0234	Other	_Updated_Baseline_Budget_TableTotal_DSRIP_Award_1281.pdf	Table - Total DSRIP Award	03/13/2010 11.43 1 10

Narrative Text:

Description of uploaded file:

The MAPP baseline budget table includes the total Net Project Valuation (NPV) amount, before adjustments. The baseline budget table has been revised to separate projected spending in the Implementation line into two subcomponents: 'Administration' and 'Implementation.' Amounts now shown in the 'Administration' include: staff and OTPS expenses associated with the Maimonides Central Services Organization (supporting the DSRIP program) and DSRIP planning and fiduciary fees. Please see also the uploaded file 'Maimonides PPS – Updated Baseline Budget Table – Total DSRIP Award' which illustrates the budgeted use of total expected DSRIP revenue of \$412,344,429.

New York State Department Of Health Delivery System Reform Incentive Payment Project DSRIP Implementation Plan Project

Page 8 of 284 Run Date : 09/30/2016

Maimonides Medical Center (PPS ID:33)

Narrative text:

The DSRIP award letter issued on May 11, 2015 documented maximum possible funding of \$489,039,450 for the Maimonides PPS, including:

- a. Net Project Valuation (NPV) \$219,214,536
- b. Safety Net Equity Performance (SNE-P) \$88,542,755
- c. Safety Net Equity Guarantee (SNE-G) \$132,814,132
- d. Net High Performance Fund \$26,970,632
- e. Additional High Performance Fund, State Only \$21,497,395

The CCB's baseline budget table uses the subtotal of items a-c above (\$440,571,423), excluding possible High Performance fund payments (totaling \$48.5M), as the basis for estimating maximum funding. The percentage of NPV and SNE-P waiver revenue is higher in the early years when proportionally more of the total payment is based on reporting (P4R) and achieving Domain 1 process milestones, and lower in the later years, with the transition to pay-for-performance (P4P). The total SNE-G amount was spread evenly over each DSRIP year. CCB's approved baseline budget includes \$412,344,429 in expected DSRIP funding distributed across budget categories as noted in the uploaded table. This baseline budget table has been updated to separate the costs of DSRIP program 'Administration' from other 'Implementation' expenses. Updated cells are highlighted in yellow.

IPQR Module 1.2 - PPS Budget - Waiver Revenue (Quarterly)

Instructions:

Please include updates on waiver revenue budget items for this quarterly reporting period. Reported actual spending will be compared to baseline projections and deviations will be evaluated. Any explanations regarding deviations from baseline projections must be included within the textbox, not as narrative within uploaded documentation.

Page 10 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

Please see updated Narrative related to Module 1.1 PPS Budget Baseline- Waiver Revenue:

The DSRIP award letter issued on May 11, 2015 documented maximum possible funding of \$489,039,450 for the Maimonides PPS, including:

- a. Net Project Valuation (NPV) \$219,214,536
- b. Safety Net Equity Performance (now known as the Equity Performance Program) \$88,542,755
- c. Safety Net Equity Guarantee (now known as the Equity Infrastructure Program) \$132,814,132
- d. Net High Performance Fund \$26,970,632
- e. Additional High Performance Fund, State Only \$21,497,395

This baseline budget table represents only the NPV funding and reflects the maximum amounts available for the PPS to earn. The "Waiver Revenue" line does not reflect expected timing of receipt of Waiver funding ("on a cash basis"), and thus the "Undistributed Revenue" line may include Waiver Revenue that had not as of the end of the period been received.

Narrative Text:

The MAPP baseline funds flow table includes the total NPV amount per year that CCB expects will flow to providers/organizations in each of the NYSDOH specified categories (i.e. excluding Safety Net Equity Funds). The updated baseline funds flow table now includes a line for 'PMO' expenses. Costs associated with the Maimonides Central Services Organization (the 'PMO' for our PPS), DSRIP planning costs and the PPS fiduciary fee have been moved from the Hospitals line (where they were reported in the prior iteration) to the PMO line. Projected funds flow to Hospitals over 5 years is now estimated at 43.9% of total expected DSRIP funds, while funds flowing to PMO activities are estimated at 14.1% of

IPQR Module 1.4 - PPS Flow of Funds - Waiver Revenue (Quarterly)

Instructions:

Please include updates on waiver revenue flow of funds for this quarterly reporting period by importing the PIT file and filling out the PPS PMO line manually. Reported actual fund distribution will be compared to baseline projections and deviations will be evaluated. Any explanations regarding deviations from baseline projections must be included within the textbox, not as narrative within uploaded documentation.

Narrative Text:

For PPS to provide additional context regarding progress and/or updates to IA.

Please see updated Narrative related to Module 1.3 PPS Funds Flow Baseline- Waiver Revenue:

The MAPP baseline funds flow table includes the total NPV amount per year (excluding Equity Program Funds) that CCB expects will flow to providers/organizations in each of the NYSDOH specified categories. Since the "Waiver Revenue" line does not show reflect expected timing of receipt of Waiver funding ("on a cash basis"), the "Undistributed Revenue" line may include Waiver Revenue that has not been received as of the end of the period for which it is being noted as 'undistributed.'

Narrative Text:

The DSRIP award letter issued on May 11, 2015 documented maximum possible funding of \$489,039,450 for the Maimonides PPS, including:

- a. Net Project Valuation (NPV) \$219,214,536
- b. Safety Net Equity Performance (now known as the Equity Performance Program) \$88,542,755
- c. Safety Net Equity Guarantee (now known as the Equity Infrastructure Program) \$132,814,132
- d. Net High Performance Fund \$26,970,632
- e. Additional High Performance Fund, State Only \$21,497,395

This baseline budget table represents only Equity Program funding (\$221,356,887, the total of items b and c above) and reflects the maximum

NYS Confidentiality – High

Run Date: 09/30/2016

Page 19 of 284

Maimonides Medical Center (PPS ID:33)

funds available for the PPS to earn. The "Non-Waiver Revenue" line does not reflect expected timing of receipt of Equity Program funding ("on a cash basis"), so the "Undistributed Revenue" line may include Equity Program funds that had not been received as of the end of the period for which they are being reported as 'undistributed.' Additionally, it is anticipated that a portion of the available Equity Performance Payments will not be released to the PPS until after the end of DY5; this table includes all post-DY5 revenue and spending in the DY5 column.

Establish governance structure reporting and monitoring processes	There have been updates during this reporting quarter. Please see attached documentation for details.
Finalize community engagement plan, including communications with the public and non-provider organizations (e.g. schools, churches, homeless services, housing providers, law enforcement)	The CCB Community Engagement Committee (CEC), which reports to the CCB Executive Committee, oversaw development of the Community Plan for CCB. Comprised of individuals from a number of the community-based organizations (CBOs) in the CCB network, the CEC oversaw the development of and contributed to CCB's Cultural Competency and Health Literacy Strategy (CCHLS), upon which the Community Engagement Plan is based. Given the importance of this initiative, the CEC formed a workgroup to focus on developing the Community Engagement Plan. The Community Engagement Plan was drafted by representatives of key CBOs, and presented to and approved by both the CEC and the CCB Executive Committee at their meetings in June. In developing the CCB Community Engagement Plan, the workgroup conducted in-depth key-stakeholder interviews with participant CBOs serving on the CEC to better understand the gaps in the current system that might serve as barriers to more effective community engagement. The workgroup identified community-based resources that play essential roles in the lives of their communities (e.g. barbershops, bodegas, religious and faith-based organizations, social-service providers), and discussed opportunities to work with and through key CBOs to enhance community engagement in programs and services to address health care issues and concerns. The workgroup recognized the importance of coordinating CCB's community engagement efforts with local community boards and other public-sector agencies to ensure that CCB's efforts build upon and complement public processes. Given the significance of cardiovascular disease (CVD) in Brooklyn and the CEC's desire to identify specific ways in which CBOs can be engaged to address some of the public health issues upon which CCB is focused, a second workgroup was formed to focus on community engagement around cardiovascular disease. This workgroup was charged with development of a pilot community-engagement program with multiple CBOs in Central Brooklyn, using community resource mappi
Finalize partnership agreements or contracts with CBOs	
Finalize agency coordination plan aimed at engaging appropriate public sector agencies at state and local levels (e.g. local departments of health and mental hygiene, Social Services, Corrections, etc.)	While CCB has made significant progress towards achievement of this milestone, the completion date has been adjusted to better align with other communications and engagement plans due in DY2 Q2.
Finalize workforce communication and engagement plan

IPQR Module 2.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in implementing your governance structure and processes and achieving the milestones described above, as well as potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

One challenge will be developing and negotiating the Master Services Agreement, the schedules containing additional Participant-specific obligations, and funding schedules with the CCB Participants due to the size of the PPS and the diversity of Participant types, size and the services offered. CCB Participants represent the full spectrum of health care providers, social services organizations and other community-based entities, with a range of capabilities and limitations. Additionally, there are a number of Participants that are participating in other PPSs. Notwithstanding the diversity of the CCB Participants, the plan for review of the Master Services Agreement and schedules with CCB Participants' legal counsel will be transparent and will aim to reach mutually agreeable terms among all Participants. Another challenge will be engaging members of the committees in a meaningful and productive way to achieve the CCB's goals over a relatively short timeline. A strong working governance structure will depend upon: the clear definition of roles and responsibilities; the identification of key staff to support the governance process; the availability of information and technology to support decision-making; and the time that members of the various committees can devote to preparing for meetings (e.g., reading materials distributed in advance of meetings), attending meetings, and otherwise being actively involved in the committees. CCB recognizes that Committee members have significant obligations to their organizations outside of CCB and will schedule meetings well in advance and limit them to a reasonable time period. CCB will also seek to create a strong performance reporting infrastructure to support data sharing and decision-making across CCB, which should help improve coordination and effectiveness of the CCB governance structure.

☑ IPQR Module 2.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The ability to develop the schedules that are part of the partnership agreements with CBOs will depend on the development of clinical operational plans which will detail work plans and Participant obligations by DSRIP project. Creation of the funding schedules is dependent upon outputs of the finance workstream, which, in turn, will depend upon the availability of information concerning the funds available to Maimonides (PPS lead) to support implementation of the DSRIP projects. Additionally, and as specified in more detail in later sections, the ability of the CCB governance to be effective in oversight of CCB's performance requires establishing appropriate IT systems for collection and reporting of performance information.

IPQR Module 2.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for the development of your governance structure and processes and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Lead Applicant and Equity Contributor	Maimonides Medical Center	Leadership Participant; fiduciary oversight; governance oversight; membership/leadership of key CCB committees, including Executive, Care Delivery and Quality and Finance
Maimonides Central Services Organization (CSO) Staff	CSO Staff members	PPS management, including ongoing policy development, development of DSRIP plans and budgets, oversight of DSRIP program operations, oversight of accounting, financial management, analytics and reporting, IT and other support functions, and management of consultant resources
Hospital Partners	New York Methodist Hospital, Wyckoff Heights Medical Center, Interfaith Medical Center, Kingsbrook Jewish Medical Center, New York Community Hospital	Participants in key CCB committees and workgroups; participation in key CCB projects; collaboration with other CCB Participants
Key Health Care Provider Organizations	Brownsville Multi-Service Family Health Center, Bedford- Stuyvesant Family Health Center, Brooklyn Plaza Medical Center, Health Care Choices, Housing Works, Brightpoint Health, Metropolitan Jewish Health System, Village Care, Kingsboro Psychiatric Center, others	Participants in key CCB committees and workgroups; participation in key CCB projects; collaboration with other CCB Participants
Physician Organizations and Health Homes	Higher Ground IPA, Advantage Care, Brooklyn Health Home, Coordinated Behavioral Care Health Home, others	Participants in key CCB committees and workgroups; participation in key CCB projects; collaboration with other CCB Participants
Key Advisors and Consultants	Manatt, Phelps and Phillips; Community Care of North Carolina (CCNC); others	Providing assistance to CSO management team with drafts of Master Services Agreement (MSA) and other governance documents (Manatt); assisting with development of plans and budgets for DSRIP projects (Manatt); providing technical assistance with refinement of provider engagement and care management strategies (CCNC)
Major CBOs and/or social service agencies	CAMBA, Caribbean Women's Health Association, God's Love We Deliver, and others	Participants in key CCB committees and workgroups; participation in key CCB projects; collaboration with other CCB Participants; assisting with identification and evaluation of community needs and resources to meet those needs

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ Module 2.6 - IPQR Module 2.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS with regard to your governance structure and processes.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
All PPS Participants	Representatives from Participant organizations	Project Advisory Committee (PAC) members; participation in selected CCB projects; liaison to various communities served by CCB network
Medicaid Managed Care Organizations (MCOs)	HealthFirst, AmidaCare, others	Participants in key CCB committees and workgroups
External Stakeholders		
Government agencies, such as NYS DOH, NYC DOHMH, OMH, OASAS, DSS	Oversight and collaboration	Overseeing DSRIP contract and processing release of DSRIP funds (NYS DOH); providing ongoing guidance with respect to DSRIP deliverables and requirements (NYS DOH); participating in workgroup and committees (NYC DOHMH); providing oversight, regulations, and collaboration (all)
Non-partner MCOs	Potential participants in value-based payment contract proposals	Feedback on proposed value-based payment and other managed care contracting plans
Non-partner CBOs	Potential Participants in community and patient engagement activities	Providing forum to facilitate communications with Medicaid beneficiaries, community leaders, others; feedback on proposed outreach strategies

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

IPQR Module 2.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream and your ability to achieve the milestones described above.

CCB will deploy IT solutions that allow for collaboration and effective management of CCB's committees and workgroups. In order for CCB governance to be effective, CCB will employ tools to collect reliable performance data and analyze this information for rapid cycle evaluation and other performance monitoring responsibilities.

One major solution that CCB will use across DSRIP workstreams is the GSI Health Coordinator platform, called the "Dashboard". This existing web-based care planning tool has been used successfully over the last few years within the Brooklyn Health Home network. The Dashboard facilitates coordinated care planning and communication among collaborating providers and patients about the physical, behavioral and social factors impacting patients' lives. Subject to patient consent, all providers involved in the care of a patient have access to this platform, which includes key clinical data including hospitalization alerts from the Healthix (RHIO). CCB also intends to use the Dashboard infrastructure to provide data and analytic support for population health management, reporting, and data exchange for all Participants, which will be especially critical for providers who do not have EHRs. CCB will leverage the Dashboard and other solutions to help ensure that leadership has access to the information it needs on a timely basis as well as increase the effectiveness and efficiency of decision-making.

Given the breadth of CCB's Participants, in both scale and diversity, CCB will leverage technology solutions to ensure that CCB's communications reach and engage Participants, community organizations, agencies, and other stakeholders involved in Brooklyn's transformation. CCB will also use the CCB website and other communication vehicles to allow patients and other stakeholders to raise issues, concerns, or suggestions and help inform CCB governance.

☑ IPQR Module 2.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

Success will be measured by (1) the occurrence of meetings of the Executive Committee, Finance Committee, Care Delivery and Quality Committee, Workforce Committee, IT Committee and Hub Steering Committees at a frequency in accordance with the applicable charter, (2) implementation of CCB policies and procedures, (3) execution of the Master Services Agreement and performance by Maimonides and Participants (including CBOs) of obligations against the Agreement. The CCB PPS is large and diverse, posing potential challenges to realizing these aspects of progress reporting. To address this challenge, CCB will seek to meaningfully engage and activate all of its Participants at the outset of DSRIP implementation, identify their unique roles in achieving project and overall success, and motivate their participation and collaboration with other Participants and, as needed, with other PPSs.

Maimonides Medical Center (PPS ID:33)

IPQR Module 3.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

One challenge to implementing these cross-cutting organizational strategies is Participant engagement and capacity. Community Care of Brooklyn (CCB) must meaningfully engage a large, diverse group of Participants in the finalization of DSRIP implementation plans, including the establishment of metrics that will be used to measure progress towards the achievement of the milestones that will drive payments. Participants will have a wide range of needs and concerns, and vary in their capacity to dedicate resources to the DSRIP effort. Additionally, Participants will vary in their capacity to understand and track performance to support the activities for which the Participant is responsible. CCB will address this challenge through the development and distribution of Participant-facing educational materials to support the Master Services Agreement and communicate individual Participant funding schedules at the outset of DSRIP implementation to ensure that Participants understand the process and the links between achieving project milestones and receiving payments.

CCB's inability to access Participant data or analytics for reporting is another risk. CCB will educate Participants on the obligations and requirements with respect to performance reporting and will work collaboratively with Participants to develop a performance reporting strategy that includes necessary metrics and other data that will drive payments to the PPS and to Participants. CCB will engage Participants in the strategy and design of reporting mechanisms and processes to facilitate information gathering and to ensure that analyses and reports are reflective of performance. CCB will also establish systems for monitoring information that may be accessed by the NYSDOH directly (e.g., Medicaid claims data, other performance data) to ensure that CCB and Participants understand and have an opportunity to validate that information.

Another risk is the availability of DSRIP waiver funds and CCB's ability to achieve and draw down incentive payments on time and in amounts sufficient to support the work that CCB and its Participants have committed to undertake. CCB must successfully achieve and report on State-established milestones and metrics to draw down incentive payments and subsequently distribute funds to its Participants. The PPS has and will continue to engage in a thoughtful planning process to ensure it is able to achieve DSRIP milestones and metrics in a timely manner and to the best of its ability.

Lastly, engagement with Medicaid Managed Care Organizations (MCOs) poses a challenge to implementing CCB's financial strategies. The transition to value-based payment across CCB will require the engagement and willingness of Medicaid MCOs to transform their existing fee-for-service contracts into value-based payment contracts. To address this challenge, CCB will continue engaging Medicaid MCOs through DSRIP implementation planning, participation in the Finance Committee and Sustainability Workgroup, and ongoing meetings to ensure Medicaid MCOs are meaningfully engaged in the development of transition plans and have sufficient lead time to prepare for the transition to value-based payment.

☑ IPQR Module 3.4 - Major Dependencies on Organizational Workstreams

Instructions:

New York State Department Of Health Delivery System Reform Incentive Payment Project DSRIP Implementation Plan Project

Page 52 of 284 Run Date : 09/30/2016

Maimonides Medical Center (PPS ID:33)

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

CCB's financial strategy is dependent on several work streams, including performance reporting, governance, workforce, IT, and provider engagement.

The performance reporting infrastructure will support provider, practice, and organization-level reporting and evaluation to drive DSRIP incentive payments. CCB will identify a point-of-contact in each Participant organization for finance-related matters (e.g., reporting and policies/procedures) and will base Participant reporting requirements on DSRIP reporting milestones/metrics. Performance reporting and incentive payments will be detailed in each Participant's Master Services Agreement.

The financial sustainability and governance work streams are interdependent as the CCB governance structure must be capable of executing financial responsibilities and the CCB governance structure must evolve to incorporate Medicaid MCOs to support transition to value-based payment. Similarly, financial sustainability is also dependent on workforce, which will be a major component to the PPS's overall success. Developing and implementing a sound workforce strategy to support its Participants and enable the implementation of DSRIP projects and their respective care models is a key factor in the PPS's ability to ultimately achieve outcomes and draw down incentive payments.

The CCB IT systems must also support central finance and performance reporting to inform and track PPS and project-level budgets and funds flow. The CCB IT systems must support population health management to enable Participants to improve patient outcomes that will drive the transition to value-based payment with Medicaid MCOs and other payers.

CCB must effectively engage and educate Participants – including physicians with a wide range of skills and abilities – to ensure successful implementation of the value-based payment strategy. Without Participants' active engagement and participation in DSRIP projects and overall performance reporting structure, CCB will not be able to obtain and implement value-based payment models. CCB will work with Participants through the Project Advisory Committee and in other forums as it develops funds flow methodologies and the value-based payment roadmap. This will help to ensure Participants understand the requirements to transition to value-based payment and are prepared to function as an integrated network to elevate CCB's ability to realize value-based payment models with MCOs and other payers.

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

IPQR Module 3.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
CCB Executive Committee	Chairperson: David Cohen, MD, MSc, Executive Vice President for Clinical Affairs and Affiliations, MMC, and CEO, Maimonides Central Services Organization (CSO)	Overall PPS oversight; leadership of integrated delivery system development efforts, review and approval of recommendations from the CCB Care Delivery and Quality, Finance, and other committees; identification of issues for consideration by MMC.
CCB Finance Committee	Chairperson: Caroline D. Greene, Chief Administrative & Financial Officer, Maimonides Central Services Organization (CSO)	Oversight of PPS finances; review and approval of budgets and funds flow models; oversight of managed care contracting and CCB sustainability efforts
CCB Sustainability Workgroup	CCB Finance Committee Chairperson: Caroline D. Greene, Chief Administrative & Financial Officer, Maimonides Central Services Organization (CSO); Workgroup chair to be determined	Oversee development and implementation of plan to conduct assessment to determine the financial health of the CCB network; develop financial sustainability plan, including value-based managed care contracting strategy.
Chief Administrative & Financial Officer, Maimonides Central Services Organization (CSO)	Caroline D. Greene	Primary PPS lead for administrative and financial matters; lead development and implementation of financial management strategies; oversee key administrative functions, including IT, analytics and reporting, contracting and administrative support functions; collaborate with CCB Participants and key MCOs to identify and pursue VBP and other managed care contracting opportunities; oversee development and implementation of overall VBP strategy; recruit staff, including an executive to lead managed care contracting, to support achievement of CCB sustainability goals.
Compliance Officer, Maimonides Medical Center (MMC)	Martin Cammer, Senior Vice President and Chief Compliance Officer, Maimonides Medical Center	Collaborate with senior CSO leadership on refinement of the MMC Compliance Plan to incorporate DSRIP-related risks and mitigation strategies and development of a Compliance Program for the CSO and CCB.
Controller / Deputy Finance Officer, Maimonides CSO	Currently open position reporting to: Caroline D. Greene, Chief Administrative & Financial Officer, Maimonides Central Services Organization (CSO)	Preparing interim and annual financial reports on PPS budgeted vs. actual revenue and expense, and developing cash flow budgets and funds flow reports; establishing and overseeing internal control plans; serving as liaison with outside auditor(s) with respect to the annual audit of MMC (for DSRIP-specific activities) and CSO books and records.

Page 54 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 3.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Michael Carbery	Chief Information Officer for Population Health, Maimonides Central Services Organization (CSO)	Provide needed IT support for CCB's analytics & reporting and managed care contracting functions.
Chief Executives of CCB Participant entities	Leadership of CCB Participant entities	Overseeing Participants' fulfillment of DSRIP responsibilities as outlined in MSA and Participant-specific Schedules.
External Auditors	Audit	Participate in annual audit of the books and records of Maimonides Medical Center, to include the review/audit of PPS funds flow; perform annual audit of the Maimonides CSO.
Robert Cimino	Vice President, Analytics & Business Operations, Maimonides Central Services Organization (CSO)	Establish performance reporting and analytics capacity within the CSO; ensure the accuracy, timeliness and accessibility of performance reporting.
Medicaid Managed Care Organizations (MCOs)	HealthFirst, AmidaCare, others	Participants in key CCB committees and workgroups.
External Stakeholders		
Non-partner MCOs and other payers	Review/negotiation of CCB value-based payment contract proposals.	Collaborate with CCB to implement the PPS's value based strategy, including establishment of an effective contracting process.
NYSDOH	DSRIP requirements, guidance, and reporting	Confirm requirements and guidance for DSRIP reporting and development of budgets and funds flow.
Community groups	Representation of communities served	Provide input and feedback to inform development, implementation and ongoing refinement of DSRIP program plans and initiatives.
Government agencies, such as NYS DOH, NYC DOHMH, OMH, OASAS, DSS	Oversight and collaboration	Overseeing DSRIP contract and processing release of DSRIP funds (NYS DOH); providing ongoing guidance with respect to DSRIP deliverables and requirements (NYS DOH); participating in workgroup and committees (NYC DOHMH); providing oversight, regulations, and collaboration (all)

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 3.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

The Central Services Organization (CSO) and Finance Committee will depend on automated systems to support financial sustainability and overall success of CCB. Systems must be capable of capturing and reporting performance information at both a PPS and project level in order to support achievement of DSRIP goals and subsequent payments. As described in the Performance Reporting section below, this information will be used for CCB governance as well as rapid cycle evaluation. Data will need to be collected in a reliable and coordinated manner from CCB's wide network of Participants for various purposes, including information on Participants' financial health and transition to value based payments. These systems will need to be secure, reliable, and accurate, in order to be used to calculate DSRIP payments to Participants based on performance and update project/PPS budget and funds flow projections.

IPQR Module 3.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

CCB will measure the success of the financial sustainability work stream by the establishment of a financial management team within the CSO, the creation of a Finance Committee and Sustainability Workgroup, and implementation of the financial management and reporting structure. In addition, CCB will evaluate and revise/modify the CCB financial reporting structure to reflect the changing needs of the PPS as a whole and its Participants, develop a plan to address challenges of financially fragile Participants, receive approval on the CCB value-based payment plan, and collaborate with managed care organizations and other stakeholders to support the transition to value-based payment.

During the DSRIP planning phase, CCB completed initial financial health assessments of the PPS lead (Maimonides) and CCB Participants. The assessment will be modified/updated as necessary and re-administered to all Participants on an annual basis and the results summarized by the Chief Administrative and Financial Officer for review with the CCB Finance Committee. The Finance Committee will also provide feedback to ensure the assessment is comprehensive and tracking financial metrics reflective of Participants' financial health.

The CSO will work closely with Maimonides (the fiduciary), Executive Committee, and Finance Committee to monitor and ensure CCB's progress against State requirements and process measures. The CSO will support the CCB finance and reporting structure through the preparation of regular reports and updates on budget, funds flow, and Participant trends.

Maimonides Medical Center (PPS ID:33)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	and oversaw the development of CCB's Cultural Competency and Health Literacy Strategy (CCHLS), upon which the CCHL Training Plan has been based. Given the importance of this initiative, the CEC formed a workgroup to focus on developing the CCHL Training Plan. The CCHL Training Plan workgroup used the CCHLS as a point of departure for developing a training plan that addresses the drivers of health disparities and recognizes the critical role of social determinants of health. Drafted by representatives of key CBOs, the CCHL Training Plan was presented to and approved by both the CEC and the CCB Executive Committee at their meetings in June.
appropriate material).	CEC members participating as members of the CCHL Training Plan workgroup provided a more in-depth needs assessment of the community, including existing resources and training programs, and gaps in these resources and programs. The workgroup developed strategies to address these gaps in a CCHL Training Plan. Key principles and goals of the CCHL Training Plan include the following:
appropriate material).	1. Training must be a collaborative effort by CBOs and healthcare providers, with CBOs being a key driver to the development of culturally and linguistically appropriate services (CLAS).
	 Training must be culturally and linguistically appropriate, ideally, with the community of providers reflecting the diversity of the communities in Brooklyn. On-going training assessment is essential to the provision of data-driven feedback, and should incorporate evaluations, surveys and evaluations. The Training Plan needs to be a living document that is updated and revised to reflect ongoing feedback from the many engaged Community Stakeholders, as well as the progress of the PPS.
	5. The Training Plan should be monitored for reaching the goal of responding to both qualitative and quantitative data.
	The CCHL Training Plan addresses the need to incorporate the agreed upon principles and strategies in the overall Workforce Training Plan for CCB, and, to this end, the CCHL Training Plan will be shared with the CCB Workforce Committee to support its work on development of that document.

Page 63 of 284

Maimonides Medical Center (PPS ID:33)

IPQR Module 4.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in implementing your cultural competency / health literacy strategy and addressing the specific health disparities you are targeting (based on your CNA), and achieving the milestones described above - including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The CNA confirmed that CCB will serve large and diverse communities in Brooklyn characterized by concentrated populations of minority groups and poverty. Many Brooklyn providers have challenges addressing the needs and preferences of the varied cultures of their patients and are not well connected to community resources that can help address and improve their patients' health needs. This is compounded by the social and cultural factors that impact patients' abilities to access care, including language, education, and adverse socioeconomic factors. As CCB develops its cultural competency/health literacy and training strategies, it will develop programs that equip providers and other members of the workforce with the skills and tools they need to effectively communicate with and engage patients from all walks of life and to build a workforce with whom patients will identify and respect. CCB will work closely with its workforce partners to design curricula that address the health disparities among its ethnically and culturally diverse patient population. CCB will regularly update such curricula to address new immigrant groups, reflect learnings from partners' work in their communities, and ensure that CCB providers and staff have access to the best resources available. CCB will also work to develop educational resources that meet the language and cultural needs of the communities served.

CCB may face risks with respect to patient participation and engagement in CCB initiatives. To mitigate this risk and promote participation and engagement, CCB will make the initiatives and resources available to patients in their communities – rather than exclusively in health care settings. CCB will also actively monitor patient participation to assess whether individual initiatives are effectively reaching the target population and make adjustments or develop alternative initiatives as needed. Lastly, and perhaps most importantly, CCB will engage patients and community leaders in the development of the cultural competency and health literacy strategy and design of initiatives, actively seeking their feedback to understand which initiatives are likely to be well received or rejected by the target population.

Finally, CCB recognizes that many Participants are currently under-resourced and may require flexibility with respect to when and where they participate in cultural competency and health literacy training programs. To mitigate the risk of low provider participation in trainings, CCB will offer trainings through various media – online, telephonic and in-person—to facilitate ongoing access to information of relevance.

☑ IPQR Module 4.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The successful implementation of CCB's health literacy/cultural competency and training strategies is dependent on the practitioner engagement and workforce work streams. If CCB is unable to meaningfully engage practitioners or cultivate an adequate workforce to serve its beneficiaries, efforts to develop programs and curricula will have a less than optimal effect. Additionally, CCB will need to deploy a broad worker training program which will encompass health literacy/cultural competency. Deployment of cultural competency training programs is dependent on the

Run Date

Page 64 of 284 **Run Date**: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

broader training strategy.

The development of IT systems and organizational processes to support provider relations and patient demographics will also be critical to ensuring that (1) CCB is aware of and can track all CCB providers and other members of the workforce, their access to programs, and completion of curricula and (2) CCB can capture important data about beneficiaries' cultural and linguistic backgrounds and preferences to inform providers and connect beneficiaries with appropriate resources.

☑ IPQR Module 4.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
CCB Care Delivery and Quality Committee	Chairperson: Karen Nelson, MD, MPH, Senior Vice President, Integrated Delivery Systems, MMC, and Chief Medical Officer, Maimonides Central Services Organization (CSO)	Oversee the development of CCB Cultural Competency / Health Literacy standards and the strategy to achieve them
CCB Workforce Committee	Committee Chairperson TBD DY1 Q2 Interim Lead: David Cohen, MD, MSc, Executive Vice President for Clinical Affairs and Affiliations, MMC, and CEO, Maimonides Central Services Organization (CSO)	Oversee development and implementation of CCB's training strategy, to include training for CCB Participant staff in cultural competency and health literacy

Page 66 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 4.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
CCB Participant network providers, including PCPs and other providers such as CAMBA, a.i.r. NYC, JASA, NAMI, and Village Care	Recipients of educational and training programs	Commitment to the achievement of CCB's cultural competency standards
Training Vendor (Contractor TBD)	Development and implementation of cultural competency training program	Develop and implement CCB's cultural competency training & education program
CBOs, such as Caribbean Women's Health Association, God's Love We Deliver, National Alliance on Mental Illness, others	Provide feedback on proposed approach to increasing / enhancing cultural competency of the CCB network	Providing subject matter expertise; assisting with development/strengthening of channels of communication with Medicaid beneficiaries
External Stakeholders		
Religious/Cultural Institutions	Provide feedback on training and communication strategies	Providing subject matter expertise; assisting with development/strengthening of communications strategies
Patients & Families	Recipients of improved services; consultation on design of cultural competency / health literacy initiatives	Feedback on proposed cultural competency / health literacy initiatives

Page 67 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 4.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support the development and implementation of your cultural competency / health literacy strategy and the achievement of the milestones described above.

CCB will use IT systems to support the identification of cultural competency gaps, development of culturally competent resources/trainings, and implementation of the cultural competency/health literacy strategy. In the identification of cultural competency gaps, CCB will use data to identify demographic characteristics, health disparities, and health care usage information, within the very diverse populations across Brooklyn. This data will underpin the formation of the cultural competency/health literacy strategy, which will lay out the target populations, interventions, and trainings that will be conducted. Additionally, IT systems will support CCB in regularly assessing progress against the strategy and DSRIP milestones related to cultural competency and health literacy.

IPQR Module 4.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

Addressing cultural competency and health literacy across CCB will determine CCB's ability to achieve and perform against project requirements. CCB will measure the success of the cultural competency and health literacy strategy by the extent to which health outcomes improve across our entire attributed beneficiary population, taking into account improvements across different segments of the population (e.g., different race/ethnicities/primary language, etc.). Achievement will also be measured by attainment of overall DSRIP goals of reducing unnecessary emergency room and hospital utilization by 25%.

At a more granular level, we will measure success by working closely and cultivating meaningful working relationships with community-based organizations (CBOs) and other key leaders from communities characterized by health disparities to develop an actionable cultural competency and health literacy strategy and corresponding training plan that are adopted by the Executive Committee. Another measure of success will be the number of providers and other professionals trained in cultural competency and health literacy. The CSO will support the development of the strategy and training plan and, subsequently, track our progress against the strategy. We will also work closely with CBOs and key Participants to assess target population to measure patient engagement and satisfaction and analyze available data to inform changes to our strategy and initiatives.

☑ IPQR Module 5.1 - Prescribed Milestones

Instructions:

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s).	In Progress	Detailed IT current state assessment. Relevant QEs (RHIOs/HIEs) should be involved in performing this assessment.	04/01/2015	09/30/2016	04/01/2015	09/30/2016	09/30/2016	DY2 Q2	NO
Task Establish CCB IT Committee and populate membership from key CCB Participants and stakeholders.	Completed	Establish CCB IT Committee and populate membership from key CCB Participants and stakeholders.	04/01/2015	09/30/2015	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Engage RHIO and other NYS resources to determine RHIO/SHIN-NY technical capacity to meet connectivity and other technological gaps identified in the Participant Survey. Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Perform current state assessment of IT capabilities across	
network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s).	
Develop an IT Change Management Strategy.	
Develop roadmap to achieving clinical data sharing and interoperable systems across PPS network	
Develop a specific plan for engaging attributed members in Qualifying Entities	
Develop a data security and confidentiality plan.	Beginning in mid-2015, and working in close coordination and consultation with the NYS DOH DSRIP Data Security Team and other NYS DSRIP resources, CCB convened a group of stakeholders and partners, including the Maimonides MIS department, CCB's Business Operations and Analytics team, GSI Health (CCB's technology vendor for care coordination), and CCB's IT Committee, to define key use cases, data sets and derivatives, business processes, and technical capabilities available and/or required to securely host and utilize DOH Medicaid Claims Data (DOH MCD/PHI) for patients attributed to the CCB. This review included plans that would govern the hosting and use of data both pre- and post-Opt-Out, and addressed use of data by the PPS Lead and by downstream partners.

Run Date: 09/30/2016

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	CCB met with the DOH DSRIP Data Security Team in January 2016 to review and discuss the overall business case, process, and solution for the PPS Lead, and also explored the possibilities for hosting and utilizing DOH MCD/PHI post Opt-Out. This interactive review and discussion was further reinforced by the recent (June 2016) DOH updated guidance on DSRIP Data Security and supported CCB's decision to move forward with completing the DSRIP Data Security SSP process and building a dedicated, secure environment for hosting and utilizing DOH MCD/PHI as PPS Lead. The overall SSP Workbook requirements and process along with the planned solution for hosting DOH MCD/PHI were raised with CCB's IT committee in March, 2016 and approved by the Committee at its meeting on June 22.
	As of this report, all Data Security documents have been completed and submitted to DOH. Implementation of CCB's dedicated, secure environment is in progress with expected completion in August or September 2016, after which time the PPS will be able to receive and use DOH MCD/PHI.

☑ IPQR Module 5.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in creating and implementing your IT governance structure, your plans for data sharing across your network, your approach to data security and confidentiality, and the achievement of the milestones described above, including the potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The primary challenges to implementing the IT strategy center on the vast number of CCB Participants and the wide variation in their existing IT capabilities, systems, and capacity. Notably, CCB includes a large number of voluntary providers with neither the IT infrastructure nor the resources to support the procurement or implementation of new systems. These providers may also be hesitant to participate in an IT strategy unless there is a clear tie to benefits for the provider, including financial incentives. To address these risks, CCB will undertake a deliberate and thoughtful approach to engaging providers in the development and roll out of the PPS's IT strategy, and identify provider champions to both serve on the IT Committee and communicate changes to their peers. CCB will also, through its IT assessment, identify and subsequently develop resources and offer funding, as available, to assist providers with implementation.

The IT strategy will rely heavily on the Central Services Organization's (CSO) ability to support its development and execution. The CSO has been established, but it is a new organization with new personnel. To mitigate the risk that CSO development may delay work on the IT strategy, the CSO will rely on experienced IT leadership and personnel to lead its IT strategy and planning activities.

The success of the IT strategy and PPS will, to some extent, be dependent on CCB's ability to effectively work with Healthix (RHIO) and CCB Participants' vendors to enable connectivity, data exchange, and reporting. To mitigate this risk, CCB will engage Healthix and key Participant vendors early in the process to ensure processes and communication mechanisms are in place to facilitate timely implementation, along with the required data sharing policies. CCB will leverage its role as a large PPS encompassing many providers to negotiate effectively with Healthix. CCB will also offer an existing web-based care management platform, the GSI Health Coordinator (often referred to as the Dashboard), to Participants without existing systems to promote access to a shared IT platform.

☑ IPQR Module 5.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

IT will be critical to the success of nearly every workstream described in the Implementation Plan and its interdependencies are far reaching. Notably, the clinical integration work stream will rely on information gathered through the IT assessment and development of system requirements to inform the PPS's strategy and use cases. The population health management strategy will inform the development of platforms or shared systems to support the PPS, as will the cultural competency and health literacy strategy with respect to both provider and patient-facing tools. The workforce and practitioner engagement work streams are linked to IT as there will be a major training component for practitioners, their staff, and members of their care teams to ensure systems are utilized effectively and promote care coordination. Finally, CCB's governance work stream and committees will serve to ensure the coordination of IT with all of the necessary work streams in an effort to achieve economies of scale and

IPQR Module 5.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Chief Information Officer for Population Health, Maimonides Central Services Organization (CSO)	Michael Carbery	Leadership of IT Governance, IT Change Management, IT Strategy and IT roadmap development processes
Data and Security Lead, Maimonides Central Services Organization (CSO)	Unfilled Position, reporting to the CIO for Population Health	Data security and confidentiality plan
CCB IT Committee	Committee Chairperson TBD DY1 Q2 Interim Lead: Michael Carbery, Chief Information Officer for Population Health, Maimonides Central Services Organization (CSO)	IT strategy and roadmap, IT Change Management
CCB Care Delivery and Quality Committee, including key Participant leadership	Chairperson: Karen Nelson, MD, MPH, Senior Vice President, Integrated Delivery Systems, MMC, and Chief Medical Officer, Maimonides Central Services Organization (CSO)	Qualified Entity engagement plan

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 5.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
CCB Participants	Responsible for managing EHR interfaces and interoperability	Clinical data sharing and use of systems
CCB Executive Committee	Approval and oversight	Patient engagement plan and IT Strategy and roadmap
Key Hospitals and Medical Practices	Key CCB Participants	Clinical data sharing and use of systems
IT Vendors such as GSI Health	Provider of IT platforms	IT vendor for GSI Health Coordinator ("Dashboard"), others
External Stakeholders		
Healthix (RHIO)	RHIO Platform Lead	Roadmap for identifying need for and delivering new data sharing and other capabilities
Government agencies, such as NYS DOH, NYC DOHMH, OMH, OASAS, DSS	Oversight and collaboration	Overseeing DSRIP contract and processing release of DSRIP funds (NYS DOH); providing ongoing guidance with respect to DSRIP deliverables and requirements (NYS DOH); participating in workgroup and committees (NYC DOHMH); providing oversight, regulations, and collaboration (all)
Consumers/Families/Caregivers	Beneficiaries and focus group members	Input and feedback on Qualified Entity engagement plan

Run Date: 09/30/2016

Page 83 of 284

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 5.7 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

Securely and effectively connecting all Participants to allow for data sharing and collaborative patient care will play a large role in CCB's ability to successfully implement projects, improve care, and achieve broader DSRIP goals. To measure CCB's progress in achieving the IT strategy, we will track multiple measures of IT implementation and capabilities among Participants, including, but not limited to: EHR completeness reports, implementation and utilization of Meaningful Use and PCMH level-3 certified EHRs, and documentation and use of the GSI Health Coordinator Dashboard. The IT Committee will develop additional metrics as it develops the IT Strategy and roadmap to measure the PPS's progress against the strategy and budget.

IPQR Module 6.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in implementing performance reporting structures and processes and effective performance management within your network, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Participants in the CCB network have varying levels of reporting and analytical capabilities, yet all will need to understand how to interpret reports and use them to improve clinical care management and financial outcomes. To mitigate this risk, CCB's training programs will educate key personnel within each Participant entity on the PPS reporting structure and processes, and resource materials will be made available with respect to performance reporting. CCB will also work with individual Participants to ensure they have the necessary infrastructure to capture and report data per State or CCB reporting requirements. If a Participant lacks sufficient infrastructure, the Central Services Organization (CSO) will identify alternative means for the Participant to collect and report required data through the RHIO, Dashboard, or other means. To the extent Participants belong to more than one PPS, CCB will work with those Participants to ensure Participants can appropriately segment and report data by PPS.

It will be important to define and communicate CCB's performance reporting priorities and expectations to ensure Participants understand the relationship between targeted performance levels and DSRIP funding, as well as the impact of performance on financial sustainability. CCB will address this at a high level through the Master Services Agreement (MSA) contracting process, with Participant-specific exhibits detailing roles and responsibilities relative to each project, reporting requirements, and funding terms. The CSO's responsibilities with respect to analytics and reporting will also be documented and communicated to Participants. Since CCB will evolve with experience and be a "learning entity," it will be essential that the CSO have the capacity to support ongoing assessment and the re-setting of performance expectations over time as necessary to ensure the achievement of both project-specific and overall DSRIP goals. To mitigate the risk that Participants do not actively engage in performance reporting, CCB is developing a practitioner communications plan that will, among other things, address performance reporting expectations and processes, including various options that can be used to reach Participants (e.g., in-person meetings, webinars, newsletters, website updates, etc.)

Over the course of the DSRIP program, it will be increasingly important that Participants be provided with or are able to access reports and analyses that identify specific issues in need of attention to ensure that key milestones and targets are met. The CSO's Analytics & Reporting team will develop performance reports and assist with the interpretation of data to support timely, evidence-based decision making across the CCB network.

As the performance reporting structure is developed, CCB will identify key individuals within each Participant to support performance reporting needs and activities at the organization level. Based on Maimonides' experience implementing the Brooklyn Health Home, CCB anticipates that many small Participants, such as solo or small practice providers, will not have resources readily available to support reporting. Recognizing the importance of accurate and regular reporting to CCB's overall performance, the PPS workforce strategy will address reporting competencies and positions to ensure Participants have adequate support.

IPQR Module 6.4 - Major Dependencies on Organizational Workstreams

Instructions:

New York State Department Of Health Delivery System Reform Incentive Payment Project DSRIP Implementation Plan Project

Page 90 of 284 Run Date : 09/30/2016

Maimonides Medical Center (PPS ID:33)

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

For a clinical quality and performance reporting program to be effective, it must be developed in coordination with the Participant engagement strategy and CCB's approach to population health management. This is critical to ensure that all Participants understand the reporting and performance measurement process and both understand and buy in to the metrics being used to measure performance.

The performance reporting program must also be developed and rolled out with the support of CCB leadership and in the context of the PPS's overall governance structure. CCB will work closely with the appropriate governance committees, specifically the Executive, Finance, and Care Delivery and Quality Committees, to obtain input into the performance reporting structure and metrics and vet the communication plan before it is rolled out to Participants. The Finance Committee will play a particularly important role in assisting CCB as it identifies ties between the performance reporting structure and funds flow.

Finally, the PPS's needs for performance reporting related to the data that Participants will need to submit to CCB and the feedback reports to Participants will require coordination with CCB's IT systems. The CSO leadership will work in tandem to make sure that IT needs for performance reporting are communicated and incorporated into the larger CCB IT Strategy.

Page 91 of 284

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

IPQR Module 6.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Vice President, Analytics & Business Operations, Maimonides Central Services Organization (CSO)	Robert Cimino	Establish performance reporting and analytics capacity within the CSO, ensure the accuracy, timeliness and accessibility of performance reporting
Project Planning Workgroups, including Care Management, PCMH, 30-Day Readmissions and ED Triage	Kishor Malavade, MD, Associate Medical Director, Maimonides Central Services Organization (CSO)	Define reporting requirements and methodologies for DSRIP projects
CCB Executive Committee	Chairperson: David Cohen, MD, MSc, Executive Vice President for Clinical Affairs and Affiliations, MMC, and CEO, Maimonides Central Services Organization (CSO)	Review and approval of performance reporting plans and structure
CCB Care Delivery & Quality Committee	Chairperson: Karen Nelson, MD, MPH, Senior Vice President, Integrated Delivery Systems, MMC, and Chief Medical Officer, Maimonides Central Services Organization (CSO)	Review and approval of performance reporting plans and structure, focusing on care management and quality metrics and reporting
CCB Finance Committee	Chairperson: Caroline D. Greene, Chief Administrative & Financial Officer, Maimonides Central Services Organization (CSO)	Review and approval of performance reporting plans and structure, focusing on the links between performance reporting, the achievement of performance targets, and DSRIP payments

DSRIP Implementation Plan Project

Run Date: 09/30/2016

Page 92 of 284

☑ IPQR Module 6.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Participants' IT Staff	Reporting and IT System maintenance	Monitor use and support of reporting systems
CCB Workforce Committee	Advise on performance reporting training	Reviewing link between performance reporting training and workforce training curricula and materials
Participants (e.g., hospitals, clinics, PCPs, specialists, post-acute and long-term care providers, CBOs, and others)	Implement performance reporting processes	Provide performance data; employ standardized care practices to improve patient care outcomes
Michael Carbery	Chief Information Officer for Population Health, Maimonides Central Services Organization (CSO)	Ensure implementation of all IT requirements related to performance reporting, data security and confidentiality
External Stakeholders		
Managed Care Organizations	Provide key information to the CCB PPS to support value based purchasing	Provide data to PPS; value based payments
New York State Department of Health	Provide required metrics and key data to the PPS to evaluate performance and impact on patient outcomes	Provide key data to the PPS to evaluate performance and impact
Patients and Advocates	Provide qualitative feedback to CCB and Participants on provider/CBO performance	Data sources and feedback
Healthix and other NYS RHIOs/QEs	Provide key data to the PPS to evaluate performance and impact	Data source

Page 93 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 6.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support your approach to performance reporting.

Timely and accurate performance reporting across CCB will require the establishment of systems of communication among and between the Maimonides CSO and Participants, as well as the establishment of a shared database into which Participant-generated performance reports can be added and from which standard (and possibly customized) performance reports can be pulled. Performance data will need to be collected and maintained in a secure manner consistent with applicable standards, taking into consideration the types of and sources of information that will be involved in assessing Participant and CCB performance over time. The CSO's IT team will play a key role in supporting the performance reporting function, through the establishment and maintenance of secure approaches to the exchange of information, and through participation in the management and support of CCB-specific performance reporting databases. The CIO for the Maimonides CSO will be responsible for ensuring compliance with NYS DOH, Office of Health Insurance Programs requirements applicable to entities receiving Medicaid data in connection with the DSRIP program, such as the requirement that there be two-factor authentication (a.k.a. dual authentication) installed and tested within their IT systems before access to protected health information (PHI) is provided to CSO employees and contractors and/or to CCB Participant entities. The CIO will also be responsible for maintaining (and updating, as necessary) the list of users authorized to access certain NYS DOH systems and files, including but not limited to MAPP and Salient.

IT capabilities will be employed to maximize the impact and effectiveness of the performance reporting structure. CCB will employ tools (e.g., the GSI Health Coordinator/Dashboard, linkages with Healthix (RHIO) for quality metrics, etc.) to collect reliable performance data and analyze this information for rapid cycle evaluation and other performance monitoring responsibilities. However, CCB Participants are at varying levels of readiness and capacity for utilizing the Dashboard and sharing data with Healthix and will require technical assistance to ensure they can actively participate in the PPS's performance reporting structure. Once implemented broadly, these solutions will help ensure that CCB and Participant leadership has access to the information it needs on a timely basis as well as increase the effectiveness and efficiency of decision-making.

IPQR Module 6.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

The success of the CCB performance reporting work stream will be determined upon the acceptance by the Executive Committee of the proposed PPS-wide performance reporting and communication structure, including the adoption of plans to support rapid cycle evaluation of performance relative to agreed-upon DSRIP project goals and targets. CCB's progress in this work stream will be documented through the generation of regular performance reports at various levels (e.g., the PPS; regional, if/as appropriate; project-specific; Participant; and population-levels), and will be distributed to the Care Delivery and Quality, Finance, and Executive Committees for review and feedback. CCB will coordinate the development of the performance reporting training program and work with its Participants to identify and train local staff focused on clinical quality and

Page 94 of 284 **Run Date**: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

performance reporting. To measure the success of these trainings, the CSO will identify key performance personnel associated with each Participant as well as track the number of trainings completed.

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

🖾 IPQR Module 7.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the current level of engagement of your physician community in the DSRIP program and describe the key challenges or risks that you foresee in implementing your plans for physician engagement and achieving the milestones described above. Describe any potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Community Care of Brooklyn (CCB) has seen a high level of engagement in the practitioner community to date. CCB has included both primary care and subspecialist clinicians from key PPS Participants throughout the application planning process based on the DSRIP projects we selected. Among the physicians participating are: Dr. Steven Silber, Vice President, New York Methodist Hospital; Dr. Russell Portenoy from MJHS; and Dr. Kishor Malayade from Maimonides Medical Center who chairs the City-wide PPS Domain 4 Mental Health and Substance Abuse (MHSA) Infrastructure Workgroup. The MHSA workgroup includes physicians from four PPSs participating in cross-PPS planning for the project. Other practitioner types who are active in CCB DSRIP project planning include nursing, social workers, health educators, mental health professionals, substance abuse professionals.

CCB has held numerous all member webinars to educate practitioners about the transformative nature and resources that DSRIP will bring to Brooklyn's health care delivery system. We have expanded the number and types of practitioners included in the implementation planning process to include a broader group that has more physicians, nurses, social workers, care managers and behavioral health professionals. Additionally, CCB has already begun conversations with key practitioners to initiate engagement and discuss their participation in CCB. The long term success of clinical improvement projects in Domain 3 depends on practitioner willingness to adopt standardized clinical guidelines, processes and protocols across the CCB network proven to result in lower costs and better outcomes.

The biggest risk to achieving these milestones is engaging thousands of practitioners who may be hesitant to take time away from their practice to participate in the Project Advisory Committee and/or to attend the educational and training sessions provided by CCB. CCB hopes to mitigate this problem by providing resources and support to practices in various methods and timeframes to help practitioners work at the top of their licenses and participate in DSRIP activities.

IPQR Module 7.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

It is difficult to point to a DSRIP workstream in which practitioner engagement is not interdependent. For example, the use of IT by providers is fundamental to practitioners adopting population health management, tracking quality metrics for performance reporting, monitoring patient activity between visits and receiving alerts that enable quick follow up and communication when patients are in the hospital or ED. Additionally, the linkage to financial sustainability is notable since practitioner success with DSRIP will improve CCB abilities to produce cost savings, improve quality of care and patient outcomes that ultimately lead to financial sustainability via cost reductions and incentive payments to practitioners.

Page 101 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 7.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Chief Medical Officer, Maimonides Central Services Organization (CSO)	Karen Nelson, MD, MPH	Oversee CCB practitioner engagement and clinical programs
Associate Medical Director, Maimonides Central Services Organization (CSO)	Kishor Malavade, MD	Oversee CCB practitioner engagement and clinical programs; chair of cross-PPS Mental Health and Substance Abuse (MHSA) Workgroup
Vice President, Clinical Programs & Provider Engagement, Maimonides Central Services Organization (CSO)	Jenny Tsang-Quinn, MD	Oversee physician engagement strategy and PCMH training program
CCB Care Delivery and Quality Committee	Chairperson: Karen Nelson, MD, MPH, Senior Vice President, Integrated Delivery Systems, MMC, and Chief Medical Officer, Maimonides Central Services Organization (CSO)	Develop practitioner engagement plan; monitor and mitigate levels of practitioner engagement
CCB Workforce Committee	Committee Chairperson TBD DY1 Q2 Interim Lead: David Cohen, MD, MSc, Executive Vice President for Clinical Affairs and Affiliations, MMC, and CEO, Maimonides Central Services Organization (CSO)	Oversight of all training strategies, including practitioner education / training

Page 102 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

IPQR Module 7.6 - Key Stakeholders □

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities				
Internal Stakeholders						
Engaged practitioners from across the CCB network	Target of engagement activities	Provide care; attend training sessions				
External Stakeholders						
Public sector agencies, medical societies, other professional groups	Liaisons to practitioners	Provide guidance and assistance in engaging practitioners				
Patients and caregivers	Recipients of care	Receive care and provide feedback				
Other DSRIP PPSs	Strategic collaborators	Identifying opportunities to minimize redundant efforts in addressing the same practitioner community				

Page 103 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 7.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

CCB will use data and IT systems to collect, analyze, and report on performance across CCB. To the extent there is variation in performance across practitioners, CCB will provide reports and pair up champions with lower performing practices. IT capabilities, such as the GSI Health Coordinator/Dashboard, will allow for the collection and reporting of standardized performance metrics and more advanced analysis to support continuous quality improvement and provide data and analytics to participating practitioners. Other technology will be used to deliver key education and trainings to practitioners, as described in the earlier Workforce section. With Participant leaders, CCB will also explore shared IT platforms/websites for communication and collaboration between practitioners and specific learning networks, including but not limited to the MRT Innovation eXchange (MIX).

IPQR Module 7.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

CCB will measure the success of this workstream in three ways. First, at the most basic level, we will monitor attendance at educational and training sessions, all member webinars, and other learning forums provided by the Central Services Organization (CSO). For those who are involved in clinical governance, implementation planning, or advisory groups, we will track attendance at meetings. Second, the CSO will be tracking practitioner performance on each project via rapid cycle evaluation (RCE) and auditing adherence to evidence based guidelines and processes and protocols on a periodic basis. Third, based upon rapid cycle evaluation, we will periodically interview selected practitioners to gain knowledge about their experiences and concerns regarding DSRIP project implementation and impact on them and their patients.

IPQR Module 7.9 - IA Monitoring

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 8.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

One challenge to accomplishing this work stream is that this is a very new concept to many providers. This may impede provider acceptance of the need to adopt new technologies and work flows to support PHM. To address this risk, the Maimonides Central Services Organization (CSO) will implement a communications and education strategy to enhance providers' understanding and acceptance of PHM. The CSO will also develop and centralize resources and technologies to support providers' transitions to PHM.

CCB anticipates that providers may be slow to adopt new technology which could impact its ability to meet its speed and scale targets. To mitigate this risk, CCB is prepared to devote significant resources to provider training and oversight. CCB will use a variety of training methods to reach providers (in-person, web-based, and telephonic) and will provide training and technical assistance during off hours to meet provider needs.

A third, and potentially the largest challenge is that not all primary care provider (PCP) sites may achieve NCQA PCMH Level 3 Recognition by DY 3. CCB estimates that over half of CCB's PCPs have not yet achieved any level of NCQA PCMH recognition and the process for achieving PCMH recognition is time consuming and requires strong support and time commitment from leadership. There are many barriers that PCPs face, particularly community-based practitioners in small practices, when pursuing and maintaining PCMH recognition. There is a risk that some of these barriers (e.g., level of staff support, technology infrastructure, level of investment, etc.) might be difficult to overcome. To mitigate this risk, CSO staff has been actively reaching out to community physicians and plans to provide in person and online technical assistance to meet NCQA PCMH requirements.

☑ IPQR Module 8.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Population health management (PHM) is interdependent with the IT, clinical integration, and practitioner engagement work streams.

While IT alone will not yield a highly functioning PHM-based primary care practice, it is a necessary component to successfully embed PHM into the daily work flows of a primary care practice. Close alignment of IT architecture and its components with PHM goals must be central to planning, including the selection of applications and phasing in of new technologies along with training capabilities.

Clinical integration intersects with the PHM roadmap in multiple areas, specifically regarding the readiness assessment phase and the identification of data needs including how to integrate data from social services, supported housing providers, and other CBOs into the care planning and registry tools.

New York State Department Of Health Delivery System Reform Incentive Payment Project DSRIP Implementation Plan Project

Page 110 of 284 Run Date: 09/30/2016

Maimonides Medical Center (PPS ID:33)

Finally, CCB's ability to achieve population health management will depend on its success at engaging and educating providers toward common protocols to achieve DSRIP goals, including recognition of the importance of health literacy and cultural competence when engaging patients in behavioral change.

☑ IPQR Module 8.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities			
Internal Stakeholders	,				
Michael Carbery	Chief Information Officer for Population Health, Maimonides Central Services Organization (CSO)	Information Technology related requirements for PHM			
CCB Participants, including PCPs	Implementers of PHM	Perform PHM functions and transition to PCMH Level 3			
CBOs, including organizations focused on crime reduction, housing, and transportation (e.g. CAMBA, Caribbean Women's Health Association, GLWD, Village Care, JASA, etc.)	Support care management	Work with care management teams to improve PHM of target populations			
Workforce	Bed reduction plan	Affected by bed reduction plan and recipient of CCB training			
Robert Cimino	Vice President, Analytics & Business Operations, Maimonides Central Services Organization (CSO)	Establish performance reporting and analytics capacity within the CSO; ensure the accuracy, timeliness and accessibility of performance reporting.			
Key Hospital Leadership	Participant Leadership	Inform the development of the Bed Reduction Plan			
External Stakeholders					
Government agencies, such as NYS DOH, NYC DOHMH, OMH, OASAS, DSS	Oversight and collaboration	Overseeing DSRIP contract and processing release of DSRIP funds (NYS DOH); providing ongoing guidance with respect to DSRIP deliverables and requirements (NYS DOH); participating in workgroup and committees (NYC DOHMH); providing oversight, regulations, and collaboration (all)			
Labor Unions, including 1199SEIU, New York State Nurses Association (NYSNA), Committee of Interns and Residents (CIR), Civil Service Employees Association (CSEA), others	Representatives of subsets of affected staff	Provide input into bed reduction plan			
Patients/Consumers	Patients/Consumers	Provide input into bed reduction plan			
Managed Care Organizations (MCOs)	Key partner in payment reform	Feedback on CCB value-based payment reforms			
NCQA	Standards for PCMH	Provide standards and requirements for PCMH Level 3 recognition			
Other DSRIP PPSs	Strategic collaborators	Coordinate efforts in addressing the same patient population

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 8.7 - IT Expectations

Instructions:

Please describe the current Population Health Management IT capabilities in place throughout your PPS network and what your plans are at this stage for leveraging these capabilities and/or developing new IT infrastructure.

IT infrastructure will be foundational to properly managing the health of the CCB population. Overall, the CCB network will be required to improve the health of their patients on a community level, and CCB will rely on IT infrastructure and tools to aid Participants in this endeavor. As noted in the milestones above, working closely with the IT Committee, the CSO will explore IT solutions to automate population health management functions (e.g., EMRs, registries) and other applications to support Participants in multi-level reporting, predictive modeling, and continuous quality improvement.

As mentioned elsewhere in this plan, CCB intends to use the GSI Health Coordinator platform, called the "Dashboard," to support multiple workstreams. This existing web-based care planning tool has been used successfully over the last few years within the Brooklyn Health Home network and its functionality could be expanded to address PHM requirements. Additionally, CCB will work hand in hand with the RHIO (Healthix) to support data sharing and needs for population health management, being thoughtful as to not duplicate functionality that certain Participants may have already through their EMRs or other data/IT platforms.

IPQR Module 8.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

A series of measurements related to engagement with PHM applications and training will indicate successful implementation of this work stream. Specific measurements include: number of team members who have begun or completed training on PHM applications; number of providers (primary care team, behavioral health teams, and others) who actively use EMRs, care panning tools, and patient registries; number of primary care practices that have begun PCMH recognition; and number of PCP practices that achieved NCQA level 1, 2 or 3 PCMH recognition; and Executive Committee's approval of the bed reduction plan. In addition, and as specified in more detail under the Performance Reporting section, CCB will survey practitioners regarding adherence to evidence-based practices and analyze CCB Participant data on required performance metrics, such as reduction in preventable admissions and ED visits and HEDIS metrics.

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

IPQR Module 9.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges or risks that you foresee in improving the level of clinical integration throughout your network and achieving the milestones described above. Describe potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The primary challenge to improving the level of clinical integration is the tight timeline by which we will, by necessity, be conducting assessments of our network in parallel with other assessments and with implementation. For example, ideally, the clinical integration needs assessment would be conducted and completed prior to the IT current state assessment and IT data sharing/interoperability roadmap as the IT work should be tailored to supporting the clinical integration strategy. However, these assessments and strategies will need to be conducted simultaneously to allow us to achieve DSRIP milestones in a timely fashion. The Central Services Organization (CSO) will maintain close communication between the clinical integration and IT teams to avoid risks of these parallel, but related, assessments.

Other risks to effective clinical integration include the large number of voluntary providers in Brooklyn with complex relationships with hospitals or clinics. The diversity in provider number, type, and population served will make obtaining provider buy-in difficult as different providers may require different levels of outreach and support. To address this, the CSO will work closely with provider champions and regional Hubs to customize outreach to providers and encourage engagement. Other risks include the significant immediate requirements for planning, engagement, and start of execution that will rely on the CSO's organizational capacity and timing; the will, skill, and capacity for effective engagement among provider organizations; and sharing patient level data throughout the PPS. These risks will respectively be mitigated by the creation of and reliance on a coordinated governance and planning structure, the development of a practitioner engagement strategy with input from key Participants, and the execution of agreements throughout the PPS to enable data sharing, accompanied by an overarching IT strategy.

☑ IPQR Module 9.4 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

As described in the risks section above, the clinical integration work stream is dependent on nearly every other PPS work stream. It will require the input of the Finance, IT, Workforce, and Care Delivery and Quality Committees as CCB develops strategies to bridge Participants' systems, care models, and ultimately payment models to better serve the target population and transition to value-based purchasing. Of note, the Clinical Integration Strategy will need to be aligned with the IT clinical data sharing/interoperability roadmap as well as the population health management roadmap, as they contain similar aims. Additionally, the clinical integration work stream will rely on information gathered through IT assessments, the clinical operational plans that define the projects care model and the practitioner engagement strategy to achieve Participant buy-in to CCB's clinical integration strategy. Underlying all of these dependencies is the need for a strong governance structure and effective PPS leadership to ensure Committees and the CSO work effectively and collaboratively toward a common goal.

Page 120 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 9.5 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
CCB Care Delivery and Quality Committee	Chairperson: Karen Nelson, MD, MPH, Senior Vice President, Integrated Delivery Systems, MMC, and Chief Medical Officer, Maimonides Central Services Organization (CSO)	Made up of members of numerous Participants
Chief Information Officer for Population Health, Maimonides Central Services Organization (CSO)	Michael Carbery	Oversee IT infrastructure to address clinical integration needs
CCB IT Committee	Committee Chairperson TBD DY1Q2 Michael Carbery, Chief Information Officer for Population Health, Maimonides Central Services Organization (CSO)	Oversee IT requirements based on Clinical Integration Strategy
CCB Workforce Committee	Committee Chairperson TBD DY1 Q2 Interim Lead: David Cohen, MD, MSc, Executive Vice President, Clinical Affairs and Affiliations, MMC, and CEO, Maimonides Central Services Organization (CSO)	Develop training plans related to clinical integration strategy

Page 121 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 9.6 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Practitioners (including providers across the continuum of care)	Participation in clinical integration efforts	Engage in the process, including the consultation process and training
Clinical staff at Participant organizations across the CCB network	Participation in clinical integration efforts	Engage in the process, including the consultation process and training
Practitioners (including providers across the continuum of care)	Participation in clinical integration efforts	Engage in the process, including the consultation process and training
External Stakeholders		
Patients, Family members, and Caregivers	Recipient of improved care due to clinical integration	Feedback, communication, and participation in clinical integration of providers
Healthix and other NYS RHIOs/QEs	Data source and technology provider	Provision of data and connectivity with Participant systems, as needed

Page 122 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 9.7 - IT Expectations

Instructions:

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

The Clinical Integration workgroup will work extremely closely with the IT Committee to make sure that the development, modification, and implementation of IT systems are consistent with the Clinical Integration Strategy. The Strategy will lay out CCB's vision for data sharing and improving interoperability across the CCB network. Coordination and participation of the RHIO in this process will be key. While Participants will be at various stages of clinical integration and will likely need to employ different clinical integration approaches, the CSO and Clinical Integration workgroup will help support all Participants in transforming into a clinically integrated network.

☑ IPQR Module 9.8 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

CCB will develop a plan for measuring the success of clinical integration in our network by focusing on several specific metrics, to be identified during the development of the Clinical Integration Strategy. Potential indicators of success in this work stream include the development of a Clinical Integration Needs Assessment, establishment of a Clinical Integration workgroup, and formation and Executive Committee approval of the Clinical Integration Strategy. We will also utilize informal surveys and meetings of Participants to gather feedback on their perspective of the process, gauge need for additional supports, and make adjustments to the strategy as needed to most effectively implement clinical integration and work with our Participants.

IPQR Module 9.9 - IA Monitoring:

structions:	

DSRIP Implementation Plan Project

Page 123 of 284 Run Date: 09/30/2016

Maimonides Medical Center (PPS ID:33)

Section 10 – General Project Reporting

IPQR Module 10.1 - Overall approach to implementation

Instructions:

Please summarize your intended approach to the implementation of your chosen DSRIP projects, including considerations around how this approach will allow for the successful development of concurrently implementing DSRIP projects.

Community Care of Brooklyn's (CCB) approach to clinical project implementation is to establish a care model built upon a set of resources and capabilities that are mutually reinforcing and common across PPS Participants. The key components of our care model are described below.

- 1. Health Information Technology Platform. The GSI Health Coordinator web-based care planning tool (the Dashboard) will serve as the foundation for CCB's implementation plan by facilitating the development of an integrated delivery system. It addresses the lack of effective information exchange across the continuum of care between health care providers and community based organizations (CBOs). Through the Dashboard, providers can communicate in a timely and secure manner to address the determinants of health. DSRIP funds will be used to deploy the Dashboard across the network. The Central Services Organization (CSO) will provide Participants with implementation assistance and training and will provide ongoing support on protocols and workflows. CCB will build upon prior experience in developing and deploying the Dashboard for health homes.
- 2. Analytics and Reporting Infrastructure. CCB will explore use of the Dashboard to provide a strong analytics infrastructure with embedded population management tools. This will support Participants' timely access to performance reports, enabling providers and other accountable parties to measure and track the impact of their actions. Reporting capabilities will enable CCB to identify changes in care delivery that have a measurable impact on patient satisfaction and outcomes and implement those changes across the PPS.
- 3. Workforce Strategy. The CCB workforce strategy recognizes the need to re-train health care workers and providers to shift from hospital-based care and volume-based incentives to community-based care and value-based payments, and develop training and educational paths for individuals new to the healthcare workforce. These workforce members will be critical as they assist patients in managing chronic conditions and social issues. CCB plans to work with other PPSs, including OneCity Health, on Brooklyn-based workforce strategies and efforts, with the goal of achieving economies of scale and collectively elevating the available workforce. Areas of collaboration include definition of workforce categories and job descriptions.
- 4. Clinical Governance. CCB has established the Care Delivery and Quality (CDQ) Committee comprised of key Participant representatives and a diverse group of provider thought-leaders. The Committee will provide direction in defining and implementing change at the Participant and provider-levels. Day-to-day implementation and performance monitoring will be managed through the CSO. Workgroups reporting to the CDQ Committee will, in conjunction with CSO staff, develop clinical operations plans detailing the care model, patient flow, evidence-based protocols, workforce needs, and IT requirements needed to successfully implement the DSRIP projects. These initial plans will be reviewed by the CDQ Committee. The CSO, with input from the CDQ Committee, will work with CCB Participants to monitor performance and provide technical assistance to those needing additional support.
- 5. Financial Sustainability Plan. CCB will develop a financial sustainability plan grounded in a transparent and coordinated budgeting approach that

Page 124 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

takes into account CCB's central services (including the Dashboard), required investments in Participant staffing and IT infrastructure, project personnel (e.g. care managers), and training curricula. CCB will utilize a phased approach based on the State's value-based payment roadmap to transition Participants from primarily fee-for-service payment models to total cost of care or value-based payment models.

IPQR Module 10.2 - Major dependencies between work streams and coordination of projects

Instructions:

Please describe how your approach will handle interdependencies between complementary projects, as well as between projects and cross-cutting PPS initiatives - for example, an IT infrastructure upgrade, or the establishment of data sharing protocols.

CCB is taking deliberate steps to address interdependencies between projects and cross-cutting PPS initiatives. Maimonides has established a central services organization (CSO) and a governance infrastructure that together will ensure that PPS projects are well organized and coordinated. The CSO and governance structure are grounded in set of organizational policies and procedures that delineate a clear reporting structure and aim to streamline our efforts around cross-cutting initiatives and interdependencies.

During the planning phase, CCB reviewed and documented all project requirements and the steps necessary to achieve each requirement. Through this exercise, CCB identified overlapping and interdependent project requirements and work streams, such as health IT and provider engagement. Specific CSO staff members have been assigned to these cross-cutting work streams and Committees and/or workgroups will be established to oversee and manage these work streams across the PPS and our projects. For example, the IT Committee will work closely with CSO staff to develop a PPS-wide IT strategy and work plan to ensure Participants can meet IT-related project requirements and participate in electronic data sharing and communication that will be critical to many projects' success. In contrast, clinical workgroups will focus on the requirements and risks that are unique to specific projects.

CCB's service area overlaps with other Brooklyn-based and city-wide PPSs. To date, CCB has worked most closely with other PPSs on the Domain 4 population health projects focused on mental health and substance abuse and HIV. Achievement of Domain 4 objectives is dependent on the successful implementation of Domain 4 projects across all PPSs participating in these projects. To avoid duplication of efforts and encourage cross-PPS collaboration, CCB is engaged in multi-PPS planning workgroups focused on the Domain 4 projects. CCB currently chairs the mental health and substance abuse workgroup and believes the foundation for collaboration established during the planning phase will carry over and ultimately contribute to the overall success of our PPS and DSRIP.

Lastly, CCB recognizes that our ability to effectively engage Participants and improve health outcomes is dependent on our ability to develop a sophisticated and responsive performance reporting infrastructure that produces performance reports at the PPS, Participant, practice, and provider levels. Therefore, CCB will invest significant time and resources at the outset of DSRIP implementation to ensure that the PPS will be supported by a reporting infrastructure that is capable of responding to State-required reports as well as reports identified as critical to improving outcomes by CCB's clinical and operational leadership. The IT Committee will oversee the data and analytics infrastructure and CSO staff will regularly generate reports to inform the Executive, Care Delivery and Quality, and Finance Committees. CCB plans to analyze and share data directly with Participants and providers to encourage improvements in their performance and active engagement and in implementing DSRIP projects.

DSRIP Implementation Plan Project

Page 125 of 284 Run Date : 09/30/2016

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 10.3 - Project Roles and Responsibilities

Instructions:

Please outline the key individuals & organizations that play a role in the delivery of your PPS's DSRIP projects, as well as what their responsibilities are regarding governance, implementation, monitoring and reporting on your DSRIP projects.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
CCB Care Delivery and Quality Committee	Chairperson: Karen Nelson, MD, MPH, Senior Vice President, Integrated Delivery Systems, MMC, and Chief Medical Officer, Maimonides Central Services Organization (CSO)	Inform the implementation and performance of all CCB DSRIP projects
Chief Medical Officer, Maimonides Central Services Organization (CSO)	Karen Nelson, MD, MPH	Oversight of clinical protocols and processes; ultimate oversight of DSRIP project implementation
Associate Medical Director, Maimonides Central Services Organization (CSO)	Kishor Malavade, MD	Oversight of clinical protocols and processes; oversight of DSRIP project implementation; chair of cross-PPS Mental Health and Substance Abuse (MHSA) Workgroup
Project Planning Workgroups, including Care Management, PCMH, 30-Day Readmissions and ED Triage	Kishor Malavade, MD, Associate Medical Director, Maimonides Central Services Organization (CSO)	Responsible for informing and developing clinical operations plans
Vice President, Care Delivery and Regional Oversight, Maimonides Central Services Organization (CSO)	Shari Suchoff	Oversight of system transformation projects and regional implementation
Vice President, Clinical Programs & Provider Engagement, Maimonides Central Services Organization (CSO)	Jenny Tsang-Quinn, MD	Oversight of clinical projects and provider engagement
Care Management Partner Organizations	Housing Works, NADAP, Visiting Nurse Service of New York, CASES, Village Center for Care, others	Provide Committee members, leadership personnel, input into value based purchasing plans
Cross-PPS HIV Workgroup	CCB Participant: Jenny Tsang-Quinn, MD, Vice President, Clinical Programs & Provider Engagement, Maimonides Central Services Organization (CSO)	Responsible for informing cross-PPS strategy to HIV project implementation
Cross-PPS Mental Health and Substance Abuse (MHSA) Workgroup	Lead: Kishor Malavade, MD, Associate Medical Director, Maimonides Central Services Organization (CSO)	Responsible for informing cross-PPS strategy to MHSA project implementation

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 10.4 - Overview of key stakeholders and how influenced by your DSRIP projects

Instructions:

In the below table, please set out who the key stakeholders are that play a major role across multiple DSRIP projects. Please give an indication of the role they play and how they impact your approach to delivering your DSRIP projects.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
CCB Executive Committee	Oversight of DSRIP Projects	Responsible for oversight of project implementation, performance, and outcomes
CCB Workforce Committee	Advise on project training plans	Input into project-specific training plans
CCB Finance Committee	Oversight and input on project budgets	Oversight of PPS finances; review and approval of budgets and funds flow models; oversight of managed care contracting and CCB sustainability efforts
CCB IT Committee	Advise on IT requirements in projects	Responsible for development and oversight of CCB IT strategy to support projects
Government agencies, such as NYS DOH, NYC DOHMH, OMH, OASAS, DSS	Oversight and collaboration	Overseeing DSRIP contract and processing release of DSRIP funds (NYS DOH); providing ongoing guidance with respect to DSRIP deliverables and requirements (NYS DOH); participating in workgroup and committees (NYC DOHMH); providing oversight, regulations, and collaboration (all)
External Stakeholders		·
Labor Unions, including 1199SEIU, New York State Nurses Association (NYSNA), Committee of Interns and Residents (CIR), Civil Service Employees Association (CSEA), others	Labor/Union Representation	Expertise and input around job impacts and workforce retraining resulting from DSRIP projects
Healthix (RHIO)	RHIO Platform Lead	Support Participants' connectivity and data needs
Medicaid Managed Care Organizations (MCOs)	Key partner in payment reforms	Collaborate to develop value based payment structure and contracting approach

Page 127 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 10.5 - IT Requirements

Instructions:

Information technology will play a crucial role in the development of an effective, integrated performing provider system. It is likely that most projects will require some level of supporting IT infrastructure. Please describe the key elements of IT infrastructure development that will play a role in multiple projects.

CCB will use a variety of IT infrastructure to support CCB's ten projects. Given the breadth of requirements and scope of providers, CCB will undertake a significant planning process to identify the IT current state and gaps, and then develop a PPS-wide IT strategy and work plan to implement the strategy. The CSO staff, the membership of the IT and Care Delivery and Quality Committees, and clinical workgroups will be established to oversee and manage these work streams across the PPS and projects. The major IT solutions that will cut across most, if not all, DSRIP projects to create an integrated delivery system are 1) data sharing from provider EHRs with the RHIO and 2) a web-based care planning tool, called the Dashboard.

As a requirement across various projects, CCB will work to transition providers to EHRs and enable data sharing with the RHIO (Healthix). Many of the projects, such as 2.a.i Integrated Delivery Systems, 2.a.iii Health Home at Risk, and 3.b.i Cardiovascular Disease require relevant providers to share data with the RHIO and to obtain EHR systems that meet Meaningful Use standards. This will be a significant undertaking given the breadth of providers and their various states of EHR use across the CCB network.

The GSI Health Coordinator's existing web-based care planning tool, the Dashboard, will serve as the foundation for CCB's population heath management-driven IT architecture, enabling data sharing across Participants and access to patient-level information. The Dashboard is organized in a user-friendly electronic format that facilitates rapid evidence-based treatment and care management decisions among collaborating providers and patients about the physical, behavioral and social factors impacting patients' lives. The Dashboard has been used within the Brooklyn Health Home network for a number of years, and can be used in practices regardless of EHR use. The Dashboard will provide the platform to support care coordination in all of CCB's projects. Additionally, CCB plans to explore use of the Dashboard infrastructure to provide data and analytic support for population health management, reporting, and data exchange for Participants, which will be especially critical for providers who do not have EHRs. CCB plans to provide initial and ongoing training in the use of the Dashboard for members of the care team, with a focus on CCB-specific project requirements and the use of the Dashboard to facilitate timely and effective care management, secure communication among and between members of the care team, and the documentation of care plans and contact information for use by members of the care team going forward. Training will also include information on how information will be pulled from the Dashboard to support DSRIP reporting.

Lastly, the establishment of a centralized analytics and reporting function at the CSO will allow for reporting on performance metrics at the PPS, Participant, practice, and provider levels. This reporting infrastructure will require a standardized, accurate, and timely data collection infrastructure to monitor Participant progress in the various projects, determine where CCB needs to provide additional provider support, and generate performance on State-required guarterly reporting.

IPQR Module 10.6 - Performance Monitoring

Instructions:

Maimonides Medical Center (PPS ID:33)

Please explain how your DSRIP projects will fit into your development of a quality performance reporting system and culture.

CCB will monitor and track performance across all DSRIP projects and across the population of Medicaid beneficiaries included in the pool of individuals attributed to the PPS for performance measurement purposes. The CSO analytics and reporting team, CIO and IT staff, the Chief Medical Officer, and the Care Delivery and Quality Committee will work closely to design and implement performance reporting formats for at least three audiences: Participants, CSO project management staff, and the Care Delivery and Quality Committee. Performance reports will integrate Domain 1 process metrics, Domain 2 and 3 quality and outcome metrics, and other internal PPS reporting metrics selected by the Care Delivery and Quality Committee and incorporated into the performance reporting tool. CCB will utilize a rapid cycle evaluation methodology to monitor performance against the established metrics and identify providers at risk of missing performance targets. The rapid cycle evaluation process will also monitor and evaluate CCB performance through data and information provided from the NYS Department of Health through the MAPP and other sources. We will provide our Participants with training and other support to ensure that they have continuous quality improvement processes in place within their organizations, so that they may be active partners to CCB in detecting and addressing operational problems associated with the DSRIP projects in which they participate.

Recruitment of analytics and reporting staff and the development of performance reporting tools and processes are significant priorities for the CSO management team, given the need to commence analysis and reporting early on in the DSRIP process, recognizing that the tools and processes will evolve as the PPS and projects mature. As part of this effort, CCB will define its performance reporting and rapid cycle evaluation strategy, taking into consideration required reports and Participants' current reporting capabilities. CCB plans to present a performance reporting strategy to the Finance and Executive Committees and early in DY2. Once reports are finalized, the CSO will oversee a process to regularly run and share reports with the relevant governance committees and across Participants. While the strategy is under development, CCB will adhere to the State's reporting timeline and generate reports based on data available through the Dashboard, Participant surveys, and manual processes.

DSRIP Implementation Plan Project

IPQR Module 10.7 - Community Engagement

Instructions:

Please describe your PPS's planned approach for driving community involvement in the DSRIP projects, how you will contract with CBOs for these projects, how community engagement will contribute to the success of the projects, and any risks associated with this.

Recognizing that the active involvement and commitment of CBOs will be critical to our success, CCB is undertaking the following approach to ensure that the Brooklyn community engages in our DSRIP projects:

- CCB is developing a survey to gain knowledge of the services and the capacity of CBOs participating in our PPS. The information will enable CCB to match CBOs to Participant resource needs in each DSRIP project, as well as identify areas where CBOs may require support.
- Community-based providers will continue to serve a vital role by serving on clinical implementation workgroups and identifying strategies for patient engagement, health literacy, and cultural competency. CCB will contract with select CBOs to support training, outreach, peer education and project implementation.
- CCB has structured its Project Advisory Committee (PAC) to be fully representative of our membership, with one representative from each Participant including CBOs. The PAC will meet regularly to review project implementation progress, performance reports, and provide feedback based on CBO experiences with patients and in the community.

Successful achievement of DSRIP projects and goals is dependent on community-wide engagement. Brooklyn has many diverse sub-populations and communities that will be challenging to reach without the involvement of local leaders and CBOs. These leaders and CBOs understand the target population and will be a critical resource.

The first risk in engaging the community and CBOs is that demand for services exceeds the resources currently available in Brooklyn. To mitigate this risk, CCB will actively encourage further CBO engagement and the expansion of existing or cultivation of new resources. CCB will seek out opportunities to leverage and support CBOs in the borough. CCB is engaged in cross-PPS planning with respect to HIV and MHSA projects and is beginning conversations around asthma home-based self-management and palliative care..

A second risk is that many CBOs in Brooklyn have limited or no IT infrastructure, limiting their ability to participate in data sharing activities that are critical effective use of care teams. To mitigate this risk, CBO Participants will have access to the Dashboard to ensure they can access and communicate with providers across the PPS and contribute to and update patient care plans. CCB is also developing a PPS-wide health IT strategy and will plan to invest in the infrastructure, staff, and resources required to ensure CBOs may actively participate in DSRIP projects. Lastly, there is risk that CBOs will not fully support CCB's efforts to engage their local communities in health and wellness activities that are new to their culture and values. To mitigate this risk, CCB will develop education and outreach campaigns in conjunction with CBOs to understand specific sensitivities. Materials will be developed and disseminated according to CCB's cultural competency and health literacy standards and will be piloted with a small group of CBOs before they are broadly deployed.

Section 11 - Workforce

☑ IPQR Module 11.1 - Workforce Strategy Spending (Baseline)

Instructions:

Please include details on expected workforce spending on a semi-annual basis. Funds may be shifted from one funding type category to another within the workforce strategy spending table, as long as the PPS adheres to their overall spend commitments. However, the PPS may apply a 25% discount factor to the DY1 Workforce Strategy Spend target. If the PPS applies this discount in DY1, the PPS will be expected to reallocate those funds appropriately in DY2-4 to fully meet their DY1-4 total commitment.

☑ IPQR Module 11.2 - Prescribed Milestones

Instructions:

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement. Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Please note some milestones include minimum expected completion dates.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Define target workforce state (in line with DSRIP program's goals).	Completed	Finalized PPS target workforce state, signed off by PPS workforce governance body.	07/01/2015	06/30/2016	07/01/2015	06/30/2016	06/30/2016	DY2 Q1	NO

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	CCB's Target Workforce State report was developed in collaboration with key PPS stakeholders, CCB's Workforce Committee and a consortium of collaborating PPS (OneCity Health PPS, NYU Lutheran PPS, and Bronx Partners for Health Communities PPS). The collaborating PPS convened project managers and clinical leads to discuss the DSRIP projects' impacts and assumptions that informed the future-state modeling.
Define target workforce state (in line with DSRIP program's goals).	Estimating the future workforce requirements to support and sustain DSRIP-related system transformation while factoring in broader population trends, was accomplished using a combination of existing workforce modeling tools, original data analysis, findings from published literature, information on the population served and healthcare use patterns within New York State and CCB's service area, as well as expert opinion from CCB's project leads and consulting analysts. The modeling tools and methods used were adapted to reflect the characteristics of Brooklyn's Medicaid beneficiaries and the nature of CCB's selected DSRIP projects.
	The report indicates increased demand for roles related to care coordination and primary care, consistent with the goals of DSRIP and reflecting their critical importance within a transformed delivery system. However, the report also suggests that, overall, CCB's DSRIP initiatives are unlikely to materially and/or negatively impact the healthcare delivery workforce when compared to population trends external to the DSRIP program.
	CCB's Target Workforce State report was approved by its Workforce Committee on June 16, 2016 and by its Executive Committee on June 29, 2016.
Create a workforce transition roadmap for achieving defined	
target workforce state.	
Perform detailed gap analysis between current state	
assessment of workforce and projected future state.	
	CCB engaged BDO Consulting, LLC (BDO) to assist with the collection and analysis of workforce compensation data for CCB's Participant network. In collaboration with the Center for Health Workforce Studies (CHWS), CCB's Workforce Committee and a consortium of downstate PPS (OneCity Health PPS, NYU Lutheran PPS, and Bronx Partners for Health Communities PPS), BDO helped to develop and distribute a comprehensive survey to CCB's Participants to collect current-state workforce data. Prior to the survey being distributed, CCB conducted outreach to its Participants, alerting them to the upcoming survey. The survey was distributed and completed during DY1Q4. Participants submitted surveys directly to CHWS to comply with antitrust provisions.
Produce a compensation and benefit analysis, covering impacts on both retrained and redeployed staff, as well as new hires, particularly focusing on full and partial placements.	A total of 288 surveys were completed and submitted by 172 Participant organizations, for an overall response rate of approximately 21% (10.0% for private practitioners and 31.0% for other organizations). The data received represents a much greater proportion of CCB's Participants' workforce, as CCB's largest organizations submitted surveys, including all of its six hospitals. The survey data collected represents a total headcount of 88,927 and 58,596 FTEs.
	To provide CCB with valuable insights pertaining to workforce compensation and benefits, survey responses were aggregated and analyzed by facility type, by job title, and by organization. CCB's Compensation and Benefits Survey report was approved by its Workforce Committee on June 16, 2016 and by its Executive Committee on June 29, 2016.
Develop training strategy.	COD 3 Compensation and Benefits Survey report was approved by its workforce Committee on June 10, 2010 and by its Executive Committee on June 29, 2010.
Develop training strategy.

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 11.4 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions:

Please describe the key challenges and risks that you foresee in achieving the milestones set out above, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

One challenge to implementation is the time required to gather and analyze relevant workforce data, particularly given the tens of thousands of employees at Community Care of Brooklyn (CCB) Participant organizations and the fact that job titles and roles vary significantly across Participants. The development of an effective workforce strategy requires a detailed analysis of program needs and the identification of types of employees affected by DSRIP activities. CCB will gather and analyze information on such factors as the current number of FTEs, type of FTEs, and roles/responsibilities of staff, as compared to the projected future state. While CCB will focus information gathering and analysis on the areas of most relevance to the achievement of DSRIP goals, the scope of this effort and its impact on timing will nonetheless be a concern.

A second challenge is the ability to recruit/hire dedicated staff to support the achievement of DSRIP transformation goals. CCB anticipates that there will be significant numbers of new care manager positions created over the DSRIP period, as well as new care navigators, peer service workers, mental health, and nursing professionals needed. It is also anticipated that the majority of the new positions created will be in outpatient settings, including patient centered medical homes (PCMHs), urgent care centers, Health Homes (HHs), and other ambulatory settings. The numerous Participants and their varied human resources policies could create challenges as we work to hire and recruit for these positions. Additionally, many of the Participant organizations in the CCB network have collective bargaining agreements in place, while many others do not, potentially impacting recruitment efforts. Variation in compensation levels (and the mix of salary and benefits as components of total compensation) across a widely varied group of Participant entities will create challenges as well. CCB will work closely with unions, staff representatives, and other stakeholders through the CCB Workforce Committee and in collaboration with other Brooklyn PPSs. CCB's workforce strategy will be informed by the results of a salary survey and benefit analysis that will help to ensure that compensation levels (including different combinations of salary and benefits) are appropriate and competitive.

Finally, the ability to retrain a significant number of workers and to engage workers to help carry out DSRIP transformations is a challenge. Similar to the issues related to recruitment, CCB will work closely with unions, staff representatives and other stakeholders through our Workforce Committee and in collaboration with other Brooklyn PPSs to develop a comprehensive workforce engagement plan, which is detailed in the Governance section.

IPQR Module 11.5 - Major Dependencies on Organizational Workstreams

Instructions:

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The workforce work stream is highly dependent on the development of detailed clinical operational plans that set forth the operational requirements and specific staffing models that support the care models being pursued for each project. These plans are further described in the

Page 141 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

General Project Implementation section.

Certain modules in the workforce training curriculum will be dependent on the analysis to be conducted in the cultural competency and health literacy work stream. The workforce must be capable of effectively communicating with the patient population and understand the potential challenges and available resources to address health literacy.

The workforce work stream also overlaps with governance (e.g., CCB decision-making related to affected employees) and finance (e.g., the development of the budget and funds flow to Participants and vendors in order to support the workforce strategy).

IT systems and processes, including the degree to which each Participant is clinically integrated (as detailed in the Clinical Integration section) will impact worker job functions and roles/responsibilities. The development of these two work streams is highly interdependent.

Finally, the ability of CCB to meet its DSRIP targets and transition to value-based purchasing will be critical to sustainability overall and, thus, to the sustainability of the newly-envisioned workforce.

Page 142 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

IPQR Module 11.6 - Roles and Responsibilities

Instructions:

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Maimonides CSO Workforce Lead	TBD (recruitment underway)	Dedicated Project Manager (PM) in the Central Services Organization (CSO) accountable for development of workforce plans and execution of all workforce-related activities.
Workforce Training Vendor	1199 Training and Employment Fund (TEF) and others TBD	One or more training vendors that can support the execution of workforce-related activities and provide training modules and/or certification training to support workforce re-training needs.
Workforce Committee	Made up of individuals nominated from CCB Participant entities	A group of cross-functional resources (e.g. Workforce PM, Human Resources, Maimonides, 1199 TEF, union representatives, etc.) responsible for overall direction, guidance, and decisions.
Labor Representation	1199, NYSNA, CIR, CSEA, and others TBD	Labor groups that can provide insights and expertise into likely workforce impacts, staffing models, and key job categories that will require retraining, redeployment, or hiring.

Page 143 of 284

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 11.7 - Key Stakeholders

Instructions:

Please identify the key stakeholders involved in your workforce transformation plans, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Maimonides CSO Workforce Staff	Leaders of workforce activities	Provide oversight and input to development of workforce strategies, training needs assessment, and subsequent training strategy.
HR Leads of CCB Participants	Supportive of HR data collection	Support data collection of compensation and benefit information, current state workforce information and potential hiring needs.
Representatives from Larger CCB Participant Entities	Strategic collaborators	Provide insights and information related to potential destinations of redeployed staff.
External Stakeholders	•	·
Training Vendors	Training providers	Provide technical training curriculum development and recruiting support.
Workforce Consultants	Advisers on workforce activities	Support coordination and execution of workforce activities and analyses; conduct baseline workforce data collection.
Institutions of Higher Learning	Advisers on workforce activities	Involved in training and education of workforce.

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

IPQR Module 11.8 - IT Expectations

Instructions:

Please describe how the development of shared IT infrastructure across the PPS will support your plans for workforce transformation.

CCB is building a Participant database that will, among other functions, be used to record and maintain information with respect to Participant entities' staffing and workforce needs as related to the DSRIP program. The database may also be used to record and track information about Participant staff involvement in targeted CCB training programs. CCB will also be evaluating options for the use of a computer-based learning management system to support training across the PPS and across levels and types of staff, and the IT team will play a key role in evaluating system options and assisting with the roll out of those programs across entities. The Central Services Organization (CSO) will be responsible for collecting and tracking information on workforce needs and for coordinating the implementation of workforce training programs, and there may be systems developed or purchased to support this work. The CSO workforce lead (recruitment underway) will need access to reliable sources of data and information to fulfill her/his responsibilities with respect to monitoring CCB progress against the target workforce state and preparing progress updates (e.g., quarterly reports on DSRIP milestones), and she/he will partner with IT and analytics and reporting leads to accomplish this.

IPQR Module 11.9 - Progress Reporting

Instructions:

Please describe how you will measure the success of this organizational workstream.

Establishment of a well-trained, patient-focused workforce is foundational to achievement of all CCB and DSRIP-related goals. To ensure that the vision for CCB's workforce can be attained, significant time in DY1 will be spent defining the types and numbers of workers CCB will need to successfully implement DSRIP projects, and comparing that "target state" against the types and numbers of workers currently employed by CCB Participants. We will also invest in assessing the workforce's training needs and, leveraging our understanding of training and the current and target workforce states, develop a comprehensive workforce roadmap.

CCB has established a reporting structure through which this important work can be accomplished. Workforce planning and implementation will be performed jointly through the CSO (with dedicated workforce personnel) and with significant involvement of the CCB Workforce Committee. The Workforce Committee will include representation across CCB Participants, including unions and front-line workers. The Workforce Committee will meet frequently, and be heavily involved in contributing to and reviewing all of the Governance deliverables across DY1. All deliverables and recommendations will also be shared with CCB's Executive Committee for review and approval.

During DY2, CCB will finalize the workforce training strategy and track process against the DSRIP Workforce roadmap, training strategy, and target workforce numbers through regular communication with and reporting to and from CCB Participants. We will leverage our IT systems to

Page 144 of 284 Run Date: 09/30/2016

ensure timely communication against target workforce numbers, and leverage other tools and metrics (e.g. surveys, training attendance, training satisfaction, etc.) to better understand how workers are impacted through CCB workforce initiatives.

Maimonides Medical Center (PPS ID:33)

IPQR Module 11.11 - Workforce Strategy Spending (Quarterly):

Instructions:

Please include details on workforce spending for DY2. The workforce spending actuals should reflect only what was spent during the relevant quarters and is not cumulative across semi-annual periods. The PPS can shift funding across categories; e.g., from Retraining to New Hires. Please note that the "Cumulative Percent of Commitments Expended through Current DSRIP Year (DY2)" section is calculated based on the total yearly commitments.

Benchmarks	
Year	Amount(\$)
Total Cumulative Spending Commitment through Current DSRIP Year(DY2)	5,507,325.00

For the Torre	Workforce Spe	ending Actuals	Cumulative Spending to Date	Cumulative Percent of Commitments		
Funding Type	DY1(Q1/Q2)(\$)	DY1(Q3/Q4)(\$)	(DY1-DY5)(\$)	Expended through Current DSRIP Year (DY2)		
Retraining	0.00	0.00	1,993,420.00	55.41%		
Redeployment	0.00	0.00	0.00	0.00%		
New Hires	0.00	0.00	0.00	0.00%		
Other	0.00	0.00	320,000.00	32.12%

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

Project 2.a.i – Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management

IPQR Module 2.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

- 1. Access to EMRs/Electronic Data Sharing Systems. Many participating providers do not currently have an electronic medical record (EMR). Those who do have an EMR rely on widely different EMR systems with varying capabilities. Additionally, most Participants do not use an electronic care management tool to effectively manage a patient's services. This limited capacity for data exchange creates a risk to achieving effective communication and coordination. To mitigate this risk, CCB will deploy the GSI Health Coordinator electronic web-based care planning tool, the Dashboard, to designate and connect members of patient care teams and document key elements of a patient's care plan, regardless of EMR used. Subject to patient consent, providers involved in the care of a patient will have access to a shared care plan and population health management platform, which includes clinical data from the RHIO, Healthix.
- 2. Primary Care Shortage. There is a risk that there may not be enough PCPs to successfully implement DSRIP programs. To mitigate this risk, CCB will work to expand the effective capacity of current provider networks and engage in developing/deploying new training programs and recruitment activities, including the marketing of new jobs/job functions created as a result of DSRIP efforts.
- 3. Lack of PCMHs. CCB estimates that over half of CCB's PCPs have not yet achieved any level of NCQA Patient Centered Medical Home (PCMH) recognition. To mitigate this risk, CSO staff has been actively engaging physicians and plans to provide technical support to assist with meeting NCQA requirements.
- 4. Patient Engagement. Social factors are often barriers to building and sustaining strong patient-provider relationships. To mitigate this risk, CCB will recruit and train peers to engage chronically ill populations, communicate health information in a culturally competent manner, and connect patients with services.
- 5. Recruiting and Retraining Workforce. A risk to development of an integrated delivery system is the ability of Participants to hire, retain, and train the workforce needed. To mitigate these risks, CCB will implement a large scale training initiative carried out by established vendors.
- 6. Value-Based Payment. There is a risk that the scale and speed of the contracting envisioned by the State (90% of all payments be value based by DY5) may be difficult to achieve. To mitigate this risk, CCB will identify leaders among the smaller practices and work with them to guide them through DSRIP implementation. CCB will also identify and leverage Participants who have already assumed risk in their payment arrangements to pilot and test specific value-based payment programs prior to wider deployment/adoption.
- 7. Financial Uncertainty. There are financial risks including costs associated with implementation, the ability of Participants to collectively achieve outcomes, and the financial health of Participant entities. CCB plans to use early funds to get DSRIP programs running and to invest in the centralized infrastructure that will facilitate overall implementation across the network and thus help to ensure that later payments are achieved.

Page 149 of 284 Run Date : 09/30/2016

New York State Department Of Health Delivery System Reform Incentive Payment Project DSRIP Implementation Plan Project

Page 150 of 284 **Run Date**: 09/30/2016

- 8. Availability of Capital Funds. The availability of capital funds will impact CCB project implementation and performance, as several projects require up-front capital investments. If capital funding is delayed or not granted this may create a risk to meeting DSRIP goals. To mitigate this risk, CCB will continue to advocate for the favorable review and disposition of Participants' applications. CCB will also work to identify additional sources of capital funding.
- 9. Regulatory Uncertainty. DOH did not grant all of the waiver requests CCB submitted. Where waivers cannot be granted, CCB will work with its Participants to implement projects in a way that does not require regulatory waivers.

Page 151 of 284 Run Date : 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

☑ IPQR Module 2.a.i.2 - Prescribed Milestones

Instructions:

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post- acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	DY3 Q4	Project	N/A	In Progress	07/01/2015	03/31/2018	07/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task PPS includes continuum of providers in IDS, including medical, behavioral health, post-acute, long-term care, and community- based providers.		Project		In Progress	07/01/2015	03/31/2018	07/01/2015	03/31/2018	03/31/2018	DY3 Q4

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
All PPS providers must be included in the Integrated Delivery System.	
The IDS should include all medical, behavioral, post-acute, long-term	
care, and community-based service providers within the PPS network;	
additionally, the IDS structure must include payers and social service	
organizations, as necessary to support its strategy.	
Utilize partnering HH and ACO population health management systems	
and capabilities to implement the PPS' strategy towards evolving into an	
IDS.	
Ensure patients receive appropriate health care and community support,	
including medical and behavioral health, post-acute care, long term care	
and public health services.	
Ensure that all PPS safety net providers are actively sharing EHR	
systems with local health information exchange/RHIO/SHIN-NY and	
sharing health information among clinical partners, including directed	
exchange (secure messaging), alerts and patient record look up, by the	
end of Demonstration Year (DY) 3.	
Ensure that EHR systems used by participating safety net providers meet	
Meaningful Use and PCMH Level 3 standards and/or APCM by the end of	
Demonstration Year 3.	
Perform population health management by actively using EHRs and other	
IT platforms, including use of targeted patient registries, for all	
participating safety net providers.	
Achieve 2014 Level 3 PCMH primary care certification and/or meet state-	
determined criteria for Advanced Primary Care Models for all participating	
PCPs, expand access to primary care providers, and meet EHR	
Meaningful Use standards by the end of DY 3.	
Contract with Medicaid Managed Care Organizations and other payers,	
as appropriate, as an integrated system and establish value-based	
payment arrangements.	
Establish monthly meetings with Medicaid MCOs to discuss utilization	
trends, performance issues, and payment reform.	
Re-enforce the transition towards value-based payment reform by	
aligning provider compensation to patient outcomes.	
Engage patients in the integrated delivery system through outreach and	
navigation activities, leveraging community health workers, peers, and	
culturally competent community-based organizations, as appropriate.

IPQR Module 2.a.i.4 - IA Monitoring	
Instructions:	

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

Project 2.a.iii – Health Home At-Risk Intervention Program: Proactive management of higher risk patients not currently eligible for Health Homes through access to high quality primary care and support services

IPQR Module 2.a.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The major risks to implementing 2.a.iii and corresponding mitigation strategies that will be used are described below:

- 1. Access to EMRs/Electronic Data Sharing Systems: Many participating providers do not currently have an electronic medical record (EMR). Those who do have an EMR rely on widely different EMR systems with varying capabilities. Additionally, most Participants do not use an electronic care management tool that enables information sharing across providers to effectively manage a patient's services. This lack of information technology (IT)/EMR infrastructure and limited capacity for data exchange creates a risk to achieving effective communication and coordination across CCB Participants. To mitigate this risk, CCB will leverage the GSI Health Coordinator electronic web-based care planning tool, the Dashboard, as a way to designate and connect members of patient care teams and document key elements of a patient's care plan, regardless of EMR used. Subject to patient consent, providers involved in the care of a patient will have access to this shared care plan and population health management platform, which includes key clinical data from the Regional Health Information Organization (RHIO), Healthix.
- 2. Provider Awareness of Health Homes: Engaging patients in this project will rely heavily on referrals to health homes from PPS providers. It is critical that referring providers are knowledgeable about health homes and care management services available. To mitigate the risk that providers are unaware of health home services, CCB will educate Participants about the specific services health homes offer, how they serve the patient, and create a simple referral process. The Care Delivery and Quality Committee and Care Management Workgroup will oversee development of these protocols, definition of roles and responsibilities with respect to the protocols and the project care model, and monitor progress to assess effectiveness and recommend changes, as needed.
- 3. Coordinating Care Across Multiple Settings: Most people receive health care and other services from multiple providers. Health home care management helps to connect these providers, bringing together a patient's care team across multiple institutions using a shared care plan. This model of care will be new for some CCB Participants who may be accustomed to providing care exclusively within the four walls of their organizations. To mitigate the risk associated with this change, CCB will expand the use of interdisciplinary team building modules that Maimonides developed with 1199SEIU Training and Employment Funds (TEF) in which PCPs, psychiatrists, care managers and other providers participate together
- 4. Insufficient Care Management Workforce: As health home enrollment has expanded, it has become clear that there is an insufficient workforce of care management staff to meet the needs of the Brooklyn population. To mitigate this risk, CCB will work with the TEF and others to identify and train capable care management workers.
- 5. Patient Engagement and Compliance: Actively engaging patients can be challenging, especially when there are language and cultural barriers. To mitigate this risk, CCB will incorporate cultural competency training into its curriculum for providers. CCB will leverage its experience working with the two health homes in its network that have been successful in engaging and retaining patients in care. CCB will work with them to continue

to test new engagement and compliance strategies and spread them to other providers in the PPS. CCB will regularly review performance data to determine which strategies are most effective and tweak less effective strategies as needed.

Maimonides Medical Center (PPS ID:33)

IPQR Module 2.a.iii.2 - Patient Engagement Speed

Instructions:

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Milestone Name	Narrative Text
Develop a Health Home At-Risk Intervention Program, utilizing	
participating HHs as well as PCMH/APC PCPs in care coordination within	
the program.	
Ensure all primary care providers participating in the project meet NCQA	
(2011) accredited Patient Centered Medical Home, Level 3 standards and	
will achieve NCQA 2014 Level 3 PCMH and Advanced Primary Care	
accreditation by Demonstration Year (DY) 3.	
Ensure that all participating safety net providers are actively sharing EHR	
systems with local health information exchange/RHIO/SHIN-NY and	
sharing health information among clinical partners, including direct	
exchange (secure messaging), alerts and patient record look up.	
Ensure that EHR systems used by participating safety net providers meet	
Meaningful Use and PCMH Level 3 standards and/or APCM.	
Perform population health management by actively using EHRs and other	
IT platforms, including use of targeted patient registries, for all	
participating safety net providers.	
Develop a comprehensive care management plan for each patient to	
engage him/her in care and to reduce patient risk factors.	
Establish partnerships between primary care providers and the local	
Health Home for care management services. This plan should clearly	
delineate roles and responsibilities for both parties.	
Establish partnerships between the primary care providers, in concert	
with the Health Home, with network resources for needed services.	
Where necessary, the provider will work with local government units	
(such as SPOAs and public health departments).	
Implement evidence-based practice guidelines to address risk factor	
reduction as well as to ensure appropriate management of chronic	
diseases. Develop educational materials consistent with cultural and	
linguistic needs of the population.

Project 2.b.iii – ED care triage for at-risk populations

☑ IPQR Module 2.b.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The major risks to implementing 2.b.iii and corresponding mitigation strategies that will be used are described below:

- 1. Access to Services. Target patients for this project may use the emergency department (ED) for non-emergent care because they do not have an established relationship with a primary care provider (PCP) and/or because they cannot access care in a timely manner when they need it. In addition to primary care practices not operating 24/7, some patients have challenges scheduling timely appointments for more urgent issues. Combined, these barriers to access may increase the likelihood and frequency of ED use. To mitigate these risks, CCB will work with PCPs to achieve PCMH Level 3 designation, a key component of which is offering same-day appointments and open access scheduling. CCB will also work with select primary care practices to extend hours on nights and weekends through a variety of mechanisms including recruitment of new PCPs. CCB has also requested capital to expand capacity via new primary care and urgent care sites.
- 2. Changing Patient Behavior. As discussed above, CCB will work with Participant providers, especially urgent care centers and PCPs, to make health care services more accessible to beneficiaries outside of the ED. CCB will then engage the target population to educate them about new services available and to promote utilization of these alternatives to the ED. To mitigate the risk that patients may continue to use the ED, CCB will consider connecting patients to care managers who are available 24/7, partnering with urgent care centers that meet CCB's standards, and utilizing the web-based care planning tool, the Dashboard, to coordinate care among providers.

Run Date: 09/30/2016

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

IPQR Module 2.b.iii.2 - Patient Engagement Speed

Instructions:

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks							
Actively Engaged Speed	Actively Engaged Scale						
DY3,Q4	12,900						

	Year,Quarter	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4
	Baseline Commitment	2,258	4,515	6,773	9,030
PPS Reported	Quarterly Update	1,529	0	0	0
	Percent(%) of Commitment	67.71%	0.00%	0.00%	0.00%
IA Approved	Quarterly Update	0	0	0	0
IA Approved	Percent(%) of Commitment	0.00%	0.00%	0.00%	0.00%

Warning: PPS Reported - Please note that your patients engaged to date (1,529) does not meet your committed amount (2,258) for 'DY2,Q1'

Narrative Text:

For PPS to provide additional context regarding progress and/or updates to IA.

It has taken longer than anticipated for CCB's Participants to hire and train patient navigators and integrate them into the emergency departments' workflows. While our participants did not achieve their DY2 Q1 targets for patient engagement, CCB expects to make up the difference during DY2 Q2 to meet our semester goals.

Prescribed Milestones Narrative Text

Establish ED care triage program for at-risk populations	
Participating EDs will establish partnerships to community primary care	
providers with an emphasis on those that are PCMHs and have open	
access scheduling.	
a. Achieve NCQA 2014 Level 3 Medical Home standards or NYS	
Advanced Primary Care Model standards by the end of DSRIP Year 3.	
b. Develop process and procedures to establish connectivity between the	
emergency department and community primary care providers.	
c. Ensure real time notification to a Health Home care manager as	
applicable	
For patients presenting with minor illnesses who do not have a primary	
care provider:	
a. Patient navigators will assist the presenting patient to receive an	
immediate appointment with a primary care provider, after required	
medical screening examination, to validate a non-emergency need.	
b. Patient navigator will assist the patient with identifying and accessing	
needed community support resources.	
c. Patient navigator will assist the member in receiving a timely	
appointment with that provider's office (for patients with a primary care	
provider).	
Established protocols allowing ED and first responders - under	
supervision of the ED practitioners - to transport patients with non-acute	
disorders to alternate care sites including the PCMH to receive more	
appropriate level of care. (This requirement is optional.)

Project 2.b.iv – Care transitions intervention model to reduce 30 day readmissions for chronic health conditions

☑ IPQR Module 2.b.iv.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The major risks to implementing 2.b.iv and corresponding mitigation strategies that will be used are described below:

- 1. Effective Linkages to Home-Based and Social Services. There are challenges to effectively linking patients with appropriate home-based and social services post-discharge. This is a risk to this project because success relies on effective linkages to home-based and social services. To mitigate this risk, CCB will develop policies and procedures requiring the use of the LACE or another risk assessment tool and care management follow up for a 30-day period post-discharge, as well as patient education materials that meet the cultural and linguistic needs of our population. CCB is planning to employ Critical Time Intervention aimed at ensuring smooth transitions for individuals with serious mental illness. CCB has developed a close working relationship with many social service CBOs as part of the Brooklyn Health Home program and will build on this base to connect patients with available programs and resources. Lastly, CCB will assess the need for more medically complex units in skilled nursing facilities (SNFs) and SNF staff training to prevent readmissions.
- 2. Provider Communication and Coordination Around Care Transitions. There are barriers to effective communication and coordination between hospitals and community providers that often complicate patients' transitions. Coordination challenges are often the underlying cause of unnecessary readmissions. To mitigate this risk, care team members will use a web-based care planning tool, the Dashboard, to communicate and coordinate care across the providers involved in a patient's transition. Through the Dashboard, providers in the hospital can communicate with a care manager, community-based organizations (CBO), or the patient's PCP, and other members of the care team. CCB will ensure provider input and buy-in as care transition protocols are developed through the Care Delivery and Quality Committee and planning workgroup, both of which include provider representatives from key project Participants. Participants will be charged with ensuring that the project is implemented as specified in the clinical operations plan and in the contractual agreement which will bind each Participants.
- 3. Timely Notifications. CCB hospital Participants have varying policies and procedures for notifying care managers or other providers involved in a patient's care about discharge from the hospital. Often, hospitals do not know that a patient has a care manager, and care managers do not know when their patients are admitted to a hospital. These factors create a risk to effective care planning. Automatic alerts about hospital admissions and discharges from the RHIO, provide key information to care team members, enabling them to participate in discharge planning. CCB will work with Participant hospitals and primary care practices not already connect to the RHIO to establish connections. CCB Participant hospitals will use a risk assessment tool to project patients' length of stay/date of discharge.
- 4. Engaging Medicaid Managed Care Organizations (MCOs). Ensuring the longevity of new care transition protocols will require their financial sustainability; however, under many existing payment arrangements, provider activity to coordinate care transitions would not be recognized and adequately reimbursed by the payer. CCB will mitigate this risk by consulting with MCOs in protocol development and the development of payment models that support the project's care model at the outset of DSRIP implementation. Maimonides will leverage its experiences from the HARP pilot in which it worked with HealthFirst and the Brooklyn Health Home to establish a total cost of care model and shared savings with participating providers.

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

IPQR Module 2.b.iv.2 - Patient Engagement Speed

Instructions:

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks						
Actively Engaged Speed	Actively Engaged Scale

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop standardized protocols for a Care Transitions Intervention Model	
with all participating hospitals, partnering with a home care service or	
other appropriate community agency.	
Engage with the Medicaid Managed Care Organizations and Health	
Homes to develop transition of care protocols that will ensure appropriate	
post-discharge protocols are followed.	
Ensure required social services participate in the project.

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Transition of care protocols will include early notification of planned	
discharges and the ability of the transition care manager to visit the	
patient in the hospital to develop the transition of care services.	
Protocols will include care record transitions with timely updates provided	
to the members' providers, particularly primary care provider.	
Ensure that a 30-day transition of care period is established.	
Use EHRs and other technical platforms to track all patients engaged in	
the project.

Project 3.a.i – Integration of primary care and behavioral health services

IPQR Module 3.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The major risks to implementing 3.a.i and corresponding mitigation strategies that will be used are described below:

- 1. Participant Resources to Effectively Co-locate Services: There are significant barriers to co-location, including: costs; disruption of services at practices if construction is required and the administrative/time demands of reconfiguring workflows and schedules. To mitigate these risks, CCB will pair organizations that have successfully co-located with Participants who are new to co-location. This partnership will facilitate information sharing, technical assistance and coaching to the Participants' staff new to co-location. CCB will leverage lessons learned through the Brooklyn Health Home and promote virtual co-location of primary care and behavioral health services through the use of the GSI Health Coordinator webbased care planning tool, the Dashboard
- 2. Participant Resources to Effectively Implement the IMPACT Model: Time and resource constraints will affect Participants' ability to implement the IMPACT model. To mitigate this risk, CCB will offer participating providers and their staff training on the IMPACT model and screening tools. Training consultants will assist practices in adopting the IMPACT model and work to minimize burdens for providers, such as offering access to care management services and connectivity through the Dashboard.
- 3. Shortage of Psychiatrists. The Brooklyn Community Needs Assessment identified a shortage of psychiatrists in Brooklyn. To mitigate this risk, CCB will promote the use of the IMPACT model. The use of the collaborative care model significantly improves the availability of psychiatrists, as the role of the psychiatrist shifts from providing direct care to consultant for the most prevalent behavioral health disorders in the population. CCB recognizes potential to expand the use of collaborative care beyond the management of mild to moderate depression, and will seek to manage other chronic behavioral health disorders through the collaborative care model after successful implementation of IMPACT. As part of broader workforce efforts, CCB will focus recruitment efforts to attract and retain nurses, licensed social workers, and psychologists who are qualified to perform therapist and depression care manager roles at participating sites. CCB will reach out to other PPSs in the region to collaborate on workforce issues that may impact recruitment strategies. CCB anticipates that the shift to value-based care will mitigate the shortage of psychiatrists, as the current system of care promotes a higher volume of visits than would be needed in a value-based system.
- 4. Stigma Associated with Behavioral Health Conditions. For the target patient population, social stigma related to lack of understanding about the medical model of mental illness may result in poor adherence with behavioral health recommendations. PCPs unfamiliar with managing and working with individuals with behavioral health conditions may have a hard time adopting all three care models. To mitigate this risk, CCB will undertake education and outreach for both patients and providers. Patient education will focus on increasing knowledge about mental illness and the importance of adherence to care. Resources, including peer coaches, will be used to provide education and support to patients. Provider education and training will be specific to the care models providers are adopting (IMPACT or physical co-location). In all models, ongoing case conferencing between PCPs and behavioral health specialists will help reduce stigma and continuously educate and train PCPs about individuals with behavioral health conditions and their needs. The adoption of IMPACT model mitigates the identified risks because it has been shown to effectively reduce the stigma associated with behavioral health conditions.

IPQR Module 3.a.i.2 - Patient Engagement Speed

Instructions:

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.	
Use EHRs or other technical platforms to track all patients engaged in this project.	
Co-locate primary care services at behavioral health sites.	
Develop collaborative evidence-based standards of care including medication management and care engagement process.	
Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.	
Use EHRs or other technical platforms to track all patients engaged in this project.	
Implement IMPACT Model at Primary Care Sites.	
Utilize IMPACT Model collaborative care standards, including developing coordinated evidence-based care standards and policies and procedures for care engagement.	
Employ a trained Depression Care Manager meeting requirements of the IMPACT model.	
Designate a Psychiatrist meeting requirements of the IMPACT Model.	
Measure outcomes as required in the IMPACT Model.	
Provide "stepped care" as required by the IMPACT Model.	
Use EHRs or other technical platforms to track all patients engaged in this project.

Project 3.b.i – Evidence-based strategies for disease management in high risk/affected populations (adult only)

☑ IPQR Module 3.b.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The major risks to implementing 3.b.i and corresponding mitigation strategies that will be used are described below:

- 1. Competing Demands: Providers have limited time to spend on routine screenings and preventive advice. To mitigate this risk, and to help providers work at the top of their licenses, CCB will support a care model that trains medical assistants and care managers to conduct blood pressure monitoring and other screenings. CCB plans to develop centralized registries to track at-risk patients and trigger outreach and follow up; offer new incentives to providers for screening and education; and use home-based tele-monitoring where appropriate.
- 2. EMRs and Documentation: CCB Participant providers and care team members either do not use EMRs or use different EMRs, some of which do not enable documentation of patient self-management goals. This is a risk because documentation of self-management goals in a patient record is a project requirement. To address this risk, CCB plans to make available the Dashboard as a mechanism for documenting patients' self-management goals. CCB will provide Participant providers with training on the Dashboard and develop workflows to ensure the burden associated with documentation is minimized. Members of the care team will also be trained on documentation. To the extent possible, the care team will also work with patients to document their own self-management goals in a personal health record.
- 3. Lack of PCMHs. CCB estimates that over half of CCB's PCPs have not yet achieved any level of NCQA PCMH recognition. There is a risk that some of these barriers (e.g., level of staff support, technology infrastructure, level of investment, etc.) might be difficult to overcome. To mitigate this risk, Central Services Organization staff has been actively engaging community physicians and plans to provide technical support to assist with meeting NCQA requirements. CCB plans to make population health management tools (e.g., registries, patient tracking, patient care plans) available to PCPs and assign care managers to assist their chronically ill patients as needed.
- 4. Managed Care Organization (MCO) Formularies: Some patients in the target population switch Medicaid MCOs frequently, which often requires that they switch medications due to different plan formularies. Current MCO policies do not allow for 90 day refills, which can also pose a challenge to patient compliance. To mitigate these risks, CCB will work with MCOs to institute policy changes that will promote medication adherence. A MCO representative will sit on the Executive Committee.
- 5. Patient Diversity. Brooklyn is home to a diverse population which may affect a patient's attitude toward how they manage their condition. Patients may decline, be unable, or be hesitant to access health care services because they do not understand the long term effects of hypertension. Patients also have competing needs (e.g., food or housing) that may take precedence over their health care, or face cultural and socioeconomic barriers to accessing services. To mitigate this risk, CCB will engage CBOs that are known and trusted in the communities they serve to engage and provide education to the target population. CCB will work with partners to recruit community residents to serve as peer educators to provide patient education through evidence-based models and ensure its workforce undergoes cultural competency training. CCB will monitor data with respect to patient outcomes and seek feedback from patients, CBOs, and peer coaches to determine whether interventions are successful and make adjustments as appropriate.

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

IPQR Module 3.b.i.2 - Patient Engagement Speed

Instructions:

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Implement program to improve management of cardiovascular disease	
using evidence-based strategies in the ambulatory and community care	
setting.	
Ensure that all PPS safety net providers are actively connected to EHR	
systems with local health information exchange/RHIO/SHIN-NY and	
share health information among clinical partners, including direct	
exchange (secure messaging), alerts and patient record look up, by the	
end of DY 3.	
Ensure that EHR systems used by participating safety net providers meet	
Meaningful Use and PCMH Level 3 standards and/or APCM by the end of	
Demonstration Year 3.	
Use EHRs or other technical platforms to track all patients engaged in	
this project.	
Use the EHR to prompt providers to complete the 5 A's of tobacco control	
(Ask, Assess, Advise, Assist, and Arrange).	
Adopt and follow standardized treatment protocols for hypertension and	
elevated cholesterol.	
Develop care coordination teams including use of nursing staff,	
pharmacists, dieticians and community health workers to address lifestyle	
changes, medication adherence, health literacy issues, and patient self-	
efficacy and confidence in self-management.	
Provide opportunities for follow-up blood pressure checks without a	
copayment or advanced appointment.	
Ensure that all staff involved in measuring and recording blood pressure	
are using correct measurement techniques and equipment.	
Identify patients who have repeated elevated blood pressure readings in	
the medical record but do not have a diagnosis of hypertension and	
schedule them for a hypertension visit.	
Prescribe once-daily regimens or fixed-dose combination pills when	
appropriate.	
Document patient driven self-management goals in the medical record	
and review with patients at each visit.	
Follow up with referrals to community based programs to document	
participation and behavioral and health status changes.	
Develop and implement protocols for home blood pressure monitoring	
with follow up support.	
Generate lists of patients with hypertension who have not had a recent	
visit and schedule a follow up visit.	
Facilitate referrals to NYS Smoker's Quitline.

Project 3.d.ii – Expansion of asthma home-based self-management program

IPQR Module 3.d.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The major risks to implementing 3.d.ii and corresponding mitigation strategies that will be used are described below:

- 1. Patient Support of Home Visits. Patients with asthma, or parents of children with asthma, are often reluctant to allow a health care professional into their homes to assess the presence of environmental asthma triggers. According to our partner, a.i.r.nyc, approximately 50% of the patients and families they reach out to refuse an initial home visit, with higher refusal rates among undocumented populations. This refusal rate is a risk to successful project implementation because our approach relies heavily on community health workers conducting home visits to inspect for asthma triggers and to engage and educate patients and their families about the impact of environmental conditions on exacerbations that result in emergency department (ED) and inpatient admissions. To mitigate this risk, CCB must build trust with the target population which requires time, persistence, and deployment of culturally appropriate strategies that address patients' and families' needs. To tackle this challenge, a.i.r.nyc recruits community health workers from the target geographic and ethnic communities that CCB is serving and collaborates with trusted and highly regarded community-based organizations (CBOs) on community outreach and educational materials. One tactic may include co-branding the materials with CBO logos and disseminating materials through CBOs. CCB will monitor patient and process outcomes associated with home visits to ensure its approach is effective and adjust it as needed. CCB and OneCity PPS have already begun meeting to share best practices and address common environmental and social issues impacting patients across the borough.
- 2. New Workforce Integration. Today, in many hospitals, new workforce members, like care managers and community health workers, are not integrated with the ED or discharge planning teams, two critical points of contact between asthma patients and providers. Furthermore, care managers and community health workers may offer valuable services and establish trusted relationships with patients while they are in the hospital or ED which may lead to a home visit shortly after discharge. To mitigate this risk, CCB will undertake a communication and education plan to ensure ED and discharge planning teams are aware of the project's goals, strategies, and proven role and value of care managers and community health workers. The plan will foster acceptance of care managers and community health workers in the ED and hospital environment so they may reach asthma patients most likely to benefit from this project.
- 3. Care Manager and Community Health Worker Communication and Collaboration with Primary Care Providers. Often, primary care providers (PCPs) are notified of their patient's visit to an ED or hospital only after the patient is discharged and presents for a post-ED/hospital follow-up visit. PCPs may also not be aware of referrals made by the ED/inpatient team to specialty or community-based services, leading to poor coordination of services and follow-up. CCB will establish protocols to ensure appropriate communication occurs between care managers, community health workers, and patients' PCPs during a hospital stay or ED visit. Establishing this link will be critical to both creating effective care teams and ensuring patients have the best support possible to guide their recovery and maintenance.

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

IPQR Module 3.d.ii.2 - Patient Engagement Speed

Instructions:

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks						
Actively Engaged Speed	Actively Engaged Scale					
DY4,Q4	10,200					

	Year,Quarter	DY2,Q1	DY2,Q2	DY2,Q3	DY2,Q4
	Baseline Commitment	eline Commitment 638		1,913	2,550
PPS Reported	Quarterly Update	345	0	0	0
	Percent(%) of Commitment	54.08%	0.00%	0.00%	0.00%
IA Approved	Quarterly Update	0	0	0	0
IA Approved	Percent(%) of Commitment	0.00%	0.00%	0.00%	0.00%

Warning: PPS Reported - Please note that your patients engaged to date (345) does not meet your committed amount (638) for 'DY2,Q1'

Narrative Text:

For PPS to provide additional context regarding progress and/or updates to IA.

Due to challenges CCB experienced in implementing a referral system across our network, the initiation of patient outreach was delayed. More importantly, gaining access into patients' homes to conduct the required home-based assessments has been extremely difficult. Some patients are fearful that a home visit that includes documentation of environmental factors (i.e. rodents, mold, etc.) will result in reporting to the Administration for Children's Services (ACS) or other agencies, with potentially dire consequences. Patients may not be accustomed to having strangers in their home for healthcare-related services and decline the visit. CCB is working with our partners to identify strategies for educating and engaging patients around home-based assessments, but it is clear that requiring in-home engagement will make our semester target difficult to achieve.

DSRIP Implementation Plan Project

Maimonides Medical Center (PPS ID:33)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop and implement evidence-based asthma management guidelines.	
Implement training and asthma self-management education services,	
including basic facts about asthma, proper medication use, identification	
and avoidance of environmental exposures that worsen asthma, self-	
monitoring of asthma symptoms and asthma control, and using written	
asthma action plans.	
Ensure coordinated care for asthma patients includes social services and	
support.	
Implement periodic follow-up services, particularly after ED or hospital	
visit occurs, to provide patients with root cause analysis of what	
happened and how to avoid future events.	
Ensure communication, coordination, and continuity of care with Medicaid	
Managed Care plans, Health Home care managers, primary care	
providers, and specialty providers.	
Use EHRs or other technical platforms to track all patients engaged in	
this project.

Project 3.g.i – Integration of palliative care into the PCMH Model

IPQR Module 3.g.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The major risks to implementing 3.g.i and corresponding mitigation strategies that will be used are described below:

- 1. Palliative Care in the Primary Care Setting. Many primary care providers (PCPs) do not recognize when palliative care is appropriate or are not comfortable addressing patients and family members about palliative care services since very few PCPs or their staffs have been adequately and appropriately trained on palliative care. To mitigate these risks, CCB will develop and offer training to PCPs and other care team members with the ultimate goal of integrating palliative into primary care well enough so that palliative care is no longer synonymous with end-of-life care. CCB has partnered with key Participants including palliative care specialists, PCPs and social services organizations and will develop a standard training curriculum for members of the primary care team. This training will prepare care team members (PCPs, care managers, nursing personnel) to discuss palliative care and end of life concerns, prepare a palliative care plan and link caregivers and patients to the medical and social support services they need to relieve pain and remain in the community setting for as long as possible. CCB will also support referrals to participating Health Homes (Brooklyn Health Home and Coordinated Behavioral Care) that have care managers who can further support coordination activities.
- 2. Patient Comprehension of Palliative Care. The second risk to this project is patients' poor understanding of palliative care. Often, patients associate palliative with end-of-life care, which can lead to fear, anxiety, and poor patient engagement. To mitigate this risk, CCB has already initiated discussions with community based organizations (CBOs) on how best to provide emotional support, education, and training to patients and their family caregivers. CCB plans to develop a resource center where providers and staff can direct caregivers for nonmedical services related to palliative care needs. These efforts, along with CCB plans to integrate palliative care into the primary care setting will further normalize activities around palliative care.

Cultural competency training for staff will also play a large role in patient engagement. Receptivity to receiving palliative care services may vary by many factors, including ethnicity, religion and cultural characteristics of the population, which will uniquely impact their interactions with providers. To ensure that the workforce is culturally competent, recruitment will draw from the communities to be served and cultural competency training will be provided. CCB also plans to engage with CBOs working on the social determinants of health and with religious organizations to help understand and appropriately address cultural factors that influence how patients receive this care.

3. Communication Gaps. Patients who require palliative care are vulnerable and often transition from their homes to hospitals and skilled nursing facilities, then back to their homes, sometimes with a repeating pattern. Communication across care teams in these various settings have been known to be challenging. There is no existing protocol on how and when providers engage and communicate with other facilities regarding patients' palliative care needs. CCB recognizes that there is an acute need for clear and comprehensive communication between hospitals, nursing homes, and primary care providers, so that patients receive the best possible care, and the care they desire. CCB will work with these stakeholders to develop standards which will leverage the Dashboard to establish and maintain relationships between providers.

Maimonides Medical Center (PPS ID:33)

IPQR Module 3.g.i.2 - Patient Engagement Speed

Instructions:

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks							
Actively Engaged Speed	Actively Engaged Scale						
DY4,Q4	12,000

Narrative Text:

For PPS to provide additional context regarding progress and/or updates to IA.

Feedback from CCB's Participants indicates they are completing palliative care procedures in line with their individual targets. In some cases, Participants have experienced challenges in extracting patient-level reports from their electronic medical records (EMRs). CCB expects these reporting issues will be resolved, and we will meet our semester goal for patient engagement in DY2 Q2.

Project 4.a.iii – Strengthen Mental Health and Substance Abuse Infrastructure across Systems

IPQR Module 4.a.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

- 1. Silos between Substance Abuse and Mental Health Services. One risk that CCB confronts is that programs may not be able to overcome the existing silos between substance abuse and mental health services, and hence will primarily focus on mental health needs, while overlooking substance use needs. The CNA identified pronounced silos in care, despite the co-morbidities of MHSA conditions. Further, various evidence-based trainings focus exclusively on mental health concerns. To mitigate this risk, CCB and its MHSA Collaborative Workgroup PPS partners Bronx Partners for Healthy Communities, OneCity Health, and Bronx Health Access have agreed to build substance use trainings and materials that address prevention of overdose and unprotected sex and other risky behaviors into core programming. Additionally, the Workgroup includes substance use and mental health experts who will continue to ensure that the project addresses both needs in an integrated manner, and also addresses MHSA needs holistically, together with other health needs.
- 2. Partnership with the Department of Education. Another risk is that PPS partners will not be able to forge a constructive partnership with the Department of Education (DOE) in order to successfully pursue the school-based interventions. The PPSs have identified strong synergies between this project and DOE programming, such as DOE's investments in mental health infrastructure in approximately 100 community/renewal schools City-wide, but they will need to actively engage DOE to succeed in DSRIP-related transformations. The Workgroup has already been addressing this risk by engaging the Director of School Mental Health Services with the City's Office of School Health and individuals with the New York City Department of Health and Mental Hygiene (DOHMH) as advisory members of the Workgroup. The PPS partners will continue to engage both DOE and DOHMH in developing their approach to programming and staffing.
- 3. Measurement and Sustainability. Additional risks are that PPSs will lack the robust data set required to measure progress against goals and serve as an evidence base to demonstrate the cost-effectiveness of the activities and, relatedly, that MHSA activities will not be sustainable beyond the demonstration period. The PPSs will address these risks in several ways. First, the intervention aims to develop long-standing, sustainable school-based infrastructure to address MHSA needs. The project design utilizes cost-effective staffing plans and trainings to prepare non-MD school-based staff to serve as effective coaches. Further, the PPSs have committed to working together to build an evidence base to document results and cost-effectiveness. The PPSs have identified certain performance metrics, such as reductions in schools suspensions and 911 calls that they will track during the intervention. They will engage MCOs, SDOH, and DOE in discussions regarding the program's cost-effectiveness and how to finance DSRIP staff and their related school-based activities like "coaching" and referrals under a value based payment system post-DSRIP.
- 4. Engagement of School Staff. Another possible risk is that school-based staff will be disengaged, based on their own biases or misunderstanding of MHSA-related disease, or fears of being held responsible for individual student outcomes related to MHSA issues. To mitigate this risk, PPSs will build partnerships with teachers and school staff at the ground level. Staff trainings will address issues like bias and stigma and will educate staff about the nature of MHSA conditions. The PPSs will also train school-based staff on when to refer students with potentially more serious problems to available referral channels and help to ensure warm handoffs to appropriate community-based MHSA services.

PPS Defined Milestones Narrative Text

Milestone Name	Narrative Text
Organize and convene citywide MHSA Workgroup meetings	
Establish formalized structure for cross-PPS collaboration on governance and implementation of MHSA project	
Review existing programs and CBOs providing MHSA services, as well as adaptations of CC based model.	
Develop detailed MHSA project operational plan for Collaborative Care Adaptation in schools	The workgroup developed a project concept document incorporating findings from its review of existing resources and programs, including gaps in care. The project concept document was reviewed by the workgroup, with input from representatives of DOHMH, OSH, and DOE. This project concept document was also reviewed by each PPS, including PPS leadership, along with a recommended plan from the workgroup to consider selecting a lead agency to manage the project, and to consider forming a city-wide governance group by the four PPSs involved. These recommendations were agreed to by leadership at each PPS involved. A selection process was then put in place by the PPSs, which included an RFP for lead agency selection. On July 6, 2015, the four PPSs pursuing the MHSA project issued an RFP in order to identify a Lead Agency, and identified two representatives to serve on an eight-person Selection Committee to review and select the Lead Agency. This committee selected a qualified lead agency, Jewish Board for Family and Children's Services (JBFCS). JBFCS's proposal included partnering with the New York Academy of Medicine (NYAM) to manage the project. The JBFCS project proposal was reviewed by the selection committee, and modified based on comments on the proposal. Their proposal was developed from the workgroup's project concept document, and included a detailed operational plan, project staffing and training curriculum, and selection process for schools and community based agencies. The proposal incorporated culturally and linguistically sensitive MEB health promotion and prevention resources. JBFCS finalized the operational plan and budget, and this was approved at the cross-PPS Governance body meeting convening the four PPSs on May 20, 2016.
Implement Collaborative Care (CC) Adaptation in schools	
Design young adult-interfacing MHSA programs (for those ages 21-25 yrs)

Project 4.c.ii – Increase early access to, and retention in, HIV care

IPQR Module 4.c.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions:

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

- 1. The most significant risk is the complexity of HIV and the need to focus simultaneously on both medical and social needs of patients given the history of stigma, discrimination and neglect related to the populations most impacted by the HIV epidemic and complicated by commonly co-occurring risk factors among this population (e.g., poverty, unmet behavioral health needs). To meet DSRIP goals, we will work against negative social determinants to create environments where patients receive the care needed to protect their health.
- 2. Real or perceived stigma may prevent individuals from accepting offers of HIV testing or PrEP, or from disclosing HIV status or remaining in treatment. While our plan to implement universal, rapid HIV testing in hospital emergency departments, urgent care centers and primary care practices may help to normalize this preventive care screening, we will also improve service delivery to support a more welcoming and understanding environment. For example, we intend to emphasize working with community partners such as Housing Works, CAMBA, Village Centers for Care, AmidaCare, GMHC, God's Love We Deliver, Planned Parenthood, and religious organizations that provide HIV care support and outreach related to specific at-risk populations (e.g., transgender women) or related to specific needs (e.g., homelessness). Working with the citywide PPS Collaborative on HIV and the NYC DOHMH, we will undertake a multi-layered cultural competency and educational campaign. We will also integrate peers into our work.

Patients may lack general knowledge about HIV and AIDS, as well, for example, risk factors for HIV, availability of PrEP and PEP, or why testing is important. Even among those living with HIV or AIDS, patients may be unaware of the risks associated with poor HAART adherence. CCB will implement interventions across our PPS partners that focus on consistent messaging around the importance of early identification and referral, and retention in care.

3. Another risk is that HIV providers within the PPS may have disparate models and approaches to care and fail to adequately coordinate with one another or that frontline providers may be unaware of the guidelines for universal HIV screening and PrEP and PEP. To mitigate this risk, CCB has committed to close collaboration with HHC and intends to learn from HHC's strong existing models of providing integrated and coordinated HIV services. CCB will also enhance provider coordination through its Dashboard, an IT infrastructure that permits seamless communication across partners for care planning and coordination. We will also incorporate training on CDC guidelines into our provider education strategy. Another related risk is that PPSs will act in siloes, especially because PPSs must develop processes and metrics to sustain provider engagement and measure progress in lieu of mandated speed and scale commitments. To mitigate this risk, members of the Collaborative have identified areas for collaboration, including patient education, social marketing efforts, peer training and recruitment, and provider cultural competency education. Our collaboration will leverage lessons learned from participation in the NYS Quality of Care Committee, the National Quality Center, HRSA's NYC Ryan White Part A Planning Council, the CDC HIV Prevention Planning Group, and CBO networks. We will use the Collaborative to ensure that we share best practices, make progress toward alignment of common language and approaches whenever possible to promote a consistent standard for HIV providers across the City. By expanding our coordination with community partners, including peers, we will mitigate the challenges posed by the complex network of obstacles that put individuals at high risk for HIV acquisition and preclude efforts to engage them and have them retained in HIV care.

Attestation

The Lead Representative has been designated by the Primary Lead PPS Provider (PPS Lead Entity) as the signing officiate for the DSRIP Quarterly Report. The Lead Representative has the authority to complete this attestation on behalf of the PPS network. The Lead Representative and PPS Lead Entity are responsible for the authenticity and accuracy of the material submitted in this report.

The Lead Representative of the Performing Provider System (PPS) must complete this attestation form in order for the project application to be accepted by the NYS Department of Health. Once the attestation is complete, the Quarterly Report will be locked down from any further editing. Do not complete this section until the entire Quarterly Report is complete.

If the Quarterly Report becomes locked in error and additional changes are necessary, please use the contact information on the Home Page to request that the Quarterly Report be unlocked.

To electronically sign this Quarte	rly Report, please enter the required inform	mation and check the box below:

	Milestone #1 Develop population health management roadmap.	Pass & Ongoing	
	Milestone #2 Finalize PPS-wide bed reduction plan.	Pass & Ongoing	
	Module 9.1 - Prescribed Milestones		
Section 09	Milestone #1 Perform a clinical integration 'needs assessment'.	Pass & Ongoing	
	Milestone #2 Develop a Clinical Integration strategy.	Pass & Ongoing	
	Module 11.1 - Workforce Strategy Spending (Baseline)	Pass & Complete	
	Module 11.2 - Prescribed Milestones		
	Milestone #1 Define target workforce state (in line with DSRIP program's goals).	Pass & Complete	9 B
	Milestone #2 Create a workforce transition roadmap for achieving defined target workforce state.	Pass & Ongoing	
Section 11	Milestone #3 Perform detailed gap analysis between current state assessment of workforce and projected future state.	Pass & Ongoing	
	Milestone #4 Produce a compensation and benefit analysis, covering impacts on both retrained and redeployed staff, as well as new hires, particularly focusing on full and partial placements.	Pass & Complete	6 6
	Milestone #5 Develop training strategy.	Pass & Ongoing	
	Module 11.10 - Staff Impact	Pass & Ongoing	<u>C</u>
	Module 11.11 - Workforce Strategy Spending (Quarterly)	Pass & Ongoing	

Page 277 of 284 Run Date : 09/30/2016

DSRIP Implementation Plan Project

Project ID	Module Name / Milestone #	Review Status
	Module 2.a.i.2 - Prescribed Milestones	
	Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	Pass & Ongoing
	Milestone #2 Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.	Pass & Ongoing
	Milestone #3 Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.	Pass & Ongoing
	Milestone #4 Ensure that all PPS safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including directed exchange (secure messaging), alerts and patient record look up, by the end of Demonstration Year (DY) 3.	Pass & Ongoing
2.a.i	Milestone #5 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.	Pass & Ongoing
	Milestone #6 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.	Pass & Ongoing
	Milestone #7 Achieve 2014 Level 3 PCMH primary care certification and/or meet state-determined criteria for Advanced Primary Care Models for all participating PCPs, expand access to primary care providers, and meet EHR Meaningful Use standards by the end of DY 3.	Pass & Ongoing
	Milestone #8 Contract with Medicaid Managed Care Organizations and other payers, as appropriate, as an integrated system and establish value-based payment arrangements.	Pass & Ongoing
	Milestone #9 Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform.	Pass & Ongoing
	Milestone #10 Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes.	Pass & Ongoing
	Milestone #11 Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate.	Pass & Ongoing
	Module 2.a.iii.2 - Patient Engagement Speed	Pass (with Exception) & Ongoing
	Module 2.a.iii.3 - Prescribed Milestones	
2.a.iii	Milestone #1 Develop a Health Home At-Risk Intervention Program, utilizing participating HHs as well as PCMH/APC PCPs in care coordination within the program.	Pass & Ongoing
	Milestone #2 Ensure all primary care providers participating in the project meet NCQA (2011) accredited Patient Centered Medical Home, Level 3 standards and will achieve NCQA 2014 Level 3 PCMH and Advanced Primary Care accreditation by Demonstration Year (DY) 3.	Pass & Ongoing

Page 278 of 284 Run Date : 09/30/2016

DSRIP Implementation Plan Project

Project ID	Module Name / Milestone #	Review Status
	Milestone #3 Ensure that all participating safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up.	Pass & Ongoing
	Milestone #4 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM.	Pass & Ongoing
	Milestone #5 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.	Pass & Ongoing
	Milestone #6 Develop a comprehensive care management plan for each patient to engage him/her in care and to reduce patient risk factors.	Pass & Ongoing
	Milestone #7 Establish partnerships between primary care providers and the local Health Home for care management services. This plan should clearly delineate roles and responsibilities for both parties.	Pass & Ongoing
	Milestone #8 Establish partnerships between the primary care providers, in concert with the Health Home, with network resources for needed services. Where necessary, the provider will work with local government units (such as SPOAs and public health departments).	Pass & Ongoing
	Milestone #9 Implement evidence-based practice guidelines to address risk factor reduction as well as to ensure appropriate management of chronic diseases. Develop educational materials consistent with cultural and linguistic needs of the population.	Pass & Ongoing
	Module 2.b.iii.2 - Patient Engagement Speed	Pass (with Exception) & Ongoing
	Module 2.b.iii.3 - Prescribed Milestones	
	Milestone #1 Establish ED care triage program for at-risk populations	Pass & Ongoing
b.iii	Milestone #2 Participating EDs will establish partnerships to community primary care providers with an emphasis on those that are PCMHs and have open access scheduling. a. Achieve NCQA 2014 Level 3 Medical Home standards or NYS Advanced Primary Care Model standards by the end of DSRIP Year 3. b. Develop process and procedures to establish connectivity between the emergency department and community primary care providers. c. Ensure real time notification to a Health Home care manager as applicable	Pass & Ongoing
	Milestone #3 For patients presenting with minor illnesses who do not have a primary care provider: a. Patient navigators will assist the presenting patient to receive an immediate appointment with a primary care provider, after required medical screening examination, to validate a non-emergency need. b. Patient navigator will assist the patient with identifying and accessing needed community support resources. c. Patient navigator will assist the member in receiving a timely appointment with that provider's office (for patients with a primary care provider).	Pass & Ongoing
	Milestone #4 Established protocols allowing ED and first responders - under supervision of the ED practitioners - to transport patients with non-acute disorders to alternate care sites including the PCMH to receive more appropriate level of care. (This requirement is optional.)	Pass & Ongoing
	Milestone #5 Use EHRs and other technical platforms to track all patients engaged in the project.	Pass & Ongoing

Page 279 of 284 **Run Date**: 09/30/2016

DSRIP Implementation Plan Project

Project ID	Module Name / Milestone #	Review Status	
	Module 2.b.iv.2 - Patient Engagement Speed	Pass (with Exception) & Ongoing	□ IA
	Module 2.b.iv.3 - Prescribed Milestones		
	Milestone #1 Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.	Pass & Ongoing	
	Milestone #2 Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.	Pass & Ongoing	
2.b.iv	Milestone #3 Ensure required social services participate in the project.	Pass & Ongoing	
	Milestone #4 Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services.	Pass & Ongoing	
	Milestone #5 Protocols will include care record transitions with timely updates provided to the members' providers, particularly primary care provider.	Pass & Ongoing	
	Milestone #6 Ensure that a 30-day transition of care period is established.	Pass & Ongoing	
	Milestone #7 Use EHRs and other technical platforms to track all patients engaged in the project.	Pass & Ongoing	
	Module 3.a.i.2 - Patient Engagement Speed	Pass (with Exception) & Ongoing	□ IA
	Module 3.a.i.3 - Prescribed Milestones		
	Milestone #1 Co-locate behavioral health services at primary care practice sites. All participating primary care practices must meet 2014 NCQA level 3 PCMH or Advance Primary Care Model standards by DY 3.	Pass & Ongoing	
	Milestone #2 Develop collaborative evidence-based standards of care including medication management and care engagement process.	Pass & Ongoing	
	Milestone #3 Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.	Pass & Ongoing	
	Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
3.a.i	Milestone #5 Co-locate primary care services at behavioral health sites.	Pass & Ongoing	
	Milestone #6 Develop collaborative evidence-based standards of care including medication management and care engagement process.	Pass & Ongoing	
	Milestone #7 Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.	Pass & Ongoing	
	Milestone #8 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
	Milestone #9 Implement IMPACT Model at Primary Care Sites.	Pass & Ongoing	
	Milestone #10 Utilize IMPACT Model collaborative care standards, including developing coordinated evidence-based care standards and policies and procedures for care engagement.	Pass & Ongoing	
	Milestone #11 Employ a trained Depression Care Manager meeting requirements of the IMPACT model.	Pass & Ongoing	

Page 280 of 284 **Run Date**: 09/30/2016

DSRIP Implementation Plan Project

Project ID	Module Name / Milestone #	Review S	tatus
	Milestone #12 Designate a Psychiatrist meeting requirements of the IMPACT Model.	Pass & Ongoing	
	Milestone #13 Measure outcomes as required in the IMPACT Model.	Pass & Ongoing	
	Milestone #14 Provide "stepped care" as required by the IMPACT Model.	Pass & Ongoing	
	Milestone #15 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
	Module 3.b.i.2 - Patient Engagement Speed	Pass (with Exception) & Ongoing	□ IA
	Module 3.b.i.3 - Prescribed Milestones		
	Milestone #1 Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.	Pass & Ongoing	
	Milestone #2 Ensure that all PPS safety net providers are actively connected to EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the end of DY 3.	Pass & Ongoing	
	Milestone #3 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.	Pass & Ongoing	
	Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
	Milestone #5 Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).	Pass & Ongoing	
	Milestone #6 Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.	Pass & Ongoing	
3.b.i	Milestone #7 Develop care coordination teams including use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-management.	Pass & Ongoing	
	Milestone #8 Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.	Pass & Ongoing	
	Milestone #9 Ensure that all staff involved in measuring and recording blood pressure are using correct measurement techniques and equipment.	Pass & Ongoing	
	Milestone #10 Identify patients who have repeated elevated blood pressure readings in the medical record but do not have a diagnosis of hypertension and schedule them for a hypertension visit.	Pass & Ongoing	
	Milestone #11 Prescribe once-daily regimens or fixed-dose combination pills when appropriate.	Pass & Ongoing	
	Milestone #12 Document patient driven self-management goals in the medical record and review with patients at each visit.	Pass & Ongoing	
	Milestone #13 Follow up with referrals to community based programs to document participation and behavioral and health status changes.	Pass & Ongoing	
	Milestone #14 Develop and implement protocols for home blood pressure monitoring with follow up support.	Pass & Ongoing	
	Milestone #15 Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.	Pass & Ongoing	
	Milestone #16 Facilitate referrals to NYS Smoker's Quitline.	Pass & Ongoing	

Page 281 of 284 Run Date : 09/30/2016

DSRIP Implementation Plan Project

Project ID	Module Name / Milestone #	Review St	atus
	Milestone #17 Perform additional actions including "hot spotting" strategies in high risk neighborhoods, linkages to Health Homes for the highest risk population, group visits, and implementation of the Stanford Model for chronic diseases.	Pass & Ongoing	
	Milestone #18 Adopt strategies from the Million Hearts Campaign.	Pass & Ongoing	
	Milestone #19 Form agreements with the Medicaid Managed Care organizations serving the affected population to coordinate services under this project.	Pass & Ongoing	
	Milestone #20 Engage a majority (at least 80%) of primary care providers in this project.	Pass & Ongoing	
	Module 3.d.ii.2 - Patient Engagement Speed	Pass (with Exception) & Ongoing	
	Module 3.d.ii.3 - Prescribed Milestones		
	Milestone #1 Expand asthma home-based self-management program to include home environmental trigger reduction, self-monitoring, medication use, and medical follow-up.	Pass & Ongoing	
	Milestone #2 Establish procedures to provide, coordinate, or link the client to resources for evidence-based trigger reduction interventions. Specifically, change the patient's indoor environment to reduce exposure to asthma triggers such as pests, mold, and second hand smoke.	Pass & Ongoing	
	Milestone #3 Develop and implement evidence-based asthma management guidelines.	Pass & Ongoing	
3.d.ii	Milestone #4 Implement training and asthma self-management education services, including basic facts about asthma, proper medication use, identification and avoidance of environmental exposures that worsen asthma, self-monitoring of asthma symptoms and asthma control, and using written asthma action plans.	Pass & Ongoing	
	Milestone #5 Ensure coordinated care for asthma patients includes social services and support.	Pass & Ongoing	
	Milestone #6 Implement periodic follow-up services, particularly after ED or hospital visit occurs, to provide patients with root cause analysis of what happened and how to avoid future events.	Pass & Ongoing	
	Milestone #7 Ensure communication, coordination, and continuity of care with Medicaid Managed Care plans, Health Home care managers, primary care providers, and specialty providers.	Pass & Ongoing	
	Milestone #8 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
	Module 3.g.i.2 - Patient Engagement Speed	Pass (with Exception) & Ongoing	
	Module 3.g.i.3 - Prescribed Milestones		
	Milestone #1 Integrate Palliative Care into appropriate participating PCPs that have, or will have, achieved NCQA PCMH and/or APCM certification.	Pass & Ongoing	
3.g.i	Milestone #2 Develop partnerships with community and provider resources including Hospice to bring the palliative care supports and services into the practice.	Pass & Ongoing	
	Milestone #3 Develop and adopt clinical guidelines agreed to by all partners including services and eligibility.	Pass & Ongoing	
	Milestone #4 Engage staff in trainings to increase role-appropriate competence in palliative care skills and protocols developed by the PPS.	Pass & Ongoing	
	Milestone #5 Engage with Medicaid Managed Care to address coverage of services.	Pass & Ongoing
