Quarterly Report - Implementation Plan for Alliance for Better Health Care

Year and Quarter: DY3, Q4

Quarterly Report Status:  Adjudicated

Status By Section

| Section | Description | Status |
|----------------------------|---------------------------------------|---|
| Section 01 | Budget |  Completed |
| Section 02 | Governance |  Completed |
| Section 03 | Financial Stability |  Completed |
| Section 04 | Cultural Competency & Health Literacy |  Completed |
| Section 05 | IT Systems and Processes |  Completed |
| Section 06 | Performance Reporting |  Completed |
| Section 07 | Practitioner Engagement |  Completed |
| Section 08 | Population Health Management |  Completed |
| Section 09 | Clinical Integration |  Completed |
| Section 10 | General Project Reporting |  Completed |
| Section 11 | Workforce |  Completed |

Status By Project

| Project ID | Project Title | Status |
|--------------------------|---|---|
| 2.a.i | Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management |  Completed |
| 2.b.iii | ED care triage for at-risk populations |  Completed |
| 2.b.iv | Care transitions intervention model to reduce 30 day readmissions for chronic health conditions |  Completed |
| 2.b.viii | Hospital-Home Care Collaboration Solutions |  Completed |
| 2.d.i | Implementation of Patient Activation Activities to Engage, Educate and Integrate the uninsured and low/non-utilizing Medicaid populations into Community Based Care |  Completed |
| 3.a.i | Integration of primary care and behavioral health services |  Completed |
| 3.a.iv | Development of Withdrawal Management (e.g., ambulatory detoxification, ancillary withdrawal services) capabilities and appropriate enhanced abstinence services within community-based addiction treatment programs |  Completed |
| 3.d.ii | Expansion of asthma home-based self-management program |  Completed |
| 3.g.i | Integration of palliative care into the PCMH Model |  Completed |
| 4.a.iii | Strengthen Mental Health and Substance Abuse Infrastructure across Systems |  Completed |
| 4.b.i | Promote tobacco use cessation, especially among low SES populations and those with poor mental health. |  Completed |

| Task 3. Agree on administrative/operating structure including CEO for interim and permanent terms | Completed | "a. Given that the AFBHC and IHANY (Innovative Health Alliance of New York, an ACO created by Ellis and St. Peter's Health Partners that is building a clinically integrated network and operating an MSSP) are now operational, there is concern over duplication of effort. Therefore, an evaluation of the current committee and task force structure will be conducted to develop a recommendation to the respective IHANY and the AFBHC Board of Managers that aligns both entities to the extent permissible under law and DSRIP rules. This evaluation is being done to coordinate patient care standards, to minimize duplication of effort, and to reduce the burden on the practitioner community. b. Present to the AFBHC and IHANY boards the final | 04/01/2015 | 09/30/2015 | 04/01/2015 | 09/30/2015 | 09/30/2015 | DY1 Q2 | |

✔ IPQR Module 2.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing your governance structure and processes and achieving the milestones described above, as well as potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

There has been significant progress in aligning IHANY and the Alliance. Some Committees (including Clinical Integration are fully integrated) to ensure coordination of patient care standards. PwC has been retained to further refine Governance and functional integration.

2) Although there is always the potential for conflict and dissension among partners partners, many of whom have been traditional competitors in the marketplace, Alliance has been operating in a constructive, collaborative, and effective manner. Every effort will be made to keep the partnership strong and moving forward in a cohesive fashion.

3) Effective data sharing. The effective sharing of data among the Seven Key Partners and other practitioners is a risk given the different technology platforms being used. The AFBHC Technology Plan will address an orderly approach to sharing data hopefully mitigating this risk.

4) Practitioner engagement and alignment. Engaging 1,400 practitioners to achieve their portion of each project will be a challenge and a risk. Responsibilities by provider types have been identified for each project. Substantial training sessions and communication through several media (planned through Practitioner Engagement Section) are being prepared to promote practitioner engagement and increase the probabilities of successful engagement and alignment with goals. It is also hoped that the targeted incentive program will promote practitioner engagement.

✔ IPQR Module 2.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Major dependencies with Governance center on approval and decision-making processes that result from workstreams. All major decisions of the AFBHC PPS (except those reserved to Members) will come before the Board of Managers. Committee leadership will update the Board monthly to ensure alignment of workstreams. Care management processes and clinical guidelines will go before the Clinical Integration and Quality Committee and subsequent to presentation to the Board of Managers. The Board will be keenly focused on the accomplishment of goals through the project implementation efforts, support provided by IT Systems and Processes, how practitioners remain engaged throughout the implementation and operational phases of projects, ensuring that key health delivery practitioners remain financially viable to serve members, having appropriate levels of trained and engaged workers, and that members are served in a compassionate culturally-competent manner.

Alliance for Better Health Care (PPS ID:3)

✓ IPQR Module 2.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for the development of your governance structure and processes and describe what their responsibilities involve.

| Role | Name of person / organization (if known at this stage) | Key deliverables / responsibilities |
|--|---|--|
| Members (e.g., owners) | Ellis Medicine, Samaritan Hospital of Troy, New York, St. Mary's Healthcare, Whitney M. Young Jr Health Center, Hometown Health Centers. (See individuals' names in key stakeholders section) | Reserved powers, e.g.: amendment of governing documents, disposition of substantially all company's assets, mergers, dissolution, admission of new Member, the adoption or amendment of any methodology for the allocation of DSRIP funds, removal of a manager, appointment of CEO |
| Board of Managers | Seven Key Partners: (Ellis Medicine, Samaritan Hospital of Troy, New York, St. Mary's Healthcare, Whitney M. Young, Jr. Health Center, Inc., Hometown Health Centers, Capital Care Medical Group, P.C., Community Care Physicians, P.C.), two Independent Practitioners, and PAC representative. (See individuals' names in key stakeholders section) | "Oversight of strategic direction, performance and achievement per Implementation Plan. Oversight of PPS Chief Executive Officer, strategic direction, Implementation Plan execution including milestones and metrics, short and long-term financial performance and health of the PPS and key providers, staffing, workforce development and engagement. Development of policies, provider agreements, fund distributions. " |
| Clinical Integration and Quality Committee (AFBHC and IHANY) | Clinical representatives will serve on a fully integrated IHANY/Alliance Clinical Integration and Quality Committee to promote the development of cohesive clinical protocols. | Clinical Integration in AFBHC and IHANY. Adoption of evidence based practices and protocols consistent across all projects and intended to be used uniformly by specific provider types across the network. |
| Finance Committee | CFOs from Board of Managers entities and other community based organizations will serve on the Finance Committee. | Oversee the financial sustainability and health of the AFBHC and practitioners ensuring the short and long term viability of the organization. |
| Health Homes | St. Mary's Healthcare Amsterdam, Samaritan Health Home, Care Central Health Home | Promotion of care coordination and access to social services. Single point of entry for referral to CBOs. |
| Project Advisory Committee | Over 34 members on PAC | Provide the community and overall stakeholder perspective, provide input and guidance over project development. Patients/beneficiaries can participate in ad hoc committees to enhance strategic direction of PPS. |
| Community Based Organizations | Approximately 50 CBOs | Access to social non-provider services. Deliver social services and coordinate with Health Homes and other providers |
| IT Committee | CIOs from Board of Manager entities, RHIO, and other providers | Technology support, making population health and clinical communication possible. Oversee the development and implementation of technology plan to ensure the support for clinical workflows and timely, safe exchange of patient information. |

✔ Module 2.6 - IPQR Module 2.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS with regard to your governance structure and processes.

| Key stakeholders | Role in relation to this organizational workstream | Key deliverables / responsibilities |
|---|--|--|
| Internal Stakeholders | | |
| Ellis Medicine | Paul Milton, Acting CEO, AFBHC, LLC Member and Board of Managers | Founding member, leadership, Board of Managers participant, committee participation. |
| Samaritan Hospital of Troy New York | Jim Reed, M. D., CEO, AFBHC, LLC Member and Board of Managers | Founding member, leadership, Board of Managers participant, committee participation. |
| St. Mary's Healthcare | Victor Giulianelli, CEO, AFBHC Board Chair, LLC Member and Board of Managers | Founding member, leadership, Board of Managers participant, committee participation. |
| Whitney M. Young, Jr. Health Center | David Shippee, CEO, AFBHC, LLC Member and Board of Managers | Founding member, leadership, Board of Managers participant, committee participation. |
| Capital Care Medical Group, P.C. | Lou Snitkoff, M. D., AFBHC, LLC Member and Board of Manager, and Secretary of the Board | Founding member, leadership, Board of Managers participant, committee participation. |
| Community Care Physicians, P.C. | Richard Scanu, COO/CFO, AFBHC, LLC Board of Managers | Leadership, Board of Managers participant, committee participation. |
| Hometown Health Center | Joe Gambino, CEO, AFBHC, LLC Member and Board of Managers, and Vice Chair of the Board | Leadership, Board of Managers participant, committee participation. |
| Independent Practitioners | AFBHC, LLC Board of Managers | Leadership, Board of Managers participant, committee participation. |
| Project Advisory Committee (PAC) representative | Kathy G. Alonge-Coons, LCSWR, Commissioner, Rensselaer County Mental Health, LLC Board of Managers | Leadership, Board of Managers participant, committee participation. |
| External Stakeholders | | |
| Schenectady, Albany, Rensselaer, Montgomery, Fulton, Saratoga counties Health Departments | Participation and advice in all projects, and in particular 3.d.ii Asthma project and 4.b.i Tobacco cessation. | Project participation, performance, advice |
| Offices for the Aging (Schenectady, Albany, Rensselaer, Montgomery, Fulton, Saratoga) | Participation and advice in all projects, and in particular 3.g.i Palliative Care | Project participation, performance, advice |
| Rensselaer County Department of Mental Health | Kathy G. Alonge-Coons, LCSWR, Commissioner, serves on the PAC and represents the PAC on the AFBHC Board of Managers. In this role, she brings the perspective of mental health, substance use, and community services to the Board of Managers. In addition Ms. Coons and RCMH staff are instrumental in the development of projects: 3.a.i integration of BH and PC; 3.a.iv Development of Withdrawal Mgt. centers, 4.a.iii Strengthen Mental | Governance, project participation, performance, advice |

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✓ IPQR Module 2.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream and your ability to achieve the milestones described above.

IT infrastructure is an essential component of creating the appropriate governance structure within and between the PPs within the Albany region. IT infrastructure will be developed to support the following population health management processes: (1) financial and clinical risk stratification; (2) care delivery and coordination; (3) patient engagement; (4) monitoring outcomes; and (5) assessing impact of intervention(s) on overall cost of care. The primary pre-requisite for enabling these processes is acquisition and aggregation of data from across the AFBHC and for the AFBHC attributed population as they receive services outside of the AFBHC. This task is complicated by the many IT systems that are being used across the PPS. In order to better determine the role of HIXNY and other data aggregation platforms, a comprehensive data assessment will be conducted. In parallel to the data assessment, a functionality needs assessment will be conducted at the DSRIP program level to prioritize the IT capabilities needed to support the individual programs. The needs of these individual projects will vary widely, but each will require several IT components to successfully report and sustain the requirements of the individual projects. The data assessment and the functionality needs assessment will drive decision-making about IT infrastructure and IT planning to support population health management program initiatives. The assessment will begin on the capability of using Hixny, the RHIO, to aggregate data about the attributed patients as they receive services inside and outside of the AFBHC. In support of the potential requirement for tracking patients beyond the AFBHC, the PPS will align required IT platforms with the state RHIO to provide event notifications to AFBHC providers for DSRIP patients as they move in and out of care settings throughout this and other State PPS's.

✓ IPQR Module 2.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The Governance work stream will be successful when all Board and Committee members are fully installed, are well educated about their roles and are able to execute effectively on their oversight responsibility after receiving meaningful written and verbal reports, and the PPS is in control of outcomes. This requires the timely formation of a governance structure with PPS-relevant committees. To be successful in their oversight role, the Board and Committee members must receive timely actionable dashboards and reports so that they can discuss, deliberate and take appropriate action in an effective and efficient manner. To be successful and measure progress, reporting will have to be PPS-wide including the areas of workforce, clinical and projects, finance, administrative, compliance, credentialing, and human resources.

9-24-15 Remediation Response: The PPS will develop a balance score card methodology to track where each project is on a monthly basis. This dashboard will be shared with the Board of Managers (BOM) at their monthly meetings. In addition, each organization will be provided the metrics that they need to achieve for each reporting period and there will be expectations that those metrics are reported to the Alliance on a certain date each month. Key committees such as the Clinical Integration and Quality Committee (CIQC) will review metrics at their meetings and the PAC will

**New York State Department Of Health

✔ IPQR Module 3.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

Organizational strategies required for the financial sustainability work stream could impact AFBHC PPS' efforts to achieve the outcome measure targets. Implementation of the financial reporting systems needed to monitor the financial stability of the network is key among these risks. Meaningful progress has been made in developing a common vision of the overall goals of DSRIP and the financial structure in place. Education and communication will continue to insure continuous improvement. A robust IT system supporting collection and analysis of the finances and flow of funds is critical to the success of this work stream. We are currently working with the IT committee in the development of an integrated IT system to not only support the financial work stream, but the full integration of project data and reporting functions. We submitted a capital request under the CRFP offered by DOH, that will be critical in the mitigation of this risk. One of the largest risks is the move from a fee for service payment system to a value based payment system in collaboration with the providers and the MCOs. This collaboration will be difficult as both the PPS and the MCOs have a financial interest in the outcomes, and prior to DSRIP, much of that process has been competitive and not collaborative. In addition, providers currently negotiate payments with MCOs individually, but under DSRIP, it is anticipated that some if not all of the negotiations for VBPs will be done at the PPS level. There will be major hurdles to overcome for this to change and become effective. This change in philosophy will take time and significant communication and support from DOH.

✔ IPQR Module 3.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The financial success of this PPS and the achievement of the goals set forth, will be very dependent on all the other workstreams involved in the PPS. Communication and collaboration among all these workstreams will depend on timely and open communication along with the development of plans that effectively intertwine all the workstreams. The Board of Managers must provide a fully supportive governance process to establish the roles and responsibilities of the AFBHC committees. Information Technology is integral to the success of the projects selected by the PPS. Finance must insure that funds are available for this workstream. The workforce team is currently reviewing an implementation plan related to the impacts, strategies, and costs related to successful transition of the workforce. This will require open and frequent communication with the finance workstream to be successful. Clinical integration is vital for all of the projects and finance must understand how to best support this clinical integration in the most effective and cost efficient way.

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✅ IPQR Module 3.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

The development of a shared IT infrastructure across the PPS is a major pillar that needs to be built and supported in order for the PPS to be successful. This IT integration will allow real time patient data to be shared by the partners in the PPS, such as a patient portal and population health modules that are involved in the various projects undertaken by the PPS. This integration of IT will also allow for the reporting of needed financial and budget information across the PPS in an efficient and expedient manner thus allowing the financial sustainability to be monitored, as well as the flow of DSRIP funding among categories, projects and providers.

✅ IPQR Module 3.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

We will align our AFBHC PPS financial management and sustainability progress reporting with the reporting and oversight structures in place for the DSRIP projects, through the AFBHC PMO. The staff of the AFBHC will be responsible for monitoring progress against project requirements and process measures at a provider level. This information will be shared with the Finance Committee of the AFBHC for review and input, and reports will be generated and shared on a regular basis with the Governing Board of AFBHC to provide input and guidance as well as corrective action if needed. The success of the financial workstream will be measured by the timeliness of the reporting as set forth in the plan, the development and implementation of proactive steps to determine financial sustainability, the avoidance of financial instability of partners, and the communication of this reporting to the partners and community in a timely fashion.

Section 04 – Cultural Competency & Health Literacy

✅ IPQR Module 4.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement. Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Note some milestones include minimum expected completion dates.

| Milestone/Task Name | Status | Description | Original Start Date | Original End Date | Start Date | End Date | Quarter End Date | DSRIP Reporting Year and Quarter | AV |
|--|-----------|--|---------------------|-------------------|------------|------------|------------------|----------------------------------|-----|
| Milestone #1 Finalize cultural competency / health literacy strategy. | Completed | This milestone must be completed by 12/31/2015. Cultural competency / health literacy strategy signed off by PPS Board. The strategy should: -- Identify priority groups experiencing health disparities (based on your CNA and other analyses); -- Identify key factors to improve access to quality primary, behavioral health, and preventive health care -- Define plans for two-way communication with the population and community groups through specific community forums -- Identify assessments and tools to assist patients with self-management of conditions (considering cultural, linguistic and literacy factors); and -- Identify community-based interventions to reduce health disparities and improve outcomes. | 04/01/2015 | 12/31/2015 | 04/01/2015 | 12/31/2015 | 12/31/2015 | DY1 Q3 | YES |
| Task 1. Establish a Task Force with representation from PPS partners and community based organizations to review and refine AFBHC's Cultural Competence / Health Literacy / Community Engagement strategy. | Completed | 1. ✔ IPQR Module 4.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing your cultural competency / health literacy strategy and addressing the specific health disparities you are targeting (based on your CNA), and achieving the milestones described above - including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

One risk in implementing the Cultural Competency / Health Literacy Strategy and training is that historically, programs for reducing health disparities and improving outcomes for underserved and marginalized populations have depended on time-limited grant and program funding. As a mitigation strategy, the PPS will identify sustainable funding for key programs addressing health disparities. Because cultural competence is tied to one's own individual value system, lack of workforce and provider engagement in behavior change is a risk for successfully implementing the cultural competency/health literacy/engagement strategy. To mitigate this risk, the CCO will partner with the Schenectady Bridges Out of Poverty Program to train frontline workers, community service providers and healthcare providers to understand the barriers experienced by people living in poverty. The CCO will use a training-the-trainer philosophy and approach to promote peer to peer learning and extend the network of expertise throughout the PPS. Patient education materials will be aligned and standardized to ensure that frontline workers and providers have easy access to the tools they need. To embed cultural competency, health literacy and patient engagement into daily patient / client interfaces, guidelines are being developed that will be triggered by an intake / admission assessment, similar to risks for medical conditions like assessing risk for deep vein thrombosis (DVT) on hospital admission.

✔ IPQR Module 4.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Cultural competency must be integrated into the PPS's overall strategic planning. In selecting projects, the PPS considered those marginalized populations identified in the CNA: persons with or at risk for mental, emotional and behavior health disorders; persons with substance abuse disorders; persons living in poverty or low-income; persons without access to primary care; and ethnic minorities. Individuals in one or more of these populations often have multiple chronic illnesses and are high health care utilizers. The Cultural Competency Office (CCO) will continue program development and evaluation of projects to support these subpopulations. Planning and executing the training strategy will be coordinated with the Workforce workstream to leverage existing training resources and infrastructure and to track training participation and completion. The cultural competency strategy is a cross-cutting intervention that applies to all DSRIP projects and will be embedded into each project planning and implementation plan through policies and procedures, workflow design, and workforce selection.

✓ IPQR Module 4.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this workstream and describe what their responsibilities involve.

| Role | Name of person / organization (if known at this stage) | Key deliverables / responsibilities |
|---|---|---|
| PPS cultural competency / health literacy / community engagement lead / Project 11 (2.d.i) lead | Erin Simao | Develop, coordinate, oversee and align PPS cultural competency, health literacy and community engagement strategy and training |
| Cultural Competency and Health Literacy Task force | In Progress | Develop, coordinate, oversee and align PPS cultural competency, health literacy and community engagement strategy and training |
| Project lead for 2.b.iii, 2.b.iv, 3.g.i | Scott Friedlander | Integrate cultural competency and health literacy protocols in the implementation of the projects |
| Project Leads for 2.a.i, 2.b.viii, 3.a.i, 3.a.iv, 3.d.ii, 4.a.iii, 4.b.i | In Progress | Integrate cultural competency and health literacy protocols in the implementation of the projects |
| Community based organizations | Approximately 50 CBOs to be engaged | "Collaborate for CHW recruitment, training and placement Participate in community advisory committees, inform training curriculum and conduct components of the training " |
| Workforce Committee | In Progress | "Collaborate for CHW recruitment, training and placement Collaborate for organizing, delivering and tracking training and participation" |
| IT & Data Committee | CIOs from Board of Manager entities, RHIO, and other providers | Technology support, making population health and clinical communication possible. Oversee the development and implementation of technology plan to ensure the support for clinical workflows and timely and safe exchange of patient information. |
| Participation and advice in all projects, and in particular 3.d.ii Asthma project and 4.b.i Tobacco cessation. | Schenectady, Albany, Rensselaer, Montgomery, Fulton, Saratoga counties Health Departments | Project participation, performance, advice |
| Participation and advice in all projects, and in particular 3.g.i Palliative Care | Offices for the Aging (Schenectady, Albany, Rensselaer, Montgomery, Fulton, Saratoga) | Project participation, performance, advice |
| Ms. Kathy G. Alonge-Coons, LCSWR, Commissioner, serves on the PAC and represents the PAC on the AFBHC Board of Managers. In this role, she brings the perspective of mental health, substance use, and community services to the Board of Managers. In addition Ms. Coons and RCMH staff are instrumental in the development of projects: 3.a.i integration of BH and PC; 3.a.iv Development of Withdrawal Mgt. | Rensselaer County Department of Mental Health | Governance, project participation, performance, advice |

✅ IPQR Module 4.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

| Key stakeholders | Role in relation to this organizational workstream | Key deliverables / responsibilities |
|-------------------------------------|---|---|
| Internal Stakeholders | | |
| Board of Managers | Leadership | "Approve organizational structure with Cultural Competency / Health Literacy / Engagement office and staff Approve Cultural Competency / Health Literacy / Engagement strategy" |
| Ellis Medicine | AFBHC partner | Conduct current state assessment; support staff and providers to attend training; demonstrate cultural competency/health literacy/engagement views in administrative policies, procedures and practices |
| St. Peters Health Partners | Active Parent of AFBHC partner | Conduct current state assessment; support staff and providers to attend training; demonstrate cultural competency/health literacy/engagement views in administrative policies, procedures and practices |
| Whitney M. Young, Jr. Health Center | AFBHC partner | Conduct current state assessment; support staff and providers to attend training; demonstrate cultural competency/health literacy/engagement views in administrative policies, procedures and practices |
| Hometown Health Centers | AFBHC partner | Conduct current state assessment; support staff and providers to attend training; demonstrate cultural competency/health literacy/engagement views in administrative policies, procedures and practices |
| St. Mary's Healthcare | AFBHC partner | Conduct current state assessment; support staff and providers to attend training; demonstrate cultural competency/health literacy/engagement views in administrative policies, procedures and practices |
| Community Care Physicians, P.C. | AFBHC partner | Conduct current state assessment; support staff and providers to attend training; demonstrate cultural competency/health literacy/engagement views in administrative policies, procedures and practices |
| Capital Care Medical Group, P.C. | AFBHC partner | Conduct current state assessment; support staff and providers to attend training; demonstrate cultural competency/health literacy/engagement views in administrative policies, procedures and practices |

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

| Key stakeholders | Role in relation to this organizational workstream | Key deliverables / responsibilities |
|---|---|--|
| Innovative Health Alliance of New York, LLC (IHANY) | Innovative Health Alliance of New York LLC (IHANY) is an Accountable Care Organization (ACO) participating in the Medicare Shared Savings Program (MSSP). IHANY has the same service area and many of the same partners and providers as AFBHC, so the two entities expect to share appropriate functions to maximize efficiency and effectiveness. | Include cultural competency / health literacy / patient engagement perspectives in clinical guidelines (i.e. ethnic groups at risk for certain diseases) |
| PPS members and affiliates | Carry out cultural competency / health literacy / community engagement strategy | "Deliver culturally and language appropriate services to improve health outcomes " |
| External Stakeholders | | |
| PAC | Advisor | Provide input and feedback from community |
| SHIP and PHIPS Programs | Subject matter and training expertise | Collaborate on training development and delivery |
| Bridges Out of Poverty | Subject matter expertise | Collaborate on training development and delivery |
| US Committee for Refugees and Immigrants | Subject matter expertise | English as a Second Language training |
| Healthy Capital District Initiative | Subject matter expertise | Collaborate on training development and delivery |
| "Schenectady Community College SUNY" | Contribute experience from the HPOG demonstration project | Post-secondary program collaboration |

Alliance for Better Health Care (PPS ID:3)

✅ IPQR Module 4.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support the development and implementation of your cultural competency / health literacy strategy and the achievement of the milestones described above.

Information technology expectations include 1) the ability to identify and document additional socio-economic characteristics and health literacy status on intake and admissions fields to flag patient status for staff, care providers, and care givers and activate cultural competency/health literacy guidelines; 2) the ability to sort outcomes according to disparate population characteristics; and 3) use of the educational platform to offer, track and manage educational and training offerings. Additionally, information technology will develop the infrastructure to support a multi-pronged, multi-platform, and multi-lingual approach to improving patient health literacy and adherence to plans of care through patient engagement modalities such as text messaging of appointment reminder.

✅ IPQR Module 4.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

We will measure the success of this workstream by the timely completion of the milestones. We are also refining the demographic, socio-economic, and literacy assessment on the intake / process. These fields will trigger their respective guidelines for frontline workers and providers. Differentiating disparities more clearly will allow the PPS to sort and track clinical data according to disparate groups. Based on the results of baseline cultural competency assessments, we will develop an Organizational Cultural Competence Assessment Profile (prepared for the U.S. Department of Health and Human Services by The Lewin Group, Inc., 2002) to be used by the Seven Key Partners. This profile will outline the structure, process and output required to provide culturally competent care across seven domains (organizational values, governance, planning and monitoring/evaluation, communication, staff development, organizational infrastructure and services/interventions). It will serve as a roadmap for implementation and a tool for measuring progress. As described above, a cultural comp/health lit/engagement dashboard will also be developed. The dashboard will track process measures such as number of staff attending training, compliance with new admission assessment questions, and compliance with guidelines

Section 05 – IT Systems and Processes

✅ IPQR Module 5.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

| Milestone/Task Name | Status | Description | Original Start Date | Original End Date | Start Date | End Date | Quarter End Date | DSRIP Reporting Year and Quarter | AV |
|---|-----------|--|---------------------|-------------------|------------|------------|------------------|----------------------------------|----|
| Milestone #1 Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s). | Completed | Detailed IT current state assessment. Relevant QEs (RHIOs/HIEs) should be involved in performing this assessment. | 04/01/2015 | 09/30/2015 | 04/01/2015 | 09/30/2015 | 09/30/2015 | DY1 Q2 | NO |
| Task 1) Perform IT Assessment and Issue Resolution Planning with PPS Partners related to existing technologies and overlap with DSRIP specific to EHR adoption and Meaningful Use, including current manual processes used; collaborate with PCMH accreditation process | Completed | 1) Perform IT Assessment and Issue Resolution Planning with PPS Partners related to existing technologies and overlap with DSRIP specific to EHR adoption and Meaningful Use, including current manual processes used; collaborate with PCMH accreditation process | 04/01/2015 | 09/30/2015 | 04/01/2015 | 09/30/2015 | 09/30/2015 | DY1 Q2 | |
| Task 2) Review strategies needed for DSRIP specific Patient Engagement set by the DSRIP projects | Completed | 2) Review strategies needed for DSRIP specific Patient Engagement set by the DSRIP projects | 04/01/2015 | 09/30/2015 | 04/01/2015 | 09/30/2015 | 09/30/2015 | DY1 Q2 | |
| Task 3) Perform IT Assessment and Issue Resolution Planning with PPS Partners related to existing technologies and overlap with DSRIP specific to Patient Engagement Tool and Strategies including patient portals, existing state-based tools (e.g., Curam), telehealth, and existing manual processes | Completed | 3) Perform IT Assessment and Issue Resolution Planning with PPS Partners related to existing technologies and overlap with DSRIP specific to Patient Engagement Tool and Strategies including patient portals, existing state-based tools (e.g., Curam), telehealth, and existing manual processes | 04/01/2015 | 09/30/2015 | 04/01/2015 | 09/30/2015 | 09/30/2015 | DY1 Q2 | |
| Task 4) Perform current state assessment with Hixny specific to DSRIP reporting and connectivity | Completed | 4) Perform current state assessment with Hixny specific to DSRIP reporting and connectivity requirements to include: 1. Determine what data is available to support the DSRIP | 04/01/2015 | 09/30/2015 | 04/01/2015 | 09/30/2015 | 09/30/2015 | DY1 Q2 | |

✅ IPQR Module 5.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in creating and implementing your IT governance structure, your plans for data sharing across your network, your approach to data security and confidentiality, and the achievement of the milestones described above, including the potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Timely and appropriate access to the appropriate data (e.g., claims, clinical data) through data latency or Vendors not using interoperability standards, which we will mitigate by working with global standards and the RHIO's existing connections, as well as leveraging existing claims data feeds from the State 2) Difficulty of actionable quality data at Point of Care which we will mitigate by leveraging existing Point of Care workflow tools or using solutions that have proven capabilities to work at the Point of Care 3) Patient churn/lack of visibility into patient's longer-term health, which we will resolve with our own Health Risk Assessment tools to collect detailed patient history 4)Reliance upon HIXNY/RHIO to provide interoperable IT platform which we will mitigate through working with HIXNY/RHIO to develop needed functionality 5) Provider confusion as all providers will be facing significant new initiatives in the community which include the IHANY ACO, Albany Medical Center PPS, and AFBHC PPS which we will mitigate through governance 6)Lack of technology adoption throughout the PPS which we will mitigate by investigating and providing technology solutions as needed to the PPS partners who have a need 7)Reliance upon NY state to provide sufficient patient consent and data compliance laws to enable sufficient combination, viewing, and usage of patient information 8)Reliance upon RHIO to provide interconnectivity and other iT functions in a timely manner which we will mitigate by involving the RHIO in our planning process

✅ IPQR Module 5.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

IT infrastructure is required for Clinical Integration, Practitioner Engagement, Performance Reporting, Population Health Management. IT Systems and Processes is dependent upon effective training, implementation, and PMO. Making sufficient investments in technology to support patient engagement and other program goals is dependent upon the PPS making the appropriate budget provided by meeting the overall DSRIP goals.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✔ IPQR Module 5.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

| Role | Name of person / organization (if known at this stage) | Key deliverables / responsibilities |
|--|---|--|
| Committee co-chair | Joe Gambino | Overall leadership |
| Committee co-chair | Jon Goldberg | Overall leadership |
| Analytics Lead | In Progress | Overall leadership for reporting, data aggregation, and dashboard design |
| Hometown Health representatives | Julie Greco/Eric Burton | Ensure completion of current state analysis and roadmap to clinical data sharing, represent change management processes needed at , and validate ability to receive data securely at PPS member organization |
| St. Mary's Healthcare Amsterdam representatives | Michael Reynolds/Jim Degroff/Tina O'Hanlon | Ensure completion of current state analysis and roadmap to clinical data sharing, represent change management processes needed at , and validate ability to receive data securely at PPS member organization |
| Capital Care representative | Charles Hagstrand | Ensure completion of current state analysis and roadmap to clinical data sharing, represent change management processes needed at , and validate ability to receive data securely at PPS member organization |
| St. Peter's Health Partners representatives | Karen LeBlanc/Will Rauch | Ensure completion of current state analysis and roadmap to clinical data sharing, represent change management processes needed at , and validate ability to receive data securely at PPS member organization |
| Whitney Young representative | Mary Connolly | Ensure completion of current state analysis and roadmap to clinical data sharing, represent change management processes needed at , and validate ability to receive data securely at PPS member organization |
| Ellis representative | Dr. Bachwani | Ensure completion of current state analysis and roadmap to clinical data sharing, represent change management processes needed at , and validate ability to receive data securely at PPS member organization |
| Rensselaer County Department of Mental Health representative | Shephard | Ensure completion of current state analysis and roadmap to clinical data sharing, represent change management processes needed at , and validate ability to receive data securely specific to Rensselaer County mental health institutions |

✔ IPQR Module 5.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

| Key stakeholders | Role in relation to this organizational workstream | Key deliverables / responsibilities |
|--|---|--|
| Internal Stakeholders | | |
| Tom McCarroll | VP of Performance Operations (Interim) | Overall IT decisions |
| Brenda Maynor | VP of Clinical Operations (Interim) | Clinical IT decisions |
| Olga Dazzo | Acting CEO | Ensuring IT decisions are in accordance with overall strategy |
| Dr. Kraev | Physician IT Committee | Provide IT requirements for DSRIP programs from a physician's perspective |
| Dr. Bachwani | Physician IT Committee | Provide IT requirements for DSRIP programs from a physician's perspective |
| PPS members' EMR representatives | Contributor | Roadmap for delivering interoperable IT platform, specific plan for engaging attributed members |
| Board of Managers | Approver | Roadmap for delivering interoperable IT platform, specific plan for engaging attributed members, IT Change Management Strategy |
| External Stakeholders | | |
| HIXNY representative | Contributor | Roadmap for delivering interoperable IT platform, data security and confidentiality plan |
| Population health tool representatives | Contributor | Roadmap for delivering interoperable IT platform, specific plan for engaging attributed members, IT Change Management Strategy |

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✅ IPQR Module 5.7 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The AFBHC PMO will utilize project management, population health, board management, and accounting software to manage the PPS infrastructure and projects. The project management tool will clearly define milestones, steps, and timing expectations, and be reported monthly utilizing a balanced score card approach for all committees. The balance score card approach will identify risks, performance and financial trends, and expectations by function and project to align with accountable PPS stakeholders. The AFBHC PMO will release the balance score card on a regular basis that is dictated by this implementation plan but no later than every quarter. For IT Systems and Processes, the balance score card will track metrics such as meaningful use of EHRs, adoption of certified PCMH standards, and patient engagement. Within the implementation period, the AFBHC PMO will track and report on progress related to tool implementation and configuration, the roadmap to achieving clinical data sharing and interoperable systems across PPS network, and the overall IT change management strategy. To assist the AFBHC, reporting will be done on two levels: the overall PPS and the individual PPS member to promote compliance. The individual PPS members will share information through their own current communication processes. External stakeholders will have appropriate access to the progress reporting as well.

IPQR Module 5.8 - IA Monitoring

Instructions :

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

Section 06 – Performance Reporting

✅ IPQR Module 6.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

| Milestone/Task Name | Status | Description | Original Start Date | Original End Date | Start Date | End Date | Quarter End Date | DSRIP Reporting Year and Quarter | AV |
|---|-----------|---|---------------------|-------------------|------------|------------|------------------|----------------------------------|----|
| Milestone #1 Establish reporting structure for PPS-wide performance reporting and communication. | Completed | Performance reporting and communications strategy, signed off by PPS Board. This should include: -- The identification of individuals responsible for clinical and financial outcomes of specific patient pathways; -- Your plans for the creation and use of clinical quality & performance dashboards -- Your approach to Rapid Cycle Evaluation | 12/31/2016 | 03/31/2017 | 12/31/2016 | 03/31/2017 | 03/31/2017 | DY2 Q4 | NO |
| Task 1. Establish reporting structure for PPS wide-performance reporting and communication. | Completed | 1. Establish reporting structure for PPS wide-performance reporting and communication. | 04/01/2015 | 12/31/2015 | 04/01/2015 | 12/31/2015 | 12/31/2015 | DY1 Q3 | |
| Task 2. Develop Rapid Cycle Evaluation team dedicated to the understanding, data interpretation, and dissemination of all milestones and metrics associated with Domains 2, 3, and 4 and its relationship to performance and revenue. | Completed | 2. Develop Rapid Cycle Evaluation team dedicated to the understanding, data interpretation, and dissemination of all milestones and metrics associated with Domains 2, 3, and 4 and its relationship to performance and revenue. | 04/01/2015 | 12/31/2015 | 04/01/2015 | 12/31/2015 | 12/31/2015 | DY1 Q3 | |
| Task 3. Identify required Domains 2, 3, and 4 metrics defining Measure Steward, Data Sources, and timelines for reporting and performance. | Completed | 3. Identify required Domains 2, 3, and 4 metrics defining Measure Steward, Data Sources, and timelines for reporting and performance. | 04/01/2015 | 12/31/2015 | 04/01/2015 | 12/31/2015 | 12/31/2015 | DY1 Q3 | |
| Task 4. Define clinical and financial performance key performance indicators with PPS-wide executive leadership beyond DSRIP. | Completed | 4. Define clinical and financial performance key performance indicators with PPS-wide executive leadership beyond DSRIP. | 04/01/2015 | 12/31/2015 | 04/01/2015 | 12/31/2015 | 12/31/2015 | DY1 Q3 | |
| Task 5. Determine necessary functions and associated | Completed | 5. Determine necessary functions and associated tools for combining state-supplied data with PPS-collected data. | 12/31/2015 | 09/30/2016 | 12/31/2015 | 09/30/2016 | 09/30/2016 | DY2 Q2 | |

✓ IPQR Module 6.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing performance reporting structures and processes and effective performance management within your network, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

- 1) Practitioner alienation if the performance reporting is not accurate, which we will mitigate through appropriate practitioner involvement and review of metrics and patient attribution.
- 2) IT Risks: Data Interoperability dependent upon working with multiple vendors that may not support existing standards; risk mitigation strategy is to engage vendors early and determine supplemental solutions where available.
- 3) There is risk that information reporting may not be uniform or available at the same time across the network therefore creating a division in the network. This risk will be mitigated by carefully selecting the rollout of reports.
- 4) There is a risk of selecting many more metrics for improvement than the network could possibly address in a given time period which could result in not achieving any of the stated metric goals. This risk will be mitigated by carefully selecting and prioritizing achievable metrics for improvement per given time periods

✓ IPQR Module 6.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

IT Systems and Processes: Completion of the milestones titled "Develop roadmap to achieving clinical data sharing and interoperable systems across PPS network", "Develop a data security and confidentiality plan", and "Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s)";

Practitioner Engagement: Engaging the right set of practitioner leaders across the entire PPS is critical as reliability/believability within the Performance Reports is paramount for success;

Financial Sustainability: The establishment of financial flows and specific contracts to support VBP is a pre-requisite for establishing effective Performance Reporting as Performance Reporting must reflect all of the required metrics of a contract and effectively incentivize performance with practitioners;

Governance: The establishment of proper governance (e.g., physician leadership clusters, hubs) is critical for Performance Reporting as it establishes the categorizations for which performance reporting must adhere.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✓ IPQR Module 6.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

| Role | Name of person / organization (if known at this stage) | Key deliverables / responsibilities |
|--|--|---|
| IT & Data Committee | CIOs from Board of Manager entities, RHIO, and other providers | Oversight of reporting process from an IT perspective. Oversight of the development and implementation of technology plan to ensure the support for clinical workflows and timely and safe exchange of patient information. |
| Clinical Integration and Quality Committee and Project Steering Subcommittees | Clinical representatives from Board of Managers entities plus other community based organizations | Adoption of evidence based practices and protocols consistent across all projects and intended to be used uniformly by specific provider types across the network. |
| Compliance Officer | Colleen Susko | Ensure that reporting is accurate and complies with all laws and regulations |
| Rapid Cycle Evaluation Team | In Progress | Prompt evaluation of results and trend detection; timely communication to stakeholders |
| AFBHC Information Technology leader and technical staff | In Progress | Implementation of AFBHC Technology Plan; ensure operational performance |
| Initial Project Leads from Partner Entities | Joe Twardy, Pamela Rehak, Scott Friedlander, Brenda Maynor, Erin Simao, Dave Shippee, Patrick Carrese, Keith Brown, Kathy Ristau, Kevin Jobin-Davis, Rachel Handler, Millie Ferriter, Kathy Alonge-Coons, Amanda Mulhern | Shepherd projects through early phases of planning, development, and implementation |
| AFBHC Project lead for 2.b.iii, 2.b.iv, 3.g.i | Scott Friedlander (Interim) | Implement AFBHC projects through the central AFBHC Clinical Operations office in close collaboration with partner entities |
| AFBHC Project lead for 2.d.i | Erin Simao (Interim) | Implement AFBHC projects through the central AFBHC Clinical Operations office in close collaboration with partner entities |
| AFBHC Project Leads for 2.a.i, 2.b.viii, 3.a.i, 3.a.iv, 3.d.ii, 4.a.iii, 4.b.i | In Progress | Implement AFBHC projects through the central AFBHC Clinical Operations office in close collaboration with partner entities |
| VP of Performance Operations | Tom McCarroll (Interim)/AFBHC Performance Office | Provide guidance and oversight for the Performance Operations of AFBHC |
| VP of Clinical Operations | Brenda Maynor (Interim)/AFBHC Clinical Office | Provide guidance and oversight for the Clinical Operations of AFBHC |

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✔ IPQR Module 6.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

| Key stakeholders | Role in relation to this organizational workstream | Key deliverables / responsibilities |
|--|--|---|
| Internal Stakeholders | | |
| Board of Managers | Collaborate with organizations for positive outcomes | Spearhead performance reporting metrics reports, dashboards, communication |
| IT Staff within individual provider organizations | Reporting and IT System maintenance | Monitor, tech support, upgrade of IT and reporting systems. |
| Providers | Organizations immediately responsible for delivering on the performance monitoring processes established across the PPS. | "Promote culture of excellence Employ standardized care practices to improve patient care outcomes." |
| Finance Committee | Oversee financial responsibilities | Determine the financial implications of performance reports |
| External Stakeholders | | |

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✅ IPQR Module 6.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support your approach to performance reporting.

A shared IT infrastructure must be in place to provide the data to support accurate performance reporting across the entire PPS. Specific expectations include the need to connect across disparate systems, and capture data from the different modalities of care. Performance reporting will rely upon the IT stems to capture the right data at the right time across all PPS partners to ensure accurate and reliable reporting.

✅ IPQR Module 6.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The AFBHC Project Management Office (PMO) will utilize project management, population health, board management, and accounting software to manage the PPS infrastructure and projects. The project management tool will clearly define milestones, steps, and timing expectations, and be reported monthly utilizing a balanced score card approach for all committees. The balance score card approach will identify risks, performance and financial trends, and expectations by function and project to align with accountable PPS stakeholders. For Performance Reporting, the focus will be on the development and progress on the metrics included in the balance scorecard. To assist the AFBHC, reporting will be done on multiple levels to promote compliance including the project level, across projects, individual provider and group level, and the PPS as a whole.. The individual PPS members will share information through their own current communication processes and the PPS will establish a communication protocol appropriate for keeping all stakeholders and the workforce engaged. External stakeholders will have appropriate access to the progress reporting as well.

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✅ IPQR Module 7.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the current level of engagement of your physician community in the DSRIP program and describe the key challenges or risks that you foresee in implementing your plans for physician engagement and achieving the milestones described above. Describe any potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Due to the fast pace of DSRIP development, practitioners may not be fully aware of the intricacies of the projects and the positive effects they will have in spearheading the transformation of health care. Lack of awareness about DSRIP is a risk that will be mitigated through inclusion and communication with front line primary care physicians and other front-line practitioners. Other initiatives will be considered to mitigate this risk, such as inclusion of provider groups/types in the development of clinical best practices/protocols, development of annual goals, holding annual performance awards, sponsoring quality improvement summits within the PPS and holding collaborative sprints on subjects of professional groups' interest that tie to projects. Another risk to the successful engagement of all practitioners is the lack of integration of medical and behavioral health records throughout the alliance. Since this ties directly with the IT requirements, road maps for IT systems and processes will be followed to ensure interoperability, which will engage practitioners with simplified connectivity.

✅ IPQR Module 7.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Given that this workstream is about communication, it impacts all organizational sections and project plans. Key aspects of each organizational section and project plans will be incorporated into the content of the communication and training programs. Communicating with 1,400 providers across six counties will be a challenge that will be carefully considered during the assessment and communication planning processes. Other workstreams will be leveraged to assist in provider engagement. For example IT benefits that will be offered practitioners, incentive programs, and workforce license innovations will be highlighted and used in the communication and training programs with practitioners.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✔ IPQR Module 7.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

| Role | Name of person / organization (if known at this stage) | Key deliverables / responsibilities |
|--|--|---|
| AFBHC Practitioner Engagement Task Force | "In Progress, will include the CMOs of the key partners of AFBHC: Capital Care (Lou Snitkof, M. D.), Community Care (Barbara Morris, M. D.), St. Mary's (Bill Mayer, M. D.), Ellis (Roger Barrowman, M. D.), St. Peter's (Dr. Cella, Dr. Silverman and Dr. T. Lawrence), Hometown Health (David Skory, M.D.), Whitney Young (Theodore Zeltner, M. D.) " | Be ambassadors for engagement. Guide the assessment, development of communication and engagement plan, training program development, and other practitioner engagement processes. |
| Medical Director | John Collins, MD | Promote practitioner engagement and ensure effective communication across PPS and network. Support the task force and receive guidance, develop the assessment, develop communication and engagement plan, direct development and implementation of training program and other practitioner engagement processes. |
| Leaders/champions/Task Force Co-chairs | Dr. Thomas Lawrence, Dr. Roger Barrowman | Provide leadership and cohesiveness across professional groups and provider types in network |

✓ IPQR Module 7.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

| Key stakeholders | Role in relation to this organizational workstream | Key deliverables / responsibilities |
|---|---|---|
| Internal Stakeholders | | |
| Ellis Medicine | Paul Milton, Acting CEO, AFBHC LLC Manager | Leadership staff, strategic direction support |
| Samaritan Hospital | Jim Reed, M. D., President and CEO, AFBHC LLC Manager | Leadership staff, strategic direction support |
| St. Mary's Healthcare | Vic Giulianelli, CEO, AFBHC LLC Manager | Leadership staff, strategic direction support |
| Hometown Health Centers | Joe Gambino, CEO, AFBHC LLC Manager | Leadership staff, strategic direction support |
| Whitney M. Young, Jr. Health Center | Dave Shippee, CEO, AFBHC LLC Manager | Leadership staff, strategic direction support |
| Capital Care Medical Group, P.C. | Lou Snitkof, M. D., CMO, AFBHC LLC Manager | Leadership staff, strategic direction support |
| Community Care Physicians, P.C. | Richard Scanu, COO/CFO, AFBHC LLC Manager | Leadership staff, strategic direction support |
| External Stakeholders | | |
| All providers in network | Provider | Achieve goals, receive incentives |
| PAC members | Advisory group | Guide the development of projects |
| Medical Society of the State of NY | Advisory and disseminate communication | Guide development of practitioner engagement |
| American Academy of Family Physicians | Advisory and disseminate communication | Guide development of practitioner engagement |
| New York State Psychiatric Association | Advisory and disseminate communication | Guide development of practitioner engagement |
| Mental Health Association in New York State | Advisory and disseminate communication | Guide development of practitioner engagement |
| American College of Physicians | Advisory and disseminate communication | Guide development of practitioner engagement |
| Adirondack Health Institute PPS | Coordination and disseminate communication | Coordination of practitioner engagement |
| Albany Medical Center PPS | Coordination and disseminate communication | Coordination of practitioner engagement |
| Leatherstocking Collaborative Health PPS | Coordination and disseminate communication | Coordination of practitioner engagement |

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✅ IPQR Module 7.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

AFBHC will leverage the following IT tools to engage the healthcare workforce on new and existing processes, coordinate patient care, recruit staff, and provide secure communication methods across the PPS: (1) Learning Management System, (2) Electronic Newsletters, (3) AFBHC website, and (4) HIXNY. A needs assessment will be conducted to determine scope of internet-based centralized delivery system of required and optional training courses across providers within AFBHC. This needs assessment will result in a plan for development of an AFBHC-wide Learning Management System (LMS.) In addition to providing training content and modalities, AFBHC will be able to track and report on workforce training initiatives. AFBHC will utilize IT-based communication tools to engage the workforce. In addition to the LMS, electronic newsletters will be used to communicate with employees within AFBHC. The AFBHC website will also have a workforce section outlining workforce efforts being undertaken, including an employment recruitment section to direct individuals to provider organization's job opportunities within AFBHC. Finally, providers will be connected to HIXNY, the Regional Health Information Exchange (RHIO) that serves as the hub to securely collect and deliver health information in real-time between authorized providers and their authorized employees. Providing real-time data empowers the appropriate health care workforce with meaningful information and secure communication modality across systems.

✅ IPQR Module 7.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The success of the practitioner engagement workstream will be measured by the degree that providers are engaged, metrics and milestones are being achieved, the number of providers participating in the incentive programs, the amount of incentive funds being earned by providers, Medicaid members access and satisfaction are positively reflected in their HEDIS and CAHPS measures as well as outcome measures. In addition practitioners' satisfaction with their degree of engagement is important for the adoption of projects and DSRIP transformation. Therefore, surveys of physicians determining their degree of satisfaction with engagement will be conducted at appropriate intervals.

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✓ IPQR Module 8.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

Population Health IT (PHIT) systems and tools are required to fulfill communication, patient care, patient tracking, and outcomes monitoring needs across the continuum. Because PHIT is foundational to most DSRIP project requirements, delayed PHIT implementation steps delay other project steps and puts the PPS at risk of not meeting project speed and scale requirements. The mitigation strategy includes accelerating implementation of PHIT interoperability and tools and using alternate methods where EHRs and PHIT tool functionality are not yet ready.

Other risks to the successful implementation of the Population Health Strategy is user readiness and lack of knowledge of Population Health IT. Historically, health care has been focused on care of the individual; the DSRIP initiative focuses on the health of populations. This paradigm change can be difficult for some. For those practices that are not yet PCMH recognized, they are likely unfamiliar with population health IT tools. Even if the practice has been using an EMR, population health IT tools add another level of expertise in computer use. For any practices that do not yet have an EMR, they face the dual challenge of converting to EMR and implementing population health tools. To mitigate this risk, this workstream will work closely with Workforce to offer training and change management support.

There is a lag with some providers and organizations, such as behavioral health outpatient settings in regards to EMR development and meeting meaningful use and reporting requirements. A comprehensive approach to EMR use will be part of the mitigation strategy to reduce this risk. Population Health strategies will work with IT implementation strategies to assess current state and assist in moving to future state to meet the needs of the providers

✓ IPQR Module 8.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

This project ties closely with the Cultural Competency Strategy in its aim to improve the health and health care of the target populations, track outcomes according to disparities, and promote community and patient engagement.

To implement the operational components of the Population Health Management implementation requires coordination with all functional workstreams, particularly the 1) IT Systems and Processes workstream; 2) Clinical Integration workstream; 3) Performance Reporting workstream; and 4) funds flow workstream. Population health management is integral to the care management coordination and alignment efforts described in Project 2.a.i. - Integrated Delivery System. All DSRIP projects contain various types of links to Population Health Management tools and PHIT systems.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✔ IPQR Module 8.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational work stream and describe what their responsibilities involve.

| Role | Name of person / organization (if known at this stage) | Key deliverables / responsibilities |
|---|---|--|
| AFBHC Information Technology Lead | In Progress | Implementation and Oversight of population health IT strategy |
| Population Health Management Taskforce | In Progress | Develop, coordinate, oversee and align PPS cultural competency, health literacy and community engagement strategy and training. Monitors the impacts of DSRIP projects in terms of inpatient & community capacity; monitors assessment and needs for capacity change linked to improvements in population health management. |
| AFBHC and IHANY Clinical Integration and Quality Committees | In Progress | Implement and utilize population health tools in their practices |
| AFBHC Vice President of Clinical Operations | Brenda Maynor (Interim) | Oversee, coordinate and align care management across the PPS. |
| AFBHC Vice President of Performance Operations | Tom McCarroll (Interim) | Oversee, coordinate and align PPS operations to achieve measurable improvements in population health. |

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✓ IPQR Module 8.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

| Key stakeholders | Role in relation to this organizational workstream | Key deliverables / responsibilities |
|--|--|---|
| Internal Stakeholders | | |
| AFBHC PPS PMO | Oversight of DSRIP projects | Jointly responsible for Bed Reduction/Utilization Plan |
| Professional Peer Groups | Key role in the adoption of population health management practices amongst their members | Active engagement in the development of training & education materials |
| Practitioners | Use appropriate population tools in their practices | DSRIP metrics |
| Care Coordinators | Care management | For those projects requiring care management, achievement of project outcomes |
| External Stakeholders | | |
| HIXNY 9-24-15 Scott Momrow | Support connectivity | Providers are able to share patient information across the PPS |
| Public Health representatives 9-24-15: We will be organizing the county mental health commissioners & public health officials to meet & collaborate with the Alliance. Names pending. | Population health experience | Coordination of community activities |
| Adirondack Health Institute PPS 9-24-15: Cathy Homkey, CEO | Neighboring DSRIP PPS | Coordination of population health management |
| Albany Medical Center PPS 9-24-15: George Clifford, Evan Brooksby, & Dr. Fredrick Venditti | Neighboring DSRIP PPS | Coordination of population health management |
| Leatherstocking Collaborative Health PPS 9-24-15: Sue van der Sommen, Executive Director | Neighboring DSRIP PPS | Coordination of population health management |
| All New York State PPSs 9-24-15: Currently, the CEO is establishing a network to collaborate with other PPS's in our region. To the extent there is a learning opportunity, cross fertilization efforts will be established to strengthen each others knowledge base. | State wide DOH DSRIP PPS | Coordination of PPS transformation |
| Patients & Families 9-24-15: Individuals who represent patients or | Recipient of improved services | Feedback on outcomes |

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✅ IPQR Module 8.7 - IT Expectations

Instructions :

Please describe the current Population Health Management IT capabilities in place throughout your PPS network and what your plans are at this stage for leveraging these capabilities and/or developing new IT infrastructure.

IT infrastructure is an essential component of population health management. IT infrastructure will be developed to support the following population health management processes: (1) financial and clinical risk stratification; (2) care delivery and coordination; (3) patient engagement; (4) monitoring outcomes; and (5) assessing impact of intervention(s) on overall cost of care. The primary pre-requisite for enabling these processes is acquisition and aggregation of data from across the AFBHC. This task is complicated by the many IT systems that are being used across the PPS. In order to better determine the role of HIXNY and other data aggregation platforms, a comprehensive data assessment will be conducted. In parallel to the data assessment, a functionality needs assessment will be conducted at the DSRIP program level to prioritize the IT capabilities needed to support the individual programs. The data assessment and the functionality needs assessment will drive decision-making about IT infrastructure and IT planning to support population health management program initiatives.

✅ IPQR Module 8.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The AFBHC PMO will utilize project management, population health, board management, and accounting software to manage the PPS infrastructure and projects. The project management tool will clearly define milestones, steps, and timing expectations, and be reported monthly utilizing a balanced score card approach for all committees. The balance score card approach will identify risks, performance and financial trends, and expectations by function and project to align with accountable PPS stakeholders.

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✅ IPQR Module 9.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in improving the level of clinical integration throughout your network and achieving the milestones described above. Describe potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The implementation of the clinical integration work stream takes into account the specific clinical projects and the work streams of practitioner engagement, workforce, cultural competency and all operational components of the DSRIP project. This complexity presents a risk to the successful improvement of clinical integration. To mitigate this risk, the AFBHC PPS will establish a robust Project Management Office (PMO) to oversee the clinical integration, coupled with IT work stream to assess current state, the transition to transformation of care within the provider groups, and the infusion of project requirements based on gaps identified during current state assessment. Practitioner engagement, workforce and governance will need to support the clinical transformation throughout the process change. Leads from the clinical integration work stream will need to develop dashboards, timelines and make decisions based on transformation of care. The workforce may need to be retrained, redeployed and reassigned dependent on community needs and the transition from acute care to health transformation. The Clinical Integration Quality component of this work stream will ensure quarterly metrics are tracked, work with IT and other work streams to report deficiencies, gaps, risks and mitigation strategies as they arise to ensure transition.

Another risk would be the timeline and rapid speed and scale of implementation of projects and plans. The AFBHC PPS has established a Steering Committee for planning and initiating the projects, established a PMO division, and will partner with IHANY and other established organizations to fulfill its obligations to the DSRIP timeline. Quality metrics will be shared with its members, RCA will be addressed to mitigate issues and determine process to improve integration in a timely manner and dashboards and data will be shared and used to demonstrate progress.

IT Risks: Data Interoperability dependent upon working with multiple vendors that may not support existing standards; risk mitigation strategy is to engage vendors early and determine supplemental solutions where available.

✅ IPQR Module 9.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The Clinical Integration work stream is dependent on the workflow and work product of Workforce, Population Health Management, Performance Improvement and Practitioner engagement. Since all projects of the DSRIP program touch on the clinical aspect of transforming health, clinical integration can be considered the "seating chart" for the symphonic integration of the work streams. IT components may connect and drive metrics, dashboards and reports, but the clinical integration has to be placed in such a way that it touches the other work streams, and plays out harmoniously when workforce, engagement, process improvement and population health are transformed.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

IT Systems and Processes: Completion of the milestones titled "Develop roadmap to achieving clinical data sharing and interoperable systems across PPS network", "Develop a data security and confidentiality plan", and "Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s).

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✓ IPQR Module 9.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

| Role | Name of person / organization (if known at this stage) | Key deliverables / responsibilities |
|--|--|---|
| Clinical Integration and Quality Committee | In Progress | Provide guidance and sign off on clinical integration needs assessment and strategy. Adoption of evidence based practices and protocols consistent across all projects and intended to be used uniformly by specific provider types across the network. |
| Project Steering Committees | In Progress | Contribute to overall Clinical Integration Strategy for three project clusters: at-risk populations, behavioral health & primary care integration, and Integrated Delivery System & Project 11 |
| Initial Project Leads from Partner Entities | Joe Twardy, Pamela Rehak, Scott Friedlander, Brenda Maynor, Erin Simao, Dave Shippee, Patrick Carrese, Keith Brown, Kathy Ristau, Kevin Jobin-Davis, Rachel Handler, Millie Ferriter, Kathy Alonge-Coons, Amanda Mulhern | Shepherd projects through early phases of planning, development, and implementation |
| AFBHC Project lead for 2.b.iii, 2.b.iv, 3.g.i | Scott Friedlander (Interim) | Implement AFBHC projects through the central AFBHC Clinical Operations office in close collaboration with partner entities |
| AFBHC Project lead for 2.d.i | Erin Simao (Interim) | Implement AFBHC projects through the central AFBHC Clinical Operations office in close collaboration with partner entities |
| AFBHC Project Leads for 2.a.i, 2.b.viii, 3.a.i, 3.a.iv, 3.d.ii, 4.a.iii, 4.b.i | In Progress | Implement AFBHC projects through the central AFBHC Clinical Operations office in close collaboration with partner entities |
| VP of Performance Operations | Tom McCarroll (Interim)/AFBHC Performance Office | Provide guidance and oversight for the Performance Operations of AFBHC |
| VP of Clinical Operations | Brenda Maynor (Interim)/AFBHC Clinical Office | Provide guidance and oversight for the Clinical Operations of AFBHC |
| Operational IT & Data Committee Leads | In Progress | Provide IT support to the clinical integration process |
| Operational PCP Representative | John Collins, MD | Act as the liaison between primary care and the clinical integration process |
| Physician Representative | Thomas Lawrence, MD | Act as the liaison between physicians and the clinical integration process |
| Social/Community Worker Representative | In Progress | Act as the liaison between the community and the clinical integration process |
| Behavioral Health Representative | In Progress | Act as the liaison between behavioral health and the clinical integration process |
| Nursing Representative (care coordinators) | In Progress | Act as the liaison between care coordinators and the clinical integration process |

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

| Role | Name of person / organization (if known at this stage) | Key deliverables / responsibilities |
|----------------------------------|---|--|
| MCO Liaison | In Progress | Act as the liaison between MCOs and the clinical integration process |
| PCMH project lead | In Progress | Act as liaison for PCMH certification and level of achievement to meet DSRIP needs |
| Financial VBP representatives | Dan Rinaldi and John Gahan | Act as liaison for managed care to align future payments |
| PCP Office Staff representatives | Christine Shwajlyk | Act of liaison for provider office administration |
| Nursing Representative | In Progress | Act as the liaison between nursing and the clinical integration process |

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✅ IPQR Module 9.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

| Key stakeholders | Role in relation to this organizational workstream | Key deliverables / responsibilities |
|------------------------------|--|---|
| Internal Stakeholders | | |
| Board of Managers | Leadership | "Approve Clinical Integration strategy" |
| Practitioners | Support of DSRIP Project Implementation, including new pathways, lines of accountability, responsibility and communication | Engage in the process |
| Clinical staff | Support of DSRIP Project Implementation, including new pathways, lines of accountability, responsibility and communication | Engage in the process |
| External Stakeholders | | |
| Patients | Care improved upon by the clinical integration of the PPS | Response to consultation on clinical integration strategy |
| Families | Communication with practitioners, particularly on behalf of children, the elderly, or those without mental capacity | Response to consultation on clinical integration strategy |
| CBOs | Supporting the development and implementation of the clinical integration strategy | Response to consultation on clinical integration strategy |

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✅ IPQR Module 9.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

IT workstreams will build the foundation for this workstream; the clinical integration will be developed and maintained simultaneously with the IT systems process. Specifically the delivery of a longitudinal patient record that incorporates clinical, claims, and psycho-social information for PPS partners use and systems for PPS partners to use them will be a critical dependency.

✅ IPQR Module 9.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The AFBHC PMO will utilize project management, population health, board management, and accounting software to manage the PPS infrastructure and projects. The project management tool will clearly define milestones, steps, and timing expectations, and be reported monthly utilizing a balanced score card approach for all committees. The balance score card approach will identify risks, performance and financial trends, and expectations by function and project to align with accountable PPS stakeholders. For Clinical Integration, the balance score card will track metrics related to IT Systems and Processes, but also performance of key clinical processes, such as Care Transitions and patient engagement. Within the implementation period, the AFBHC PMO will track and report on progress related to achieving data interoperability and implementing a uniform care transitions program. To assist the AFBHC, reporting will be done on two levels: the overall PPS and the individual PPS member to promote compliance. The individual PPS members will share information through their own current communication processes. External stakeholders will have appropriate access to the progress reporting as well.

IPQR Module 9.9 - IA Monitoring:

Instructions :

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

Section 10 – General Project Reporting

✅ IPQR Module 10.1 - Overall approach to implementation

Instructions :

Please summarize your intended approach to the implementation of your chosen DSRIP projects, including considerations around how this approach will allow for the successful development of concurrently implementing DSRIP projects.

The Alliance for Better Health Care (AFBHC) is committed to a coordinated, synergistic approach to meeting 100% of project requirements to transform the health care delivery system for its population. Its approach to implementation is based on the AFBHC Population Health Management Model that cares for people in a PCMH/behavioral/mental health foundation surrounded by a comprehensive integrated network inclusive of medical specialists, acute, post-acute, community based & social services. The model includes risk-stratification of populations with prevention & wellness interventions & effective transitions & care coordination processes. This is supported by robust technology, analytics, & actuarially-sound payment models.

Implementing the projects follows the accountabilities laid out in the AFBHC governance structure. The AFBHC Clinical Integration & Quality Committee will develop the foundation for the AFBHC Population Health Management Model & will align operating standards, best-practice clinical guidelines, & care pathways. The Steering Committee was instrumental in the development of the project plans & members have become leaders in the development of the plans along with staff, new volunteers, practitioners, & other stakeholders. They will continue to provide operational support through the actual implementation of the projects.

The AFBHC is established with administrative leadership & functions. The administrative functions are to establish the PPS operational structure, manage & oversee the projects implementation. The Project Management Office (PMO) reports to the AFBHC CEO & is responsible for building the processes & structures for coordination & alignment across project teams. The PMO includes clinical operations staffed with project leads for the duration. The PMO will implement & maintain the project management system to ensure milestones & metrics deadlines are met; coordinate projects with each other, other work streams & initiatives; identify & facilitate cross-team, collaborative planning (short term, ad hoc, long term) to promote alignment, provide user input, & eliminate duplication; sequence & stagger implementation according to project requirements, timeline & PPS capacities & capabilities; use feedback systems to monitor effectiveness of new tools & processes for rapid resolution of gaps or barriers; & engage leadership to resolve system barriers.

The PMO is responsible for linking project teams with the Workforce Work streams to: coordinate hiring, redeployment & training needs across projects; prepare workforce for project implementation; & ramp up staff numbers & ensure staff preparation for project implementation. Teams will follow a project process which includes: select & engage PPS project partners; define team roles & responsibilities; follow project requirements, milestones & metrics; assess partner capabilities & identify new partners to fill gaps; identify partners' current strengths; use evidence-based clinical, organizational & population health practices; use a holistic approach to services; & coordinate with other DSRIP project teams & work streams.

The PPS has identified specific roles that each provider type will play in executing project requirements. Each project has identified the role that each of the committed providers & community based organizations will play in accomplishing 100% of the project goals. Not all committed providers will be responsible for 100% of the project requirements, but rather, 100% of the project requirements will be met by the committed providers playing their respective roles in each project. For example, in the withdrawal management project (3aiv) not all PCP's that are committed to the project will seek approval for outpatient medication management, but 100% of those PCPs will be educated & linked to those that will be working in the detox centers.

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✅ IPQR Module 10.2 - Major dependencies between work streams and coordination of projects

Instructions :

Please describe how your approach will handle interdependencies between complementary projects, as well as between projects and cross-cutting PPS initiatives - for example, an IT infrastructure upgrade, or the establishment of data sharing protocols.

The AFBHC has integrated planning for like projects to leverage synergies, incorporate dependencies, minimize unnecessary duplication, promote efficiency and leverage limited time of participants. Planning and implementation for Projects 2.a.i. and 2.d.i are grouped as the Integrated Delivery System projects; 2.b.iii., 2.b.iv., 2.b.viii, 3.d.ii, 3.g.i, and 4.b.i are grouped as the At-Risk Populations projects; 3.a.i., 3.a.iv., and 4.a.iii. are grouped as the Behavioral Health and Primary Care integration projects. The project team chairs lead their respective project teams and work together to coordinate the projects within their group.

Based on project selection, projects and work streams are naturally synergistic. The cultural competency and health literacy work stream provides support for the standard for culturally and linguistically appropriate services for the PPS projects, including PCMH; care management services and patient registries within the population health work stream provide the model, policies and procedures and tools to meet the care management, outreach and transitions of care requirements for the PCMH; behavioral health and primary care integration serve both primary care and the behavioral health projects.

The PMO is also responsible for providing and coordinating technical support for the project teams including: 1) team facilitation support and improvement tools; 2) data and analytic support; and 3) criteria and standards for dashboards and project evaluation. The PMO is responsible for linking project teams with the IT work stream (refer to Part 1 IT Systems and Processes work streams) to provide user input, establish timelines, and to facilitate transitional manual processes until electronic systems are functional.

The Patient Centered Medical Home provides the platform for implementing the role of primary care providers in the projects. The AFBHC will leverage the overlapping requirements of the DSRIP projects and the NCQA PCMH requirements. The integrated role of the PCP is managed through the combined efforts of the AFBHC Clinical Integration and Quality Committee and the IHANY (ACO) Clinical Integration and Quality Committee to ensure alignment and reduce duplication.

Select PPS functions supporting DSRIP project implementation will be housed in the PMO: communication planning; care management alignment, integration, and oversight; staff development and patient/family education; population health analytics, decision-support, reporting and outreach tools; and culturally competence / health literacy / community engagement assessment development, alignment, and oversight. The PPS will coordinate and align with other projects : coordinates DSRIP projects with each other, other work streams and initiatives; facilitates cross-team, collaborative planning and alignment; sequences and staggers implementation according to project requirements, PPS capabilities, and care site capacities; uses feedback systems to monitor effectiveness and activate rapid response process; and engages PPS leaders to resolve barriers.

In addition to their role in the overall operations of the AFBHC, the Cultural Competency / Health Literacy, IT systems, Population Management, and Workforce workstreams (explained in more detail in the workstream sections of the implementation plan) all have linkages to the projects and will work closely with the Project Managers and Project teams to facilitate the respective infrastructures are in place for successful project implementation according to defined timelines.

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✔ IPQR Module 10.3 - Project Roles and Responsibilities

Instructions :

Please outline the key individuals & organizations that play a role in the delivery of your PPS's DSRIP projects, as well as what their responsibilities are regarding governance, implementation, monitoring and reporting on your DSRIP projects.

| Role | Name of person / organization (if known at this stage) | Key deliverables / responsibilities |
|---|--|---|
| Oversight | Board of Managers | Governance |
| Providers | Ellis Medicine | Implement project requirements as indicated |
| Providers | St Peter's Health Partners | Implement project requirements as indicated |
| Providers | St. Mary's Healthcare Amsterdam | Implement project requirements as indicated |
| Providers | Whitney M Young Jr Health Center | Implement project requirements as indicated |
| Providers | Hometown Health | Implement project requirements as indicated |
| Providers | Community Care Physicians | Implement project requirements as indicated |
| Providers | Capital Care Medical Group | Implement project requirements as indicated |
| The Innovative Health Alliance of New York LLC (IHANY) is an Accountable Care Organization (ACO) participating in the Medicare Shared Savings Program (MSSP). IHANY has the same service area and many of the same partners and providers as AFBHC, so the two entities expect to share appropriate functions to maximize efficiency and effectiveness. | IHANY | Collaborators for clinical integration and EBM |
| Initial Project Leads from Partner Entities | Joe Twardy, Pamela Rehak, Scott Friedlander, Brenda Maynor, Erin Simao, Dave Shippee, Patrick Carrese, Keith Brown, Kathy Ristau, Kevin Jobin-Davis, Rachel Handler, Millie Ferriter, Kathy Alonge-Coons, Amanda Mulhern | Sheperd projects through early phases of planning, development, and implementation |
| AFBHC Project lead for 2.b.iii, 2.b.iv, 3.g.i | Scott Friedlander (Interim) | Implement AFBHC projects throught the central AFBHC Clinical Operations office in close collaboration with partner entities |
| AFBHC Project lead for 2.d.i | Erin Simao (Interim) | Implement AFBHC projects throught the central AFBHC Clinical Operations office in close collaboration with partner entities |
| AFBHC Project Leads for 2.a.i, 2.b.viii, 3.a.i, 3.a.iv, 3.d.ii, 4.a.iii, 4.b.i | In Progress | Implement AFBHC projects throught the central AFBHC Clinical Operations office in close collaboration with partner entities |
| VP of Performance Operations | Tom McCarroll (Interim)/AFBHC Performance Office | Provide guidance and oversight for the Performance Operations of AFBHC |
| VP of Clinical Operations | Brenda Maynor (Interim)/AFBHC Clinical Office | Provide guidance and oversight for the Clinical Operations of AFBHC |

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✔ IPQR Module 10.4 - Overview of key stakeholders and how influenced by your DSRIP projects

Instructions :

In the below table, please set out who the key stakeholders are that play a major role across multiple DSRIP projects. Please give an indication of the role they play and how they impact your approach to delivering your DSRIP projects.

| Key stakeholders | Role in relation to this organizational workstream | Key deliverables / responsibilities |
|---|---|--|
| Internal Stakeholders | | |
| Board of Managers | Leadership of AFBHC | "Oversight of strategic direction, performance and achievement per Implementation Plan. Oversight of PPS Chief Executive Officer, strategic direction, Implementation Plan execution including milestones and metrics, short and long-term financial performance and health of the PPS and key providers, staffing, workforce development and engagement. Development of Operating Agreement, policies, provider agreements, fund distributions. " |
| Compliance Officer and Audit and Compliance Committee members | Ensure Compliance | Compliance with federal and state laws and other regulations. Ensuring privacy protection and development and oversight of related policies. |
| Finance Committee | Oversee finances | Oversee the financial sustainability and health of the AFBHC and practitioners ensuring the short and long term viability of the organization. |
| IT & Data Committee | Oversee technology | Technology support, making population health and clinical communication possible. Oversee the development and implementation of technology plan to ensure the support for clinical workflows and timely and safe exchange of patient information. |
| Clinical Integration and Quality Committee | Oversee clinical integration | Adoption of evidence based practices and protocols consistent across all projects and intended to be used uniformly by specific provider types across the network. |
| Workforce Committee | Oversee workforce | Responsible for the AFBHC overall workforce strategy. Oversees the Workforce Implementation Plan and the approval of required Milestones within the plan. Responsible for overseeing the collection of data required for workforce quarterly reporting. Coordinates workforce activities with Project Leads. |
| Practitioner Engagement Taskforce | Spearhead practitioner engagement | Be ambassadors for engagement. Guide the assessment, development of communication and engagement plan, training program development, and other practitioner engagement processes. |
| Cultural Competency Taskforce | Spearhead cultural competency initiatives | Develop, coordinate, oversee and align PPS cultural competency, |

| Key stakeholders | Role in relation to this organizational workstream | Key deliverables / responsibilities |
|--|---|--|
| | | health literacy and community engagement strategy and training |
| Project Steering Committees | Oversee Projects | Provide strategic direction for three project clusters: at-risk populations, behavioral health & primary care integration, and Integrated Delivery System & Project 11 |
| External Stakeholders | | |
| HIXNY | IT Connection | IT system connectivity partner |
| Hope House, Inc. | Recovery program | Residential recovery program |
| Belvedere Health Services | Home Care | Home care services |
| Schenectady County Office of Community Services | Government Office | Ensure comprehensive array of services across disability groups |
| Healthy Capital District Initiative (Contact: Kevin Jobin-Davis) | Care access coordinators | Facilitate health care access |
| Albany County Department of Mental Health (Contact: Stephen Giordano PhD.) | Behavioral Health | Local Government Unit; and provider of outpatient treatment services for persons with Mental Illness and Substance Abuse |
| Community Health Center Homecare | Home Care | in-home healthcare services |
| Rensselaer County Department of Mental Health (Contact: Katherine G. Alonge-Coons LCSWR) | Behavioral Health | Local government unit and safety net provider of mental hygiene services: Medicaid Service Coordination, Outpatient MH services for children, adolescents, adults and Forensic- including satellites in primary care practices; Health Home Care Coordination; community outreach for MICA population. |
| Catholic Charities of Albany (Contact: Keith Brown) | Assist in project 3.a.iv, etc. | expertise in SUD and ambulatory detox |
| Mohawk Opportunities | CBO | NFP helping individuals living with mental illness, HIV/AIDS/homeless achieve stable community living |
| Asthma Coalition of the Capital Region | Assist in project 3.d.ii | Convene stakeholders working to decrease asthma mortality and morbidity in low income areas |
| Community Hospice (Contact: Laurie Mante) | CBO | community hospice services |
| Equinox Inc. | Assist in project 3.a.iv, etc. | SUD treatment services |
| Rensselaer County Department of Health (Contact: Mary Fran Wachunas) | Government Office | Model for population health programming |
| Unity House of Troy (Contact: Christopher Burke) | CBO | Provides a full array of housing for adults with mental illness; provides services to assist those who are living in poverty, adults living with HIV/AIDS, victims of domestic violence, and children with developmental delays |
| NYS Office of Mental Health Hudson River Field Office (Contact: May Lum) | Behavioral Health | Regulatory oversight of MH continuum of care in some counties of the PPS. Standards of care for behavioral health inpatient and outpatient programs, emergency, community support, residential |

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✔ IPQR Module 10.5 - IT Requirements

Instructions :

Information technology will play a crucial role in the development of an effective, integrated performing provider system. It is likely that most projects will require some level of supporting IT infrastructure. Please describe the key elements of IT infrastructure development that will play a role in multiple projects.

The IT committee reporting to the governing body provides oversight for the overall IT vision of providing the right information to the right person at the right time and in the right place. The AFBHC IT committee and its representatives are responsible for implementing the IT operational plan that will establish connectivity, communication, and data sharing throughout the PPS. The IT Workstream team is designing the operational work plan that will: establish priorities, align disparate systems; facilitate information sharing across organizations; meet PCMH meaningful use requirements; and align IT capacity with the needs of population health management tools (refer to the IT Systems and Processes Workstream and the Population Health workstream). IT infrastructure development to support the successful implementation of DSRIP projects includes: 1) establishing processes and structures to implement the DSRIP Data-Sharing and Confidentiality requirements; 2) incorporating developing /acquiring the capabilities and infrastructure into the Population Health IT work plan to meet reporting requirements and support evidence-based practices; 3) prioritizing the steps/actions, hardware, and other resources required to achieve transition medical records and access the HIE; 4) facilitating communication between PPS IT Committee and project teams to align IT and clinical workflows; 5) putting into place population health management analytic capabilities including, but not limited to: outcomes measurement; performance dashboards; quality improvement; patient risk stratification; service utilization; complex care management; patient outreach; and care transitions (refer to Population Health workstream); 6) establishing EHR registries targeted for specific patient populations with capabilities to support reporting to monitor and track adherence with standards of care, and identify care gaps; 7) identifying alternate methods where EHR/RHIO functionality is not ready and transitioning to electronic as it becomes available.

✔ IPQR Module 10.6 - Performance Monitoring

Instructions :

Please explain how your DSRIP projects will fit into your development of a quality performance reporting system and culture.

The DSRIP projects provide the vehicle to establish PPS-wide expectations, metrics and reporting structure to inform provider and partner incentives for clinical and population performance. The AFBHC's PMO will oversee data acquisition and analytics. The PMO provides data analysis and dashboard development support to the DSRIP project teams and for ongoing DSRIP operations after the projects are fully implemented. The PMO will work closely with the partner Information Technology leaders PPS to confirm the metrics required for each project and to align metric requirements with IT capabilities. This PPS function will build upon and coordinate with existing resources in the PPS partner organizations to align tools and methods.

The PMO will work with the Population Health Management team, Performance Reporting workstreams, and the Project Managers to assess the capabilities throughout the PPS for reporting the specific metrics required by the DSRIP project; develop and acquire capabilities and infrastructure to meet project reporting requirements. The Project Managers will work with the PMO and the Project Teams to: establish the reporting plan to gather data, ensure data integrity, create and distribute project dashboards and other reports; establish the process to review, evaluate, prioritize and initiate the rapid improvement process to address gaps, determine data needs to inform project planning and assist teams with aggregating, analyzing and interpreting data. The PPS Workforce workstream will assist in providing education and training to project teams and as needed

about data analysis, management, reporting and interpretation.

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✓ IPQR Module 10.7 - Community Engagement

Instructions :

Please describe your PPS's planned approach for driving community involvement in the DSRIP projects, how you will contract with CBOs for these projects, how community engagement will contribute to the success of the projects, and any risks associated with this.

The AFBHC plan for community engagement recognizes that engagement occurs at multiple levels including policy, PPS, organizational, programmatic, and individual. This plan, as well as the PPS selection of Project 2.d.i., reflects the understanding of these levels and the interactions between them.

Representatives from community based agencies and stakeholders comprise the AFBHC PAC. Town hall meetings, website and email correspondence provide the opportunity for two-way communication between the AFBHC PPS and PAC members to provide input to project direction, invite project team participation, and generate support for project implementation. Patient scenarios are being used to describe how services will change with DSRIP implementation for populations in need. An AFBHC DSRIP newsletter has been distributed and will continue as a means of updating the community on PPS progress. The AFBHC PPS will build upon past successes in community involvement. For example, a community coalition consisting of over 70 organizations was established for the U Matter Schenectady initiative and plans to reunite and repurpose the coalition for the PPS support are underway. Established relationships with Bridges out of Poverty allow the PPS to benefit from their expertise and help teach providers, care givers and other staff to understand the burden of poverty as part of the PPS cultural competency plan. The Healthy Capital District Initiative (HCDI) R5 project brings together a wide range of physicians, community-based service providers, payers, businesses, and hospitals from the Capital District to identify interventions that will reduce use of emergency services for primary care treatable conditions. To achieve this goal, the project will determine the root causes of sub-optimal emergency room utilization, where health system gaps exist, best practice models in the region/country, and develop initiatives to improve utilization.

The PPS will leverage existing groups, such as neighborhood associations where they exist. Plans for community advisor groups that represent geographic communities and population-specific advisory groups for marginalized groups LGBTQ, people with disabilities, Veterans, formerly incarcerated individuals, etc. are underway. Community Health Workers who reflect the characteristics of the community they serve are an important component of the engagement strategy.

Responsibilities for community engagement will be housed in the DSRIP office to leverage planning, alignment, implementation and oversight across the PPS geographic region. The community engagement work stream will: 1) inventory current patient/advisory activities from PPS partners across the system; 2) identify key success factors, best practices, and effective tools; 3) define a structure and process used for community engagement, such as organizational or agency councils; project team advisors; program advisors; office practice advisors; committee advisors; 1:1 advisors, as in the peer to peer programs; 4) using the AHRQ Working with Patients and Families as Advisors: Implementation Handbook adopt and adapt these guidelines as needed to meet the needs of the characteristics of PPS population defined in the Community Needs Assessment; 5) develop expectations and provide training for patient engagement at the front line provider and care giver level; 6) establish processes to promote alignment and coordinate across site; provide flexibility for sites to adapt as needed based on the setting, beneficiary population and purpose; 7) Include engagement metrics on project dashboards (ex. Participating advisors; and, 8) coordinate with the Cultural Competency and Health Literacy Work stream plans.

Community Based Agencies are key to the success of transforming health care in the AFBHC. The PPS governing body will approve contractual guidelines and the AFBHC CEO will be responsible for making contractual arrangements with participating CBOs.

Section 11 – Workforce

✅ IPQR Module 11.1 - Workforce Strategy Spending (Baseline)

Instructions :

Please include details on expected workforce spending on a semi-annual basis. Funds may be shifted from one funding type category to another within the workforce strategy spending table, as long as the PPS adheres to their overall spend commitments. However, the PPS may apply a 25% discount factor to the DY1 Workforce Strategy Spend target. If the PPS applies this discount in DY1, the PPS will be expected to reallocate those funds appropriately in DY2-4 to fully meet their DY1-4 total commitment.

| Funding Type | Year/Quarter | | | | | | | | | | Total Spending (\$) |
|---------------------------|-------------------|-------------------|-------------------|-------------------|-------------------|-------------------|-------------------|-------------------|-------------------|------------------|---------------------|
| | DY1(Q1/Q2)(\$) | DY1(Q3/Q4)(\$) | DY2(Q1/Q2)(\$) | DY2(Q3/Q4)(\$) | DY3(Q1/Q2)(\$) | DY3(Q3/Q4)(\$) | DY4(Q1/Q2)(\$) | DY4(Q3/Q4)(\$) | DY5(Q1/Q2)(\$) | DY5(Q3/Q4)(\$) | |

| Create a workforce transition roadmap for achieving defined target workforce state. | Workforce Transition Roadmap signed off by Board DY3Q4 Remediation response: Please see attached Alliance_Remed_Response_Governance Agenda_Workforce.doc and Alliance_Remed_Response_Governance Mimutes_Vote_Workforce.doc documenting Governance Body approval of Transition Roadmap. |
| Perform detailed gap analysis between current state assessment of workforce and projected future state. | Workforce gap analysis signed off by Board |
| Produce a compensation and benefit analysis, covering impacts on both retrained and redeployed staff, as well as new hires, particularly focusing on full and partial placements. | <p>The Alliance for Better Health PPS (AFBH) completed a DSRIP Year 3 Compensation and Benefits Analysis in March of 2018. Participating providers were asked to report data effective as of November 1, 2017.</p> <p>AFBH utilized Iroquois Healthcare Association (IHA) to conduct a compensation and benefits survey of AFBH provider organizations. 38 organizations participated in the survey representing approximately 25,600 full and part time employees. Organizations reported a 11.07% average vacancy rate for full time positions and a 12.28% average vacancy rate for part time positions. 6 organizations reported having Collective Bargaining Agreements (CBAs) with labor unions, representing just under 1,500 full and part time employees.</p> <p>The survey requested compensation and benefits data on 65 job titles across 10 different organization types. The number of employees, and position vacancies, are displayed for most job titles across the various organization types. Actual cash compensation and benefits summary data is displayed for 47 of the 65 job titles at the all organization level in the AFBH survey. Due to antitrust guidelines, compensation and benefits data may not be displayed in instances where less than 5 organizations reported data for a job title. There are many more instances at the 10 different organization type levels where compensation and benefit data is not displayed due to these antitrust guidelines.</p> <p>In order to obtain additional cash compensation and benefits summary data by job title, and by organization type, IHA will be providing AFBH with an aggregate</p> |

✓ IPQR Module 11.4 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges and risks that you foresee in achieving the milestones set out above, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

- 1) A key challenge for AFBHC will be recruiting for health professionals in shortage occupations to meet the needs and requirements of each project. The AFBHC Workforce Committee will consider establishing a centralized recruitment function that addresses key positions needed.
- 2) Engaging 1,400 providers in a shared workforce training strategy will be a key challenge. Balancing the many training priorities that AFBHC will be required to fulfill with the workforce priorities of individual providers could be problematic to AFBHC reaching its milestones and metrics. As the AFBHC Workforce Committee develops the overall PPS training strategy, it will address how required trainings will be handled across providers. The use of internet-based communication tools will assist with keeping providers engaged and informed in the workforce training strategy of AFBHC.
- 3) As providers begin to work together there is a potential threat of the unlawful sharing of compensation and benefits information in violation of federal and state antitrust laws. The AFBHC Workforce Committee will review these laws, in consultation with legal counsel, and develop a policy (or additions to the antitrust policy) for providers to guard against this threat. Further, antitrust protections are afforded AFBHC and its providers if an independent third party collects and reports compensation and benefits data according to antitrust laws.
- 4) The required reporting of participant-level training data, including outcomes, across all AFBHC providers will be a key challenge. The AFBHC Workforce Committee will consider establishing a Rapid Cycle Team to assist with coordinating workforce reporting functions. Also under consideration will be the use of an internet-based Learning Management System (LMS) to help deliver training content and produce training outcomes reports.
- 5) An outside threat that could impact most providers within AFBHC is the expected implementation of the ICD-10 medical records coding system in October 2015. Provider priorities may temporarily shift to ICD-10 as payments to providers hinge on accurate coding. AFBHC will consider establishing a multi-provider committee to assess and monitor ICD-10 provider readiness and its potential impact to implementation of AFBHC projects. AFBHC will develop contingency plans in the event provider focus shifts to ICD-10 implementation.

✓ IPQR Module 11.5 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The overall PPS Workforce Strategy is clearly dependent on other workstreams in the implementation plan. The Governance section requires a finalized workforce communication and engagement plan. The Cultural Competency/Health Literacy section requires developing a training strategy focused on addressing the drivers of health disparities, requiring training plans for clinicians and other segments of the workforce. The IT Systems and Processes section requires developing an IT change management strategy with an education and training plan. The Performance Reporting section requires developing a training program for organizations and individuals throughout the network, focused on clinical quality and performance reporting. The Practitioner Engagement section requires the development of a training/education plan targeting physicians and other

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

professional groups, designed to educate them about DSRIP and the PPS-specific quality improvement agenda. The Clinical Integration section requires developing a clinical integration strategy, providing training for providers across care settings and training for operations staff. Each project also has project-specific workforce deliverables that will need to be incorporated into the workforce plan. Developing and implementing the PPS workforce plan will be heavily dependent on provider human resource and staff education departments. The quarterly workforce reporting and required documentation will also be dependent on the participation from provider human resource and staff education departments. Workforce reporting and documentation will be enhanced through information technology that can centrally record participant-level data for training, hiring, and redeployments. Given the significant costs associated with the PPS workforce, it is critical that the Workforce Strategy is developed in conjunction with the Financial Sustainability workstream.

✓ IPQR Module 11.6 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

| Role | Name of person / organization (if known at this stage) | Key deliverables / responsibilities |
|------------------------------|---|---|
| Workforce Committee (WC) | Committee Members listed below | Responsible for the AFBHC overall workforce strategy. Oversees the Workforce Implementation Plan and the approval of required Milestones within the plan. Responsible for overseeing the collection of data required for workforce quarterly reporting. Coordinates workforce activities with Project Leads. Oversees activities of the Training Sub-Committee (TSC). |
| Workforce Committee Chair | Dave Shippee, President and CEO, Whitney M. Young, Jr. Health Center | Accountable for overseeing and managing the activities of the Workforce Committee (WC) and Training Sub Committee (TSC) |
| Workforce Committee Member | Andrea Thomas, Director of Human Resources, Capital Care | Responsibilities listed above for the Workforce Committee (WC). |
| Workforce Committee Member | Andrew Rodrigue, Director of Human Resources, Community Care | Responsibilities listed above for the Workforce Committee (WC). |
| Workforce Committee Member | Joe Giansante, Vice President of Human Resources, Ellis Medicine | Responsibilities listed above for the Workforce Committee (WC). |
| Workforce Committee Member | Kathy Messore, Chief Human Resources Officer, Hometown Health | Responsibilities listed above for the Workforce Committee (WC). |
| Workforce Committee Member | Al Turo, Interim Vice President Chief Human Resources Officer, St. Mary's Healthcare Amsterdam | Responsibilities listed above for the Workforce Committee (WC). |
| Workforce Committee Member | Barbara McCandless, Vice President Human Resources, St. Peter's Health Partners | Responsibilities listed above for the Workforce Committee (WC). |
| Workforce Committee Member | Matthew Petrin, Vice President Human Resources, Whitney M. Young, Jr. Health Center | Responsibilities listed above for the Workforce Committee (WC). |
| Workforce Committee Member | BobVanZetta, Executive Director, Family & Child Service Schenectady | Responsibilities listed above for the Workforce Committee (WC). |
| Workforce Committee Member | Susan Cipolla, Director of Human Resources, Catholic Charities of the Diocese of Albany | Responsibilities listed above for the Workforce Committee (WC). |
| Workforce Committee Member | TBD, Regulatory Specialist, New York State Nurses Association (NYSNA) | Responsibilities listed above for the Workforce Committee (WC). |
| Workforce Committee Member | TBD, Education Specialist, Higher Education Representative | Responsibilities listed above for the Workforce Committee (WC). |
| Workforce Committee Member | Maureen Tomlinson, Organizer, SEIU 1199 | Responsibilities listed above for the Workforce Committee (WC). |
| Training Sub-Committee (TSC) | Staff Educator representation from Ellis Medicine, St. Peter's Health Partners, St. Mary's Healthcare (Amsterdam), Whitney M. Young Jr. Health Center, Hometown Health Center, Community Care Physicians, and Capital Care Medical Group, and other provider organizations as determined by the WC. | Working with the WC, responsible for the development and implementation of the AFBHC training plan. Responsible for coordinating employee training to include focus on employees working with specific populations such as developmentally disabled, homeless, and uninsured. |

✓ IPQR Module 11.7 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved in your workforce transformation plans, both within and outside the PPS.

| Key stakeholders | Role in relation to this organizational workstream | Key deliverables / responsibilities |
|--|---|--|
| Internal Stakeholders | | |
| Ellis Hospital School of Nursing | Educator | Nursing certifications and training. |
| Samaritan Hospital School of Nursing | Educator | Nursing certifications and training. |
| Memorial Hospital School of Nursing | Educator | Nursing certifications and training. |
| External Stakeholders | | |
| Iroquois Healthcare Association | Workforce Consultant | Compensation and benefits data collection and reporting, training partnerships, workforce strategy. |
| Hudson Mohawk AHEC | Workforce Consultant | Local administrator of health care training. |
| SEIU 1199 | Labor Union | Input regarding job impacts resulting from DSRIP projects. |
| CSEA | Labor Union | Input regarding job impacts resulting from DSRIP projects. |
| NYSNA | Labor Union | Input regarding job impacts resulting from DSRIP projects. |
| University at Albany | Educator | Public Health Education, Health Disparities Certificate program |
| Albany College of Pharmacy | Educator | Degree programs and continuing education provider |
| Empire State College | Educator | RN to BSN in Nursing, non-degree nursing education, offers online and part-time programs for existing workers |
| Maria College | Educator | Licensed Practical Nurse (LPN) training, BSN degree program, Health and Occupational Science program, Psychology program |
| Schenectady County Community College | Educator | Chemical Dependency Counseling (A.A.S. and Certificate), Health Studies Certificate, Nursing A.S. Program in cooperation with Ellis Medicine. |
| School of Health Sciences at The Sage Colleges | Educator | Nursing degree programs, Continuing Education for Nurses, Psychology advanced degree programs. |
| Hudson Valley Community College | Educator | Dental Hygiene (A.A.S.), Dental Assisting Certificate, Emergency Medical Technician (A.A.S. & Certificate), Sonography Certificate, Nursing (A.A.S.), Health & Wellness Institute |
| HealthStream | Online Education and Workforce Reporting Services | Online training and Learning Management System (LMS) provider. Education areas include, but are not limited to, Cultural Competency, Health Literacy, Team-Based Transitional & Collaborative Care, Behavioral Health, Population Health Management, and Leadership Development. |

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✅ IPQR Module 11.8 - IT Expectations

Instructions :

Please describe how the development of shared IT infrastructure across the PPS will support your plans for workforce transformation.

1. AFBHC is well positioned to use an existing and continuously developing IT infrastructure that the health care workforce will utilize to coordinate patient care. Most AFBHC partner organizations are already connected together within the Health Information Exchange of New York (HIXNY). HIXNY is the Regional Health Information Organization (RHIO) that serves as the hub to securely collect and deliver health information in real-time between authorized providers and their authorized employees. Providing real-time data empowers the appropriate health care workforce with meaningful information that can be used to improve population health and meet individual needs one patient at a time. 2. AFBHC will utilize IT-based communication tools to engage the workforce. It is expected that electronic newsletters will be used to communicate with employees within AFBHC. The AFBHC website will also have a workforce section outlining workforce efforts being undertaken, including an employment recruitment section to direct individuals to provider organization's job opportunities within AFBHC. 3. A shared IT infrastructure will also support an internet-based centralized delivery system of required and optional training courses across providers within AFBHC. Known as a Learning Management System (LMS), the LMS is also an important tool in recording and reporting on workforce related outcomes at the individual employee level.

✅ IPQR Module 11.9 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The success of the AFBHC workforce strategy will predominantly be measured in DY1/DY2 against milestones, actions steps, target dates, and Domain 1 required workforce metrics. In succeeding years, emphasis will increasingly move from pay-for-reporting to pay-for-performance. Ultimately, the success of the workforce strategy will be measured against AFBHC meeting its outcome metrics for each DSRIP project. AFBHC must be able to regularly measure if the investments made in its workforce strategy are having a positive impact on the ability of AFBHC to meet its stated goals and project outcomes. AFBHC will consider establishing a centralized workforce reporting function to assist with reporting new hire activity, workforce impacts, and workforce budget spending. An internet-based Learning Management System (LMS) will be an important tool in being able to centrally collect, record, and report on workforce outcomes. Through an LMS, online training courses can be assigned to employees across multiple providers within the PPS. The LMS automatically records training progress and completions for each employee. Most courses have pass/fail thresholds that must be met in order for a course to be considered complete. Where thresholds are not being met, the LMS can be used to identify employees requiring remediation activities. In addition, the LMS has the capability to enter and record training outcomes that are provided in other settings such as classroom training. The LMS has full reporting capabilities to produce detail and summary reports for selected time periods to assist with preparing quarterly reports. The LMS reports can also be used by the Workforce Committee (WC) and the Training Sub-Committee (TSC) to monitor training progress at provider organizations within the PPS. Many providers within AFBHC have experience using online Learning Management Systems and it is expected that administrative staff from these providers will assist with managing the LMS processes and producing the necessary reporting for the WC use.

✔ IPQR Module 11.11 - Workforce Strategy Spending (Quarterly):

Instructions :

Please include details on workforce spending. The workforce spending actuals should reflect only what was spent during the relevant quarters and is not cumulative across semi-annual periods. The PPS can shift funding across categories; e.g., from Retraining to New Hires. Please note that the "Cumulative Percent of Commitments Expended through Current DSRIP Year" section is calculated based on the total yearly commitments.

| Benchmarks | |
|--|--------------|
| Year | Amount(\$) |
| Total Cumulative Spending Commitment through Current DSRIP Year(DY3) | 1,735,000.00 |

| Funding Type | Workforce Spending Actuals | | Cumulative Spending to Date (DY1-DY5)(\$) | Cumulative Percent of Commitments Expended through Current DSRIP Year (DY3) |
|---------------------------|----------------------------|-------------------|---|---|
| | DY3(Q1/Q2)(\$) | DY3(Q3/Q4)(\$) | | |
| Retraining | 56,349.00 | 82,236.00 | 650,201.09 | 78.17% |
| Redeployment | 0.00 | 0.00 | 0.00 | 0.00% |
| New Hires | 0.00 | 0.00 | 25,000.00 | 4.68% |
| Other | 143,178.00 | 150,183.00 | 1,041,729.82 | 306.62% |
| Total Expenditures | 199,527.00 | 232,419.00 | 1,716,930.91 | 98.96% |

DSRIP Implementation Plan Project**

Alliance for Better Health Care (PPS ID:3)

Project 2.a.i – Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management

✓ IPQR Module 2.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The AFBHC plan has aimed to provide the broad array of services to address the needs identified in the CNA and has not yet addressed the specific demands on the partners and stakeholders for implementing the selected projects and if the current drill down of the PPS can match the demand in services created by the selected DSRIP projects. A major risk to the successful completion of Project 2.a.i. is that the aggressive speed and scale targets for provider and patient engagement may outpace the PPS's capacity to meet those targets within the designated timelines. To mitigate this strategy, the AFBHC will conduct capacity assessments and gap analysis. The risk mitigation strategy is to establish an ongoing method for monitoring capacity with demand for services. A dashboard report documenting current capacity compared, projected capacity based on the patient and provider engagement timelines, identified gaps, the nature of those gaps, and what has been / being done to reduce gaps. This dashboard will be reported to the governing board on a quarterly basis for review, evaluation, and action.

The second risk to the successful completion of Project 2.a.i. is that the time limitations for completing the DSRIP CNA, the DSRIP organizational and project applications and the implementation plan has resulted in the lack of knowledge and widespread participation of physician providers in the DSRIP initiative to date. Physician participation and engagement are the foundations of successful system transition. To mitigate this risk, the AFBHC has taken active steps toward provider participation:

- 1) Dr. Thomas Lawrence, CMO at St. Peter's Health Partners Medical Associates is now an active member of the steering committee.
- 2) Physician leaders will be added to the AFBHC governing board.
- 3) The AFBHC and IHANY (the newly established regional ACO) have initiated collaboration between their respective Clinical Integration and Quality Committees to promote alignment, avoid duplication and streamline provider time requirements for participation in administrative activities associated with both organizations.
- 4) The AFBHC will invite provider participation on the practitioner engagement implementation plan team.
- 5) The AFBHC will map specific provider roles for each project so these expectations may be included in their operating agreements
- 6) The AFBHC will plan a comprehensive educational effort using a variety of methods and leveraging physician champions.
- 7) The AFBHC will establish financial incentives to reward achievement of quality targets.
- 8) The AFBHC will offer change support, tools, and training from the PPS administrative offices to primary care practices. The success of the mitigation efforts will be documented by the signed operating agreements and distribution of incentives.

Another risk to the successful completion of this project is that the PPS does not achieve NCQA recognition for its primary care practices by DY3, Q4. To mitigate this risk, the PPS will dedicate at least one project manager to focus on PCMH certification and keep on target for the timeline. Current state of the practices will be assessed, technical assistance needs identified and technical assistance will be provided from the PPS central project management office.

✅ IPQR Module 2.a.i.2 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

| Project Requirements (Milestone/Task Name) | Prescribed Due Date | Reporting Level | Provider Type | Status | Original Start Date | Original End Date | Start Date | End Date | Quarter End Date | DSRIP Reporting Year and Quarter |
|---|---------------------|-----------------|---------------|-----------|---------------------|-------------------|------------|------------|------------------|----------------------------------|
| Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy. | DY3 Q4 | Project | N/A | Completed | 01/01/2017 | 03/31/2018 | 01/01/2017 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task PPS includes continuum of providers in IDS, including medical, behavioral health, post-acute, long-term care, and community-based providers. | | Project | | Completed | 01/01/2017 | 03/31/2018 | 01/01/2017 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 1. Complete full provider list of all AFBHC participants, including medical, behavioral, post-acute and long term care providers | | Project | | Completed | 04/01/2015 | 12/31/2015 | 04/01/2015 | 12/31/2015 | 12/31/2015 | DY1 Q3 |
| Task 2. Assess and catalogue the PPS partners and stakeholder organizations clinical providers: physicians, physician's assistants, nurse practitioners, behavioral health providers, clinical psychologists, clinical social workers, Community based service providers, social services and other MEB disorders care professionals. Include: provider name, type, NPI, specialty, solo or group practice, practice size, number of open slots for new patients; PCMH status, presence and role of care coordination. | | Project | | Completed | 04/01/2015 | 12/31/2015 | 04/01/2015 | 12/31/2015 | 12/31/2015 | DY1 Q3 |

| Task 6. Include the following issues identified in the projects: Including but not limited to: 2.a.i, 2.b.iv, 2.d.i, 3.a.iv, 3.d.2, 3.g.i, and 4.b.i | | Project | | Completed | 04/01/2015 | 03/31/2017 | 04/01/2015 | 03/31/2017 | 03/31/2017 | DY2 Q4 |
| Milestone #10 Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes. | DY3 Q4 | Project | N/A | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task PPS submitted a growth plan outlining the strategy to evolve provider compensation model to incentive-based compensation | | Project | | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task Providers receive incentive-based compensation consistent with DSRIP goals and objectives. | | Project | | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 1. Build infrastructure for collecting, reporting and ensuring the quality of provider performance data is available for performance tracking and subsequent incentive payments. | | Project | | Completed | 04/01/2015 | 09/30/2017 | 04/01/2015 | 09/30/2017 | 09/30/2017 | DY3 Q2 |
| Task 2. Establish a process to identify and resolve documentation gaps that may affect performance reporting. | | Project | | Completed | 04/01/2015 | 03/31/2017 | 04/01/2015 | 03/31/2017 | 03/31/2017 | DY2 Q4 |

New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

| Project Requirements (Milestone/Task Name) | Prescribed Due Date | Reporting Level | Provider Type | Status | Original Start Date | Original End Date | Start Date | End Date | Quarter End Date | DSRIP Reporting Year and Quarter |
|--|---------------------|-----------------|---------------|-----------|---------------------|-------------------|------------|------------|------------------|----------------------------------|
| Task 3. Establish incentive compensation to patient outcomes consistent with DSRIP goals considering the budget and funds flow framework. | | Project | | Completed | 04/01/2015 | 09/30/2017 | 04/01/2015 | 09/30/2017 | 09/30/2017 | DY3 Q2 |
| Task 4. Develop VBP Educational Program explaining the content and implications of Level 1, 2, and 3 Value Based Payments as it refers to: all care for total population, integrated primary care, acute and chronic bundles, and total care subpopulations: New York State Roadmap for Medicaid Payment Reform (June 2015). | | Project | | Completed | 04/01/2015 | 09/30/2017 | 04/01/2015 | 09/30/2017 | 09/30/2017 | DY3 Q2 |
| Task 5. Establish communication schedule to present the VBP Educational Program | | Project | | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 6. Model agreed-upon value-based payment arrangements that align incentives with outcomes, are actuarially sound, and are acceptable to the network and share findings with appropriate stakeholders, Finance Committee, and the Board | | Project | | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 7. Develop a plan that demonstrates how the incentive based payment model would evolve into value based payment model and obtain Board approval. | | Project | | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Milestone #11 Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate. | DY3 Q4 | Project | N/A | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task Community health workers and community-based organizations utilized in IDS for outreach and navigation activities. | | Project | | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 1. Using input from IHANY, results from the community needs assessment, the AFBHC PPS will establish communication methods for providers, community health workers, clients, peers and community organizations outlining short term and long term goals of DSRIP. | | Project | | Completed | 04/01/2015 | 09/30/2017 | 04/01/2015 | 09/30/2017 | 09/30/2017 | DY3 Q2 |
| Task 2. Based on Community Needs Assessment, identify chronic diseases that will have outreach programs offered (chronic disease in general, diabetes, end stage renal disease, chronic pain, cancer survivors). | | Project | | Completed | 04/01/2015 | 03/31/2016 | 04/01/2015 | 03/31/2016 | 03/31/2016 | DY1 Q4 |

Prescribed Milestones Narrative Text

| Milestone Name | Narrative Text |
|---|--|
| All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy. | DY3Q4 remediation response: Alliance only has 6 Hospitals and so there is no way to meet the provider requirement associated with this milestone since DOH has established our Hospital Commitment at 7. |
| Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS. | |
| Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services. | |
| Ensure that all PPS safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including directed exchange (secure messaging), alerts and patient record look up, by the end of Demonstration Year (DY) 3. | Provider Commitment excel spreadsheets are attached to the file upload tab. |
| Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3. | Provider Commitment excel spreadsheets attached in the file upload tab |
| Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers. | |
| Achieve 2014 Level 3 PCMH primary care certification and/or meet state-determined criteria for Advanced Primary Care Models for all eligible participating PCPs, expand access to primary care providers, and meet EHR Meaningful Use standards by the end of DY 3. | Provider Commitment spreadsheet attached to the file upload tab |
| Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform. | |
| Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes. | |
| Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate. | |

Milestone Review Status

| Milestone # | Review Status | IA Formal Comments |
|--------------|---------------|---|
| Milestone #1 | Fail | The IA does not consider this milestone complete. The PPS failed to demonstrate that all providers in all provider categories are included in its Integrated Delivery System as described in the milestone requirement. |

Alliance for Better Health Care (PPS ID:3)

IPQR Module 2.a.i.4 - IA Monitoring

Instructions :

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

Project 2.b.iii – ED care triage for at-risk populations

✔ IPQR Module 2.b.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

One risk that threatens the success of this project is that the number of new patients referred to Primary Care Physicians (PCP) from the ED exceeds the PPS' primary care capacity to absorb new patients. To mitigate this risk, one of the first steps is to identify PCPs that are accepting new patients and ensure that processes are in place for ED navigators to refer patients to these targeted PCPs. To ensure primary care placement opportunities for patients, the PPS will track supply & demand for primary care throughout the PPS to identify gaps, assess geographic areas of need & recruit & place physicians in PCP shortage areas. Open access scheduling capabilities will also be assessed with current state PCP practices & a recommendation for future state participating practices. Demand for primary care from this project will be coordinated with Project 2. d.i. as industry experience has shown that as the number of insured increase, the need for primary care increases. Due to PCP shortages in the area and nationally, the PPS is also evaluating the need for primary care Nurse Practitioners and exploring with the Workforce Committee the retraining & redeployment of currently employed licensed nurses to pursue advanced practice credentials in primary care.

Another risk is that patients may not want to be redirected to PCPs. To mitigate this risk, the project will develop a patient education campaign, including patient focus groups, Medicaid beneficiaries & community representatives to include preventive health importance and continuity of care benefits.

There are multiple IT Risks, such as data interoperability dependent upon working with multiple vendors that may not support existing standards- the risk mitigation strategy is to engage vendors early & determine supplemental solutions where available. The RHIO, which is expected to be the interoperable clinical platform, has expressed limitations on data sharing per NY state policies, working with EHR vendors to achieve data sharing & balancing the needs of the DSRIP program with their existing commitments. The PPS will work closely with the RHIO. As Population Health IT (PHIT) systems and tools are required, any delay to PHIT implementation delays the projects & risks not meeting speed & scale requirements. As PHIT roll-out depends on sufficient capital funding from NY state, delay in the capital release will delay the rollout. The PPS will accelerate implementation of PHIT interoperability & tools, use alternate methods where EHRs & PHIT tool functionality aren't yet ready & work with NY to ensure capital is provided in sufficient time.

A risk to the PPS is that the successful implementation of this project will have negative impacts on the hospitals' finances. Since ED visits & inpatient admissions via the ED are sources of revenue for the hospitals, as patients become more engaged in appropriate outpatient venues, volume for the EDs & revenues for the hospitals will also decline. The mitigation strategy is to monitor hospital admissions/readmissions, revenues/sources of revenue; document the amount, timing & duration of the impact; & allocate funding in the budget & funds flow to offset revenue losses due to reduced hospital utilization.

Resistance to change is a risk common to DSRIP project interventions. For this project, the PPS has already been piloting navigators in the ED & has a project manager in place. Resistance will be mitigated by integrating requirements of the 2.b.iii. with the current navigator role & to closely oversee the project with a dedicated project director responsible for implementation in the 6 emergency departments. Project 2.b.iii will work closely with the workforce strategy of AFBHC & the PPS, & assess the effectiveness of the navigator role based on patient & provider engagement

✔ IPQR Module 2.b.iii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

| Benchmarks | |
|------------------------|------------------------|
| Actively Engaged Speed | Actively Engaged Scale |
| DY3,Q4 | 15,287 |

| | Year,Quarter | DY3,Q1 | DY3,Q2 | DY3,Q3 | DY3,Q4 |
|--------------|--------------------------|--------|--------|--------|--------|
| PPS Reported | Baseline Commitment | 2,812 | 9,374 | 11,147 | 15,287 |
| | Quarterly Update | 0 | 1,545 | 0 | 3,388 |
| | Percent(%) of Commitment | 0.00% | 16.48% | 0.00% | 22.16% |
| IA Approved | Quarterly Update | 0 | 1,507 | 0 | 3,346 |
| | Percent(%) of Commitment | 0.00% | 16.08% | 0.00% | 21.89% |

⚠ Warning: PPS Reported - Please note that your patients engaged to date (3,388) does not meet your committed amount (15,287) for 'DY3,Q4'

Current File Uploads

✅ IPQR Module 2.b.iii.3 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

| Project Requirements (Milestone/Task Name) | Prescribed Due Date | Reporting Level | Provider Type | Status | Original Start Date | Original End Date | Start Date | End Date | Quarter End Date | DSRIP Reporting Year and Quarter |
|---|---------------------|-----------------|---------------|-----------|---------------------|-------------------|------------|------------|------------------|----------------------------------|
| Milestone #1 Establish ED care triage program for at-risk populations | DY3 Q4 | Project | N/A | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task Stand up program based on project requirements | | Project | | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 1. Identify project lead at PPS level | | Project | | Completed | 04/01/2015 | 12/31/2015 | 04/01/2015 | 12/31/2015 | 12/31/2015 | DY1 Q3 |
| Task 2. The following six Emergency Departments (EDs) will participate in the project: St Mary's Hospital, Amsterdam; Ellis Hospital; St Peter's Hospital ; Samaritan Hospital, St Mary's Hospital, Troy; and Albany Memorial Hospital. Incremental establishment of the ED Navigator roll out plan will be devised with ED leadership. • Hospital – ED and Behavioral Health leadership teams are formulating an urgent care business plan to redirect non-emergent behavioral health & medical (60/40) ED visits to a secondary Ellis site location. This will allow ESI Levels 4 & 5 to be treated and released with follow up and lessen high volumes and throughput congestion of main ED campus. | | Project | | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 3. Identify and invite key stakeholders to project teams, such as EMS, law enforcement, transportation, housing, community services and public organizations and practitioners. | | Project | | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 4. Pilot program at St Mary's Hospital ED for initial roll out of project and stage implementation of other EDs | | Project | | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 5. Form project implementation teams at each site, including ED administrative and front line staff and PPS providers | | Project | | Completed | 08/01/2015 | 03/31/2018 | 08/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 6. Conduct monthly meetings with project lead and teams from sites, define roles and responsibility and track progress toward objectives of program. Include additional stakeholder meetings to address workforce and recruitment efforts to meet associated | | Project | | Completed | 08/01/2015 | 03/31/2018 | 08/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

| Project Requirements (Milestone/Task Name) | Prescribed Due Date | Reporting Level | Provider Type | Status | Original Start Date | Original End Date | Start Date | End Date | Quarter End Date | DSRIP Reporting Year and Quarter |
|--|---------------------|-----------------|---------------|-----------|---------------------|-------------------|------------|------------|------------------|----------------------------------|
| staffing needs of the project. | | | | | | | | | | |
| Task 7. Identify process metrics, institute tracking mechanism to collect data, manually then progression to IT platform | | Project | | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 8. Define future state for ED patient navigator model to include a social triage of At-Risk define populations to assess for: PCP needs or connectivity, transportation barriers/needs, medication attainment, health home care management services, home care services, community meals, DME equipment needs, etc. Assessment and attainment of services will assist member to follow up in the most cost effective setting and be provided with the help they need to maintain their health and wellbeing. | | Project | | Completed | 08/01/2015 | 03/31/2018 | 08/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 9. Define target, at-risk patient population. PPS will consider ED visits with an ESI triage level of 4 or 5, as well as, At-Risk populations identified in our Community Needs Assessment. | | Project | | Completed | 08/01/2015 | 03/31/2018 | 08/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 10. Identify and communicate with project teams baseline metrics and potentially preventable ED visit salient data results | | Project | | Completed | 08/01/2015 | 03/31/2018 | 08/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 11. Add PCMH staff to project teams to coordinate open access scheduling and other PCMH requirements of project | | Project | | Completed | 11/01/2015 | 03/31/2018 | 11/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 12. Track and evaluate programs at each site using rapid cycle team evaluation techniques | | Project | | Completed | 04/01/2016 | 03/31/2018 | 04/01/2016 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 13. Report to Clinical Integration and Quality committee quarterly and revise objectives to improve outcomes when indicated | | Project | | Completed | 04/01/2016 | 03/31/2018 | 04/01/2016 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Milestone #2 Participating EDs will establish partnerships to community primary care providers with an emphasis on those that are PCMHs and have open access scheduling. a. Achieve NCQA 2014 Level 3 Medical Home standards or NYS Advanced Primary Care Model standards by the end of DSRIP Year 3. b. Develop process and procedures to establish connectivity between the emergency department and community primary care providers. c. Ensure real time notification to a Health Home care manager as applicable | DY3 Q4 | Project | N/A | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |

Project 2.b.iv – Care transitions intervention model to reduce 30 day readmissions for chronic health conditions

✔ IPQR Module 2.b.iv.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

A risk to the success of this project is that care transition activities aren't currently reimbursed by Medicare/Medicaid, although some MCOs provide some level of reimbursement for care transitions plans, which vary between plans & providers. Physician practices that aren't PCMH certified are reluctant to participate. The AFBHC mitigation strategy involves using regular meetings with Medicaid MCOs to advocate for reimbursement of interventions key to the project success. The PPS is developing process improvement initiatives for providers to obtain PCMH certification, as well as agreements to incentivize providers to participate in projects & achieve desired outcomes.

There are multiple IT Risks, such as data interoperability dependent upon working with multiple vendors that may not support existing standards- the risk mitigation strategy is to engage vendors early & determine supplemental solutions where available. The RHIO, which is expected to be the interoperable clinical platform, has expressed limitations on data sharing per NY state policies, working with EHR vendors to achieve data sharing & balancing the needs of the DSRIP program with their existing commitments. The PPS will work closely with the RHIO. As Population Health IT (PHIT) systems and tools are required, any delay to PHIT implementation delays the projects & risks not meeting speed & scale requirements. As PHIT roll-out depends on sufficient capital funding from NY state, delay in the capital release will delay the rollout. The PPS will accelerate implementation of PHIT interoperability & tools, use alternate methods where EHRs & PHIT tool functionality aren't yet ready & work with NY to ensure capital is provided in sufficient time.

Inconsistent approach to transitions of care across the PPS & providers' lack of resources, knowledge & time risks success. The PPS is developing a standardized approach to engage patients & families in these services.

Another risk is lack of knowledge of the full extent of causes of readmission in the PPS. Hospitals currently rely on internal methods to monitor 30-day readmissions. Access to Medicaid claims data now provides the ability to track the movement of attributed members across sites of care internal & external to the PPS. Preliminary data reveals that hospital-based tracking methods tend to underestimate member readmissions as they only measure readmissions to the site of discharge. This measurement dynamic is a risk to the PPS as it creates disconnect between the PPS' understanding of their target performance compared with NY's measurement of their performance to target- this unfavorable gap can negatively impact incentive payments & the PPS budget. To mitigate this, the PPS is using salient data to further understand patient movement, coordinating readmission analyses across hospitals & tracking readmissions according to source (LTC, SNF, home health & home) to identify facilities, agencies & patients at higher risk of readmission than others. This data will provide a comprehensive readmission rate of the attributed population, identify care gaps & target improvements at the system root cause. The PPS will also collaborate with other PPSs in the area to ensure that strategies are in place to reduce gaps/redundancies so reduction in 30 day readmissions is attainable.

Like Project 2.b.iii, a risk to the PPS is that the successful implementation of this project will have negative impacts on the hospitals' bottom line. In the fee for service reimbursement environment, hospital admissions are associated with revenue. As avoidable admissions decline, hospital revenues will also decline. To mitigate this risk, the PPS will monitor hospital admissions/readmissions, revenues/revenue sources, document the amount, timing & duration of the impact & allocate monies in the budget & funds flow to offset revenue losses.

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✔ IPQR Module 2.b.iv.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

| Benchmarks | |
|------------------------|------------------------|
| Actively Engaged Speed | Actively Engaged Scale |
| DY3,Q4 | 26,978 |

| | Year,Quarter | DY3,Q1 | DY3,Q2 | DY3,Q3 | DY3,Q4 |
|--------------|--------------------------|--------|--------|--------|--------|
| PPS Reported | Baseline Commitment | 3,642 | 12,140 | 16,591 | 26,978 |
| | Quarterly Update | 0 | 3,179 | 0 | 4,666 |
| | Percent(%) of Commitment | 0.00% | 26.19% | 0.00% | 17.30% |
| IA Approved | Quarterly Update | 0 | 3,179 | 0 | 4,666 |
| | Percent(%) of Commitment | 0.00% | 26.19% | 0.00% | 17.30% |

⚠ Warning: PPS Reported - Please note that your patients engaged to date (4,666) does not meet your committed amount (26,978) for 'DY3,Q4'

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

| Project Requirements (Milestone/Task Name) | Prescribed Due Date | Reporting Level | Provider Type | Status | Original Start Date | Original End Date | Start Date | End Date | Quarter End Date | DSRIP Reporting Year and Quarter |
|--|--------------------------------|----------------------------|----------------------|---------------|--------------------------------|------------------------------|-------------------|-----------------|-----------------------------|---|
| A payment strategy for the transition of care services is developed in concert with Medicaid Managed Care Plans and Health Homes. | | | | | | | | | | |
| Task Coordination of care strategies focused on care transition are in place, in concert with Medicaid Managed Care groups and Health Homes. | | Project | | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task PPS has protocol and process in place to identify Health-Home eligible patients and link them to services as required under ACA. | | Project | | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 1. While the AFBHC Transitions of Care Protocol is being drafted, the AFBHC CFO and project designee will meet with health plans to align discussion of projects and include health homes discussion in the region to identify consistency of practice, alignment of eligibility criteria for health homes program, and services covered. | | Project | | Completed | 09/01/2015 | 03/31/2018 | 09/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 2. Determine payment for services that are lacking, for example, transitions of care services, and define methods of coverage and payment. | | Project | | Completed | 09/01/2015 | 03/31/2018 | 09/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 3. Discuss with MCO's the cost/benefit of expanding eligibility criteria for health homes in achieving DSRIP goals and determine potential coverage options. | | Project | | Completed | 09/01/2015 | 03/31/2018 | 09/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 4. Establish AFBHC policy and procedure that defines how care transitions communications and processes will occur among entities and the role that the health plans, health homes, hospitals, and PPS will play. | | Project | | Completed | 09/01/2015 | 12/31/2017 | 01/01/2018 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 5. Clearly identify in the policy and procedure how members will be linked to services as required under the Affordable Care Act. | | Project | | Completed | 09/01/2015 | 03/31/2018 | 01/01/2018 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 6. Present policy to the Finance and Clinical Integration Subcommittee and Committee. | | Project | | Completed | 09/01/2015 | 03/31/2018 | 09/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Task 7. Establish process metrics to ensure agreed-upon procedures are working and achieving Domains 2 goals. | | Project | | Completed | 09/01/2015 | 03/31/2018 | 09/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |
| Milestone #3 Ensure required social services participate in the project. | DY3 Q4 | Project | N/A | Completed | 04/01/2015 | 03/31/2018 | 04/01/2015 | 03/31/2018 | 03/31/2018 | DY3 Q4 |

Prescribed Milestones Narrative Text

| Milestone Name | Narrative Text |
|--|----------------|
| Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency. | |
| Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed. | |
| Ensure required social services participate in the project. | |
| Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services. | |
| Protocols will include care record transitions with timely updates provided | |

Project 2.b.viii – Hospital-Home Care Collaboration Solutions

✓ IPQR Module 2.b.viii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

This project's success may risk hospitals' bottom line. As avoidable admissions decline, hospital revenues may decline. To mitigate the risk, the PPS will monitor hospital admissions/readmissions, revenues/revenue sources, document the impact & allocate monies in the budget & funds flow to offset losses.

As the project effects patient volume, hospitals may experience overstaffing. The PPS will monitor volume/productivity closely & coordinate with the Workforce Committee to retrain/redeploy workers within the PPS if necessary.

There are many IT Risks, such as data interoperability using multiple vendors that may not support existing standards- the risk mitigation strategy is to engage vendors early & determine supplemental solutions if available. The RHIO, which is expected to be the interoperable clinical platform, has expressed limitations on data sharing per NY state policies, working with EHR vendors to achieve data sharing & balancing the needs of DSRIP with existing commitments. As Population Health IT (PHIT) systems & tools are required, any delay to PHIT implementation delays the projects & risks not meeting speed & scale requirements. PHIT rollout depends on sufficient capital funding from NY state & delay in capital release will delay the rollout. The PPS will work with the RHIO, accelerate implementation of PHIT interoperability, use alternate methods where EHRs & PHIT tool functionality aren't ready & work with NY to ensure capital is given in sufficient time.

Another risk success is limited availability to the full extent of readmissions in the PPS. Hospitals have relied on internal methods to monitor readmissions. Access to Medicaid claims data now allows tracking attributed member movement across care sites in & out of the PPS. Preliminary data reveals that hospital tracking methods underestimate readmissions as they measure readmissions to the site of discharge. This dynamic is a risk as it creates disconnect between the PPS' understanding of their target performance compared with NY's measurement- this gap can negatively impact incentive payments & the PPS budget. For mitigation, the PPS is using data to understand patient movement, coordinating & tracking readmissions according to source (LTC, SNF, home health & home) to identify facilities, agencies & patients at higher risk of readmission. This will provide a comprehensive readmission rate of the attributed population, identify care gaps & target improvements at the system root cause. The home-health process will include protocols to identify worsening patient status early, evaluate condition & direct patients to appropriate care. Collaboration with other project strategies will help achieve speed & scale. The actively engaged patient in this project is the number of participating patients who avoided homecare to hospital transfer due to INTERACT-like principles. As submitted in the original application, the PPS actively engaged target is based on estimated members receiving homecare as of 12/2014. We assume that 50% of patients managed in the prior year continue to be engaged in active management of their chronic conditions. DSRIP success in other areas (25% Asthma and 33% Care Transitions) will drive growth of members with homecare above historical levels.

Due to varying documentation methods among the participating home health agencies, care processes are at risk from miscommunication & missing info. To mitigate the risk, this project will work with the IT committee to use consistent electronic tools across agencies. The PPS will assess the current use of the INTERACT program & implement standardized INTERACT tools. Project leads will assess current state readiness & willingness to participate & coordinate strategies with the PPS if roadblocks to change are found. Project goals will be evaluated quarterly to ensure milestones are on track for success.

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✔ IPQR Module 2.b.viii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

| Benchmarks | |
|------------------------|------------------------|
| Actively Engaged Speed | Actively Engaged Scale |

Project 2.d.i – Implementation of Patient Activation Activities to Engage, Educate and Integrate the uninsured and low/non-utilizing Medicaid populations into Community Based Care

✓ IPQR Module 2.d.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

As patient engagement in the health system grows, utilization of services will increase. The PPS must have the primary care capacity to absorb the targeted population. To mitigate this risk, the Workforce committee will track supply & demand for PCP to identify gaps, assess geographic need & recruit/place physicians in shortage areas. Demand for PCP will be coordinated with Project 2.b.iii. The PPS will recruit primary care NPs & explore retraining RNs to pursue advanced practice credentials in primary care. Successful mitigation will be reflected in supply to demand match. There are many IT Risks, such as data interoperability using multiple vendors that may not support existing standards- the risk mitigation strategy is to engage vendors early & determine supplemental solutions if available. The RHIO (the expected interoperable clinical platform) has expressed limitations on data sharing per NY state policies, working with EHR vendors to achieve data sharing & balancing DSRIP needs with existing commitments. Population Health IT (PHIT) systems & tools are required & delay to PHIT implementation delays the projects & risks not meeting speed/scale requirements. PHIT depends on sufficient capital funding from NY state & delay in capital release will delay the rollout. The PPS will work with the RHIO, accelerate implementation of PHIT interoperability, use alternate methods where EHRs & PHIT tool functionality aren't ready & work with NY to ensure capital is given in sufficient time.

Due to the transient nature of the target population, one risk is initiating activation activities on people who are lost to follow-up. Patient dropouts before the end of the performance period will negatively impact target implementation. To mitigate this risk, the PPS will develop specific client plans depending on engagement level. The PPS will address identified socio-economic barriers by linking to appropriate CBOs to meet basic needs (housing resources, food banks, transportation). Protocols for recovering dropouts will be created to document initial engagement. There are high rates of chronic disease, PQI & PPV in the PPS. A portion of unmet needs among the low income population is related to lack of engagement in disease management. The project will establish a PPS-administered chronic disease management program to extend the reach of self-management educational opportunities in times, places & languages that meet the population's needs. With the Cultural Competency Task Force, the project will train Community Health Workers (CHW) & make efforts to establish them within neighborhoods where they live. Outreach workers will have cultural competency/health literacy training to ensure cultural & linguistically appropriate interactions with the population. Successful mitigation will be reflected in number of persons engaged, a shift in the cohort to higher levels of engagement over time & low dropout rates.

Another risk is the ability to accurately track progress in patient engagement levels for the population at various levels & achieve project milestones' time/scale. The transience of the target population risks engagement in self-management care & measuring engagement outcomes if patients don't adopt self-management recommendations. Strategies to reduce this risk are intertwined with other projects. The IT component will incorporate methods to record initial engagement with the population, either electronically or manually until PHIT is available in the PPS. The PPS will explore ways to engage CBOs & find IT solutions that make access to this population more efficient. Integrating IT into community health work will allow for annual alerts for patients who need reassessment. Compliance will be tracked annually & dashboards will be created to determine which patients have engaged with self-management vs. inability to track patients for follow-up.

Alliance for Better Health Care (PPS ID:3)

✔ IPQR Module 2.d.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

| Benchmarks | |

| techniques. The PPS must provide oversight and ensure that engagement is sufficient and appropriate. | |
| Establish a PPS-wide training team, comprised of members with training in PAM(R) and expertise in patient activation and engagement. | |
| Identify UI, NU, and LU "hot spot" areas (e.g., emergency rooms). Contract or partner with CBOs to perform outreach within the identified "hot spot" areas. | |
| Survey the targeted population about healthcare needs in the PPS' region. | |
| Train providers located within "hot spots" on patient activation techniques, such as shared decision-making, measurements of health literacy, and cultural competency. | |
| <p>Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome measurements in #10).</p> <ul style="list-style-type: none"> • This patient activation project should not be used as a mechanism to inappropriately move members to different health plans and PCPs, but rather, shall focus on establishing connectivity to resources already available to the member. • Work with respective MCOs and PCPs to ensure proactive outreach to beneficiaries. Sufficient information must be provided regarding insurance coverage, language resources, and availability of primary and preventive care services. The state must review and approve any educational materials, which must comply with state marketing guidelines and federal regulations as outlined in 42 CFR §438.104. | |
| Baseline each beneficiary cohort (per method developed by state) to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for each cohort at the beginning of each performance period. | |
| Include beneficiaries in development team to promote preventive care. | |
| <p>Measure PAM(R) components, including:</p> <ul style="list-style-type: none"> • Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot spot" area for health service. • If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using PAM(R) survey and designate a PAM(R) score. | |

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

Project 3.a.i – Integration of primary care and behavioral health services

✓ IPQR Module 3.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Two regulations run counter to the project objectives of co-locating PC and BH services and are risks to the success of the project. The existing threshold billing regulations prohibit billing for Primary Care and Behavioral Health Services on the same day and the locations of Article 31 clinics are stringently defined. The PPS mitigation strategy has been to advocate for regulatory relief, apply for waivers permitted with the DSRIP initiative, explore alternative payment methodologies, and seek alternate ways to reduce the physical distance between providers. Successful mitigation will be seen in the regulatory waivers being granted.

Provider perceptions about patients with behavioral health and substance use disorders can negatively impact primary care provider engagement and, in turn, are risks to the success of this project. The PPS's mitigation strategy includes: providing age appropriate cultural competency and health literacy training to primary care practice sites and tracking completion of trainings; identifying and resolving physical barriers (i.e. entrances, waiting rooms, etc.) and stigma at practice sites that reduce provider participation; and, supporting care management according to patient need to address patient barriers to behavioral and medical care. Success of the mitigation strategy will be seen in the number of providers accepting patients with behavioral health and substance use disorders.

Another risk to the successful completion of this project is that the PPS does not achieve NCQA recognition for its primary care practices by DY3, Q4. To mitigate this risk, the PPS is identifying at least one project manager to PCMH certification. Current state of the practices will be assessed, technical assistance needs identified and technical assistance provided from the PPS central project management office. Success of the mitigation strategy is that all providers achieve NCQA recognition within the targeted timeframe.

There are multiple IT Risks, such as data interoperability dependent upon working with multiple vendors that may not support existing standards- the risk mitigation strategy is to engage vendors early & determine supplemental solutions where available. The RHIO, which is expected to be the interoperable clinical platform, has expressed limitations on data sharing per NY state policies, working with EHR vendors to achieve data sharing & balancing the needs of DSRIP with their existing commitments. As Population Health IT (PHIT) systems and tools are required, any delay to PHIT implementation delays the projects & risks not meeting speed & scale requirements. PHIT rollout depends on sufficient capital funding from NY state & delay in the capital release will delay the rollout. The PPS will work closely with the RHIO, accelerate implementation of PHIT interoperability & tools, use alternate methods where EHRs & PHIT tool functionality aren't yet ready & work with NY to ensure capital is provided in sufficient time.

As health care transitions to the outpatient setting, the PPS risks overwhelming providers with expectations associated with the DSRIP projects. The mitigation strategy is to bundle interventions as much as possible; to demonstrate the common links between DSRIP requirements, and to provide technical support, tools, training and measuring awareness will surveys to practices from the PPS administrative offices. Success of the mitigation strategy will be seen with project requirements being met within the targeted timeframes.

✔ IPQR Module 3.a.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

| Benchmarks | |
|------------------------|------------------------|
| Actively Engaged Speed | Actively Engaged Scale |
| DY4,Q4 | 25,890 |

| | Year,Quarter | DY3,Q1 | DY3,Q2 | DY3,Q3 | DY3,Q4 |
|--------------|--------------------------|--------|---------|--------|--------|
| PPS Reported | Baseline Commitment | 2,236 | 7,452 | 11,251 | 20,115 |
| | Quarterly Update | 0 | 13,238 | 0 | 19,788 |
| | Percent(%) of Commitment | 0.00% | 177.64% | 0.00% | 98.37% |
| IA Approved | Quarterly Update | 0 | 13,147 | 0 | 19,625 |
| | Percent(%) of Commitment | 0.00% | 176.42% | 0.00% | 97.56% |

⚠ Warning: PPS Reported - Please note that your patients engaged to date (19,788) does not meet your committed amount (20,115) for 'DY3,Q4'

✅ IPQR Module 3.a.i.3 - Prescribed Milestones

| Models Selected | | |
|-----------------|---------|---------|
| Model 1 | Model 2 | Model 3 |

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

| Project Requirements (Milestone/Task Name) | Prescribed Due Date | Project Model Name | Reporting Level | Provider Type | Status | Original Start Date | Original End Date | Start Date | End Date | Quarter End Date | DSRIP Reporting Year and Quarter |
|---|---------------------|--------------------|-----------------|---|-----------|---------------------|-------------------|------------|------------|------------------|----------------------------------|
| Milestone #1 Co-locate behavioral health services at primary care practice sites. All participating eligible primary care practices must meet 2014 NCQA level 3 PCMH or Advance Primary Care Model standards by DY 3. | DY3 Q4 | Model 1 | Project | N/A | Completed | 04/01/2015 | 03/31/2018 | 01/01/2018 | 03/31/2018 | 03/31/2018 | DY3 Q4 |

Project 3.a.iv – Development of Withdrawal Management (e.g., ambulatory detoxification, ancillary withdrawal services) capabilities and appropriate enhanced abstinence services within community-based addiction treatment programs

✓ IPQR Module 3.a.iv.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The AFBHC PPS recognizes that the 2012 CNA demonstrated a 15% increase in the numbers of patients presenting in the emergency departments for opiate and other drug related withdrawal issues. An identified risk to the development of withdrawal management services is the existing shortage of behavioral health providers in the area, particularly those DEA-X licensed physicians. This project may exacerbate the existing shortage of practicing X license physicians and behavioral health clinicians in general. This shortage in the PPS area has led to an imbalance of implementation support between medically-related projects and behavioral-health related projects. Mitigation strategy to address this risk is to build ambulatory detoxification centers within the community based treatment programs and to build on these programs once established. Initially five areas will be targeted for building services. The PPS with the help of behavioral health leads will identify a project medical director as a champion experienced with ambulatory detoxification to educate and motivate peers in provide practices and other settings to encourage participation in services. Success to the development of ambulatory withdrawal management will be measured by a decrease in volume of this patient population using local emergency rooms for services and an increase in use of ambulatory detox centers demonstrated with a quarterly review of project metrics and outcomes.

There are multiple IT Risks, such as data interoperability dependent upon working with multiple vendors that may not support existing standards- the risk mitigation strategy is to engage vendors early & determine supplemental solutions where available. The RHIO, which is expected to be the interoperable clinical platform, has expressed limitations on data sharing per NY state policies, working with EHR vendors to achieve data sharing & balancing the needs of DSRIP with their existing commitments. As Population Health IT (PHIT) systems and tools are required, any delay to PHIT implementation delays the projects & risks not meeting speed & scale requirements. PHIT rollout depends on sufficient capital funding from NY state & delay in the capital release will delay the rollout. The PPS will work closely with the RHIO, accelerate implementation of PHIT interoperability & tools, use alternate methods where EHRs & PHIT tool functionality aren't yet ready & work with NY to ensure capital is provided in sufficient time.

Another risk identified is the potential for an imbalance of implementation support between medically-related projects and behavioral-health related projects. The strategy to manage this risk will be to identify project leads for behavioral health projects as part of the Clinical Integration and Quality Committee to ensure behavioral health expectations are coordinated and integrated with other primary care project requirements. Representation of a project lead for the behavioral health projects will assist in supporting culture change to holistic patient approach. Culturally sensitive education sessions will be developed in conjunction with the clinical integration and workforce workstreams and provided to the engaged providers throughout the PPS, including but not limited to community based organizations, hospitals, primary care and non-primary care physicians. Session attendance will be tracked and number of participants will be reported quarterly to demonstrate increased awareness and sensitivity to withdrawal management patient and care protocols.

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

✔ IPQR Module 3.a.iv.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

| Benchmarks | |
|------------------------|------------------------|
| Actively Engaged Speed | Actively Engaged Scale |
| DY4,Q4 | 3,752 |

| | Year,Quarter | DY3,Q1 | DY3,Q2 | DY3,Q3 | DY3,Q4 |
|--------------|--------------------------|--------|---------|--------|--------|
| PPS Reported | Baseline Commitment | 448 | 1,494 | 1,943 | 2,990 |
| | Quarterly Update | 0 | 1,608 | 0 | 2,789 |
| | Percent(%) of Commitment | 0.00% | 107.63% | 0.00% | 93.28% |
| IA Approved | Quarterly Update | 0 | 1,522 | 0 | 2,758 |
| | Percent(%) of Commitment | 0.00% | 101.87% | 0.00% | 92.24% |

⚠ Warning: PPS Reported - Please note that your patients engaged to date (2,789) does not meet your committed amount (2,990) for 'DY3,Q4'

Prescribed Milestones Narrative Text

| Milestone Name | Narrative Text |
|---|----------------|
| Develop community-based addiction treatment programs that include outpatient SUD sites with PCP integrated teams, and stabilization services including social services. | |
| Establish referral relationships between community treatment programs and inpatient detoxification services with development of referral protocols. | |
| Include a project medical director, board certified in addiction medicine, with training and privileges for use of buprenorphine and buprenorphine/naltrexone as well as familiarity with other withdrawal management agents. | |
| Identify and link to providers approved for outpatient medication management of opioid addiction who agree to provide continued maintenance therapy and collaborate with the treatment program and care manager. These may include practices with collocated behavioral health services, opioid treatment programs or outpatient SUD clinics. | |
| Develop community-based withdrawal management (ambulatory detoxification) protocols based upon evidence based best practices and staff training. | |
| Develop care management services within the SUD treatment program. | |
| Form agreements with the Medicaid Managed Care organizations serving the affected population to provide coverage for the service array under this project. | |
| Use EHRs or other technical platforms to track all patients engaged in this project. | |

Project 3.d.ii – Expansion of asthma home-based self-management program

✔ IPQR Module 3.d.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Reimbursement practices are a key risk to provider engagement in this project. For example, MCO policies do not cover multiple prescriptions for the same inhaler so that inhalers can be simultaneously available at home, school, and other family member locations. Building on PPS partnership agreements with the regional MCO's, the PPS will mitigate this risk by advocating for enhanced coverage of home-based self-management that has been shown to reduce overall burden of asthma costs. Success of the mitigation strategy will be seen when MCO/PPS agreements have been made.

There are many IT Risks, such as data interoperability using multiple vendors that may not support existing standards- the risk mitigation strategy is to engage vendors early & determine supplemental solutions if available. The RHIO (the expected interoperable clinical platform) has expressed limitations on data sharing per NY state policies, working with EHR vendors to achieve data sharing & balancing DSRIP needs with existing commitments. Population Health IT (PHIT) systems & tools are required & delay to PHIT implementation delays the projects & risks not meeting speed/scale requirements. PHIT depends on sufficient capital funding from NY state & delay in capital release will delay the rollout. The PPS will work with the RHIO, accelerate implementation of PHIT interoperability, use alternate methods where EHRs & PHIT tool functionality aren't ready & work with NY to ensure capital is given in sufficient time.

Care of asthma patients and the transition and/or expansion of home based self-management program needs to not only educate and increase awareness for the patient, caregivers, families, environment, and schools, but must also link to care transitions. The PPS will form an asthma task force to develop and coordinate in-services to educate providers and care managers about community-based resources and referrals. Traditional providers need to be linked with home-based programs and community health workers to minimize missed opportunities for home visits and access to patient homes; if not the project has an increased risk of resistance to change and stagnation in current state management. The AFBHC will leverage its active partnership with the Asthma Coalition, Asthma Support Groups and School-Based Asthma Management program to ensure equal resources are available throughout the geographic region. Engaging patients in their care will also be important to the success of this project. The PPS will develop strategies to provide culturally and linguistically appropriate care by hiring individuals who are representative of the patient population, and by leveraging CHW's and community asthma champions. Success of the program will be measured by a decrease in emergency asthma visits to ED, and an increase in community participation of various community based organization, clinics, health care organizations and pharmacies. Additionally, awareness of PCPs and non-PCPs will be measured and tracked by determining where patients' referrals originated (asthma registry and IT platforms). The PPS will also engage the marketing and communication committees to help with awareness and tactics for improving home management of respiratory complaints. Ideally, this project's success could also be measured with the success of tobacco use cessation project 4.b.i, since cessation in tobacco use can be correlated to a reduction in environmental triggers. The interplay between these projects will be tracked during the DSRIP project.

✔ IPQR Module 3.d.ii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

| Benchmarks | |
|------------------------|------------------------|
| Actively Engaged Speed | Actively Engaged Scale |
| DY4,Q4 | 11,007 |

| | Year,Quarter | DY3,Q1 | DY3,Q2 | DY3,Q3 | DY3,Q4 |
|--------------|--------------------------|--------|---------|--------|--------|
| PPS Reported | Baseline Commitment | 967 | 3,222 | 5,192 | 9,789 |
| | Quarterly Update | 0 | 3,735 | 0 | 8,127 |
| | Percent(%) of Commitment | 0.00% | 115.92% | 0.00% | 83.02% |
| IA Approved | Quarterly Update | 0 | 3,687 | 0 | 8,034 |
| | Percent(%) of Commitment | 0.00% | 114.43% | 0.00% | 82.07% |

⚠ Warning: PPS Reported - Please note that your patients engaged to date (8,127) does not meet your committed amount (9,789) for 'DY3,Q4'

| Expand asthma home-based self-management program to include home environmental trigger reduction, self-monitoring, medication use, and medical follow-up. | M1: Yes, Ellis Medicine, St. Peter's Health Partners, St. Mary's Amsterdam, CHC Homecare as well as the two Healthy Neighborhoods programs all have program brochures and referral forms. Please see attached Alliance_Remed_Response_3dii_M1_brocures. The comprehensive Asthma Resource Directory was assembled by the entire Asthma workgroup. It contains information about all available asthma education programs and links to referral forms, as well as a description of all of the educational materials in use by the partners collectively. Please see attached Alliance_Remed_Response_3dii_M1_directory. |
| Establish procedures to provide, coordinate, or link the client to resources for evidence-based trigger reduction interventions. Specifically, change the patient's indoor environment to reduce exposure to asthma triggers such as pests, mold, and second hand smoke. | |

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

Project 3.g.i – Integration of palliative care into the PCMH Model

✓ IPQR Module 3.g.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Palliative Care is not presently a covered benefit across all providers which places this project at risk for succeeding if providers refuse to engage in unreimbursed services. To mitigate this risk, the PPS will build upon our effective partnership with MCOs in DSRIP project design to advocate for reimbursement for services required by the DSRIP projects. Success of the mitigation strategy will be seen when MCO/PPS agreements have been made.

There are many IT Risks, such as manual tracking of data, data interoperability using multiple vendors that may not support existing standards- the risk mitigation strategy is to engage vendors early & determine supplemental solutions if available. The RHIO (the expected interoperable clinical platform) has expressed limitations on data sharing per NY state policies, working with EHR vendors to achieve data sharing & balancing DSRIP needs with existing commitments. Population Health IT (PHIT) systems & tools are required & delay to PHIT implementation delays the projects & risks not meeting speed/scale requirements. PHIT depends on sufficient capital funding from NY state & delay in capital release will delay the rollout. The PPS will work with the RHIO, accelerate implementation of PHIT interoperability, use alternate methods where EHRs & PHIT tool functionality aren't ready & work with NY to ensure capital is given in sufficient time.

As care shifts to the Primary Care Provider, the AFBHC risks overwhelming providers with expectations associated with the DSRIP projects. The mitigation strategy is to bundle interventions as much as possible; to demonstrate the common links between DSRIP requirements, and to provide technical support, tools and training to practices from the PPS administrative offices. The PPS will also extend the reach of its current palliative care services to accommodate patient referrals and decrease the burden to the PCP practice.

Another risk to the successful completion of this project is that the PPS does not achieve NCQA recognition for its primary care practices by DY3, Q4. To mitigate this risk, the PPS is dedicating at least one project manager to PCMH certification as well as employing consultant team to assist practices in obtaining certification. Current state of the practices will be assessed, technical assistance needs identified and technical assistance will be provided from the PPS central project management office. Success of the mitigation strategy will be seen in number of providers achieving NCQA recognition within the targeted timeframe.

Additional risks to successful engagement of patients in palliative care services are religious and cultural beliefs about end of life for both patients/families and providers/care givers. There is also an existing misunderstanding of patients, families and providers that palliative care is applicable only for patients at the end of life and that palliative care involves doing less for the patient. The PPS mitigation strategy is to: 1) develop culturally and linguistically appropriate approaches, There staff training and patient education materials; 2) educate patients/families and providers/care givers about the differences between palliative care and hospice;

Success of the mitigation strategy will be seen in patient and provider engagement in palliative care services and referrals.

✔ IPQR Module 3.g.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Project 4.a.iii – Strengthen Mental Health and Substance Abuse Infrastructure across Systems

✓ IPQR Module 4.a.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

An identified risk to this Domain 4 project is low provider participation for a variety of factors which could negatively impact the success of this project. One risk to the project would be low provider participation due to lack of reimbursement for meetings, workgroups, sessions and general time commitments of the providers. Through the PPS governance and workforce committees, this risk will be minimized by tracking provider engagement quarterly, partnering with behavioral health, substance abuse centers and community organizations to access changes in participation from current state to future state. An effort will be made to launch the screenings in all collaborative care sites and those providers willing to partner as a first step; then bring on other providers. In conjunction with the other behavioral health projects engaged by the AFBHC PPS, such as 3 a iv, providers will be educated on mental health issues and concerns in the catchment area, and sessions will be tracked through community based partnerships. Success will be measured by an increase in the use of the unified screening tool for patients accessing services of the PPS providers.

There is always the possibility that outlier providers not in the PPS network will interact with patients from the PPS network. The formation of a MEB taskforce by end of DY1, Collaborative Care Model provider champions determined by end of DY1 and work with the Clinical Integration and Quality Committee to develop standards and best practice guidelines will be shared with regularly scheduled meetings of neighboring PPS's, focusing on common projects to mitigate redundancies and identify specific collaborative opportunities, such as this project and others. Specifically, this project can effectively decrease the risk of a missed opportunity for screening these patients by incorporating the MEB tool into the projects within the PPS and sharing this tool as a collaborative means with other PPS in the area so incorporation of the tool can also be done at various sites. The AFBHC will build upon the expertise and experience of providers already using screenings to identify patient risk levels and will create replicable models for the delivery of screenings.

Interoperability of current state IT capabilities and the possibility that all participants will not be on a similar IT platform is a risk to the successful attainment of health care transition with this project. Successful partnership with the IT component of the PPS, evaluating current state of providers and plans to build and/or level resources will be necessary to ensure success. The AFBHC will work with IT in the development of embedded screening tools in EHRs with clinical prompts, especially related to specific diagnostic dyads of diabetes/depression and psychosis/substance use. Alternative methods to tracking and completing survey may have to be implemented, such as paper, data entry into dashboards, utilizing resources, until interoperability is obtained.

Instructions :

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

Project 4.b.i – Promote tobacco use cessation, especially among low SES populations and those with poor mental health.

✓ IPQR Module 4.b.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

There are a number of inherent risks associated with the promotion of tobacco use cessation, especially among low SES populations and those with poor mental health. One risk is the potential for missed opportunities for patient screening and referral. The AFBHC and the AFBHC Team has already assembled a wide array of project partners from social service agencies, including St Peter's Center for Smoking Cessation, the Tobacco-Free Coalition, and the community resource Advancing Tobacco-Free Communities of Hamilton, Fulton and Montgomery Counties. The agencies and others will continue to promote tobacco use cessation for the population that they interact with. These teams are targeting community settings for patient identification and engagement. The goals of these organizations have and will remain high reaching, with success measured in their ability to connect with the population and measure success.

With the formation of the AFBHC, the communication and marketing strategies will be to integrate tobacco use cessation into its public focused outreach as a means to keep the population aware and engaged in the need to promote a smoke free environment. This is also a perfect opportunity for the PPS to collaborate with other projects within the DSRIP plan, such as with Project 2.b.iii. to ensure smoking status is communicated to primary care provider and Patient Navigator in ED Triage project process through a screening tool on health assessment. When identified, patients will be referred and connected with smoking cessation services along care continuum, tracked and measured for compliance and recidivism. Another avenue to evaluate the tobacco using population is through the 3 d ii project, linking tobacco use to environmental triggers. This can bolster outreach efforts by linking patients and/or home trigger tobacco users to the appropriate provider/CBO.

As there can be community inertia regarding smoking as the behavior is embedded in the local culture, the AFBHC will clinically integrate tobacco use cessation throughout the projects, engage champions at multiple levels, continue to promote smoke free environments and measure success as the community's health improves with an integrated and unified approach, not just in independent silos of improvement.

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

Attestation

The Lead Representative has been designated by the Primary Lead PPS Provider (PPS Lead Entity) as the signing officiate for the DSRIP Quarterly Report. The Lead Representative has the authority to complete this attestation on behalf of the PPS network. The Lead Representative and PPS Lead Entity are responsible for the authenticity and accuracy of the material submitted in this report.

The Lead Representative of the Performing Provider System (PPS) must complete this attestation form in order for the project application to be accepted by the NYS Department of Health. Once the attestation is complete, the Quarterly Report will be locked down from any further editing. Do not complete this section until the entire Quarterly Report is complete.

If the Quarterly Report becomes locked in error and additional changes are necessary, please use the contact information on the Home Page to request that the Quarterly Report be unlocked.

To electronically sign this Quarterly Report, please enter the required information and check the box below:

I here by attest, as the Lead Representative of the 'Alliance for Better Health Care', that all information provided on this Quarterly report is true and accurate to the best of my knowledge, and that, following initial submission in the current quarterly reporting period as defined by NY DOH, changes made to this report were pursuant only to documented instructions or documented approval of changes from DOH or DSRIP Independent Assessor.

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

| Project ID | Module Name / Milestone # | Review Status | |
|------------|--|-----------------|---|
| 2.a.i | Module 2.a.i.2 - Prescribed Milestones | | |
| | Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy. | Fail |    |
| | Milestone #2 Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS. | Pass & Complete | |
| | Milestone #3 Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services. | Pass & Complete | |
| | Milestone #4 Ensure that all PPS safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including directed exchange (secure messaging), alerts and patient record look up, by the end of Demonstration Year (DY) 3. | Fail |    |
| | Milestone #5 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3. | Pass & Complete |   |
| | Milestone #6 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers. | Pass & Complete |  |
| | Milestone #7 Achieve 2014 Level 3 PCMH primary care certification and/or meet state-determined criteria for Advanced Primary Care Models for all eligible participating PCPs, expand access to primary care providers, and meet EHR Meaningful Use standards by the end of DY 3. | Fail |    |
| | Milestone #9 Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform. | Pass & Complete | |
| | Milestone #10 Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes. | Pass & Complete |  |
| | Milestone #11 Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate. | Pass & Complete |  |
| 2.b.iii | Module 2.b.iii.2 - Patient Engagement Speed | Fail |   |
| | Module 2.b.iii.3 - Prescribed Milestones | | |
| | Milestone #1 Establish ED care triage program for at-risk populations | Pass & Complete |   |
| | Milestone #2 Participating EDs will establish partnerships to community primary care providers with an emphasis on those that are PCMHs and have open access scheduling. a. Achieve NCQA 2014 Level 3 Medical Home standards or NYS Advanced Primary Care Model standards by the end of DSRIP Year 3. b. Develop process and procedures to establish connectivity between the emergency department and community primary care providers. c. Ensure real time notification to a Health Home care manager as applicable | Fail |    |

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

Alliance for Better Health Care (PPS ID:3)

| Project ID | Module Name / Milestone # | Review Status | |
|---|---|----------------------------------|---|
| | Milestone #3 For patients presenting with minor illnesses who do not have a primary care provider: a. Patient navigators will assist the presenting patient to receive an immediate appointment with a primary care provider, after required medical screening examination, to validate a non-emergency need. b. Patient navigator will assist the patient with identifying and accessing needed community support resources. c. Patient navigator will assist the member in receiving a timely appointment with that provider's office (for patients with a primary care provider). | Pass & Complete |   |
| | Milestone #4 Established protocols allowing ED and first responders - under supervision of the ED practitioners - to transport patients with non-acute disorders to alternate care sites including the PCMH to receive more appropriate level of care. (This requirement is optional.) | Pass (with Exception) & Complete | |
| | Milestone #5 Use EHRs and other technical platforms to track all patients engaged in the project. | Pass & Complete | |
| 2.b.iv | Module 2.b.iv.2 - Patient Engagement Speed | Fail |   |
| | Module 2.b.iv.3 - Prescribed Milestones | | |
| | Milestone #1 Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency. | Pass & Complete | |
| | Milestone #2 Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed. | Pass & Complete |  |
| | Milestone #3 Ensure required social services participate in the project. | Pass & Complete |  |
| | Milestone #4 Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services. | Pass & Complete | |
| | Milestone #5 Protocols will include care record transitions with timely updates provided to the members' providers, particularly primary care provider. | Pass & Complete | |
| | Milestone #6 Ensure that a 30-day transition of care period is established. | Pass & Complete | |
| Milestone #7 Use EHRs and other technical platforms to track all patients engaged in the project. | Pass & Complete | | |
| 2.b.viii | Module 2.b.viii.2 - Patient Engagement Speed | Fail |   |
| | Module 2.b.viii.3 - Prescribed Milestones | | |
| | Milestone #1 Assemble Rapid Response Teams (hospital/home care) to facilitate patient discharge to home and assure needed home care services are in place, including, if appropriate, hospice. | Pass & Complete |  |
| | Milestone #2 Ensure home care staff have knowledge and skills to identify and respond to patient risks for readmission, as well as to support evidence-based medicine and chronic care management. | Pass & Complete | |
| | Milestone #3 Develop care pathways and other clinical tools for monitoring chronically ill patients, with the goal of early identification of potential instability and intervention to avoid hospital transfer. | Fail | |
| | Milestone #4 Educate all staff on care pathways and INTERACT-like principles. | Pass & Complete | |
| Milestone #5 Develop Advance Care Planning tools to assist residents and families in expressing and documenting their wishes for near end of life and end of life care. | Pass & Complete | | |

DSRIP Implementation Plan Project

Alliance for Better Health Care (PPS ID:3)

| Project ID | Module Name / Milestone # | Review Status | |
|--|--|-----------------|---|
| | Milestone #6 Create coaching program to facilitate and support implementation. | Pass & Complete | |
| | Milestone #7 Educate patient and family/caretakers, to facilitate participation in planning of care. | Pass & Complete | |
| | Milestone #8 Integrate primary care, behavioral health, pharmacy, and other services into the model in order to enhance coordination of care and medication management. | Pass & Complete |   |
| | Milestone #9 Utilize telehealth/telemedicine to enhance hospital-home care collaborations. | Pass & Complete |  |
| | Milestone #10 Utilize interoperable EHR to enhance communication and avoid medication errors and/or duplicative services. | Pass & Complete |  |
| | Milestone #11 Measure outcomes (including quality assessment/root cause analysis of transfer) in order to identify additional interventions. | Pass & Complete |   |
| | Milestone #12 Use EHRs and other technical platforms to track all patients engaged in the project. | Pass & Complete | |
| 2.d.i | Module 2.d.i.2 - Patient Engagement Speed | Pass & Ongoing |  |
| | Module 2.d.i.3 - Prescribed Milestones | | |
| | Milestone #1 Contract or partner with community-based organizations (CBOs) to engage target populations using PAM(R) and other patient activation techniques. The PPS must provide oversight and ensure that engagement is sufficient and appropriate. | Pass & Complete | |
| | Milestone #2 Establish a PPS-wide training team, comprised of members with training in PAM(R) and expertise in patient activation and engagement. | Pass & Complete | |
| | Milestone #3 Identify UI, NU, and LU "hot spot" areas (e.g., emergency rooms). Contract or partner with CBOs to perform outreach within the identified "hot spot" areas. | Pass & Complete | |
| | Milestone #4 Survey the targeted population about healthcare needs in the PPS' region. | Pass & Complete | |
| | Milestone #5 Train providers located within "hot spots" on patient activation techniques, such as shared decision-making, measurements of health literacy, and cultural competency. | Pass & Complete | |
| | Milestone #6 Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome measurements in #10). • This patient activation project should not be used as a mechanism to inappropriately move members to different health plans and PCPs, but rather, shall focus on establishing connectivity to resources already available to the member. • Work with respective MCOs and PCPs to ensure proactive outreach to beneficiaries. Sufficient information must be provided regarding insurance coverage, language resources, and availability of primary and preventive care services. The state must review and approve any educational materials, which must comply with state marketing guidelines and federal regulations as outlined in 42 CFR §438.104. | Pass & Complete | |
| | Milestone #7 Baseline each beneficiary cohort (per method developed by state) to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for each cohort at the beginning of each performance period. | Pass & Complete | |
| | Milestone #8 Include beneficiaries in development team to promote preventive care. | Pass & Complete | |
| Milestone #9 Measure PAM(R) components, including: • Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot | Pass & Complete | | |

|------------|--|-----------------|---|
| | spot" area for health service. <ul style="list-style-type: none"> • If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using PAM (R) survey and designate a PAM(R) score. • Individual member's score must be averaged to calculate a baseline measure for that year's cohort. • The cohort must be followed for the entirety of the DSRIP program. • On an annual basis, assess individual members' and each cohort's level of engagement, with the goal of moving beneficiaries to a higher level of activation. <ul style="list-style-type: none"> • If the beneficiary is deemed to be LU & NU but has a designated PCP who is not part of the PPS' network, counsel the beneficiary on better utilizing his/her existing healthcare benefits, while also encouraging the beneficiary to reconnect with his/her designated PCP. • The PPS will NOT be responsible for assessing the patient via PAM(R) survey. • PPS will be responsible for providing the most current contact information to the beneficiary's MCO for outreach purposes. • Provide member engagement lists to relevant insurance companies (for NU & LU populations) on a monthly basis, as well as to DOH on a quarterly basis. | | |
| | Milestone #10 Increase the volume of non-emergent (primary, behavioral, dental) care provided to UI, NU, and LU persons. | Pass & Complete | |
| | Milestone #11 Contract or partner with CBOs to develop a group of community navigators who are trained in connectivity to healthcare coverage, community healthcare resources (including for primary and preventive services) and patient education. | Pass & Complete | |
| | Milestone #12 Develop a process for Medicaid recipients and project participants to report complaints and receive customer service. | Pass & Complete | |
| | Milestone #13 Train community navigators in patient activation and education, including how to appropriately assist project beneficiaries using the PAM(R). | Pass & Complete | |
| | Milestone #14 Ensure direct hand-offs to navigators who are prominently placed at "hot spots," partnered CBOs, emergency departments, or community events, so as to facilitate education regarding health insurance coverage, age-appropriate primary and preventive healthcare services and resources. | Pass & Complete | |
| | Milestone #15 Inform and educate navigators about insurance options and healthcare resources available to UI, NU, and LU populations. | Pass & Complete | |
| | Milestone #16 Ensure appropriate and timely access for navigators when attempting to establish primary and preventive services for a community member. | Pass & Complete | |
| | Milestone #17 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, to track all patients engaged in the project. | Pass & Complete | |
| 3.a.i | Module 3.a.i.2 - Patient Engagement Speed | Pass & Ongoing |  |
| 3.a.i | Module 3.a.i.3 - Prescribed Milestones | | |
| 3.a.i | Milestone #1 Co-locate behavioral health services at primary care practice sites. All participating eligible primary care practices must meet 2014 NCQA level 3 PCMH or Advance Primary Care Model standards by DY 3. | Pass & Complete |   |
| 3.a.i | Milestone #2 Develop collaborative evidence-based standards of care including medication management and care engagement process. | Pass & Complete | |

Additional Project Scale Commitments

Instructions:

Please indicate the scale of the categories below that meet all of the project requirements committed to in the Project Plan Application. Documentation must be submitted in Excel format in the quarter when the PPS provider speed commitments for a particular project are due. This documentation should include the target category(e.g. Medical Villages, Emergency Departments with Care Triage, Community-based navigators, etc.), the project ID(e.g. 2.a.iv,2.a.v,3.a.ii, etc.), and the name of the providers/entities/individuals associated with this project, if applicable.

| Project Scale Category | Project | Selected | Committed |
|--|----------|----------|-----------|
| Emergency Departments with Care Triage | 2.b.iii | 0 | 6 |
| Home Care Facilities | 2.b.viii | 0 | 5 |
| PAM(R) Providers | 2.d.i | 0 | 300 |
