Quarterly Report - Implementation Plan for Central New York Care Collaborative

Year and Quarter: DY3, Q4

Quarterly Report Status:  Adjudicated

Status By Section

Section	Description	Status
Section 01	Budget	 Completed
Section 02	Governance	 Completed
Section 03	Financial Stability	 Completed
Section 04	Cultural Competency & Health Literacy	 Completed
Section 05	IT Systems and Processes	 Completed
Section 06	Performance Reporting	 Completed
Section 07	Practitioner Engagement	 Completed
Section 08	Population Health Management	 Completed
Section 09	Clinical Integration	 Completed
Section 10	General Project Reporting	 Completed
Section 11	Workforce	 Completed

Status By Project

Project ID	Project Title	Status
2.a.i	Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management	 Completed
2.a.iii	Health Home At-Risk Intervention Program: Proactive management of higher risk patients not currently eligible for Health Homes through access to high quality primary care and support services	 Completed
2.b.iii	ED care triage for at-risk populations	 Completed
2.b.iv	Care transitions intervention model to reduce 30 day readmissions for chronic health conditions	 Completed
2.d.i	Implementation of Patient Activation Activities to Engage, Educate and Integrate the uninsured and low/non-utilizing Medicaid populations into Community Based Care	 Completed
3.a.i	Integration of primary care and behavioral health services	 Completed
3.a.ii	Behavioral health community crisis stabilization services	 Completed
3.b.i	Evidence-based strategies for disease management in high risk/affected populations (adult only)	 Completed
3.g.i	Integration of palliative care into the PCMH Model	 Completed
4.a.iii	Strengthen Mental Health and Substance Abuse Infrastructure across Systems	 Completed
4.d.i	Reduce premature births	 Completed

Narrative Text :

In CNYCC's December 2014 Organizational Application, Budget Category "Cost of Project Implementation" was allocated 20% of funds (as opposed to 67% of funds in the table below), Budget Category "Revenue Loss" was allocated 5% of funds (opposed to 15% of funds in the table below), and Budget Category "Internal PPS Provider Bonus Payments" was allocated 75% of funds (as opposed to 18% in the table below). The majority of this deviation is due to the inclusion of a projected IGT amount within the December application's budget total and within the "Internal PPS Provider Bonus Payments" budget category whereas the amounts below, which are based on estimated not final project valuation, are net of IGT.

✔ IPQR Module 1.5 - Prescribed Milestones

Instructions :

Please provide updates to baseline target dates and work breakdown tasks with target dates for required milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement. Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Complete funds flow budget and distribution plan and communicate with network	Completed	Funds Flow Budget and Distribution Plan, signed off by your Finance Committee, including details of your approach to funds flow on a whole-PPS and project-by-project basis; evidence of involvement of provider network in developing funds flow methodology.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	YES
Task 1. Complete funds flow budget and distribution plan for submission to CNYCC Board/Finance Committee. The funds flow budget and distribution plan will be informed by pro forma results based upon projected amounts and informed estimates.	Completed	1. Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Finalize governance structure and sub-committee structure	<p>During the DY3 Q3 and Q4 reporting period, the CNYCC Corporate Members met in November 2017 to approve two new Directors to fill recent Board vacancies, appoint the incoming Board Chairperson for 2018, review and discuss post-DSRIP sustainability and to conduct other business. The Members also met in March 2018 for the Annual Meeting of the Members, consistent with the CNYCC Bylaws. During the Annual Meeting, the Members received the slate of nominations advanced from the Nominating Committee and Board to: 1) renew eligible Directors and to elect two new Directors; 2) appoint the CNYCC Executive Committee; and 3) appoint the non-voting attendees for Member meetings. At the Annual Meeting, the Members also approved the proposed 2018 Fiscal Budget, continued discussions on the sustainability plan and conducted other business.</p> <p>The CNYCC Board of Directors held its Annual Meeting in February 2018. Among other business the Board elected the 2018 Officers, advanced the slate of nominees referenced above for Member approval and reviewed and advanced the 2018 budget for the Members' Annual meeting. Otherwise, the Board of Directors and Committees continued to meet as usual, as reflected in the uploaded Meeting Schedule documentation. Current Directors and Committee members are reflected in our uploaded Contact Information documentation. CNYCC's organizational governance chart has not been amended this reporting period.</p>
Establish a clinical governance structure, including clinical quality committees for each DSRIP project	For Governance Milestone 2 ("Establish a clinical governance structure, including clinical quality committees for each DSRIP project"), during DY3 Q3 & Q4, CNYCC's behavioral health clinical quality subcommittee's charge was broadened to incorporate oversight of all CNYCC's performance outcome measures, not just those pertaining to behavioral health. The organization chart for the clinical governing body has not been updated. Otherwise, the Clinical Governance Committee continued to meet as usual (as reflected in the uploaded Meeting Schedule template).
Finalize bylaws and policies or Committee Guidelines where applicable	During DY3 Q3 and Q4 there were no amendments to CNYCC's Bylaws, a copy of which is uploaded. There were no changes to the policies or guidelines for governance of the Committees as set forth in the Bylaws. CNYCC leadership and the Corporate Members are having and facilitating the necessary discussions concerning post-DSRIP sustainability. Depending on the outcome of such discussions, amendments to the CNYCC Bylaws are likely to result. CNYCC shall provide updates as necessary in future reporting narratives.
Establish governance structure reporting and monitoring processes	For Governance Milestone 4 ("Establish governance structure reporting and monitoring processes"), during DY3 Q3 & Q4, CNYCC's new Director of Project Management & Performance Improvement redesigned the performance outcome reports that are shared with our partners & in Board and committee meetings depicting monthly DOH data updates of DSRIP Performance & Outcome Measures. While there remain slides depicting the number of patients actively engaged in each project, the focus of the report has shifted more strongly to those performance outcomes that are most valuable to the PPS and that are at risk of not reaching their annual improvement targets. CNYCC has also developed individual provider performance reports for those high-value, claims-based measures for our high attribution partner organizations which for the basis of performance improvement deep dives and rapid cycle improvement projects supported by CNYCC staff.
Finalize community engagement plan, including communications with the public and non-provider organizations (e.g. schools, churches, homeless services, housing providers, law enforcement)	For Governance Milestone 5 ("Finalize community engagement plan, including communications with the public and non-provider organizations (e.g. schools, churches, homeless services, housing providers, law enforcement)"), between DY3 Q3 & Q4, CNYCC continued to develop relationships in the community to provide awareness and education on DSRIP program goals and objectives. CNYCC presented and met with local representatives and organizations to broaden awareness of DSRIP activities and build relationships across the region.
Finalize partnership agreements or contracts with CBOs	For Governance Milestone 6 ("Finalize partnership agreements or contracts with CBOs"), during DY3 Q3 & 4, CNYCC continued to coordinate DSRIP activities with local Community Based Organizations. As part of a new approach to Funds Flow, CNYCC was able to engage CBO partners across the network in advance of upcoming Phase III funding . Attached is a copy of a template that outlines contracted CBO partners.
Finalize agency coordination plan aimed at engaging appropriate public sector agencies at state and local levels (e.g. local departments of health and mental hygiene, Social	For Governance Milestone 7 ("Finalize agency coordination plan aimed at engaging appropriate public sector agencies at state and local levels e.g. local departments of health and mental hygiene, Social Services, Corrections, etc."), during DY3 Q3 & Q4, CNYCC continued to coordinate DSRIP activities with local public sector agencies. Public sector agency representatives from each of CNYCC's six counties are active in DSRIP activities through their participation in the

Services, Corrections, etc.)	Executive Project Advisory Committee (EPAC). As the regional EPAC representative, agency staff coordinate Regional Project Advisory Committee meetings, assist CNYCC staff with engagement efforts with partner organizations in their respective regions, and support local project implementation efforts. The EPAC meets on a regular basis, while RPAC meetings occur in each county on a quarterly basis.
Finalize workforce communication and engagement plan	For Governance Milestone 8 (Finalize workforce communication and engagement plan), during DY3 Q3 & Q4, CNYCC's Workforce Committee met to discuss implementation efforts and progress towards meeting DSRIP Workforce goals and objectives.
Inclusion of CBOs in PPS Implementation.	For Governance Milestone 9 (Inclusion of CBOs in PPS Implementation), during DY3 Q3 & Q4, CNYCC continued to implement its CBO engagement strategy and work closely with local CBOs on project efforts and progress towards meeting DSRIP goals and objectives. In addition to finalizing contract agreements with CBO partners (see Governance Milestone #6), CNYCC conducts regular meetings with CBO partners via the Learning Collaborative to discuss implementation efforts and potential partnerships across the network to facilitate CBO participation throughout the region. CNYCC also works closely on integrating CBO participation through engagement efforts with the Human Services Leadership Council – HSLC – (coalition of leaders of nearly 65 human service not-for-profit agencies), individual engagement with CBO partners, and identification of additional CBO agencies for potential partnerships across the region.

✓ IPQR Module 2.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing your governance structure and processes and achieving the milestones described above, as well as potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

CNYCC has already seated the Board of Directors, appointed committees & committee chairs, and adopted bylaws. This puts the organization in a strong place with respect to governance going into the implementation phase. It is important that the Board, committees & RPACs focus on broad involvement of and input from the myriad of partners & community members that are impacted by the CNYCC projects.

Risk 1: Lack of meaningful participation of the Board, committees, partners, CBOs and community-at-large in CNYCC governance, planning, implementation, monitoring, and oversight. Potential Impact: The success of CNYCC will be dependent on the active & meaningful participation of everyone involved so that 1) CNYCC's efforts are informed by the full breadth of expertise and experience that exists in the region, 2) there is broad investment & buy-in across all partners, and 3) all participants are held accountable for the activities & outcomes that are produced by the CNYCC.

Risk 2: Lack of timely communication & decision-making is a challenge to successful CNYCC governance. Potential Impact: The CNYCC will make uninformed decisions or miss critical deadlines unless communication can flow freely & efficiently across all partners, particularly to Board members.

Risk 3: The formation of a new non-profit entity requires time and resources to allow members to adapt to new roles & responsibilities, form new relationships, and attend to internal functions, creating inefficiency with respect to monitoring and supporting CNYCC operations. Potential Impact: Without the necessary time & staff resources the CNYCC will not be able to properly embrace its charge, create the necessary infrastructure & operations, and implement effective and efficient projects.

Risk 4: As a new organization, the CNYCC lacks the full breadth of systems (program protocols, financial data management, human resources) necessary to fully support the leadership & functions of the organization. Potential Impact: Without the necessary systems in place, the CNYCC will not be able to appropriately engage its partners & support the development of effective programs.

Risk 5: The need to build stable relationships & trust with partners is essential. Strong partner engagement & communications efforts will be critical to building trust, facilitating collaboration, and ensuring successful project implementation. Potential Impact: Without the appropriate communication & trust, partners will not be fully engaged or informed about what they need to do to participate.

Risk 6: The CNYCC information systems & data tools are immature. Furthermore, technical expertise varies among partners. Potential Impact: Effective information systems will be the primary driver of CNYCC's success. Without effective & efficient information systems, the core elements of CNYCC implementation will not succeed.

Risk 7: The CNYCC lack strong data governance that will provide a framework in which pertinent clinical information can be aggregated & analyzed for partner and CNYCC performance. Data governance practices for each partner organization vary widely-we are still developing a systematic methodology for documenting & sharing the data that will be required to generate metrics of interest. Potential Impact: Without a strong IT Data

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Central New York Care Collaborative (PPS ID:8)

Governance structure in place, CNYCC will be unable to generate the necessary metrics for reporting requirements and manage outcomes.

Risk 8: Funds Flow from NYS: Due to our complicated funds flow arrangement with the State and SUNY, we have encountered significant delays in funds flow to our PPS. Continued issues with funds flow will jeopardize both CNYCC operations and our ability to disburse funds to partners to affect meaningful project implementation.

✓ IPQR Module 2.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The Governance workstream depends on most of the other workstreams to be able to fulfill its substantive ongoing policy and monitoring roles.

IT Systems and Processes – Coordination with the IT Systems and Processes workstream will be critical for monitoring clinical and financial performance utilizing real-time data and developing reporting dashboards that feed project and provider specific performance into DSRIP project quality workgroups, Board committees, and the Board of Directors. CNYCC benefits from a cadre of skilled members of the Board's IT and Data-Governance Committee who have extensive experience in IT and with the RHIO.

Performance Monitoring – Coordination with the Performance Monitoring workstream will be critical for monitoring clinical and financial performance utilizing real-time data and developing reporting dashboards that feed project and provider specific performance into DSRIP project quality workgroups, to the Clinical Governance Committee and to the Board of Directors to oversee performance in relation to goals and milestones.

Workforce – The Workforce Workgroup will provide monthly reports to the Board to ensure that the workforce is deployed appropriately in relation to the projects, that timely training and education is provided so that projects can be staffed appropriately, existing staff can be utilized to the greatest extent possible, and new staff can be brought up to speed quickly. Communication will be maintained with the unions and work force groups that are key stakeholders in the project.

Financial Sustainability and Funds Flow – The Financial Stability and Funds Flow workstreams provide critical information for monitoring the performance of providers so that the Finance Committee and the Board can effectively oversee the financial performance and stability of partners and the organization.

Practitioner Engagement – Coordination with Practitioner Engagement workstream is critical as full implementation of CNYCC is dependent on broad community engagement. This project depends on more than just buy-in; it relies on active championing of change. CNYCC has engaged consulting firms to assist in developing a consumer-engagement plan to promote participation and buy-in. CNYCC has developed a communications/engagement strategy for multiple constituencies that will aim to promote PPS activities and educate the public on DSRIP goals and

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

objectives.

Clinical Governance - Coordination of CNYCC projects with input from clinical staff will be an essential component of implementation and sustainability. The Clinical Governance committee includes representation from a wide-cross section of partner organizations within the PPS and provides the best opportunity to incorporate essential standards to meet the workflow needs of clinical staff.

Behavioral Health Clinical Sub Committee - Reports to the Clinical Governance Committee. This committee is inclusive of both behavioral health and medical staff that are primarily focused on the integration of primary care and behavioral health services within practice sites and other behavioral health project initiatives. This committee will provide surveillance of compliance with protocols and quality of care.

Central New York Care Collaborative (PPS ID:8)

✔ IPQR Module 2.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for the development of your governance structure and processes and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Oversight and Approval	CNYCC Board of Directors	Develop and approve policies related to CNYCC operations; monitor performance.
Oversight, Management, and Recommendations to the Board for Approval	Board Committees: Finance, Information Technology and Data Governance, Clinical Governance, and Nominating Committees, Workforce Committee	Develop performance tracking and information flow procedures; develop and propose policies and procedures to Board for approval; monitor activities and track impact and effectiveness.
Consumer Input and Guidance	1) Consumer Focus group, 2) Consumer Advisors	1) Feedback will be collected through a focus group involving consumers drawn from selected partner organizations throughout the service area. In addition, a representative group of consumer advocates will be recruited from partners across the service area who will provide input through on a periodic basis at CNYCC governance meetings (i.e., PICs, RPACs, EPAC, Board Committees, and the Board of Directors Meetings). These consumer advisory structures will allow the CNYCC to provide insight and guidance regarding consumer attitudes, perceptions, and care seeking behaviors.
Partner/Consumer Engagement	Regional Project Advisory Councils (RPACs)	The RPACs are the CNYCC Partners' link to the CNYCC staff and Board related to all DSRIP activities. The RPACs provide regional, interactive forum for education, problem solving, project implementation, community and consumer education, and relationship building. The RPACs also respond to queries from the Executive Project Advisory Council (EPAC). The RPAC may also create ad-hoc and/or ongoing smaller committee's to address particular DSRIP activities. Examples could include a committee to problem-solve around a project that is not being successful, or a committee to deep-dive into workforce issue. Staff or Committee representatives would report ongoing CNYCC activities at RPAC meetings.
Bi-directional Information Flow to Projects	Learning Collaboratives	Learning Collaboratives (LC) have replaced the previous Project Implementation Collaboratives and provide updates to partner organizations on the current performance status in each project. The LC's also provide the opportunity for review of partner workflow and changes based on Rapid Cycle Improvement

Central New York Care Collaborative (PPS ID:8)

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
		techniques. The LC model stresses cross-functional work across organizations and highlights best practices.
Management, Oversight, and Operations	Virginia Opihare, Executive Director; Joe Reilly, Chief Information Officer; Lauren Wetterhahn, Director Program Operations; BJ Adigun, Director of Communications and Stakeholder Engagement; Liz Fowler, Director of Resource Management; Laurel Baum, Chief Corporate Compliance Officer/General Counsel; Joseph Maldonado, MD, Chief Medical Officer; Sue Jessen, Director Project Management Office & Performance Improvement; Michael Riley, Director of Finance	Execute policies of Board; manage day-to-day operations of the organization; provide support and technical assistance to partners and projects; monitor performance and progress of projects and corporation; report to Board.
Human Resources (HR) and payroll support	Staff Leasing (Vendor)	Support the administration of HR and payroll activities for CNYCC staff
Communications and Stakeholder Engagement support	Director of Communications and Stakeholder Engagement/BJ Adigun and Manager of Communications, Community Development and Partner Education/Ray Ripple	Support related to CNYCC communications and stakeholder engagement.
Partner Engagement, Oversight, and Board Conduit to Partners	Executive Project Advisory Council (EPAC)	The EPAC is the partners' link to the CNYCC BOD. This committee monitors all aspects of the DSRIP process from the Partner perspective. EPAC monitors project performance and quality indicators, considers changes, tracks workforce needs, Partner performance (via review of individual partner, project and regional score cards) and fund distribution. The EPAC responds to queries from the BOD and/or Board Committees as well as communicates to the BOD and/or Board Committees issues/concerns/suggestions from the RPAC's.

✔ Module 2.6 - IPQR Module 2.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS with regard to your governance structure and processes.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Participating CNYCC provider and CBO Partners	Implementing projects and participating actively on the Board, Board Committees, EPAC, RPACs, and Project Implementation Collaboratives	Effective and efficient project implementation; active involvement in CNYCC governance activities and adherence to CNYCC policies in areas such as security, compliance, health literacy, and cultural competency.
External Stakeholders		
Consumers/Community	Engaging with the projects and organization	Participate in community-based CNYCC activities
Public Agencies – Local, County, State, and Federal	Participating in projects and promoting the organization	Engaging with CNYCC at the organization level to support its goals; participating in project-level activities as providers of services.
Professional/Provider Advocacy Organizations (i. e., HANYS, CHCANYS, NYAPERS, etc.)	Participating in projects and promoting the organization	Engaging with CNYCC

Central New York Care Collaborative (PPS ID:8)

✅ IPQR Module 2.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream and your ability to achieve the milestones described above.

Key challenges to implementing IT Governance will be:

1. Striking a balance between the partner individual interests and the interests of the overall CNYCC;
2. Balancing the large number of stakeholders with the need to implement rapidly; and
3. Communication of decisions and reasoning behind those decisions to a large number of stakeholders.

We plan to meet these challenges through an Information Technology and Data Governance Committee of the Board, through workgroups of that Committee and CNYCC staff. The Committee will be made up of Board members to provide alignment with partner priorities and non-Board members to provide information technology expertise and stakeholder collaboration. IT governance will be integrated within the overall governance of CNYCC. Policies related to IT that require Board approval as per the bylaws will be voted upon by the Board. Also it will be a key responsibility of a dedicated CNYCC Chief Information Officer (CIO) to promote appropriate two-way communication with partners. The CNYCC governance structure, including the Board Information Technology and Data Governance Committee, will provide a framework for policy approval and dispute resolution. A representative group of partners will have input and oversight over data sharing policies, confidentiality agreements, access to data by appropriate individuals for approved purposes, and other such issues.

It is also expected that Workgroups will be created to include non-Board IT personnel, subject matter experts, and key stakeholder representatives to set data definitions and interoperability standards, establish policies, and provide timely system performance feedback.

✅ IPQR Module 2.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

CNYCC governance success will be measured against timely achievement of the governance milestones. This includes finalizing and establishing the governance structure including development and operation of the Board, committees, and RPACs. Success will also be measured by the timely development and approval of the by-laws, adoption of pertinent policies such as compliance and under-performing provider policies and procedures and reporting processes that enable effective oversight of CNYCC performance.

The Board will require timely and detailed reports to enable them to assess the performance within each workstream and by each project, to identify areas of weakness and oversee development and implementation of corrective action. Through using dashboard and other reporting mechanisms, such as MAPP, and establishing rapid response mechanisms the Board will foster a "culture of quality" throughout CNYCC.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Central New York Care Collaborative (PPS ID:8)

The RPACs will focus on project performance and organizational success at the community level. This includes receiving data to monitor progress and performance of the projects in each of their regions. This data will demonstrate progress and performance by project, by provider, and by region. The CNYCC staff as well as subject matter experts will support the projects and RPAC committees. A CNYCC Project Manager who will report progress and performance metrics monthly to the CNYCC Executive Director will staff each of the RPAC committees. The Executive Director will assess the metrics against the project benchmarks and CNYCC PMO staff will report similar information to the Board's Clinical Governance and Financial Committees.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Finalize PPS finance structure, including reporting structure	For Financial Stability Milestone 1 ("Finalize PPS finance structure, including reporting structure"), during DY3 Q3 & Q4 there were no changes to CNYCC's financial structure. The Board and Finance Committee continued to meet as usual.
Perform network financial health current state assessment and develop financial sustainability strategy to address key issues.	For Financial Stability Milestone 2 ("Perform network financial health current state assessment and develop financial sustainability strategy to address key issues"), during DY3 Q3 & Q4, there were no changes to CNYCC's financial sustainability strategy. CNYCC's annual PPS-wide financial health assessment was launched in September 2017 and the de-identified results have been submitted with this milestone. The results were presented to CNYCC's Finance Committee & Board of Directors where it was determined that no further action (apart from ongoing monitoring) is required at this time.
Finalize Compliance Plan consistent with New York State Social Services Law 363-d	<p>During DY3 Q3 and Q4, CNYCC's Chief Compliance Officer, Laurel Baum (the "CCO"), continued to monitor the day-to-day operations of CNYCC's compliance program, including without limitation, monitoring CNYCC's confidential compliance hotline. The CCO continued to review CNYCC's compliance policies and procedures as needed.</p> <p>During this reporting period, documentation and process audits related to Partner reporting of actively engaged patients continued.</p> <p>In October 2017, the CCO presented to the Finance Committee a Compliance Review and Training Update.</p> <p>In December 2017, CNYCC submitted its required certifications to the Office of the Medicaid Inspector General (OMIG). Copies of CNYCC's Social Services Law (SSL) Certification and Deficit Reduction Act (DRA) Certification submitted to OMIG are uploaded.</p> <p>Also in December 2017, the CNYCC CCO provided a PPS-wide compliance training via webinar to our partners.</p> <p>For January 2018, CNYCC included for Phase II partner contracting, a Performance Activity requesting 1) partners post contact information for Medicaid beneficiaries to ask questions or submit complaints relating to DSRIP compliance; and 2) partners report to CNYCC regarding the status of the partner's SSL and DRA Certifications to OMIG, if applicable.</p> <p>The CCO continued to attend the CNYCC Board of Directors, Finance Committee and Compliance Committee meetings, which met in accordance with the CNYCC Bylaws and relevant policies.</p>
Develop a Value Based Payments Needs Assessment ("VNA")	For Financial Stability Milestone 4 ("Develop a Value Based Payments Needs Assessment ('VNA')"), during DY3 Q3 & Q4, there were no formal updates to CNYCC's assessment of the VBP needs of the PPS network partners. Following the announcement of the BHCC leads within CNYCC's service region, CNYCC has met repeatedly with each BHCC lead and, for 2 BHCCs, their network partners to gain an understanding of how those entities perceive their collective VBP needs. CNYCC plans to partner with the BHCCs in our region to coordinate VBP preparation activities, such as future assessments, and related investments, such as IT.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop an implementation plan geared towards addressing the needs identified within your VNA	For Financial Stability Milestone 5 ("Develop a VBP support implementation plan to address the needs of the PPS network partners as identified in the VNA"), during DY3 Q3 & Q4, CNYCC continued to execute our VBP support plan. Implementation of IBM Watson Health, CNYCC's selected Population Health Management system, continues on an accelerated schedule with all initial discovery efforts required to integrate the first cohort of partners' EHRs complete and data integrations either complete or underway for several. Additionally, CNYCC has rolled out of IBM Watson's Performance Management application to our pilot partner and continues efforts to program structured care management workflows within IBM Watson Care Manager with a set of pilot partner organizations.
Develop partner engagement schedule for partners for VBP education and training	For Financial Stability Milestone 6 ("Develop partner engagement schedule for partners for VBP education and trainings"), during DY3 Q3 & Q4, CNYCC made no changes or updates to the partner engagement schedule. CNYCC has implemented the DY3 trainings indicated in the schedule and a copy of that training schedule is submitted with this milestone.
Prepare VBP gap analysis to highlight partner needs that, if addressed, could improve readiness for VBP levels 1, 2, or 3.	<p>Individual VBRA reports including specific gaps and readiness scores have been shared with the facilities that participated in that process. An aggregate, de-identified version is submitted with this milestone to substantiate milestone completion.</p> <p>Please note that Milestone 7 was completed in DY3 Q3 as indicated in CNYCC's VBP Support Implementation Plan. However, the MAPP system requires milestones and tasks with statuses being updated to "Complete" to have end dates in the current reporting period. A screenshot of this error message is submitted with this milestone.</p> <p>Remediation Narrative:</p> <p>In its initial submission, CNYCC uploaded the summary report of the VBP gap analysis completed by CNYCC's consultants, ECG Management Consultants, based on their findings from individual interviews and focus groups with CNYCC partner organizations. In response to the IA's request for additional documentation, CNYCC is uploading to this milestone the individual reports for those high-attribution partner organizations that accepted the invitation to complete in-depth Value Based Readiness Assessments with ECG, with the exception of one organization that requested a non-disclosure agreement that bars CNYCC from releasing their results to a third party. These documents address two specific tasks: "Prepare individual reports for all applicable partners whom received an in-depth Value Based Readiness Assessment (VBRA)" and "Conduct Value Based Readiness Assessments (VBRA) with CNYCC partners that are most likely to serve as contracting entities."</p> <p>CNYCC is also uploading a document titled CNYCC Partner Strengths and Gaps Tracker, which contains the results of the individual VBRA's as well as ECG's assessment of the VBP-related strengths and gaps of partners that participated in group sessions with other like organizations. CNYCC is also uploading the interview guides used to facilitate these group sessions as well as the emails that were sent to participants and copies of the calendar events demonstrating that these sessions occurred during the reported time period. These documents address the task: "Conduct group sessions with CNYCC partner verticals to understand Value Based Readiness for CNYCC partners that will support regional VBP contracting efforts." Please note that ECG scheduled some events directly and for these, CNYCC is not providing the calendar invitations.</p>
Provide CNYCC pilot site with access to and implementation support for IBM Watson Performance Manager.	<p>CNYCC has completed Financial Stability Milestone 8. The agenda & post-training assessments for CNYCC's pilot site have been submitted with this milestone as evidence that they have been provided access to and implementation support for IBM Watson Performance Manager. One PPS-defined task ("Work with pilot partner to implement CNYCC's security and patient consent requirements.") has been put on hold as it was not required for the roll-out of the application with the data currently available to end users.</p> <p>Remediation Narrative:</p>

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	<p>In its initial submission, CNYCC uploaded the agenda for the full-day, onsite, intensive Super-User IBM Watson Health Enterprise Performance Manager (EPM) Training provided to employees of Auburn Hospital (our pilot site) by trainers from IBM & CNYCC along with the post-training assessments completed by the attendees. From CNYCC's perspective, receiving Super-User training constitutes the point at which Auburn Hospital received access to EPM. In response to the IA's request for additional documentation to further demonstrate that this milestone occurred, CNYCC is uploading screenshots from within EPM showing Auburn Community Hospital's EHR data available in the application as of March 2017 as well as screenshots of the Auburn Hospital users that have been provisioned access to the application. These individuals were granted access to Auburn's instance of EPM in the days preceding their Super-User training, as the training included hands-on practice within the application. The full presentation slide deck used during the 8-hr training has been uploaded to this milestone. CNYCC has held approximately weekly follow-up meetings with Auburn to provide post-training implementation support to their users; however, only one of these events was held between their training date and the end of Q4. These meetings are led by Sue Jessen, CNYCC's Director of Performance Improvement, and serve to assist Auburn's EPM users deploy the IBM Watson Health toolset to achieve their quality and financial goals as an organization. As evidence of this meeting (as well as the original Super-User EPM training), CNYCC is uploading the meeting invitations from CNYCC to Auburn Hospital as we lack a formal agenda because the discussion topics are set by the Auburn participants in attendance.</p> <p>Owing to limits on the length of this narrative, the detailed explanation requested by the IA for the tasks related to this milestone have been uploaded as an attachment to this milestone.</p>

Central New York Care Collaborative (PPS ID:8)

✓ IPQR Module 3.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

Risk 1: As a new organization CNYCC must build a sound financial management and reporting infrastructure.
Potential Impact: CNYCC financial success will depend on having a sound management and reporting infrastructure. Without it CNYCC will not be able to provide the on-going support its partners need, implement sustainable operations, oversee disbursement and expenditure of DSRIP funds, or meet its other obligations to the state.

Risk 2: Success will depend on the creating a new corporation from the ground up, which will be challenging and take time.
Potential Impact: Creating the new corporation will take time and resources, particularly at the outset, which could put CNYCC at a disadvantage as it works to meet the many demanding obligations from the state with respect to project development and implementation.

Risk 3: There may be a delay in distributing DSRIP funds to the partner organizations due to changing funds flow methodologies (public equity guarantee funds).
Potential Impact: Participating partners will either not be able to participate or will have to invest their own funds to develop the necessary operations, which could halt operations entirely or delay implementation.

Risk 4: Sharing financial information related to financial viability and developing plans for operational/financial improvement among sometimes competing organizations is often a sensitivity issue. Another risk is the lack of capitalization for providers across the system as they move to VBP contracts with Medicaid MCOs.

✓ IPQR Module 3.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The major dependencies across other workstreams related to Financial Sustainability are IT Systems and Processes, Clinical Integration, Workforce, Performance Reporting, and Governance.
Performance Reporting - CNYCC will implement a Decision Support System (DSS), a PHM platform, and a project management system that are

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Central New York Care Collaborative (PPS ID:8)

critical to success. This infrastructure will be critical to funds flow and to creating a financial stable, well-governed organization.

Governance - Strong governance will be essential. The Executive Director will report to the Board. The Compliance Committee will oversee CNYCC adherence to federal and state laws and regulations related to CNYCC financial reporting and compliance. The Finance Committee will oversee financial management of DSRIP fund disbursement and play a role in shaping the funds flow model, which will ultimately be approved by the Board.

Clinical Integration and Workforce - Clinical Integration and Workforce workstreams are also important dependencies for value-based payment success. Value-based payment, especially when it transitions to downside financial risk in future years, will pose a threat to the financial viability of the CNYCC partners unless fundamental changes are made to care delivery processes. These changes need to occur for the vast majority of patients not just for the most ill patients. These changes will include standardizing care processes to eliminate unproductive (and sometimes harmful) variation and waste, and increased and informed use of lower cost and sometimes more productive effective non-physician staff.

**New York State Department Of Health
 Delivery System Reform Incentive Payment Project
 DSRIP Implementation Plan Project**

Central New York Care Collaborative (PPS ID:8)

✔ IPQR Module 3.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Oversight and Approval	CNYCC Board of Directors	Monitor, review and ultimately approve funds flow model, CNYCC's financial systems, and operational pro forma; monitor funds flow operations
Oversight, Management, and Recommendations to the Board for Approval	CNYCC Director of Finance; Finance and Information Technology and Data Governance Committees of the Board	Develop, approve, and recommend funds flow model, CNYCC's financial systems, operational pro forma, and finance related policies to the Board; monitor funds flow operations overtime and report to the Board
Consumer Input	1) Consumer Focus group, 2) Consumer Advisory Workgroup	1) Feedback will be collected through regional workgroups involving consumers drawn from selected partner organizations throughout the service area. In addition, a representative group of consumer advocates will be recruited from partners across the service area who will provide input through on a periodic basis at CNYCC governance meetings (i.e., PICs, RPACs, EPAC, Board Committees, and the Board of Directors Meetings.) These consumer advisory structures will allow the CNYCC to provide insight and guidance regarding consumer attitudes, perceptions, and care seeking behaviors.
Partner Engagement, Oversight, and Board Conduit to Partners	Regional Project Advisory Councils (RPACs)	The RPACs are the CNYCC Partners' link to the CNYCC staff and Board related to DSRIP activities. The RPACs provide regional forums for an interactive process for education, problem solving, project implementation, community and consumer education, and relationship building. The RPACs also respond to queries from the Executive Project Advisory Council (EPAC). The RPAC may also create ad-hoc and/or ongoing smaller committee's to address particular DSRIP activities. Examples could include a committee to problem-solve around a project that is not being successful, or a committee to deep-dive into workforce issue. All committees would be required to formally report out at the monthly RPAC meetings.
Bi-directional Information Flow to Projects	Learning Collaboratives	Learning Collaboratives (LC) have replaced the previous Project Implementation Collaboratives and provide updates to partner organizations on the current performance status in each project. The LC's also provide the opportunity for review of partner

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Central New York Care Collaborative (PPS ID:8)

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
		workflow and changes based on Rapid Cycle Improvement techniques. The LC model stresses cross-functional work across organizations and highlights best practices.
Management, Oversight, and Expertise	Virginia Opipare, Executive Director; Joe Reilly, Chief Information Officer; Lauren Wetterhahn, Director Program Operations; BJ Adigun, Director of Communications and Stakeholder Engagement; Liz Fowler, Director of Resource Management; Laurel Baum, Chief Corporate Compliance Officer/General Counsel; Joseph Maldonado, MD, Chief Medical Officer; Sue Jessen, Director Project Management Office & Performance Improvement; Michael Riley, Director of Finance	Execute policies of Board; manage day-to-day operations of the organization; provide support and technical assistance to partners and projects; monitor performance and progress of projects and corporation; report to Board.
Policy/System development and oversight of finance-related workstreams	Finance Committee of the Board	Directly responsible for the development of CNYCC funds flow policies, financial systems, and operational budget/pro forma. Work with staff and consultants to direct, oversee, monitor, and review process and deliverables. Monitor macro-level funds flow from State and SUNY. Make final recommendations to Board of Directors for all finance-related policies, systems, processes, and budget/payments.
Review and comment on funds flow policies made by Finance Committee	Clinical Governance and Information Technology and Data Governance Committees of the Board	Review and comment on CNYCC funds flow policies and other relevant finance issues before they are sent too Board of Directors for Final Approval. Monitor funds flow operations overtime and report issues to Finance Committee and Board, as appropriate.
Partner/Consumer Engagement	Regional Project Advisory Councils (RPACs)	The RPACs are the CNYCC Partners' link to the CNYCC staff and Board related to all DSRIP activities. The RPACs provide regional, interactive forum for education, problem solving, project implementation, community and consumer education, and relationship building. The RPACs also respond to queries from the Executive Project Advisory Council (EPAC). The RPAC may also create ad-hoc and/or ongoing smaller committee's to address particular DSRIP activities. Examples could include a committee to problem-solve around a project that is not being successful, or a committee to deep-dive into workforce issue. Staff or Committee representatives would report ongoing CNYCC activities at RPAC meetings.
Partner Engagement, Oversight, and Board Conduit to Partners	Executive Project Advisory Council (EPAC)	The EPAC is the partners' link to the CNYCC BOD. This committee monitors all aspects of the DSRIP process from the Partner perspective. EPAC monitors project performance and quality indicators, considers changes, tracks workforce needs,

**New York State Department Of Health
 Delivery System Reform Incentive Payment Project
 DSRIP Implementation Plan Project**

Central New York Care Collaborative (PPS ID:8)

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
		Partner performance (via review of individual partner, project and regional score cards) and fund distribution. The EPAC responds to queries from the BOD and/or Board Committees as well as communicates to the BOD and/or Board Committees issues/concerns/suggestions from the RPAC's.
Management of Financial Operational Support	CNYCC Director of Finance - Michael Riley; Iroquois Health Alliance	Iroquois Health Alliance provides back office support and financial services, including accounts payable, accounts receivable, and other general accounting services
Financial Auditing Services	Audit Firm (2015 - Charles, Fust, Chambers LLP)	A Request for Proposal to provide auditing services was developed, distributed to selected potential vendors, posted on the CNYCC website, and posted in other public business forums on September 28, 2015. Once a vendor is identified, the Finance Committee and the Compliance Committee will identify an independent Workgroup to oversee the auditing process.

 Delivery System Reform Incentive Payment Project
 DSRIP Implementation Plan Project**

Central New York Care Collaborative (PPS ID:8)

✓ IPQR Module 3.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
All CNYCC Partner Organizations, including service providers and CBOs	Providing information and data to support funds flow distribution	Valid information and data supporting funds flow.
Consumers/Community	Engaging with the projects and organization	Participate in community-based CNYCC activities
External Stakeholders		
Public Agencies – Local, County, State, and Federal	Participating in the projects and promoting the organization	Engaging with CNYCC at the organization level to support its goals; participating in project-level activities as providers of services.
Professional/Provider Advocacy Organizations (i.e., HANYYS, CHCANYS, NYAPERS, etc.)	Participating in planning and development of funds flow model	Participating in planning and development of funds flow model
Medicaid Health Plans	Collaborate on development of VBP strategy	Information provided to inform VBP plan and ultimately negotiated contracts with the PPS.

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✅ IPQR Module 3.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

Shared IT infrastructure will be critical to the Funds Flow and Financial Stability workstreams. CNYCC will implement a Decision Support System (DSS) that will be used to: 1) manage funds flows; 2) facilitate budget planning; and 3) perform rules-based forecasting and modeling. A Project Management System that will be used for partner management, project management, performance management, and reporting will interface with the DSS and PHM platforms to ensure that the CNYCC will be driven by consistent, objective and measureable data. This will ensure that resources are utilized effectively and appropriately by CNYCC. Additionally, in the longer term, CNYCC will establish a comprehensive Population Health Management (PHM) platform to consolidate standardized clinical and administrative data from all eligible partners in order to: 1) centralize reporting functions; 2) perform advanced population health analytics including clinical and financial risk stratification; 3) develop patient registries to track at-risk populations and; 4) coordinate care across the continuum. The integration of claims and clinical data will allow identification of intra-PPS performance variation and cost and quality performance improvement opportunities. The continued use of this platform after the conclusion of the program will ensure that outcomes continue to be monitored and coordinated care delivery will remain in place so that the CNYCC is able to move toward a value-based payment system.

✅ IPQR Module 3.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Success of CNYCC is dependent on meeting milestones, including developing a finance structure, conducting an assessment, and developing a plan for PPS partner organizations' transition to value-based payments (VBP). Key measures of success will be meeting milestones and reporting requirements, as well as feedback from the Board, and Finance Committee regarding performance and operations. Success will be measured through five key measures which include: 1) the CNYCC finance department and finance committees are operational; 2) a Decision Support System (DSS) is operational and being utilized; 3) funds flow payments are being made to partners on timely basis; 4) internal controls are established to oversee funds flow and expenditures; and 5) a written VBP education & support plan that has general buy-in from the partners and health plans and that has been approved by the Board is in place. The DSS will support reporting on partner organizations' progress as relates to completing project milestones and funds flow distributions. Such reports will be reviewed by the Finance Committee to inform future decisions related to necessary changes to the funds flow model.

Section 04 – Cultural Competency & Health Literacy

✅ IPQR Module 4.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement. Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Note some milestones include minimum expected completion dates.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Finalize cultural competency / health literacy strategy.	Completed	This milestone must be completed by 12/31/2015. Cultural competency / health literacy strategy signed off by PPS Board. The strategy should: -- Identify priority groups experiencing health disparities (based on your CNA and other analyses); -- Identify key factors to improve access to quality primary, behavioral health, and preventive health care -- Define plans for two-way communication with the population and community groups through specific community forums -- Identify assessments and tools to assist patients with self-management of conditions (considering cultural, linguistic and literacy factors); and -- Identify community-based interventions to reduce health disparities and improve outcomes.	04/01/2015	12/31/2015	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	YES
Task 1A- Establish a CC/HL workgroup inclusive of CNYCC partners and community stakeholders to develop the CC/HL strategy. ✓ IPQR Module 4.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing your cultural competency / health literacy strategy and addressing the specific health disparities you are targeting (based on your CNA), and achieving the milestones described above - including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

The overall goal of improving health literacy and cultural competency is achieved bi-directionally through 1) a system of care delivery that is responsive to the cultures, language and literacy needs of an increasingly diverse patient population, and 2) a community of consumers who have the skills, motivation and trust to access and use the healthcare system that is available to them. Thus, this two-pronged plan will ultimately require interventions within each partner site (i.e. staff training, improving language access services, creating health literate discharge practices, etc.) and also within the community (i.e. community education programs, facilitated two-way communication with health care facilities, etc.). Establishing and maintaining the partnerships and mutual trust needed to achieve this two-way communication is not an easy process. The following are potential risks to achieving this goal and proposed mitigation strategies.

Risk 1: Partners will not have the time and/or resources to properly implement or participate in the cultural competency and health literacy trainings that will be required to transform provider practice.

Potential Impact: Without sufficient training, CNYCC partners will not be able to be fully responsive to the cultural and linguistic needs of its patients/consumers, potentially decreasing the effectiveness and quality of care that is provided.

Risk 2: The complexity of the CNYCC network and the sheer number and diversity of organizations that exist across CNYCC partnership create a need for multiple strategies.

Potential Impact: The complexity, size, and diversity of the partnership could lead to a strategy that does not fit everyone's needs and capacities.

Risk 3: Partnering with the large and diverse group of community partners that will be critical to reaching out to the target population may be a challenge.

Potential Impact: The complexity, size, and diversity of the target population and the program partners that serve the target population could lead to a strategy that does not fit everyone's needs and capacities.

✓ IPQR Module 4.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The success of the CC/HL strategy relies heavily on the Workforce and Practitioner Engagement workstreams, and vice versa.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

Workforce - Recruiting and hiring trained interpreters, translators, and community health workers, or similar types of service providers who may lead CC/HL efforts, will be essential in promoting and ensuring the goals of CC/HL. Additionally, CNYCC anticipates that CC/HL will be embedded into all hiring and workforce training activities.

Practitioner Engagement - The Practitioner Engagement workstream is also crucial to promoting the enhancement of CC/HL skills and capacities across the practitioner community. Actively engaged practitioners are necessary to achieve a culturally competent CNYCC and health literate community.

Community Outreach - Engagement with the general community, particularly audiences in regions experiencing health disparity, will be key to raise awareness and provide resources to enable effective two-way communication between clinical staff and patients for improved outcomes.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✔ IPQR Module 4.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Oversight and Approval	CNYCC Board of Directors	Develop and approve CC/HL and training strategies and monitor project performance related to CC/HL and reducing disparities among the target populations.
Oversight, Management, and Recommendations to the Board for Approval	Clinical Governance and Information Technology and Data Governance Committees; Workforce Workgroup; CC/HL Workgroup Sub-Committee	Develop performance tracking and information flow procedures that are relevant to CC/HL; monitor activities and track impact and effectiveness; develop and recommendations to Board regarding CC/HL and training strategies
Consumer Input and Guidance	1) Consumer Focus group, 2) Consumer Advisors	1) Feedback will be collected through a focus group involving consumers drawn from selected partner organizations throughout the service area. In addition, a representative group of consumer advocates will be recruited from partners across the service area who will provide input through on a periodic basis at CNYCC governance meetings (i.e., PICs, RPACs, EPAC, Board Committees, and the Board of Directors Meetings.) These consumer advisory structures will allow the CNYCC to provide insight and guidance regarding consumer attitudes, perceptions, and care seeking behaviors.
Partner Engagement	Regional Project Advisory Councils (RPACs)	The RPACs are the CNYCC Partners' link to the CNYCC staff and Board related to DSRIP activities. The RPACs provide regional forums for an interactive process for education, problem solving, project implementation, community and consumer education, health literacy/cultural competence, and relationship building. The RPACs also respond to queries from the Executive Project Advisory Council (EPAC). The RPAC may also create ad-hoc and/or ongoing smaller committee's to address particular DSRIP activities. Examples could include a committee to problem-solve around a project that is not being successful, or a committee to deep-dive into workforce issue. All committees would be required to formally report out at the monthly RPAC meetings.
Partner Engagement, Oversight, and Board Conduit to Partners`	Executive Project Advisory Council	The EPAC is the partners' link to the CNYCC BOD. This committee monitors all aspects of the DSRIP process from the Partner perspective, including issues related to health literacy/cultural competence. EPAC monitors project performance and quality

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
		indicators, considers changes, tracks workforce needs, Partner performance (via review of individual partner, project and regional score cards) and fund distribution. The EPAC responds to queries from the BOD and/or Board Committees as well as communicates to the BOD and/or Board Committees issues/concerns/suggestions from the RPAC's.
Bi-directional Information Flow to Projects	Learning Collaboratives (LCs)	Learning Collaboratives (LCs) have replaced the previous Project Implementation Collaboratives and provide updates to partner organizations on the current performance status in each project. The LC's also provide the opportunity for review of partner workflow and changes based on Rapid Cycle Improvement techniques. The LC model stresses cross-functional work across organizations and highlights best practices.
Focused expertise and support across a representative group of partners and stakeholders	CC/HL Workgroup	Responsible for developing CC/HL Strategic Plan.
Management, Oversight, and Expertise	Virginia Opipare, Executive Director; Joe Reilly, Chief Information Officer; Lauren Wetterhahn, Director Program Operations; BJ Adigun, Director of Communications and Stakeholder Engagement; Liz Fowler, Director of Resource Management; Laurel Baum, Chief Corporate Compliance Officer/General Counsel; Joseph Maldonado, MD, Chief Medical Officer; Sue Jessen, Director Project Management Office & Performance Improvement; Michael Riley, Director of Finance; Siti Mack, Manager for Workforce and Cultural Competency/Health Literacy	Execute policies of Board; manage day-to-day operations of the organization; provide support and technical assistance to partners and projects; monitor performance and progress of projects and corporation; report to Board.
Partner Input, Oversight, and Expert Guidance on Health Literacy and Cultural Competence	Health Literacy / Cultural Competence Workgroup	The Health Literacy and Cultural Competence Workgroup is responsible for developing the CNYCC's HL/CC Strategy and the HL/CC Training Strategy. The Workgroup was convened in September 2015 and will meet 6-8 times between in DSRIP Year 1 to plan, oversee, and provide expert guidance on the development of the two strategies referenced above. The Workgroup is being facilitated by Kari Burke, CNYCC's Interim HL/CC Coordinator. The Workgroup is being supported by the CNYCC staff and John Snow, Inc.

✓ IPQR Module 4.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
CNYCC Workforce Committee	Participate and collaborate in CC/HL and Training strategy development	Participate in assessment, planning, and training activities
All CNYCC Partner Organizations, Including Service Providers and CBOs	Partners with respect to service provision, community education and/or training activities	Participate in projects, share CC/HL resources, serve as CC/HL training other CC/HL resources
Consumers/Community	Engaging with the projects and organization	Participate in community-based CNYCC activities
External Stakeholders		
Local School Districts and Other Educational Institutions Including Community Colleges	Potential partner in community education and/or training activities	Share CC/HL resources; possibly serve as CC/HL trainers.
Organizations and Agencies Serving Refugees and New Immigrants	Potential partner in community education and/or training activities	Share CC/HL resources; possibly serve as CC/HL trainers.
Adult Education Programs Including Job Training and English for Speakers of Other Languages	Potential partner in community education and/or training activities	Share CC/HL resources; possibly serve as CC/HL trainers.
WIC Programs, Senior Centers and Other Health and Social Services Programs	Potential partner in community education and/or training activities	Share CC/HL resources; possibly serve as CC/HL trainers.
Libraries Including Public Libraries, School-based and Health Care Consumer and Medical Libraries	Potential partner in community education and/or training activities	Share CC/HL resources; possibly serve as CC/HL trainers.
AHECs and other local programs offering education and promotion programming	Potential partner in community education and/or training activities	Share CC/HL resources; possibly serve as CC/HL trainers.
NY State department of public health, office of minority health, county/local health agencies, and other governmental agencies	Potential partner in community education and/or training activities	Share CC/HL resources; possibly serve as CC/HL trainers.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✓ IPQR Module 4.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support the development and implementation of your cultural competency / health literacy strategy and the achievement of the milestones described above.

In order to effectively address the drivers of health disparities, CNYCC will need to identify the disparities that exist, as well as understand the populations that they impact. A shared IT infrastructure will support the identification of health disparities by enabling the aggregation of data from across localities and healthcare sectors, as well as the systematic analysis of that data to identify trends. Demographic, socio-economic and health literacy data that is captured and shared through this same infrastructure will allow CNYCC to characterize the populations that are most affected by these disparities, which will lead to developing interventions that are culturally appropriate. In addition, the CNYCC website will serve as a forum for sharing information and resources about CC/HL with all CNYCC partners. This will include maintaining an inventory of CC/HL resources that can be easily accessed as well as promoting CC/HL trainings.

✓ IPQR Module 4.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

CNYCC success is dependent on reaching two milestones related to CC/HL: the development of an overarching CC/HL strategy and training plan. The measure of success for this workstream is integrated with the larger goal of evolving the CNYCC toward a population health orientation that is person-focused. Understanding health disparities is critical to realizing this goal and CC/HL is a fundamental strategy for addressing these health disparities. Key measures of success will be meeting milestones and reporting requirements, as well as feedback from the Board regarding performance. Key indicators include progress in developing the strategies, which will ultimately receive Board approval.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s).	
Develop an IT Change Management Strategy.	
Develop roadmap to achieving clinical data sharing and interoperable systems across PPS network	
Develop a specific plan for engaging attributed members in Qualifying Entities	For the organizational section IT System and Processes, the original end date for Milestone 4 was extended from 12/31/2018 06/30/2018. This change was made as a result of the changes for task 5.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	<p>The original end date for Task 5 was extended from 12/31/2017 to 06/30/2018. This change was made to reflect the fact that additional time is needed to finalize the plans. While CNYCC views this milestone as an important effort, other higher priority IT planning efforts, including the data sharing roadmap, have delayed completion of this work. However, CNYCC has made some recent advancements in addressing this requirement. Specifically, our upcoming payment policies include a partner incentive to capture data that meets the requirements outlined in the National Standards for culturally and Linguistically Appropriate Services in Health and Health Care (CLAS) policy and practice standards. Capturing this data will allow PPS partners to develop a greater understanding of a patients cultural and linguistic characteristics and will aid in the identification of outcome disparities associated with these factors.</p>
Develop a data security and confidentiality plan.

✓ IPQR Module 5.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in creating and implementing your IT governance structure, your plans for data sharing across your network, your approach to data security and confidentiality, and the achievement of the milestones described above, including the potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Risk 1: Data governance practices for each partner organization vary widely, and there is currently no systematic methodology for documenting and sharing the data that will be required to generate metrics of interest. Key challenges to implementing IT Governance will be: 1) striking a balance between the interests of individual partners and the interests of the overall CNYCC and 2) communication of decisions and reasoning behind those decisions to a large number of stakeholders.

Potential Impact: Without a strong IT Data Governance structure in place, CNYCC will be unable to generate the necessary metrics for reporting requirements.

Risk 2: A challenge will be to balance the large number of partners with the need to implement rapidly.

Potential Impact: If there is a lack of coordination across partners, projects will not be implemented in alignment. This will impact the efficiency by which projects can be implemented.

Risk 3: Given the newness of CNYCC as an entity, it is necessary to efficiently establish infrastructure to support data security and confidentiality.

Potential Impact: Data security and confidentiality is critical to meeting ethical and regulatory regulations surrounding data sharing.

Risk 4: Given the large amount of data that has to be aggregated and analyzed to drive CNYCC operations and facilitate safe care transitions across the continuum, there are risks associated with the number of vendors that are represented in the CNYCC and their varying capabilities as it relates to interoperability. Additionally, there are risks associated with varying documentation practices across the partners that may lead to inconsistencies in the type or amount of data that is captured by each partner.

Potential Impact: Lack of data standardization will lead to delay in useful analytics.

Risk 5: There are competing priorities and resource constraints for partner organizations.

Potential Impact: If partners feel that the resources they have do not enable them to meet DSRIP project requirements they may not prioritize implementation of DSRIP projects.

Risk 6: CNYCC's role in support of regional VBP programming is still being finalized.

Potential Impact: The role that CNYCC is ultimately expected to play in support of regional VBP initiatives may impact our partners' willingness to share data with the CNYCC, as well as their support of expensive investments in a centralized PHM platform. In addition, there are other VBP initiatives (private CIN development and MSSP programs) that are already underway regionally. CNYCC is trying to align with these other initiatives, as we have a very large overlap in participating partners and functional requirements, however alignment may lead to delays in the

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

selection and implementation of our PHM infrastructure.

✅ IPQR Module 5.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Workforce – We will need to ensure that the workforce is adequately trained on new technologies and their associated functionality in order to ensure effective utilizations of the HIT solutions that are introduced as part of DSRIP. We will also need to ascertain partner capabilities with respect to tracking and delivering required training through a Learning Management System, or other data collection and reporting platform.

Financial Sustainability – Significant new applications will be required for the CNYCC. Initial system cost, implementation, and ongoing maintenance will be a significant portion of the CNYCC budget. The cost effectiveness of the IT solution will have a significant impact on the sustainability of the CNYCC.

Cultural Competency/Health Literacy – IT applications will need to be built to gather data that will identify cultural and health literacy factors such as language. Communication to attributed members generated from CNYCC IT applications may need to be sent in multiple languages and sensitive to cultural norms.

Population Health Management- All CNYCC projects are expected to need to leverage the Population Health Management infrastructure. As such, it will be important to map the project requirements against the chosen PHM system. Implementation of the system will similarly affect rollout timelines for each project.

Clinical Integration –The foundation provided by the HealtheConnections RHIO will provide CNYCC a significant head start toward integration. However, CNYCC is concerned about aligning requirements for the multiple EHRs from multiple vendors. This is expected to be an ongoing challenge. Use cases and processes that are defined as part of clinical integration will also serve as a driving force for IT solutions development.

Performance Reporting- CNYCC's ability to systematically generate consistent, dependable metrics to track performance improvement on aggregate and at the partner level will be heavily dependent on HIT. Specifically, the development of an HIT infrastructure to support data collection and aggregation, as well as strong data governance to ensure documentation and data standards are upheld among collaborating partners.

Practitioner Engagement- The requirement for partners to meet Meaningful Use and PCMH certification will be heavily dependent on practitioner adoption of new and existing technologies within each partner organization. In addition, the cost of the IT systems and resources required to achieve these certifications may be a significant barrier to practitioner buy-in.

Budget and Funds Flow – CNYCC has created a decision support system (DSS) that enables them to: manage funds flow; facilitate budget planning; and perform rules based forecasting and modeling. Used in conjunction with the performance data available through the MAPP tools provided by the State, as well as through the PHM platform, the DSS will enable the systematic alignment of incentives with performance.

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✓ IPQR Module 5.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Oversight and Approval	CNYCC Board of Directors	Approve budgets, expenditures, and key policies; assure regulatory compliance, IT governance oversight.
Oversight, Management, and Recommendations to Board for Approval	Information Technology and Data Governance Committee	Obtain consensus on system selection and management, policy formation, dispute resolution, change management oversight, security and risk management oversight, progress reporting.
Consumer Input and Guidance	1) Consumer Focus group, 2) Consumer Advisors	1) Feedback will be collected through a focus group involving consumers drawn from selected partner organizations throughout the service area. In addition, a representative group of consumer advocates will be recruited from partners across the service area who will provide input through on a periodic basis at CNYCC governance meetings (i.e., PICs, RPACs, EPAC, Board Committees, and the Board of Directors Meetings.) These consumer advisory structures will allow the CNYCC to provide insight and guidance regarding consumer attitudes, perceptions, and care seeking behaviors.
Partner input, technical input	Project Implementation Collaboratives(PICs)/Learning Collaboratives(LCs)	Develop system recommendations, project management, ongoing reporting.
Operational Management	CIO and Security Officer	Operation responsibility, implementation responsibility, data security responsibility, change management, data architecture definition, data security, confidentiality, data exchange standards definition, risk management, progress reporting.
Advisory and operational	CEO, CFO, CMIO, CNO of hospitals and other partner organizations	Provide input on impact of key CNYCC policies and decisions on partners. Implement internal changes in partner organizations needed to achieve DSRIP goals.
Advisory and operational	HealthConnections RHIO Director and staff	Provide input on impact of key CNYCC policies and decisions on the RHIO. Implement RHIO changes needed to achieve DSRIP goals. Data architecture, data security, confidentiality, data exchange input and operational responsibilities.
Advisory and operational	Chartis (formerly known as Aspen Group) and other vendors who provide technical input, and implementation support	Supply tools to enable outreach and analysis.
Management, Oversight, and Operations	Virginia Opihare, Executive Director; Joe Reilly, Chief Information Officer; Lauren Wetterhahn, Director Program Operations; BJ Adigun, Director of Communications and Stakeholder Engagement;	Execute policies of Board; manage day-to-day operations of the organization; provide support and technical assistance to partners and projects; monitor performance and progress of projects and

✓ IPQR Module 5.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
All CNYCC Partner Organizations, including service providers and CBOs	Advisory, operational, technical input	Provide input on impact of key CNYCC policies and decisions on partners. Implement internal changes in partner organizations needed to achieve DSRIP goals.
HealthConnections (RHIO)	Operational, technical input, advisory	Provide input on impact of key CNYCC policies and decisions on the RHIO. Implement RHIO changes needed to achieve DSRIP goals. Data architecture, data security, confidentiality, data exchange, input and operational responsibilities.
Consumers/Community	Engaging with the projects and organization	Participate in community-based CNYCC activities
External Stakeholders		
Vendors	"Technical input Advisory Regulatory "	Various activities based on scope of work and needs of CNYCC
Public Agencies – Local, County, State, and Federal	Participating in the projects and promoting the organization	Engaging with CNYCC at the organization level to support its goals; participating in project-level activities as providers of services. Provide advice, guidance, and decisions.
Other Regional Payers	Alignment of functional requirements across various payer based VBP initiatives	Joint engagement of shared partners, who are participants in multiple, regional VBP initiatives. Alignment of functional requirements and technical infrastructure.

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✓ IPQR Module 5.7 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

CNYCC success is dependent on reaching a series of milestones related to assessment and change management, as well as strategic planning with respect to data sharing, interoperability, and data security/confidentiality. The measure of success for this workstream is integrated with the larger goal of evolving the CNYCC toward a population health orientation that is person-focused. Assessing and developing strategies and change management plans that will allow partners and the CNYCC to collect, analyze, share, use patient information to manage the health of those in the service area is critical to realizing CNYCC goals. Success will rely on the following factors: 1) the CNYCC's HIT Department and Information Technology and Data Governance Committee is operational and working with the Clinical Governance Committee, the RPACs/EPAC, the Board of Directors, and other governance and oversight structures; 2) a Decision Support System (DSS) is operational and being utilized; 3) that patient, project-level, and CNYCC-level information is flowing between partners and to the CNYCC on a timely basis; 4) internal controls are established to oversee partner HIT/HIE related achievements, and 5) the development of sound plans with respect to data sharing, interoperability, and data security/confidentiality. The CNYCC will develop or use existing required measures in these areas and report on performance related to these measures.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Establish reporting structure for PPS-wide performance reporting and communication.	Upon attempting to submit this milestone as completed in DY3 Q3, the MAPP system generated an error message that required extending the end date of Milestone 1 into DY3 Q4, past its original end date of DY3 Q3 (screen short submitted with this milestone).
Develop training program for organizations and individuals throughout the network, focused on clinical quality and performance reporting.	In response to the IA's informal communication during the remediation period, CNYCC is extending the due date of the milestone to allow sufficient time to take steps to address the IA's feedback.

✓ IPQR Module 6.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing performance reporting structures and processes and effective performance management within your network, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Risk 1: One critical purpose of the performance reporting workstream is to build capacity and data use to improve quality and develop a culture of quality across the CNYCC through using data and rapid cycle evaluation. However, the learning curve for reporting data and the sheer number of data elements that need to be reported draw capacity away from using the data to inform quality improvement and for rapid cycle evaluation. Thus, there is a risk that partners will become more focused on reporting details than on developing a "culture of quality".

Potential Impact: To fall short on developing this culture of quality will mean that data collection becomes only a burden to partners and CNYCC without the value of using and acting upon data to drive quality improvement.

Risk 2: Although there will be a wealth of metrics available through the DOH to assess clinical quality, there are some metrics required for tracking that are not available through DOH. The CNYCC will use its Population Health Management (PHM) Platform to capture these metrics; however, the risk is in being able to collect these metrics from the partners. As with all reporting requirements, organizational capacity will play a role. Organizational capacity is dependent on organizational resources available, organizational leadership commitment, and organizational culture (most notably, how far along the path an organization is to having a "culture of quality").

Potential Impact: If CNYCC falls short on accurately collecting and reporting this subset of metrics, there is a risk that CNYCC will not achieve its performance goals.

Risk 3: Diversity in organizational and staff capacity to report on performance and conduct quality improvement: Some organizations will be very sophisticated regarding these activities and others will be less so. Additionally, staff members within organizations learn in different ways.

Potential Impact: Such diversity is a challenge when it comes to training. If CNYCC assumes the same training will be effective for all partners, some partners will become disengaged, and other partners will not have the information they need to improve quality outcomes and next quality goals.

✓ IPQR Module 6.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Performance Reporting will have interdependencies with all projects and the funds flow, information technology systems and processes, workforce, and governance workstreams.

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

IT Systems and Processes - The IT systems and processes workstream are interdependent with performance reporting given that the Population Health Management Platform will be used to collect and report out on the performance metrics. The Population Health Management Platform will be used to generate dashboards for partners as a quality improvement tool; developing the reporting capacity within the system for these dashboards will fall largely to the IT systems and processes workstream. Additionally, Domain 2 and 3 measures will be available through the State's Salient platform and will be integrated into the Population Health Management Platform for reporting "down" from the CNYCC staff to partners. The Population Health Management Platform used must also be consistent and compatible with the State's MAPP system.

Funds Flow - Performance reporting is interdependent with funds flow because a critical strategy within funds flow is to issue payments to partners based on performance. Additionally, there must be compatibility between the Project Management Platform and the Decision Support System, which will calculate funds flow to partners based, in part, on performance reporting.

Workforce - The workforce workstream and performance reporting are interdependent given the large training component within performance reporting. All CNYCC training falls under the auspices of the workforce workstream.

Governance - The governance and performance reporting workstreams are also interdependent in that the Board and its committees will be using data generated through performance reporting to assess progress of the CNYCC toward meeting its goals and using data to conduct rapid cycle evaluation at the CNYCC level.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✔ IPQR Module 6.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Oversight and Approval	CNYCC Board of Directors	Develop and approve performance monitoring and reporting systems and infrastructure
Oversight, Management, and Recommendations to the Board	Clinical Governance and Information Technology and Data Governance Committees of the Board	Develop performance tracking and information flow procedures that are relevant to performance measurement and reporting; monitor activities and track impact and effectiveness Provide vision and leadership to promote culture of excellence and vision of population health. Leverage clinical strengths and address clinical weaknesses to improve population health across CNYCC
Consumer Input and Guidance	1) Consumer Focus group, 2) Consumer Advisors	Feedback will be collected through a focus group involving consumers drawn from selected partner organizations throughout the service area. In addition, a representative group of consumer advocates will be recruited from partners across the service area who will provide input through on a periodic basis at CNYCC governance meetings (i.e., PICs, RPACs, EPAC, Board Committees, and the Board of Directors Meetings.) These consumer advisory structures will allow the CNYCC to provide insight and guidance regarding consumer attitudes, perceptions, and care seeking behaviors.
Partner Engagement, Oversight, and Board Conduit to Partners	Regional Project Advisory Councils (RPACs)	The RPACs are the CNYCC Partners' link to the CNYCC staff and Board related to DSRIP activities. The RPACs provide regional forums for an interactive process for education, problem solving, project implementation, community and consumer education, and relationship building. The RPACs also respond to queries from the Executive Project Advisory Council (EPAC). The RPAC may also create ad-hoc and/or ongoing smaller committee's to address particular DSRIP activities. Examples could include a committee to problem-solve around a project that is not being successful, or a committee to deep-dive into workforce issue. All committees would be required to formally report out at the monthly RPAC meetings.
Bi-directional Information Flow to Projects	Learning Collaboratives(LCs)	Learning Collaboratives (LC) have replaced the previous Project Implementation Collaboratives and provide updates to partner organizations on the current performance status in each project.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
		The LC's also provide the opportunity for review of partner workflow and changes based on Rapid Cycle Improvement techniques. The LC model stresses cross-functional work across organizations and highlights best practices.
Management, Oversight, and Expertise	Virginia Opipare, Executive Director; Joe Reilly, Chief Information Officer; Lauren Wetterhahn, Director Program Operations; BJ Adigun, Director of Communications and Stakeholder Engagement; Liz Fowler, Director of Resource Management; Laurel Baum, Chief Corporate Compliance Officer/General Counsel; Joseph Maldonado, MD, Chief Medical Officer; Sue Jessen, Director Project Management Office & Performance Improvement; Michael Riley, Director of Finance	Execute policies of Board; manage day-to-day operations of the organization; provide support and technical assistance to partners and projects; monitor performance and progress of projects and corporation; report to Board.
Clinical Oversight and Quality/Performance Improvement	Joseph Maldonado, MD, Chief Medical Officer; Clinical Governance Committee	Responsible for working with Clinical Governance Committee to oversee project implementation as well as develop and implement the PPS' Quality/Performance Improvement Plan

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✔ IPQR Module 6.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
All CNYCC Partner Organizations, Including Service Providers and CBOs	Advisory, operational, technical input	Provide input on impact of key CNYCC policies and decisions on partners. Implement internal changes in partner organizations needed to achieve DSRIP goals.
IT Staff Within Individual Provider Organizations	Reporting and IT system maintenance	Monitor, tech support, upgrade of IT and reporting systems.
External Stakeholders		
DOH	Using performance data to identify progress toward milestones	Determine extent to which CNYCC has achieved its goals for payment purposes.
Public Agencies – Local, County, State, and Federal	Participating in the projects and promoting the organization	Participating in the projects and promoting the organization
Consumers/Community	Engaging with projects and organization	Participate in community-based CNYCC activities

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✅ IPQR Module 6.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support your approach to performance reporting.

CNYCC will initially rely on claims-driven partner/provider metrics available within the MAPP Performance Measurement Portal, while clinical data-driven metrics will be reported by individual partners/providers from their local EHRs. CNYCC will begin implementing a Decision Support System (DSS) in DY1 that will be used to: 1) manage funds flows; 2) facilitate budget planning; and 3) perform rules-based forecasting and modeling. Additionally, by DY3, CNYCC will establish a comprehensive Population Health Management (PHM) platform to consolidate standardized clinical and administrative data from all eligible partners in order to: 1) centralize reporting functions; 2) perform advanced population health analytics including clinical and financial risk stratification; 3) develop patient registries to track at-risk populations and; 4) coordinate care across the continuum. The integration of claims and clinical data will allow identification of intra-CNYCC performance variation and cost and quality performance improvement opportunities. A Project Management Platform will also be implemented in DY1, which will be used for partner management, project management, and performance management and reporting will interface with the DSS and PHM platforms to ensure that the CNYCC will be driven by consistent, objective and measurable data that will ensure the effective and appropriate utilization of resources by the collaborative. The continued use of these platforms after the conclusion of the program will ensure that outcomes continue to be monitored and coordinated care delivery will remain in place and that CNYCC is able to move toward a value-based payment system.

✅ IPQR Module 6.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

CNYCC success is dependent on having a well-functioning Project Management Platform that interfaces with other key systems (e.g., Decision Support System, Salient platform, PHM platform, and MAPP) and yields credible data for reporting (from partners to CNYCC and from the CNYCC to partners) and quality improvement purposes. Key measures of success will be meeting milestones and reporting requirements and Board assessment of performance in relation to goals established. Specifically, key indicators of interest are establishing the Project Management Platform, percent of partners that use the system within one DSRIP quarter of being on-boarded, and percent of partners that engage in quality improvement activities (i.e., using data to identify need for improvement, engaging in change process, testing change, and spreading change when valuable).

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop Practitioners communication and engagement plan.	For Practitioner Engagement Milestone 1 ("Develop Practitioners communication and engagement plan."), during DY3 Q3-4, CNYCC continued efforts to engage practitioners across the network to advance DSRIP goals and objectives. Some of these efforts include: practitioner participation on the Clinical Governance Committee responsible for overseeing PPS care delivery, care coordination, quality standards, and the quality performance of DSRIP Projects; practitioner participation across multiple CNYCC Board and Committees and presentations on CNYCC's PHM System development.
Develop training / education plan targeting practitioners and other professional groups, designed to educate them about the DSRIP program and your PPS-specific quality improvement agenda.	For Practitioner Engagement Milestone 2 ("Develop training/education plan targeting practitioners and other professional groups, designed to educate them about the DSRIP program and your PPS-specific quality improvement agenda.) CNYCC continues to provide training and education to practitioners as part of its overall comprehensive engagement efforts across the PPS with input and feedback from both Clinical Governance and the Board of Directors. Examples of the training/education efforts have included: practitioner participation on the Clinical Governance Committee responsible for overseeing PPS care delivery, care coordination, quality standards, and the quality performance of DSRIP Projects; practitioner participation across multiple CNYCC Board and Committees; multiple presentations to local Medical Societies; meetings with local partner organizations and practitioner groups; training sessions conducted by CNYCC staff to partner organizations on topics such as DSRIP project requirements, reporting and standards of care; and consistent efforts to include practitioner feedback and input

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✓ IPQR Module 7.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the current level of engagement of your physician community in the DSRIP program and describe the key challenges or risks that you foresee in implementing your plans for physician engagement and achieving the milestones described above. Describe any potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Risk 1: Currently, practitioner engagement in DSRIP in CNYCC has been developed slowly. CNYCC has been able to develop relationships with practitioners across the PPS, but we have found it difficult to develop a comprehensive approach. As we move forward with practitioner engagement, a key element will be the participation of CNYCC's Chief Medical Officer to champion efforts and engagement with the practitioner community.

Potential Impact: Strategies to engage practitioners who are part of smaller groups or who are community-based have been less successful to date than desired. These practitioners are key to the success of CNYCC projects but also have less time available for DSRIP activities.

Risk 2: Going forward, one of the largest risks to successful implementation will be failing to find a balance between the convenience of online communication and education platforms, and the more in-depth involvement possible through logistically complicated in-person meetings.

Potential Impact: If the CNYCC relies entirely on online or remote learning strategies then some partners may not be as engaged as they need to be or absorb the information that they need to participate effectively in CNYCC projects

Risk 3: Failing to identify the right people within organizations for engagement, namely the practitioner champions, will impede implementation of the projects and reaching goals. Up to this point, CNYCC communications have been typically funneled through an administrative contact at each organization that was then responsible for passing information along to the relevant person(s). However, CNYCC's engagement and information needs are rapidly outgrowing this approach.

Potential Impact: If the right people within organizations are not identified these partners may become less engaged.

✓ IPQR Module 7.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Other organizational workstreams (Clinical Integration, Population Health Management, Financial Sustainability, Cultural Competency and Health Literacy, IT Systems and Processes, Performance Reporting, and Funds Flow) will generate the content which must be successfully communicated to practitioners and should incorporate practitioner feedback whenever possible.

Workforce and Governance - Workforce and Governance workstreams will present venues for practitioner leadership and engagement in decision-

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

making. We expect robust practitioner participation on the Clinical Governance committee and the Workforce Workgroup. The Clinical Governance Committee of the Board is involved in overseeing & monitoring clinical aspects of CNYCC's 11 projects and approving the practitioner training plan. The Workforce workgroup will assist in the assessment of the human resource impacts of health system transformation under DSRIP, changes that will most certainly impact clinicians. Any strategies to address these impacts will require their input and buy-in. Front-line clinicians as well as clinical quality professionals will provide crucial input on project activities and project funding models to ensure that they drive the desired changes in our attributed population's clinical & service utilization outcome variables.

IT Systems and Processes – Continuous coordination with IT Systems and Processes workstream is particularly important because the characteristics of the CNYCC network, namely its large geographic size, relatively small portion of direct physician employment compared to other regions of the State, and uneven levels of engagement between employed and independent physicians makes true clinical integration, coordination of IT systems and processes, and successful population health management particularly challenging. Lack of familiarity with each other and with CNYCC and the resultant lack of trust related to the same network characteristics may make funds flow and performance reporting (as it relates to funds flow and the differential administrative burden upon large versus small organizations) challenging as well.

Clinical Governance - Coordination with CNYCC's Clinical Governance Committee will play a vital role in full engagement and relationship with Practitioners across the PPS. Full engagement will enable a smoother transition to DSRIP activities and project participation. Including but not limited to: workstream modification, care coordination, patient interaction and quality improvement.

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✓ IPQR Module 7.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Oversight and Approval	CNYCC Board of Directors	Develop and approve practitioner engagement activities
Oversight, Management, and Recommendations to the Board	Clinical Governance and Information Technology and Data Governance Committees of the Board	Develop and approve practitioner engagement activities
Consumer Input and Guidance	1) Consumer Focus group, 2) Consumer Advisors	1) Feedback will be collected through a focus group involving consumers drawn from selected partner organizations throughout the service area. In addition, a representative group of consumer advocates will be recruited from partners across the service area who will provide input through on a periodic basis at CNYCC governance meetings (i.e., PICs, RPACs, EPAC, Board Committees, and the Board of Directors Meetings.) These consumer advisory structures will allow the CNYCC to provide insight and guidance regarding consumer attitudes, perceptions, and care seeking behaviors.
Partner Engagement	Regional Project Advisory Councils (RPACs)	The RPACs are the CNYCC Partners' link to the CNYCC staff and Board related to DSRIP activities. The RPACs provide regional forums for an interactive process for education, problem solving, project implementation, community and consumer education, and relationship building. The RPACs also respond to queries from the Executive Project Advisory Council (EPAC). The RPAC may also create ad-hoc and/or ongoing smaller committee's to address particular DSRIP activities. Examples could include a committee to problem-solve around a project that is not being successful, or a committee to deep-dive into workforce issue. All committees would be required to formally report out at the monthly RPAC meetings.
Partner Engagement, Oversight, and Board Conduit to Partners	Executive Project Advisory Council	The EPAC is the partners' link to the CNYCC BOD. This committee monitors all aspects of the DSRIP process from the Partner perspective. EPAC monitors project performance and quality indicators, considers changes, tracks workforce needs, Partner performance (via review of individual partner, project and regional score cards) and fund distribution. The EPAC responds to queries from the BOD and/or Board Committees as well as communicates to the BOD and/or Board Committees

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✔ IPQR Module 7.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
CNYCC Partner Organizations' Practitioner Workforce	Target audience for communication/engagement plan & training/education plan; source of on-the-ground experience to inform project implementation	Participate in interviews and other engagement opportunities, attend trainings and complete pre- and post-training evaluation materials.
Workforce Strategy Workgroup	Development and oversight of CNYCC-wide workforce strategy & DSRIP impacts	On-going assessment of CNYCC-wide workforce's training/educational needs.
Patients, Both uninsured, Medicaid members, and those with other sources of insurance	Represent patient concerns based on own experience of care	Receive care from practitioners in our CNYCC whose levels of engagement may vary.
External Stakeholders		
Local Chapters of State or National Professional Organizations	Represent concerns and interests of members	Audience for CNYCC communications and engagement activities.
Unions Representing Practitioners	Represent concerns and interests of members	Audience for CNYCC communications and engagement activities.

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✅ IPQR Module 7.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

The CNYCC website; email lists; webinar calendar, registration, and archives; and survey functions will be important to the success of the practitioner engagement strategy. Professional group-specific web pages with tailored content, identification of professional groups' representatives to the CNYCC Board of Directors and board committees, and professional group email list sign-up information will provide an online space for peer engagement and be a resource for relevant information.

Standard performance reporting and the success of the clinical integration elements of selected projects are heavily dependent upon the success and timely progress of the broader CNYCC HIT/HIE strategy and infrastructure. In the short term, rapid adoption and accurate use of the project management platform for reporting of Domain 1 project process metrics will be key. In the longer term, increased EHR interoperability, RHIO participation, and adoption of the CNYCC's population health management platform and its true integration into providers' day-to-day practices will be essential for attainment of our Domain 2, 3, and 4 measure goals.

✅ IPQR Module 7.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

CNYCC success is dependent on meeting milestones, including the development of plans for engagement, communication and education of practitioner partners. Plans for these practitioner communication, engagement, training, and education activities will need to be informed and refined overtime by feedback from participating partners and practitioners. These plans will also need to be developed and refined based on changing conditions and DSRIP requirements. Key measures of success will be meeting milestones, reporting requirements, and speed and scale elements (i.e. patient activation and provider ramp-up). Key reporting indicators will include progress in engaging partners and practitioners in RPAC meetings, PIC meetings, project collaboratives, and other training activities. Additionally, CNYCC will conduct periodic engagement surveys of our CNYCC's practitioners and provide venues for more open-ended feedback, including at RPAC meetings and regular performance presentations to the professional groups. CNYCC and the current workforce vendor, AHEC, are in discussions regarding shared responsibility for tracking and reporting training requirements related to DSRIP, including those described above. AHEC intends to provide this resource across the PPSs where it has been contracted. This may facilitate progress reporting as it relates to CNYCC's practitioner training/education plan. CNYCC's close working relationship with AHEC also presents opportunities to incorporate tracking other aspects of practitioner engagement through their ongoing and CNYCC workforce-strategy specific activities.

Develop population health management roadmap.	<p>For the organizational section Population Health Management, the original end date for Milestone 1 was extended from 12/31/2017 to 6/30/18. This change was made as a result of the changes made to Task 9.</p> <p>The original start date for Task 9 was extended from 12/31/2017 to 6/30/18. CNYCC's PHM roadmap was originally scheduled for BOD approval in November, 2016. However, after onboarding our CMO a decision was made to enhance our planning around addressing the priority areas for NYS's Prevention Agenda. CNYCC has completed a second analysis to evaluate the impact of ethnicity (in addition to race). However, this analysis did not provide additional meaningful insights that were expected. CNYCC will be reconvening all applicable internal stakeholders to finalize this milestone ASAP.</p>
Finalize PPS-wide bed reduction plan.

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✓ IPQR Module 8.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

Risk 1: Not all service providers utilize meaningful use certified EHRs, which will lead to further fragmentation of services and poor coordination.
Potential Impact: PCMH Level 3 recognition as well as appropriate care planning, care coordination, health information exchange, and information flow between providers will not be possible unless eligible providers have meaningful use certified EHRs that are capable of facilitating the necessary care planning, care coordination, and information sharing.

Risk 2: Centralized data analytics and PHM platform implementation timeframe.
Potential Impact: Given that the DSRIP program is rapidly coming to a close, our ability to enhance and inform the performance management of CNYCC's pay-for-performance measures is diminishing. While the infrastructure that we are developing will have a lasting impact on VBP readiness and support, we want to make sure that we maximize the opportunities that are available to the PPS as part of the DSRIP initiative.

Risk 3: CNYCC must ensure that there is a strong data governance structure that will provide a framework in which pertinent clinical information can be aggregated and analyzed for partner and PPS performance. Data governance practices for each partner organization vary widely, and there is currently no systematic methodology for documenting and sharing the data that will be required to generate metrics of interest.
Potential Impact: Without a strong IT Data Governance structure in place, CNYCC will be unable to generate the necessary metrics for reporting requirements.

Risk 4: The care provided by participating practices could be uncoordinated and reactive rather than a data-driven, PHM approach that promotes integrated, well-coordinated care across partners.
Potential Impact: Without a coordinated PHM approach, individual practices and providers could be providing guideline-driven, evidenced-based care to patients but that care could be provided in silos leading to an inefficient, uncoordinated, duplicative response overall.

Risk 5: CNYCC's role in support of regional VBP programming is still being finalized.
Potential Impact: The role that CNYCC is ultimately expected to play in support of regional VBP initiatives may impact our partners' willingness to share data with the CNYCC, as well as their support of expensive investments in a centralized PHM platform. In addition, there are other VBP initiatives (private CIN development and MSSP programs) that are already underway regionally. CNYCC is trying to align with these other initiatives, as we have a very large overlap in participating partners and functional requirements, however alignment may lead to delays in the selection and implementation of our PHM infrastructure.

✓ IPQR Module 8.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

"The most significant dependencies with respect to other workstreams relate to:

IT Systems and Processes - All CNYCC projects are expected to need to leverage the base Population Health infrastructure. As such, it will be important to map the project requirements against the chosen Population Health Management system. Implementation of the system will similarly affect timelines for rollout of each project.

Clinical Integration - Clinical Integration is an essential component of population health management. Without full clinical integration, a population health vision and strategy cannot be obtained; this requires that stakeholders engaged in these two workstreams coordinate and collaborate in their efforts. "

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✔ IPQR Module 8.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational work stream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Oversight and Approval	CNYCC Board of Directors	Develop and approve population health management and bed reduction strategies as appropriate
Oversight, Approval, and Recommendations to the Board	Clinical Governance and Information Technology and Data Governance Committees of the Board	Develop and approve population health management and bed reduction strategies as appropriate Oversee implementation of population health management platform
CNYCC Board of Directors Sub-committee on Bed Reduction and Transformation Planning (as-needed)	TBD	Oversee and approve bed reduction and transformation planning plans across hospital partners
Consumer Input and Guidance	1) Consumer Focus group, 2) Consumer Advisors	1) Feedback will be collected through a focus group involving consumers drawn from selected partner organizations throughout the service area. In addition, a representative group of consumer advocates will be recruited from partners across the service area who will provide input through on a periodic basis at CNYCC governance meetings (i.e., PICs, RPACs, EPAC, Board Committees, and the Board of Directors Meetings.) These consumer advisory structures will allow the CNYCC to provide insight and guidance regarding consumer attitudes, perceptions, and care seeking behaviors.
Partner Engagement	Regional Project Advisory Councils (RPACs)	The RPACs are the CNYCC Partners' link to the CNYCC staff and Board related to DSRIP activities. The RPACs provide regional forums for an interactive process for education, problem solving, project implementation, community and consumer education, and relationship building. The RPACs also respond to queries from the Executive Project Advisory Council (EPAC). The RPAC may also create ad-hoc and/or ongoing smaller committee's to address particular DSRIP activities. Examples could include a committee to problem-solve around a project that is not being successful, or a committee to deep-dive into workforce issue. All committees would be required to formally report out at the monthly RPAC meetings.
Partner Engagement, Oversight, and Board Conduit to Partners	Executive Project Advisory Council	The EPAC is the partners' link to the CNYCC BOD. This committee monitors all aspects of the DSRIP process from the Partner perspective. EPAC monitors project performance and

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
		quality indicators, considers changes, tracks workforce needs, Partner performance (via review of individual partner, project and regional score cards) and fund distribution. The EPAC responds to queries from the BOD and/or Board Committees as well as communicates to the BOD and/or Board Committees issues/concerns/suggestions from the RPAC's.
Bi-directional Information Flow to Projects	HIT Project Implementation Collaborative (PIC)/ Learning Collaboratives (LCs)	Project Implementation Collaboratives (PICs) were developed in DY1Q1 and supported CNYCC's project implementation planning process. Learning Collaboratives (LCs) have replaced the previous Project Implementation Collaboratives and provide updates to partner organizations on the current performance status in each project. The LC's also provide the opportunity for review of partner workflow and changes based on Rapid Cycle Improvement techniques. The LC model stresses cross-functional work across organizations and highlights best practices.
Management, Oversight, and Expertise	Project manager for population health management	Oversee development and implementation of population health management and bed reduction strategies as appropriate
PHM Platform Vendor	Key partner in implementing PHM platform	Technical assistance in implementing and maintaining platform

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✅ IPQR Module 8.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
All CNYCC Partner Organizations, including service providers and CBOs	Advisory, operational, technical input	Provide input on impact of key CNYCC policies and decisions on partners. Implement internal changes in partner organizations needed to achieve DSRIP goals.
External Stakeholders		
MCOs	Key partner in payment reform	Collaborate in PPS payment reforms (VBP) in line with VBP roadmap; provide insight into population health management approach to be implemented across Forestland PPS
Consumer/Community	Engaging with the projects and organizations	Participate in community-based CNYCC activities
Other Regional Payers	Alignment of functional requirements across various payer based VBP initiatives	Joint engagement of shared partners, who are participants in multiple, regional VBP initiatives. Alignment of functional requirements and technical infrastructure

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✓ IPQR Module 8.7 - IT Expectations

Instructions :

Please describe the current Population Health Management IT capabilities in place throughout your PPS network and what your plans are at this stage for leveraging these capabilities and/or developing new IT infrastructure.

"1) Core Application Systems: CNYCC will establish a core application system enablement program focused on the penetration and effective utilization of the technologies required to capture and consolidate the data needed to successfully implement PHM strategies. Most notably is the acquisition and implementation of a dedicated PHM platform. This net new community investment will enable collaborative care planning across the continuum, including real-time access to pertinent clinical information to facilitate safe transitions of care, as well as maintaining a shared, multidisciplinary care plan that will be accessible to all members of a patient's care team. The PHM platform will also enable analytics for prospective and predictive modeling to support clinical, fiscal, and operational decisions and ensure that high risk and high utilizing patients can be proactively managed. This will also allow for monitoring and measuring the effectiveness of the projects implemented by the DSRIP, providing a critical feedback mechanism to the collaborative. Registry functionality available through the PHM platform will enable tracking target populations, including performance on the quality and outcome measures defined by the DSRIP initiatives, as well as other indicators that are deemed appropriate as program development evolves. Finally, the PHM platform will enable roles, and rules-based reporting, facilitating access to actionable data for CNYCC partners.

2) Interoperability, Connectivity and Security: The current HIT infrastructure of CNYCC is characterized by a well-established HIE via the HealthConnections RHIO. Securely connecting stakeholders to allow access to consolidated patient data and enable information sharing will be accomplished through the RHIO. Functions provided by the RHIO include creating standard patient identification, transforming and standardizing data from multiple points of origin, "pushing" summary data to connected physicians, managing the exchange of unstructured data (i.e. Images/RAD), and providing alerts to CNYCC providers. Information is currently shared with the RHIO by all of CNYCC's hospitals, some of the ambulatory providers, and a majority of the diagnostic centers (lab and radiology) in the region. Access to this information is facilitated through a web-based portal that is available to any provider with appropriate consent, as well as through results delivery. As part of this project, CNYCC and the RHIO will collaborate to establish additional bi-direction, real-time, and near real-time data transmission from and to all eligible providers.

3) Engagement Technologies: Data consolidated in the RHIO will be available to eligible providers through the existing web-based portal. In addition, the selected PHM solution will provide role-based access to consolidated data for all providers across the continuum of care. The PHM solution will also facilitate engagement across all areas of the care continuum and assist in managing outreach to target populations.

✓ IPQR Module 8.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

CNYCC success is dependent on meeting milestones including developing a population health roadmap and finalizing a plan for dealing with bed reductions. Key measures of success will be meeting milestones and reporting requirements as well as Board assessment of performance in

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

relation to established goals. Key reporting indicators of interest will include progress in developing these plans. Additionally, CNYCC will report on progress in conducting regular needs assessments, the results of which inform strategic planning and population health strategies.

IPQR Module 8.9 - IA Monitoring

Instructions :

Perform a clinical integration 'needs assessment'.	rei11466	Implementation Plan & Periodic Updates	8_DY3Q4_CI_MDL91_PRES1_IMP_Clinical_Integration_Milestone_1_DY3Q4_19242.docx	Quarterly Milestone update file.	04/16/2018 04:07 PM

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Perform a clinical integration 'needs assessment'.	
Develop a Clinical Integration strategy.	<p>For the organizational section Clinical Integration, the original end date for Milestone 2 was extended from 12/31/17 to 6/30/18. This change was made as a result of the changes made to Task 3a.</p> <p>The end date for task 2 was changed from 12/31/17 to 1/1/18. This task was made to accommodate the requirement that the task end date be in this reporting period in order to change the status to "Completed".</p> <p>The status for task 3 was changed to "on-hold". This task was replaced with task 3a, which reflects the fact that the clinical integration strategy will be vetted approved by CNYCC's Clinical Governance Committee and not our Board of Directors. However, as is the case with all Committee decisions, the Board of Directors will be informed.</p> <p>Task 3a was added to replace the original task 3. The end date for task 3a was extended from 12/31/17 to 6/30/18. This change is reflective of two primary considerations: 1) CNYCC gathered a substantial amount of information from our clinical integration needs assessment, it has taken more time than expected to turn that information into meaningful insights that can be leveraged to drive our strategy; 2) CNYCC's Population Health Management infrastructure is the lynchpin to our Clinical Integration strategy, a tremendous amount of work has been done to develop this infrastructure and in recent months, we have started onboarding partners, which has included the development an refinement of our training strategy that is a key element to this milestone.</p>

✓ IPQR Module 9.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in improving the level of clinical integration throughout your network and achieving the milestones described above. Describe potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

CNYCC has identified four major risks as outlined below. These risks are not unique to clinical integration. They are risks inherent in systems transformation more broadly. Risk mitigation strategies for clinical integration are part of the risk mitigation strategies to be employed overall by CNYCC.

Risk 1: As CNYCC moves toward transforming its health delivery system to a population health vision, it is essential to transform the system based on how it can best serve patients through providing the highest quality care at the right time and in the right setting for the patient. There is a risk, however, that the system does not develop in a way that supports person-centeredness.

Potential Impact: Not developing a system that is person-centered would mean falling short of a full population health approach. A critical component of person-centeredness is understanding the social determinants of health, such as poverty, culture, race/ethnicity, educational attainment, and housing status.

Risk 2: The shift toward a population health focus will take time.

Potential Impact: Without achieving a shared population health vision, CNYCC will not be able to fully reform its service system to be sustainable post-DSRIP.

Risk 3: Full clinical integration can only be achieved with the leadership and buy-in of the practitioner community. Clinical integration depends on practitioners working across disciplines and organizations on behalf of their patients.

Potential Impact: Without practitioner leadership to promote practitioner buy-in to clinical integration across the CNYCC, full clinical integration will not be achieved, which ultimately will compromise the capacity of CNYCC to achieve its goals.

Risk 4: Although organizational workstreams and projects are reported on separately for the Implementation Plan, CNYCC is acutely aware that they are all interrelated. Coordination across other organization workstreams and projects is essential.

Mitigation: The Clinical Governance Committee, reporting to and advising the Board of Directors, will have members knowledgeable of all other organizational workstreams and all 11 projects. Part of their role will be to oversee the coordination of clinical integration with these other workstreams and projects.

✓ IPQR Module 9.4 - Major Dependencies on Organizational Workstreams

Instructions :

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Clinical integration will have interdependencies with all workstreams and all projects. However, the most critical workstreams are IT systems and processes, practitioner engagement, cultural competency/health literacy, funds flow, and population health management.

IT Systems and Processes - A first dependency is with IT Systems and Processes, especially as relates to clinical data sharing and interoperable systems across the CNYCC network. This will be facilitated by the RHIO and the Population Health Management (PHM) Platform to be established by the CNYCC. The clinical integration strategic plan will be shared with the IT Data Governance Committee to ensure that the PHM platform accommodates clinical integration needs. The Clinical Governance Committee and the IT Data Governance Committee will work closely throughout the DSRIP project.

Practitioner Engagement - Engaging practitioners in understanding and championing population health is part of the clinical integration strategy. Enabling the Clinical Governance Committee members to work with those involved with the practitioner engagement workstream will ensure coordination between these two areas. In addition, RPACs may also serve as a practitioner engagement strategy and a forum for discussion of clinical integration.

Cultural Competency/Health Literacy - As noted, understanding and addressing social determinants is critical for clinical integration. A social determinants approach in the work of the CNYCC, including the clinical integration work, is essential to achieving patient centeredness and population health goals. Social determinants also form the basis for the CC/HL strategy. Drawing on the CC/HL strategies will be essential for the clinical integration work.

Funds Flow - Funds flow strategies must incentivize clinical integration. Those working in the clinical integration workstream must have input into the Finance Committee to ensure these incentives.

Population Health Management - Clinical integration is an essential component of population health. Without full clinical integration, a population health vision and strategy cannot be obtained; thus, these requiring that stakeholders engaged in these two workstreams coordinate and collaborate in their efforts.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✓ IPQR Module 9.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Oversight and Approval	CNYCC Board of Directors	Review Clinical Integration strategy
Oversight, Approval, and Recommendations to the Board	Clinical Governance Committee of the Board	Review and approve Clinical Integration strategy
Consumer Input and Guidance	1) Consumer Focus group, 2) Consumer Advisors	Feedback will be collected through a focus group involving consumers drawn from selected partner organizations throughout the service area. In addition, a representative group of consumer advocates will be recruited from partners across the service area who will provide input through on a periodic basis at CNYCC governance meetings (i.e., PICs, RPACs, EPAC, Board Committees, and the Board of Directors Meetings.) These consumer advisory structures will allow the CNYCC to provide insight and guidance regarding consumer attitudes, perceptions, and care seeking behaviors.
Partner Engagement	Regional Project Advisory Councils (RPACs)	The RPACs are the CNYCC Partners' link to the CNYCC staff and Board related to DSRIP activities. The RPACs provide regional forums for an interactive process for education, problem solving, project implementation, community and consumer education, and relationship building. The RPACs also respond to queries from the Executive Project Advisory Council (EPAC). The RPAC may also create ad-hoc and/or ongoing smaller committee's to address particular DSRIP activities. Examples could include a committee to problem-solve around a project that is not being successful, or a committee to deep-dive into workforce issue. All committees would be required to formally report out at the monthly RPAC meetings.
Partner Engagement, Oversight, and Board Conduit to Partners	Executive Project Advisory Council	The EPAC is the partners' link to the CNYCC BOD. This committee monitors all aspects of the DSRIP process from the Partner perspective. EPAC monitors project performance and quality indicators, considers changes, tracks workforce needs, Partner performance (via review of individual partner, project and regional score cards) and fund distribution. The EPAC responds to queries from the BOD and/or Board Committees as well as communicates to the BOD and/or Board Committees issues/concerns/suggestions from the RPAC's.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Bi-directional Information Flow to Projects	HIT Project Implementation Collaborative (PIC)/ Learning Collaboratives (LCs)	Project Implementation Collaboratives (PICs) were developed in DY1Q1 and supported CNYCC's project implementation planning process. Learning Collaboratives (LCs) have replaced the previous Project Implementation Collaboratives and provide updates to partner organizations on the current performance status in each project. The LC's also provide the opportunity for review of partner workflow and changes based on Rapid Cycle Improvement techniques. The LC model stresses cross-functional work across organizations and highlights best practices.
Management, Oversight, and Expertise	CNYCC Project manager for Clinical Integration (TBD); CNYCC Chief Medical Officer	Project Manager will work with CIO and other CNYCC Staff to oversee development and implementation of Clinical Integration strategies as appropriate
Oversee Clinical Integration Workstream Activities/Workplan	Clinical Governance Committee; CNYCC Chief Medical Officer	Assign CNYCC staff to oversee development of clinical integration needs assessment and strategic plan; appoint workgroup to fulfill activities; coordinate with IT systems and processes, practitioner engagement, CC/HL, funds flow, and population health workstreams.
HIT/HIE Functionality in Relation to Clinical Integration	IT Data Governance Committee CNYCC HIT/HIE staff	Ensure Population Health Management Platform addresses needs of clinical integration workstream
Monitor and Support of Clinical Integration Strategies	IT Data Governance Committee, CNYCC Project Management Staff, RPACs ,CNYCC Chief Medical Officer	Leverage strengths and address weaknesses in clinical integration at regional level; generate buy-in among providers to clinical integration strategic plan

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✔ IPQR Module 9.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
All CNYCC Partner Organizations, including service providers and CBOs	Advisory, operational, technical input	Provide input on impact of key CNYCC policies and decisions on partners. Implement internal changes in partner organizations needed to achieve DSRIP goals.
CNYCC Partner Contacts and Subject Matter Experts Participating in Clinical Integration Activities	Participation in planning and implementation activities	Participation in planning and implementation activities
Practitioners	Practitioner's buy-in is essential to the success of this workstream	Engage with and remain current on activities of the CNYCC with regard to Clinical Integration, including through the website, participating in RPACs, and participating in any trainings in this area
External Stakeholders		
Consumers/Family Members/Caregivers/Community	Receiving improved care and health outcomes due to better clinical integration`	Improved health status; high satisfaction with care
CBOs	Provide services related to social determinants of health, which are essential for achieving full clinical integration on behalf of patients	Work with clinical providers to fulfill non-clinical needs of patients

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✅ IPQR Module 9.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

Clinical integration will be dependent upon access to, and exchange of, pertinent clinical and administrative information among collaborating CNYCC partners. The current HIT infrastructure of the CNYCC is characterized by a well-established HIE via the HealtheConnections RHIO. Securely connecting stakeholders to allow access to consolidated patient data and enabling information sharing will be accomplished through the RHIO. Functions provided by the RHIO include creating standard patient identification, transforming and standardizing data from multiple points of origin, "pushing" summary data to connected practitioners, managing the exchange of unstructured data (i.e. images/RAD), and providing alerts to CNYCC providers. Currently all of the CNYCC hospitals, some ambulatory providers, and a majority of diagnostic centers (lab and radiology) in the region are sharing information with the RHIO. Access to this information is facilitated through a web-based portal that is available to any provider with appropriate consent, as well as through results delivery. As part of this project, CNYCC and the RHIO will collaborate to establish additional bi-direction, real-time, and near real-time data transmission from and to all eligible providers. Point-to-point communications to facilitate transitions of care are currently accomplished through the use of direct protocols, a HIPAA compliant mode of exchange adopted by EHR vendors as part of Meaningful Use (MU) stage 2. This real time mode of exchange is widely available across the CNYCC region, with 71% of eligible providers on the SureScripts network compared to 21% for the rest of the state. Web-based, secure messaging portals that support Direct will be made available to partners without EHRs, or whose current EHRs are not MU certified to facilitate the secure exchange of information among all applicable CNYCC partner organizations.

CNYCC will also establish a core application system enablement program focused on the penetration and effective utilization of the technologies required to capture and consolidate the data needed to successfully implement clinical integration strategies. Most notably is the acquiring and implementing a dedicated population health management platform. This net new community investment will enable collaborative care planning across the continuum, including real-time access to pertinent clinical information to facilitate safe transitions of care, and to maintain a shared, multidisciplinary care plan that will be accessible to all members of a patient's care team. The PHM platform will also enable analytics for prospective and predictive modeling to support clinical, fiscal, and operational decisions and ensure that high risk and high utilizing patients can be proactively managed. This will also allow monitoring and measuring the effectiveness of the projects implemented by the DSRIP initiative, providing a critical feedback mechanism to the collaborative. Registry functionality available through the PHM platform will enable tracking target populations, including their performance on the quality and outcome measures defined by the DSRIP initiatives, as well as other indicators that are deemed appropriate as clinical program development evolves.

✅ IPQR Module 9.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

CNYCC success is dependent on meeting milestones, including conducting a clinical integration needs assessment and developing a strategy specifically for clinical integration. The CNYCC will report on progress in achieving these milestones by tracking required outcome/process

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

measures as well as by tracking the CNYCC's efforts to meet the steps detailed in the organizational plan. Critical to the CNYCC's success in this area will be working with the CNYCC Project Implementation Collaboratives (PICs) to explore opportunities for integration and synergies across projects that can be achieved through clinical integration. Once identified, these opportunities will be incorporated into the Clinical Integration Strategy along with clear measures to track progress. These measures will be tracked overtime and reported to the RPACs/EPAC, Clinical Governance Committee, the Board of Directors, and to the DOH through the quarterly reports. In addition, Domain 2 and 3 metrics will be tracked as part of regular CNYCC/DSRIP activities and will allow the CNYCC to track and report indirectly on clinical integration progress to the extent that project success will depend on appropriate integration of services across settings and projects.

IPQR Module 9.9 - IA Monitoring:

Instructions :

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

Section 10 – General Project Reporting

✅ IPQR Module 10.1 - Overall approach to implementation

Instructions :

Please summarize your intended approach to the implementation of your chosen DSRIP projects, including considerations around how this approach will allow for the successful development of concurrently implementing DSRIP projects.

CNYCC's approach to implementation is rooted in 4 core functions: Strategic engagement and education; Building upon partner strengths; Transparency and communication; and Accounting for regional differences.

Strategic engagement and education: Execution of the Project Implementation Plan will require a strategic approach to partner engagement. To this end, CNYCC will develop a partner "onboarding" process. The process will include an organizational readiness assessment to categorize partner ability to reach patient and implementation speed goals set forth in the Project Plan Application as well as to identify the training and technical assistance needed to address gaps in partner capacity. More specifically the onboarding assessment approach will assess partner and CNYCC readiness to participate in projects and to meet speed and scale obligations; identify complexities to participation that can potentially be mitigated by the CNYCC; capture vital information that will inform the onboarding process and ongoing work, and; further promote partner engagement, bi-directional information flow, and relationship building.

Building on strengths: Based upon the assessment, CNYCC will develop a strategic "onboarding" process to engage partners that are innovators and early adopters as well as establish capacity building strategies for moderate adopters and lagging adopters. The assessment process will also provide an opportunity to identify areas for TA/support that can be provided directly by peer organizations or through experts.

Transparency and communication: CNYCC will develop a portal on its website to catalog and make available information on implementation science and best practices both focused on overall clinical and delivery system change as well as project specific support materials. The existing CNYCC website provides a venue for sharing information, archiving recorded webinars and implementation plans, and fostering open dialog between PPS partners. The current approaches with which CNYCC has been engaged will be further utilized to this end. These have included conducting webinars, pushing information and notices out to the CNYCC listserv and the CNYCC newsletter. Regional Project Advisory Committees (RPACs, described below) will provide another opportunity to promote transparency and communication.

Accounting for regional differences: The RPACs are the Network Partner link to CNYCC and DSRIP activities. They provide forums for an interactive process for education, problem solving, local focus and project implementation and ongoing success, community and consumer education on services, and relationship building. The RPAC may also create ad-hoc and/or ongoing smaller subcommittees to address particular DSRIP activities, address challenges or leverage partner expertise for the betterment of the entire partner network. Examples could include a subcommittee to problem-solve around a project that is not being successful, or a subcommittee to conduct deep-dive into workforce issue. All subcommittees would be required to formally report out at RPAC meetings.

✅ IPQR Module 10.2 - Major dependencies between work streams and coordination of projects

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

Instructions :

Please describe how your approach will handle interdependencies between complementary projects, as well as between projects and cross-cutting PPS initiatives - for example, an IT infrastructure upgrade, or the establishment of data sharing protocols.

Implementing and managing the eleven CNYCC projects is complex as the number of requirements, associated tasks and dependencies are abundant. In particular, there are several work streams that require coordination and ongoing monitoring to assure resources and staffing are distributed appropriately and are flexible enough to respond to changing needs, unforeseen challenges, and partner workload. These include: 1) Developing an HIT infrastructure that is responsive to the needs and timing of each project, including overarching projects such as 2ai. Alerts, messaging, population health management, reporting and PCMH requirements will require a strategic roll out of the HIT strategy. 2) Workforce approaches, particularly those focused on training and recruitment, require understanding the need for new staff and the amount of time for recruitment. Many projects require adding staff, particularly in mental health, care management, and primary care staff. Given the high demand and scarcity of these health professionals CNYCC will need to anticipate workforce needs and partners will need to begin the recruitment process well in advance of project staffing needs. Additionally, a timed roll out of training strategies to minimize impact on staff time will be coordinated. 3) Quality improvement and rapid cycle improvement strategies will drive the success of the CNYCC's efforts. DSRIP is predicated on the use of process and performance metrics that will be used to monitor progress, guide performance improvement efforts, and hold the CNYCC and its partners accountable. As will be discussed in greater detail elsewhere, CNYCC is establishing a robust HIT infrastructure and performance management system that will be utilized to drive quality improvement efforts. CNYCC will track and monitor performance at the project- and partner-level. These will be based in large part on reporting requirements established by the DOH. In addition, the CNYCC will provide specialized training and technical assistance to instill a cultural of quality among its partners that will ultimately help to ensure that the highest quality care is provided, in a culturally appropriate, person-centered manner. 4) The CNYCC governance and staffing structure has been defined to coordinate the development and approval of clinical and operational protocols and guidelines. While the centralized approach will assure coordination of activities and content, final operating and clinical guidelines will be vetted with CNYCC partners before submission to the Board or other relevant governing body for approval. CNYCC will utilize Performance Logic's DSRIP Tracker as its project management platform to provide adequate oversight of project activities, track dependencies, manage project resources, and maintain agility in correcting project trajectories or mitigating unexpected events. DSRIP Tracker will assist the management team in adjusting the implementation approach to avoid extreme peaks and troughs of activities that may prove overly burdensome for the CNYCC management team or for partners engaging in multiple projects. In instances where peaks of activities cannot be mitigated by adjusting the implementation approach, utilization of DSRIP Tracker allows for the early identification and mobilization of additional resources (staff, consultants and vendors) in order to minimize the disruptive impact on CNYCC and the partner organizations. Furthermore, CNYCC is exploring the extent to which DSRIP Tracker can assist with collection of documentation/verification of implementation activities.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✔ IPQR Module 10.3 - Project Roles and Responsibilities

Instructions :

Please outline the key individuals & organizations that play a role in the delivery of your PPS's DSRIP projects, as well as what their responsibilities are regarding governance, implementation, monitoring and reporting on your DSRIP projects.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Workforce	Manager for Workforce and Cultural Competency/Health Literacy/Siti Mack; Northern and Central Area Health Education Center Program/Anita Merrill	Assist in the developing and implementing a comprehensive workforce development plan.
PCMH planning support	Karen Joncas, CCE; Joseph Maldonado, MD, Chief Medical Officer (CNYCC)	Assist in the developing and implementing a PCMH strategy
Engagement and Education	Virginia Opipare, Executive Director; Joe Reilly, Chief Information Officer; Lauren Wetterhahn, Director Program Operations; BJ Adigun, Director of Communications and Stakeholder Engagement; Liz Fowler, Director of Resource Management; Laurel Baum, Chief Corporate Compliance Officer/General Counsel; Joseph Maldonado, MD, Chief Medical Officer; Sue Jessen, Director Project Management Office & Performance Improvement; Michael Riley, Director of Finance	Assist in the developing and implementing an engagement and education approach.
Project Management	Sue Jessen, Director Project Management Office & Performance Improvement; Joe Reilly (CNYCC's CIO) and staff TBD.	<p>CNYCC staff will be responsible for project management and the mobilization of resources to assure timely and effective implementation.</p> <p>Staff provide a link between the Board of Directors and DSRIP projects as well as have primary responsibility for reporting and communication with NYDOH</p> <p>Oversight of the clinical quality committees for individual projects</p> <p>Day-to-Day management of progress against Project requirements</p>

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✔ IPQR Module 10.4 - Overview of key stakeholders and how influenced by your DSRIP projects

Instructions :

In the below table, please set out who the key stakeholders are that play a major role across multiple DSRIP projects. Please give an indication of the role they play and how they impact your approach to delivering your DSRIP projects.

Key stakeholders	Role in relation to this organizational workflow	Key deliverables / responsibilities
Internal Stakeholders		
Clinical Governance Committee	Clinical and quality oversight	Oversees development of evidence-based, standardized protocols, metrics, and clinical performance goals for projects across the system
Compliance Committee	Compliance oversight	Oversees CNYCC compliance program and conduct in terms of adherence to DSRIP requirements and laws, and regulations applicable to PPS activities and operations, including health care privacy.
Finance Committee	Financial oversight	Oversees CNYCC and project budgets, reporting and financial performance; reviews project expenditures and assists in financial analysis for value based reimbursement
IT/Data Governance Committee	HIT strategy implementation oversight	Oversees activities and vendors to create, implement, and use HIT/HIE infrastructure
Executive Project Advisory Committee	Engagement and performance	Works with Regional Project Advisory Committees to engage stakeholders. Oversees project performance and advises CNYCC (through the Clinical Governance Committee) on recommendations for project implementation.
Regional Patient Advisory Committees	Engagement, Education, Implementation	Serves as an advisory entity and offers recommendations and feedback on CNYCC initiatives including DSRIP project implementation.
Bi-directional Information Flow to Projects	HIT Project Implementation Collaborative (PIC)/ Learning Collaboratives (LCs)	Project Implementation Collaboratives (PICs) were developed in DY1Q1 and supported CNYCC's project implementation planning process. Learning Collaboratives (LCs) have replaced the previous Project Implementation Collaboratives and provide updates to partner organizations on the current performance status in each project. The LC's also provide the opportunity for review of partner workflow and changes based on Rapid Cycle Improvement techniques. The LC model stresses cross-functional work across organizations and highlights best practices.
Regional Project Advisory Committees	Performance and Engagement	RPACs will be a critical element of the project performance monitoring process and will provide input on regional variations

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
		impacting project implementation. They will also provide a forum for public engagement.
Workforce Committee	Workforce strategy Implementation	Oversees activities and vendors to create, implement, and track Workforce Strategy for PPS
Behavioral Health Clinical Quality Sub Committee	Oversight and surveillance of compliance with protocols and quality of care	Representative of medical and behavioral health staff with a focus on integration of primary care and behavioral health services within practice sites and behavioral health project initiatives
External Stakeholders		
Northern and Central Area Health Education Center Program	Workforce	We have engaged AHEC to assist in the development and implementation of a comprehensive workforce development plan.
Prevention Coalitions/PHIP	Project Implementation Support	PHIP will assist in engaging county prevention coalitions related to Domain 4 projects.
Labor Unions	Workforce	Assist in workforce planning activities.
Regional and County Mental Health, Public Health, Alcohol and Substance Abuse Services Agencies	Project Implementation Support	State and county agencies are participating in CNYCC Regional Project Advisory Council meetings to inform and facilitate integration across PPS partners
HealtheConnections	Qualified Entity/RHIO/Health Information Exchange	HealtheConnections is the Regional Health Information Organization with which will assist CNYCC in developing an integrated system through information sharing strategies.

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✓ IPQR Module 10.5 - IT Requirements

Instructions :

Information technology will play a crucial role in the development of an effective, integrated performing provider system. It is likely that most projects will require some level of supporting IT infrastructure. Please describe the key elements of IT infrastructure development that will play a role in multiple projects.

- 1) Core Application Systems: CNYCC will establish a core application system enablement program focused on the penetration and effective utilization of the technologies required to capture and consolidate the data needed to successfully implement Population Health Management (PHM) strategies. Most notably is the acquisition and implementation of a dedicated PHM platform. This new community investment will enable collaborative care planning across the continuum, including real-time access to clinical information to facilitate transitions of care, and maintaining a shared, multidisciplinary care plan that will be accessible to all members of a patient's care team. The PHM platform will also enable analytics for predictive modeling to support clinical, fiscal, and operational decisions and ensure that high risk patients can be proactively managed. This will also allow for monitoring and measuring the effectiveness of the projects implemented by the DSRIP initiative thereby providing a critical feedback mechanism to the collaborative. Registry functionality available through the PHM platform will enable the tracking of target populations, including performance on the quality and outcome measures defined by the DSRIP initiatives, as well as other indicators that are deemed appropriate as the program evolves. Finally, the PHM platform will enable roles, and rules-based reporting, facilitating access to actionable data for CNYCC partners. In recognition of the fact that the PHM platform will only be as robust as the data that that is used to populate it, the CNYCC's core application systems enablement program will also focus on standardizing electronic health record (EHR) environments across eligible provider's offices. These efforts will include aligning existing EHR vendor capabilities around DSRIP and PHM goals, as well as a facilitated vendor selection process by which the CNYCC will help its partners without EHRs to identify robust vendor solutions.
- 2) Interoperability, Connectivity and Security: Securely connecting stakeholders to allow access to consolidated patient data and enable information sharing will be accomplished through the HealtheConnections RHIO. Functions provided by the RHIO include creating standard patient identification, transforming and standardizing data from multiple points of origin, "pushing" summary data to connected physicians, managing the exchange of unstructured data (i.e. Images/RAD), and providing alerts to CNYCC providers. Direct protocols will also be utilized for point-to-point connections to exchange clinical documentation to facilitate transitions of care. HealtheConnections, web-based, secure messaging portals that support Direct will be made available to partners without EHRs to facilitate the secure exchange of information among all applicable CNYCC partner organizations.
- 3) Engagement Technologies: Data consolidated in the RHIO will be available to eligible providers through the existing web-based portal. In addition, the selected population health management solution will provide role-based access to consolidated data for all providers across the continuum of care. Execution of this three-pronged strategy will ensure that the HIT and HIE infrastructure available to the CNYCC will provide a framework that enables the creation of a highly functioning integrated delivery network. It will also maximize the reach and efficacy of all of the projects that are being implemented as part of the DSRIP initiative.

✓ IPQR Module 10.6 - Performance Monitoring

Instructions :

Please explain how your DSRIP projects will fit into your development of a quality performance reporting system and culture.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

The CNYCC staffing structure will include individuals assigned to overseeing project implementation, monitoring and continuous quality improvement of projects and implementation activities. Each staff member will work with a committee of stakeholders consisting of partner representatives engaged in each of the 11 projects. CNYCC staff will report to and collaborate with the IT and Data Governance and Clinical Governance Committees to develop a strategy to consolidate quality metrics and measures utilizing an IT strategy. The Project Advisory Committee and its quality improvement structure will use the resulting data to provide performance feedback and inform learning collaborative baseline data, and to report to the Clinical Governance Committee and the Board of Directors regarding quality performance.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✓ IPQR Module 10.7 - Community Engagement

Instructions :

Please describe your PPS's planned approach for driving community involvement in the DSRIP projects, how you will contract with CBOs for these projects, how community engagement will contribute to the success of the projects, and any risks associated with this.

As part of the organizational onboarding process described previously CNYCC will engage CBOs by conducting a readiness assessment, developing training and TA approaches, providing supportive partner onboarding, and executing contracts that delineate CBO responsibilities and the financial and non-financial support that will be provided by the CNYCC.

Community engagement will be accomplished with a multi-level approach. The CNYCC has several key audience and stakeholder groups throughout its regional network. Various communication strategies will need to be executed to effectively engage each constituency including:

General Awareness/Promotion Campaign to establish CNYCC as a lead organization/healthcare resource in the region and promote program activities and relationship with Partner Network. The General Awareness Campaign will utilize a combination of General Advertising; Marketing; Public Relations; and Earned Media to reach out into the community. In addition to the General Public Awareness Campaign outlined above, CNYCC will work closely with Community Based Organizations to identify education and awareness building opportunities via public presentations, conferences, and other venues to help spread the word and increase CNYCC's presence in the community.

CNYCC has also established Regional Project Advisory Committees (RPACs) that will provide opportunities for community involvement and input. The RPACs are a key PPS partner link to CNYCC and DSRIP activities. They provide forums for an interactive process for education, problem solving, community and consumer education on services, and relationship building. The RPACs also respond to queries from the EPAC. The RPAC may create ad-hoc and/or ongoing smaller committee's to address particular DSRIP activities. Examples could include a committee to problem-solve around a project that is not being successful, or a committee to deep-dive into workforce issue. All such ad-hoc committees would be required to formally report out at the quarterly RPAC meetings. The CNYCC staff as well as subject matter experts will support the RPACs. The CNYCC will also develop a comprehensive partner education and engagement strategy and consumer focus groups (TBD) will be convened to inform CNYCC activities, including the overall engagement approach.

Finally, CNYCC will continue to utilize effective outreach platforms (ex. website, newsletter, public presentations etc.) to provide resources, information, and updates that promote a culture of communication and transparency across all partners, providing a venue for sharing information, archiving recorded webinars and implementation plans, and fostering open dialog between PPS partners and the community.

IPQR Module 10.8 - IA Monitoring

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

Section 11 – Workforce

✅ IPQR Module 11.1 - Workforce Strategy Spending (Baseline)

Instructions :

Please include details on expected workforce spending on a semi-annual basis. Funds may be shifted from one funding type category to another within the workforce strategy spending table, as long as the PPS adheres to their overall spend commitments. However, the PPS may apply a 25% discount factor to the DY1 Workforce Strategy Spend target. If the PPS applies this discount in DY1, the PPS will be expected to reallocate those funds appropriately in DY2-4 to fully meet their DY1-4 total commitment.

Funding Type	Year/Quarter										Total Spending (\$)
	DY1(Q1/Q2)(\$)	DY1(Q3/Q4)(\$)	DY2(Q1/Q2)(\$)	DY2(Q3/Q4)(\$)	DY3(Q1/Q2)(\$)	DY3(Q3/Q4)(\$)	DY4(Q1/Q2)(\$)	DY4(Q3/Q4)(\$)	DY5(Q1/Q2)(\$)	DY5(Q3/Q4)(\$)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Define target workforce state (in line with DSRIP program's goals).	CNYCC successfully completed Workforce Milestone #1/5 "Define target workforce state (in line with DSRIP program's goals)" in DY2 Q2. During DY3 Q3 & Q4, strategies of the approved Workforce Transition roadmap were further refined by the PPS's Workforce Committee, which met regularly (their meeting schedule has been submitted with this milestone). There were no updates to the target workforce state during this quarter.
Create a workforce transition roadmap for achieving defined target workforce state.	CNYCC successfully completed Workforce Milestone #2/6 "Create a workforce transition roadmap for achieving defined target workforce state." in DY2 Q2. During DY3 Q3 & Q4, strategies of the approved Workforce Transition roadmap were further refined by the PPS's Workforce Committee, which met regularly (their meeting schedule has been submitted with this milestone). The Workforce Transition Roadmap were modified to include Resettled Refugee International Medical Graduate Retraining to the strategy for recruitment, retention and deployment. The resettled refugee population, numerous in Syracuse & Utica, include health professionals who were certified in their native countries but are not currently in a position in the medical field.
Perform detailed gap analysis between current state assessment of workforce and projected future state.	CNYCC successfully completed Workforce Milestone #3 ("Perform detailed gap analysis between current state assessment of workforce and projected future state.") DY2 Q2. During DY3 Q3 & Q4, strategies of the approved Workforce Transition roadmap were further refined by the PPS's Workforce Committee, which met regularly and continued to be implemented by CNYCC staff.
Produce a compensation and benefit analysis, covering impacts on both retrained and redeployed staff, as well as new hires, particularly focusing on full and partial placements.	CNYCC successfully completed Workforce Milestone #4 ("Produce a compensation and benefit analysis, covering impacts on both retrained and redeployed staff, as well as new hires, particularly focusing on full and partial placements."), which was initially submitted in DY2 Q1. During DY3 Q4, partners participated in the second Compensation & Benefits survey, the results of which have been submitted with this milestone.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	CNYCC strategies of the approved Workforce Transition roadmap were further refined by the PPS's Workforce Committee, which met regularly, and continued to be implemented by CNYCC staff.
Develop training strategy.	CNYCC successfully completed Workforce Milestone #5/8 "Develop Training Strategy" in DY2 Q2. During DY3 Q3 & Q4, CNYCC continued implementing training strategies with the use of the PPS-wide online Learning Management System. A schedule of training sessions that were held this quarter have been uploaded to this milestone as evidence of up-take of training programs, including both individual training and training for new, multi-disciplinary teams.

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✅ IPQR Module 11.4 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges and risks that you foresee in achieving the milestones set out above, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Risk 1: Successful project implementation and support for system-wide change requires effective training of the workforce to respond to and prepare for both internal and external changes. Currently, there is not consensus among our partners regarding the extent to which trainings and training delivery should be centrally supported by CNYCC versus being a delegated responsibility of partner organizations.

Potential Impact: Without it there will be resistance from front line employees and other key stakeholders, undermining the ability for changes to become institutionalized. At the same time, it is anticipated that great variability in training capacity exists across CNYCC partner organizations.

Mitigation: A key input in developing the workforce training strategy is assessing partners' organizational capacities for training and evaluation in order to be responsive to the diverse needs that exist in the region and to leverage available resources.

Risk 2: Competition both within and across CNYCC territories for particular, high-demand occupations such as social workers, care coordinators, and mental health workers is a risk to achieving workforce transformation.

Potential Impact: Competition may make it difficult to recruit and retain staff to fill the new health workforce needs.

Mitigation: Occupational evaluation of new positions in terms of key tasks, transferable skills, and required abilities, along with creating common language around job titles/descriptions, is key to ensuring the ability to match individuals with the new health workforce needs. Regulatory relief and a commitment to practicing at the "top of the license" are additional strategies to be pursued to meet workforce goals.

✅ IPQR Module 11.5 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Workforce is integral and highly sensitive to all other DSRIP project workstreams. It is expected that all project and organizational workstreams will interface with Workforce to identify and coordinate training efforts to ensure alignment with the overall training strategy and data collection and reporting of staff trained.

In particular, Workforce has key interdependencies with the Cultural Competency/Health Literacy and Governance workstreams as follows:

Cultural Competency/Health Literacy – as CNYCC implements its CC/HL training strategy in response to the IA's Mid-Point recommendation, staff

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

& consultants will align the work effort with the implementation of the PPS Training Strategy and seek the input & advice of the Workforce Committee and/or a workgroup appointed by the committee.

Governance – The Clinical Governance Committee will oversee identifying and developing training required for project implementation and workforce transition towards community based care.

In addition, Workforce will work with the following workstreams to verify new hire projections and monitor impact of system change on workforce: IT Systems and Processes, Performance Reporting, Financial Sustainability/VBP, Population Health Management, and Clinical Integration.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✔ IPQR Module 11.6 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Workforce Vendor	Anita Merrill, Northern and Central AHECs	Support development of comprehensive workforce strategy and assist with implementation and reporting, as well as supporting the CNYCC Workforce Workgroup.
CNYCC Workforce Lead	Siti Mack, Manager for Workforce and Cultural Competency/Health Literacy	Oversee the development and implementation of the comprehensive workforce strategy, as well as required workforce reporting, and the coordination of the Workforce Workgroup.
CNYCC Workforce Committee	Representatives from: Hospitals; Labor Unions; Nursing Homes; CBOs; Public Health; Primary care; Post-secondary education, and other stakeholder organizations.	Provide insight and expertise into workforce impacts to assist with the development of the CNYCC workforce strategy.
Management, Oversight, and Operations	Virginia Opipare, Executive Director; Joe Reilly, Chief Information Officer; Lauren Wetterhahn, Director Program Operations; BJ Adigun, Director of Communications and Stakeholder Engagement; Liz Fowler, Director of Resource Management; Laurel Baum, Chief Corporate Compliance Officer/General Counsel; Joseph Maldonado, MD, Chief Medical Officer; Sue Jessen, Director Project Management Office & Performance Improvement; Michael Riley, Director of Finance	Execute policies of Board; manage day-to-day operations of the organization; provide support and technical assistance to partners and projects; monitor performance and progress of projects and corporation; report to Board.
Oversight and Approval	CNYCC Board of Directors	Review and approve workforce strategy.
Oversight and Recommendations	Clinical Governance and IT/Data Governance Committees	Review and approve key aspects of workforce strategy; update and make recommendations on strategy and policy to the Board.
CNYCC Workforce Lead	Siti Mack, Manager for Workforce and Cultural Competency/Health Literacy	Oversee the development and implementation of the comprehensive workforce strategy, as well as required workforce reporting, as well as staffing the recently approved CNYCC Workforce Committee.
Workforce Vendor	Iroquois Healthcare Alliance	Organize, administer and compile results of Compensation and Benefits Survey of CNYCC partner organizations.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

✓ IPQR Module 11.7 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved in your workforce transformation plans, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Human resource contacts at CNYCC Partner Organizations	Consultation and Reporting	Identify workforce challenges (hiring trends, turn-over, etc.); support data collection (wage/benefit, new hire, redeployment information, etc.); identify current workforce status; provide information with respect to existing labor agreements; assist in achieving job title consistency throughout the CNYCC.
Training contacts at CNYCC Partner Organizations	Consultation and Reporting	Provide oversight and input into development of training needs assessment, and subsequent training strategy/ plan. Also provide insight into existing partner technological capabilities for training.
IT contacts at CNYCC Partner Organizations	Consultation and Reporting	Assist in organizing and coordinating technological means of training and data reporting.
1199SEIU Training and Upgrading Fund	Potential vendor	Training
External Stakeholders		
Iroquois Healthcare Alliance	Potential vendor	Compensation and benefit analysis; training.
Labor Unions represented in CNYCC: SEIU 1199; PEF; CSEA; CWA; UUP; NYSNA; UFCW; AFSCME; PBANYS	Consultation and collaboration	Expertise and insight into workforce impacts, staffing models, retraining, redeployment, and communication with front-line workers.
Post-secondary training and education providers	Consultation and collaboration	Training, recruitment, and capacity building for training.
Workforce Leads from neighboring PPS's: Tracy Leonard (NCI); Lenore Boris (STRIPPS); Lottie Jameson (AHI)	Consultation and collaboration	Communicate best practices and share resources (training, etc).
Heather Eichen, SUNY RP2	Consultation and collaboration	Assist with post-secondary capacity for training needs; communicate training resources across PPSs; assist in achieving consistency of job titles across PPS boundaries.
ACT/WorkKeys	Potential vendor	Analyze job skills; create skill assessments and skill-gap analysis; training.
TBD	Vendors	Training

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Central New York Care Collaborative (PPS ID:8)

✓ IPQR Module 11.8 - IT Expectations

Instructions :

Please describe how the development of shared IT infrastructure across the PPS will support your plans for workforce transformation.

A shared IT infrastructure will support workforce efforts in the following areas: 1) training; 2) data collection and reporting; 3) ability to access an external "learning collaborative" to promote available trainings and best practices; and 4) promoting available job opportunities through CNYCC-wide job board functionality.

Training - CNYCC anticipates a high degree of training will be conducted via online methods. However, the ability of CNYCC partners to access and track online training via a Learning Management System (LMS) is not currently well documented. In the latest iteration of the Partner Survey, questions relative to LMS capability were included. Workforce will work with IT Systems and Processes to assess partner capability for training and required reporting.

Data collection and reporting – In addition to LMS data, there remains a need to connect partners within the CNYCC for the purpose of standardized workforce data collection and reporting. The Health Workforce New York (HWNY) platform is capable of serving as a data collection and reporting tool for workforce. AHEC will work with IT Systems and Processes and Performance Reporting workstreams to identify and develop a data collection process for workforce.

Sharing Best Practices & Curricula -- The ability to connect partners within and across the various PPS territories will allow access to existing, best-practices and trainings without having to re-create curricula, which should ultimately reduce the cost of training to the PPS. CNYCC is currently meeting with North Country Initiative (NCI), Adirondack Health Institute (AHI), Southern Tier Integrated PPS (STRIPPS), SUNY RP2, Iroquois Healthcare Association, and the Center for Health Workforce Studies with respect to ensuring regional communication around these issues. The AHECs are also pursuing outside funding opportunities to create a digital platform through Health Workforce New York (HWNY) that could serve as the framework for a learning collaborative that would ensure access on a PPS, regional, and statewide level.

✓ IPQR Module 11.9 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The ability to capture training and the workforce implications of DSRIP (new hires, redeployed, etc.) across PPS partners is a key hallmark of success. Timely and relevant information will support workforce planning efforts at the local, as well as the state level. The Health WorkForce New York (HWNY) platform HWapps is capable of serving as a data collection and reporting tool for workforce measures. HWNY will work with CNYCC staff to develop, implement, and monitor a data collection process for workforce staff impact. Additionally, HWNY will work with CNYCC to provide training for staff on accessing HWapps and the importance of workforce data collection/reporting. Workforce will also work with CNYCC

✔ IPQR Module 11.11 - Workforce Strategy Spending (Quarterly):

Instructions :

Please include details on workforce spending. The workforce spending actuals should reflect only what was spent during the relevant quarters and is not cumulative across semi-annual periods. The PPS can shift funding across categories; e.g., from Retraining to New Hires. Please note that the "Cumulative Percent of Commitments Expended through Current DSRIP Year" section is calculated based on the total yearly commitments.

Benchmarks	
Year	Amount(\$)
Total Cumulative Spending Commitment through Current DSRIP Year(DY3)	33,730,625.00

Funding Type	Workforce Spending Actuals		Cumulative Spending to Date (DY1-DY5)(\$)	Cumulative Percent of Commitments Expended through Current DSRIP Year (DY3)
	DY3(Q1/Q2)(\$)	DY3(Q3/Q4)(\$)		
Retraining	96,950.10	430,208.62	6,057,529.02	22.38%
Redeployment	24,205.33	0.00	440,477.29	32.03%
New Hires	402,744.55	581,183.80	2,969,230.89	63.34%
Other	1,953,861.16	3,374,324.47	8,081,719.43	1333.07%
Total Expenditures	2,477,761.14	4,385,716.89	17,548,956.63	52.03%

Instructions :

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Central New York Care Collaborative (PPS ID:8)

Project 2.a.i – Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management

✓ IPQR Module 2.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Risk 1: Lack of coordination for clinical and health related services across the continuum of health are a barrier to achieving PPS goals. While clinical and operational protocols adhering to evidence based practices will be developed there is a possibility that parallel pathways among individual projects may overlap, creating duplication and inefficiencies in the provision of care. Impact: Overlap and duplication of effort has the potential to confuse both partners and patients and interrupt continuity of care, which would be counterproductive to attaining DSRIP goals. Mitigation: In order to create vertical and horizontal integration, the Clinical Governance Committee will be responsible for overseeing PPS care delivery, care coordination, quality standards and project quality improvement including review and approval of standardized processes, evidence-based pathways, and a rapid cycle improvement processes. The Committee will be responsible for overseeing adoption of clinical and operational guidelines for each project system-wide as well as identifying common guideline elements that will be consolidated to reduce duplication. Risk 2: The culture of provider based care is very strong and if unchecked will be counter-productive to DSRIP goals. Impact: Many partners find collaboration difficult and have built their own capacity rather than collaborate. In this cultural environment partners, such as primary care practices, are expected to do more and provide a scope of services for which they do not have capacity or resources to accomplish effectively. The result is an over-extension of partner resources and an incomplete approach to patient care. Mitigation: Regional multi-specialty and multi-service integrated delivery systems exist, albeit siloed within existing organizational alliances. These integrated systems can serve as foundational components of a region-wide IDS. These partners can lead local efforts, collaborate with their regional counterparts and lead IDS development using their experience and existing systems as a platform on which to build. Risk 3: Negotiation with MCOs by individual providers and local systems can result in disparate contracting arrangements and create a fragmented approach to care. Impact: Smaller partners do not have the capacity to conduct the cost benefit analysis to demonstrate effectiveness and successfully participate in MCO arrangements. Similarly, smaller organizations may not have sufficient numbers of patients to participate in Medicaid managed care. This may result in varying MCO contract parameters for care coordination and quality. Mitigation: CNYCC will explore options to support partners' access to resources for conducting cost benefit analysis and identification of collective contracting vehicles or subcontracting opportunities.

✅ IPQR Module 2.a.i.2 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	DY4 Q4	Project	N/A	In Progress	01/01/2017	03/31/2019	01/01/2017	03/31/2019	03/31/2019	DY4 Q4
Task PPS includes continuum of providers in IDS, including medical, behavioral health, post-acute, long-term care, and community-based providers.		Project		In Progress	01/01/2017	03/31/2019	01/01/2017	03/31/2019	03/31/2019	DY4 Q4

Milestone Name	Narrative Text
	All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.

Milestone Name	Narrative Text
Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.	
Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.	
Ensure that all PPS safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including directed exchange (secure messaging), alerts and patient record look up, by the end of Demonstration Year (DY) 3.	<p>Project 2ai Milestone 4, Metric 1, ("EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.") due 3/31/18 has been completed. The attached list includes a list of participation agreements with QEs.</p> <p>Project 2ai Milestone 4, Metric 2, ("PPS uses alerts and secure messaging functionality") due 3/31/18 has been completed. The attached documentation includes a documentation of organizations that receive and utilize both alerts and utilize secure messaging.</p> <p>The safety-net hospital speed & scale list uploaded as a separate excel file to this milestone (containing 11 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (10) for speed & scale purposes.</p> <p>The safety-net mental health provider speed & scale list uploaded as a separate excel file to this milestone (containing 42 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (34) for speed & scale purposes.</p> <p>The safety-net nursing home speed & scale list uploaded as a separate excel file to this milestone (containing 29 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (26) for speed & scale purposes.</p> <p>The safety-net non-PCP speed & scale list uploaded as a separate excel file to this milestone (containing 218 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (201) for speed & scale purposes.</p> <p>The safety-net PCP speed & scale list uploaded as a separate excel file to this milestone (containing 139 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (50) for speed & scale purposes.</p> <p>Remediation: In its initial submission, the PPS uploaded a RHIO provided list of providers that subscribe to DIRECT messaging and RHIO alerts along with a statement describing an Attestation organizations provided to CNYCC stating: "Subscribe to HealtheConnections event notifications to receive admission and discharge alerts and discharge summary documents to accomplish necessary functions of an encounter notification system. Implement protocols to follow up with patients discharged from hospital within 72 hours of discharge." CNYCC has included the Attestations along with screenshots from three sampled organizations to demonstrate actual use of the DIRECT messaging and RHIO alerts along with a Direct messaging and RHIO alert usage report provided by the RHIO covering all participating partner organizations (which differs from the originally provided list of organizations that subscribe but do not necessarily utilize these RHIO capabilities). Please note that there may be partner organizations that utilize Direct messaging through a different HISP and therefore would not need RHIO direct services (and would not be contained this report).</p>

Milestone Name	Narrative Text
Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes.	For Milestone 10, Metric 1 "PPS submitted a growth plan outlining the strategy to evolve provider compensation model to incentive-based compensation," the end date for metric has been aligned with the end date of the milestone (DY4 Q4).
Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate.	For Project 2.a.i Milestone 11, the original end date for Task F "Conduct performance reviews of CHW program" has been extended from 3/31/2018 to 03/31/2019. This change is due to the fact that CNYCC awarded four partner organizations in order to support the development, expansion, and/or preservation of existing evidence-based Community Health Workers and Home Visiting Programs. These are one year contracts, in which partners will provide a detail evaluation of services provided and their impact at the close of the 4th quarter.

Project 2.a.iii – Health Home At-Risk Intervention Program: Proactive management of higher risk patients not currently eligible for Health Homes through access to high quality primary care and support services

✓ IPQR Module 2.a.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1. Risk: Engagement of individuals who have only one chronic condition may be challenging. Potential Impact: CNYCC is not able to identify individuals with one chronic condition and/or engage them in care management services in order to reduce their risk of developing a second chronic condition. Mitigation: In order to mitigate this risk, CNYCC will work with partners to determine the best ways to identify individuals with one chronic condition as well as those that would benefit greatly from care management services. Collaborations at the community level among organizations who have relationships with eligible individuals will greatly assist with engagement.
2. Risk: Tracking all patients referred to this project and ensuring that providers across the PPS know patients are connected with care management will be a difficult issue compounded by the lack of EHRs among some providers. This project may endanger its own success if tracking systems are not adequate. Potential Impact: Without consistent and reliable HIT/HIE infrastructure or tools to track as many patients eligible for this project as possible, patients who could count towards the goals of this project may slip through the cracks of the infrastructure. Mitigation: HIT/HIE infrastructure must be brought up to working levels and accessible for partners involved in this project. Information exchange through the RHIO will be particularly key for partners to keep updated working records on patients referred to this program. Referral forms and tools must be provided to the community and distributed to all partners in this project who could end up referring to HHs.
3. Risk: Patients may decide to opt out of services or may be unresponsive to the efforts of care managers. Potential Impact: If patients refuse help from HHs or become disengaged from this project, they could exacerbate their chronic conditions, become more likely to be admitted or seek care in the ED, and harm both their own health and the ability of this project to meet its patient engagement numbers. Mitigation: Experience has shown that patients respond much more positively and openly to services when there are strong connections between care managers and primary care practices. When services are highly recommended by providers, they tend to be more successful in reaching and working with patients. As much as the team of providers and partners work together, the more successful this project is likely to be in reaching patients.
4. Risk: Many partners and providers within CNYCC network are not fully aware of HHs and the services they provide. Potential Impact: If providers are not fully aware or cognizant of HH services, they will be less likely to refer their patients who may benefit from the use of this program. Many providers hear about this program, and think it refers to home care services. Both care coordination and project speed and scale may suffer if there is not adequate provider education. Mitigation: Partner outreach and education will be a major priority for the HHs in order to ensure success of this project. HHs will make time to "introduce themselves" to partners. Providers and their administrative staff will be engaged to ensure sufficient awareness of HH services so that consistent numbers of patients are referred to this program. HHs will also make efforts to engage CBOs and other non-medical service providers to make sure connections can be made for patients in their own communities.

✔ IPQR Module 2.a.iii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale
DY4,Q4	22,600

	Year,Quarter	DY3,Q1	DY3,Q2	DY3,Q3	DY3,Q4
PPS Reported	Baseline Commitment	2,800	5,600	11,150	16,700
	Quarterly Update	27	121	0	411
	Percent(%) of Commitment	0.96%	2.16%	0.00%	2.46%
IA Approved	Quarterly Update	0	121	0	411
	Percent(%) of Commitment	0.00%	2.16%	0.00%	2.46%

⚠ Warning: PPS Reported - Please note that your patients engaged to date (411) does not meet your committed amount (16,700) for 'DY3,Q4'

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

For Project 2aiii, the PPS is not meeting its target for Actively Engaged Patients. This is due to the fact that partners are having difficulty identifying individuals that truly only have a single chronic condition.

Module Review Status

Review Status	IA Formal Comments
Fail	The PPS failed to meet at least 80% of its Actively Engaged commitments for DY3,Q4.

<p>sharing health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up.</p>	<p>Project 2aiii Milestone 3, Metric 2, ("PPS uses alerts and secure messaging functionality") due 3/31/18 has been completed. The attached documentation includes a documentation of organizations that receive and utilize both alerts and utilize secure messaging.</p> <p>The safety-net PCP speed & scale list uploaded as a separate excel file to this milestone (containing 112 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (43) for speed & scale purposes.</p> <p>The safety-net non-PCP speed & scale list uploaded as a separate excel file to this milestone (containing 168 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (126) for speed & scale purposes.</p> <p>The safety-net case management/Health Home speed & scale list uploaded as a separate excel file to this milestone (containing 13 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (6) for speed & scale purposes.</p> <p>Remediation: In its initial submission, the PPS uploaded a RHIO provided list of providers that subscribe to DIRECT messaging and RHIO alerts along with a statement describing an Attestation organizations provided to CNYCC stating: "Subscribe to HealtheConnections event notifications to receive admission and discharge alerts and discharge summary documents to accomplish necessary functions of an encounter notification system. Implement protocols to follow up with patients discharged from hospital within 72 hours of discharge." CNYCC has included the Attestations along with screenshots from three sampled organizations to demonstrate actual use of the DIRECT messaging and RHIO alerts along with a Direct messaging and RHIO alert usage report provided by the RHIO covering all participating partner organizations (which differs from the originally provided list of organizations that subscribe but do not necessarily utilize these RHIO capabilities). Please note that there may be partner organizations that utilize Direct messaging through a different HISP and therefore would not need RHIO direct services (and would not be contained this report).</p>
<p>Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM.</p>	<p>Project 2aiii Milestone 4, Metric 1, ("EHR meets Meaningful Use Stage 2 CMS requirements Note: any/all MU requirements adjusted by CMS will be incorporated into the assessment criteria.") due 3/31/18 has been completed. The attached documentation includes a list of organizations/EHR systems that meet Meaningful Use State 2 CMS requirements.</p> <p>Project 2aiii Milestone 4, Metric 2, ("PPS has achieved NCQA 2014 Level 3 PCMH standards and/or APCM.") due 3/31/18 has been completed. The attached excel document has four tabs. The first is a list of our network partners' eligible primary care providers. The second tab lists the NCQA PCMH Level 3 providers. The third tab lists those providers that met the requirements for Gate 2 APC. CNYCC has no NCQA PCMH Level 2 practices/providers that are currently seeking add-ons.</p> <p>The safety-net PCP speed & scale list uploaded as a separate excel file to this milestone (containing 107 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (43) for speed & scale purposes.</p>
<p>Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.</p>	
<p>Develop a comprehensive care management plan for each patient to engage him/her in care and to reduce patient risk factors.</p>	<p>Project 2aiii Milestone 6, Metric 1, ("Procedures to engage at-risk patients with care management instituted.") due 3/31/18 has been completed. The attached inventory includes a list of training courses and materials developed to assist providers engage patients in their care and reduce patient risk factors.</p>

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Establish partnerships between primary care providers and the local Health Home for care management services. This plan should clearly delineate roles and responsibilities for both parties.	
Establish partnerships between the primary care providers, in concert with the Health Home, with network resources for needed services. Where necessary, the provider will work with local government units (such as SPOAs and public health departments).	
Implement evidence-based practice guidelines to address risk factor reduction as well as to ensure appropriate management of chronic diseases. Develop educational materials consistent with cultural and linguistic needs of the population.

Project 2.b.iii – ED care triage for at-risk populations

✓ IPQR Module 2.b.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1. Risk: Lack of primary care capacity in hospital catchment areas to which patients can be triaged. Triageing patients to community primary care providers will increase demand on already strained primary care and behavioral health services across CNYCC as well as required additional outpatient resources. Potential Impact: ED Triage is dependent on having primary care and other community-based providers available to see the patients in a timely manner. The lack of options particularly in the more rural areas could hinder progress on attaining the milestones for some of the projects. Mitigation: This will be addressed in multiple ways including implementing a comprehensive workforce strategy and encouraging integration of primary care and behavioral health.
2. Risk: Inadequate electronic communication capabilities could hinder the ability to coordinate and monitor the care of triaged patients. The PCPs, hospitals and community partners vary widely in the EHR systems they use – including not presently having any electronic systems. Potential Impact: One of the critical elements of the ED Triage project is to ensure that patients with non-urgent conditions are successfully hooked up with PCPs and that they receive the full breadth of services they need. Without adequate real-time information systems this may not happen. Mitigation: CNYCC benefits greatly from HealtheConnections, the local RHIO, which will enable providers to get up to speed more quickly, and to benefit from the expertise it offers.
3. Risk: The workforce is already limited in many of the CNYCC regions – particularly rural areas. Recruiting adequate numbers of appropriately trained patient navigators in the required timeframe could prove difficult. Potential Impact: The Patient Navigators are the lynchpins of this project. Without adequate staffing it will be difficult to efficiently and effectively triage patients. Mitigation: The first step in the project implementation is to assess the readiness and capacity of each of the hospitals and their community partners. Each will be assessed for staffing capacity. Implementation of the projects will be rolled-out starting where staffing is adequate and working with those partners who require more significant changes or augmentation. CNYCC benefits greatly from having three Health Homes in the PPS as well as multiple FQHCs that provide critical resources for the patient navigator function. Finally, the CNYCC Workforce Workgroup is assessing workforce needs across all of CNYCC and will be an additional resource.
4. Risk: State and federal regulations and insurance liabilities create barriers to implementing ED Triage for some of the partners, for example rules that require SNF to transport a patient to the ED if they have fallen. Potential Impact: Concerns about liability will prevent critical partners from engaging with the project. Mitigation: CNYCC is actively engaged with the NYDOH in addressing the need for waivers to allow the partners to participate in the ED Triage project without fear of liability or regulatory issues.
5. Risk: Connecting to outpatient or community services can be difficult outside of Monday-Friday, 9/5 working hours. Potential Impact: Patients may present back at the ED if outpatient or community services are contacting patient in a reasonable time after presentation to the ED. Mitigation: Stronger connections between hospital EDs and outpatient services such as Health Homes in order to connect with a patient after their ED presentation. Additionally, community-based providers and Health Homes could pursue embedding staff within hospital EDs to further smooth transitions and establish immediate contact while patient is still in the ED in order to inform about next steps in their care.

Central New York Care Collaborative (PPS ID:8)

✔ IPQR Module 2.b.iii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale
DY3,Q4	14,490

	Year,Quarter	DY3,Q1	DY3,Q2	DY3,Q3	DY3,Q4
PPS Reported	Baseline Commitment	3,600	7,200	10,800	14,490
	Quarterly Update	2,024	3,769	0	6,658
	Percent(%) of Commitment	56.22%	52.35%	0.00%	45.95%
IA Approved	Quarterly Update	0	3,764	0	6,550
	Percent(%) of Commitment	0.00%	52.28%	0.00%	45.20%

⚠ Warning: PPS Reported - Please note that your patients engaged to date (6,658) does not meet your committed amount (14,490) for 'DY3,Q4'

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

For 2biii, the PPS is not meeting its AEP target due to the fact that the Patient Navigation interventions that were put into place in DY2 are working, therefore Emergency Departments are seeing a decrease in the number of patients that are eligible for Navigation.

Module Review Status

Review Status	IA Formal Comments
Fail	The PPS failed to meet at least 80% of its Actively Engaged commitments for DY3,Q4.

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Encounter Notification Service (ENS) is installed in all PCP offices and EDs										
Providers Associated with Completion:										
Auburn Memorial Hospital										
Task 1. Identify all providers/practices participating in project		Project		Completed	08/04/2015	03/31/2016	08/04/2015	03/31/2016	03/31/2016	DY1 Q4
Task 2. Establish HIT/HIE and Primary Care Transformation work groups.		Project		Completed	08/04/2015	01/31/2016	08/04/2015	01/31/2016	03/31/2016	DY1 Q4
Task 3. a) Define Meaningful Use Stage 2 requirements and align/incorporate ED care triage strategies with those requirements. b) Engage and collaborate with PCMH Certified Content Expert to review NCQA PCMH 2014 Level 3 requirements and integrate ED care triage strategies into a PCMH baseline assessment tool and implementation strategy for primary care providers.		Project		Completed	09/01/2015	03/31/2016	09/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task 4. Provide HIT/HIE and Primary Care Transformation Workgroups education regarding MU Stage 2 and NCQA PCMH 2014. Education will include review of MU Stage 2 measures, NCQA 2014 standards, scoring, and recognition process.		Project		Completed	02/01/2016	04/08/2016	02/01/2016	04/08/2016	06/30/2016	DY2 Q1
Task 5. Identify practice transformation champions to drive HIT/HIE and PCMH implementation for each primary care practice.		Project		Completed	08/04/2015	01/31/2016	08/04/2015	01/31/2016	03/31/2016	DY1 Q4
Task 6. Conduct baseline assessments of providers/practices' MU Stage 2 and PCMH 2014 statuses.		Project		Completed	09/01/2015	12/31/2015	09/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task 7. Devise cohort groups and facilitate learning collaborative sessions to support practices in successful MU Stage 2 attestation and PCMH 2014 implementations.		Project		Completed	01/01/2016	09/30/2017	01/01/2016	09/30/2017	09/30/2017	DY3 Q2
Task 8. Devise a detailed MU Stage 2 and PCMH 2014 implementation plan for each provider/practice. As MU Stage 2 measures are embedded in PCMH 2014 standards both will be assessed and implemented concurrently.		Project		Completed	02/01/2016	09/30/2016	02/01/2016	09/30/2016	09/30/2016	DY2 Q2
Task 9. Deploy MU Stage 2 and PCMH 2014 or APCM implementation plans for each participating provider/practice.		Project		Completed	03/01/2016	09/30/2017	03/01/2016	09/30/2017	09/30/2017	DY3 Q2

Project 2.b.iv – Care transitions intervention model to reduce 30 day readmissions for chronic health conditions

✓ IPQR Module 2.b.iv.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1. Risk: Health care providers may not see the value in the Care Transitions Protocol in its entirety. They may choose to comply with some parts of the protocol and not with other parts. Potential Impact: This would reduce the impact of Care Transitions Protocol as a PPS wide tool, lead to confusion among providers and patients, and, ultimately result in potential avoidable readmissions. Mitigation: The Care Transitions Protocol will be developed with as broad an input process as possible. PDSA cycles will be encouraged and incentivized throughout the development, implementation and roll out to make improvements in the process. There is also flexibility built into the provider roll out strategy to allow for some differences in the Care Transitions Protocol to account for regional differences in staffing, normal communication channels, and other differences that may exist in terms of provider mix, and personnel responsible for successful transitions, etc.
2. Risk: There may be provider concerns with applying Care Transitions Protocol to Medicaid population. Providers will need to treat Medicaid patients in a different manner than all other patients in terms of using the Care Transitions Protocol. This may be problematic for providers in identifying patients and being able to adequately track their patients. Potential Impact: Providers may have difficulty identifying and tracking which of their patients should be included in the Care Transitions program and which are not. This may result in practice inefficiency and frustration with the program. Mitigation: Transitions staff will be the focal point for identifying and tracking patients, and communicating to each provider included in the patient's care team as well as tracking the patient's care within this team. This strategy is dependent on robust information technology and communication strategies such as the incorporation of the population health information system. Strategies for identification and tracking will also be explored through county-specific CT Coalitions.
3. Risk: Patients may be unwilling to participate in care transitions program. Patients may view the transition care program as intrusive. They may not be willing to share information among the various levels of community partners or may not want care providers coming to their homes or speaking with their families. They may also not comply or be unable to comply with discharge regimens owing to factors including health literacy, language issues, and lack of engagement. Potential Impact: Inability to promote a team approach with some patients. Decreased numbers of patients involved with care transitions. Reduced number of potential avoidable readmissions. Mitigation: The project will encourage organizations to identify a provider whom the patient trusts (Primary Care Provider, nurses, etc.) to help make the case for following a care transitions plan. The CT staff will work one-on-one with the patient to identify the relevant factors for engagement and tailored solutions for each patient.
4. Risk: Fragmented care for patients with behavioral health issues, particularly for those with co-morbid medical and BH issues, due to the two service systems operating in silos. Potential Impact: Patients with BH issues have additional needs and barriers to care. If care transition plans do not take these into account, there may be potential for readmissions. Mitigation: Patients with BH diagnoses are included in the target population for this project and when possible, BH focused staff will be part of the CT staff to ensure that BH issues are appropriately diagnosed and given adequate consideration in the development of a treatment plan upon discharge. The developed protocol will also include linkages to Health Homes and other community-based services for post-discharge care.

✔ IPQR Module 2.b.iv.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

✅ IPQR Module 2.b.iv.3 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.	DY2 Q4	Project	N/A	Completed	04/01/2015	03/31/2017	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Standardized protocols are in place to manage overall population health and perform as an integrated clinical team are in place.		Project		Completed	08/01/2015	03/31/2017	08/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task 1. Update Literature Review of evidence-based readmission reduction program and best practices		Project		Completed	08/01/2015	09/30/2015	08/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task 2. Present most recent research to the Project Implementation Collaboratives		Project		Completed	08/01/2015	09/30/2015	08/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task 3. Hospitals collect and assess data on patient volume and mix for readmissions		Project		On Hold	04/01/2015	03/31/2020	04/01/2015	03/31/2020	03/31/2020	DY5 Q4
Task 4. Project Implementation Collaboratives review other organizations' strategies/programs and perceived barriers and opportunities to existing strategies and programs and those that may occur as applied to the Medicaid population		Project		Completed	08/01/2015	09/30/2015	08/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task 5. Create an inventory of existing chronic disease readmission reduction programs		Project		Completed	08/01/2015	12/31/2015	08/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task 6. Comparing results of updated literature review with evidence-based and best practices to the inventory of existing chronic disease readmission reduction programs, conduct partner-specific Capacity/Gap analysis		Project		Completed	08/01/2015	12/31/2015	08/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task 7. Modify models/tools to fill identified gaps, consider modifications to models/tools based on Medicare populations to better meet the needs of the Medicaid population; i.e. child care, timing of appointments, transportation		Project		Completed	06/01/2015	03/31/2017	06/01/2015	03/31/2017	03/31/2017	DY2 Q4

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.	
Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.	<p>Project 2biv Milestone 2, Metric 1, ("A payment strategy for the transition of care services developed in concert with PPS Network Providers/Partners and Managed Care Plans and Health Homes.") due 3/31/18 has been completed. The attached document validates partners have payment agreements/MOUs with Managed Care Organizations that cover agreed upon transition of care protocols.</p> <p>Project 2biv Milestone 2, Metric 2, ("Coordination of care strategies focused on care transition are in place, in concert with Medicaid Managed Care groups and Health Homes") due 3/31/18 has been completed. The attached document is a diagram of the workflow developed by the CNYCC PPS demonstrating the roles and responsibilities of each service type at each stage of the workflow. CNYCC's 3 lead health homes agencies, multiple care management partners, community service organizations and all 11 hospital systems participated in the creation of the workflow which was then vetted with CNYCC's Clinical Governance Committee.</p> <p>Project 2biv Milestone 2, Metric 3 ("PPS has protocol and process in place to identify Health Home eligible patients and link them to services as required under ACA") due 3/31/18 has been completed. The attached documents include a diagram of the workflow developed by the CNYCC PPS demonstrating the process and workflow detailing how post-discharge protocols are followed to implement the care transition intervention model across participating providers. CNYCC's 3 lead Health Home agencies, multiple care management partners, community service organizations and all 11 hospital systems participated in the creation of the process model (see attached Care Transitions Hospital to HH Communication). The process model has been shared with the 7 Care Transitions Coalitions formed specifically to address care transitions across disciplines within discreet counties across the PPS. The process model was designed to address Health Home and Community Service Provider engagement "Early in the Admission" with feedback loops into the "Post Discharge Into the Community" phase of CNYCC's Standardized Protocol for Care Transitions (see attached Standardized Protocol for a Care Transitions Intervention Model Ensuring an Established 30 day Transition of Care Period).</p>
Ensure required social services participate in the project.	Project 2biv Milestone 3, Metric 1, ("Required network social services, including medically tailored home food services, are provided in care transitions.") due 3/31/18 has been completed. The attached document validates that partners have agreements/MOUs with social services organizations to support patients in the transition of care.
Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services.	
Protocols will include care record transitions with timely updates provided to the members' providers, particularly primary care provider.

Project 2.d.i – Implementation of Patient Activation Activities to Engage, Educate and Integrate the uninsured and low/non-utilizing Medicaid populations into Community Based Care

✓ IPQR Module 2.d.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1. Risk: Inability to identify and capture individuals who are uninsured (UI), low-utilizers (LU) and non-utilizers (NU) and track them over time. This is a generally transient population, many of whom may not have a fixed address or telephone number. Many wish to remain anonymous and reluctance to impart personal information may also play a role in preventing follow up with patients. Potential Impact: This could result in a gradual loss to follow up and the inability to meet project milestones. Additional resources and outreach will be required to reach out and engage this population. Mitigation: To address this, CNYCC will engage with target population via multiple channels, including in-person and mobile/online engagement, as well as via clinical personnel and laypeople/peers in order to increase chances for establishing a meaningful connection. Specifically, CNYCC will partner with community based organizations (CBOs) and advocacy groups who have established a trusting relationship with the target population. The partnering CBOs are important resources for identifying those who are not engaged in care. Through these agencies, CNYCC will learn about the health care needs and preferences of the UI, LU, NU population so as to devise a responsive follow up strategy. CNYCC will also utilize reports from Medicaid MCOs to help identify eligible individuals and also explore use of incentives for patients to participate in patient activation activities or reach certain thresholds and will conduct education campaign around potential benefits of coverage and use of preventive services. Initially, EHRs utilized by providers will be built out to accommodate tracking of the target population, including the development of registries and reports. For providers that do not have EHRs, other logging/tracking mechanisms will be developed. With the establishment of a population health management platform, tracking of these patients, including the care they receive throughout the continuum, will be centralized.
2. Risk: CNYCC may face cultural biases against seeking care or receiving services among the target population. In addition, low health literacy may be a barrier to effectively administer the PAM(R). Potential Impact: Often, the biases and barriers experienced by this population prevent them from seeking care. However, the success of this project rests on the ability to connect with the most vulnerable individuals who are on the periphery of the health care system. Mitigation: The PPS will engage members of the applicable communities, through contracts with community-based organizations, and train them in the PAM® methodology. The tool will be administered in several ways (e.g. spoken or read). For language-related literacy barriers, laypeople employed by CBOs in the non-English speaking communities will be trained to administer the tool. Resources in the community will be engaged early in the project to partner in meeting the needs for interpreter training and services.
3. Risk: It is anticipated that by successfully implementing patient activation activities, the increased volume of non-emergent care provided to UI, NU, and LU will heighten the demand for outpatient services. As a result, capacity constraints may be magnified beyond what is currently expected. Potential Impact: If the capacity of outpatient/primary care services are not able to meet the new demand for care, this will result in long waits, loss of potential new patients, loss of trust and interest by the target population. Mitigation: Forming strong partnerships with clinical providers and supporting them in implementing needed strategies, such as hiring additional staff, conducting more telephonic visits, and ensuring adequate pre-visit planning to assign responsibilities appropriately throughout the care team, will be very important.

✔ IPQR Module 2.d.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale
DY3,Q4	22,300

	Year,Quarter	DY3,Q1	DY3,Q2	DY3,Q3	DY3,Q4
PPS Reported	Baseline Commitment	5,550	11,100	16,700	22,300
	Quarterly Update	1,229	1,976	0	3,437
	Percent(%) of Commitment	22.14%	17.80%	0.00%	15.41%
IA Approved	Quarterly Update	0	1,961	0	3,414
	Percent(%) of Commitment	0.00%	17.67%	0.00%	15.31%

⚠ Warning: PPS Reported - Please note that your patients engaged to date (3,437) does not meet your committed amount (22,300) for 'DY3,Q4'

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

For Project 2.d.i our actively engaged patient targets were not met. This project continues to struggle to meet its actively engaged patient targets due to identified barriers and issues:

- Reporting continues to be an issue within this project, out of the 54 contracted organizations only 29 organizations are reporting. This number has increased within the quarter but not at a rate to meet our targets.
- Organizations continue to have difficulties in identifying eligible patients (uninsured, low-utilizing, non-utilizing). CNYCC continues to work with partners with trained staff in deploying them to "hot spot" areas.
- Organizations report not having the staffing resource to dedicate staff specifically to this project. Most organizations have incorporated this

**New York State Department Of Health
 Delivery System Reform Incentive Payment Project
 DSRIP Implementation Plan Project**

Central New York Care Collaborative (PPS ID:8)

project into the workflow of their current staff, but other duties are often prioritized over conducting PAM® Screenings. CNYCC continues to work with organizations providing guidance and strategies for better implementation of this project. CNYCC currently have over 500 trained PAM® Coaches, 45 are PAM® Trainers. CNYCC continues to provide quarterly trainings in the Patient Activation Measure® and Coaching For Activation and Train-The-Trainer sessions. CNYCC continues to work to engage new organizations within the "hot spot" areas in effort to outreach to the uninsured, low-utilizing, and non-utilizing population.

Contract or partner with community-based organizations (CBOs) to engage target populations using PAM(R) and other patient activation techniques. The PPS must provide oversight and ensure that engagement is sufficient and appropriate.	For Project 2.d.i Milestone 1, "Contract or partner with community-based organizations (CBOs) to engage target populations using PAM® and other patient activation techniques. The PPS must provide oversight and ensure that engagement is sufficient and appropriate" is complete. In the Patient Activation (2di) CNYCC partnered/contracted with 25 Community Based Organizations to engage the targeted population of Uninsured, Medicaid Low/Non-Utilizing population.
Establish a PPS-wide training team, comprised of members with training in PAM(R) and expertise in patient activation and engagement.	
Identify UI, NU, and LU "hot spot" areas (e.g., emergency rooms). Contract or partner with CBOs to perform outreach within the identified "hot spot" areas.	
Survey the targeted population about healthcare needs in the PPS' region.	
Train providers located within "hot spots" on patient activation techniques, such as shared decision-making, measurements of health literacy, and cultural competency.	For Project 2.d.i Milestone 5, "Train providers located within "hot spots" on patient activation techniques, such as shared decision-making, measurements of health literacy, and cultural competency" is complete. In the Patient Activation (2di) project CNYCC has facilitated 22 trainings in the Patient Activation Measure (PAM), Coaching For Activation (CFA), and/or in Healthcare Options and Connectivity. To date we have 509 Trained PAM Coaches (Navigators). These individuals are located in the "hot spot" areas throughout the six CNY counties. Of the 509 individual's trained, there are 45 "PAM Trainers" who attended the Train-The-Trainer sessions and are able to train individuals' within their organization.
Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome measurements in #10). <ul style="list-style-type: none"> This patient activation project should not be used as a mechanism to inappropriately move members to different health plans and PCPs, but rather, shall focus on establishing connectivity to resources already available to the member. Work with respective MCOs and PCPs to ensure proactive outreach to beneficiaries. Sufficient information must be provided regarding insurance coverage, language resources, and availability of primary and preventive care services. The state must review and approve any educational materials, which must comply with state marketing guidelines and federal regulations as outlined in 42 CFR §438.104. 	
Baseline each beneficiary cohort (per method developed by state) to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for each cohort at the beginning of each performance period"	For Project 2.d.i Milestone 7, "Baseline each beneficiary cohort (per method developed by state) to appropriately identify cohorts using PAM® during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for each cohort at the beginning of each performance period" is complete. In the Patient Activation (2di) project CNYCC baseline each beneficiary cohort to appropriately identify cohorts using PAM® and also set intervals towards improvement. In some areas CNYCC was able to meet some of the targets for improvement but mainly struggled to show improvement. There were various factors that

performance period.	lead to our inability to consistently meet interval targets such as low actively engaged number and extremely low PAM® re-administration numbers.
Include beneficiaries in development team to promote preventive care.	
<p>Measure PAM(R) components, including:</p> <ul style="list-style-type: none"> • Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot spot" area for health service. • If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using PAM(R) survey and designate a PAM(R) score. • Individual member's score must be averaged to calculate a baseline measure for that year's cohort. • The cohort must be followed for the entirety of the DSRIP program. • On an annual basis, assess individual members' and each cohort's level of engagement, with the goal of moving beneficiaries to a higher level of activation. • If the beneficiary is deemed to be LU & NU but has a designated PCP who is not part of the PPS' network, counsel the beneficiary on better utilizing his/her existing healthcare benefits, while also encouraging the beneficiary to reconnect with his/her designated PCP. • The PPS will NOT be responsible for assessing the patient via PAM(R) survey. • PPS will be responsible for providing the most current contact information to the beneficiary's MCO for outreach purposes. • Provide member engagement lists to relevant insurance companies (for NU & LU populations) on a monthly basis, as well as to DOH on a quarterly basis. 	<p>Original Submission:</p> <p>For Project 2.d.i Milestone 9, "Measure PAM(R) components, including:</p> <ul style="list-style-type: none"> • Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot spot" area for health service. • If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using PAM(R) survey and designate a PAM(R) score. • Individual member's score must be averaged to calculate a baseline measure for that year's cohort. • The cohort must be followed for the entirety of the DSRIP program. • On an annual basis, assess individual members' and each cohort's level of engagement, with the goal of moving beneficiaries to a higher level of activation. • If the beneficiary is deemed to be LU & NU but has a designated PCP who is not part of the PPS' network, counsel the beneficiary on better utilizing his/her existing healthcare benefits, while also encouraging the beneficiary to reconnect with his/her designated PCP. • The PPS will NOT be responsible for assessing the patient via PAM(R) survey. • PPS will be responsible for providing the most current contact information to the beneficiary's MCO for outreach purposes. • Provide member engagement lists to relevant insurance companies (for NU & LU populations) on a monthly basis, as well as to DOH on a quarterly basis" is complete. In the Patient Activation (2di) project CNYCC partnered with organizations in "hot spot" areas to survey LU, NU, and UI population utilizing the PAM® to obtain their Level of Activation and Score. Health coaching was also provided to connect individuals to Medicaid enrollment services, also utilizing CNYCC's Primary Scheduling Resources connect or re-connect them to a primary care doctor and any other services as appropriate. <p>Remediation Submission:</p> <p>In the original submission, CNYCC failed to provide documentation that included the following:</p> <p>Metric: Performance measurement reports established, including but not limited to:</p> <ul style="list-style-type: none"> - Number of clinicians trained in PAM® survey implementation. - Number of patient: PCP bridges established. - Number of patients identified, linked by MCOs to which they are associated. - Member engagement lists to relevant insurance companies (for NU & LU populations) on a monthly basis. - Member engagement lists to DOH (for NU & LU populations) on a monthly basis. - Annual report assessing individual member and the overall cohort's level of engagement. <p>CNYCC has provided this information in the updated Remediation Documentation.</p>
Increase the volume of non-emergent (primary, behavioral, dental) care provided to UI, NU, and LU persons.	<p>For Project 2.d.i Milestone 10, "Increase the volume of non-emergent (primary, behavioral, dental) care provided to UI, NU, and LU persons" is complete. In the Patient Activation (2di) project CNYCC baseline the Uninsured, Medicaid Low/Non-Utilizing population's utilization of non-emergent care, which consisted of the categories of Primary Care, Chemical Dependency, Mental Health, and Dental. The baseline data represented the period of December 1, 2015 to November 30, 2016. This information was compared against the data for the period of December 1, 2016 to November 30, 2017. The Salient Interactive Miner was used to obtain claims data for the specified categories. CNYCC was only able to obtain data in the category of Primary Care utilization for the Uninsured population, based on a registry submitted to us by our Primary Care Providers. The results varied across the targeted population. The Uninsured population showed increase in Primary Care utilization for Onondaga and Oneida County, but decreased in Cayuga, Lewis, Madison, and Oswego. There was noticeable improvement in the Low-Utilizer population in all six counties for Dental, Primary</p>

Milestone Name	Narrative Text
	Care, Chemical Dependency, and Mental Health (for mental health Madison County showed a decrease and there was no change in Lewis County). In addition there was a lowered number of Non-Utilizers which indicates improvement in utilization across all categories.
Contract or partner with CBOs to develop a group of community navigators who are trained in connectivity to healthcare coverage, community healthcare resources (including for primary and preventive services) and patient education.	<p>For Project 2.d.i Milestone 11, "Contract or partner with CBOs to develop a group of community navigators who are trained in connectivity to healthcare coverage, community healthcare resources (including for primary and preventive services) and patient education" is complete. In the Patient Activation (2di) project CNYCC has facilitated 22 trainings in the Patient Activation Measure (PAM), Coaching For Activation (CFA), Healthcare Options and Connectivity, and/or in Primary and Preventive Care Resources. To date we have 509 Trained PAM Coaches (Navigators). Of the 509 individuals trained, there are 45 "PAM Trainers" who attended the Train-The-Trainer sessions and are able to train individuals within their organization. Individuals received training either by CNYCC or designated PAM Trainers.</p> <p>The PAM® provider speed & scale list uploaded as a separate excel file to this milestone (containing 510 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (200) for speed & scale purposes.</p>
Develop a process for Medicaid recipients and project participants to report complaints and receive customer service.	
Train community navigators in patient activation and education, including how to appropriately assist project beneficiaries using the PAM(R).	
Ensure direct hand-offs to navigators who are prominently placed at "hot spots," partnered CBOs, emergency departments, or community events, so as to facilitate education regarding health insurance coverage, age-appropriate primary and preventive healthcare services and resources.	<p>For Project 2.d.i Milestone 14, "Ensure direct hand-offs to navigators who are prominently placed at "hot spots," partnered CBOs, emergency departments, or community events, so as to facilitate education regarding health insurance coverage, age-appropriate primary and preventive healthcare services and resources" is complete. In the Patient Activation (2di) project CNYCC requested organizations to provide documentation of all active PAM Coaches and their location, requesting a description of the "high visibility" area. CNYCC condensed the documents into one, which outlines all submissions.</p> <p>The PAM® provider speed & scale list uploaded as a separate excel file to this milestone (containing 510 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (200) for speed & scale purposes.</p>
Inform and educate navigators about insurance options and healthcare resources available to UI, NU, and LU populations.	For Project 2.d.i Milestone 15, "Inform and educate navigators about insurance options and healthcare resources available to UI, NU, and LU populations" is complete. In the Patient Activation (2di) project in order to educate PAM Coaches about insurance options and healthcare resources available to the target population CNYCC trained individuals on the Primary Care Scheduling Resource, which is a document consisting of all primary care providers within the CNY six county region accepting Medicaid patients and how to connect and reconnect them to providers. In addition, CNYCC provided the Healthcare Options and Connectivity Training to train PAM Coaches on Medicaid healthcare options and how to connect individuals. This training is offered in all PAM/CFA Trainings as of 3/14/2018 and is also available via CNYCC Learning Management System HWApps (allows individuals to access the training via the web).
Ensure appropriate and timely access for navigators when attempting to establish primary and preventive services for a community member.	For Project 2.d.i Milestone 16, "Ensure appropriate and timely access for navigators when attempting to establish primary and preventive services for a community member" is complete. In the Patient Activation (2di) project CNYCC incentivizes organizations to train intake staff on a process to receive referrals from PAM Coaches and scheduling primary care and preventive care appointments within 60 days of referral. This process would be inclusive of obtaining the patient's PAM Level and Score and coordinating care based on the patient's activation level.
Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, to track all patients engaged in the project.

Project 3.a.i – Integration of primary care and behavioral health services

✓ IPQR Module 3.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1 Risk: Shortages of trained behavioral health providers is a threat to this project, including psychiatrists and other prescribers. Historically, it has been difficult to recruit health care professionals to rural areas. Participant feedback from the CNYCC Partner meetings indicates PCPs are hesitant to conduct mental health screenings if referral services are lacking or there is a long wait to for an appointment. While integration is expected to resolve some of this access problem, there will be patients identified through the behavioral health screening who require more intense or higher level behavioral health services than can be accommodated in an integrated model. Providers fear identifying a potentially intensifying mental health condition that they are not trained to treat. When behavioral health screenings are routinely conducted as part of the integration plans, the number of patients requiring mental health services will increase thereby exacerbating the provider shortage. Potential Impact: The lack of mental health providers has the potential to destabilize integrated care. If there is a shortage of behavioral health providers, CNYCC will be unable to meet goals for integrating behavioral health and primary care, and patient health will suffer. Mitigation: Approaches are required to optimize the use of existing resources as well as to recruit new providers. One solution may be to explore best practices for the use of providers' time with regard to optimizing the ratio of walk-in appointments for urgent care and scheduled appointments. Tele-psychiatry is another way to maximize the use provider time by saving the time required to drive between sites because many providers contract to multiple health care organizations. An additional solution to the shortage of prescribers may result from the successful co-location of PC and BH, in which a primary care provider will feel more comfortable prescribing to a patient with a psychiatric colleague as a consult. A final approach to expand the work force for behavioral health services is to actively engage and recruit students in the NP psychiatry program.

2. Risk: Partial or incomplete integration of PC and BH is a risk, especially for sites that are newly integrating, due to differences in training and culture between BH and physical health. Simply co-locating services without developing evidence-based standards to integrate clinical practices and cultures will lead to services that are housed under the same roof, but lack coordination and provider support. A theme that arose during the Regional Partner Meetings was the necessity to integrate clinical cultures. Potential Impact: Poorly integrated services could result in possessiveness of patients, poor care coordination, and the perception that one practice type is inferior to the other. Any of these scenarios could hinder provider engagement in the project and result in low patient satisfaction. Mitigation: It takes time and training to learn how to share in the responsibility for a patient, to conduct warm hand-offs, and to develop joint care plans. CNYCC partners suggest that there is a central support team to support this activity; for example, employing a learning collaborative approach where all integrating practices join together to learn from one another as well as engage external training where needed. Clarification of the regulations for sharing patient information and interoperable EMRs will also facilitate the complexities of integration. DY 2 Q1 6/30/2016 Update: Cross project collaboration has also supported culture shift as cross collaborative work has been addressing topics of joint care plans, overlap of PCMH and multi-function staffing models.

✔ IPQR Module 3.a.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Central New York Care Collaborative (PPS ID:8)

Module Review Status

Review Status	IA Formal Comments
Fail	The PPS failed to meet at least 80% of its Actively Engaged commitments for DY3,Q4.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Central New York Care Collaborative (PPS ID:8)

✅ IPQR Module 3.a.i.3 - Prescribed Milestones

Models Selected		
Model 1	Model 2	Model 3

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Project Model Name	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Co-locate behavioral health services at primary care practice sites. All participating eligible primary care practices must meet 2014 NCQA level 3 PCMH or Advance Primary Care Model standards by DY 3.	DY3 Q4	Model 1	Project	N/A	Completed	08/04/2015	03/31/2018	08/04/2015	03/31/2018	03/31/2018	DY3 Q4
Task All eligible practices meet NCQA 2014 Level 3 PCMH and/or APCM standards by the end of DY3.			Provider	<u>Practitioner - Primary Care Provider (PCP)</u>	Completed	08/04/2015	03/31/2018	08/04/2015	03/31/2018	03/31/2018	DY3 Q4
Providers Associated with Completion:											
Abdelwahab Hend Mohamed											
Task Behavioral health services are co-located within PCMH/APC practices and are available.			Provider	<u>Mental Health</u>	Completed	08/04/2015	03/31/2018	08/04/2015	03/31/2018	03/31/2018	DY3 Q4
Providers Associated with Completion:											
Alao Adekola O Md											
Task 1. Identify all participating safety net primary care practices and associated providers			Project		Completed	08/04/2015	12/31/2015	08/04/2015	12/31/2015	12/31/2015	DY1 Q3
Task 2. Establish HIT/HIE and Primary Care Transformation workgroups.			Project		Completed	08/04/2015	01/31/2016	08/04/2015	01/31/2016	03/31/2016	DY1 Q4
Task 3.a) Engage and collaborate with RHIO HealthConnections to define Meaningful Use Stage 2 requirements and align/incorporate PPS project strategies with those requirements.			Project		On Hold	04/01/2015	03/31/2020	04/01/2015	03/31/2020	03/31/2020	DY5 Q4
Task			Project		Completed	09/01/2015	12/31/2015	09/01/2015	12/31/2015	12/31/2015	DY1 Q3

**New York State Department Of Health

Central New York Care Collaborative (PPS ID:8)

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Project Model Name	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
3b) Engage and collaborate with PCMH Certified Content Expert to review NCQA PCMH 2014 Level 3 requirements and integrate PPS project strategies into a PCMH baseline assessment tool and implementation strategy for primary care providers.											
Task 4. Provide HIT/HIE and Primary Care Transformation Workgroups education regarding MU Stage 2 and NCQA PCMH 2014. Education will include review of MU Stage 2 measures, NCQA 2014 standards, scoring, and recognition process.			Project		Completed	02/01/2016	04/08/2016	02/01/2016	04/08/2016	06/30/2016	DY2 Q1
Task 5. Identify practice transformation champions to drive HIT/HIE and PCMH implementation for each primary care practice.			Project		Completed	08/04/2015	01/31/2016	08/04/2015	01/31/2016	03/31/2016	DY1 Q4
Task 6. Conduct baseline assessments of providers/practices' MU Stage 2 and PCMH 2014 statuses.			Project		Completed	09/01/2015	12/31/2015	09/01/2015	12/31/2015	12/31/2015	DY1 Q3
Task 7. Devise cohort groups and facilitate learning collaborative sessions to support practices in successful MU Stage 2 attestation and PCMH 2014 implementations.			Project		Completed	07/01/2016	09/30/2016	07/01/2016	09/30/2016	09/30/2016	DY2 Q2
Task 8. Devise a detailed MU Stage 2 and PCMH 2014 implementation plan for each provider/practice. As MU Stage 2 measures are embedded in PCMH 2014 standards both will be assessed and implemented concurrently.			Project		Completed	07/01/2016	09/30/2016	07/01/2016	09/30/2016	09/30/2016	DY2 Q2
Task 9. Deploy MU Stage 2 and PCMH 2014 or APCM implementation plans for each participating provider/practice. The project plan milestones include: • Policy and workflow development and implementation • Care team development and role definition; care			Project		Completed	07/01/2016	09/01/2016	07/01/2016	09/01/2016	09/30/2016	DY2 Q2

DSRIP Implementation Plan Project**

Central New York Care Collaborative (PPS ID:8)

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Project Model Name	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Task 2a. Collect protocols in use by practices			Project		Completed	06/15/2015	06/30/2016	06/15/2015	06/30/2016	06/30/2016	DY2 Q1
Task 2b. Review literature for evidence-based protocols related to integrated services			Project		Completed	06/15/2015	06/30/2016	06/15/2015	06/30/2016	06/30/2016	DY2 Q1
Task 2b. Review literature for evidence-based protocols related to integrated services			Project		Completed	01/01/2016	06/30/2016	01/01/2016	06/30/2016	06/30/2016	DY2 Q1
Task 2c. Recommend evidence-based protocols for review by CNYCC Clinical Governance Committee			Project		Completed	05/01/2016	06/30/2016	05/01/2016	06/30/2016	06/30/2016	DY2 Q1
Task 2d. Disseminate evidence-based protocols to all participating practices			Project		Completed	07/01/2016	03/31/2017	07/01/2016	03/31/2017	03/31/2017	DY2 Q4
Task 3. Review OMH, OASAS, and DOH regulations, licensing, and reimbursement policies regarding integrated services			Project		Completed	06/15/2015	12/31/2015	06/15/2015	12/31/2015	12/31/2015	DY1 Q3
Milestone #3 Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.	DY3 Q4	Model 1	Project	N/A	Completed	06/15/2015	03/31/2018	06/15/2015	03/31/2018	03/31/2018	DY3 Q4
Task Policies and procedures are in place to facilitate and document completion of screenings.			Project		Completed	06/15/2015	03/31/2018	06/15/2015	03/31/2018	03/31/2018	DY3 Q4
Task Screenings are documented in Electronic Health Record.			Project		Completed	06/15/2015	03/30/2018	06/15/2015	03/30/2018	03/31/2018	DY3 Q4
Task At least 90% of patients receive screenings at the established project sites (Screenings are defined as industry standard questionnaires such as PHQ-2 or 9 for those screening positive, SBIRT).			Project		Completed	10/01/2015	03/31/2018	10/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task Positive screenings result in "warm transfer" to behavioral health provider as measured by documentation in Electronic Health Record.			Provider	<u>Practitioner - Primary Care Provider (PCP)</u>	Completed	10/01/2015	03/31/2018	10/01/2015	03/31/2018	03/31/2018	DY3 Q4
Providers Associated with Completion:											

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Co-locate behavioral health services at primary care practice sites. All participating eligible primary care practices must meet 2014 NCQA level 3 PCMH or Advance Primary Care Model standards by DY 3.	<p>Project 3ai Milestone 1, Metric 1, ("All eligible practices meet NCQA 2014 Level 2 PCMH and/or APCM standards.") due 3/31/18 has been completed. The attached excel document has four tabs. The first is a list of our network partners' eligible primary care providers. The second tab lists the NCQA PCMH Level 3 providers. The third tab lists those providers that met the requirements for Gate 2 APC. CNYCC has no NCQA PCMH Level 2 practices/providers that are currently seeking add-ons.</p> <p>Project 3ai Milestone 1, Metric 2, ("Behavioral health services are co-located within PCMH/APC practices and are available") due 3/31/18 has been completed. The attached document demonstrates a list of behavioral health practice schedules at PCMH and/or APCM sites.</p> <p>The PCP speed & scale list uploaded as a separate excel file to this milestone (containing 397 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (256) for speed & scale purposes.</p> <p>The mental health provider speed & scale list uploaded as a separate excel file to this milestone (containing 227 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (58) for speed & scale purposes.</p> <p>Remediation: Over 100% of the number of committed providers (from CNYCC's original Speed & Scale submission for this project) have achieved either NCQA PCMH Level 3 recognition or APC certification.</p>

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	<p>In addition to the PCMH and APC lists of recognized or certified providers, the submitted documentation included at the DOH's request a current list of all PPS currently eligible providers which includes new providers that are not part of the number originally committed to by CNYCC.</p> <p>The discrepancy between CNYCC's assertion that over 100% of committed providers have achieved PCMH or APC standards versus the IA's calculation that only 91% of eligible providers have achieved NCQA recognition is that CNYCC included new providers beyond the committed number in the "eligible" tab of our PCMH/APC documentation. Partners are continually recruiting new physicians and some have even opened new primary care locations in the months preceding submission of this milestone. These sites/providers are technically eligible for recognition and were reported as such. However, these newly added providers were not included in the number that CNYCC committed would complete the milestone by its prescribed due date.</p>
Develop collaborative evidence-based standards of care including medication management and care engagement process.	
Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.	<p>Project 3ai Milestone 3, Metric 1, ("Policies and procedures are in place to facilitate and document completion of screenings") due 3/31/18 has been completed. The attached document is the screening policies and procedures used to conduct preventative care screenings, including behavioral health screenings.</p> <p>Project 3ai Milestone 3, Metric 2, ("Screenings are documented in Electronic Health Record") due 3/31/18 has been completed. The attached document demonstrates evidence that the system is an EHR certified vendor.</p> <p>Project 3ai Milestone 3, Metric 3, ("At least 90% of patients receive screenings at the established project sites") due 3/31/18 has been completed. The attached document is a roster of identified patients and the number of screenings completed.</p> <p>Project 3ai Milestone 3, Metric 4, ("Positive screenings result in 'warm transfer' to behavioral health provider as measured by documentation in Electronic Health Record") due 3/31/18 has been completed. The attached document is sample EHR demonstrating that warm transfers have occurred.</p> <p>The PCP speed & scale list uploaded as a separate excel file to this milestone (containing 462 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (256) for speed & scale purposes.</p>
Use EHRs or other technical platforms to track all patients engaged in this project.	
Co-locate primary care services at behavioral health sites.	<p>Project 3ai Milestone 5, Metric 1, ("Primary care services are co-located within behavioral health practices and are available") due 3/31/18 has been completed. The attached document demonstrates a list of behavioral health practice schedules at PCMH and/or APCM sites.</p> <p>The mental health provider speed & scale list uploaded as a separate excel file to this milestone (containing 227 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (58) for speed & scale purposes.</p> <p>The PCP speed & scale list uploaded as a separate excel file to this milestone (containing 636 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (256) for speed & scale purposes.</p>
Develop collaborative evidence-based standards of care including medication management and care engagement process.

Project 3.a.ii – Behavioral health community crisis stabilization services

✓ IPQR Module 3.a.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1. Risk: Shortages of trained behavioral health (BH) providers, particularly psychiatrists and other "prescribers" is a threat to this project. The need for pediatric psychiatry and support services for families with children in crisis is particularly high. In some regions of CNY, inpatient BH services are so scant that families must travel to other parts of the State. The remote nature of communities poses a particular challenge in recruitment of such professionals, but it is a region-wide issue. Potential Impact: Without accessibility of trained behavioral health professionals, patients are more likely to reach a crisis condition and more likely to seek care at the ED or hospital. Mitigation: One means of addressing this challenge is to employ the use of telepsychiatry to link crisis intervention hubs to spoke locations and facilitate the sharing of specialized psychiatry resources. Telepsychiatry may be particularly beneficial in rural areas where it is difficult to recruit providers and patients and their families need to drive long distances in order to access mental health services.
2. Risk: The success of this project hinges on collaboration and coordination with police, school staff such as nurses and guidance counselors, as well as first responders. Training of police, school, and emergency responder personnel to the availability of crisis stabilization services and when and how to access such services is needed. Potential Impact: If key professionals are not trained in the existence of crisis stabilization services as part of the project implementation process they will not be aware of the crisis stabilization services and individuals in crisis will be unnecessarily brought to the ED or hospitalized. Mitigation: Some partners have already implemented such trainings and will provide direction and lessons learned. Mobile outreach services also exist in a number of other CNYCC counties. Partners have identified the Memphis Crisis Intervention Team model as a robust approach to implement crisis stabilization services. The Memphis model is an innovative police-based first responder program that diverts those in mental health crisis from incarceration and links them to mental health services. The program provides law enforcement based crisis intervention training to support individuals with mental illness. Mental Health First Aid trainings can also be offered to any provider or community support agency in an effort to increase awareness and improve prevention efforts.
3. Risk: Transportation is a challenge. This includes transportation to assessment and evaluation sites, to CPEP if needed, as well as to and from appointments outside of the crisis incident. A specific challenge for Lewis County is that there are no inpatient care or outpatient mental health services and the nearest transfer center is not in the PPS. Potential Impact: If transportation services are not available patients may not be able to access BH services when they are in a crisis state or outside of the crisis when ongoing care is required. Mitigation: ACT programs and Health Homes may serve as potential resources to alleviate transportation challenges for BH services and more broadly for other types of health care. For patients who are not in a crisis state, telepsychiatry is an approach to address the long distance that patients may need to travel to access services. Telepsychiatry may also be helpful in rural ERs that provide care to individuals in crisis, but do not have a psychiatrist on staff. Mobile Crisis Teams may be utilized to improve communication for parents, whose children are hospitalized in outside areas.

✔ IPQR Module 3.a.ii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale
DY4,Q4	32,670

	Year,Quarter	DY3,Q1	DY3,Q2	DY3,Q3	DY3,Q4
PPS Reported	Baseline Commitment	5,400	10,800	16,740	24,480
	Quarterly Update	3,776	7,624	0	13,824
	Percent(%) of Commitment	69.93%	70.59%	0.00%	56.47%
IA Approved	Quarterly Update	0	7,583	0	11,773
	Percent(%) of Commitment	0.00%	70.21%	0.00%	48.09%

⚠ Warning: PPS Reported - Please note that your patients engaged to date (13,824) does not meet your committed amount (24,480) for 'DY3,Q4'

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

The PPS is not meeting its AEP target for project 3aai due to slow rollout of additional crisis stabilization services via CNYCC RFP process. Additional crisis stabilization services have recently been operationalized, and with continued collaboration within the PPS, crisis stabilization services will be more readily available and widely utilized.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Implement a crisis intervention program that, at a minimum, includes outreach, mobile crisis, and intensive crisis services.	<p>Project 3aai Milestone 1, Metric 1, ("PPS has established a crisis intervention program that includes outreach, mobile crisis, and intensive crisis services") due 3/31/18 has been completed. The attached document is a narrative demonstrating successful implementation of project requirement.</p>
Establish clear linkages with Health Homes, ER and hospital services to develop and implement protocols for diversion of patients from emergency room and inpatient services.	<p>Project 3aai Milestone 2, Metric 1, ("PPS has implemented diversion management protocol with PPS Hospitals (specifically Emergency Departments)") due 3/31/18 has been completed. The attached document demonstrates the diversion management guidelines and protocols as requested in the documentation requirements.</p> <p>In order to meet this milestone, CNYCC convened a workgroup to develop the diversion guidelines and protocols. The workgroup met a total of six (6) times to develop materials to support the milestone. The primary target population is individuals being admitted or at risk of being admitted to the emergency room for behavioral health medication refills.</p> <p>This population was identified by the content experts in the workgroup as one that we could affect the greatest change in using our current resources. The workgroup members noted that individuals being admitted for medication refills made up a large number of the total admitted to the emergency room, and with the proper guidelines in place, could have a significant impact on decreasing the percentage of unnecessary hospital admissions. The intention is for organizations to incorporate parts or all of the guidelines to enhance their own existing process of avoiding unnecessarily hospitalizations due to medication refills.</p> <p>Remediation: The PPS believes the initial submission meets the outlined requirements. The best practice guidelines for Medication Refill Management was communicated to all partners on Project 3aai: Behavioral Health Crisis Stabilization through two avenues: 1) it was posted to the CNYCC project 3aai designated website by the project manager as well as emailed out to all partners participating on the project, and 2) was used as guidance for performance activity 053, "Enter into a service agreement between an Emergency Department and behavioral health provider that includes a process to connect patients to the most appropriate level of care and/or services in order to avoid transfers to CPEP."</p>

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	Updates to the Guidelines are initiated and drafted by the project manager. These changes are then presented to the Behavioral Health Quality Sub-Committee and Clinical Governance Committee for approval. Once the updates are approved through both committees, the updated guidelines is then presented and approved by the Board of Directors. All changes are communicated to project participants via similar channels as described above: the updated version is posted to the CNYCC project 3aii designated website by the project manager as well as emailed out to all partners participating on the project, and guidance is updated on CNYCC's website in conjunction with an email noting the changes to all partners assigned the performance activity.
Establish agreements with the Medicaid Managed Care organizations serving the affected population to provide coverage for the service array under this project.	Project 3aii Milestone 3, Metric 1, ("PPS Network providers/Partners have engaged MCO in negotiating coverage of service under this project and/or MCO provides coverage for services in this project.") due 3/31/18 has been completed. The attached document validates partners have either payment agreements/MOUs or have engaged in discussions with Managed Care Organizations that cover crisis stabilization services.
Develop written treatment protocols with consensus from participating providers and facilities.	
Include at least one hospital with specialty psychiatric services and crisis-oriented psychiatric services; expansion of access to specialty psychiatric and crisis-oriented services.	
Expand access to observation unit within hospital outpatient or at an off campus crisis residence for stabilization monitoring services (up to 48 hours).	<p>Project 3aii Milestone 6, Metric 1, ("PPS includes hospitals with observation unit or off campus crisis residence locations for crisis monitoring") due 3/31/18 has been completed. The attached document is a list of participating providers.</p> <p>Project 3aii Milestone 6, Metric 2, ("PPS evaluates access to psychiatric services (in terms of community needs assessment, geographic access, wait times, and other measures), identified improvement areas, and implements improvement steps") due 3/31/18 has been completed. The attached document is an access improvement plan which demonstrates how the PPS plans to improve access to psychiatric and crisis-oriented services as detailed in the project requirements.</p> <p>Remediation: The PPS is aware that it was not projected to meet this milestone due to provider speed and scale. CNYCC had internal discussions and decided to still submit documentation to demonstrate the strong efforts put forth by our participating partners to try and meet this milestone.</p>
Deploy mobile crisis team(s) to provide crisis stabilization services using evidence-based protocols developed by medical staff.	<p>Project 3aii Milestone 7, Metric 1, ("PPS includes crisis teams to help meet crisis stabilization needs of the community") due 3/31/18 has been completed. The attached document is a roster of the mobile crisis team members.</p> <p>Project 3aii Milestone 7, Metric 2, ("Coordinated evidence-based care protocols for mobile crisis teams are in place") due 3/31/18 has been completed. The attached document is an inventory of trainings completed.</p> <p>Remediation: In its initial submission, the PPS uploaded documentation of a list of training dates with future dates listed. This was due to a slight recording error, and the PPS has modified the training list document to reflect the correct training dates. In addition, the PPS also corrected the number of attendees that corresponded to the updated training dates. A revised training list with correct data is attached.</p>
Ensure that all PPS safety net providers have actively connected EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up by the end of Demonstration Year (DY) 3.	<p>Project 3aii Milestone 8, Metric 1, ("EHR demonstrates integration of medical and behavioral health record within individual patient records.") due 3/31/18 has been completed. Attached are EHR screenshots showing treatment by both medical and behavioral health providers.</p> <p>Project 3aii Milestone 8, Metric 2, ("EHR meets connectivity to RHIO's HIE and SHIN-NY requirements.") due 3/31/18 has been completed. The attached list includes a list of participation agreements with QE's.</p> <p>The safety-net hospital speed & scale list uploaded as a separate excel file to this milestone (containing 7 providers) supersedes the number of providers (only 1) selected</p>

	<p>in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (7) for speed & scale purposes.</p> <p>The safety-net mental health provider speed & scale list uploaded as a separate excel file to this milestone (containing 34 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (22) for speed & scale purposes.</p> <p>The safety-net non-PCP speed & scale list uploaded as a separate excel file to this milestone (containing 169 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (93) for speed & scale purposes.</p> <p>The safety net PCP speed & scale list uploaded as a separate excel file to this milestone (containing 97 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (17) for speed & scale purposes.</p> <p>Project 3a11 Milestone 8, Metric 3, ("PPS uses alerts and secure messaging functionality") due 3/31/18 has been completed. The attached documentation includes a documentation of organizations that receive and utilize both alerts and utilize secure messaging.</p> <p>Remediation: In its initial submission, the PPS uploaded a RHIO provided list of providers that subscribe to DIRECT messaging and RHIO alerts along with a statement describing an Attestation organizations provided to CNYCC stating: "Subscribe to HealtheConnections event notifications to receive admission and discharge alerts and discharge summary documents to accomplish necessary functions of an encounter notification system. Implement protocols to follow up with patients discharged from hospital within 72 hours of discharge." CNYCC has included the Attestations along with screenshots from three sampled organizations to demonstrate actual use of the DIRECT messaging and RHIO alerts along with a Direct messaging and RHIO alert usage report provided by the RHIO covering all participating partner organizations (which differs from the originally provided list of organizations that subscribe but do not necessarily utilize these RHIO capabilities). Please note that there may be partner organizations that utilize Direct messaging through a different HISP and therefore would not need RHIO direct services (and would not be contained this report).</p>
Establish central triage service with agreements among participating psychiatrists, mental health, behavioral health, and substance abuse providers.	Project 3a11 Milestone 9, Metric 1, ("PPS has implemented central triage service among psychiatrists and behavioral health providers") due 3/31/18 has been completed. The attached document is a roster of psychiatrists and behavioral health providers with which the PPS has operating agreements to implement central triage service.
Ensure quality committee is established for oversight and surveillance of compliance with protocols and quality of care.	
Use EHRs or other technical platforms to track all patients engaged in this project.

Project 3.b.i – Evidence-based strategies for disease management in high risk/affected populations (adult only)

✓ IPQR Module 3.b.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1. Risk: Primary care providers are a critical partner for this project. They are reporting actively engaged patients and will be a critical part of the team of providers who will help patients develop a self management plan. A risk is that CNYCC does not engage enough primary care providers to complete the project work and meet actively engaged patient targets and meet performance targets. Potential Impact: If primary care providers do not participate in the project, these complex patients risk moving forward without a self management plan. This means that CNYCC will not meet performance outcome and patient activation numbers, and further that the patients' health will fail to improve. Mitigation: CNYCC will continue to encourage additional PCPs and community partners who have yet to participate in the project to join. Additionally, CNYCC will continue to educate primary care providers on the alignment of 3.b.i project activities with PCMH . CNYCC sees strong alignment between these initiatives, and communicating this may allay some hesitations of PCPs that participation in the project will cause significant added burden.
2. Risk: There is an overall lack of awareness of available community resources that could benefit our most at risk patients, and thus services that could benefit patients in managing their own care are not being promoted. Information regarding service availability has been fragmented and there has been no vehicle for maintaining current information. This could impact the ability for patients to manage their own care and place more pressure than necessary on primary care providers to maintain current resources. In addition, community linkages are vital to a more population focused model of care. Mitigation: CNYCC has explored plans to use the PHM system as a mechanism for referrals to community based organizations. In addition, primary care providers will be working on tightening their referral processes with community based organizations and external care managers (Health Homes) including warm transfers and whether they collectively serve the needs of their patient population. In addition, CNYCC will continue to promote communications to build awareness and facilitate conversations between health care and community partners to work together to explore how programs, practices, and policies affect the health of individuals, families, and communities. We will continue to establish common goals, complementary roles, and ongoing constructive relationships between the health sector and community resource providers.

✓ IPQR Module 3.b.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale
DY4,Q4	25,460

	Year,Quarter	DY3,Q1	DY3,Q2	DY3,Q3	DY3,Q4
PPS Reported	Baseline Commitment	3,230	6,460	9,595	12,730
	Quarterly Update	2,750	5,266	0	9,131
	Percent(%) of Commitment	85.14%	81.52%	0.00%	71.73%
IA Approved	Quarterly Update	0	5,263	0	9,123
	Percent(%) of Commitment	0.00%	81.47%	0.00%	71.67%

Warning: PPS Reported - Please note that your patients engaged to date (9,131) does not meet your committed amount (12,730) for 'DY3,Q4'

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

CNYCC, for the first time, has not met the actively engaged patient targets for 3bi. In previous periods, we were just over the 80% threshold which has caught up with us in this period. In addition, we have had turnover of staff in our larger reporting partners where retraining was necessary to maintain consistent reporting. For many organizations, this remains a labor intensive process to report and confirm that their organization is meeting the requirements of documenting goals and reviewing them at each relevant visit. In addition, the targets are increasing in this period and in future periods and may be beyond the capacity of our contracted partners. Almost all of our primary care practices are currently contracted and reporting. In addition, the project manager continues to work with partners where opportunities to increase patient engagement exist. CNYCC is continuing to promote and will likely continue to incentivize partners to report AEP.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.	Project 3bi Milestone 1, Metric 1, ("PPS has implemented program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.") due 3/31/18 has been completed. The attached narrative outlines the various elements of the program put in place for this project.
Ensure that all PPS safety net providers are actively connected to EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the end of DY 3.	<p>Project 3bi Milestone 2, Metric 1, ("EHR meets connectivity to RHIO's HIE and SHIN-NY requirements") due 3/31/18 has been completed. The attached document validates the partners with participation agreements with HealtheConnections. The PPS has met the requirements for participation across the various provider types.</p> <p>Project 3bi Milestone 2, Metric 2, ("PPS uses alerts and secure messaging functionality.") due 3/31/18 has been completed. The attached document validates which partners have attested to the use of alerts and secure messaging and that have participation agreements with HealtheConnections.</p> <p>The safety-net mental health provider speed & scale list uploaded as a separate excel file to this milestone (containing 18 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (13) for speed & scale purposes.</p> <p>The safety-net PCP speed & scale list uploaded as a separate excel file to this milestone (containing 125 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (31) for speed & scale purposes.</p> <p>The safety-net non-PCP speed & scale list uploaded as a separate excel file to this milestone (containing 182 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (100) for speed & scale purposes.</p> <p>Remediation: In its initial submission, the PPS uploaded a RHIO provided list of providers that subscribe to DIRECT messaging and RHIO alerts along with a statement describing an Attestation organizations provided to CNYCC stating: "Subscribe to HealtheConnections event notifications to receive admission and discharge alerts and discharge summary documents to accomplish necessary functions of an encounter notification system. Implement protocols to follow up with patients discharged from hospital within 72 hours of discharge." CNYCC has included the Attestations along with screenshots from three sampled organizations to demonstrate actual use of the DIRECT messaging and RHIO alerts along with a Direct messaging and RHIO alert usage report provided by the RHIO covering all participating partner organizations (which differs from the originally provided list of organizations that subscribe but do not necessarily utilize these RHIO capabilities). Please note that there may be partner organizations that utilize Direct messaging through a different HISP and therefore would not need RHIO direct services (and would not be contained this report).</p>

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
<p>Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.</p>	<p>Project 3bi Milestone 3, Metric 1, ("EHR meets Meaningful Use Stage 2 CMS requirements (Note: any/all MU requirements adjusted by CMS will be incorporated into the assessment criteria") due 3/31/18 has been completed. The attached documentation lists the participating organizations, their EHR systems and their certification status.</p> <p>Project 3bi Milestone 3, Metric 2, ("PPS has achieved NCQA Level 3 PCMH standards and/or APCM.") due 3/31/18 has been completed. The attached excel document has five tabs, including an instruction tab. The second tab is a list of our network partners' eligible primary care providers. The third tab lists the NCQA PCMH Level 3 providers. The fourth tab lists those providers that met the requirements for Gate 2 APC. CNYCC has no NCQA PCMH Level 2 practices/providers that are currently seeking add-ons.</p> <p>The speed & scale list uploaded as a separate excel file to this milestone (containing 388 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the target (206) for speed & scale purposes.</p> <p>Remediation: In its initial submission, the PPS uploaded documentation of all providers (safety-net and non-safety net) that met PCMH and/or APC certification. This was due to speed and scale for this Milestone reflecting all providers (not just safety net as the Milestone description describes). The PPS has modified the PCMH/APC list to reflect only safety-net providers that have received recognition. All listed providers are safety-net.</p> <p>The listed safety-net providers in the "eligible" tab of our PCMH/APC documentation includes new providers beyond the committed number. Partners are continually recruiting new physicians and some have even opened new primary care locations in the months preceding submission of this milestone. These sites/providers are technically eligible for recognition and were reported as such. However, these newly added providers were not included in the safety-net number that CNYCC committed would complete the milestone by its prescribed due date.</p>
<p>Use EHRs or other technical platforms to track all patients engaged in this project.</p>	
<p>Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).</p>	<p>Project 3bi Milestone 5, Metric 1, ("PPS has implemented an automated scheduling system to facilitate tobacco control protocols.") due 3/31/18 has been completed. The attached document lists the partners with certified Electronic Health records and also details the Clinical Governance Committee's approved standards of care implemented by partner organizations to prompt providers to complete the 5 A's of tobacco control.</p> <p>Project 3bi Milestone 5, Metric 2, ("PPS provides periodic training to staff to incorporate the use of EHR to prompt the use of the 5A's of tobacco control.") due 3/31/18 has been completed. The attached training template details the training made available and completed by CNYCC partners. CNYCC is working with the Central New York Regional Center for Tobacco Health Systems. Their trainer, Dr. Beth Gero, has supported our efforts in this project with the development of a web-based training, available on our Learning Management System. In addition, CNYCC has facilitated in person trainings, by Dr. Gero at our partners' request. These trainings also incorporate tobacco cessation strategies.</p>
<p>Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.</p>	
<p>Develop care coordination teams including use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-management.</p>	
<p>Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.</p>	<p>Project 3bi Milestone 8, Metric 1, ("All primary care practices in the PPS provide follow-up blood pressure checks without copayment or advanced appointments.") due 3/31/18 has been completed. The attached document represents the documentation of the minimum requirements for policies and procedures pertaining to blood pressure</p>

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	checks, approved by CNYCC Clinical Governance Committee. Partner organizations' policies & procedures are available upon request.
Ensure that all staff involved in measuring and recording blood pressure are using correct measurement techniques and equipment.	
Identify patients who have repeated elevated blood pressure readings in the medical record but do not have a diagnosis of hypertension and schedule them for a hypertension visit.	<p>Project 3bi Milestone 10, Metric 1, ("PPS uses a patient stratification system to identify patients who have repeated blood pressure but no diagnosis of hypertension.") due 3/31/18 has been completed. The attached document validates the documented protocol for patient identification and follow-up which was approved by CNYCC Clinical Governance Committee to meet this project requirement.</p> <p>Project 3bi Milestone 10, Metric 2, ("PPS has implemented an automated scheduling system to facilitate scheduling of targeted hypertension patients.") due 3/31/18 has been completed. The attached document validates that 100 percent of partners that facilitate scheduling of targeted hypertension patients have EHR certified vendors.</p> <p>Project 3bi Milestone 10, Metric 3, ("PPS provides periodic training to staff to ensure effective patient identification and hypertension visit scheduling") due 3/31/18 has been completed. The attached document articulates the inventory of the PPS sponsored training and the number of partners' staff that have completed the training to date.</p>
Prescribe once-daily regimens or fixed-dose combination pills when appropriate.	
Document patient driven self-management goals in the medical record and review with patients at each visit.	<p>Project 3bi Milestone 12, Metric 1, ("Self-Management Goals are documented in the clinical record.") due 3/31/18 has been completed. The attached document validates that 89.5% of partners that reported 99.4% of actively engaged patients in DY3 for this project were audited by an independent auditor for CNYCC to validate appropriate reporting for this project. The audit consisted of validating that self-management goals were documented in the patient record and reviewed at each relevant visit, consistent with the actively engaged patient definition and the milestone requirements.</p> <p>Project 3bi Milestone 12, Metric 2, ("PPS provides training to staff on person-centered methods that include documentation of self-management goals.") due 3/31/18 has been completed. The attached document validates the training that the PPS developed and offered to partners on person-centered methods and documentation of self-management goals. Additionally, one partner developed their own training using the PPS required learning objectives for their 204 care team members. Included in the inventory is the nature of the training, the format, and the number of staff trained.</p> <p>Remediation: CNYCC Response: In its initial submission, the PPS uploaded an inventory of the audits conducted by an independent auditor consistent with CNYCC's Actively Engaged Patient Roster Verification Policy and Procedure (attached). The initial submission included the partner name and the date of the audit but failed to include the audit findings. In the updated submission, the PPS has added a new column to the list/inventory which includes the audit findings. The success rate reflects the number of patient records that met all requirements, as defined by the actively engaged patient definition and actively engaged patient roster verification policy and procedure. Follow-up from a failed audit is also detailed in the aforementioned policy.</p>
Follow up with referrals to community based programs to document participation and behavioral and health status changes.	<p>Project 3bi Milestone 13, Metric 1, ("PPS has developed referral and follow-up process and adheres to process.") due 3/31/18 has been completed. The attached workflow outlines the PPS developed procedure to refer to community based organizations and follow up in order to document participation and behavioral and health status changes.</p> <p>Project 3bi Milestone 13, Metric 2, ("PPS provides periodic training to staff on warm referral and follow-up process") due 3/31/18 has been completed. The training inventory describes the web-based training developed by the PPS on what a warm transfer is, what are best practices, as well as the importance of a follow-up process.</p>

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	Project 3bi Milestone 13, Metric 3, ("Agreements are in place with community based organizations and process is in place to facilitate feedback to and from community programs".) due 3/31/18 has been completed. The attached document validates that agreements are in place with community based organizations that will provide feedback to referring providers on patients' participation in the program.
Develop and implement protocols for home blood pressure monitoring with follow up support.	
Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.	
Facilitate referrals to NYS Smoker's Quitline.	
Perform additional actions including "hot spotting" strategies in high risk neighborhoods, linkages to Health Homes for the highest risk population, group visits, and implementation of the Stanford Model for chronic diseases.	<p>Project 3bi Milestone 17, Metric 1, (If applicable, PPS has implemented collection of valid and REAL (RACE, Ethnicity, and Language) data and uses the data to target high risk populations, develop improvement plans, and address top health disparities") due 3/31/18 has been completed. CNYCC is providing a workbook of all four cardiovascular disease management claims based metrics analyzed by race/ethnicity with data available through Salient to identify disparities in care focused on patients that are not meeting the performance targets aligned with this project. Further analysis to determine the zip codes where patients included in the numerator resided, with a focus on those race/ethnicity categories that were not meeting the targets. One example of this zip code drill down is included in uploaded documentation. This was then compared to where partner organization's primary care sites were located. This data was used because CNYCC's PHM platform is not yet available and language data is not available in Salient. Some differences in performance were seen between race/ethnicity as noted in the attached data analysis. This information is shared with partners in 3bi implementation meetings, Learning Collaborative, Care Coalitions, and with individual partners. Key strategies are identified in the last tab of the data analysis worksheet and include: primary care in key zip codes, health home agreements in place with partner organizations servicing those particular zip codes and working with other community partners to bring services to these communities, such as YMCA, Self-measured BP programs and public health offering CDSMP classes in locations where high risk patients reside.</p> <p>Project 3bi Milestone 17, Metric 2, ("PPS has established linkages to health homes for targeted patient populations") due 3/31/18 has been completed. The attached document represents the process/workflow including responsible parties for high risk patients to be linked to health homes, as well as the communication flow back to the referring provider.</p> <p>Project 3bi Milestone 17, Metric 3, ("If applicable, PPS has implemented Stanford Model through partnerships with community-based organizations.") due 3/31/18 has been completed. The attached document validates that referring partners and partners offering the Stanford model classes have established agreements to work together to offer the classes in areas where high risk patients reside. In addition, they have worked out referral processes that will allow the referring provider to get feedback on whether the patient attended the sessions.</p>
Adopt strategies from the Million Hearts Campaign.	
Form agreements with the Medicaid Managed Care organizations serving the affected population to coordinate services under this project.	Project 3bi Milestone 19, Metric 1, ("PPS Network Providers/Partners have agreement in place with MCO related to coordination of services for high risk populations, including smoking cessation services, hypertension screening, cholesterol screening, and other preventive services relevant to this project.") due 3/31/18 has been completed. The attached document validates partners have agreements in place with Managed Care Organizations that cover coordination of services for high risk populations, including smoking cessation services, hypertension screening, cholesterol screening, and other preventive services.
Engage a majority (at least 80%) of primary care providers in this project.

Project 3.g.i – Integration of palliative care into the PCMH Model

✓ IPQR Module 3.g.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

1. Risk: Societal views on death and dying may stymie the full potential of this project. Furthermore, health professionals are not always adequately trained and prepared to deliver "basic" or "primary" palliative care to patients, including lack of communication skills among providers to have honest, sensitive, and culturally competent conversations with patients and their caregivers on health status, goals, and advance directives. Potential Impact: Processes and systems may be put in place within PCMHs to provide basic palliative care services to patients in the primary care setting that ultimately are not meaningful to the patient and therefore not fully or even adequately addressing pain and symptom management of their disease or discussion of their health and treatment goals. As a result, palliative care patients may not have full understanding of their disease process, inability to self-manage and utilize services or resources within the community or health system to support management, and continue accessing urgent care through the ED, which could otherwise be prevented. Furthermore, patients may receive unwanted treatment if they haven't fully considered and/or documented their treatment options and preferences. Mitigation: Mitigation of this risk will depend on ensuring available and supported training opportunities for health care professionals participating in 3gi on palliative care and patient communication skills to develop competency and capacity in conversations on health status, care goals, and advance directives. The Conversation Ready Project (Institutes for Healthcare Improvement), Compassion and Support, and Centers to Advance Palliative Care are resources for these training needs. Second, providing public education and engagement about death, dying, and end-of-life care issues at the individual/patient, family/caregiver and community levels will help normalize conversations about death and dying and facilitate thoughtful and meaningful discussions with health care providers in establishing care goals, plans, and advance directives.
2. Risk: Palliative care is not a clear priority among primary care providers. Potential Impact: This project and/or palliative care have not been adopted as a priority component of providing comprehensive, quality, patient-centered care, resulting in slow uptake and implementation of this project leading to the PPS not achieving project milestones on time nor engaging patients per the planned timeline. Mitigation of this risk will require leadership at the PPS, regional, and practice levels, physician champions in each 3gi project practice, to provide vision and direction to comprehensively integrate palliative care into the outpatient/primary care setting.
3. Risk: A systematic way to identify and monitor palliative care patients is lacking. Potential Impact: If eligible palliative care patients are not identified within a practice and monitored for provision of appropriate services and supports to manage pain and symptoms associated with their disease, they will likely experience poor control and/or worsening of their symptoms that may result in otherwise preventable use of the ED and hospital. Mitigation: Introduction of a population health management platform within the PPS will enable the systematic identification and tracking of high risk populations and the ability to track their care throughout the continuum. In the interim, the outpatient palliative care population will be tracked through registries or reports built directly in the participating practice/organization EMRs.

✔ IPQR Module 3.g.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for Q4 should include patients previously reported in Q3 plus new patients engaged in Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

The Actively Engaged Patient target number for 3gi was not met for this quarter. This is due in part to the delayed implementation of the project by partner organizations and the challenge partners have with identifying higher volumes of eligible patients to report to the CNY Care Collaborative.

Module Review Status

Review Status	IA Formal Comments
Fail	The PPS failed to meet at least 80% of its Actively Engaged commitments for DY3,Q4.

✔ IPQR Module 3.g.i.3 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Integrate Palliative Care into appropriate participating PCPs that have, or will have, achieved NCQA PCMH and/or APCM certification.	DY3 Q4	Project	N/A	Completed	08/04/2015	03/31/2018	08/04/2015	03/31/2018	03/31/2018	DY3 Q4
Task PPS has identified primary care providers integrating palliative care services into their practice model. Primary care practices using PCMH and/or APCM have been included. The PPS has received agreement from those eligible PCPs not PCMH and/or APCM certified to become certified to at least Level 1 of the 2014 NCQA PCMH and/or APCM by Demonstration Year 3.		Provider	<u>Practitioner - Primary Care Provider (PCP)</u>	Completed	08/04/2015	03/31/2018	08/04/2015	03/31/2018	03/31/2018	DY3 Q4

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Integrate Palliative Care into appropriate participating PCPs that have, or will have, achieved NCQA PCMH and/or APCM certification.	<p>Project 3gi Milestone 1, Metric 1, ("PPS has identified primary care providers integrating palliative care services into their practice model. Primary care practices using PCMH and/or APCM have been included. The PPS has received agreement from those PCPs not PCMH and/or APCM certified to become certified to at least Level 1 of the 2014 NCQA PCMH and/or APCM by Demonstration Year 3.") due 3/31/18 has been completed. The attached document validates eligible partners using PCMH and/or APCM.</p> <p>The speed & scale list uploaded as a separate excel file to this milestone (containing 265 providers) supersedes the number of providers (only 1) selected in the dropdown for this milestone in order to resolve a MAPP system generated error message. The uploaded list accurately reflects the network partners that met the speed & scale target (171) for this milestone.</p>
Develop partnerships with community and provider resources including Hospice to bring the palliative care supports and services into the practice.	
Develop and adopt clinical guidelines agreed to by all partners including services and eligibility.	
Engage staff in trainings to increase role-appropriate competence in palliative care skills and protocols developed by the PPS.	
Engage with Medicaid Managed Care to address coverage of services.	Project 3gi Milestone 5, Metric 1, ("PPS Network Providers/Partners have established agreements with MCOs that address the coverage of palliative care supports and services.") due 3/31/18 has been completed. The attached document validates partners have agreements in place with Managed Care Organizations that covers palliative care supports and services including any quality and cost-beneficial treatment options to be provided by the MCO as part of the arrangement.
Use EHRs or other IT platforms to track all patients engaged in this project.

DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

Project 4.a.iii – Strengthen Mental Health and Substance Abuse Infrastructure across Systems

✓ IPQR Module 4.a.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

RISK: Geographic diversity is a challenge for project implementation; the CNYCC region is large and includes urban and rural areas, leading to differing priorities among partners. IMPACT: Failure of the Partnership to identify relevant strategic objectives, will result in continued operation under fragmented systems. MITIGATION: The RFP CNYCC will develop to fund new programs will require or reward cross-setting and regional collaborations. RISK: There is a significant need for workforce training for this project both in building provider capacity for service provision and supporting needed development that will in turn support project implementation across projects. IMPACT: Failure to build provider capacity will result in a continued strain on existing resources. Waiting lists for patients to be seen by a mental health provider remain long. MITIGATION: Partners have already begun exploring strategies to build provider capacity. Some rural partners are exploring telehealth and CNYCC will continue to support and learn from this effort. Other creative strategies are being employed. Encouraging shared language among behavioral health and primary care workforces has begun and will continue as part of the broader CNYCC Workforce strategy. RISK Population health management requires involvement from healthcare, public health, social institutions, and policymakers. Some providers have the capability to implement population health practices; many other organizations have a fairly steep learning curve, and may need time to prepare to implement these practices. IMPACT A PHM structure is necessary to better understand risk aggregation and embrace the tools to mitigate potential costs that come with caring for a set population. Technology in population health strategies is needed to continually identify, assess, and stratify provider panels. Moreover, physician groups can use technology and automation to augment integration and care, better manage patient populations, drive better outcomes, and decrease overall cost. MITIGATION First, it is going to be critical that training opportunities on PHM are available and marketed for multidisciplinary stakeholders and their partners. Second, some organizational leaders may need to diminish focus on individual health behavior but instead include knowledge and skill building on community engagement/empowerment, and advocacy for policy, systems, and environmental change that support healthy behaviors. Third, there will need to be an increased reliance on "experts" in a community. Much of this shift in thinking is already underway, where partners are raising these issues and using the knowledge that exists within the community to develop steps forward. RISK Stigmatization of people with mental disorders continues to persist. Stigmatization leads to marginalization and deters the public from seeking care. IMPACT If the stigmatization associated with mental health and substance abuse persists, prevention and treatment of mental illness and substance abuse disorders will continue to be a challenge. Reducing stigmatization associated with mental health and substance abuse will heighten public (including physicians and other influential individuals) awareness of the importance of preventing and treating mental health and substance abuse and subsequent funding opportunities. MITIGATION Overall approaches to stigma reduction involve programs of advocacy and contact with persons with mental illness through schools and other societal institutions. Awareness campaigns and training opportunities should be an integral part of the effort and can include facts about mental illness and substance use disorders; health literacy/language around mental health; and cultural competency.

Project 4.d.i – Reduce premature births

✔ IPQR Module 4.d.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The primary challenge will be to establish referral and information sharing systems between community-based non-clinical organizations and PCPs. Preventing preterm births remains a challenge because the causes of preterm births are numerous and complex and reducing the risk of preterm birth and improving health will require a collaborative approach between clinicians focusing on health improvement and community non-clinical organizations focusing on outreach, engagement, prevention, intervention and addressing issues related to social determinants of health. As a result, a focus will be the development of standardized protocols outlining referral steps, and minimum data sets, obtaining patient consent and defining critical information needing to be collected and shared. Collected information will be aggregated in the RHIO, as well as exchanged point-to-point through the use of Direct protocols. The establishment of a population health management platform by DY 3 will enable the systematic identification of high risk patients and the ability to track their care throughout the continuum. In the interim, the population will be tracked through registries or reports built directly in the EMRs.

An information sharing solution will be developed to take into account the varying levels, or entire lack thereof, of IT to assure timely and secure exchange of information between partners. The scarcity of Medicaid providers in some remote and rural locations in the region, exacerbated by the lack of transportation, presents added barriers to accessing timely prenatal care. Paraprofessionals such as lay health workers, peer counselors and community health workers being deployed in these areas will help to navigate Medicaid transportation services.

While activated and engaged clinical and non-clinical providers are a cornerstone to the project success, it will be necessary to work across DSRIP projects to assure CNYCC promotes systemness (Health Homes, 2.a.iii; Integration of BH and PC, 3.a.i) and develops an activated and engaged patients (PAM, 2.d.i). To address this issue the CNYCC will develop cross project objectives shared with the requisite Implementation Teams and to the extent necessary, appoint common Implementation Team members to assure cross-project collaboration.

PPS Defined Milestones Narrative Text

Milestone Name	Narrative Text
Create methodology for consistent identification of high risk pregnancy to inform prenatal service referral protocol(s)	
Training on: 5A's, presumptive eligibility, prenatal care standards and current guidelines on the management of preterm labor	
Establish common resource and referral protocols and extend to include existing, new, and expanded programs	
Recruitment and establishment of a network of paraprofessionals	
Expansion of CenteringPregnancy® and/or other innovated pregnancy education programs in areas where none currently exist	Project 4.d.i Milestone 1396, "Expansion of CenteringPregnancy® and/or other innovated pregnancy education programs in areas where none currently exist" is complete. CNYCC granted four organizations funding to implement the CenteringPregnancy® Model for Prenatal Care. The four organizations granted were Syracuse Community Health Center, Cathy Berry MD and Associates, Crouse Hospital, and Faxton St. Luke's Medical Center. All organizations have received the CenteringPregnancy® Basic Facilitation Training and began Centering groups. The goal is for each organization to become recognized by the Centering Health Institute as a Centering site.
Establishment and integration of common intake and enrollment protocols, referral, follow-up, and coordination of practices, and integration into information technology platforms.	For Project 4.d.i, Milestone 1397, "Establishment and integration of common intake and enrollment protocols, referral, follow-up, and coordination of practices, and integration into information technology platforms," has been completed. In order to accomplish this milestone CNYCC worked collaboratively with the Onondaga County Department of Health and HealthConnections (RHIO). The Onondaga County Department of Health (DOH) has licensed PeerPlace, an electronic platform that provides a common referral resource for pregnant women to be assessed and appropriate referrals to be made to link them to the appropriate level of care. Once an individual fills out the assessment, an employee of the DOH coordinates the linkage to the appropriate services. Once the referral is received by the receiving organization, that organization then alerts DOH that the referral has been reviewed. This process creates a common process in the coordination of referrals and a feedback loop on referrals to connect women to the appropriate level of care. HealthConnections is undertaking the outreach and engagement of the prenatal care organizations that are not presently utilizing the PeerPlace platform. The

Attestation

The Lead Representative has been designated by the Primary Lead PPS Provider (PPS Lead Entity) as the signing officiate for the DSRIP Quarterly Report. The Lead Representative has the authority to complete this attestation on behalf of the PPS network. The Lead Representative and PPS Lead Entity are responsible for the authenticity and accuracy of the material submitted in this report.

The Lead Representative of the Performing Provider System (PPS) must complete this attestation form in order for the project application to be accepted by the NYS Department of Health. Once the attestation is complete, the Quarterly Report will be locked down from any further editing. Do not complete this section until the entire Quarterly Report is complete.

If the Quarterly Report becomes locked in error and additional changes are necessary, please use the contact information on the Home Page to request that the Quarterly Report be unlocked.

To electronically sign this Quarterly Report, please enter the required information and check the box below:

I here by attest, as the Lead Representative of the 'Central New York Care Collaborative', that all information provided on this Quarterly report is true and accurate to the best of my knowledge, and that, following initial submission in the current quarterly reporting period as defined by NY DOH, changes made to this report were pursuant only to documented instructions or documented approval of changes from DOH or DSRIP Independent Assessor.

	Milestone #2 Create a workforce transition roadmap for achieving defined target workforce state.	Pass & Complete	
	Milestone #3 Perform detailed gap analysis between current state assessment of workforce and projected future state.	Pass & Complete	
	Milestone #4 Produce a compensation and benefit analysis, covering impacts on both retrained and redeployed staff, as well as new hires, particularly focusing on full and partial placements.	Pass & Complete	
	Milestone #5 Develop training strategy.	Pass & Complete	
	Module 11.10 - Staff Impact	Pass & Ongoing	
	Module 11.11 - Workforce Strategy Spending (Quarterly)	Fail	

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Central New York Care Collaborative (PPS ID:8)

Project ID	Module Name / Milestone #	Review Status	
2.a.i	Module 2.a.i.2 - Prescribed Milestones		
	Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	Pass & Ongoing	
	Milestone #2 Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.	Pass & Complete	
	Milestone #3 Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.	Pass & Complete	
	Milestone #4 Ensure that all PPS safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including directed exchange (secure messaging), alerts and patient record look up, by the end of Demonstration Year (DY) 3.	Pass & Complete	 
	Milestone #5 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.	Pass & Complete	 
	Milestone #6 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.	Pass & Ongoing	
	Milestone #7 Achieve 2014 Level 3 PCMH primary care certification and/or meet state-determined criteria for Advanced Primary Care Models for all eligible participating PCPs, expand access to primary care providers, and meet EHR Meaningful Use standards by the end of DY 3.	Fail	  
	Milestone #9 Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform.	Pass & Complete	
	Milestone #10 Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes.	Pass & Ongoing	
	Milestone #11 Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate.	Pass & Ongoing	
2.a.iii	Module 2.a.iii.2 - Patient Engagement Speed	Fail	  
	Module 2.a.iii.3 - Prescribed Milestones		
	Milestone #1 Develop a Health Home At-Risk Intervention Program, utilizing participating HHs as well as PCMH/APC PCPs in care coordination within the program.	Pass & Complete	
	Milestone #2 Ensure all eligible primary care providers participating in the project meet NCQA (2011) accredited Patient Centered Medical Home, Level 3 standards and will achieve NCQA 2014 Level 3 PCMH and Advanced Primary Care accreditation by Demonstration Year (DY) 3.	Fail	  
	Milestone #3 Ensure that all participating safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up.	Pass & Complete	 

New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

Project ID	Module Name / Milestone #	Review Status	
	Milestone #4 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM.	Pass & Complete	 
	Milestone #5 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.	Pass & Complete	
	Milestone #6 Develop a comprehensive care management plan for each patient to engage him/her in care and to reduce patient risk factors.	Pass & Complete	 
	Milestone #7 Establish partnerships between primary care providers and the local Health Home for care management services. This plan should clearly delineate roles and responsibilities for both parties.	Pass & Complete	
	Milestone #8 Establish partnerships between the primary care providers, in concert with the Health Home, with network resources for needed services. Where necessary, the provider will work with local government units (such as SPOAs and public health departments).	Fail	
	Milestone #9 Implement evidence-based practice guidelines to address risk factor reduction as well as to ensure appropriate management of chronic diseases. Develop educational materials consistent with cultural and linguistic needs of the population.	Pass & Complete	
2.b.iii	Module 2.b.iii.2 - Patient Engagement Speed	Fail	  
	Module 2.b.iii.3 - Prescribed Milestones		
	Milestone #1 Establish ED care triage program for at-risk populations	Pass & Complete	
	Milestone #2 Participating EDs will establish partnerships to community primary care providers with an emphasis on those that are PCMHs and have open access scheduling. a. Achieve NCQA 2014 Level 3 Medical Home standards or NYS Advanced Primary Care Model standards by the end of DSRIP Year 3. b. Develop process and procedures to establish connectivity between the emergency department and community primary care providers. c. Ensure real time notification to a Health Home care manager as applicable	Pass & Complete	 
	Milestone #3 For patients presenting with minor illnesses who do not have a primary care provider: a. Patient navigators will assist the presenting patient to receive an immediate appointment with a primary care provider, after required medical screening examination, to validate a non-emergency need. b. Patient navigator will assist the patient with identifying and accessing needed community support resources. c. Patient navigator will assist the member in receiving a timely appointment with that provider's office (for patients with a primary care provider).	Pass & Complete	
	Milestone #4 Established protocols allowing ED and first responders - under supervision of the ED practitioners - to transport patients with non-acute disorders to alternate care sites including the PCMH to receive more appropriate level of care. (This requirement is optional.)	Pass (with Exception) & Complete	
	Milestone #5 Use EHRs and other technical platforms to track all patients engaged in the project.	Pass & Complete	
2.b.iv	Module 2.b.iv.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 2.b.iv.3 - Prescribed Milestones		

New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project

Central New York Care Collaborative (PPS ID:8)

Project ID	Module Name / Milestone #	Review Status	
	Milestone #1 Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.	Pass & Complete	
	Milestone #2 Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.	Pass & Complete	 
	Milestone #3 Ensure required social services participate in the project.	Pass & Complete	 
	Milestone #4 Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services.	Pass & Complete	
	Milestone #5 Protocols will include care record transitions with timely updates provided to the members' providers, particularly primary care provider.	Pass & Complete	
	Milestone #6 Ensure that a 30-day transition of care period is established.	Pass & Complete	
	Milestone #7 Use EHRs and other technical platforms to track all patients engaged in the project.	Pass & Complete	
2.d.i	Module 2.d.i.2 - Patient Engagement Speed	Fail	  
	Module 2.d.i.3 - Prescribed Milestones		
	Milestone #1 Contract or partner with community-based organizations (CBOs) to engage target populations using PAM(R) and other patient activation techniques. The PPS must provide oversight and ensure that engagement is sufficient and appropriate.	Pass & Complete	 
	Milestone #2 Establish a PPS-wide training team, comprised of members with training in PAM(R) and expertise in patient activation and engagement.	Pass & Complete	
	Milestone #3 Identify UI, NU, and LU "hot spot" areas (e.g., emergency rooms). Contract or partner with CBOs to perform outreach within the identified "hot spot" areas.	Pass & Complete	
	Milestone #4 Survey the targeted population about healthcare needs in the PPS' region.	Pass & Complete	
	Milestone #5 Train providers located within "hot spots" on patient activation techniques, such as shared decision-making, measurements of health literacy, and cultural competency.	Pass & Complete	 
	Milestone #6 Obtain list of PCPs assigned to NU and LU enrollees from MCOs. Along with the member's MCO and assigned PCP, reconnect beneficiaries to his/her designated PCP (see outcome measurements in #10). <ul style="list-style-type: none"> • This patient activation project should not be used as a mechanism to inappropriately move members to different health plans and PCPs, but rather, shall focus on establishing connectivity to resources already available to the member. • Work with respective MCOs and PCPs to ensure proactive outreach to beneficiaries. Sufficient information must be provided regarding insurance coverage, language resources, and availability of primary and preventive care services. The state must review and approve any educational materials, which must comply with state marketing guidelines and federal regulations as outlined in 42 CFR §438.104. 	Pass & Complete	
	Milestone #7 Baseline each beneficiary cohort (per method developed by state) to appropriately identify cohorts using PAM(R) during the first year of the project and again, at set intervals. Baselines, as well as intervals towards improvement, must be set for each cohort at the beginning of each performance period.	Pass & Complete	 
Milestone #8 Include beneficiaries in development team to promote preventive care.	Pass & Complete		

**New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project**

Central New York Care Collaborative (PPS ID:8)

Project ID	Module Name / Milestone #	Review Status	
	Milestone #9 Measure PAM(R) components, including: <ul style="list-style-type: none"> • Screen patient status (UI, NU and LU) and collect contact information when he/she visits the PPS designated facility or "hot spot" area for health service. • If the beneficiary is UI, does not have a registered PCP, or is attributed to a PCP in the PPS' network, assess patient using PAM (R) survey and designate a PAM(R) score. • Individual member's score must be averaged to calculate a baseline measure for that year's cohort. • The cohort must be followed for the entirety of the DSRIP program. • On an annual basis, assess individual members' and each cohort's level of engagement, with the goal of moving beneficiaries to a higher level of activation. <ul style="list-style-type: none"> • If the beneficiary is deemed to be LU & NU but has a designated PCP who is not part of the PPS' network, counsel the beneficiary on better utilizing his/her existing healthcare benefits, while also encouraging the beneficiary to reconnect with his/her designated PCP. • The PPS will NOT be responsible for assessing the patient via PAM(R) survey. • PPS will be responsible for providing the most current contact information to the beneficiary's MCO for outreach purposes. • Provide member engagement lists to relevant insurance companies (for NU & LU populations) on a monthly basis, as well as to DOH on a quarterly basis. 	Pass (with Exception) & Complete	
	Milestone #10 Increase the volume of non-emergent (primary, behavioral, dental) care provided to UI, NU, and LU persons.	Pass & Complete	
	Milestone #11 Contract or partner with CBOs to develop a group of community navigators who are trained in connectivity to healthcare coverage, community healthcare resources (including for primary and preventive services) and patient education.	Pass & Complete	
	Milestone #12 Develop a process for Medicaid recipients and project participants to report complaints and receive customer service.	Pass & Complete	
	Milestone #13 Train community navigators in patient activation and education, including how to appropriately assist project beneficiaries using the PAM(R).	Pass & Complete	
	Milestone #14 Ensure direct hand-offs to navigators who are prominently placed at "hot spots," partnered CBOs, emergency departments, or community events, so as to facilitate education regarding health insurance coverage, age-appropriate primary and preventive healthcare services and resources.	Pass & Complete	
	Milestone #15 Inform and educate navigators about insurance options and healthcare resources available to UI, NU, and LU populations.	Pass & Complete	
	Milestone #16 Ensure appropriate and timely access for navigators when attempting to establish primary and preventive services for a community member.	Pass & Complete	
	Milestone #17 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, to track all patients engaged in the project.	Pass & Complete	
3.a.i	Module 3.a.i.2 - Patient Engagement Speed	Fail	
3.a.i	Module 3.a.i.3 - Prescribed Milestones		
3.a.i	Milestone #1 Co-locate behavioral health services at primary care practice sites. All participating eligible primary care practices must meet 2014 NCQA level 3 PCMH or Advance Primary Care Model standards by DY 3.	Pass & Complete	

**New York State Department Of Health

	Milestone #3 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.	Fail   
	Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Complete
	Milestone #5 Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).	Pass & Complete  
	Milestone #6 Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.	Pass & Complete
	Milestone #7 Develop care coordination teams including use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-management.	Pass & Complete
	Milestone #8 Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.	Pass & Complete  
	Milestone #9 Ensure that all staff involved in measuring and recording blood pressure are using correct measurement techniques and equipment.	Pass & Complete
	Milestone #10 Identify patients who have repeated elevated blood pressure readings in the medical record but do not have a diagnosis of hypertension and schedule them for a hypertension visit.	Pass & Complete  
	Milestone #11 Prescribe once-daily regimens or fixed-dose combination pills when appropriate.	Pass & Complete
Milestone #12 Document patient driven self-management goals in the medical record and review with patients at each visit.	Pass & Complete  	
Milestone #13 Follow up with referrals to community based programs to document participation and behavioral and health status changes.	Pass & Complete

Central New York Care Collaborative (PPS ID:8)

Project ID	Module Name / Milestone #	Review Status	
	Milestone #14 Develop and implement protocols for home blood pressure monitoring with follow up support.	Pass & Complete	
	Milestone #15 Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.	Pass & Complete	
	Milestone #16 Facilitate referrals to NYS Smoker's Quitline.	Pass & Complete	
	Milestone #17 Perform additional actions including "hot spotting" strategies in high risk neighborhoods, linkages to Health Homes for the highest risk population, group visits, and implementation of the Stanford Model for chronic diseases.	Pass & Complete	 
	Milestone #18 Adopt strategies from the Million Hearts Campaign.	Pass & Complete	
	Milestone #19 Form agreements with the Medicaid Managed Care organizations serving the affected population to coordinate services under this project.	Pass & Complete	 
	Milestone #20 Engage a majority (at least 80%) of primary care providers in this project.	Pass & Complete	
3.g.i	Module 3.g.i.2 - Patient Engagement Speed	Fail	  
	Module 3.g.i.3 - Prescribed Milestones		
	Milestone #1 Integrate Palliative Care into appropriate participating PCPs that have, or will have, achieved NCQA PCMH and/or APCM certification.	Pass & Complete	 
	Milestone #2 Develop partnerships with community and provider resources including Hospice to bring the palliative care supports and services into the practice.	Pass & Complete	
	Milestone #3 Develop and adopt clinical guidelines agreed to by all partners including services and eligibility.	Pass & Complete	
	Milestone #4 Engage staff in trainings to increase role-appropriate competence in palliative care skills and protocols developed by the PPS.	Pass & Complete	
	Milestone #5 Engage with Medicaid Managed Care to address coverage of services.	Pass & Complete	 
	Milestone #6 Use EHRs or other IT platforms to track all patients engaged in this project.	Pass & Complete	
4.a.iii	Module 4.a.iii.2 - PPS Defined Milestones	Pass & Ongoing

Additional Project Scale Commitments

Instructions:

Please indicate the scale of the categories below that meet all of the project requirements committed to in the Project Plan Application. Documentation must be submitted in Excel format in the quarter when the PPS provider speed commitments for a particular project are due. This documentation should include the target category(e.g. Medical Villages, Emergency Departments with Care Triage, Community-based navigators, etc.), the project ID(e.g. 2.a.iv,2.a.v,3.a.ii, etc.), and the name of the providers/entities/individuals associated with this project, if applicable.

Project Scale Category	Project	Selected	Committed
Emergency Departments with Care Triage	2.b.iii	0	11
Expected Number of Crisis Intervention Programs Established	3.a.ii	0	6
PAM(R) Providers	2.d.i	358	200
