans (COPs)										
Task Review and negotiate project schedules with partner organizations. The order in which project schedules will be negotiated will be based on prioritization of partner organizations developed by SBH										
Task Complete first round of contracting with all PPS partners										
Task Identify payers and social service organizations required to support IDS strategy that are not already identified as PPS member partners; schedule, conduct and document regular meetings to discuss formal mechanisms for them to participate in BPHC										
Milestone #2 Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.										



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task PPS produces a list of participating HHs and ACOs.										
Task Participating HHs and ACOs demonstrate real service integration which incorporates a population management strategy towards evolving into an IDS.										
Task Regularly scheduled formal meetings are held to develop collaborative care practices and integrated service delivery.										
Task Define contracting, coordination and assessment strategy for Montefiore BAHN ACO, and care model expectations, coordination and contracting strategies related to BAHN, CBC and CCMP partner Health Homes, based on requirement frameworks developed to date and those that will result from planned assessment and planning activities in other work streams										
Task Assess HH and ACO population health management capabilities to determine if the skills and experience of the ACO and other organizations can be leveraged by BPHC, based on strategies and expectations; incorporate into BPHC operational strategy/plan										
Task Develop and implement effective referral strategy to the HH/ACO, including referral tracking										
Task Integrate HHs and ACOs into the IT infrastructure										
Milestone #3 Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.										
Task Clinically Interoperable System is in place for all participating providers.										
Task PPS has protocols in place for care coordination and has identified process flow changes required to successfully implement IDS.										
Task PPS has process for tracking care outside of hospitals to ensure that all critical follow-up services and appointment reminders are followed.										
Task PPS trains staff on IDS protocols and processes.

support eligible safety net providers in acquiring/implementing certified EHR systems, including potential use of incentive-based payments for implementation										
Task Recruit or contract for EHR implementation resources as needed										
Task Begin actively encouraging, tracking and supporting partner EHR implementation and progress towards Meaningful Use and PCMH standards										
Task Track status and manage support to ensure all eligible safety net providers are using certified EHR systems that meet Meaningful Use and PCMH 2014 Level 3 standards										
Milestone #6 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.										
Task PPS identifies targeted patients through patient registries and is able to track actively engaged patients for project milestone reporting.										
Task Define population health management (PHM) requirements, establish PHM function and recruit or contract with partner for PHM staff										
Task Perform current state assessment of E.H.R. capabilities.										
Task Perform gap analysis and identify priories to achieving integration of patient record.										
Task Define business requirements and data elements for patient registry to stratify and track all patients engaged in this project.										
Task Recommend registry business requirements and data elements to governance committees for review and approval (Quality and Care Innovation Subcommittee, Information Technology Subcommittee and Executive Committee)										
Task Engage IT Subcommittee to identify technology and resource requirements for registry, including technical platform for hosting registry.										
Task Create budget to build registry and acquire necessary resources										
Task Assess and acquire or contract for care coordination

bonus payments to reflect PPS partner and provider performance relative to patient outcomes										
Task Present recommendation for allocation of internal PPS provider bonus payments to Executive Committee										
Task Engage MCO workgroup and participating MCO organizations to reconcile and align PPS and MCO activities related to provider compensation associated with patient outcome										
Task Issue first internal PPS provider bonus payments for high-performing partners exceeding outcome and quality thresholds										
Task Complete first quarterly report to Executive Committee on progress toward aligning provider compensation with patient outcomes.										
Task Develop provider value-based compensation framework through the Finance and Sustainability Sub-Committee, Medicaid MCO workgroup and the Executive Committee.										
Task Complete first annual evaluation of PPS value-based payment plan and recommend changes, if needed										
Milestone #11 Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate.										
Task Community health workers and community-based organizations utilized in IDS for outreach and navigation activities.										
Task Identify community based services relevant to the community, and identify organizations that provide them, to gain an understanding of their willingness in and capability to expand their services and to contractually engage with BPHC to engage patients in their care through outreach activities, peforming patient screening and assessment, helping patients navigate service providers (including engagement and activation with primary care) and providing patient education and self-management assistance										
Task Identify CBOs to contract with in DY1, via: 1) project-specific work groups identifying CBOs to target and engage based on the services they provide and how those services address the predominant social determinants of health in the Bronx by

primary condition (diabetes, CVD, asthma, etc), based on the initial Bronx CNA (November 2014); 2) CSO implement a survey of current CBO members of our PPS to profile their services and their interest and capacity to participate as partner organizations in our DSRIP projects; 3) hosting weekly forums with groups of CBOs designed to inform them about the CBO role as member organizations and to facilitate their participation in our DSRIP projects.										
Task Draft Master Services Agreement (MSA) and exhibits, which will describe legal terms and conditions of partner participation in the PPS and governance structure.										
Task Solicit comments on MSA from PPS members through distribution to members, opportunity for submission of written comments, and review in Committee and Sub-Committee meetings.										
Task Finalize MSA.										
Task Develop and finalize CBO project schedules in concert with Clinical Operational Plans.										
Task Review and negotiate project schedules with CBOs.										
Task Execute agreements and project schedules for CBOs.										
Task Develop patient engagement and activation protocols for priority projects, target subpopulations or interventions, based on Community Needs Assessment, clinical planning to-date and further analysis of attributed patient population, using MAPP and PPS partner patient-level data										
Task Begin patient outreach, engagement, screening/assessment, navigation activation and education for high priority projects and population										
Task Define patient engagement and patient engagement metrics. Define mechanisms for evaluation, feedback and continuous quality improvement.										

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #1 All PPS providers must be included in the Integrated Delivery

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.										
Task PPS includes continuum of providers in IDS, including medical, behavioral health, post-acute, long-term care, and community-based providers.										
Task Define pro forma role of all PPS providers in BPHC's network model of care (prioritized programs/projects, target patient populations, interventions, accountabilities, use of care plans, funds flow, etc.) to establish BPHC-wide expectations, building on clinical planning to date and planned population health management, clinical integration and IT assessment and planning detailed in those work streams										
Task Draft Master Services Agreement (MSA) and exhibits, which will describe legal terms and conditions of partner participation in the PPS and governance structure										
Task Solicit comments on MSA from partners through distribution to members, opportunity to submit written comments, and review in Committee and Sub-Committee meetings.										
Task Finalize MSA agreement										
Task Develop and finalize project schedules in concert with Clinical Operations Plans (COPs)										
Task Review and negotiate project schedules with partner organizations. The order in which project schedules will be negotiated will be based on prioritization of partner organizations developed by SBH										
Task Complete first round of contracting with all PPS partners										
Task Identify payers and social service organizations required to support IDS strategy that are not already identified as PPS member partners; schedule, conduct and document regular meetings to discuss formal mechanisms for them to participate in BPHC										
Milestone #2 Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards

evolving into an IDS.										
Task PPS produces a list of participating HHs and ACOs.										
Task Participating HHs and ACOs demonstrate real service integration which incorporates a population management strategy towards evolving into an IDS.										
Task Regularly scheduled formal meetings are held to develop collaborative care practices and integrated service delivery.										
Task Define contracting, coordination and assessment strategy for Montefiore BAHN ACO, and care model expectations, coordination and contracting strategies related to BAHN, CBC and CCMP partner Health Homes, based on requirement frameworks developed to date and those that will result from planned assessment and planning activities in other work streams										
Task Assess HH and ACO population health management capabilities to determine if the skills and experience of the ACO and other organizations can be leveraged by BPHC, based on strategies and expectations; incorporate into BPHC operational strategy/plan										
Task Develop and implement effective referral strategy to the HH/ACO, including referral tracking										
Task Integrate HHs and ACOs into the IT infrastructure										
Milestone #3 Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.										
Task Clinically Interoperable System is in place for all participating providers.										
Task PPS has protocols in place for care coordination and has identified process flow changes required to successfully implement IDS.										
Task PPS has process for tracking care outside of hospitals to ensure that all critical follow-up services and appointment reminders are followed.

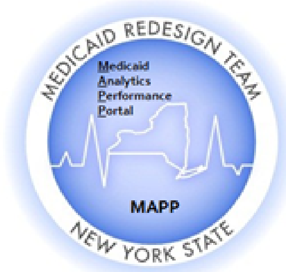
Task Issue first internal PPS provider bonus payments for high-performing partners exceeding outcome and quality thresholds										
Task Complete first quarterly report to Executive Committee on progress toward aligning provider compensation with patient outcomes.										
Task Develop provider value-based compensation framework through the Finance and Sustainability Sub-Committee, Medicaid MCO workgroup and the Executive Committee.										
Task Complete first annual evaluation of PPS value-based payment plan and recommend changes, if needed										
Milestone #11 Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate.										
Task Community health workers and community-based organizations utilized in IDS for outreach and navigation activities.										
Task Identify community based services relevant to the community, and identify organizations that provide them, to gain an understanding of their willingness in and capability to expand their services and to contractually engage with BPHC to engage patients in their care through outreach activities, peforming patient screening and assessment, helping patients navigate service providers (including engagement and activation with primary care) and providing patient education and self-management assistance										



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task Identify CBOs to contract with in DY1, via: 1) project-specific work groups identifying CBOs to target and engage based on the services they provide and how those services address the predominant social determinants of health in the Bronx by primary condition (diabetes, CVD, asthma, etc), based on the initial Bronx CNA (November 2014); 2) CSO implement a survey of current CBO members of our PPS to profile their services and their interest and capacity to participate as partner organizations in our DSRIP projects; 3) hosting weekly forums with groups of CBOs designed to inform them about the CBO role as member organizations and to facilitate their participation in our DSRIP projects.										
Task Draft Master Services Agreement (MSA) and exhibits, which will describe legal terms and conditions of partner participation in the PPS and governance structure.										
Task Solicit comments on MSA from PPS members through distribution to members, opportunity for submission of written comments, and review in Committee and Sub-Committee meetings.										
Task Finalize MSA.										
Task Develop and finalize CBO project schedules in concert with Clinical Operational Plans.										
Task Review and negotiate project schedules with CBOs.										
Task Execute agreements and project schedules for CBOs.										
Task Develop patient engagement and activation protocols for priority projects, target subpopulations or interventions, based on Community Needs Assessment, clinical planning to-date and further analysis of attributed patient population, using MAPP and PPS partner patient-level data										
Task Begin patient outreach, engagement, screening/assessment, navigation activation and education for high priority projects and population										
Task Define patient engagement and patient engagement metrics. Define mechanisms for evaluation, feedback and continuous quality improvement.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	IDS includes all required providers, including payer and social service organizations. The PPS finalized the MSA structure, implemented processes for collecting them, and collected MSAs covering approximately 60% of our providers. Milestone is on track for completion.
Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.	Based on efforts to date coordinating with our partner Health Homes on population health management strategies, we realized that coordinating with our partner ACO will be substantially more complex. We have a close working relationship with the ACO and HH and will view DSRIP as an opportunity to broaden that relationship. Adjustment: As a result of this analysis, we have moved back the date a quarter, by which we will define the role of our partner ACO in clinical integration and population health management.
Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.	We are building an IDS that has the capacity and diversity to ensure patients receive appropriate health care and community support. We are developing clinical operation plans and are scheduled to deploy them this quarter to help satisfy our immediate (in progress) and future (scheduled) requirements and tasks. They will define sets of policies and procedures of how members will provide various services to patients. Milestone is on track for completion.
Ensure that all PPS safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including directed exchange (secure messaging), alerts and patient record look up, by the end of Demonstration Year (DY) 3.	We are executing a comprehensive plan to support our safety net providers in MU and PCMH which includes EHR support and connectivity of data captured there-in. Our agreement with BxRHIO will serve as the foundation to achieve next quarter's tasks and those of the future to support this Milestone. We also have a strategy around funding for the adoption of the HIE by safety net providers. Milestone is on track for completion.
Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.	We are executing a comprehensive plan to support our safety net providers in MU and PCMH which includes EHR support and connectivity of data captured there-in. A process has been started already ensure all applicable providers meet PCMH and MU accreditation where possible and that we meet our obligation to the previously agreed tasks. Consultants have been deployed to perform detailed Gap Analysis. Recent changes to MU guidelines have been identified as a risk and there is a focus on understanding and mitigating it. Milestone is on track for completion.
Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.	We are executing a comprehensive plan to support our safety net providers in MU and PCMH which includes use of targeted patient registries in conjunctions with our clinical projects. We have a comprehensive strategy in place for care management which includes the uses of registries, EHRs and IT platforms, which include the completion of all agreed upon tasks by agreed upon dates. Consultants have been deployed to perform detailed Gap Analysis. Milestone is on track for completion.
Achieve 2014 Level 3 PCMH primary care certification and/or meet state-determined criteria for Advanced Primary Care Models for all participating PCPs, expand access to primary care providers, and meet EHR Meaningful Use standards by the end of DY 3.	We are executing a comprehensive plan to support all PCPs in PCMH. A process has been started already ensure all applicable providers meet PCMH accreditation where possible and that we meet our obligation to the previously agreed tasks. Consultants have been deployed to perform detailed Gap Analysis. Milestone is on track for completion.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Contract with Medicaid Managed Care Organizations and other payers, as appropriate, as an integrated system and establish value-based payment arrangements.	The SDOH VBP roadmap has been reviewed and appropriate actions have been planned and scheduled around it to engage MCOs as an IDS. Work on planning further steps with MCOs will support our deliverables for next quarter and help us be well positioned to reach our commitments and goals further down the line to set-up VBP arrangements. Milestone is on track for completion.
Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform.	The SDOH VBP roadmap has been reviewed and appropriate actions have been planned and scheduled around it to engage MMCOs as an IDS. Work on planning further steps with MCOs will support our deliverables for next quarter and help us be well positioned to reach our commitments and goals further down the line to track utilization trends, performance issues, and payment reform. Milestone is on track for completion.
Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes.	The SDOH VBP roadmap has been reviewed and plans are being put in place to align provider compensation to patient outcomes. We are implementing structures to measure and analyze data (DY1Q4 commitments) and to then act upon the analysis in a manner that will re-enforce the transition towards VBP within the constraints of our committed timeline. Milestone is on track for completion.
Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate.	We identified community-based services necessary for our attributed population and have recruited CBOs accordingly. We have contracting structures in place for them and are planning next steps to engage with the CBOs. The issues surrounding consents and developing registries of BPHC attributed members is a serious risk to the success of this Milestone. Adjustment: Deadlines for tasks associated with CBO contracting have been pushed back to DY2 Q1, in order to align with the timeline developed for the Governance workstream (please see Governance workstream).

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

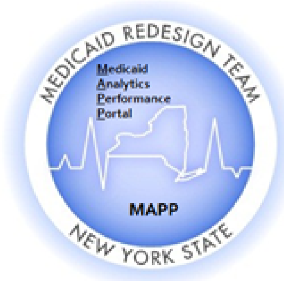
IPQR Module 2.a.i.4 - IA Monitoring

Instructions :



Project 2.a.iii – Health Home At-Risk Intervention Program: Proactive management of higher risk patients not currently eligible for Health Homes through access to high quality primary care and support services

IPQR Module 2.a.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

(1) A major risk we face in successfully implementing 2.a.iii is ensuring that participating providers have access to an electronic care management (CM) tool that can be shared across providers to effectively document and track patients engaged with CM services. Multiple IT systems and protocols are employed by Health Homes and PCMHs, and some partners do not have IT systems with the necessary capabilities. BPHC will leverage the MAPP tool, and will ensure that all community partners have access to an electronic care planning and management tool, which will facilitate documentation. The care planning tool will serve as a centralized resource for partners without the needed IT system in place, and a unifying resource for partners with varying IT systems. (2) Another risk to 2.a.iii is that patients lack an understanding about the long-term effects of chronic diseases, and as a result, many patients do not see the benefit to be gained from care management services. To overcome this barrier, BPHC will focus its patient education efforts on developing materials that integrate simply stated facts about the illness with evidence-based guidelines that take into account culturally relevant insight on topics such as self-management, diet, exercise, and medication adherence. These materials and topics will be integrated into CM staff training. BPHC will use patient level tactics such as motivational interviewing and incentives and population-level community-wide marketing strategies to inform and engage patients. Finally, BPHC recognizes that using culturally competent community-based outreach workers and peer educators along with evidence-based patient activation measure strategies are critical in engaging patients in CM services. (3) Reaching patients by phone and home visits is often difficult due to frequent changes in contact information. To overcome this challenge, BPHC will institute outreach standards that emphasize persistence and use of both telephonic outreach and in-person community outreach by primary care team members and partner community-based organizations. In addition, BPHC will identify strategies to provide high-risk patients with cell phones, mailboxes, and addresses. (4) Though CNA respondents reported availability of primary care, these services are unevenly spread across the borough, and significant shortages exist in some neighborhoods. SBH has recently signed an agreement with the Sophie Davis School of Biomedical Education at CUNY to be its primary hospital campus as it becomes a full-fledged medical school focused on the education of PCPs to serve diverse, needy communities. In addition, Montefiore operates a social medicine residency, which trains PCPs to work in the Bronx. BPHC also will recruit and train midlevel providers (i.e., nurse practitioners and physician assistants). We will collaborate with all Bronx PPSs to increase the number of PCPs recruited and retrained, and we will look at physician compensation models to identify ways to make the Bronx a more attractive place to practice. (5) It will be challenging to recruit and train sufficient CM staff to serve the needs of the Bronx. Recruiting Spanish-speaking CM staff will be a particular risk. BPHC's workforce strategy will be targeted towards mitigating this risk, such as through the CSO working with community colleges and coordinating with the 1199 Job Security Fund, Montefiore CMO, and NYSNA to identify capable workers and provide training in Spanish when needed. BPHC will also use alternative employment tactics, such as flexible hours and job sharing where feasible to attract a broader pool of workers. BPHC will coordinate with other Bronx PPSs on its workforce strategy, which will entail conducting joint recruitment efforts and better aligning compensation to ensure that Bronx PPSs are not competing against each other for care managers.

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

IPQR Module 2.a.iii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Patient Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q3 should include patients previously reported in DY1 Q2 plus new patients engaged in DY1 Q3. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
100% Actively Engaged By	Expected Patient Engagement
DY3,Q4	57,600

Patient Update		% of Semi-Annual Commitment To-Date	Semi-Annual Variance of Projected to Actual	% of Total Actively Engaged Patients To-Date
DY1, Q1	DY1,Q2

Milestone #1 Develop a Health Home At-Risk Intervention Program, utilizing participating HHs as well as PCMH/APC PCPs in care coordination within the program.										
Task A clear strategic plan is in place which includes, at a minimum: - Definition of the Health Home At-Risk Intervention Program - Development of comprehensive care management plan, with definition of roles of PCMH/APC PCPs and HHs										
Task Develop a workplan and timeline to develop the clinical operations plan (COPs) and implement a strategy for the HH at-risk population that aligns with the patient engagement speed and scale application submission										
Task Convene representative group of PPS members including Health Homes (HH), PCMHs, SUD providers and SMEs, and others to participate in developing project plan for HH at-risk project (2.a.iii)										
Task Define the population to be targeted by the HH at-risk intervention, such as individuals with diabetes, substance use disorders, mild to moderate depression or other single uncontrolled chronic conditions (see requirement #5)										
Task Define a care management (CM) staffing model, in conjunction with Workforce Subcommittee, to address the needs of the target population including staff qualifications, care team roles (including PCP and care manager), functions, and panel size of team members										
Task Develop financial model to cost out CM team										
Task Develop and document the COP to define the elements of the program including the roles of PCPs and Health Homes, health information exchange and technology requirements, and evidence-based guidelines										
Task Develop project implementation budget										
Task Working with Workforce Subcommittee, design training and recruitment strategy for care managers and care teams										
Task Submit COP and budget to Quality and Care Innovation Sub-Committee for approval

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task Prepare/disseminate gap analysis tool based on COP to participating providers to determine CM resource needs against project plan and care management team staffing model										
Task Identify site-specific implementation teams.										
Task Launch recruitment and training programs with participating providers										
Task Complete assessment of CM staffing needs of each participating site										
Task Define metrics for rapid cycle evaluation										
Task Use rapid cycle evaluation to track implementation successes and shortcomings and develop corrective actions										
Milestone #2 Ensure all primary care providers participating in the project meet NCQA (2011) accredited Patient Centered Medical Home, Level 3 standards and will achieve NCQA 2014 Level 3 PCMH and Advanced Primary Care accreditation by Demonstration Year (DY) 3.										
Task All practices meet NCQA 2014 Level 3 PCMH and APCM standards	0	0	0	0	0	0	0	0	0	0
Task Assess eligible participating PCP PCMH recognition status and opportunity to expand access to primary care based on PCMH-enabled practices										
Task Recruit or contract for PCMH practice certification resources as needed										
Task Establish BPHC program to educate on the benefits of, and encourage, track and support PCPs and facility based senior leadership in achieving PCMH 2014 Level 3 recognition, including potential use of incentive-based payments for achieving recognition										
Task Perform gap analysis by practice and identify key priorities.										
Task Finalize strategy to support primary care physicians with achieving 2014 NCQA Level 3 PCMH certification by sub committees, including trainings and education.

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task Begin actively encouraging, tracking and supporting partner efforts towards PCMH recognition										
Task Monitor progress with achieving 2014 NCQA level 3 PCMH certification, support provided by PPS as needed.										
Task Monitor practice transformation sustainability after receiving 2014 NCQA level 3 PCMH certification, and provide support as needed.										
Milestone #3 Ensure that all participating safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up.										
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	0	0	0	0	0	0	0	0	0	0
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	0	0	0	0	0	99	198	297	495	792
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	0	0	0	0	0	1	2	3	5	10
Task PPS uses alerts and secure messaging functionality.										
Task Identify safety net provider data sharing requirements and assess partner and QE data sharing capabilities and current HIE participation										
Task Coordinate with Bronx RHIO to develop comprehensive HIE adoption program to encourage and support partner participation and integration										
Task Begin coordinated interface and service development with Bronx RHIO										
Task Establish BPHC program to manage support for safety net providers, including, but not limited to primary care providers, mental health and substance use providers, hospitals, and others, to ensure that all are actively sharing health information, coordinating with Bronx RHIO to encourage, track and support partner participation and integration/data sharing

Task Perform current state assessment of E.H.R. capabilities.										
Task Perform gap analysis and identify priories to achieving integration of patient record.										
Task Define business requirements and data elements for patient registry to stratify and track all patients engaged in this project.										
Task Recommend registry business requirements and data elements to governance committees for review and approval (Quality and Care Innovation Subcommittee, Information Technology Subcommittee and Executive Committee)										
Task Engage IT Subcommittee to identify technology and resource requirements for registry, including technical platform for hosting registry.										
Task Create budget to build registry and acquire necessary resources										
Task Assess and acquire or contract for care coordination management solution (CCMS) and other systems and services as required to support PHM and registries										
Task Develop project implementation and testing plan for building registry as required for PHM, including technical support, ensure frequent automated updates of registry data										
Task Develop training plan and curriculum to deploy risk assessment tool, registry and CCMS tool for providers and care managers, emphasizing use of registries and CCMS to increase care coordination and patient engagement with primary care										
Task Execute registry testing plan and training program for providers and care managers on systems use and on how to identify targeted patients and track those who are actively engaged for milestone reporting.										
Task Issue CCMS user credentials and train designated/delegated PPS partner workforce in use of the coordinated/ integrated solution. Disseminate standardized IT protocols and data security requirements across the system.										
Task Launch registry and monitor its use and performance, evaluate success of patient tracking, and participating provider utilization patterns, , with an emphasis on tracking patient engagement with

primary care.										
Milestone #6 Develop a comprehensive care management plan for each patient to engage him/her in care and to reduce patient risk factors.										
Task Procedures to engage at-risk patients with care management plan instituted.										
Task Develop clinical requirements/use cases and technical requirements for web-based comprehensive care management plan										
Task Identify qualified coordinated care management (CCMS) vendors										
Task Design/document outreach, intake, assessment, and patient engagement process for HH at-risk population that includes development of written comprehensive care management plan and referrals to Health Homes, substance use providers, community-based organizations, and other providers										
Task Convene representative group from PPS providers to participate in care management plan development process										
Task Select/contract with CCMS system(s) that meet requirements										
Task Develop, in conjunction with Workforce Subcommittee, training curriculum for PPS provider staff										
Task Select metrics and use CCMS system to track if care management plan is successful in "reducing patient risk factors"										
Task Implement comprehensive care management plan system in all participating sites										
Task Provide ongoing technical assistance support to participating sites										
Task Use rapid cycle evaluation to track implementation successes and shortcomings with regard to the reduction of patient risk factors and develop corrective actions										
Milestone #7 Establish partnerships between primary care providers and the local Health Home for care management services. This plan

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop a Health Home At-Risk Intervention Program, utilizing participating HHs as well as PCMH/APC PCPs in care coordination within the program.	The Health Home At-Risk Transitional Work Group (TWG) convened three times during quarter two (on 7/31/2015, 8/17/2015, and 9/11/2015) to develop plans for the program, including target population, assessment tools, and a care management staffing model. The program elements are being finalized in the Clinical Operations Plan, which is in the process of finalization. Budget, recruitment, and training plans are in development. Milestone is on track for completion.
Ensure all primary care providers participating in the project meet NCQA (2011) accredited Patient Centered Medical Home, Level 3 standards and will achieve NCQA 2014 Level 3 PCMH and Advanced Primary Care accreditation by Demonstration Year (DY) 3.	PCMH consultants, hired by BPHC, are conducting site-specific gap analyses with BPHC PCPs and formulating a strategy for their achievement of PCMH 2014 Level 3 certification and Meaningful Use. This work includes assessing current EHR capabilities/standards at the sites and formulating a plan to meet Meaningful use and PCMH Level 3 standards by the end of DY3, with the support of the CSO. Milestone is on track for completion.
Ensure that all participating safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up.	BPHC is engaged in high level discussions with the Bronx RHIO to determine capabilities and negotiate terms. There is a regular weekly meeting between stakeholders from the Bronx RHIO and BPHC to formulate the strategy for use and implementation of the RHIO and SHIN-NY. Additionally, use of the RHIO and SHIN-NY is one of the technology components/tools which are being incorporated into the patient flow section of the Clinical Operations Plan. Milestone is on track for completion.
Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM.	PCMH consultants, hired by BPHC, are conducting site-specific gap analyses with BPHC PCPs and formulating a strategy for their achievement of PCMH 2014 Level 3 certification and Meaningful Use. This work includes assessing current EHR capabilities/standards at the sites and formulating a plan to meet Meaningful use and PCMH Level 3 standards by the end of DY3, with the support of the CSO. Milestone is on track for completion.
Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.	The tasks under this milestone concerning, variously, assessing the capabilities and requirements of EHRs and other technical platforms for tracking actively engaged patients, e.g., patient registry, are on track to be completed in DY 1, Q3 as scheduled. The Health Home At-Risk Transitional Work Group finalized their recommendation regarding the data elements for patient registries for project 2.a.iii. This recommendation will be incorporated into feedback from other project-specific workgroups to develop a coordinated PPS-wide strategy to support all project requirements. Milestone is on track for completion.
Develop a comprehensive care management plan for each patient to engage him/her in care and to reduce patient risk factors.	BPHC has identified a CCMS vendor and contract negotiations are underway. A workgroup has been formed and is actively working to develop workflows for care plan development, including assessments, problem definition, patient goal development, and intervention management. Key subject matter experts sitting on this workgroup include the CCMS vendor, existing care navigators, hospital administrators and IT experts, and staff of Health Homes and FQHCs. Systems for referrals and care coordination are being identified and protocols for "closed loop referral processes" are being written as part of the Clinical

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	Operations Plan. These workflows will drive the CCMS tool functionalities and greatly contribute to the development of an integrated delivery system for care management for at-risk patients. The BPHC Senior Director for Analytics has been participating in the development of appropriate process and outcome metrics and to ensure tracking for analytics in the CCMS will meet the PPS requirements. Milestone is on track for completion.
Establish partnerships between primary care providers and the local Health Home for care management services. This plan should clearly delineate roles and responsibilities for both parties.	BPHC has mapped Health Home providers in the PPS and their downstream care management agencies (CMAs). Health Home representatives have been involved in the Health Home At-Risk and CCMS workgroups to ensure their perspective is included in the development of clinical operations planning and system development. Towards the establishment of formal partnerships, BPHC and has engaged in high-level discussions with Health Home agencies and is currently reaching out to individual CMAs to ensure all are fully integrated into the PPS. Exploration has also begun towards the development of collaborative care management services and to establish efficient referral processes. Milestone is on track for completion.
Establish partnerships between the primary care providers, in concert with the Health Home, with network resources for needed services. Where necessary, the provider will work with local government units (such as SPOAs and public health departments).	The Health Home At-Risk TWG developed a list of most utilized services by the at-risk population. This was supplemented by PPS-wide surveys and various activities undertaken with Community Based Organizations (CBOs) as part of the BPHC community engagement strategy and community engagement plan development. In coordination with these partners, the PPS is creating a directory of available services that will be searchable by zipcode and service to be shared throughout the network. A policy and strategy for assisting PCPs, Health Homes, and CBOs to establish partnerships is being developed for inclusion in the Clinical Operations Plan. Additionally, systems for referrals and care coordination are being identified and protocols for "closed loop referral processes" are being written as part of the Clinical Operations Plan. Towards the establishment of formal partnerships for delivery of care management services by Health Homes, BPHC has engaged in high-level discussions with Health Home agencies and is currently reaching out to individual CMAs to ensure all are fully integrated into the PPS. Exploration has also begun towards the development of collaborative care management services and to establish efficient referral processes to Health Home services. Milestone is on track for completion.
Implement evidence-based practice guidelines to address risk factor reduction as well as to ensure appropriate management of chronic diseases. Develop educational materials consistent with cultural and linguistic needs of the population.	Clinical evidence-based guidelines (EBGs) and home-based services for hypertension (including at-home blood-pressure monitoring) and elevated cholesterol were developed by the CVD/Diabetes Transitional Work Group and recommended to the Quality and Care Innovation Subcommittee for adoption. The Subcommittee approved one set of guidelines, which will be incorporated into the Clinical Operations Plan and distributed in Q3 to the participating member organizations of our PPS and are to be incorporated into the protocols and implemented by the medical care providers and care teams of the sites of the participating organizations. The development of mechanisms for regular review of the EBGs is scheduled to begin in DY 1, Q4. The evidence based practice of care management for patients with uncontrolled chronic diseases, high utilization, and social risk factors has been adopted as the strategy for engaging health home at-risk patients to reduce their risk factors and better control their health. Culturally and linguistically appropriate materials will be developed with the input of the Cultural Competency and Health Literacy workgroup. Milestone is on track for completion.

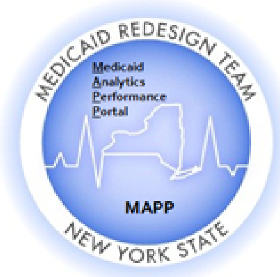
IPQR Module 2.a.iii.5 - IA Monitoring

Instructions :



Project 2.b.iii – ED care triage for at-risk populations

IPQR Module 2.b.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

BPHC is planning to implement Project 2.b.iii through enhancement and expansion of the Montefiore Care Management Organization's existing Clinical Navigator program and the implementation of admission diversion strategies for patients with mental illness (e.g. Riverdale Mental Health Association's Parachute NYC program). Throughout DSRIP, BPHC will seek to address risks to the implementation of Project 2.b.iii using the mitigation strategies described below.
(1) A key risk associated with BPHC's strategy for 2.b.iii includes the possibility of delayed expansion of the Clinical Navigator program due to recruitment and training challenges. To mitigate this risk, Montefiore's CMO has been actively engaged in the DSRIP planning process and has created buy-in for the expansion of the Clinical Navigator program and modifications to customize it to DSRIP based on lessons learned. To further ease the transition, BPHC will stagger the DSRIP program expansion, beginning at Montefiore emergency departments (EDs) and then moving to the SBH ED. BPHC will contract with the CMO to help lead program development, training, recruitment and hiring, and other programmatic functions to minimize delays and ensure proper programmatic oversight.
(2) Unstable housing/BH/SUD may impact patient compliance. CBOs can assist with mitigating these risks. Parachute NYC, an evidence-based alternative to the ED and inpatient admissions, is an effective program that has been challenged by low provider awareness. It reached the end of its funding from the Center for Medicare and Medicaid Innovation on June 30, 2015. Discussions with MCOs regarding a payment mechanism to sustain the program are still in progress. To mitigate these risks, BPHC will work with NYCDOHMH, Riverdale Mental Health Association, and the Visiting Nurse Service of New York to develop an approach to finalizing negotiations with MCOs regarding program payments and "marketing" the program more intensively to ED physicians, psychiatrists, Health Homes, the New York Police Department, and CBOs.
(3) Many of the targeted patients for this project are in need of social as well as medical services. However, many arrive at the ED during off-hours, limiting the time in which staff can connect patients with primary care providers, urgent care centers, Health Homes and social service providers. In addition, ED providers often lack the knowledge and time to connect patients with social service agencies and the Parachute NYC program. To mitigate these risks, BPHC will expand the hours of the CMO's existing Clinical Navigator program to better account for individuals who arrive at the ED and need support services during "off hours." BPHC is also developing a web-based directory of preferred CBO providers that will provide a comprehensive source of information on the scope of social services provided across the PPS.
(4) IT challenges across providers present additional barriers to ED triage and care coordination efforts. Many of the alternatives to the ED, including urgent care centers, Parachute NYC, PCPs, and CBOs do not have EMR data sharing capabilities and are not connected to the Bronx RHIO. Without these capabilities, patient information is not accessible at the point of care and cannot be shared electronically with patients' existing PCPs. Based on strategies developed by the PPS's IT planning team, during DY 1 and 2, BPHC will implement common assessment and risk stratification tools; make a care planning application accessible to all providers with whom the patient is engaged; promote greater adoption and use of EHRs and HIE among providers; and utilize a patient portal.

IPQR Module 2.b.iii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Patient Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q3 should include patients previously reported in DY1 Q2 plus new patients engaged in DY1 Q3. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Establish ED care triage program for at-risk populations	Key stakeholders have been identified and regular ED care triage implementation work group meetings are in place. The first official meeting is 10/29 but stakeholders have been identified, engaged, and briefed. Drafts of job descriptions from current ED navigation program have been provided by our contractor (Montefiore Care Management Organization (CMO)), and they will be edited/finalized by ED implementation work group and Workforce Subcommittee. Guidelines and assessment tools will be developed as part of implementation work group. Milestone is on track for completion.
Participating EDs will establish partnerships to community primary care providers with an emphasis on those that are PCMHs and have open access scheduling. a. Achieve NCQA 2014 Level 3 Medical Home standards or NYS Advanced Primary Care Model standards by the end of DSRIP Year 3. b. Develop process and procedures to establish connectivity between the emergency department and community primary care providers. c. Ensure real time notification to a Health Home care manager as applicable	PCMH consultants, hired by BPHC, are conducting site-specific gap analyses with BPHC PCPs and formulating a strategy for their achievement of PCMH 2014 Level 3 certification and Meaningful Use. This work includes assessing current EHR capabilities/standards at the sites and formulating a plan to meet Meaningful use and PCMH Level 3 standards by the end of DY3, with the support of the CSO. Milestone is on track for completion. To ensure the development of an effective encounter notification system, the CSO is working to establish RHIO/SHIN-NY functionalities and a Care Coordination Care Management (CCMS) platform to which both Health Homes and Emergency Departments will be connected. Additional detail is provided in the narrative section of Milestone 5. Milestone is on track for completion.
For patients presenting with minor illnesses who do not have a primary care provider: a. Patient navigators will assist the presenting patient to receive an immediate appointment with a primary care provider, after required medical screening examination, to validate a non-emergency need. b. Patient navigator will assist the patient with identifying and accessing needed community support resources. c. Patient navigator will assist the member in receiving a timely appointment with that provider's office (for patients with a primary care provider).	
Established protocols allowing ED and first responders - under supervision of the ED practitioners - to transport patients with non-acute disorders to alternate care sites including the PCMH to receive more appropriate level of care. (This requirement is optional.)	
Use EHRs and other technical platforms to track all patients engaged in the project.	BPHC is engaged in high level discussions with the Bronx RHIO to determine capabilities and negotiate terms. There is a regular weekly meeting between stakeholders from the Bronx RHIO and BPHC to formulate the strategy for use and implementation of the RHIO and SHIN-NY. Additionally, use of the RHIO and SHIN-NY is one of the technology components/tools which are being incorporated into the patient flow section of the Clinical Operations Plan. Through the gap analyses, current registry and care management practices will be examined to determine what support may be needed to adopt EHR and other technical platforms coordinated by BPHC. The ED Care Triage / Care Transitions Workgroup will contribute to defining population health management requirements for patient engagement and strategies for tracking through the RHIO and/or Care Coordination Management Solution (CCMS) platform. This information will be relevant to the development of the CCMS platform and the patient registries to be developed through Acupera, which will be used in care planning and referral tracking. Patient consent to share information across practices will be a critical component for the success of this project. Milestone is

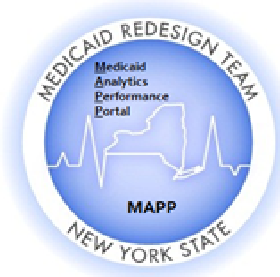
IPQR Module 2.b.iii.5 - IA Monitoring

Instructions :



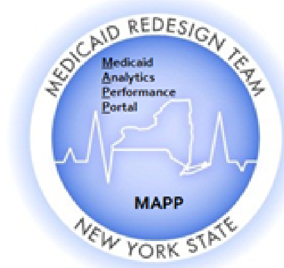
Project 2.b.iv – Care transitions intervention model to reduce 30 day readmissions for chronic health conditions

IPQR Module 2.b.iv.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Hospitals often fail to link patients post discharge to the home-based services & patient self-management programs needed to meet DSRIP's targeted reduction in 30-day readmissions. PPS will enhance & exp& the Care Management Resource Unit (CMRU) at Montefiore as needed & assist SBH in establishing a CMRU-like function to exp& access & linkages to care management resources & social services to help patients stay out of the hospital. These efforts will be bolstered by PPS policies & procedures that will require follow up for a 30-day period post discharge, as well as culturally & linguistically appropriate education materials. PPS will assess the need for more medically complex units in skilled nursing facilities (SNFs) & additional SNF staff training to prevent frequent patient bounce back.
There is often inadequate coordination & communication between hospitals, care transition nurses, Health Home (HH) care managers, physicians, & home health care agencies that are key to effective care transition services & appropriate "hand offs" among providers. In addition, hospital staff do not always recognize the value of CBOs in managing care transitions. Furthermore, economic, cultural, & linguistic barriers contribute to challenges in accessing the healthcare system, non-compliance with discharge regiments, & high readmission rates. To mitigate these risks, members of BPHC care teams will be able to access a web-based care planning tool & communicate easily with one another. PPS will support a communication plan to make care team members aware of the value of the tool in patients' transitions to care management through a SNF, HH, CBO, or other PPS provider. BPHC & Montefiore CMO will develop training & tools to address cultural competency, language barriers, & detail the elements of the care transitions model & roles of each care transition team member, including hospital-based staff, HH care managers, & CBOs providing social services, with particular attention to homeless individuals. Unstable housing/BH/SUD may impact readmissions; CBO partners will be actively engaged to assist in mitigating these risks.
Recruiting & training care management staff, particularly Spanish speaking staff with experience & training working with behavioral health patients presents a challenge to care coordination & readmission reduction efforts. According to the CNA, lack of funding & low salaries have made such hiring difficult. PPS will work with local community colleges, CBOs, 1199 training fund & NYSNA to help recruit & train a pipeline of care management staff & offer competitive salaries, flexible hours, & job sharing, as feasible, to improve recruitment & retention. PPS will work with workforce partners to train staff on the Critical Time Intervention to help address current gaps in identifying & treating behavioral health needs.
Existing policies & procedures for early notification of planned discharges differ among hospitals. From interviews with hospital staff, we know that HH care managers are not always notified when their patients are being discharged (if they have consents), particularly if they are discharged earlier than expected or from a hospital not subscribed to RHIO alerts. PPS will require hospitals PCPs to have RHIO connectivity & use subscriptions/alerts & will establish protocols requiring notification of discharges to care team members within a specified time period. Protocols will also establish an early notification system to ensure patients who meet program criteria have a comprehensive care transition plan completed no later than the day prior to the projected discharge. IT resource gaps will be addressed by CSO, building on existing & adding new IT capabilities, including a care plan & management platform, patient registries, direct messaging, patient risk stratification, standardized e-discharge summaries, & expanded HIE.



IPQR Module 2.b.iv.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Patient Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q3 should include patients previously reported in DY1 Q2 plus new patients engaged in DY1 Q3. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
100% Actively Engaged By	Expected Patient Engagement

Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.										
Task Standardized protocols are in place to manage overall population health and perform as an integrated clinical team are in place.										
Task Engage partners, including health homes (HH), to promote project understanding and partner alignment.										
Task Identify key stakeholders and initiate Care Transitions (CT) work group										
Task Conduct preliminary site visits to participating in-patient settings										
Task Orient hospital staff to the project										
Task Develop job description and staffing plan, in consultation with the Workforce Subcommittee										
Task Map comprehensive list of care and social services used by patients in the home or other non-medical setting										
Task Develop criteria for identifying and targeting patients most at risk for readmission, to facilitate the creation of patient registries and alerts										
Task Identify electronic patient stratification tool or algorithm to identify the 'at risk' population										
Task Establish workflow triage model with input from CT work group and participating site-specific implementation teams										
Task Establish plan for data exchange and systems for documenting CT program activities across the PPS										
Task Develop guidelines and assessment template/tools for the determination of HH and CT eligibility by CT team										
Task Develop guidelines and assessment template/tools for assisting patient in selecting a PCP										
Task Develop guidelines and assessment template/tools for scheduling follow-up PCP appointment, specialty care, CBO care, and/or a medical visit in a non-traditional setting (e.g. house call, telehealth)

Task Develop guidelines and assessment template/tools to be used in identifying patient's need for social supports and the process of referral to CBOs										
Task Develop standard procedures for notifying and sharing information with PCP / HH care manager / or other provider, as needed										
Task Develop standard procedures for referral to behavioral health support services for eligible patients										
Task Finalize compilation of all documentation into a Clinical Operations Plan (COP) for CT intervention										
Task Finalize budget for CT intervention										
Task Submit elements of COP to Quality and Care Innovation Sub-Committee (QCIS) for approval										
Task Develop training curriculum for CT staff using evidence-based care management principles and project specific procedures and tools. Training curriculum will emphasize cultural competence and health literacy										
Task Convene representative group of PPS members to form CT work group, including hospitals, BH and SUD SMEs to review Critical Time Intervention strategies and to create workplan.										
Task Define the population to be targeted by Critical Time Intervention strategies										
Task In conjunction with the Workforce subcommittee, define a Critical Time Intervention staffing model, to address the needs of the target population including staff qualifications, roles, functions, and panel size of team members										
Task Develop financial model to cost out Critical Time Intervention team										
Task Develop and document the COP to define the elements of the Critical Time Intervention program including the roles of PCPs, BH specialists, HHs, HIE and technology requirements, and evidence-based guidelines										
Task Working with Workforce Subcommittee, design training and

recruitment strategy for Critical Time Intervention staffing										
Task Develop Critical Time Intervention implementation budget										
Task Submit elements of Critical Time Intervention COP to QCIS for approval										
Task Prepare/disseminate gap analysis tool based on COP to participating providers to determine Critical Time Intervention resource needs against project plan and care management team staffing model										
Task Complete assessment of Critical Time Intervention staffing needs across the PPS in conjunction with the Workforce Subcommittee										
Task Develop a registry of patients to be targeted for intervention										
Task Establish technology interfaces to ensure frequent automated updates of registry data										
Task Implement CCMS and/or other systems and services with patient registries and other features required for PHM										
Task Recruit and hire needed CT staff										
Task Train CT staff and their supervisors										
Task Identify implementation teams for Critical Time Intervention										
Task Launch recruitment and training programs with Critical Time Intervention participating providers										
Task Establish mechanisms for feedback and monitoring for Continuous Quality Improvement (CQI)										
Task CT staff implement Care Transitions interventions, using project-specific templates, tools and procedures										
Task CT staff conduct telephonic follow-up with patient and PCP/HH/BH/other support service to ensure access to care and all follow up appointments were completed.										
Task Modify COP procedures to reflect lessons learned, in conjunction with task force

Milestone #2 Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.										
Task A payment strategy for the transition of care services is developed in concert with Medicaid Managed Care Plans and Health Homes.										
Task Coordination of care strategies focused on care transition are in place, in concert with Medicaid Managed Care groups and Health Homes.										
Task PPS has protocol and process in place to identify Health-Home eligible patients and link them to services as required under ACA.										
Task Meet with payers to identify triggers and processes for payer care coordination and chronic care services to ensure coordination and prevent gaps in care and/or redundant services, as part of a value-based payment strategy, outlined below.										
Task Develop partnership agreements with payers affirming coverage and coordination of service benefits. Include HHs in the development of this payment strategy.										
Task Review final State value-based payment roadmap and PPS value-based payment plan										
Task Identify Medicaid MCOs engaged with our attributed patients and actively engage them in developing new and strengthening existing value-based payment arrangements through a structured stakeholder engagement process.										
Task Establish partner value-based payment reporting requirements and procedures to enable ongoing monitoring of value-based payments and care transitions.										
Task Develop detailed analysis of PPS partners' existing value-based payment arrangements with Medicaid MCOs and other payers by reviewing claims-level data, with attention to HHs										
Task Engage MCOs in defining PPS MCO contracting strategy and organizational requirements necessary to support the development of contracts with Medicaid MCOs										
Task Engage PPS partners, especially HHs, to assist in defining PPS

MCO contracting strategy and organizational requirements necessary to support the development of contracts with Medicaid MCOs										
Task Develop or contract with an organizational structure (e.g. HH) or multiple organizational structures to support contracting with Medicaid MCOs and other payers as an integrated system										
Task Develop value-based payment arrangements for presentation to Medicaid MCOs and other payers										
Task Develop PPS plan, overseen by Finance and Sustainability Sub-committee, to achieve 90% value based payments by DY5 and present to the Executive Committee for review and signoff										
Task PPS has agreement in place with MCOs and HHs related to coordination of CT intervention for populations at-risk for re-admission										
Task Monitor use of assessment tool to identify HH-eligible patients										
Task Ensure eligibility is noted in patient's EHR										
Task Monitor rates of referrals to HH services based on eligibility										
Milestone #3 Ensure required social services participate in the project.										
Task Required network social services, including medically tailored home food services, are provided in care transitions.										
Task Develop a web-based directory of preferred CBO/social service providers, including medically tailored home food services, that will provide a comprehensive source of information on the scope of social services provided across the PPS.										
Task Analyze Community Needs Assessment data, Medicaid data base/MAPP, and PPS partner data for 30 day hospital readmissions over the past 12 months										
Task Identify and catalog available community resources, using the CNA as a starting point to create a Community Resources Database										
Task Survey participating providers to identify gaps in services and identify additional potential community organization partners

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
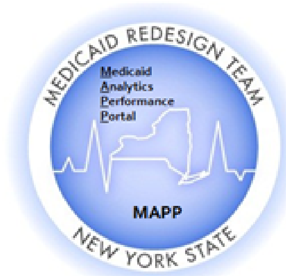
Task Develop communications plan between in-patient and CT staff										
Task Monitor early notification of planned discharge and modify procedures as necessary, using CQI										
Task Provide pre-discharge visits that educate patients and caregivers about their conditions and how to manage them, review discharge summaries and care plans, and perform medication reconciliation										
Task Ensure hospital policies and procedures allow access by care managers for patients identified for CT intervention										
Milestone #5 Protocols will include care record transitions with timely updates provided to the members' providers, particularly primary care provider.										
Task Policies and procedures are in place for including care transition plans in patient medical record and ensuring medical record is updated in interoperable EHR or updated in primary care provider record.										
Task Ensure that transition plans include the following elements: a. Flag patients at if high-risk for readmission b. Medication reconciliation c. Methods to identify and respond to worsening condition d. Interdisciplinary team approach e. Engaged primary provider f. Information dissemination										
Task Develop and implement policies and procedures for including care transitions plans in the patient's medical record										
Task Identify and document required clinical and care management protocols for priority programs, projects and interventions, based on Community Needs Assessment, clinical planning to-date and further analysis of attributed patient population, using MAPP and PPS partner patient-level data										
Task Define partner and workforce roles in delivering care based on protocols and planned interventions in priority projects, including expectations for how interventions will be logged, tracked and reported										
Task Deploy systems to improve and promote effective care										

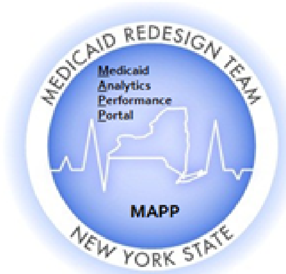


New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
transitions, include protocols for tracking and follow-up										
Task Operationalize partner and workforce roles by providing gap analysis and appropriate training to clinicians and care management staff (including licensed care managers, care coordinators, patient navigators/community health workers, medical assistants and front-office staff)										
Task Establish data collection, survey and reporting mechanisms to enable BPHC monitoring to ensure that patients are receiving appropriate health care and community support in priority projects, based on needs identified in prior planning activities										
Task Review process for rapid cycle evaluation and continuous improvement of data collection, survey and reporting methods based on priority project experience and modify process as needed to ensure patients receive appropriate health care and community support										
Task Monitor record of transition plan in the interoperable EHR, as well as whether PCP has accessed the plan (if feasible)										
Task Convene providers from different care settings to define specific information and clinical data to include in the care transition record shared between sending and receiving providers, as patient goes from one care setting to another. Resources designed by the National Transition of Care Coalition will be considered.										
Milestone #6 Ensure that a 30-day transition of care period is established.										
Task Policies and procedures reflect the requirement that 30 day transition of care period is implemented and utilized.										
Task Establish a process and structure to conduct a detailed review of all discharges leading to readmission within 30 days.										
Task Use the analysis and the ongoing review data to inform services to involve in this project.										
Task Work with partners to define how to document and communicate 30-day transition period of care.										
Task Incorporate the 30 day care transition period into payer agreements.										



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Milestone #7 Use EHRs and other technical platforms to track all patients engaged in the project.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task Define population health management (PHM) requirements, establish PHM function and recruit or contract with partner for PHM staff										
Task Perform current state assessment of E.H.R. capabilities.										
Task Perform gap analysis and identify priories to achieving integration of patient record.										
Task Define business requirements and data elements for patient registry to stratify and track all patients engaged in this project.										
Task Recommend registry business requirements and data elements to governance committees for review and approval (Quality and Care Innovation Subcommittee, Information Technology Subcommittee and Executive Committee)										
Task Engage IT Subcommittee to identify technology and resource requirements for registry, including technical platform for hosting registry.										
Task Create budget to build registry and acquire necessary resources										
Task Assess and acquire or contract for care coordination management solution (CCMS) and other systems and services as required to support PHM and registries										
Task Develop project implementation and testing plan for building registry as required for PHM, including technical support, ensure frequent automated updates of registry data										
Task Develop training plan and curriculum to deploy risk assessment tool, registry and CCMS tool for providers and care managers, emphasizing use of registries and CCMS to increase care coordination and patient engagement with primary care										
Task Execute registry testing plan and training program for providers and care managers on systems use and on how to identify targeted patients and track those who are actively engaged for

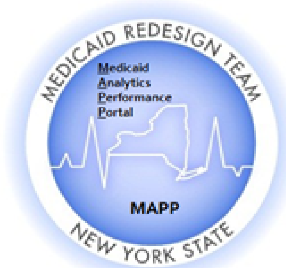
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
milestone reporting										
Task Issue CCMS user credentials and train designated/delegated PPS partner workforce in use of the coordinated/ integrated solution. Disseminate standardized IT protocols and data security requirements across the system.										
Task Launch registry and monitor its use and performance, evaluate success of patient tracking, and participating provider utilization patterns, , with an emphasis on tracking patient engagement with primary care										

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #1 Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.										
Task Standardized protocols are in place to manage overall population health and perform as an integrated clinical team are in place.										
Task Engage partners, including health homes (HH), to promote project understanding and partner alignment.										
Task Identify key stakeholders and initiate Care Transitions (CT) work group										
Task Conduct preliminary site visits to participating in-patient settings										
Task Orient hospital staff to the project										
Task Develop job description and staffing plan, in consultation with the Workforce Subcommittee										
Task Map comprehensive list of care and social services used by patients in the home or other non-medical setting										
Task Develop criteria for identifying and targeting patients most at risk for readmission, to facilitate the creation of patient registries and alerts										
Task Identify electronic patient stratification tool or algorithm to identify the 'at risk' population										

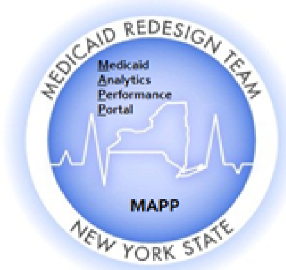


New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task Establish workflow triage model with input from CT work group and participating site-specific implementation teams										
Task Establish plan for data exchange and systems for documenting CT program activities across the PPS										
Task Develop guidelines and assessment template/tools for the determination of HH and CT eligibility by CT team										
Task Develop guidelines and assessment template/tools for assisting patient in selecting a PCP										
Task Develop guidelines and assessment template/tools for scheduling follow-up PCP appointment, specialty care, CBO care, and/or a medical visit in a non-traditional setting (e.g. house call, telehealth)										
Task Develop guidelines and assessment template/tools to be used in identifying patient's need for social supports and the process of referral to CBOs										
Task Develop standard procedures for notifying and sharing information with PCP / HH care manager / or other provider, as needed										
Task Develop standard procedures for referral to behavioral health support services for eligible patients										
Task Finalize compilation of all documentation into a Clinical Operations Plan (COP) for CT intervention										
Task Finalize budget for CT intervention										
Task Submit elements of COP to Quality and Care Innovation Sub-Committee (QCIS) for approval										
Task Develop training curriculum for CT staff using evidence-based care management principles and project specific procedures and tools. Training curriculum will emphasize cultural competence and health literacy										
Task Convene representative group of PPS members to form CT work group, including hospitals, BH and SUD SMEs to review Critical Time Intervention strategies and to create workplan.										

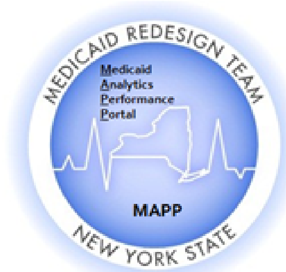


New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task Define the population to be targeted by Critical Time Intervention strategies										
Task In conjunction with the Workforce subcommittee, define a Critical Time Intervention staffing model, to address the needs of the target population including staff qualifications, roles, functions, and panel size of team members										
Task Develop financial model to cost out Critical Time Intervention team										
Task Develop and document the COP to define the elements of the Critical Time Intervention program including the roles of PCPs, BH specialists, HHs, HIE and technology requirements, and evidence-based guidelines										
Task Working with Workforce Subcommittee, design training and recruitment strategy for Critical Time Intervention staffing										
Task Develop Critical Time Intervention implementation budget										
Task Submit elements of Critical Time Intervention COP to QCIS for approval										
Task Prepare/disseminate gap analysis tool based on COP to participating providers to determine Critical Time Intervention resource needs against project plan and care management team staffing model										
Task Complete assessment of Critical Time Intervention staffing needs across the PPS in conjunction with the Workforce Subcommittee										
Task Develop a registry of patients to be targeted for intervention										
Task Establish technology interfaces to ensure frequent automated updates of registry data										
Task Implement CCMS and/or other systems and services with patient registries and other features required for PHM										
Task Recruit and hire needed CT staff										
Task Train CT staff and their supervisors										
Task Identify implementation teams for Critical Time Intervention										

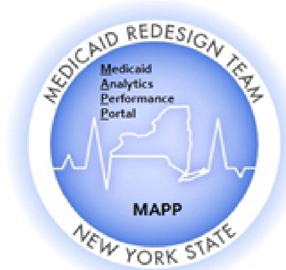


New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task Launch recruitment and training programs with Critical Time Intervention participating providers										
Task Establish mechanisms for feedback and monitoring for Continuous Quality Improvement (CQI)										
Task CT staff implement Care Transitions interventions, using project-specific templates, tools and procedures										
Task CT staff conduct telephonic follow-up with patient and PCP/HH/BH/other support service to ensure access to care and all follow up appointments were completed.										
Task Modify COP procedures to reflect lessons learned, in conjunction with task force										
Milestone #2 Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.										
Task A payment strategy for the transition of care services is developed in concert with Medicaid Managed Care Plans and Health Homes.										
Task Coordination of care strategies focused on care transition are in place, in concert with Medicaid Managed Care groups and Health Homes.										
Task PPS has protocol and process in place to identify Health-Home eligible patients and link them to services as required under ACA.										
Task Meet with payers to identify triggers and processes for payer care coordination and chronic care services to ensure coordination and prevent gaps in care and/or redundant services, as part of a value-based payment strategy, outlined below.										
Task Develop partnership agreements with payers affirming coverage and coordination of service benefits. Include HHs in the development of this payment strategy.										
Task Review final State value-based payment roadmap and PPS value-based payment plan										
Task Identify Medicaid MCOs engaged with our attributed patients and actively engage them in developing new and strengthening										



New York State Department Of Health
Delivery System Reform Incentive Payment Project

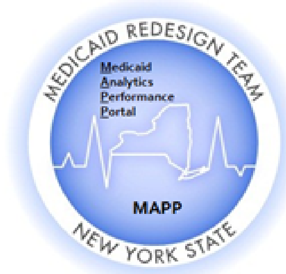
Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
existing value-based payment arrangements through a structured stakeholder engagement process.										
Task Establish partner value-based payment reporting requirements and procedures to enable ongoing monitoring of value-based payments and care transitions.										
Task Develop detailed analysis of PPS partners' existing value-based payment arrangements with Medicaid MCOs and other payers by reviewing claims-level data, with attention to HHs										
Task Engage MCOs in defining PPS MCO contracting strategy and organizational requirements necessary to support the development of contracts with Medicaid MCOs										
Task Engage PPS partners, especially HHs, to assist in defining PPS MCO contracting strategy and organizational requirements necessary to support the development of contracts with Medicaid MCOs										
Task Develop or contract with an organizational structure (e.g. HH) or multiple organizational structures to support contracting with Medicaid MCOs and other payers as an integrated system										
Task Develop value-based payment arrangements for presentation to Medicaid MCOs and other payers										
Task Develop PPS plan, overseen by Finance and Sustainability Sub-committee, to achieve 90% value based payments by DY5 and present to the Executive Committee for review and signoff										
Task PPS has agreement in place with MCOs and HHs related to coordination of CT intervention for populations at-risk for re-admission										
Task Monitor use of assessment tool to identify HH-eligible patients										
Task Ensure eligibility is noted in patient's EHR										
Task Monitor rates of referrals to HH services based on eligibility										
Milestone #3 Ensure required social services participate in the project.										
Task Required network social services, including medically tailored home food services, are provided in care transitions.										

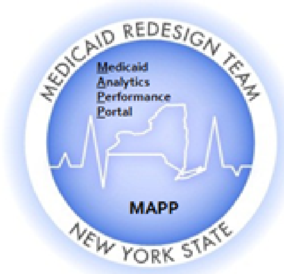


New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task Develop a web-based directory of preferred CBO/social service providers, including medically tailored home food services, that will provide a comprehensive source of information on the scope of social services provided across the PPS.										
Task Analyze Community Needs Assessment data, Medicaid data base/MAPP, and PPS partner data for 30 day hospital readmissions over the past 12 months										
Task Identify and catalog available community resources, using the CNA as a starting point to create a Community Resources Database										
Task Survey participating providers to identify gaps in services and identify additional potential community organization partners										
Task Define processes for referral, and access to information among providers, and feedback processes to the practices electronically with interim manual processes as needed in conjunction with IT subcommittee										
Task Establish and document referral and follow-up procedures for the sites, with a mechanism for sites to audit adherence and report to QCIS										
Task Identify community organizations for inclusion in the initial iteration of the Community Resource Database, sign agreements with with community based organizations and establish process to facilitate feedback to and from community organizations										
Task Perform regular checks of Community Resource Database to ensure data is up to date and accurate and to identify additional resources to consider including										
Task Conduct periodic meetings/learning collaboratives with community organization partners to gather feedback and share best practices										
Task Establish the schedule and materials for periodic staff training on the warm transfer and referral tracking										
Milestone #4 Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services.										



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

management solution (CCMS) and other systems and services as required to support PHM and registries										
Task Develop project implementation and testing plan for building registry as required for PHM, including technical support, ensure frequent automated updates of registry data										
Task Develop training plan and curriculum to deploy risk assessment tool, registry and CCMS tool for providers and care managers, emphasizing use of registries and CCMS to increase care coordination and patient engagement with primary care										
Task Execute registry testing plan and training program for providers and care managers on systems use and on how to identify targeted patients and track those who are actively engaged for milestone reporting										
Task Issue CCMS user credentials and train designated/delegated PPS partner workforce in use of the coordinated/ integrated solution. Disseminate standardized IT protocols and data security requirements across the system.										
Task Launch registry and monitor its use and performance, evaluate success of patient tracking, and participating provider utilization patterns, , with an emphasis on tracking patient engagement with primary care										

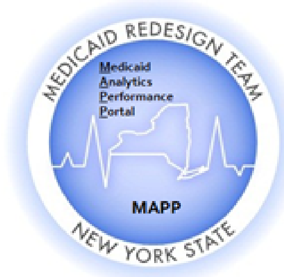
Prescribed Milestones Current File Uploads

Milestone Name	User ID	File Type	File Name	Description	Upload Date

No Records Found

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.	BPHC is actively engaged in working with its vendor organization—Montefiore Care Management Organization (CMO)—to develop a staff training plan, as well as policies and procedures for the expansion of the 30-day care transitions / care coordination program. Together with the vendor, BPHC has been orienting hospital staff at SBH Health System to replication of the Montefiore CMO Care Management Resource Unit (CMRU). The PPS has formed a Care Transitions (CT) rapid deployment collaborative/implementation work group (IWG), which will meet roughly bi-monthly starting on 10/29/15 to provide input and technical assistance to the expansion of the 30-Day Care Transitions model and act as a clinical quality council. Milestone is on track for completion.
Engage with the Medicaid Managed Care Organizations and Health	The Value Based Payment (VBP) Roadmap document has been reviewed and discussed with key members of PPS directly responsible for development of



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.	CT program. The Finance and Sustainability Committee is also in the process of identifying Managed Care Organization (MCOs) who have VBP in place that serve the PPS attributed population. The Committee is working with key stakeholder Chief Financial Officers to engage MCOs to expand VBP, per the vision described in the Roadmap document. Milestone is on track for completion.
Ensure required social services participate in the project.	PPS-wide surveys and various activities undertaken with Community Based Organizations (CBOs) as part of the BPHC community engagement strategy and community engagement plan development. In coordination with these partners, the PPS is creating a directory of available services that will be searchable by zip code and service to be shared throughout the network. Systems for referrals and care coordination are being identified and protocols for "closed loop referral processes" are being written as part of the Clinical Operations Plan. BPHC is developing relationship and moving towards establishing formal partnerships with Health Home Care Management Agencies and Skilled Nursing Facilities to whom many transitioning patients will likely be referred. Community-based services for mental health and substance abuse patients have been engaged to provide specific transition assistance and more formal partnerships are in progress. In particular, in an effort to provide assistance to homeless patients and other at-risk patients in need of longer-term transition assistance due to specific social factors, vendors are being sought for training and hiring case workers using the Critical Time Intervention (CTI) model. Milestone is on track for completion.
Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services.	
Protocols will include care record transitions with timely updates provided to the members' providers, particularly primary care provider.	Through the development of the Clinical Operations Plan policies and protocols for the care transitions plan are being developed, including making connection to the primary care provider, Health Home and any other referrals required to meet the patient's needs and avoid re-admission. These plans will be shared via the Care Coordination Care Management system currently under development and documented in the patient's medical record. As described in the narrative for Milestone 3, the Critical Time Intervention (CTI) model is being evaluated for inclusion as an evidence-based practice and to be implemented as a community-based intervention among a high-risk severely and persistently mentally ill (SPMI) and/or homeless, SUD and recently decarcerated population. Criteria for CTI intervention is being finalized and will be discussed with the Implementation Workgroup. Attempts are being made to size the population for which this intervention would be appropriate to properly staff and train the appropriate number of staff to deliver the intervention in the community as well as leverage existing community resources that run CTI programs within our PPS. The Implementation Workgroup will contribute to the development of metrics for rapid cycle evaluation and will act as a clinical quality council. Milestone is on track for completion.
Ensure that a 30-day transition of care period is established.	
Use EHRs and other technical platforms to track all patients engaged in the project.	BPHC is engaged in high level discussions with the Bronx RHIO to determine capabilities and negotiate terms. There is a regular weekly meeting between stakeholders from the Bronx RHIO and BPHC to formulate the strategy for use and implementation of the RHIO and SHIN-NY. Additionally, use of the RHIO and SHIN-NY is one of the technology components/tools which are being incorporated into the patient flow section of the Clinical Operations Plan. Through the gap analyses, current registry and care management practices will be examined to determine what support may be needed to adopt EHR and other technical platforms coordinated by BPHC. The ED Care Triage / Care Transitions Workgroup will contribute to defining population health management requirements for patient engagement and strategies for tracking through the RHIO and/or Care Coordination Management Solution (CCMS) platform. This information will be relevant to the development of the CCMS platform and the patient registries to be developed through Acupera, which will be used in care planning and referral tracking. Patient consent to share information across practices will be a critical component for the success of this project. Milestone is on track for completion.

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

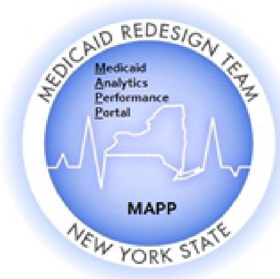
IPQR Module 2.b.iv.5 - IA Monitoring

Instructions :



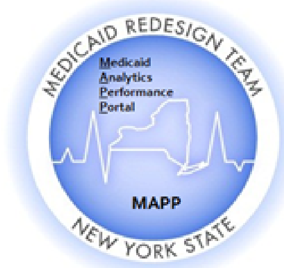
Project 3.a.i – Integration of primary care and behavioral health services

IPQR Module 3.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

This project marks a significant cultural shift in how care is delivered to and experienced by patients. Provider buy-in will be critical for successful implementation. To accomplish this transition BPHC will: (1) provide required project-specific training and technical assistance on the IMPACT model processes and protocols to primary care physicians (PCPs) and their care teams and secure an experienced training consultant to assist these sites in adopting the model over a 6-month training period. Training and technical assistance will address how PCPs, care managers, and psychiatrists can work effectively as a team. In addition, the training and technical assistance will place an emphasis on providing culturally competent care for depression, including an understanding of cultural barriers to care and health literacy and stigma among the patient population; (2) provide technical assistance for those organizations seeking to introduce PC into BH sites or BH into PC sites. BPHC will pair organizations that have successfully co-located PC and BH with those who are newly implementing these interventions in order to provide technical assistance and coaching to PC and BH staff. BPHC will also seek ways to incentivize physician participation: e.g., offering access to care management services and connectivity through BPHC's care planning tool to minimize the time burden of implementing the new evidence-based standards. Technical assistance will include an emphasis on providing culturally competent care for BH issues; (3) address regulatory and reimbursement barriers currently in place that discourage effectively integrating PC and BH through co-location due to cost, paperwork, and length of approval process. BPHC requested and received the following waivers from the State that will facilitate implementation of this project: Article 28 (SDOH) facilities may provide mental health or substance abuse services so long as those services comprise no more than 49% of a facility's annual visits and the facility complies with various provisions of the new integrated services regulations; Article 31 (OMH) and 32 (OASAS) facilities may provide physical health services so long as those services comprise no more than 49% of a facility's annual visits and the facility complies with various provisions of the new integrated services regulations; Article 28 and Article 32 facilities may treat their patients in the home, but there is no system yet for them to be reimbursed for such visits. (Article 31 facilities cannot provide care in their patients' homes.). However, SDOH, OMH, and OASAS have yet to grant any waivers that would allow two different providers licensed by different agencies to share space (for example, a common waiting room used by an Article 28 and Article 31 facility). BPHC will continue to advocate to the State on these waivers to ensure that we meet project goals and milestones; and (4) identify solutions to the shortage of psychiatrists in our PPS, as noted by our CNA. BPHC will explore use of tele-psychiatry to increase the PPS's psychiatric capacity as implementation begins. Staff recruitment efforts will focus on identifying additional psychiatrists, but the PPS will also launch a recruitment program targeted towards attracting and retaining nurses, licensed clinical social workers (LCSWs), psychologists, and psychiatric NPs and PAs to perform the roles of therapist and depression care managers at participating sites. We will also consider recruiting for licensed master social workers (LMSWs) with the expectation that they pass the LCSW exam within a year of hire, and contracting with 1199 Training and Employment Funds to provide training. BPHC will also reach out to other PPSs in the region to collaborate on workforce issues that may impact recruitment strategies, including compensation.



IPQR Module 3.a.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Patient Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q3 should include patients previously reported in DY1 Q2 plus new patients engaged in DY1 Q3. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
100% Actively Engaged By	Expected Patient Engagement
DY3,Q4	91,800

Patient Update		% of Semi-Annual Commitment To-Date	Semi-Annual Variance of Projected to Actual	% of Total Actively Engaged Patients To-Date
DY1, Q1	DY1,Q2			
0	0		0	0.00%

IPQR Module 3.a.i.3 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement.
Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Project Model Name	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Co-locate behavioral health services at primary care practice sites. All participating primary care practices must meet 2014 NCQA level 3 PCMH or Advance Primary Care Model standards by DY 3.	Model 1	Project	N/A	In Progress	04/01/2015	03/31/2018	04/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task All practices meet NCQA 2014 Level 3 PCMH and/or APCM standards by the end of DY3.		Provider	Practitioner - Primary Care Provider (PCP)	In Progress	04/01/2015	03/31/2018	04/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task Behavioral health services are co-located within PCMH/APC practices and are available.		Provider	Mental Health	In Progress	04/01/2015	03/31/2018	04/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task Finalize contract with vendor		Project		Completed	04/01/2015	09/30/2015	04/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task Finalize contracts with Primary Care and Behavioral Health Providers engaged in project.		Project		In Progress	07/01/2015	12/31/2015	09/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task Assess current state, including physical health services , current PCMH level if applicable, IT infrastructure, interoperability, staffing, etc.		Project		In Progress	08/01/2015	12/31/2015	08/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task Assess eligible participating PCP PCMH recognition status and opportunity to expand access to primary care based on PCMH-enabled practices		Project		In Progress	04/01/2015	12/31/2015	04/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task Recruit or contract for PCMH practice certification resources as needed		Project		In Progress	05/01/2015	12/31/2015	05/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task Assess current state of PCPs engaged in project, including behavioral health service delivery capabilities, work flow, IT		Project		In Progress	08/01/2015	12/31/2015	08/01/2015	06/30/2016	06/30/2016	DY2 Q1

Project Requirements (Milestone/Task Name)	Project Model Name	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
infrastructure, interoperability, staffing, etc										
Task Develop best practice policies and procedures, by PCBH workgroup to be reviewed by the Quality & Care Innovation Sub-committee (QCIS)		Project		In Progress	07/01/2015	12/31/2015	09/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task Educate leadership within each organization participating in project of the benefits of co located behavioral health services within a primary care setting.		Project		Not Started	10/01/2015	03/31/2016	10/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task Perform gap analysis and identify key priorities to successful completion of co-located services.		Project		Not Started	09/30/2015	03/31/2016	10/01/2015	12/31/2016	12/31/2016	DY2 Q3
Task Establish BPHC program to educate on the benefits of, and encourage, track and support PCPs and facility based senior leadership in achieving PCMH 2014 Level 3 recognition, including potential use of incentive-based payments for achieving recognition		Project		Not Started	10/01/2015	06/30/2016	10/01/2015	04/15/2016	06/30/2016	DY2 Q1
Task Perform gap analysis by practice and identify key priorities		Project		Not Started	10/01/2015	06/30/2016	10/01/2015	12/31/2016	12/31/2016	DY2 Q3
Task Finalize strategy to support primary care physicians with achieving 2014 NCQA Level 3 PCMH certification by sub committees, including trainings and education.		Project		Not Started	10/01/2015	06/30/2016	10/01/2015	04/15/2016	06/30/2016	DY2 Q1
Task Develop mechanisms to monitor progress towards completion and sustainability of co-located services, evaluate barriers, and develop mechanisms for continuous quality improvement		Project		Not Started	12/01/2015	09/30/2016	01/01/2016	03/31/2017	03/31/2017	DY2 Q4
Task Begin actively encouraging, tracking and supporting partner efforts towards PCMH recognition		Project		Not Started	01/01/2016	12/31/2016	01/01/2016	11/30/2016	12/31/2016	DY2 Q3
Task Monitor progress with achieving 2014 NCQA level 3 PCMH certification, support provided by PPS as needed		Project		Not Started	01/01/2016	03/31/2018	01/01/2016	03/31/2018	03/31/2018	DY3 Q4
Task Monitor practice transformation sustainability after receiving 2014 NCQA level 3 PCMH certification, and provide support as needed		Project		Not Started	01/01/2016	03/31/2018	01/01/2016	03/31/2018	03/31/2018	DY3 Q4

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	Project Model Name	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Task Provide support, trainings, resources and education to participating providers as needed to ensure successful completion of co-located and integrated behavioral health services.		Project		Not Started	04/01/2015	03/31/2020	12/01/2015	03/31/2018	03/31/2018	DY3 Q4
Milestone #2 Develop collaborative evidence-based standards of care including medication management and care engagement process.	Model 1	Project	N/A	In Progress	07/01/2015	03/31/2017	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Regularly scheduled formal meetings are held to develop collaborative care practices.		Project		In Progress	04/01/2015	03/31/2020	07/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Coordinated evidence-based care protocols are in place, including medication management and care engagement processes.		Project		Not Started	04/01/2015	03/31/2020	12/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Establish regularly scheduled meetings with vendor and PCBH workgroup to choose evidence based guidelines and protocols including medication management, care engagement and processes for collaborative care meetings.		Project		In Progress	04/01/2015	03/31/2020	09/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task In collaboration with BPHC Workforce Sub-committee, assign roles and responsibilities for practice specific implementation of evidence based guidelines and protocols and action plans to engage PCPs with behavioral health specialists		Project		Not Started	04/01/2015	03/31/2020	12/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task Finalize collaborative care practices, reviewed and approved by the QCIS		Project		Not Started	04/01/2015	03/31/2020	12/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task Assess current participating providers practice models with vendors and PCBH workgroup. The PPS will begin working with approximately 60 sites and their staff, including administrators, providers, and care team staff.		Project		In Progress	04/01/2015	03/31/2020	09/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task Complete best practice care protocols draft, including those needed for specific conditions, for QCIS review		Project		Not Started	04/01/2015	03/31/2020	12/01/2015	06/30/2016	06/30/2016	DY2 Q1

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	Project Model Name	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Task Finalize PPS wide evidence- based protocols with approval by QCIS		Project		Not Started	04/01/2015	03/31/2020	12/31/2015	03/31/2016	03/31/2016	DY1 Q4
Task Perform Gap analysis to identify key priorities for participating providers to meet best practice standards		Project		In Progress	04/01/2015	03/31/2020	09/30/2015	12/31/2016	12/31/2016	DY2 Q3
Task Provide vendor and CSO support as needed for successful implementation of protocols.		Project		In Progress	04/01/2015	03/31/2020	09/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Finalize and implement evidence- based practice guidelines		Project		Not Started	04/01/2015	03/31/2020	12/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Finalize and implement evidence- based practice guidelines		Project		On Hold	04/01/2015	03/31/2020	04/01/2015	03/31/2020	03/31/2020	DY5 Q4
Task Develop mechanisms for evaluation, accountability, and continuous quality improvement		Project		Not Started	04/01/2015	03/31/2020	01/01/2016	03/31/2017	03/31/2017	DY2 Q4
Task Develop mechanisms for regular review of project-selected Evidence Based Guidelines (by project quality councils) to assure our PPS is utilizing the most up-to-date tools and that those upadated guidelines/protocols continue to be clinically integrated across the PPS		Project		Not Started	04/01/2015	03/31/2020	04/01/2016	03/31/2017	03/31/2017	DY2 Q4
Milestone #3 Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.	Model 1	Project	N/A	In Progress	04/01/2015	03/31/2020	09/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task Policies and procedures are in place to facilitate and document completion of screenings.		Project		In Progress	04/01/2015	03/31/2020	09/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task Screenings are documented in Electronic Health Record.		Project		In Progress	04/01/2015	03/31/2020	09/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task At least 90% of patients receive screenings at the established project sites (Screenings are defined as industry standard questionnaires such as PHQ-2 or 9 for those screening positive, SBIRT).		Project		In Progress	04/01/2015	03/31/2020	09/01/2015	03/31/2018	03/31/2018	DY3 Q4

Task Develop mechanisms for regular review of project-selected Evidence Based Guidelines (by project quality councils) to assure our PPS is utilizing the most up-to-date tools and that those upadated guidelines/protocols continue to be clinically integrated across the PPS										
Milestone #3 Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.										
Task Policies and procedures are in place to facilitate and document completion of screenings.										
Task Screenings are documented in Electronic Health Record.										
Task At least 90% of patients receive screenings at the established project sites (Screenings are defined as industry standard questionnaires such as PHQ-2 or 9 for those screening positive, SBIRT).										
Task Positive screenings result in "warm transfer" to behavioral health provider as measured by documentation in Electronic Health Record.	0	0	0	0	0	0	0	0	0	0
Task Assess participating providers current rates of patient assessments										
Task Educate leadership within each participating organization around benefits of providing preventative care screenings using industry standard questionnaires regularly.										
Task Assess participating providers current process for identifying unmet needs										
Task Finalize draft policies and procedures to facilitate and document behavioral health screenings by PCBH workgroup, and approval by QCIS										
Task Perform gap analysis,including provider capability for documenting screenings in EMR, and identify steps to meet standards.										
Task Provide education/trainings needed to ensure success in conjunction with Workforce Sub-committee

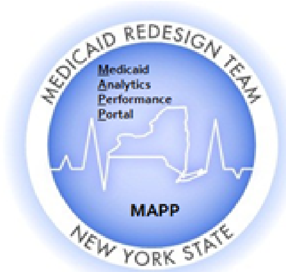
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task Finalize policy around timely documentation of screenings in the electronic health record.										
Task Develop process to monitor progress towards completing screenings on 90% of patient population using approved screenings										
Task Assess participating providers current procedures for patients who receive a positive screening, as well as for completion of referrals.										
Task Create and Finalize policies on implementing "warm transfers" for patients who have a positive screening.										
Task Provide education/training as needed to ensure successful implementation.										
Task Implement "warm transfer" policies and procedures, as well as instructions on appropriate documentation in the electronic health record.										
Task Monitor success and sustainability of implemented "warm transfer" protocols and engage sites in continuous quality improvement										
Task Monitor success and sustainability of implemented screening protocols										
Task Monitor success with timely and accurate documentation in the electronic health record.										
Task Monitor success towards completion of screenings on 90% of eligible patients engaged in project, engage sites with continuous quality improvement as needed to ensure success.										
Task Provide education and training as needed to achieve goal										
Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.										
Task EHR demonstrates integration of medical and behavioral health record within individual patient records.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task Define business requirements and data elements for patient registry to stratify and track all patients engaged in this project.										
Task Develop a project specific strategy for tracking patient engagement, employing PHM tools and processes outlined below.										
Task Define population health management (PHM) requirements, establish PHM function and recruit or contract with partner for PHM staff										
Task Perform current state assessment of E.H.R. capabilities										
Task Perform gap analysis and identify priories to achieving integration of patient record.										
Task Recommend registry business requirements and data elements to governance committees for review and approval (Quality and Care Innovation Subcommittee, Information Technology Subcommittee and Executive Committee)										
Task Engage IT Subcommittee to identify technology and resource requirements for registry, including technical platform for hosting registry.										
Task Create budget to build registry and acquire necessary resources										
Task Assess and acquire or contract for care coordination management solution (CCMS) and other systems and services as required to support PHM and registries										
Task Develop project implementation and testing plan for building registry as required for PHM, including technical support, ensure frequent automated updates of registry data										
Task Develop training plan and curriculum to deploy risk assessment tool, registry and CCMS tool for providers and care managers, emphasizing use of registries and CCMS to increase care coordination and patient engagement with primary care										
Task Execute registry testing plan and training program for providers and care managers on systems use and on how to identify targeted patients and track those who are actively engaged for milestone reporting.

encourage, track and support PCPs and facility based senior leadership in achieving PCMH 2014 Level 3 recognition, including potential use of incentive-based payments for achieving recognition										
Task Perform gap analysis by practice and identify key priorities.										
Task Finalize strategy to support primary care physicians with achieving 2014 NCQA Level 3 PCMH certification by sub committees, including trainings and education.										
Task Begin actively encouraging, tracking and supporting partner efforts towards PCMH recognition										
Task Develop best practice policies and procedures by PCBH workgroup, send for review and approval by QCIS										
Task Provide support, trainings, resources and education to participating providers as needed to ensure successful completion of co-located and integrated primary care services.										
Task Develop mechanisms to monitor progress towards completion and sustainability of co-located services, evaluate barriers, and develop mechanisms for continuous quality improvement										
Task Monitor progress with achieving 2014 NCQA level 3 PCMH certification, support provided by PPS as needed.										
Task Monitor practice transformation sustainability after receiving 2014 NCQA level 3 PCMH certification, and provide support as needed.										
Task Assess current state of BH practices engaged in project, including Primary care service delivery capabilities, (e.g.exam room structure) work flow, IT infrastructure, interoperability, staffing, etc.										
Milestone #6 Develop collaborative evidence-based standards of care including medication management and care engagement process.										
Task Regularly scheduled formal meetings are held to develop collaborative care practices.										
Task Coordinated evidence-based care protocols are in place, including a medication management and care engagement

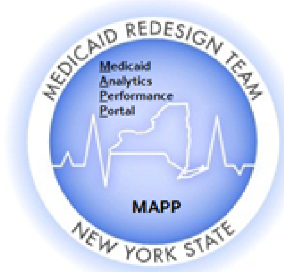
SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
process.										
Task Assess current participating providers practice models with vendors and PCBH workgroup										
Task In collaboration with BPHC Workforce Sub-committee, assign roles and responsibilities for practice specific implementation of evidence based guidelines and protocols and action plans to engage PCPs with behavioral health specialists										
Task Finalize PPS wide evidence- based protocols with approval by QCIS.										
Task Perform Gap analysis to identify key priorities for participating providers to meet best practice standards.										
Task Finalize and implement evidence- based practice guidelines.										
Task Establish regularly scheduled meetings with vendor and PCBH workgroup to choose evidence based guidelines and protocols including medication management, care engagement and processes for collaborative care meetings.										
Task Finalization of collaborative care practices, reviewed and approved by the QCIS										
Task Complete best practice care protocols draft, including those needed for specific conditions, for QCIS review										
Task Develop mechanisms for evaluation, accountability, and continuous quality improvement										
Task Develop mechanisms for regular review of project-selected Evidence Based Guidelines (by project quality councils) to assure our PPS is utilizing the most up-to-date tools and that those upadated guidelines/protocols continue to be clinically integrated across the PPS.										
Task Provide vendor and CSO support as needed for successful implementation of protocols.										
Milestone #7 Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.										



New York State Department Of Health
Delivery System Reform Incentive Payment Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task Screenings are conducted for all patients. Process workflows and operational protocols are in place to implement and document screenings.										
Task Screenings are documented in Electronic Health Record.										
Task At least 90% of patients receive screenings at the established project sites (Screenings are defined as industry standard questionnaires such as PHQ-2 or 9 for those screening positive, SBIRT).										
Task Positive screenings result in "warm transfer" to behavioral health provider as measured by documentation in Electronic Health Record.	0	0	0	0	0	0	0	0	0	0
Task Educate leadership within each participating organization around benefits of providing preventative care screenings using industry standard questionnaires regularly. Recognize that BH patients with conditions other than depression still require depression screening with industry standard questionnaires such as PHQ-2 or 9 for those screening positive, SBIRT. In this colocation model also educate around Primary Care preventive screenings including: age appropriate cancer screenings, alcohol, tobacco and substance use screenings, CVD and DM screenings, vaccinations, etc.										
Task Assess participating providers current process for identifying unmet physical needs of patients, The PPS will begin working with approximately 50 sites and their staff, including administrators, providers, and care team staff.										
Task Develop process to monitor progress towards completing industry standard questionnaires/screening (such as PHQ-2 or 9 for those screening positive, SBIRT) on 90% of patient population.										
Task Assess participating providers' current procedures for patients who receive a positive screening, as well as for completion of referrals, and adapt to include screenings performed by PCP.										
Task Finalize draft policies and procedures to facilitate and document behavioral health and primary care screenings by PCBH workgroup, approval by QCIS										
Task Perform gap analysis,including provider capability for

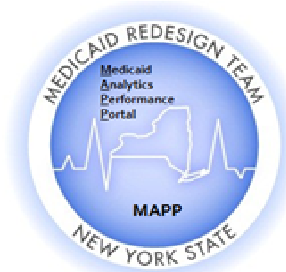
Task Issue CCMS user credentials and train designated/delegated PPS partner workforce in use of the coordinated/ integrated solution. Disseminate standardized IT protocols and data security requirements across the system.										
Task Launch registry and monitor its use and performance, evaluate success of patient tracking, and participating provider utilization patterns, , with an emphasis on tracking patient engagement with primary care.										
Milestone #9 Implement IMPACT Model at Primary Care Sites.										
Task PPS has implemented IMPACT Model at Primary Care Sites.	0	0	0	0	0	0	0	0	0	0
Task Asses the current state of participating primary care sites, including behavioral health service delivery capabilities, IT infrastructure, staffing, etc.										
Task Educate senior leadership of participating providers regarding IMPACT Model and requirements.										
Task Finalize contracts with providers participating in IMPACT collaborative care model and vendor										
Task Perform gap analysis by practice to identify key changes required for successful transition to an IMPACT collaborative care model incorporating behavioral health.										
Task Finalize and implement strategy for moving provider networks towards an IMPACT Model.										
Task Establish PCBH workgroup to integrate IMPACT model standards into best practice protocol design. Utilize the IMPACT manual.										
Task Monitor provider transformation sustainability and success with implementation of IMPACT Model through continuous quality improvement										
Milestone #10 Utilize IMPACT Model collaborative care standards, including developing coordinated evidence-based care standards and policies and procedures for care engagement.										
Task Coordinated evidence-based care protocols are in place, including a medication management and care engagement										



New York State Department Of Health
Delivery System Reform Incentive Payment Project

process to facilitate collaboration between primary care physician and care manager.										
Task Policies and procedures include process for consulting with Psychiatrist.										
Task Assess current participating providers practice models with vendors and PCBH workgroup, The PPS will begin working with approximately 75 sites and their staff, including administrators, providers, and care team staff.										
Task Develop best practice care protocols draft, integrating IMPACT model standards into best practice protocol design. Utilize the IMPACT manual.										
Task Finalize PPS wide evidence- based protocols with approval by QCIS										
Task Perform Gap analysis to identify key priorities for participating providers to meeting best practice standards.										
Task Provide support as needed to ensure successful implementation.										
Task Finalize and implement evidence- based practice guidelines.										
Task Monitor success of developed protocols, updates made as needed with approval by QCIS										
Task Assess current participating providers' practice to begin to formulate implementable policies and procedures for psychiatric consultation.										
Task Develop draft evidence-based policies and procedures for consulting with a psychiatrist case review										
Task Finalize policies, procedures and protocols with approval by the QCIS.										
Task Provide education, training and resources as needed for successful implementation of policies and procedures.										
Task Implement policies, procedures and protocols for successful consultation with psychiatrist.										
Task Monitor success of developed policies, procedures and protocol, as well as sustainability for consulting with psychiatrist.

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task Establish mechanisms for continuous quality improvement										
Milestone #11 Employ a trained Depression Care Manager meeting requirements of the IMPACT model.										
Task PPS identifies qualified Depression Care Manager (can be a nurse, social worker, or psychologist) as identified in Electronic Health Records.										
Task Depression care manager meets requirements of IMPACT model, including coaching patients in behavioral activation, offering course in counseling, monitoring depression symptoms for treatment response, and completing a relapse prevention plan.										
Task Determine the type of DCM needed for each participating provider to meet the DCM role requirements, in conjunction with Workforce Sub-Committee, .										
Task Update policies, protocols, procedures, and organizational structure as necessary to implement and/or formally create the role of DCM with Workforce Sub-committee										
Task Finalize the formal hiring and creation of DCM role with Workforce Sub-committee										
Task Ensure that this staff member is identified as such in the Electronic Health Record (E.H.R.).										
Task Establish requirements of IMPACT Model DCM role by PCBH workgroup and approval by QCIS										
Task Perform gap analysis to identify key priorities for participating providers to be successful with implementation of the role for the DCM with the IMPACT model with Workforce Sub-committee										
Task Create/provide training protocols and procedures for DCM role to ensure they are proficient in all required IMPACT interventions										
Task Implement IMPACT model policies, procedures and protocols.										
Task Provide resources, training, education as needed, assuring that DCM meets role requirements according to the IMPACT model.

Task Continuously monitor and re-evaluate the effectiveness of the individual/individuals in the DCM position to ensure that the requirements of IMPACT model continue to be met into the future.										
Task Establish continuous quality improvement. Develop mechanisms for evaluation, accountability, and continuous quality improvement										
Milestone #12 Designate a Psychiatrist meeting requirements of the IMPACT Model.										
Task All IMPACT participants in PPS have a designated Psychiatrist.										
Task Draft policies and procedures regarding the psychiatrists' responsibilities around treatment and follow-up care with patients.										
Task Finalize job-related policies and procedures regarding psychiatrists' responsibilities for approval by QCIS										
Task Provide assistance with resources for hiring designated psychiatrists, as needed.										
Task Develop mechanisms for evaluation, accountability, and continuous quality improvement										
Task Provide training of designated psychiatrists to ensure they are able to adequately perform the requirements of the position										
Task Provide training for IMPACT collaborative care teams, including collaborative care case consultation										
Task Provide training for care teams on IMPACT model and designated psychiatrist's role.										
Milestone #13 Measure outcomes as required in the IMPACT Model.										
Task At least 90% of patients receive screenings at the established project sites (Screenings are defined as industry standard questionnaires such as PHQ-2 or 9 for those screening positive, SBIRT).										
Task Assess participating providers current rates of patient assessments.

Task Provide education and training as needed to achieve goal.										
Task Develop process to monitor, via EHRs/RHIO/CCMS, progress towards completing screenings on 90% of patient population using approved screenings										
Task Monitor success towards completion of screenings on 90% of patients engaged in project, engage sites with continuous quality improvement as needed to ensure success.										
Milestone #14 Provide "stepped care" as required by the IMPACT Model.										
Task In alignment with the IMPACT model, treatment is adjusted based on evidence-based algorithm that includes evaluation of patient after 10-12 weeks after start of treatment plan.										
Task Draft protocols to adjust treatment according to evidence-based algorithm if a patient is not improving, within 10-12 weeks of the start of the treatment plan. Align with IMPACT model.										
Task Evidence Based Protocols for stepped care, as aligned with IMPACT model, are approved by QCIS										
Task Implement IMPACT model aligned protocols related to stepped care across practices using the IMPACT model										
Task Develop mechanisms for evaluating successful stepped care, accountability, and continuous quality improvement										
Milestone #15 Use EHRs or other technical platforms to track all patients engaged in this project.										
Task EHR demonstrates integration of medical and behavioral health record within individual patient records.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task Develop a project specific strategy for tracking patient engagement, employing PHM tools and processes outlined below.										
Task Define population health management (PHM) requirements, establish PHM function and recruit or contract with partner for PHM staff

who receive a positive screening, as well as for completion of referrals.										
Task Create and Finalize policies on implementing "warm transfers" for patients who have a positive screening.										
Task Provide education/training as needed to ensure successful implementation.										
Task Implement "warm transfer" policies and procedures, as well as instructions on appropriate documentation in the electronic health record.										
Task Monitor success and sustainability of implemented "warm transfer" protocols and engage sites in continuous quality improvement										
Task Monitor success and sustainability of implemented screening protocols										
Task Monitor success with timely and accurate documentation in the electronic health record.										
Task Monitor success towards completion of screenings on 90% of eligible patients engaged in project, engage sites with continuous quality improvement as needed to ensure success.										
Task Provide education and training as needed to achieve goal										
Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.										
Task EHR demonstrates integration of medical and behavioral health record within individual patient records.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task Define business requirements and data elements for patient registry to stratify and track all patients engaged in this project.										
Task Develop a project specific strategy for tracking patient engagement, employing PHM tools and processes outlined below.										
Task Define population health management (PHM) requirements,

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
establish PHM function and recruit or contract with partner for PHM staff										
Task Perform current state assessment of E.H.R. capabilities										
Task Perform gap analysis and identify priories to achieving integration of patient record.										
Task Recommend registry business requirements and data elements to governance committees for review and approval (Quality and Care Innovation Subcommittee, Information Technology Subcommittee and Executive Committee)										
Task Engage IT Subcommittee to identify technology and resource requirements for registry, including technical platform for hosting registry.										
Task Create budget to build registry and acquire necessary resources										
Task Assess and acquire or contract for care coordination management solution (CCMS) and other systems and services as required to support PHM and registries										
Task Develop project implementation and testing plan for building registry as required for PHM, including technical support, ensure frequent automated updates of registry data										
Task Develop training plan and curriculum to deploy risk assessment tool, registry and CCMS tool for providers and care managers, emphasizing use of registries and CCMS to increase care coordination and patient engagement with primary care										
Task Execute registry testing plan and training program for providers and care managers on systems use and on how to identify targeted patients and track those who are actively engaged for milestone reporting.										
Task Issue CCMS user credentials and train designated/delegated PPS partner workforce in use of the coordinated/ integrated solution. Disseminate standardized IT protocols and data security requirements across the system.										
Task Launch registry and monitor its use and performance, evaluate success of patient tracking, and participating provider utilization patterns, , with an emphasis on tracking patient engagement with primary care.

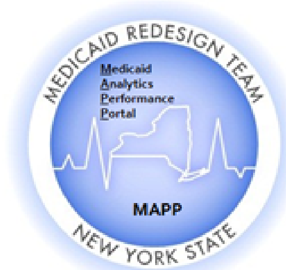
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #5 Co-locate primary care services at behavioral health sites.										
Task PPS has achieved NCQA 2014 Level 3 PCMH or Advanced Primary Care Model Practices by the end of DY3.	78	158	318	796	796	796	796	796	796	796
Task Primary care services are co-located within behavioral Health practices and are available.	78	158	318	796	796	796	796	796	796	796
Task Primary care services are co-located within behavioral Health practices and are available.	19	39	78	195	195	195	195	195	195	195
Task Finalize contract with vendor										
Task Finalize contracts with Behavioral Health and Primary Care Providers engaged in project.										
Task Assess current state, including physical health and behavioral health services , current PCMH level if applicable, IT infrastructure, interoperability, staffing, etc.										
Task Assess eligible participating PCP PCMH recognition status and opportunity to expand access to primary care based on PCMH-enabled practices										
Task Recruit or contract for PCMH practice certification resources as needed										
Task Educate leadership within each organization participating in project of the benefits of co located primary care services within a behavioral health setting.										
Task Perform gap analysis and identify key priorities to successful completion of co-located services.										
Task Establish BPHC program to educate on the benefits of, and encourage, track and support PCPs and facility based senior leadership in achieving PCMH 2014 Level 3 recognition, including potential use of incentive-based payments for achieving recognition										
Task Perform gap analysis by practice and identify key priorities.										
Task Finalize strategy to support primary care physicians with achieving 2014 NCQA Level 3 PCMH certification by sub committees, including trainings and education.										



New York State Department Of Health
Delivery System Reform Incentive Payment Project

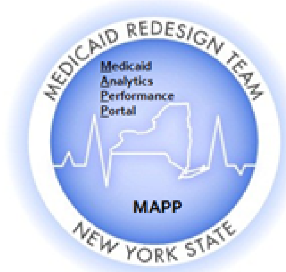
Task Begin actively encouraging, tracking and supporting partner efforts towards PCMH recognition										
Task Develop best practice policies and procedures by PCBH workgroup, send for review and approval by QCIS										
Task Provide support, trainings, resources and education to participating providers as needed to ensure successful completion of co-located and integrated primary care services.										
Task Develop mechanisms to monitor progress towards completion and sustainability of co-located services, evaluate barriers, and develop mechanisms for continuous quality improvement										
Task Monitor progress with achieving 2014 NCQA level 3 PCMH certification, support provided by PPS as needed.										
Task Monitor practice transformation sustainability after receiving 2014 NCQA level 3 PCMH certification, and provide support as needed.										
Task Assess current state of BH practices engaged in project, including Primary care service delivery capabilities, (e.g.exam room structure) work flow, IT infrastructure, interoperability, staffing, etc.										
Milestone #6 Develop collaborative evidence-based standards of care including medication management and care engagement process.										
Task Regularly scheduled formal meetings are held to develop collaborative care practices.										
Task Coordinated evidence-based care protocols are in place, including a medication management and care engagement process.										
Task Assess current participating providers practice models with vendors and PCBH workgroup										
Task In collaboration with BPHC Workforce Sub-committee, assign roles and responsibilities for practice specific implementation of evidence based guidelines and protocols and action plans to engage PCPs with behavioral health specialists										



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task Finalize PPS wide evidence- based protocols with approval by QCIS.										
Task Perform Gap analysis to identify key priorities for participating providers to meet best practice standards.										
Task Finalize and implement evidence- based practice guidelines.										
Task Establish regularly scheduled meetings with vendor and PCBH workgroup to choose evidence based guidelines and protocols including medication management, care engagement and processes for collaborative care meetings.										
Task Finalization of collaborative care practices, reviewed and approved by the QCIS										
Task Complete best practice care protocols draft, including those needed for specific conditions, for QCIS review										
Task Develop mechanisms for evaluation, accountability, and continuous quality improvement										
Task Develop mechanisms for regular review of project-selected Evidence Based Guidelines (by project quality councils) to assure our PPS is utilizing the most up-to-date tools and that those upadated guidelines/protocols continue to be clinically integrated across the PPS.										
Task Provide vendor and CSO support as needed for successful implementation of protocols.										
Milestone #7 Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.										
Task Screenings are conducted for all patients. Process workflows and operational protocols are in place to implement and document screenings.										
Task Screenings are documented in Electronic Health Record.										
Task At least 90% of patients receive screenings at the established project sites (Screenings are defined as industry standard questionnaires such as PHQ-2 or 9 for those screening positive,

SBIRT).										
Task Positive screenings result in "warm transfer" to behavioral health provider as measured by documentation in Electronic Health Record.	78	158	318	796	796	796	796	796	796	796
Task Educate leadership within each participating organization around benefits of providing preventative care screenings using industry standard questionnaires regularly. Recognize that BH patients with conditions other than depression still require depression screening with industry standard questionnaires such as PHQ-2 or 9 for those screening positive, SBIRT. In this colocation model also educate around Primary Care preventive screenings including: age appropriate cancer screenings, alcohol, tobacco and substance use screenings, CVD and DM screenings, vaccinations, etc.										
Task Assess participating providers current process for identifying unmet physical needs of patients, The PPS will begin working with approximately 50 sites and their staff, including administrators, providers, and care team staff.										
Task Develop process to monitor progress towards completing industry standard questionnaires/screening (such as PHQ-2 or 9 for those screening positive, SBIRT) on 90% of patient population.										
Task Assess participating providers' current procedures for patients who receive a positive screening, as well as for completion of referrals, and adapt to include screenings performed by PCP.										
Task Finalize draft policies and procedures to facilitate and document behavioral health and primary care screenings by PCBH workgroup, approval by QCIS										
Task Perform gap analysis,including provider capability for documenting screenings in EMR, and identify steps to meet standards.										
Task Finalize policy around timely documentation of screenings in the electronic health record.										
Task Monitor success with timely and accurate documentation in the electronic health record.

Milestone #9 Implement IMPACT Model at Primary Care Sites.										
Task PPS has implemented IMPACT Model at Primary Care Sites.	78	158	318	796	796	796	796	796	796	796
Task Asses the current state of participating primary care sites, including behavioral health service delivery capabilities, IT infrastructure, staffing, etc.										
Task Educate senior leadership of participating providers regarding IMPACT Model and requirements.										
Task Finalize contracts with providers participating in IMPACT collaborative care model and vendor										
Task Perform gap analysis by practice to identify key changes required for successful transition to an IMPACT collaborative care model incorporating behavioral health.										
Task Finalize and implement strategy for moving provider networks towards an IMPACT Model.										
Task Establish PCBH workgroup to integrate IMPACT model standards into best practice protocol design. Utilize the IMPACT manual.										
Task Monitor provider transformation sustainability and success with implementation of IMPACT Model through continuous quality improvement										
Milestone #10 Utilize IMPACT Model collaborative care standards, including developing coordinated evidence-based care standards and policies and procedures for care engagement.										
Task Coordinated evidence-based care protocols are in place, including a medication management and care engagement process to facilitate collaboration between primary care physician and care manager.										
Task Policies and procedures include process for consulting with Psychiatrist.										
Task Assess current participating providers practice models with vendors and PCBH workgroup, The PPS will begin working with approximately 75 sites and their staff, including administrators, providers, and care team staff.

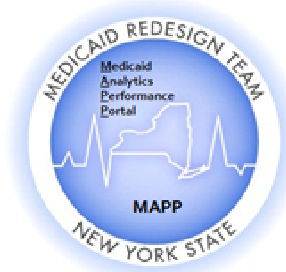
Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task Develop best practice care protocols draft, integrating IMPACT model standards into best practice protocol design. Utilize the IMPACT manual.										
Task Finalize PPS wide evidence- based protocols with approval by QCIS										
Task Perform Gap analysis to identify key priorities for participating providers to meeting best practice standards.										
Task Provide support as needed to ensure successful implementation.										
Task Finalize and implement evidence- based practice guidelines.										
Task Monitor success of developed protocols, updates made as needed with approval by QCIS										
Task Assess current participating providers' practice to begin to formulate implementable policies and procedures for psychiatric consultation.										
Task Develop draft evidence-based policies and procedures for consulting with a psychiatrist case review										
Task Finalize policies, procedures and protocols with approval by the QCIS.										
Task Provide education, training and resources as needed for successful implementation of policies and procedures.										
Task Implement policies, procedures and protocols for successful consultation with psychiatrist.										
Task Monitor success of developed policies, procedures and protocol, as well as sustainability for consulting with psychiatrist.										
Task Establish mechanisms for continuous quality improvement										
Milestone #11 Employ a trained Depression Care Manager meeting requirements of the IMPACT model.										
Task PPS identifies qualified Depression Care Manager (can be a nurse, social worker, or psychologist) as identified in Electronic Health Records.										



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Task Depression care manager meets requirements of IMPACT model, including coaching patients in behavioral activation, offering course in counseling, monitoring depression symptoms for treatment response, and completing a relapse prevention plan.										
Task Determine the type of DCM needed for each participating provider to meet the DCM role requirements, in conjunction with Workforce Sub-Committee, .										
Task Update policies, protocols, procedures, and organizational structure as necessary to implement and/or formally create the role of DCM with Workforce Sub-committee										
Task Finalize the formal hiring and creation of DCM role with Workforce Sub-committee										
Task Ensure that this staff member is identified as such in the Electronic Health Record (E.H.R.).										
Task Establish requirements of IMPACT Model DCM role by PCBH workgroup and approval by QCIS										
Task Perform gap analysis to identify key priorities for participating providers to be successful with implementation of the role for the DCM with the IMPACT model with Workforce Sub-committee										
Task Create/provide training protocols and procedures for DCM role to ensure they are proficient in all required IMPACT interventions										
Task Implement IMPACT model policies, procedures and protocols.										
Task Provide resources, training, education as needed, assuring that DCM meets role requirements according to the IMPACT model.										
Task Continuously monitor and re-evaluate the effectiveness of the individual/individuals in the DCM position to ensure that the requirements of IMPACT model continue to be met into the future.										
Task Establish continuous quality improvement. Develop mechanisms for evaluation, accountability, and continuous quality improvement

Milestone #12 Designate a Psychiatrist meeting requirements of the IMPACT Model.										
Task All IMPACT participants in PPS have a designated Psychiatrist.										
Task Draft policies and procedures regarding the psychiatrists' responsibilities around treatment and follow-up care with patients.										
Task Finalize job-related policies and procedures regarding psychiatrists' responsibilities for approval by QCIS										
Task Provide assistance with resources for hiring designated psychiatrists, as needed.										
Task Develop mechanisms for evaluation, accountability, and continuous quality improvement										
Task Provide training of designated psychiatrists to ensure they are able to adequately perform the requirements of the position										
Task Provide training for IMPACT collaborative care teams, including collaborative care case consultation										
Task Provide training for care teams on IMPACT model and designated psychiatrist's role.										
Milestone #13 Measure outcomes as required in the IMPACT Model.										
Task At least 90% of patients receive screenings at the established project sites (Screenings are defined as industry standard questionnaires such as PHQ-2 or 9 for those screening positive, SBIRT).										
Task Assess participating providers current rates of patient assessments.										
Task Provide education and training as needed to achieve goal.										
Task Develop process to monitor, via EHRs/RHIO/CCMS, progress towards completing screenings on 90% of patient population using approved screenings										
Task Monitor success towards completion of screenings on 90% of patients engaged in project, engage sites with continuous quality

improvement as needed to ensure success.										
Milestone #14 Provide "stepped care" as required by the IMPACT Model.										
Task In alignment with the IMPACT model, treatment is adjusted based on evidence-based algorithm that includes evaluation of patient after 10-12 weeks after start of treatment plan.										
Task Draft protocols to adjust treatment according to evidence-based algorithm if a patient is not improving, within 10-12 weeks of the start of the treatment plan. Align with IMPACT model.										
Task Evidence Based Protocols for stepped care, as aligned with IMPACT model, are approved by QCIS										
Task Implement IMPACT model aligned protocols related to stepped care across practices using the IMPACT model										
Task Develop mechanisms for evaluating successful stepped care, accountability, and continuous quality improvement										
Milestone #15 Use EHRs or other technical platforms to track all patients engaged in this project.										
Task EHR demonstrates integration of medical and behavioral health record within individual patient records.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task Develop a project specific strategy for tracking patient engagement, employing PHM tools and processes outlined below.										
Task Define population health management (PHM) requirements, establish PHM function and recruit or contract with partner for PHM staff										
Task Perform current state assessment of E.H.R. capabilities.										
Task Perform gap analysis and identify priories to achieving integration of patient record.										
Task Define business requirements and data elements for patient registry to stratify and track all patients engaged in this project.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Co-locate behavioral health services at primary care practice sites. All participating primary care practices must meet 2014 NCQA level 3 PCMH or Advance Primary Care Model standards by DY 3.	The contract has been finalized with the vendor (Institute for Family Health) who will provide training and technical assistance (TA) to practices implementing co-location models. Parallel to this process, contracts are also finalized with PCMH consultants, who will provide services for PCMH readiness through the CSO to ensure that co-location and PCMH 2014 level 3 recognition requirements are being met.
Develop collaborative evidence-based standards of care including medication management and care engagement process.	The Implementation Workgroup (IWG) for the 3ai project has kicked off, and is in the process of reviewing components of the Clinical Operations Plan (COP) which will include various best practices and policy/procedures including medication management and care engagement process. The vendor is currently working with the CSO to develop tools for assessments and gap analyses to be conducted, which will inform how information is shared with the practices and the breadth of training and support needed.
Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.	Through the assessment process under this milestone, the vendor and the CSO will assess current practices related screening, treatment, referrals, sharing patient data, and monitoring. The assessment will also provide details on patient and workflows, as well as technical assistance and training needs. We are on target with setting up assessments and anticipate completing related tasks on time.
Use EHRs or other technical platforms to track all patients engaged in this project.	BPHC is engaged in high level discussions with the Bronx RHIO to determine capabilities and negotiate terms. Capacities are in the process of being assessed and data elements for patient registries are being defined by project-specific workgroups. As potential sites are being engaged through the needs assessments, the business requirements and data elements to be integrated into the patient registry will be identified. Through the gap analyses, current registry and care management practices will be examined to determine what support may be needed to adopt EHR and other technical platforms coordinated by BPHC. The Primary Care and Behavioral Health Implementation Workgroup will contribute to defining population health requirements for patient engagement and the ideal or alternate strategies for tracking the population through practices existing or new IT infrastructure. This information, as well as information gathered through site assessments, will be relevant to the development of the Care Coordination Management Solution (CCMS) platform and the patient registries to be developed through Acupera, which will be useful for care planning and referral tracking. Patient consent to share information across practices will be a critical component for the success of this project.
Co-locate primary care services at behavioral health sites.	The contract has been finalized with the vendor (Institute for Family Health) who will provide training and technical assistance (TA) to practices implementing co-location models. Parallel to this process, contracts are also finalized with PCMH consultants, who will provide services for PCMH readiness through the CSO to ensure that co-location and PCMH 2014 level 3 recognition requirements are being met.
Develop collaborative evidence-based standards of care including medication management and care engagement process.	The Implementation Workgroup (IWG) for the 3ai project has kicked off, and is in the process of reviewing components of the Clinical Operations Plan (COP) which will include various best practices and policy/procedures including medication management and care engagement process. The vendor is currently working with the CSO to develop tools for assessments and gap analyses to be conducted, which will inform how information is shared with the practices and the breadth of training and support needed.

Milestone Name	Narrative Text
Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.	The Implementation Workgroup (IWG) for the 3ai project has kicked off, and is in the process of reviewing components of the Clinical Operations Plan (COP) which will include various best practices and policy/procedures including medication management and care engagement process. The vendor is currently working with the CSO to develop tools for assessments and gap analyses to be conducted, which will inform how information is shared with the practices and the breadth of training and support needed.
Use EHRs or other technical platforms to track all patients engaged in this project.	BPHC is engaged in high level discussions with the Bronx RHIO to determine capabilities and negotiate terms. Capacities are in the process of being assessed and data elements for patient registries are being defined by project-specific workgroups. As potential sites are being engaged through the needs assessments, the business requirements and data elements to be integrated into the patient registry will be identified. Through the gap analyses, current registry and care management practices will be examined to determine what support may be needed to adopt EHR and other technical platforms coordinated by BPHC. The Primary Care and Behavioral Health Implementation Workgroup will contribute to defining population health requirements for patient engagement and the ideal or alternate strategies for tracking the population through practices existing or new IT infrastructure. This information, as well as information gathered through site assessments, will be relevant to the development of the Care Coordination Management Solution (CCMS) platform and the patient registries to be developed through Acupera, which will be useful for care planning and referral tracking. Patient consent to share information across practices will be a critical component for the success of this project.
Implement IMPACT Model at Primary Care Sites.	Providers are currently being identified and scheduled for onsite technical assistance needs assessments. The contract has been finalized with the vendor (Institute for Family Health) who will provide training and technical assistance (TA) to practices IMPACT model.
Utilize IMPACT Model collaborative care standards, including developing coordinated evidence-based care standards and policies and procedures for care engagement.	Assessments are currently being conducted with participating providers in collaboration with the vendor, Institute for Family Health. The Implementation Work Group will identify evidence-based practices to be utilized for the development of the Clinical Operations Plans (COPs).
Employ a trained Depression Care Manager meeting requirements of the IMPACT model.	Resources are being identified to develop trainings for DCM's. The role of DCM is being defined with the Implementation Work Group to ensure it is consistent with staffing model needs for this project. The gap analysis to be conducted with participating providers will inform the needs for fulfilling this position as a key component of IMPACT implementation.
Designate a Psychiatrist meeting requirements of the IMPACT Model.	The role of the Psychiatrist and policies and procedures associated with this role is being defined through the Implementation Work Group and will be clarified in the Clinical Operations Plans. The gap analysis will inform hiring, financing, and training needs to fulfill this position.
Measure outcomes as required in the IMPACT Model.	The assessment process for providers engaged in this project will include questions on current screening practices. This information will provide a baseline for current screening rates and use of stepped care. Screening rates will continue to be monitored through the EHRs. The depression registry will monitor the depression care status, screening, and improvement rates. Clinical Operations Plans are being produced that will provide information on the type of care to be provided, staffing roles, and data collection protocol as required for implementation of the IMPACT model. This will also include integration of patient records between the PCP and BH providers.
Provide "stepped care" as required by the IMPACT Model.	
Use EHRs or other technical platforms to track all patients engaged in this project.	BPHC is engaged in high level discussions with the Bronx RHIO to determine capabilities and negotiate terms. Capacities are in the process of being assessed and data elements for patient registries are being defined by project-specific workgroups. As potential sites are being engaged through the needs assessments, the business requirements and data elements to be integrated into the patient registry will be identified. Through the gap analyses, current registry and care management practices will be examined to determine what support may be needed to adopt EHR and other technical platforms coordinated by BPHC. The Primary Care and Behavioral Health Implementation Workgroup will contribute to defining population health requirements for patient engagement and the ideal or alternate strategies for tracking the population through practices existing or new IT infrastructure. This information, as well as information gathered through site assessments, will be relevant to the development of the Care Coordination Management Solution (CCMS) platform and the patient registries to be developed through Acupera, which will be useful for care planning and referral tracking. Patient consent to share information across practices will be a critical component for the success of this project.

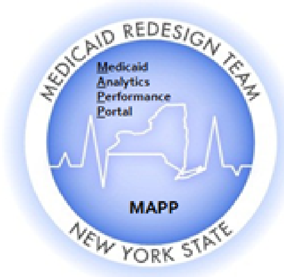
IPQR Module 3.a.i.5 - IA Monitoring

Instructions :



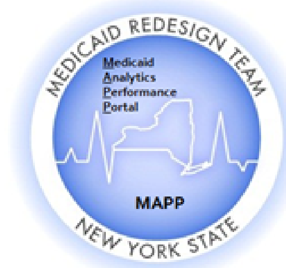
Project 3.b.i – Evidence-based strategies for disease management in high risk/affected populations (adult only)

IPQR Module 3.b.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Some primary care physicians (PCPs) may resist the imposition of standard treatment protocols & new workflows. To mitigate this risk, our disease management work groups will bring PCPs & other project participants together to review & develop consensus on evidence-based (EB) guidelines & workflows for each disease-specific intervention. Members will recommend these EB protocols to the PPS Quality & Care Innovation Sub-Committee, & the Executive Committee for approval to deploy across the PPS. Implementation of these protocols will be part of contractual agreements between partners & the PPS. BPHC will allocate the necessary resources to provide online & in-person training, support & follow up with physicians & other care team members at times that accommodate their clinical schedules to encourage adoption of program elements.
Physicians & other PCMH care team members may not currently document self-management goals in the medical record as required, &/or they may be resistant to conducting additional documentation efforts. To address this risk, BPHC will train all members of the care teams, including physicians, frontline staff, & office staff, on BPHC's forthcoming EB cardiovascular disease protocols & the DSRIP performance metrics & provide additional resources to primary care practices where needed to meet project intervention requirements. In addition, the CSO will audit medical records to ensure that documentation is occurring.
It will be challenging to recruit & train sufficient care management staff to serve the needs of the Bronx population. Recruiting Spanish-speaking care management staff will be a particular risk. BPHC's workforce strategy will be targeted towards mitigating this risk, such as through the CSO working with community colleges & coordinating with the 1199 Job Security Fund, Montefiore CMO, & NYSNA to identify capable workers & provide training in Spanish when needed. BPHC will also use alternative employment tactics, such as flexible hours, & job sharing, where feasible to attract a broader pool of workers.
Attaining 2014 PCMH Level 3 recognition is difficult & resource intensive, particularly for smaller primary care practices. The CSO will provide technical & financial assistance, including IT support & training, to primary care practices as they work to attain PCMH Level 3 recognition.
Medication adherence is a chronic problem for individuals with chronic illness including those with CVD. Organizations that could be instrumental in helping patients with medication adherence, such as home care agencies & MCOs are handicapped by policies &/or regulations. To mitigate these risks, BPHC will work with MCOs to institute policy changes that will promote medication adherence.
Enhancing patient self-management & self-efficacy is anticipated to be a particular risk to the success of Project 3.b.i. It is challenging to effectively motivate & engage chronically ill patients to embrace changes in behavior & self-manage their condition. Many patients do not grasp the effects of cardiovascular disease & unmanaged hypertension, risks that are compounded in the Bronx population by low health literacy & educational attainment. To mitigate this risk BPHC will engage Health People, a Bronx-based CBO that provides EB education, to expand its own capacity to deploy the peer-based Stanford Model & to train other PPS members on the model to disseminate it broadly.
Providers may not implement EHR systems that meet MU & PCMH Level 3 standards, interoperability challenges may present &/or providers may resist participating in the IDS. BPHC will use gap analysis to develop a program to monitor & deploy assistance to providers at risk, support practices by deploying internal community, external consulting resources and provide customized technical assistance, coaching, & training modules.



IPQR Module 3.b.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Patient Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q3 should include patients previously reported in DY1 Q2 plus new patients engaged in DY1 Q3. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
100% Actively Engaged By	Expected Patient Engagement
DY3,Q4	30,800

Patient Update		% of Semi-Annual Commitment To-Date	Semi-Annual Variance of Projected to Actual	% of Total Actively Engaged Patients To-Date
DY1, Q1	DY1,Q2

Milestone #1 Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.										
Task PPS has implemented program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.										
Task Create a Transitional Work Group (CVD/DM TWG) comprised of representatives from partner organizations to support development of and approve elements of the COP										
Task Identify DSRIP project requirements which are related to PCMH elements and incorporate into PCMH strategy and project planning documents										
Task Identify relevant evidence-based guidelines for HTN and hyperlipidemia in conjunction with the CVD/DM TWG										
Task Identify patient criteria for smoking cessation interventions (counsel to quit, smoking cessation medication, non-medication smoking cessation strategy)										
Task Identify partner organizations participating in project (sites and CBOs)										
Task Develop a workplan and timeline to develop the clinical operations plan (COPs) and implement a strategy for the CV population that aligns with the patient engagement speed and scale application submission										
Task Develop the COP to define the program elements, define the required and suggested components of those elements, and identify relevant resources to achieve them. Elements include health information exchange and technology requirements, and evidence-based guidelines and high-value treatment protocols										
Task Develop the project implementation budget										
Task Design training and recruitment strategy in conjunction with workforce team and CVD/DM TWG										
Task Submit elements of the COP to Quality and Care Innovation Sub-Committee (QCIS) for approval

Task Identify clinical champions and operational leaders in each participating organization to develop and lead implementation of the program at each of their providers/sites. These facility-based champions/leaders form the Site-Specific Implementation Team										
Task Prepare/disseminate gap analysis tool based on COP to participating providers to determine implementaton support needs										
Task Hold webinar for participating partner organizations										
Task Create rapid deployment collaborative, comprised of representatives from partner organizations to support implementation of the COP. This group replaces the TWG and will be the implementation work group.										
Task Develop mechanisms for regular review of project-selected evidence-based guidelines (EBGs) by implementation work group to assure our PPS is utilizing the most up-to-date tools and that those upadated guidelines/protocols continue to be clinically integrated across the PPS										
Milestone #2 Ensure that all PPS safety net providers are actively connected to EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the end of DY 3.										
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	0	0	0	0	0	0	0	0	0	0
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	0	0	0	0	0	0	0	0	180	543
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	0	0	0	0	0	0	0	0	0	0
Task PPS uses alerts and secure messaging functionality.										
Task Identify safety net provider data sharing requirements and assess partner and QE data sharing capabilities and current HIE participation										
Task Coordinate with Bronx RHIO to develop comprehensive HIE adoption program to encourage and support partner participation

and integration										
Task Begin coordinated interface and service development with Bronx RHIO, including connectivity to the SHIN-NY.										
Task Establish BPHC program to manage support for safety net providers to ensure that all are actively sharing health information, coordinating with Bronx RHIO to encourage, track and support partner participation and integration/data sharing										
Task Track status and manage support to ensure that all PPS safety net providers are actively sharing health information through Bronx RHIO or alternative health information exchange										
Milestone #3 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.										
Task EHR meets Meaningful Use Stage 2 CMS requirements (Note: any/all MU requirements adjusted by CMS will be incorporated into the assessment criteria).										
Task PPS has achieved NCQA 2014 Level 3 PCMH standards and/or APCM.	0	0	0	0	0	0	0	0	0	0
Task Assess eligible participating partner EHR use relative to Meaningful Use and PCMH 2014 Level 3 standards										
Task Establish BPHC program to educate, encourage, track and support eligible safety net providers in acquiring/implementing certified EHR systems, including potential use of incentive-based payments for implementation										
Task Recruit or contract for EHR implementation resources as needed										
Task Begin actively encouraging, tracking and supporting partner EHR implementation and progress towards Meaningful Use and PCMH standards										
Task Track status and manage support to ensure all eligible safety net providers are using certified EHR systems that meet Meaningful Use and PCMH 2014 Level 3 standards										
Task Assess eligible participating PCP PCMH recognition status and opportunity to expand access to primary care based on PCMH-

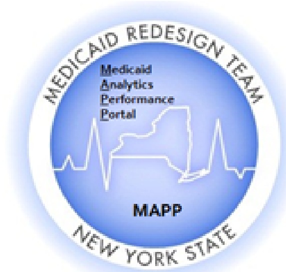
enabled practices										
Task Recruit or contract for PCMH practice certification resources as needed										
Task Establish BPHC program to educate on the benefits of, and encourage, track and support PCPs and facility based senior leadership in achieving PCMH 2014 Level 3 recognition, including potential use of incentive-based payments for achieving recognition										
Task Perform gap analysis by practice and identify key priorities.										
Task Finalize strategy to support primary care physicians with achieving 2014 NCQA Level 3 PCMH certification by sub committees, including trainings and education.										
Task Begin actively encouraging, tracking and supporting partner efforts towards PCMH recognition										
Task Monitor progress with achieving 2014 NCQA level 3 PCMH certification, support provided by PPS as needed.										
Task Monitor practice transformation sustainability after receiving 2014 NCQA level 3 PCMH certification, and provide support as needed.										
Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task Define population health management (PHM) requirements, establish PHM function and recruit or contract with partner for PHM staff										
Task Perform current state assessment of E.H.R. capabilities.										
Task Perform gap analysis and identify priories to achieving integration of patient record.										
Task Define business requirements and data elements for patient registry to stratify and track all patients engaged in this project.										



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task Recommend registry business requirements and data elements to governance committees for review and approval (Quality and Care Innovation Subcommittee, Information Technology Subcommittee and Executive Committee)										
Task Engage IT Subcommittee to identify technology and resource requirements for registry, including technical platform for hosting registry.										
Task Create budget to build registry and acquire necessary resources										
Task Assess and acquire or contract for care coordination management solution (CCMS) and other systems and services as required to support PHM and registries										
Task Develop project implementation and testing plan for building registry as required for PHM, including technical support, ensure frequent automated updates of registry data										
Task Develop training plan and curriculum to deploy risk assessment tool, registry and CCMS tool for providers and care managers, emphasizing use of registries and CCMS to increase care coordination and patient engagement with primary care										
Task Execute registry testing plan and training program for providers and care managers on systems use and on how to identify targeted patients and track those who are actively engaged for milestone reporting.										
Task Issue CCMS user credentials and train designated/delegated PPS partner workforce in use of the coordinated/ integrated solution. Disseminate standardized IT protocols and data security requirements across the system.										
Task Launch registry and monitor its use and performance, evaluate success of patient tracking, and participating provider utilization patterns, , with an emphasis on tracking patient engagement with primary care.										
Milestone #5 Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).										
Task PPS has implemented an automated scheduling system to facilitate tobacco control protocols.

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task PPS provides periodic training to staff to incorporate the use of EHR to prompt the use of 5 A's of tobacco control.										
Task Identify/establish the protocols for the 5A's of tobacco control and services/programs to incorporate into COP										
Task Identify/develop member educational material and smoking cessation support tools for inclusion in COP										
Task Survey participants to determine capability of sites' EHR systems for providing point of care reminders										
Task Site-Specific Implementation Teams work with their IT teams to implement point-of-care prompts to facilitate tobacco control protocols into EHR workflows, including documentation										
Task Site-specific Implementation Teams establish and map interim manual processes to fulfill protocols in COP										
Task Establish the schedule and materials for periodic staff training to incorporate the use of the EHR to prompt the use of 5 A's of tobacco control.										
Task Provide guidance for ongoing assesment to ensure that practices are following training requirements and protocols										
Task Develop feedback mechansims for accountability and continuous quality improvement										
Milestone #6 Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.										
Task Practice has adopted treatment protocols aligned with national guidelines, such as the National Cholesterol Education Program (NCEP) or US Preventive Services Task Force (USPSTF).										
Task Define target population, select EBGs for target population and present recommmendation to Quality & Care Innovation Sub-Committee (QCIS)										
Task QCIS reviews and recommends EBGs for adoption and implementation across the PPS										
Task Develops educational materials suitable to the needs, culture and language of the target populations in conjunction with select

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
CBOs, PCPs, and SMEs										
Task Present educational materials to QCIS for review										
Task Identify clinical champions to drive adoption of guidelines										
Task Implement EBG and educational material dissemination plan across the PPS with support of RDC and site-specific implementation teams										
Milestone #7 Develop care coordination teams including use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-management.										
Task Clinically Interoperable System is in place for all participating providers.										
Task Care coordination teams are in place and include nursing staff, pharmacists, dieticians, community health workers, and Health Home care managers where applicable.										
Task Care coordination processes are in place.										
Task Coordinate across project specific workgroups to establish the care management model/organizational structure and processes most appropriate for achieving project outcomes; include nursing staff, pharmacists, dieticians, community health workers, and Health Home care managers										
Task Present care management model to QCIS for review and approval										
Task Working with Workforce Subcommittee, design training and recruitment strategy for care managers and care teams										
Task Begin to recruit, hire and train new and existing staff as needed.										
Task Site-specific implementation teams, with support from CSO and in coordination with PCMH work, establish care coordination team and implement care coordination processes (e.g., community service/program referrals and tracking, communication, PCP alerts, education materials, coordination among team members, frequency and purpose of patient contact.) Ensure these include coordination with the Health

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Home care manager, where applicable.										
Task Develop a mechanism to gather feedback and share best practices										
Task Provide guidance for ongoing assesment to ensure that practices are following requirements and protocols										
Task Identify and document required clinical and care management protocols for priority programs, projects and interventions, based on Community Needs Assessment, clinical planning to-date and further analysis of attributed patient population, using MAPP and PPS partner patient-level data										
Task Define partner and workforce roles in delivering care based on protocols and planned interventions in priority projects, including expectations for how interventions will be logged, tracked and reported.										
Task Deploy systems to improve and promote effective care transitions										
Task Operationalize partner and workforce roles by providing gap analysis and appropriate training.										
Task Establish data collection, survey and reporting mechanisms to enable BPHC monitoring to ensure that patients are receiving appropriate health care and community support in priority projects, based on needs identified in prior planning activities										
Task Review process for rapid cycle evaluation and continuous improvement of data collection, survey and reporting methods based on priority project experience and modify process as needed to ensure patients receive appropriate health care and community support										
Milestone #8 Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.										
Task All primary care practices in the PPS provide follow-up blood pressure checks without copayment or advanced appointments.	0	0	0	0	0	0	0	0	0	0
Task Review Million Hearts resources and other relevant literature related to implementation of similar programs and identify documents most relevant for PPS, including strategies to ensure

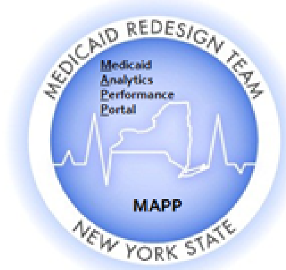
Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
that Medicaid patients are not charged a co-pay for blood pressure checks										
Task Conduct research into current coverage for such visits by Medicaid and coding for non-billable visits, etc.										
Task Conduct gap analysis to assess resources required to meet this requirement										
Task Meet with other PPSs to consider lobbying MCOs to cover such visit copays (make providers whole)										
Task Conduct periodic meetings/learning collaboratives with PCP practice partners to gather feedback and share best practices										
Task Provide guidance for ongoing assesment to ensure that practices are providing access for such visits										
Task Develop feedback mechansims for accountability and continuous quality improvement										
Milestone #9 Ensure that all staff involved in measuring and recording blood pressure are using correct measurement techniques and equipment.										
Task PPS has protocols in place to ensure blood pressure measurements are taken correctly with the correct equipment.										
Task In conjunction with Workforce Subcommittee, identify relevant training resources and nursing competencies to create protocols (standardized across PPS) for inclusion in the COP										
Task Identify site-specific staff members responsible for BP measurement training and documenting training has occurred										
Task Provide guidance for ongoing assesment of staff competencies to ensure that practices are following training requirements and protocols										
Task Develop feedback mechansims for accountability and continuous quality improvement										
Milestone #10 Identify patients who have repeated elevated blood pressure readings in the medical record but do not have a diagnosis of hypertension and schedule them for a hypertension visit.										



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task PPS uses a patient stratification system to identify patients who have repeated elevated blood pressure but no diagnosis of hypertension.										
Task PPS has implemented an automated scheduling system to facilitate scheduling of targeted hypertension patients.										
Task PPS provides periodic training to staff to ensure effective patient identification and hypertension visit scheduling.										
Task Using EBGs identified in the COP, determine blood pressure program parameters and stratification levels for identification, enrollment and hypertension visit frequency										
Task Establish processes to use registry (see requirement 4), to reach out to patients and establish the process and person responsible for staff training on such processes.										
Task Support site-specific implementation teams to ensure that scheduling resources/technology fulfills project requirements.										
Task Conduct periodic meetings/learning collaboratives with PCP practice partners to gather feedback and share best practices										
Task Provide guidance for ongoing assesment of competencies to ensure that practices are following training requirements and protocols										
Task Develop feedback mechansims for accountability and continuous quality improvement										
Milestone #11 Prescribe once-daily regimens or fixed-dose combination pills when appropriate.										
Task PPS has protocols in place for determining preferential drugs based on ease of medication adherence where there are no other significant non-differentiating factors.										
Task Determine criteria/limitations for use of once-daily and single dose medication regimens based on feedback from partners, review of MCO formularies and review of clinicial literature; include recommendations in COP										
Task Determine current status of the above regimens in payor and provider formularies, ease of prescribing in various EHRs

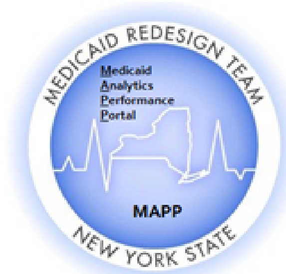
SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task Establish protocols for determining preferential drugs based on ease of medication adherence where there are no other significant non-differentiating factors for inclusion in COP										
Task Develop mechanisms for regular review of medication recommondations to assure our PPS is utilizing the most up-to-date tools and that any updated guidelines/protocols continue to be clinically integrated across the PPS										
Milestone #12 Document patient driven self-management goals in the medical record and review with patients at each visit.										
Task Self-management goals are documented in the clinical record.										
Task PPS provides periodic training to staff on person-centered methods that include documentation of self-management goals.										
Task Identify best practices for identification and follow-up of self-management goals into COP										
Task Identify relevant training resources /competencies in conjuction with workforce subcommittee										
Task Establish plan to integrate self-management goals into the EHR with interim manual processes as needed										
Task Establish requirements and processes to ensure documentation of the goals										
Task Establish the schedule and materials for periodic staff training on person-centered methods that include documentation of self-management goals										
Task Provide guidance for ongoing assesment of competencies to ensure that practices are following training requirements and protocols										
Task Develop feedback mechansims for accountability, and continuous quality improvement, including assessment of patient adherence to self-management plan and opportunities to increase adherence.										
Milestone #13 Follow up with referrals to community based programs to document participation and behavioral and health status changes.										



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Task PPS has developed referral and follow-up process and adheres to process.										
Task PPS provides periodic training to staff on warm referral and follow-up process.										
Task Agreements are in place with community-based organizations and process is in place to facilitate feedback to and from community organizations.										
Task Define processes for referral, and access to information among providers, and feedback processes to the practices electronically with interim manual processes as needed in conjunction with IT subcommittee										
Task Establish and document referral and follow-up procedures for the sites, with a mechanism for sites to audit adherence										
Task Identify community organizations for inclusion in the initial iteration of the Community Resource Database, sign agreements with with community based organizations and establish process to facilitate feedback to and from community organizations										
Task Perform regular checks of Community Resource Database to ensure data is up to date and accurate and to identify additional resources to consider including										
Task Conduct periodic meetings/learning collaboratives with community organization partners to gather feedback and share best practices										
Task Establish the schedule and materials for periodic staff training on the warm transfer and referral tracking										
Milestone #14 Develop and implement protocols for home blood pressure monitoring with follow up support.										
Task PPS has developed and implemented protocols for home blood pressure monitoring.										
Task PPS provides follow up to support to patients with ongoing blood pressure monitoring, including equipment evaluation and follow-up if blood pressure results are abnormal.										
Task PPS provides periodic training to staff on warm referral and

follow-up process.										
Task Identify minimal and recommended SBPM protocols needed to satisfy project requirements, including identification of patients' needs and linkage to support										
Task Conduct gap analysis with partners to identify implementation support needs										
Task Individual sites adopt protocols for at-home BP monitoring										
Task Identify staff member(s) at each site responsible for training patients in self-blood pressure monitoring, including equipment evaluation										
Task Establish workflow at each site to address patient-reported BP values that are out of range, including how are values reported and staff member(s) responsible for following up										
Task Conduct webinars/conference calls to ensure that all practices have protocols in place and are adhering to them										
Task Define training requirements in conjuction with Workforce Subcommittee										
Task Identify nursing competencies and training resources to support SBPM in conjuction with Workforce Subcommittee										
Task Create patient communication materials in coordination with the Cultural Competency/Health Literacy orkstream										
Task Conduct periodic meetings/learning collaboratives with community organization partners to gather feedback and share best practices										
Task Establish schedule and materials for periodic staff training on the warm transfer and referral follow-up process										
Task Develop feedback mechansims for accountability and continuous quality improvement										
Milestone #15 Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.										
Task PPS has implemented an automated scheduling system to

facilitate scheduling of targeted hypertension patients.										
Task Using EBGs identified in the COP, determine parameters for patient stratification, identification, and hypertension visit frequency										
Task Establish processes to use registry (see requirement 4), to reach out to patients and establish processes and person responbile for staff training on such processes.										
Task Support site-specific implementation teams to ensure that scheduling resources/technology fulfills projecct requirements.										
Task Conduct periodic meetings/learning collaboratives with sites to gather feedback and share best practices										
Task Provide guidance for ongoing assesment of competencies to ensure that sites are following training requirements and protocols										
Task Develop feedback mechansims for accountability and continuous quality improvement										
Milestone #16 Facilitate referrals to NYS Smoker's Quitline.										
Task PPS has developed referral and follow-up process and adheres to process.										
Task Define criteria for referral to Quitline										
Task Establish and document process for referral to Quitline and patient follow-up										
Task Create culturally-competent communication materials at appropriate health literacy levels materials with the Quitline telephone number and website										
Task Develop feedback mechansims for accountability and continuous quality improvement										
Milestone #17 Perform additional actions including "hot spotting" strategies in high risk neighborhoods, linkages to Health Homes for the highest risk population, group visits, and implementation of the Stanford Model for chronic diseases.

Task If applicable, PPS has Implemented collection of valid and reliable REAL (Race, Ethnicity, and Language) data and uses the data to target high risk populations, develop improvement plans, and address top health disparities.										
Task If applicable, PPS has established linkages to health homes for targeted patient populations.										
Task If applicable, PPS has implemented Stanford Model through partnerships with community-based organizations.										
Task Using claims data to identify "hotspot" areas/patient groups for outreach										
Task Identify and mitigate service shortages to address these "hotspots" which can include mobile services and use of churches and community centers for education and blood pressure screening.										
Task Implement collection of valid and reliable REAL (Race, Ethnicity, and Language) data and uses the data to target high risk populations, develop improvement plans, and address top health disparities, if feasible.										
Task Establish linkages to health homes for targeted patient populations										
Task Implement the Stanford Model through partnerships with community based organizations, including Health People										
Milestone #18 Adopt strategies from the Million Hearts Campaign.										
Task Provider can demonstrate implementation of policies and procedures which reflect principles and initiatives of Million Hearts Campaign.	0	0	0	0	0	0	0	0	0	0
Task Provider can demonstrate implementation of policies and procedures which reflect principles and initiatives of Million Hearts Campaign.	0	0	0	0	0	0	0	0	180	543

Million Hearts to incorporate into COP, including noting relevance by provider type (PCP, non-PCP and behavioral health providers)										
Task Identify relevant patient tools for inclusion in COP										
Task Review Action Guide related to HTN and SBPM and incorporate into guidelines/protocols in COP										
Task Identify clinical champions from the Site-Specific Implementation Team in each participating organization (PCP, non-PCP and behavioral health providers) to drive adoption of Million Hearts strategies and materials identified in COP										
Task Develop mechanisms for regular review of Million Hearts resources to assure our PPS is utilizing the most up-to-date tools and that any updates are clinically integrated across the PPS.										
Milestone #19 Form agreements with the Medicaid Managed Care organizations serving the affected population to coordinate services under this project.										
Task PPS has agreement in place with MCO related to coordination of services for high risk populations, including smoking cessation services, hypertension screening, cholesterol screening, and other preventive services relevant to this project.										
Task Identify current tools and services available to members for relevant MCOs across the PPS, including telehealth, care management, and stipends for completing recommended preventive screenings.										
Task Distribute materials regarding extant services and benefits available to members to providers participating in project										
Task Build prompts to these tools and services into provider EHRs										
Task Where feasible, make agreements with MCO related to coordination of services for high risk populations, including smoking cessation services, weight management, and other preventive services relevant to this project.										
Task Communicate payor information and include information on availability/how to access in training programs										
Milestone #20 Engage a majority (at least 80%) of primary care providers in

this project.										
Task PPS has engaged at least 80% of their PCPs in this activity.	0	0	0	0	0	0	0	0	0	0
Task Identify sites participating in project										
Task Ensure that all participating practices have signed MSA										
Task Identify opportunities to coordinate processes, education and communication including incorporation of increased blood pressure identification for screening checks into PCMH workflow processes.										
Task Ensure that hypertension program training is incoporated/included in other care coordination training sessions.										
Task Monitor activity/engagement and make periodic reports to QCIS / EC										
Task Develop feedback mechansims for accountability and continuous quality improvement for Site-Specific Implementation Teams.										

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #1 Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.										
Task PPS has implemented program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.										
Task Create a Transitional Work Group (CVD/DM TWG) comprised of representatives from partner organizations to support development of and approve elements of the COP										
Task Identify DSRIP project requirements which are related to PCMH elements and incorporate into PCMH strategy and project planning documents										
Task Identify relevant evidence-based guidelines for HTN and hyperlipidemia in conjunction with the CVD/DM TWG

Task Identify patient criteria for smoking cessation interventions (counsel to quit, smoking cessation medication, non-medication smoking cessation strategy)										
Task Identify partner organizations participating in project (sites and CBOs)										
Task Develop a workplan and timeline to develop the clinical operations plan (COPs) and implement a strategy for the CV population that aligns with the patient engagement speed and scale application submission										
Task Develop the COP to define the program elements, define the required and suggested components of those elements, and identify relevant resources to achieve them. Elements include health information exchange and technology requirements, and evidence-based guidelines and high-value treatment protocols										
Task Develop the project implementation budget										
Task Design training and recruitment strategy in conjunction with workforce team and CVD/DM TWG										
Task Submit elements of the COP to Quality and Care Innovation Sub-Committee (QCIS) for approval										
Task Identify clinical champions and operational leaders in each participating organization to develop and lead implementation of the program at each of their providers/sites. These facility-based champions/leaders form the Site-Specific Implementation Team										
Task Prepare/disseminate gap analysis tool based on COP to participating providers to determine implementaton support needs										
Task Hold webinar for participating partner organizations										
Task Create rapid deployment collaborative, comprised of representatives from partner organizations to support implementation of the COP. This group replaces the TWG and will be the implementation work group.										
Task Develop mechanisms for regular review of project-selected evidence-based guidelines (EBGs) by implementation work group to assure our PPS is utilizing the most up-to-date tools and

that those upadated guidelines/protocols continue to be clinically integrated across the PPS										
Milestone #2 Ensure that all PPS safety net providers are actively connected to EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the end of DY 3.										
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	74	494	494	494	494	494	494	494	494	494
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	1,087	1,812	1,812	1,812	1,812	1,812	1,812	1,812	1,812	1,812
Task EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.	18	122	122	122	122	122	122	122	122	122
Task PPS uses alerts and secure messaging functionality.										
Task Identify safety net provider data sharing requirements and assess partner and QE data sharing capabilities and current HIE participation										
Task Coordinate with Bronx RHIO to develop comprehensive HIE adoption program to encourage and support partner participation and integration										
Task Begin coordinated interface and service development with Bronx RHIO, including connectivity to the SHIN-NY.										
Task Establish BPHC program to manage support for safety net providers to ensure that all are actively sharing health information, coordinating with Bronx RHIO to encourage, track and support partner participation and integration/data sharing										
Task Track status and manage support to ensure that all PPS safety net providers are actively sharing health information through Bronx RHIO or alternative health information exchange										
Milestone #3 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.										
Task EHR meets Meaningful Use Stage 2 CMS requirements (Note: any/all MU requirements adjusted by CMS will be incorporated

into the assessment criteria).										
Task PPS has achieved NCQA 2014 Level 3 PCMH standards and/or APCM.	74	494	494	494	494	494	494	494	494	494
Task Assess eligible participating partner EHR use relative to Meaningful Use and PCMH 2014 Level 3 standards										
Task Establish BPHC program to educate, encourage, track and support eligible safety net providers in acquiring/implementing certified EHR systems, including potential use of incentive-based payments for implementation										
Task Recruit or contract for EHR implementation resources as needed										
Task Begin actively encouraging, tracking and supporting partner EHR implementation and progress towards Meaningful Use and PCMH standards										
Task Track status and manage support to ensure all eligible safety net providers are using certified EHR systems that meet Meaningful Use and PCMH 2014 Level 3 standards										
Task Assess eligible participating PCP PCMH recognition status and opportunity to expand access to primary care based on PCMH-enabled practices										
Task Recruit or contract for PCMH practice certification resources as needed										
Task Establish BPHC program to educate on the benefits of, and encourage, track and support PCPs and facility based senior leadership in achieving PCMH 2014 Level 3 recognition, including potential use of incentive-based payments for achieving recognition										
Task Perform gap analysis by practice and identify key priorities.										
Task Finalize strategy to support primary care physicians with achieving 2014 NCQA Level 3 PCMH certification by sub committees, including trainings and education.										
Task Begin actively encouraging, tracking and supporting partner efforts towards PCMH recognition

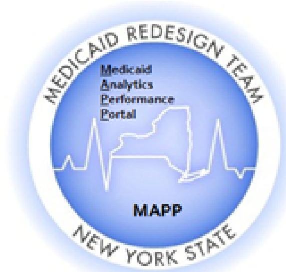
Task Monitor progress with achieving 2014 NCQA level 3 PCMH certification, support provided by PPS as needed.										
Task Monitor practice transformation sustainability after receiving 2014 NCQA level 3 PCMH certification, and provide support as needed.										
Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task Define population health management (PHM) requirements, establish PHM function and recruit or contract with partner for PHM staff										
Task Perform current state assessment of E.H.R. capabilities.										
Task Perform gap analysis and identify priories to achieving integration of patient record.										
Task Define business requirements and data elements for patient registry to stratify and track all patients engaged in this project.										
Task Recommend registry business requirements and data elements to governance committees for review and approval (Quality and Care Innovation Subcommittee, Information Technology Subcommittee and Executive Committee)										
Task Engage IT Subcommittee to identify technology and resource requirements for registry, including technical platform for hosting registry.										
Task Create budget to build registry and acquire necessary resources										
Task Assess and acquire or contract for care coordination management solution (CCMS) and other systems and services as required to support PHM and registries										
Task Develop project implementation and testing plan for building registry as required for PHM, including technical support, ensure frequent automated updates of registry data										
Task Develop training plan and curriculum to deploy risk assessment										



New York State Department Of Health
Delivery System Reform Incentive Payment Project

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
tool, registry and CCMS tool for providers and care managers, emphasizing use of registries and CCMS to increase care coordination and patient engagement with primary care										
Task Execute registry testing plan and training program for providers and care managers on systems use and on how to identify targeted patients and track those who are actively engaged for milestone reporting.										
Task Issue CCMS user credentials and train designated/delegated PPS partner workforce in use of the coordinated/ integrated solution. Disseminate standardized IT protocols and data security requirements across the system.										
Task Launch registry and monitor its use and performance, evaluate success of patient tracking, and participating provider utilization patterns, , with an emphasis on tracking patient engagement with primary care.										
Milestone #5 Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).										
Task PPS has implemented an automated scheduling system to facilitate tobacco control protocols.										
Task PPS provides periodic training to staff to incorporate the use of EHR to prompt the use of 5 A's of tobacco control.										
Task Identify/establish the protocols for the 5A's of tobacco control and services/programs to incorporate into COP										
Task Identify/develop member educational material and smoking cessation support tools for inclusion in COP										
Task Survey participants to determine capability of sites' EHR systems for providing point of care reminders										
Task Site-Specific Implementation Teams work with their IT teams to implement point-of-care prompts to facilitate tobacco control protocols into EHR workflows, including documentation										
Task Site-specific Implementation Teams establish and map interim manual processes to fulfill protocols in COP										
Task Establish the schedule and materials for periodic staff training to incorporate the use of the EHR to prompt the use of 5 A's of

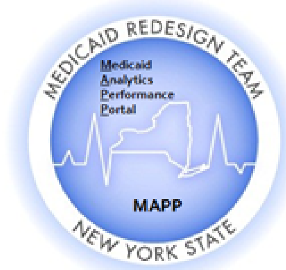
SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
tobacco control.										
Task Provide guidance for ongoing assesment to ensure that practices are following training requirements and protocols										
Task Develop feedback mechansims for accountability and continuous quality improvement										
Milestone #6 Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.										
Task Practice has adopted treatment protocols aligned with national guidelines, such as the National Cholesterol Education Program (NCEP) or US Preventive Services Task Force (USPSTF).										
Task Define target population, select EBGs for target population and present recommmendation to Quality & Care Innovation Sub-Committee (QCIS)										
Task QCIS reviews and recommends EBGs for adoption and implementation across the PPS										
Task Develops educational materials suitable to the needs, culture and language of the target populations in conjunction with select CBOs, PCPs, and SMEs										
Task Present educational materials to QCIS for review										
Task Identify clinical champions to drive adoption of guidelines										
Task Implement EBG and educational material dissemination plan across the PPS with support of RDC and site-specific implementation teams										
Milestone #7 Develop care coordination teams including use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-management.										
Task Clinically Interoperable System is in place for all participating providers.										
Task Care coordination teams are in place and include nursing staff, pharmacists, dieticians, community health workers, and Health Home care managers where applicable.										

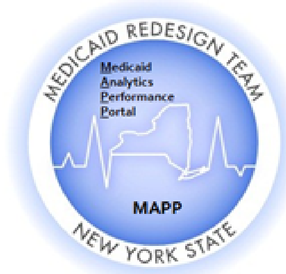


New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task Care coordination processes are in place.										
Task Coordinate across project specific workgroups to establish the care management model/organizational structure and processes most appropriate for achieving project outcomes; include nursing staff, pharmacists, dieticians, community health workers, and Health Home care managers										
Task Present care management model to QCIS for review and approval										
Task Working with Workforce Subcommittee, design training and recruitment strategy for care managers and care teams										
Task Begin to recruit, hire and train new and existing staff as needed.										
Task Site-specific implementation teams, with support from CSO and in coordination with PCMH work, establish care coordination team and implement care coordination processes (e.g., community service/program referrals and tracking, communication, PCP alerts, education materials, coordination among team members, frequency and purpose of patient contact.) Ensure these include coordination with the Health Home care manager, where applicable.										
Task Develop a mechanism to gather feedback and share best practices										
Task Provide guidance for ongoing assesment to ensure that practices are following requirements and protocols										
Task Identify and document required clinical and care management protocols for priority programs, projects and interventions, based on Community Needs Assessment, clinical planning to-date and further analysis of attributed patient population, using MAPP and PPS partner patient-level data										
Task Define partner and workforce roles in delivering care based on protocols and planned interventions in priority projects, including expectations for how interventions will be logged, tracked and reported.										
Task Deploy systems to improve and promote effective care transitions										



New York State Department Of Health

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task Operationalize partner and workforce roles by providing gap analysis and appropriate training.										
Task Establish data collection, survey and reporting mechanisms to enable BPHC monitoring to ensure that patients are receiving appropriate health care and community support in priority projects, based on needs identified in prior planning activities										
Task Review process for rapid cycle evaluation and continuous improvement of data collection, survey and reporting methods based on priority project experience and modify process as needed to ensure patients receive appropriate health care and community support										
Milestone #8 Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.										
Task All primary care practices in the PPS provide follow-up blood pressure checks without copayment or advanced appointments.	74	494	494	494	494	494	494	494	494	494
Task Review Million Hearts resources and other relevant literature related to implementation of similar programs and identify documents most relevant for PPS, including strategies to ensure that Medicaid patients are not charged a co-pay for blood pressure checks										
Task Conduct research into current coverage for such visits by Medicaid and coding for non-billable visits, etc.										
Task Conduct gap analysis to assess resources required to meet this requirement										
Task Meet with other PPSs to consider lobbying MCOs to cover such visit copays (make providers whole)										
Task Conduct periodic meetings/learning collaboratives with PCP practice partners to gather feedback and share best practices										
Task Provide guidance for ongoing assesment to ensure that practices are providing access for such visits										
Task Develop feedback mechansims for accountability and continuous quality improvement										
Milestone #9 Ensure that all staff involved in measuring and recording blood

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
pressure are using correct measurement techniques and equipment.										
Task PPS has protocols in place to ensure blood pressure measurements are taken correctly with the correct equipment.										
Task In conjunction with Workforce Subcommittee, identify relevant training resources and nursing competencies to create protocols (standardized across PPS) for inclusion in the COP										
Task Identify site-specific staff members responsible for BP measurement training and documenting training has occurred										
Task Provide guidance for ongoing assesment of staff competencies to ensure that practices are following training requirements and protocols										
Task Develop feedback mechansims for accountability and continuous quality improvement										
Milestone #10 Identify patients who have repeated elevated blood pressure readings in the medical record but do not have a diagnosis of hypertension and schedule them for a hypertension visit.										
Task PPS uses a patient stratification system to identify patients who have repeated elevated blood pressure but no diagnosis of hypertension.										
Task PPS has implemented an automated scheduling system to facilitate scheduling of targeted hypertension patients.										
Task PPS provides periodic training to staff to ensure effective patient identification and hypertension visit scheduling.										
Task Using EBGs identified in the COP, determine blood pressure program parameters and stratification levels for identification, enrollment and hypertension visit frequency										
Task Establish processes to use registry (see requirement 4), to reach out to patients and establish the process and person responsible for staff training on such processes.										
Task Support site-specific implementation teams to ensure that scheduling resources/technology fulfills project requirements.										
Task Conduct periodic meetings/learning collaboratives with PCP

practice partners to gather feedback and share best practices										
Task Provide guidance for ongoing assesment of competencies to ensure that practices are following training requirements and protocols										
Task Develop feedback mechansims for accountability and continuous quality improvement										
Milestone #11 Prescribe once-daily regimens or fixed-dose combination pills when appropriate.										
Task PPS has protocols in place for determining preferential drugs based on ease of medication adherence where there are no other significant non-differentiating factors.										
Task Determine criteria/limitations for use of once-daily and single dose medication regimens based on feedback from partners, review of MCO formularies and review of clinicial literature; include recommendations in COP										
Task Determine current status of the above regimens in payor and provider formularies, ease of prescribing in various EHRs										
Task Establish protocols for determining preferential drugs based on ease of medication adherence where there are no other significant non-differentiating factors for inclusion in COP										
Task Develop mechanisms for regular review of medication recommondations to assure our PPS is utilizing the most up-to-date tools and that any updated guidelines/protocols continue to be clinically integrated across the PPS										
Milestone #12 Document patient driven self-management goals in the medical record and review with patients at each visit.										
Task Self-management goals are documented in the clinical record.										
Task PPS provides periodic training to staff on person-centered methods that include documentation of self-management goals.										
Task Identify best practices for identification and follow-up of self-management goals into COP										
Task Identify relevant training resources /competencies in conjuction

with workforce subcommittee										
Task Establish plan to integrate self-management goals into the EHR with interim manual processes as needed										
Task Establish requirements and processes to ensure documentation of the goals										
Task Establish the schedule and materials for periodic staff training on person-centered methods that include documentation of self-management goals										
Task Provide guidance for ongoing assesment of competencies to ensure that practices are following training requirements and protocols										
Task Develop feedback mechansims for accountability, and continuous quality improvement, including assessment of patient adherence to self-management plan and opportunities to increase adherence.										
Milestone #13 Follow up with referrals to community based programs to document participation and behavioral and health status changes.										
Task PPS has developed referral and follow-up process and adheres to process.										
Task PPS provides periodic training to staff on warm referral and follow-up process.										
Task Agreements are in place with community-based organizations and process is in place to facilitate feedback to and from community organizations.										
Task Define processes for referral, and access to information among providers, and feedback processes to the practices electronically with interim manual processes as needed in conjunction with IT subcommittee										
Task Establish and document referral and follow-up procedures for the sites, with a mechanism for sites to audit adherence										
Task Identify community organizations for inclusion in the initial iteration of the Community Resource Database, sign agreements

with with community based organizations and establish process to facilitate feedback to and from community organizations										
Task Perform regular checks of Community Resource Database to ensure data is up to date and accurate and to identify additional resources to consider including										
Task Conduct periodic meetings/learning collaboratives with community organization partners to gather feedback and share best practices										
Task Establish the schedule and materials for periodic staff training on the warm transfer and referral tracking										
Milestone #14 Develop and implement protocols for home blood pressure monitoring with follow up support.										
Task PPS has developed and implemented protocols for home blood pressure monitoring.										
Task PPS provides follow up to support to patients with ongoing blood pressure monitoring, including equipment evaluation and follow-up if blood pressure results are abnormal.										
Task PPS provides periodic training to staff on warm referral and follow-up process.										
Task Identify minimal and recommended SBPM protocols needed to satisfy project requirements, including identification of patients' needs and linkage to support										
Task Conduct gap analysis with partners to identify implementation support needs										
Task Individual sites adopt protocols for at-home BP monitoring										
Task Identify staff member(s) at each site responsible for training patients in self-blood pressure monitoring, including equipment evaluation										
Task Establish workflow at each site to address patient-reported BP values that are out of range, including how are values reported and staff member(s) responsible for following up										
Task Conduct webinars/conference calls to ensure that all practices have protocols in place and are adhering to them

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task Define training requirements in conjuction with Workforce Subcommittee										
Task Identify nursing competencies and training resources to support SBPM in conjuction with Workforce Subcommittee										
Task Create patient communication materials in coordination with the Cultural Competency/Health Literacy orkstream										
Task Conduct periodic meetings/learning collaboratives with community organization partners to gather feedback and share best practices										
Task Establish schedule and materials for periodic staff training on the warm transfer and referral follow-up process										
Task Develop feedback mechansims for accountability and continuous quality improvement										
Milestone #15 Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.										
Task PPS has implemented an automated scheduling system to facilitate scheduling of targeted hypertension patients.										
Task Using EBGs identified in the COP, determine parameters for patient stratification, identification, and hypertension visit frequency										
Task Establish processes to use registry (see requirement 4), to reach out to patients and establish processes and person responbile for staff training on such processes.										
Task Support site-specific implementation teams to ensure that scheduling resources/technology fulfills projecct requirements.										
Task Conduct periodic meetings/learning collaboratives with sites to gather feedback and share best practices										
Task Provide guidance for ongoing assesment of competencies to ensure that sites are following training requirements and protocols										
Task Develop feedback mechansims for accountability and continuous quality improvement

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Milestone #16 Facilitate referrals to NYS Smoker's Quitline.										
Task PPS has developed referral and follow-up process and adheres to process.										
Task Define criteria for referral to Quitline										
Task Establish and document process for referral to Quitline and patient follow-up										
Task Create culturally-competent communication materials at appropriate health literacy levels materials with the Quitline telephone number and website										
Task Develop feedback mechansims for accountability and continuous quality improvement										
Milestone #17 Perform additional actions including "hot spotting" strategies in high risk neighborhoods, linkages to Health Homes for the highest risk population, group visits, and implementation of the Stanford Model for chronic diseases.										
Task If applicable, PPS has Implemented collection of valid and reliable REAL (Race, Ethnicity, and Language) data and uses the data to target high risk populations, develop improvement plans, and address top health disparities.										
Task If applicable, PPS has established linkages to health homes for targeted patient populations.										
Task If applicable, PPS has implemented Stanford Model through partnerships with community-based organizations.										
Task Using claims data to identify "hotspot" areas/patient groups for outreach										
Task Identify and mitigate service shortages to address these "hotspots" which can include mobile services and use of churches and community centers for education and blood pressure screening.										
Task Implement collection of valid and reliable REAL (Race, Ethnicity, and Language) data and uses the data to target high risk populations, develop improvement plans, and address top health

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task PPS has agreement in place with MCO related to coordination of services for high risk populations, including smoking cessation services, hypertension screening, cholesterol screening, and other preventive services relevant to this project.										
Task Identify current tools and services available to members for relevant MCOs across the PPS, including telehealth, care management, and stipends for completing recommended preventive screenings.										
Task Distribute materials regarding extant services and benefits available to members to providers particippting in project										
Task Build prompts to these tools and services into provider EHRs										
Task Where feasible, make agreements with MCO related to coordination of services for high risk populations, including smoking cessation services, weight management, and other preventive services relevant to this project.										
Task Communicate payor information and include information on availability/how to access in training programs										
Milestone #20 Engage a majority (at least 80%) of primary care providers in this project.										
Task PPS has engaged at least 80% of their PCPs in this activity.	74	494	494	494	494	494	494	494	494	494
Task Identify sites participating in project										
Task Ensure that all participating practices have signed MSA										
Task Identify opportunities to coordinate processes, education and communication including incorporation of increased blood pressure identification for screening checks into PCMH workflow processes.										
Task Ensure that hypertension program training is incoporated/included in other care coordination training sessions.										
Task Monitor activity/engagement and make periodic reports to QCIS / EC										
Task Develop feedback mechansims for accountability and continuous

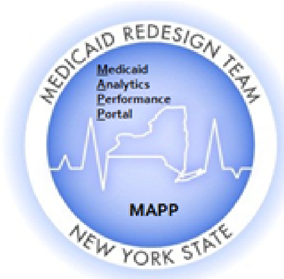
Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.	Clinical evidence-based guidelines (EBGs) and home-based services for hypertension (including at-home blood-pressure monitoring) and elevated cholesterol were developed by the CVD/Diabetes Transitional Work Group (TWG) and recommended to the Quality and Care Innovation Subcommittee for adoption. The Subcommittee approved one set of guidelines, which will be incorporated into the Clinical Operations Plan and distributed in Q3 to the participating member organizations of our PPS and are to be incorporated into the protocols and implemented by the medical care providers and care teams of the sites of the participating organizations. The development of mechanisms for regular review of the EBGs is scheduled to begin in DY 1, Q4. The wording of the QCIS tasks were updated to more accurately capture their clinical role.
Ensure that all PPS safety net providers are actively connected to EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the end of DY 3.	BPHC is engaged in high level discussions with the Bronx RHIO to determine capabilities and negotiate terms. There is a regular weekly meeting between stakeholders from the Bronx RHIO and BPHC to formulate the strategy for use and implementation of the RHIO and SHIN-NY. Additionally, use of the RHIO and SHIN-NY is one of the technology components/tools which are being incorporated into the patient flow section of the Clinical Operations Plan.
Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.	PCMH consultants, hired by BPHC, are conducting site-specific gap analyses with BPHC PCPs and formulating a strategy for their achievement of PCMH 2014 Level 3 certification and Meaningful Use. This work includes assessing current EHR capabilities/standards at the sites and formulating a plan to meet Meaningful use and PCMH Level 3 standards by the end of DY3, with the support of the CSO.
Use EHRs or other technical platforms to track all patients engaged in this project.	The four tasks under this milestone concerning, variously, assessing the capabilities and requirements of EHRs and other technical platforms for tracking actively engaged patients, e.g., patient registry, are on track to be completed in DY 1, Q3 as scheduled. The CVD/Diabetes Transitional Work Group (TWG) finalized their recommendation regarding the data elements for patient registries for project 3.b.i. This recommendation will be incorporated into feedback from other project-specific workgroups to develop a coordinated PPS-wide strategy to support all project requirements.
Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).	As part of their Q2 work, the CVD/Diabetes TWG reviewed the Million Hearts resources and other relevant literature and identified member educational material and smoking cessation support tools for inclusion in the Clinical Operations Plan (COP). The work toward this milestone (including incorporation of prompts in the EHR) will continue into the following year, as part of the work of the CVD/Diabetes Implementation Workgroup.
Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.	Clinical evidence-based guidelines (EBGs) and home-based services for hypertension (including at-home blood-pressure monitoring) and elevated cholesterol were developed by the CVD/Diabetes Transitional Work Group (TWG) and recommended to the Quality and Care Innovation Subcommittee for adoption. The Subcommittee approved one set of guidelines, which will be incorporated into the Clinical Operations Plan and distributed in Q3 to the participating member organizations of our PPS and are to be incorporated into the protocols and implemented by the medical care providers and care teams of the sites of the participating organizations. The development of mechanisms for regular review of the EBGs is scheduled to begin in DY 1, Q4.



New York State Department Of Health
Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop care coordination teams including use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-management.	The CVD/Diabetes Transitional Work Group (TWG) provided feedback on approved the "minimum" care management staffing model developed by the Health Home At-Risk TWG, including target population, assessment tools, and a care management staffing model. They also provided feedback on the additional members of the care management team needed to fulfil the care coordination requirements of the CVD project. This model will be incorporated in the Clinical Operation Plan and distributed in Q3 to the participating member organizations of our PPS and are to be incorporated into the protocols and implemented by the medical care providers and care teams of the sites of the participating organizations.
Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.	As part of their Q2 work, the CVD/Diabetes TWG reviewed the Million Hearts resources and other relevant literature related to implementation of similar programs and identify documents most relevant for PPS, including strategies to ensure that Medicaid patients are not charged a co-pay for blood pressure checks. This work will continue into the following year, as part of the work of the CVD/Diabetes Implementation Workgroup.
Ensure that all staff involved in measuring and recording blood pressure are using correct measurement techniques and equipment.	Education in correct blood pressure measurement has been identified as one of the elements of the consolidated training curriculum being developed by the Workforce Subcommittee. As part of their Q2 work, the CVD/Diabetes TWG identified resources from the Million Hearts materials as well as existing nursing competencies which may be used as source material for this curriculum.
Identify patients who have repeated elevated blood pressure readings in the medical record but do not have a diagnosis of hypertension and schedule them for a hypertension visit.	As part of their Q2 work, the CVD/Diabetes TWG considered and recommended that the CVD component of the PPS-wide, cross-project registry being developed should be used to fulfill this requirement. As such, the data elements required to fulfill this task were considered and included in the data elements recommended for inclusion. This recommendation will be incorporated into feedback from other project-specific workgroups to develop a coordinated PPS-wide strategy to support all project requirements.
Prescribe once-daily regimens or fixed-dose combination pills when appropriate.	As part of their Q2 work, the CVD/Diabetes TWG considered and developed a recommend policy to fulfill the project requirement to improve medication adherence through preferential prescription of more convenient medication formulations. At the 7/28 meeting, the TWG unanimously approved the recommendation that where patients' insurance status allows and it is medically appropriate, PCPs will preferentially prescribe combination drugs, once-daily formulations, and 90-day supplies. Additionally, the TWG approved the recommendation that where adherence is an issue, BPHC will assist patients in finding pharmacies that offer blister packs, and pill boxes, etc.. This recommendation will be recommended to the Quality and Care Innovation Subcommittee for adoption and eventual incorporation into the Clinical Operations Plan and distributed in Q3 to the participating member organizations of our PPS.
Document patient driven self-management goals in the medical record and review with patients at each visit.	As part of their Q2 work, the CVD/Diabetes TWG considered and recommended a protocol for a policy / best practices around patient self-management goals. The recommendations were based / aligned with NCQA PCMH 2013 guidance on patient self-management goals. This policy was approved at the 8/26 meeting of the TWG.
Follow up with referrals to community based programs to document participation and behavioral and health status changes.	BPHC is mapping service providers and developing a directory of CBOs and community services. A strategy for establishing partnerships is under discussion with partners. Additionally, referrals to community-based programs is one of the elements which has been identified for inclusion in the workflows being developed at the sites by the site-specific implementation teams. The wording of the audit task has been changed to reflect an update to BPHC's reporting processes.
Develop and implement protocols for home blood pressure monitoring with follow up support.	At the 7/28 meeting of the CVD /Diabetes TWG, the members approved the recommendation to use the Million Hearts guidelines for Self-Measured Blood Pressure Monitoring as the minimum SBPM program.
Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.	
Facilitate referrals to NYS Smoker's Quitline.	As part of their Q2 work, the CVD/Diabetes TWG defined the BPHC protocol for smoking cessation/referral to New York State Smokers' Quitline. This policy will be included in the Clinical Operations Plan (COP) and distributed in Q3 to the participating member organizations of our PPS.
Perform additional actions including "hot spotting" strategies in high risk neighborhoods, linkages to Health Homes for the highest risk population, group visits, and implementation of the Stanford Model

for chronic diseases.	
Adopt strategies from the Million Hearts Campaign.	As part of their two July meetings, the CVD/Diabetes TWG reviewed and approved selected patient educational materials and provider tools from the Million Hearts Patient Tools and Educational materials for inclusion as recommended resources in the Clinical Operations Plan. These tools include algorithms for BP treatment, nontraditional visits, self-management and motivational interviewing. These recommendations were subsequently approved by the QCIS sub-committee.
Form agreements with the Medicaid Managed Care organizations serving the affected population to coordinate services under this project.	The CVD/Diabetes TWG identified opportunities to form agreements with Medicaid Managed Care organizations for the CVD project as part of their recommendations. Additionally, staff at the BPHC identified existing benefits provided by Medicaid Managed Care organizations providing services to BPHC-attributed patients that patients in the CVD/Diabetes project may not know about and could benefit from. Additionally, BPHC's CMO has made the topic of partnership/agreements with Medicaid MCOs a priority topic at the regularly-scheduled cross-PPS meetings hosted by GNYHA.
Engage a majority (at least 80%) of primary care providers in this project.	This quarter, BPHC continued the outreach efforts to participating sites that began in Q1. The CSO developed project participation materials and events to identify the sites participating in each project. In order to meet the 80% participation rate target, project participation materials distributed to sites indicate that 3.b.i is required for all adult primary care practices.

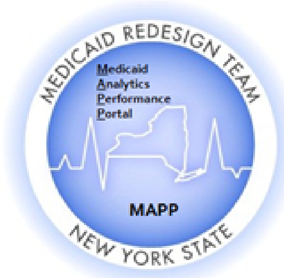
IPQR Module 3.b.i.5 - IA Monitoring

Instructions :



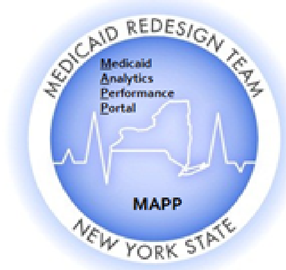
Project 3.c.i – Evidence-based strategies for disease management in high risk/affected populations (adults only)

IPQR Module 3.c.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Some primary care physicians (PCPs) may resist the imposition of standard treatment protocols & new workflows. To mitigate this risk, our disease management work groups will bring PCPs & other project participants together to review & develop a consensus on evidence-based (EB) guidelines & workflows for each disease-specific intervention. Members will recommend these EB protocols to the PPS Quality & Care Innovation Sub-Committee, & the Executive Committee. Implementation of these protocols will be part of contractual agreements between partners & the PPS. BPHC will allocate the necessary resources to provide online & in-person training, support & follow up with physicians & other care team members at times that accommodate their clinical schedules to encourage adoption of program elements.
It will be challenging to recruit & train sufficient care management staff to serve the needs of the Bronx population. Recruiting Spanish-speaking care management staff will be a particular risk. BPHC's workforce strategy will be targeted towards mitigating this risk, such as through the CSO working with community colleges & coordinating with the 1199 Job Security Fund, Montefiore CMO, & NYSNA to identify capable workers & provide training in Spanish when needed. BPHC will also use alternative employment tactics, such as flexible hours, & job sharing where feasible to attract a broader pool of workers.
Attaining 2014 PCMH Level 3 recognition is difficult & resource intensive, particularly for smaller primary care practices. The CSO will provide technical & financial assistance, including IT support & training, to primary care practices as they work to attain PCMH Level 3 recognition.
Medication adherence is a chronic problem for individuals with chronic illness including those with diabetes. Organizations that could be instrumental in helping patients with medication adherence, such as home care agencies & MCOs are handicapped by policies &/or regulations. To mitigate these risks, BPHC will work with MCOs to institute policy changes that will promote medication adherence.
Enhancing patient self-management & self-efficacy is anticipated to be a particular risk to the success of Project 3.c.i. It is challenging to effectively motivate & engage chronically ill patients over the long term to embrace changes in behavior & self-manage their condition. Many patients do not grasp the effects of diabetes & unmanaged diabetes, risks that are compounded in the Bronx population by low health literacy & educational attainment. These challenges are exacerbated by the complex, multi-organ nature of diabetes, requiring an interdisciplinary treatment approach. Among its mitigation tactics, BPHC plans to implement the Stanford Model across the PPS to address this risk. This peer led model requires a large time commitment from participants, & few certified trainers are available. BPHC will contract with Health People, a CBO that is a certified Stanford Model trainer.In addition, Project 3.c.i in conjunction with Projects 2.a.iii & 3.b.i will enable BPHC to invest in more peer educators, care managers, & certified diabetes educators to educate patients & promote self-management. Hard-to-reach patients require dedicated staff to bond with the patient, & consistency is important. Health Homes will provide valuable long-term follow up to promote engagement.
Providers may not implement EHR systems that meet MU & PCMH Level 3 standards, interoperability challenges may present &/or providers may resist participating in the IDS. BPHC will use gap analysis to develop a program to monitor & deploy assistance to providers at risk, support practices by deploying internal community, external consulting resources & provide customized technical assistance, coaching, & training modules.



IPQR Module 3.c.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Patient Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q3 should include patients previously reported in DY1 Q2 plus new patients engaged in DY1 Q3. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
100% Actively Engaged By	Expected Patient Engagement
DY2,Q4	25,800

Patient Update		% of Semi-Annual Commitment To-Date	Semi-Annual Variance of Projected to Actual	% of Total Actively Engaged Patients To-Date
DY1, Q1	DY1,Q2			
0	4,501	104.67%	-201	17.45%

IPQR Module 3.c.i.3 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement.
Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Implement evidence-based best practices for disease management, specific to diabetes, in community and ambulatory care settings.	Project	N/A	In Progress	04/01/2015	03/31/2018	04/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task Evidence-based strategies for the management and control of diabetes in the PPS designated area are developed and implemented for all participating providers. Protocols for disease management are developed and training of staff is completed.	Project		In Progress	06/30/2015	03/31/2018	06/30/2015	03/31/2018	03/31/2018	DY3 Q4

Milestone #1 Implement evidence-based best practices for disease management, specific to diabetes, in community and ambulatory care settings.										
Task Evidence-based strategies for the management and control of diabetes in the PPS designated area are developed and implemented for all participating providers. Protocols for disease management are developed and training of staff is completed.										
Task Create a Transitional Work Group (CVD/Diabetes TWG) comprised of representatives from partner organizations to support development of and approve elements of the COP										
Task Identify DSRIP project requirements which are related to PCMH elements and incorporate into PCMH strategy and project planning documents										
Task Identify relevant evidence-based guidelines for diabetes										
Task Identify partner organizations participating in project (sites and CBOs)										
Task Develop a workplan and timeline to develop the clinical operations plan (COPs) and implement a strategy for the diabetes population that aligns with the patient engagement speed and scale application submission										
Task Develop the COP to define the program elements, define the required and suggested components of those elements, and identify relevant resources to achieve them. Elements include health information exchange and technology requirements, and evidence-based guidelines and high-value treatment protocols										
Task Develop the project implementation budget

Task Design training and recruitment strategy in conjunction with workforce team and CVD/DM TWG										
Task Submit elements of the COP to Quality and Care Innovation Sub-Committee (QCIS) for approval										
Task Identify clinical champions and operational leaders in each participating organization to develop and lead implementation of the program at each of their providers/sites. These facility-based champions/leaders form the Site-Specific Implementation Team										
Task Prepare/disseminate gap analysis tool based on COP to participating providers to determine implementaton support needs										
Task Hold webinar for participating partner organizations										
Task Create a rapid deployment collaborative, comprised of representatives from partner organizations to support implementation of the COP and to provide updates to QCIS. and to update the COP annually.										
Task Develop mechanisms for regular review of project-selected Evidence Based Guidelines (by project quality councils) to assure our PPS is utilizing the most up-to-date tools and that those updated guidelines/protocols continue to be clinically integrated across the PPS.										
Milestone #2 Engage at least 80% of primary care providers within the PPS in the implementation of disease management evidence-based best practices.										
Task PPS has engaged at least 80% of their PCPs in this activity.	0	0	0	0	0	0	0	0	0	0
Task Identify sites participating in project. In order to meet the 80% participation rate target, project participation materials distributed to sites indicate that 3.c.i is required for all adult primary care practices.										
Task Ensure that all participating practices have signed MSA										
Task Identify opportunities to coordinate processes, education and communication into PCMH workflow processes.										
Task Collaborate with other BPHC project-specific workgroups and

teams to ensure that diabetes management training is incoporated/included in other care coordination training sessions.										
Task Monitor acitivity/engagement and make periodic reports to QCIS / EC										
Task Develop methodology for evaluation, feedback and Continuous Quality Improvement.										
Milestone #3 Develop care coordination teams (including diabetes educators, nursing staff, behavioral health providers, pharmacy, community health workers, and Health Home care managers) to improve health literacy, patient self-efficacy, and patient self-management.										
Task Clinically Interoperable System is in place for all participating providers.										
Task Care coordination teams are in place and include nursing staff, pharmacists, dieticians, community health workers, and Health Home care managers where applicable.										
Task Care coordination processes are established and implemented.										
Task Coordinate to establish the care team and care coordination/management framework/organizational structure and processes most appropriate for achieving project outcome, including nursing staff, pharmacists, dieticians, community health workers, and Health Home care managers where applicable.										
Task Present care management model to QCIS for review and approval										
Task Establish care coordination teams and processes; include community service and program referrals and tracking, communication, PCP alerts, education materials, coordination among team members, frequency and purpose of patient contact. Ensure these include coordination with the Health Home care manager, where applicable.										
Task Working with Workforce Subcommittee, design training and recruitment strategy for care coordinators/managers and care teams with a training focus on improving health literacy, patient self-efficacy.										
Task Identify site-specific implementation teams.

Task Launch recruitment and training programs with participating providers										
Task Identify and document required clinical and care management protocols for priority programs, projects and interventions, based on Community Needs Assessment, clinical planning to-date and further analysis of attributed patient population, using MAPP and PPS partner patient-level data										
Task Define partner and workforce roles in delivering care based on protocols and planned interventions in priority projects, including expectations for how interventions will be logged, tracked and reported.										
Task Deploy systems to improve and promote effective care transitions, include protocols for tracking and follow-up										
Task Operationalize partner and workforce roles by providing gap analysis and appropriate training.										
Task Establish data collection, survey and reporting mechanisms to enable BPHC monitoring to ensure that patients are receiving appropriate health care and community support in priority projects, based on needs identified in prior planning activities										
Task Review process for rapid cycle evaluation and continuous improvement of data collection, survey and reporting methods based on priority project experience and modify process as needed to ensure patients receive appropriate health care and community support										
Milestone #4 Develop "hot spotting" strategies, in concert with Health Homes, to implement programs such as the Stanford Model for chronic diseases in high risk neighborhoods.										
Task If applicable, PPS has Implemented collection of valid and reliable REAL (Race, Ethnicity, and Language) data and uses the data to target high risk populations, develop improvement plans, and address top health disparities.										
Task If applicable, PPS has established linkages to health homes for targeted patient populations.										
Task If applicable, PPS has implemented Stanford Model through

partnerships with community-based organizations.										
Task Using claims data identify "hotspot" areas/patient groups for outreach										
Task Identify and mitigate service shortages to address these "hotspots" which can include mobile services and use of churches and community centers for education and blood pressure screening.										
Task Implement collection of valid and reliable REAL (Race, Ethnicity, and Language) data and uses the data to target high risk populations, develop improvement plans, and address top health disparities, if feasible.										
Task Establish linkages to health homes for targeted patient populations										
Task Implement the Stanford Model through partnerships with community based organizations, including Health People										
Milestone #5 Ensure coordination with the Medicaid Managed Care organizations serving the target population.										
Task PPS has agreement in place with MCO related to coordination of services for high risk populations, including smoking cessation services, hypertension screening, cholesterol screening, and other preventive services relevant to this project.										
Task Identify current tools and services available to members for relevant MCOs across the PPS, including telehealth, care management, stipend for completing recommended preventive screenings.										
Task Distribute materials regarding extant services and benefits available to members to providers participating in project										
Task Build prompts to these tools and services into provider EHRs										
Task Where feasible, make agreements with MCO related to coordination of services for high risk populations, including smoking cessation services, weight management, and other preventive services relevant to this project.										
Task Communicate payor information and include information on

availability/how to access in training programs										
Milestone #6 Use EHRs or other technical platforms to track all patients engaged in this project.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task PPS uses a recall system that allows staff to report which patients are overdue for which preventive services and to track when and how patients were notified of needed services.										
Task Define population health management (PHM) requirements, establish PHM function and recruit or contract with partner for PHM staff										
Task Perform current state assessment of E.H.R. capabilities.										
Task Perform gap analysis and identify priories to achieving integration of patient record.										
Task Define business requirements and data elements for patient registry to stratify and track all patients engaged in this project.										
Task Recommend registry business requirements and data elements to governance committees for review and approval (Quality and Care Innovation Subcommittee, Information Technology Subcommittee and Executive Committee)										
Task Engage IT Subcommittee to identify technology and resource requirements for registry, including technical platform for hosting registry.										
Task Create budget to build registry and acquire necessary resources										
Task Assess and acquire or contract for care coordination management solution (CCMS) and other systems and services as required to support PHM and registries										
Task Develop project implementation and testing plan for building registry as required for PHM, including technical support, ensure frequent automated updates of registry data										
Task Develop training plan and curriculum to deploy risk assessment tool, registry and CCMS tool for providers and care managers,

Elements include health information exchange and technology requirements, and evidence-based guidelines and high-value treatment protocols										
Task Develop the project implementation budget										
Task Design training and recruitment strategy in conjunction with workforce team and CVD/DM TWG										
Task Submit elements of the COP to Quality and Care Innovation Sub-Committee (QCIS) for approval										
Task Identify clinical champions and operational leaders in each participating organization to develop and lead implementation of the program at each of their providers/sites. These facility-based champions/leaders form the Site-Specific Implementation Team										
Task Prepare/disseminate gap analysis tool based on COP to participating providers to determine implementaton support needs

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task Hold webinar for participating partner organizations										
Task Create a rapid deployment collaborative, comprised of representatives from partner organizations to support implementation of the COP and to provide updates to QCIS. and to update the COP annually.										
Task Develop mechanisms for regular review of project-selected Evidence Based Guidelines (by project quality councils) to assure our PPS is utilizing the most up-to-date tools and that those updated guidelines/protocols continue to be clinically integrated across the PPS.										
Milestone #2 Engage at least 80% of primary care providers within the PPS in the implementation of disease management evidence-based best practices.										
Task PPS has engaged at least 80% of their PCPs in this activity.	74	494	494	494	494	494	494	494	494	494
Task Identify sites participating in project. In order to meet the 80% participation rate target, project participation materials distributed to sites indicate that 3.c.i is required for all adult primary care practices.										
Task Ensure that all participating practices have signed MSA										
Task Identify opportunities to coordinate processes, education and communication into PCMH workflow processes.										
Task Collaborate with other BPHC project-specific workgroups and teams to ensure that diabetes management training is incoporated/included in other care coordination training sessions.										
Task Monitor acitivity/engagement and make periodic reports to QCIS / EC										
Task Develop methodology for evaluation, feedback and Continuous Quality Improvement.										
Milestone #3 Develop care coordination teams (including diabetes educators, nursing staff, behavioral health providers, pharmacy, community health workers, and Health Home care managers) to improve health literacy, patient self-efficacy, and patient self-management.

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task Clinically Interoperable System is in place for all participating providers.										
Task Care coordination teams are in place and include nursing staff, pharmacists, dieticians, community health workers, and Health Home care managers where applicable.										
Task Care coordination processes are established and implemented.										
Task Coordinate to establish the care team and care coordination/management framework/organizational structure and processes most appropriate for achieving project outcome, including nursing staff, pharmacists, dieticians, community health workers, and Health Home care managers where applicable.										
Task Present care management model to QCIS for review and approval										
Task Establish care coordination teams and processes; include community service and program referrals and tracking, communication, PCP alerts, education materials, coordination among team members, frequency and purpose of patient contact. Ensure these include coordination with the Health Home care manager, where applicable.										
Task Working with Workforce Subcommittee, design training and recruitment strategy for care coordinators/managers and care teams with a training focus on improving health literacy, patient self-efficacy.										
Task Identify site-specific implementation teams.										
Task Launch recruitment and training programs with participating providers										
Task Identify and document required clinical and care management protocols for priority programs, projects and interventions, based on Community Needs Assessment, clinical planning to-date and further analysis of attributed patient population, using MAPP and PPS partner patient-level data										
Task Define partner and workforce roles in delivering care based on protocols and planned interventions in priority projects, including expectations for how interventions will be logged, tracked and reported.

Project Requirements (Milestone/Task Name)	DY3,Q3	DY3,Q4	DY4,Q1	DY4,Q2	DY4,Q3	DY4,Q4	DY5,Q1	DY5,Q2	DY5,Q3	DY5,Q4
Task Deploy systems to improve and promote effective care transitions, include protocols for tracking and follow-up										
Task Operationalize partner and workforce roles by providing gap analysis and appropriate training.										
Task Establish data collection, survey and reporting mechanisms to enable BPHC monitoring to ensure that patients are receiving appropriate health care and community support in priority projects, based on needs identified in prior planning activities										
Task Review process for rapid cycle evaluation and continuous improvement of data collection, survey and reporting methods based on priority project experience and modify process as needed to ensure patients receive appropriate health care and community support										
Milestone #4 Develop "hot spotting" strategies, in concert with Health Homes, to implement programs such as the Stanford Model for chronic diseases in high risk neighborhoods.										
Task If applicable, PPS has Implemented collection of valid and reliable REAL (Race, Ethnicity, and Language) data and uses the data to target high risk populations, develop improvement plans, and address top health disparities.										
Task If applicable, PPS has established linkages to health homes for targeted patient populations.										
Task If applicable, PPS has implemented Stanford Model through partnerships with community-based organizations.										
Task Using claims data identify "hotspot" areas/patient groups for outreach										
Task Identify and mitigate service shortages to address these "hotspots" which can include mobile services and use of churches and community centers for education and blood pressure screening.										
Task Implement collection of valid and reliable REAL (Race, Ethnicity, and Language) data and uses the data to target high risk populations, develop improvement plans, and address top health

disparities, if feasible.										
Task Establish linkages to health homes for targeted patient populations										
Task Implement the Stanford Model through partnerships with community based organizations, including Health People										
Milestone #5 Ensure coordination with the Medicaid Managed Care organizations serving the target population.										
Task PPS has agreement in place with MCO related to coordination of services for high risk populations, including smoking cessation services, hypertension screening, cholesterol screening, and other preventive services relevant to this project.										
Task Identify current tools and services available to members for relevant MCOs across the PPS, including telehealth, care management, stipend for completing recommended preventive screenings.										
Task Distribute materials regarding extant services and benefits available to members to providers participating in project										
Task Build prompts to these tools and services into provider EHRs										
Task Where feasible, make agreements with MCO related to coordination of services for high risk populations, including smoking cessation services, weight management, and other preventive services relevant to this project.										
Task Communicate payor information and include information on availability/how to access in training programs										
Milestone #6 Use EHRs or other technical platforms to track all patients engaged in this project.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task PPS uses a recall system that allows staff to report which patients are overdue for which preventive services and to track when and how patients were notified of needed services.										
Task Define population health management (PHM) requirements,

establish PHM function and recruit or contract with partner for PHM staff										
Task Perform current state assessment of E.H.R. capabilities.										
Task Perform gap analysis and identify priories to achieving integration of patient record.										
Task Define business requirements and data elements for patient registry to stratify and track all patients engaged in this project.										
Task Recommend registry business requirements and data elements to governance committees for review and approval (Quality and Care Innovation Subcommittee, Information Technology Subcommittee and Executive Committee)										
Task Engage IT Subcommittee to identify technology and resource requirements for registry, including technical platform for hosting registry.										
Task Create budget to build registry and acquire necessary resources										
Task Assess and acquire or contract for care coordination management solution (CCMS) and other systems and services as required to support PHM and registries										
Task Develop project implementation and testing plan for building registry as required for PHM, including technical support, ensure frequent automated updates of registry data										
Task Develop training plan and curriculum to deploy risk assessment tool, registry and CCMS tool for providers and care managers, emphasizing use of registries and CCMS to increase care coordination and patient engagement with primary care										
Task Execute registry testing plan and training program for providers and care managers on systems use and on how to identify targeted patients and track those who are actively engaged for milestone reporting.										
Task Issue CCMS user credentials and train designated/delegated PPS partner workforce in use of the coordinated/ integrated solution. Disseminate standardized IT protocols and data security requirements across the system.										
Task Launch registry and monitor its use and performance, evaluate

success of patient tracking, and participating provider utilization patterns, , with an emphasis on tracking patient engagement with primary care.										
Task Site-specific implementation teams establish processes to use PHM tools/registry, to identify, reach out and track patients due for preventive services.										
Task Ensure that IT solutions (within registry or other) allow for "closed loop processing" e.g., tracking of patient through completion of any given preventive service.										
Task Conduct training around closed loop processing/referral and preventive service tracking.										
Task Provide guidance for ongoing assesment to ensure that practices are following requirements and protocols, and offer guidance to develop mechanisms for continuous quality improvement.										
Task Identify safety net provider data sharing requirements and assess partner and QE data sharing capabilities and current HIE participation										
Task Coordinate with Bronx RHIO to develop comprehensive HIE adoption program to encourage and support partner participation and integration										
Task Begin coordinated interface and service development with Bronx RHIO										
Task Establish BPHC program to manage support for safety net providers to ensure that all are actively sharing health information, coordinating with Bronx RHIO to encourage, track and support partner participation and integration/data sharing										
Task Track status and manage support to ensure that all PPS safety net providers are actively sharing health information through Bronx RHIO or alternative health information exchange										
Task Identify community organizations for inclusion in the initial iteration of the Community Resource Database, sign agreements with with community based organizations and establish process to facilitate feedback to and from community organizations										
Task Perform regular checks of Community Resource Database to ensure data is up to date and accurate and to identify additional

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Implement evidence-based best practices for disease management, specific to diabetes, in community and ambulatory care settings.	The CVD-Diabetes Transitional Work Group (TWG) convened four times this quarter to develop plans for the program, including target population, evidence-based guidelines, referral protocols, patient flows, care team roles, and patient/caregiver education and engagement. The program elements are being finalized in the Clinical Operations Plan, which is in the process of finalization. Budget, recruitment, and training plans are in development. Wording of QCIS task updated to better reflect the clinical role of the group.
Engage at least 80% of primary care providers within the PPS in the implementation of disease management evidence-based best	This quarter, BPHC continued the outreach efforts to participating sites that began in Q1. The CSO developed project participation materials and events to identify the sites participating in each project. In order to meet the 80% participation rate target, project participation materials distributed to sites indicate that

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
practices.	3.c.i is required for all adult primary care practices.
Develop care coordination teams (including diabetes educators, nursing staff, behavioral health providers, pharmacy, community health workers, and Health Home care managers) to improve health literacy, patient self-efficacy, and patient self-management.	The CVD/Diabetes TWG provided feedback on approved the "minimum" care management staffing model developed by the Health Home At-Risk TWG, including target population, assessment tools, and a care management staffing model. They also provided feedback on the additional members of the care management team needed to fulfil the care coordination requirements of the diabetes project, including certified diabetes educators (CDEs). This model will be incorporated in the Clinical Operation Plan and distributed in Q3 to the participating member organizations of our PPS and are to be incorporated into the protocols and implemented by the medical care providers and care teams of the sites of the participating organizations.
Develop "hot spotting" strategies, in concert with Health Homes, to implement programs such as the Stanford Model for chronic diseases in high risk neighborhoods.	
Ensure coordination with the Medicaid Managed Care organizations serving the target population.	The CVD/Diabetes TWG identified opportunities to form agreements with Medicaid Managed Care organizations for the diabetes project as part of their recommendations. Additionally, staff at the BPHC identified existing benefits provided by Medicaid Managed Care organizations providing services to BPHC's attributed patients that patients in the Diabetes project may not know about and could benefit from. Additionally, BPHC's CMO has made the topic of partnership/agreements with Medicaid MCOs a priority topic at the regularly-scheduled cross-PPS meetings hosted by GNYHA.
Use EHRs or other technical platforms to track all patients engaged in this project.	The four tasks under this milestone concerning, variously, assessing the capabilities and requirements of EHRs and other technical platforms for tracking actively engaged patients, e.g., patient registry, are on track to be completed in DY 1, Q3 as scheduled. The CVD/Diabetes TWG finalized their recommendation regarding the data elements for patient registries for project 3.c.i. This recommendation will be incorporated into feedback from other project-specific workgroups to develop a coordinated PPS-wide strategy to support all project requirements.
Meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3 for EHR systems used by participating safety net providers.	PCMH consultants, hired by BPHC, are conducting site-specific gap analyses with BPHC PCPs and formulating a strategy for their achievement of PCMH 2014 Level 3 certification and Meaningful Use. This work includes assessing current EHR capabilities/standards at the sites and formulating a plan to meet Meaningful Use and PCMH Level 3 standards by the end of DY3, with the support of the CSO.

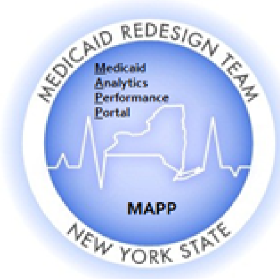
IPQR Module 3.c.i.5 - IA Monitoring

Instructions :



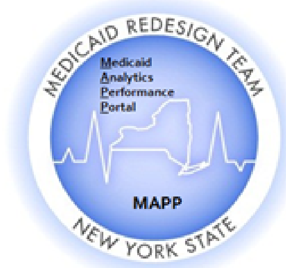
Project 3.d.ii – Expansion of asthma home-based self-management program

IPQR Module 3.d.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Throughout DSRIP, BPHC will seek to address risks to the implementation of Project 3.d.ii using the mitigation strategies described below. (1) Parents and caregivers are unaware of symptoms that can lead to exacerbations and do not act fast enough to prevent an incident resulting in an ED visit. During home visits, community health workers (CHWs) will emphasize the importance of consistent medication use to control asthma and will demonstrate use of medication delivery devices. (2) This project is heavily reliant on CHWs being able to conduct home visits to inspect homes and engage and educate the target population. The experience of our primary vendor for this project, a.i.r nyc, indicates that 50% of affected individuals that they reach out to do not initially accept a home visit. This risk is most acute among the undocumented immigrant population. Trust building will require time, persistence, and tactics that are culturally sensitive and address the specific concerns of each family. To tackle this challenge, a.i.r nyc recruits CHWs from the geographic and ethnic communities to be served. CHW training focuses on building client trust, cultural competency, and positive impact of persistence as key to overcoming patients' fear. Additionally, we plan to "market" a.i.r. nyc services and to elevate their "brand" as a trusted partner to physicians, schools, and community organizations that have earned a high degree of community trust. As part of establishing this link, a.i.r. nyc will conduct an orientation on its services for sites identified as key referral sources to the project. A tactic may include incorporating logos of trusted PPS partners, including CBOs, on outreach and educational materials disseminated to patients. (3) Another challenge this project will face is integrating CHWs into two critical asthma patient contact points: hospital emergency departments (EDs) and discharge planning units. The experience of a.i.r nyc strongly suggests that effective integration will require a communication plan, including a clinician orientation, that educates ED and discharge planning staff on the goals, strategies, tactics and proven value of the intervention. (4) Capacity building will be a challenge for this project. a.i.r. nyc, our partner and vendor for this project, currently has a small staff and is planning to scale up its work to meet the needs of our PPS's patient population. To mitigate the risks associated with a.i.r. nyc's rapid expansion, BPHC's CSO will work with the organization to ensure that staff support and funding is available to rapidly plan, recruit, train and deploy CHWs to the field on a schedule that aligns with the patient engagement speed goals we have established. (5) Most providers do not have asthma registries or electronic care plan tools and do not participate in the RHIO to permit information sharing across providers. BPHC's CSO will address these issues by adding new IT capabilities, including a care planning and management platform and patient registries, and promoting RHIO participation. (6) Lifestyle choices could pose a challenge to patient compliance (e.g., passive smoking, environmental factors acting as asthma triggers such as pests, molds, etc.). Mitagation will include Comminuty Health Workers referring patients and families to Quitline, for integrated pest managment (IPM) services, etc.



IPQR Module 3.d.ii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Patient Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q3 should include patients previously reported in DY1 Q2 plus new patients engaged in DY1 Q3. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
100% Actively Engaged By	Expected Patient Engagement

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Task Identify key stakeholders and subject matter experts (SMEs) among PPS members and convene representative individuals to establish work group to develop Clinical Operations Plan (COP) for participating members to use as project implementation manual.										
Task Develop workplan and time line to develop COP.										
Task Develop comprehensive provider/participant engagement, education and communication plan to engage community medical and social services providers in the project and establish productive collaborative relationships and linkages among them.										
Task Develop and finalize Asthma Action Plan form										
Task Develop systems to populate Asthma Actions Plans for dissemination to patients and PCPs.										
Task Identify and establish relationship(s) with legal services in the community that provide pro bono legal services for community members, including dealing with landlords who fail to address/mitigate building environment factors that are known triggers of asthma problems										
Task Identify PPS members who will participate in project.										
Task Use Master Services Agreement (MSA) to contract with PPS members who participate in the project and receive DSRIP funds										
Task Define target population.										
Task Identify Site-Specific Implementation Teams to facilitate referrals to a.i.r. nyc and coordinate Asthma Action Plan and report distribution to care teams.										
Task Develop methodology evaluation, feedback and Continuous Quality Improvement (CQI) for Site-Specific Implementation Teams.										
Milestone #2 Establish procedures to provide, coordinate, or link the client to resources for evidence-based trigger reduction interventions. Specifically, change the patient's indoor environment to reduce exposure to asthma triggers such as pests, mold, and second hand smoke.

Task PPS has developed intervention protocols and identified resources in the community to assist patients with needed evidence-based trigger reduction interventions.										
Task Identify integrated pest management (IPM) vendors who provide services in the Bronx.										
Task Develop policies, procedures and workflows for engaging IPM vendors when needed, including responsible resources at each stage of the workflow.										
Task a.i.r. nyc has partnership with NYCDOHMH's Healthy Homes programs for linking patients to IPM vendors. Meet with a.i.r. nyc and Healthy Homes Program adminstrator to develop plan for scaling up linking patients with IPM vendors/resources and other community based services as needed.										
Task Establish a.i.r nyc's Action Plan for Remediation as tool for monitoring and tracking delivery of IPM services to patients to ensure services are delivered.										
Task In conjunction with the Workforce Subcommittee, develop training materials for Community Health Workers (CHWs) on 1) how to conduct home environmental assessmentswith establishment of asthma action plan for remediation; and 2) the protocols for engaging IPM vendors for trigger reduction interventions.										
Task Develop patient educational materials on indoor asthma triggers and availability of IPM resources to reduce exposure to the triggers.										
Milestone #3 Develop and implement evidence-based asthma management guidelines.										
Task PPS incorporates evidence-based guidelines that are periodically evaluated and revised, if necessary, in the design and implementation of asthma management.										
Task Global Initiative for Asthma (GINA) guidelines for Asthma Management and Prevention in combination with EPR 3 national guidelines will serve as basis for implementing evidence-based asthma management care together with The Community Preventative Service Task Force evidence-based recommendations for Home-Based Multi-Trigger,

Project Requirements (Milestone/Task Name)	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4	DY3,Q1	DY3,Q2
Multicomponent Environmental Interventions for Asthma Control: http://www.thecommunityguide.org/asthma/multicomponent.html										
Task Quality and Care Innovation Sub-Committee (QCIS) will review and revise the evidence-based guidelines for clinical practice, as needed, and approve.										
Task Once approved, the guidelines will be incorporated into protocols and implemented by medical providers and care teams at sites of participating member organizations.										
Task Develop mechanisms for regular review of project-selected evidence-based guidelines (EBGs) to assure our PPS is utilizing the most up-to-date tools and that those updated guidelines/protocols continue to be clinically integrated across the PPS.										
Milestone #4 Implement training and asthma self-management education services, including basic facts about asthma, proper medication use, identification and avoidance of environmental exposures that worsen asthma, self-monitoring of asthma symptoms and asthma control, and using written asthma action plans.										
Task PPS has developed training and comprehensive asthma self-management education, to include basic facts about asthma, proper medication use, identification and avoidance of environmental exposures that worsen asthma, self-monitoring of asthma symptoms and asthma control, and using written asthma action plans.										
Task a.i.r. nyc and Asthma work group will review the National Standards for asthma self-management to ensure that training is comprehensive and utilizes national guidelines for asthma self-management : (Gardner A., Kaplan B., Brown W., et al. (2015). National standards for asthma self-management education. Ann Allergy Asthma Immunol. 114 (3). doi: 10.1016/j.anai.2014.12.014.)										
Task Select/develop new or additional culturally/linguistically and literacy appropriate patient/caregiver educational materials as needed that improve asthma health literacy and improve self-efficacy and self-management.										
Task Disseminate/embed (in EHR/PHR, where feasible) patient/caregiver educational information and materials across participating PPS providers.

Task Conduct ongoing education/training to introduce/update/refresh care teams' knowledge of new patient educational materials and evidence-based guidelines										
Task Establish protocols and methods that promote medication adherence, including local participating pharmacists to support patient education, especially on inhaler/spacer use.										
Milestone #5 Ensure coordinated care for asthma patients includes social services and support.										
Task PPS has developed and conducted training of all providers, including social services and support.										
Task All practices in PPS have a Clinical Interoperability System in place for all participating providers.										
Task PPS has assembled a care coordination team that includes use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-management.										
Task In conjunction with the Workforce Subcommittee, develop training that includes social services reports and develop training calendars.										
Task Conduct educational sessions/webinar and ongoing training as needed for providers on use of Asthma Project COP.										
Task Develop and implement provider-specific technical assistance program to facilitate use of various interoperable IT systems.										
Task Identify and document required clinical and care management protocols for priority programs, projects and interventions, based on Community Needs Assessment, clinical planning to-date and further analysis of attributed patient population, using MAPP and PPS partner patient-level data										
Task Define partner and workforce roles in delivering care based on protocols and planned interventions in priority projects, including expectations for how interventions will be logged, tracked and reported.										
Task Deploy systems to improve and promote effective care

best practices										
Milestone #6 Implement periodic follow-up services, particularly after ED or hospital visit occurs, to provide patients with root cause analysis of what happened and how to avoid future events.										
Task Follow-up services implemented after ED or hospital visit occurs. Root cause analysis is conducted and shared with patient's family.										
Task Establish protocols for frequency of follow-up services										
Task Establish processes and timelines for additional follow-up to ensure root causes have been sustainably eliminated.										
Task Identify patients with ED or hospital visits for an asthma diagnosis, via interoperable systems, e.g., RHIO, CCMS, registry										
Task Establish processes to identify the root causes of the "outpatient failure," e.g., problems with medication refills, prior authorization of meds, proper inhaler use, education about triggers, pest control issues										
Task Establish processes to share root causes with family/care givers and to provide support to eliminate/rectify root causes, as needed										
Task Develop mechanisms for ongoing evaluation of the above processes and follow up to assure accountability and continuous quality improvement.										
Milestone #7 Ensure communication, coordination, and continuity of care with Medicaid Managed Care plans, Health Home care managers, primary care providers, and specialty providers.										
Task PPS has established agreements with MCOs that address the coverage of patients with asthma health issues. PPS has established agreements with health home care managers, PCPs, and specialty providers.										
Task Meet with MCOs to identify triggers and processes for payer care coordination and asthma services to ensure coordination of care and prevent gaps in care and/or redundant services.										
Task PPS has agreement in place with MCOs to address coverage of

patients with asthma health issues										
Task Meet with health home managers, PCPs and specialty providers of participating organizations in Asthma project to review project Clinical Operations Plan, inlcuding, but limited to evidence-based guidelines; patient flow charts plotting inter-relationship among a.i.r. nyc staff, referral sources, PCPs home health managers and specialty providers; referral protocols to medical, behavioral health, home care and social support services including PCPs, Health Homes, mental health/behavioral health providers, and CBOs.										
Task Using Master Services Agreements and schedules, develop partnership agreements with participating health home managers, PCPs and speciality providers that define services they will provide and their responsibilities to adopt and use the Clinical Operations Plan for the project.										
Task Develop partnership agreements with MCOs affirming coverage and coordination of asthma service benefits.										
Milestone #8 Use EHRs or other technical platforms to track all patients engaged in this project.										
Task PPS identifies targeted patients and is able to track actively engaged patients for project milestone reporting.										
Task Define population health management (PHM) requirements, establish PHM function and recruit or contract with partner for PHM staff										
Task Perform current state assessment of E.H.R. capabilities.										
Task Perform gap analysis and identify priories to achieving integration of patient record.										
Task Define business requirements and data elements for patient registry to stratify and track all patients engaged in this project										
Task Recommend registry business requirements and data elements to governance committees for review and approval (Quality and Care Innovation Subcommittee, Information Technology Subcommittee and Executive Committee)										
Task Engage IT Subcommittee to identify technology and resource

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Expand asthma home-based self-management program to include home environmental trigger reduction, self-monitoring, medication use, and medical follow-up.	Update: BPHC contracted with a.i.r nyc, a CBO with 10 years experience providing home-based services to asthmatic clients and their families, to assist BPHC in creating a clinical operations plan (COP) that will be used by participating member organizations as the implementation guide for the project. A project-specific work group comprising clinicians from several member organizations was established to provide input from the clinical provider perspective into the development of the COP and this work has been completed. All the Milestone 1 tasks that were in progress to be completed by the end of Q2 were completed, except that we are pushing the delivery deadline for the next contract with a.i.r. nyc, for the actual delivery of home-based asthma services to Q3 (See justification below). Justification: We need to push the completion quarter of two tasks under this milestone out to Q3 because the main focus of the Asthma project to date has been the development and completion of the Clinical Operations Plan (COP), and this process took longer than expected due to a very intensive development and review and approval process involving the Asthma Transitional Work Group, whose membership included several physicians. We did contract with a.i.r. nyc to develop a work plan and timeline to develop the COP, as well as lead in the development and finalization of the COP itself. That work needed to be completed before contracting with a.i.r. nyc for the actual delivery of home-based services to clients/families as described in these tasks. At present we are well into the process of negotiating the budget and contract with a.i.r. nyc to deliver these services as we implement the project and we will have the contract in place within the next several weeks (before the end of Q3). Note: The first patient engagement targets are due DY 2, Q1, so pushing the due date for the contract for home-based services delivery in no way impacts or delays the actual implementation of the project or achieving patient engagement targets.
Establish procedures to provide, coordinate, or link the client to resources for evidence-based trigger reduction interventions. Specifically, change the patient's indoor environment to reduce exposure to asthma triggers such as pests, mold, and second hand smoke.	Update: Six of the seven tasks under this Milestone are due in DY 1, Q3 and are on track to be completed as scheduled. The remaining task is due in DY 2, Q4. Note: A.i.r. nyc follows the evidence-based recommendations of the Task Force on Community Preventive Services for home-based, multi-trigger, multi-component, interventions with an environmental focus.
Develop and implement evidence-based asthma management guidelines.	Update: Clinical evidence-based guidelines (EBGs) and home-based services for asthma care and management were developed by our Asthma Transitional Workgroup and recommended to the Quality and Care Innovation Subcommittee for adoption. The Subcommittee approved both sets of guidelines, which will be incorporated into the Clinical Operations Plan and distributed in Q3 to the participating member organizations of our PPS and are to be incorporated into the protocols and implemented by the medical care providers and care teams of the sites of the participating organizations. The development of mechanisms for regular review of the EBGs is scheduled to begin in DY 1, Q4.
Implement training and asthma self-management education services, including basic facts about asthma, proper medication use, identification and avoidance of environmental exposures that worsen asthma, self-monitoring of asthma symptoms and asthma control, and using written asthma action plans.	Update: The first task of this milestone is on track to be completed in DY 1, Q3 as scheduled. The other five tasks will be initiated and completed as scheduled. We expect excellent results for this milestone as a.i.r nyc has 10 years experience in the field and is recognized across the city as a leader in the area of training and comprehensive asthma self-management education.
Ensure coordinated care for asthma patients includes social services and support.	Update: The three tasks scheduled for Q2 were completed. The three tasks scheduled for DY 1, Q3 are in the process of being initiated and are expected to be completed on time. All other task will be initiated as scheduled in future quarters.
Implement periodic follow-up services, particularly after ED or hospital visit occurs, to provide patients with root cause analysis of what happened and how to avoid future events.	Update: The four tasks initiated in Q2 concerning root cause analyses after ED visits to avoid future events and establishing additional follow-up are on track for completion in DY 1, Q3 and 2016 as scheduled.
Ensure communication, coordination, and continuity of care with Medicaid Managed Care plans, Health Home care managers, primary care providers, and specialty providers.	Update: All tasks under this milestone are on track to be initiated and completed in future DSRIP quarters as scheduled.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Use EHRs or other technical platforms to track all patients engaged in this project.	Update: The four tasks under this milestone concerning, variously, assessing the capabilities and requirements of EHRs and other technical platforms for tracking actively engaged patients, e.g., patient registry, are on track to be completed in DY 1, Q3 as scheduled.

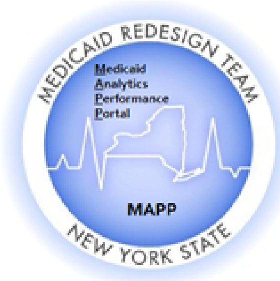
IPQR Module 3.d.ii.5 - IA Monitoring

Instructions :



Project 4.a.iii – Strengthen Mental Health and Substance Abuse Infrastructure across Systems

IPQR Module 4.a.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The primary risk associated with this project is that substance abuse and mental health services are siloed. The CNA identified pronounced silos in care, despite the co-morbidities in MH and SA. Further, various evidence-based trainings focus exclusively on mental health concerns. To mitigate this risk, BPHC and its MHSA Collaborative Workgroup PPS partners – Community Care of Brooklyn, OneCity Health, and Bronx Health Access – will include content experts and substance abuse trainings/materials that address prevention of overdose and unprotected sex and other risky behaviors into core programming. Another risk is that PPS partners will be challenged in collaborating with NYC Department of Education (DOE). The PPSs have identified strong synergies between this project and DOE programming, such as DOE's investments in mental health infrastructure in approximately 100 community/renewal schools City-wide, but they will need to actively engage DOE to succeed in DSRIP-related transformations. The Workgroup has already been addressing this risk by engaging the Director of School Mental Health Services with the City's Office of School Health and individuals with the New York City Department of Health and Mental Hygiene (DOHMH) as advisory members of the Workgroup. The PPS partners will continue to engage both DOE and DOHMH in developing their approach to programming and staffing. Additional risks are that PPSs will lack the robust data set required to measure progress against goals and serve as an evidence base to demonstrate the cost-effectiveness of the activities and, relatedly, that MHSA activities will not be sustainable beyond the demonstration period. The intervention aims to develop long-standing, sustainable school-based infrastructure to address MHSA needs. Specifically, rather than engage in any direct delivery of care, the PPSs will enhance schools' resources to manage MHSA needs for current and future students. The project design utilizes cost-effective staffing plans and trainings to prepare non-MD school-based staff to serve as effective coaches. Further, the PPSs have committed to working together to build an evidence-base to document results and cost-effectiveness. The PPSs have identified certain performance metrics, such as reductions in schools suspensions and 911 calls, that will be tracked. MCOs, SDOH, and DOE will be engaged in discussions regarding the program's cost-effectiveness and how to finance DSRIP staff and their related school-based activities under a value based payment system post-DSRIP. Another possible risk is that school-based staff will be disengaged, based on their own biases or misunderstanding of MHSA-related disease, or fears of being held responsible for individual student outcomes related to MHSA issues. To mitigate this risk, partnerships with teachers and school staff will be established at the ground level. Staff trainings will address issues like bias and stigma and will educate staff on the nature of MHSA conditions. The PPSs will also train school-based staff on when to refer students with potentially more serious problems to available referral channels and help to ensure warm handoffs to appropriate community-based MHSA services. Another possible risk is that BPHC will not be able to sustain a high level of commitment towards the project over the demonstration period. To mitigate this risk, the PPSs have made commitments, memorialized in a joint charter, to engage the MHSA Collaborative Workgroup over the entire demonstration period to spearhead programming. The Workgroup's experience to date reflects a high level of engagement and interest that the PPSs intend to sustain.

PPS Defined Milestones Narrative Text

Milestone Name	Narrative Text
Participate in citywide MHSA Workgroup meetings	Bronx Partners for Healthy Communities (BPHC) staff have participated in all meetings of the cross-PPS collaborative. Staff have provided input on engaging community-based representatives, as well as subject-matter experts, including The New York Academy of Medicine (The Academy). The Academy has extensive experience with the NYS Prevention Agenda, in particular the priorities related to Mental, Emotional, and Behavioral Health, including substance abuse prevention. The Office of School Health and NYCDOHMH have participated in cross-PPS collaborative meetings and will continue to be engaged. Milestone is on track for completion.
Establish cross-PPS Collaboration structure	BPHC has committed to the cross-PPS collaborative, including contributing the RFP process for the lead agency to facilitate and manage project implementation and also decisions related to establishing the governance structure. Project roles and responsibilities between the soon-to-be contracted lead agency and the participating PPSs is currently under discussion. Milestone is on track for completion.
Review of existing programs	BPHC has contributed to the development of an RFP to describe the role and scope of work for the lead agency that will facilitate implementation for the cross-PPS collaborative project. The cross-PPS collaborative have decided that a special focus for this project will be improving infrastructure and capacity to screen school-aged youth for depression and/or drug/alcohol abuse. Adaptations for collaborative care models to address adolescents are being explored within the BPHC MHSA Workgroup and recommendations will be made to the cross-PPS collaborative. Milestone is on track for completion.
Develop operations plan	The lead agency has been selected and will begin working with the cross-PPS collaborative soon. The concept paper describing this project has been drafted and will be vetted with the lead agency and through the PPSs respective workgroups before final approval. The BPHC MHSA Implementation Work Group will meet and identify priorities and recommendations for the development of an operations plan for review by the cross-PPS collaborative and the lead agency. The operational plan will cover many components of this project including staffing, sub-contracting, training, evidence-based guidelines, and other relevant topics related to implementation. Milestone is on track for completion.
Implement Collaborative Care (CC) Adaptation in schools	The scope of work outlined in the RFP to hire the pending lead agency to facilitate implementation of the cross-PPS MHSA project detailed that the lead agency will be responsible for coordinating the process of identifying evidence-based guidelines, training plans, integration of NYDOE into planning and implementation (they have also been included in cross-PPS meetings), school recruitment, staff recruitment, and project launch. The cross-PPS collaborative has met frequently and each PPS will be contributing to the development of the process for school selection. The final decision for this process will be with the cross-PPS collaborative, facilitated by the lead agency. Milestone is on track for completion.
Design programs for young adults

IPQR Module 4.a.iii.3 - IA Monitoring

Instructions :

Project 4.c.ii – Increase early access to, and retention in, HIV care

IPQR Module 4.c.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The first major risk for this project is that the target population, HIV-positive individuals within the PPS service area, can be difficult to locate. HIV patients have a high prevalence of substance use disorder, homelessness, chronic trauma, behavioral health diagnoses and other chronic co-morbid conditions (e.g., diabetes, heart disease). Moreover, HIV disproportionately impacts ethnic/racial and gender minorities who often face stigma both in their communities and by providers. As a result, they may have to travel far from their community to receive culturally responsive care, which is not always feasible. To mitigate this risk, we plan to work closely with BPHC partners to identify HIV-positive individuals wherever they currently access services. We will ensure that partners have information about how to link these patients to appropriate care, not only for HIV services but to manage other conditions as well. We will also develop and provide training in cultural competency for providers and support staff, to expand the number of welcoming care delivery sites for HIV-positive individuals. Finally, we intend to establish peer support programs, particularly in ethnic/racial minority communities, as peers are often more effective in helping patients overcome cultural barriers to care. The second major risk for this project is that the demographics of the populations most in need of linkages to HIV services may change over time. To mitigate this risk, we intend to continue working with the Domain IV HIV Collaborative Workgroup which was formed by the PPSs during the Application Planning phase. Through this group we will continue to share information about new hotspots in local communities in order to recognize new trends early on. Once new sub-populations are identified, we will work together to adapt interventions and outreach strategies accordingly. The third major risk for this project is that PPSs will work in silos, creating a duplication of efforts and confusion for downstream providers. To mitigate this risk, the cross-PPS HIV Workgroup will continue collaborating to ensure that the PPSs effectively share knowledge, experience, and perspectives, to avoid service duplication, and improve project design and implementation. To be most effective we will need to ensure coordination across organizations and initiatives. This will entail breaking down silos between healthcare and supportive service providers as well as silos between providers offering the same services. For example, there are a number of community-based organizations that are instrumental in HIV care, but silos often lead to ineffective working relationships, lack of care coordination, and gaps in care. Organizations providing the same type of services (e.g., HIV testing) are also often unaware of how peer organizations provide the same services, therefore missing opportunities to share best practices and identify potential areas of collaboration. This is not efficient and can be confusing and detrimental to patients. We have a number of actions planned to break down silos. First, we plan to meet with all BPHC partners providing HIV services to get a better sense of current HIV work happening across the PPS. We will also continue meeting with the citywide cross-PPS HIV workgroup to foster continued collaboration and sharing of promising practices. Throughout the next five years, we will continue meeting with providers, colleagues and stakeholders to ensure that we remain coordinated, sharing challenges and best practices across all providers. Finally, we will leverage the workgroup to make progress toward alignment on common language and best practices whenever possible, in order to promote a standard for HIV-providers across the city.

Implement evidence based best practices for disease management, specific to HIV and viral load suppression, in community and ambulatory care settings.	jpacesbh	Meeting Materials	36_PMDL6004_1_2_20151014161516_BPHC HIV WG 9.17 minutes_FINAL.docx	BPHC HIV Work Group Meeting Minutes Sep 17, 2015	10/14/2015 04:15 PM

PPS Defined Milestones Narrative Text

Milestone Name	Narrative Text
Implement evidence based best practices for disease management, specific to HIV and viral load suppression, in community and ambulatory care settings.	Update: BPHC brought together content experts to form an HIV Retention to Care Implementation Work Group once and in this meeting identified evidence-based guidelines for retention to care and viral load suppression. Members have made recommendations for additional community and resource-based partners to join the Work Group. The guidelines identified by the group have been documented in meeting minutes and take into account existing City, State, and Federal initiatives. PCMH elements are being identified by BPHC staff and will be integrated into the gap analyses delivered by the PCMH consultants. Milestone is on track for completion.
Participate in a NYC cross-PPS Collaborative	Update: BPHC has participated in all cross-PPS meeting to date and has contributed to, not only, contract negotiations with the NYCDOHMH to convene the Cross-PPS Coalition, but also governance discussions. The cross-PPS Coalition is meeting regularly and has a high level of engagement by other PPSs. Governance and payment for the cross-PPS Coalition is close to being finalized. The cross-PPS Coalition provides a platform for sharing, learning, and standardizing interventions. Milestone is on track for completion.
Develop adherence protocol and staffing plans	This milestone will align with BPHC's overal strategy for HH provider and CM agency engagement. Registries to track and support retention to care for known HIV patients will be put in place and staffing roles, including HIV CM and Peer Health Workers will be integrated into the plans for participating providers. BPHC has mapped Health Home providers in the PPS and their downstream care management agencies (CMAs). Health Home representatives have been involved in the Health Home At-Risk and CCMS workgroups to ensure their perspective is included in the development of clinical operations planning and system development. Towards the establishment of formal partnerships, BPHC and has engaged in high-level discussions with Health Home agencies and is currently reaching out to individual CMAs to ensure all are fully integrated into the PPS.
Utlize EHR and other IT platforms for population health management	Update: BPHC is engaged in high level discussions with the Bronx RHIO to determine capabilities and negotiate terms. Capacities are in the process of being assessed and data elements for patient registries are being defined by project-specific workgroups. Implementation of registries for monitoring this population, including referrals and sharing of EHR's will be a critical component to the success of this project. Milestone is on track for completion.
Implement peer-based supports

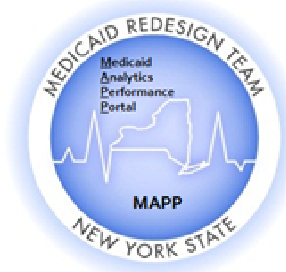
Instructions :



Attestation

The Lead Representative has been designated by the Primary Lead PPS Provider (PPS Lead Entity) as the signing officiate for the DSRIP Quarterly Report. The Lead Representative has the authority to complete this attestation on behalf of the PPS network. The Lead Representative and PPS Lead Entity are responsible for the authenticity and accuracy of the material submitted in this report.

The Lead Representative of the Performing Provider System (PPS) must complete this attestation form in order for the project application to be accepted by the NYS Department of Health. Once the attestation is complete, the Quarterly Report will be locked down from any further editing. Do not complete this section until the entire Quarterly Report is complete.

If the Quarterly Report becomes locked in error and additional changes are necessary, please use the contact information on the Home Page to request that the Quarterly Report be unlocked.

To electronically sign this Quarterly Report, please enter the required information and check the box below:

☐ **I here by attest, as the Lead Representative of the 'SBH Health System', that all information provided on this Quarterly report is true and accurate to the best of my knowledge, and that, following initial submission in the current quarterly reporting period as defined by NY DOH, changes made to this report were pursuant only to documented instructions or documented approval of changes from DOH or DSRIP Independent Assessor.**
