Quarterly Report - Implementation Plan for SBH Health System

Year and Quarter: DY1, Q4

Quarterly Report Status: Adjudicated

Status By Section

Section	Description	Status
Section 01	Budget	Completed
Section 02	Governance	Completed
Section 03	Financial Stability	Completed
Section 04	Cultural Competency & Health Literacy	Completed
Section 05	IT Systems and Processes	Completed
Section 06	Performance Reporting	Completed
Section 07	Practitioner Engagement	Completed
Section 08	Population Health Management	Completed
Section 09	Clinical Integration	Completed
Section 10	General Project Reporting	Completed
Section 11	Workforce	Completed

Status By Project

Project ID	Project Title	Status
2.a.i	Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management	Completed
2.a.iii	Health Home At-Risk Intervention Program: Proactive management of higher risk patients not currently eligible for Health Homes through access to high quality primary care and support services	Completed
2.b.iii	ED care triage for at-risk populations	Completed
2.b.iv	Care transitions intervention model to reduce 30 day readmissions for chronic health conditions	Completed
3.a.i	Integration of primary care and behavioral health services	Completed
3.b.i	Evidence-based strategies for disease management in high risk/affected populations (adult only)	Completed
3.c.i	Evidence-based strategies for disease management in high risk/affected populations (adults only)	Completed
3.d.ii	Expansion of asthma home-based self-management program	Completed
4.a.iii	Strengthen Mental Health and Substance Abuse Infrastructure across Systems	Completed
4.c.ii	Increase early access to, and retention in, HIV care	Completed

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
<p>Complete funds flow budget and distribution plan and communicate with network</p>	<p>The complete funds flow budget and distribution plan were presented to the Finance and Sustainability Subcommittee on January 5th, 2016. The implementation funds were further categorized into Central Services Organization (CSO) Operations, Information Technology (IT), workforce development, PCMH support and other project-related items (including startup funds to hire new staff in DSRIP demonstration year [DY] 2). All plans and strategies are shared and communicated among the partners who have entered into a fiduciary relationships with the CSO – the seven largest primary care organizations and a number of community-based partners, who together employ 75%+ of our providers and 97% of PCP services to BPHC patients.</p> <p>Funding BPHC partners: BPHC conducted a Request for Information (RFI) process with its seven largest primary care partner organizations to determine staffing and funding needs to achieve DSRIP clinical integration objectives. BPHC's CSO reviewed the proposals internally and then with each of the partners to determine how they plan to achieve DSRIP goals when funded. By March 31, 2016 most of the organization-specific budgets for DY2 had been established. Early in DY2 Schedule A's will be executed to allow funding distribution to each partner. The next phase of funding is budgeted for community-based organizations (CBOs). BPHC is working closely with its CBO partners to determine how they will contribute to BPHC's achievement of DSRIP goals in order to establish funding priorities.</p> <p>CSO Operations: BPHC is now sufficiently equipped with full-time employees at the CSO and has become less dependent on consultants. Consultant costs have been reduced by 70% and are expected to reduce by another 10% in DY2. DSRIP Program Directors, the embedded liaisons/facilitators at the seven largest primary care organization partners, have all been hired and fully trained.</p> <p>IT: BPHC has partnered with the Bronx RHIO to implement PPS-wide interconnectivity. The contract between BPHC and Bronx RHIO was signed in DY1 Q4. BPHC has also been developing the Salesforce system as the PPS-wide platform for partner relations management. BPHC has contracted services from HIS PRO to improve IT system security and data protection compliance, in line with DSRIP requirements.</p> <p>Workforce development: BPHC has been working with four different vendors on direct workforce development: 1199 Training Education Fund (TEF), Montefiore's Care Management Organization (CMO), a.i.r. nyc , and Institute for Family Health (IFH). These vendors will train and retrain individuals necessary for DSRIP staffing and redeployment throughout the PPS. BPHC has also contracted with the consulting group BDO to conduct a PPS-wide workforce survey and future state modeling, in collaboration with other NYC PPSs.</p> <p>PCMH Support: BPHC is working with PCMH expert coaches/consultants to bring BPHC providers to PCMH 2014 Level 3 by the end of DY3Q4. BPHC is nearing completion of all consultant contracts and initiating the transformation process. The CSO will continue to monitor partners' transformation progress and will authorize payments when work is accomplished.</p>

Task Create an inventory of CBO services.	Completed	Finalize and administer survey to create an inventory of services offered by CBOs within the PPS area that participate in activities that impact population health. The PPS area covers all the neighborhoods and communities of the Bronx. The CSO implemented a survey of current CBO members of our PPS to profile their services, interest and capacity to participate as partner organizations in our DSRIP projects. Our current CBO members encompass a wide array of service providers, including services for intellectual and development disabilities(IDD); food banks, community gardens and farmer's markets; foster children agencies; HIV prevention/outreach and social services; housing services, including advocacy groups, housing providers and homeless services; individual employment support services; financial assistance and support, including clothing and furniture banks; not-for profit health and welfare agencies; nutrition and exercise programs; peer, family support, training and self advocacy organizations; reentry organizations and alternatives to incarceration; transportation services; youth development programs; syringe access programs; and services for special populations, including immigrants, LGBT, seniors, uninsured and women.	04/01/2015	09/30/2015	04/01/2015	09/30/2015	09/30/2015	DY1 Q2

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Finalize governance structure and sub-committee structure	Milestone completed DY1Q1. Templates updated per supporting documentation requirements.
Establish a clinical governance structure, including clinical quality committees for each DSRIP project	Milestone completed DY1Q3. Templates updated per supporting documentation requirements. The QCIS charter has been amended and approved by the Executive Committee. The revised document can be found in the attached supporting documentation.
Finalize bylaws and policies or Committee Guidelines where applicable	Milestone completed DY1Q2. The revised QCIS charter has been included in supporting documentation, due to an amendment approved by the Executive Committee.
Establish governance structure reporting and monitoring processes	Milestone completed DY1Q3. No supporting documentation has been uploaded this quarter, as no changes to reporting and monitoring processes have been adopted.
Finalize community engagement plan, including communications with the public and non-provider organizations (e.g. schools, churches, homeless services, housing providers, law enforcement)	Milestone completed DY1Q2. Templates updated per supporting documentation requirements.
Finalize partnership agreements or contracts with CBOs	Milestone due DY2Q1. A Master Services Agreement (MSA) and Schedule A have been executed with two community-based organizations (CBOs), a.i.r. nyc and the Institute for Family Health. A collaboration and project management agreement has been executed with the Jewish Board of Family and Children Services. We are in the process of obtaining an MSA and Schedule A with Health People. This milestone is on track for on-time completion.
Finalize agency coordination plan aimed at engaging appropriate public sector agencies at state and local levels (e.g. local departments of health and mental hygiene, Social Services, Corrections, etc.)	Milestone due DY2Q1. Several public sector agencies were identified for engagement in the PPS and invited to participate in clinical project implementation work groups in DY1Q3. We are collaborating with these agencies to create an agency coordination plan. We have created and circulated a questionnaire to solicit feedback on the plan, which is due on April 8. This milestone is on track for on time completion.
Finalize workforce communication and engagement plan	Milestone due DY1Q4. The Workforce Communication & Engagement Plan was revised slightly and approved by the Workforce Subcommittee. The original task reads "obtain sign-off on workforce communication and engagement plan from Workforce Subcommittee and Executive Committee." It was determined that Executive Committee approval was not necessary and the Workforce Subcommittee would suffice. In making this decision BPHC chose to rely on the subject matter expertise of the members of the Workforce Subcommittee, as the Executive Committee's responsibilities focus on fiduciary, strategic, and compliance concerns of the PPS. This milestone is now complete.
Inclusion of CBOs in PPS Implementation.	Milestone due DY2Q1. A Master Services Agreement (MSA) and Schedule A have been executed with two community-based organizations (CBOs), a.i.r. nyc and the Institute for Family Health. A collaboration and project management agreement has been executed with the Jewish Board of Family and Children Services. We are in the process of obtaining an MSA and Schedule A with Health People. This milestone is on track for on-time completion.

✓ IPQR Module 2.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing your governance structure and processes and achieving the milestones described above, as well as potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

One challenge will be developing and negotiating the Base Agreement, the project schedules and funding schedules among the partners due to the broad range of partners by type and size. The various partners will have different interests, capabilities and limitations. The planned review of the Base Agreement and project schedules with partners' legal counsel will be transparent and will aim to reach mutually agreeable terms among all partners.

Another challenge will be engaging members of the Committees/Sub-Committees in a meaningful and productive way to achieve the PPS's goals over a short timeline. In order to build a strong and working governance structure, the members appointed to the various committees must prepare for meetings (e.g., read materials distributed in advance of meetings), attend and be attentive during meetings and otherwise be actively involved in the committees. However, SBH recognizes that committee members have significant obligations to their organizations outside of the PPS and will aim to be respectful of their time commitments. To ensure that committee and subcommittee members are able to stay abreast of PPS developments, SBH will utilize a wide range of online tools to support efficient information sharing. Specifically, SBH has already developed a BPHC website (www.bronxphc.org) to provide information about PPS activities to PPS members and the community. SBH has also developed a PAC member portal through the platform Directors Desk, where meeting materials are posted and stored. Additionally, SBH has begun hosting all-member and PAC webinars to inform and engage its members.

Additionally, the management of partner organizations must be willing to make the investments and changes needed to transform the way care is delivered in the Bronx. Their buy-in is crucial to the success of DSRIP. To ensure buy-in at the highest levels within partner organizations, BPHC has designed a highly inclusive governance structure which enables meaningful participation in PPS decision making by leaders (as well as staff) within partner organizations. In addition, BPHC central staff is establishing member profiles and engaging in one-on-one meetings with partner organizations to help understand their capacity, priorities and potential barriers to success. These findings will inform the design and deployment of PPS programs and policies. Finally, the structure of the MDSA will enable agreements to be tailored to the terms of each member organization and will be negotiated with partner management, requiring sign-off of executive management to execute.

Given that BPHC will be implementing ten clinical projects, another challenge is creating an administratively simple clinical governance structure that reduces the burden on major practitioner groups/CBOs that are supporting the clinical operational planning. To mitigate this risk, BPHC is grouping clinical projects that require similar thought leadership and that are providing care in similar settings (e.g., hospital, home-based). For example, ED triage and care transitions are grouped because they are both hospital-based interventions.

✓ IPQR Module 2.4 - Major Dependencies on Organizational Workstreams

Instructions :

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The ability to develop the project schedules that are part of the partnership agreements with CBOs will depend on the development of Clinical Operational Plans which will detail work plans and partner obligations by DSRIP project. Creation of the funding schedules is dependent upon outputs of the finance workstream, which will include the funding amount that the SBH will receive, the distribution of Participants among the projects and the allocation of funding to each project-level budget.

Additionally, SBH and its partners will need to engage frontline workers to ensure the success of each DSRIP project. To achieve this, SBH will need to, among other things, forge strong relationships with the unions.

Finally, it is critical that the IT systems and processes are capable of collecting key data in a timely fashion so that SBH can monitor its performance on an ongoing basis and target areas in need of improvement.

✓ IPQR Module 2.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for the development of your governance structure and processes and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
SBH COO	Len Walsh	BPHC governance strategy and fiduciary oversight, including policymaking and policy execution
Executive Director, BPHC CSO	Irene Kaufmann	Organize and facilitate committee meetings - Provides committees with relevant data, reports and communications - Records/files meeting minutes - Responsible for policy execution
BPHC Executive Committee	Len Walsh, Chair	Oversight of all aspects of deployment of DSRIP projects and evolution of BPHC into fully integrated delivery network - Responsible for policymaking
BPHC Nominating Committee	Patricia Belair, Chair, SBH Health System	Recommend members of committees and Sub-committees to Executive committee - Responsible for policymaking
BPHC Finance & Sustainability Subcommittee	David Menashy, Co-Chair, Montefiore Medical Center Todd Gorlewski, Co-Chair, SBH Health System	Make recommendations on distribution of project Partner implementation funds - Monitor budget and compliance - Review financial Oversight structure - Oversee provision of assistance to financially frail Partners - Advise on development and implementation of sustainability and financial compliance plans - Responsible for policymaking
BPHC Information Technology Sub-Committee	Dr. Jitendra Barmecha, Chair, SBH Health System	Create and update processes and protocols for adoption and use of information technology that will be applicable to all members -Responsible for policymaking
BPHC Quality & Care Innovation Sub-Committee	Co-Chairs, Quality & Care Innovation Sub-Committee, David Collymore & Debbie Pantin	Establish evidence-based practice and quality standards and metrics - Oversee clinical management processes - Hold providers and PPS accountable for achieving targeted metrics and clinical outcomes - Responsible for policymaking
Workforce Sub-Committee	Mary Morris, Co-Chair, SBH Health System	Develop and implement comprehensive workforce strategy to

SBH Health System (PPS ID:36)

✔ Module 2.6 - IPQR Module 2.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS with regard to your governance structure and processes.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Attributed Patients and Families/Caregivers	Recipients of and partners in care, social and other services delivered by BPHC members	- Interaction sufficient to participate and take limited accountability for health, healthcare and other services activities
BPHC CSO Senior Staff (Irene Kaufmann, Executive Director; Janine Dimitrakakis, Senior Director for Analytics; Robin Moon, Senior Director for Care Delivery and Practice Innovations, Amanda Ascher, Chief Medical Officer; Benny Turner, Director of Capital Projects and Vendor Services, and Mary Morris, Director of Workforce Innovation)	Facilitate evolution of BPHC into Integrated Delivery System	- Conduct operations, communication and coordination with BPHC Partners and other stakeholders to support all DSRIP-related activities
BPHC Member Organizations	Participation in BPHC projects	- Commit resources and provide BPHC project-related data to BPHC - participate in BPHC governance committees and work groups as opportunities exist
SEIU 1199 Labor Union (Tom Cloutier, Teresa Pica, Gladys Wrenick, and Rosa Mejias)	Collaborate with BPHC on workforce strategy and implementation	- 1199 SEIU Labor Management Project will facilitate Workforce Advisory Workgroup of Workforce Sub-Committee - Project Advisory Committee member
External Stakeholders		
Bronx RHIO (Charles Scaglione, Executive Director)	Accountable for integration of Bronx RHIO-supplied HIE functionality for BPHC support	- Oversight and integration of Bronx RHIO HIE technology into BPHC operations - Training staff of BPHC Partners on use of Bronx RHIO system - Executive Committee member - IT Sub-Committee member
SEIU 1199 Training and Employment Fund (TEF) (Rosa Mejias, co-chair of the Workforce Sub-Committee)	Collaborate with BPHC on workforce strategy and implementation	- Work with Workforce Sub-Committee to identify competency and training gaps, provide trainers and training to meet identified training needs, hold joint training sessions and coordinate recruitment strategies
Other Bronx PPS	Collaborate with BPHC to identify commonalities for more effective use of resources	- Collaborate with BPHC on Bronx-wide force and DSRIP communication strategies, e.g., a single tool for communications

✅ IPQR Module 2.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream and your ability to achieve the milestones described above.

Shared IT infrastructure will be important because it will enable the Executive Committee and the Sub-Committees to analyze data obtained from all participating providers in order to effectively monitor and improve the PPS's performance.

SBH has created a public-facing website for the PPS (www.bronxphc.org), on which materials from all-Member meetings, updates from the Rapid Deployment Collaboratives, and other important documents will be posted. The website contains a calendar of key events for stakeholders, and a jobs page to connect community members and frontline workers to DSRIP-related employment opportunities. In addition, SBH has created a member portal for PAC members through the platform Directors Desk. Materials and minutes from all Committee and Sub-Committee meetings will be posted to the PAC portal unless deemed confidential.

✅ IPQR Module 2.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Success will be measured by (1) the occurrence of meetings of the Executive Committee, Finance and Sustainability Sub-Committee, Workforce Sub-Committee, Quality and Care Innovation Sub-Committee, Information Technology Sub-Committee, and Nominating Committee at a frequency in accordance with the applicable charter, (2) implementation of PPS policies and procedures, and (3) execution of the Base Agreement and project schedules by SBH and Participants (including CBOs) and performance by SBH and Participants (including CBOs) of obligations against the Base Agreement. We will also monitor the performance reporting dashboard in order to track the progress of each DSRIP project against key quarterly milestones and metrics and produce progress reports that summarize the status for review by the Executive Committee and the Sub-Committees. A subset of key indicators will be posted to the BPHC website to ensure all PPS members and the community are kept up to speed on PPS progress.

Section 03 – Financial Stability

✓ IPQR Module 3.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Note some milestones include minimum expected completion dates.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Finalize PPS finance structure, including reporting structure	Completed	This milestone must be completed by 12/31/2015. PPS finance structure chart / document, signed off by PPS Board.	04/01/2015	12/31/2015	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	YES
Task Develop Finance and Sustainability Sub-Committee charter	Completed	Develop Finance and Sustainability Sub-Committee charter and present to Executive Committee for review and approval.	04/01/2015	04/16/2015	04/01/2015	04/16/2015	06/30/2015	DY1 Q1	
Task Appoint Sub-Committee members	Completed	Identify and appoint Finance and Sustainability (F&S) Sub-Committee members with financial leaders from PPS member organizations. Appoint SBH's CFO and a finance executive from Montefiore as the initial co-chairpersons.	04/01/2015	04/29/2015	04/01/2015	04/29/2015	06/30/2015	DY1 Q1	
Task Initiate Sub-Committee and report to EC	Completed	Conduct initial meeting of the F&S Sub-Committee meeting. Document Finance and Sustainability Sub-Committee actions and provide first report to Executive Committee.	05/01/2015	05/20/2015	05/01/2015	05/20/2015	06/30/2015	DY1 Q1	
Task Create PPS bank account	Completed	Set up a separate bank account and treasury function for PPS that is separate and distinct from SBH.	04/02/2015	06/30/2015	04/02/2015	06/30/2015	06/30/2015	DY1 Q1	
Task Establish policies and procedures	Completed	Develop and finalize financial policies and procedures, reporting structure and roles and responsibilities for the PPS including CSO operation expenses, and expenses of PPS support services related to the DSRIP projects undertaken. Roles and responsibilities will be defined for CSO finance staff, SBH CFO in relationship to PPS, and role of PPS partners.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Obtain EC approval of financial framework	Completed	Obtain Executive Committee sign-off of PPS finance structure, policies and procedures.	09/01/2015	12/31/2015	09/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Milestone #2 Perform network financial health current state	Completed	This milestone must be completed by 3/31/2016. Network	09/01/2015	03/31/2016	09/01/2015	03/31/2016	03/31/2016	DY1 Q4	YES

Milestone Name	Narrative Text
Finalize PPS finance structure, including reporting structure	
Perform network financial health current state assessment and develop financial sustainability strategy to address key issues.	<p>Bronx Partners for Healthy Communities (BPHC) PPS conducted its first financial health survey in November 2014 as part of the DSRIP planning process, which led to formalizing the finance committee charter that was disclosed in the State Implementation Plan (SIP) that was submitted in May 2015. In November 2015, BPHC completed a second financial health survey which included a proactive follow-up in January 2016 to ensure the highest response rate. Out of 212 surveys sent, 104 responded (49% response rate). An evaluation was done to determine if any surveys were not completed from providers that were critical to BPHC clinical milestones and selected projects. The 108 that did not respond were deemed not to be essential for the projects that have begun – the 104 organizations cover 95% of the PCPs in our network – and this approach would be used going forward.</p> <p>The financial health assessment had a number of questions and data sets for completion. The questions included in the Finance and Sustainability Survey regarding VBP was If there was any existing VBP arrangements and if so what was the % of revenue under VBP (i.e. shared savings, capitation, etc.)The results were divided into three different groups based on the following financial components and qualities:</p> <p>Tier 1: These are organizations that are financially stable. They have more than 90 days of cash on hand, their debt ratio is less than 1, have assets to monetize, have strong affiliations to other organizations and maintain positive or cash neutral operating margins.</p> <p>Tier 2: Organizations that have less than 15 days of cash on hand, but have assets to monetize or have other resources from affiliations and partnerships</p> <p>Tier 3: Fragile organizations are defined to have less than 15 days cash on hand, carry significant operating losses and have no immediate ability to monetize assets or secure/leverage stronger financial arrangements.</p> <p>BPHC identified 2 organizations that were categorized in Tier 3 and deemed to be financially fragile. These entities were reviewed in the context of attributable lives, current involvement with PPS activity and if the services they provide had a material impact on BPHC clinical projects.</p> <p>The Finance and Sustainability Subcommittee agreed to continue to monitor the Tier 2 and Tier 3 facilities based on their impact on overall BPHC initiatives. The Subcommittee also agreed to continue this survey on an annual basis with the intention of expanding the data request for specific information as it relates to evolving cost structures and the impact of implementing value-based arrangements. At this time, it was determined that BPHC will not be taking steps to assist financially distressed partners until the provider was deemed to be critical to moving forward any of the selected projects or clinical initiatives.</p>
Finalize Compliance Plan consistent with New York State Social Services Law 363-d

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
<p>Develop detailed baseline assessment of revenue linked to value-based payment, preferred compensation modalities for different provider-types and functions, and MCO strategy.</p>	<p>Although this milestone is due on 9/30/16, a significant amount of foundational work is taking place.</p> <p>As noted in the response in the previous milestone's narrative, the most recent financial health assessment survey included additional questions and data needs to determine the extent of managed care penetration and VBP arrangements within the PPS membership. The initial response to this survey indicated that 95% of PPS participants do not have any VBP arrangements. Only two of the respondents that have VBP arrangements, Montefiore and SBH, have more than 5% of its respective patient service revenue coming from value-based payment (VBP) arrangements.</p> <p>In addition to this survey, BPHC is also exploring various strategies for effectively engaging PPS providers in VBP arrangements and are canvassing interest of providers in the PPS who may be willing and are interested in participating in a BPHC-sponsored contracting vehicle. This process works in concert with the long-term strategy of ensuring 90% VBP across the network as BPHC outlined in the milestone below.</p> <p>On Feb 1, 2016 the VBP planning workgroup group met to discuss VBP arrangements with MCOs. This workgroup represents a subset of the Finance & Sustainability Subcommittee. As part of developing a baseline, the workgroup discussed BPHC's role and processes in assessing VBP readiness. Questions were added to include existing VBP revenue streams its percentage of total revenue in the financial health survey. With this as a baseline, it was determined that more detailed data on the providers that have existing VBP arrangements would be reviewed by the PPS in the months ahead to understand the various financial arrangements (i.e., full-risk vs shared savings models, subpopulations covered, levels of risk, etc.) and to understand which Medicaid Managed Care entities have the ability to administer this type of contracting. As more information and guidance is expected to be provided by the State through the updated VBP roadmap, it was agreed that the strategy around meeting milestones should be structured around several different measures that would be discussed in regular meetings going forward. This milestone is on track for timely completion.</p>
<p>Finalize a plan towards achieving 90% value-based payments across network by year 5 of the waiver at the latest</p>	<p>Although this milestone of a creating a plan for 90% value-based payments (VBP) was deferred to the DY2 Q4 reporting period, BPHC has started to identify all facets of developing this strategy. The components include the readiness assessments of the PPS members as well as several other matters that need consideration and critical analysis. This includes, but is not limited to, implementing a common data warehouse infrastructure, creating analytics capacity, establishing quality of care performance metrics and understanding the most appropriate legal governance structures that will be needed.</p> <p>With regard to governance, BPHC recognizes that all providers are different and that the VBP strategy needs to be tailored for a variety of licensed providers. BPHC has 220+ member organizations, including two anchor hospitals, four FQHCs and a community-based IPA, along with multiple unaligned independent providers, Article 31 and Article 32 entities and community-based organizations (CBOs). Depending on the role of each provider in the healthcare spectrum, VBP arrangements will differ among providers. For that reason, BPHC is looking to establish a governance structure that allows for broad accommodations and complete transparency. One of the hospital systems, Montefiore, accounts for about 70% of the PPSs providers through its IPA and has a significant number of lives currently being managed under VBP contracts and has had success in advanced risk contracting models. SBH is also exploring creating an IPA of its own to serve as a platform for some of the independent providers and smaller organized practices within the PPS (e.g., several of the FQHCs). A number of these providers have a significant share of their patient lives in VBP contracts and are well positioned to leverage the know-how and administrative assets of the PPS partners in joint contracting and care management. BPHC also sees the benefits of aligning with community behavioral health providers and care management agencies to build both the size of the population and the service expertise for certain higher risk populations.</p> <p>BPHC is just beginning to explore several contracting models including direct contracting with the MCOs through a PPS-sponsored IPA, leveraging the existing contracting vehicles used by some of our PPS partners, or providing the administrative infrastructure to support direct contracting by individual PPS partners that</p>

✓ IPQR Module 3.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

(1) Provider Engagement: PPS must meaningfully engage and communicate individual PPS funding schedules at outset of DSRIP implementation to ensure partners and providers understand the process and project milestones tied to payment. As BPHC engages partners in clinical operational and project readiness planning, and introduces partners to the Master Services Agreement (MSA), it educates partners on DSRIP funds flow and funding schedules contained in the MSA. BPHC has developed a provider education and engagement strategy. (2) Availability of DSRIP Waiver Funds/Ability of PPS to Achieve and Draw Down Incentive Payments: PPS must achieve and report on state-established milestones and metrics to draw down incentive payments and subsequently distribute funds to partners. PPS has and will continue to engage in a thoughtful planning process to ensure it achieves DSRIP milestones and metrics efficiently and effectively. (3) Availability of Capital Funds: Timing and availability of capital funds will impact PPS project implementation and performance, as some projects require capital investments not covered by DSRIP waiver funds. Moreover, the timing of capital funds flows may create cash flow risks, especially for financially frail partners. PPS will work to identify additional sources of funding for capital-intensive projects. (4) Financial Frailty of Partners: Initial assessment of the financial health of its partner organizations showed the majority were "not immediately fragile." However, some key partners were identified as moderately. PPS, through its Finance and Sustainability Sub-Committee and CSO Provider Engagement Team, has been developing partner reporting requirements and a process for monitoring and assisting financially frail partners. (5) MCO Engagement: The transition to value-based payment (VBP) across the PPS will require engagement and willingness from Medicaid managed care organizations (MCOs) to transform existing contracts into DSRIP-aligned VBP contracts over 5 years. PPS will continue engaging MCOs through DSRIP implementation planning and monthly meetings to ensure MCOs are meaningfully engaged in developing transition plans and have time to prepare for the transition to VBP. (6) Social Services and CBOs: Several third-party groups will have a significant impact on patient outcomes and overall success of the PPS, but their existence depends on extraneous revenue streams. NYC-run social service agencies and CBOs are dependent on city and state funding and charitable support. While MCOs will be supported by NYS in this restructuring, local community and county agencies face a host of outside influences that could impair their ability to support the PPS in a meaningful way. (7) Federally Qualified Health Centers ("FQHC"): Reimbursement methodologies within the FQHC business paradigm may not be in sync as DSRIP initiatives evolve. Wraparound payments under the 1115 Waiver depend on legislation that expires during DSRIP period and the administrative costs/burdens and financial reporting that HRSA requires is inconsistent with population health scoring and financial review. FQHC have no margins and access to capital involves bureaucratic and public finance hurdles. (8) Ability to Access Data for Financial Reporting: For PPS to meet reporting requirements, PPS needs access to data for financial reporting. This requires that appropriate processes and mechanisms to allow providers to perform and provide timely information. PPS intends to create buy-in by engaging PPS participants to assist in the development and implementation of appropriate reporting requirements and structures. (9) Physician Engagement: PPS must effectively engage and educate physicians regarding DSRIP's incentive-based funding structure.

✓ IPQR Module 3.4 - Major Dependencies on Organizational Workstreams

Instructions :

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

- Performance Reporting: Identify point-of-contact in each partner organization for finance-related matters (e.g., reporting and policies/procedures); base partner reporting requirements on DSRIP reporting milestones/metrics; performance reporting infrastructure that supports provider, practice, and organization-level reporting and evaluation to drive DSRIP incentive payments (note: performance reporting and incentive payments will be detailed in each Participant's Master Services Agreement).
- Governance: The PPS governance structure must be capable of executing financial responsibilities; the PPS governance structure must evolve to incorporate Medicaid MCOs to support transition to value-based payment.
- IT: The PPS IT systems must support central finance and performance reporting to inform and track PPS and project-level budgets and funds flow; the PPS IT systems must support population health management to enable partners to improve patient outcomes that will drive the transition to value-based payment with Medicaid MCOs and other payers.
- Physician Engagement: The PPS must effectively engage and educate physicians regarding DSRIP's incentive-based funding structure, including contractual obligations associated with project-specific clinical interventions, Domain 1 requirements and their relationship to incentive payments.

✓ IPQR Module 3.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
BPHC CSO Business Staff	Accountable for integration and effective financial plan	Oversight and integration of finances into BPHC operations
BPHC Finance and Sustainability Sub-Committee	Governance for effective integration and use of IT, centrally and across partners	Oversight and integration of finance plan into BPHC operations
SBH Management/Leadership	Fiduciary oversight for effective financial plans	Oversight of BPHC financial operations
BPHC Executive Committee	Governance for effective and sustainable financial strategy	Governance structure with PPS-wide representation, makes policy decisions and provides direction for effective and sustainable financial strategy
BPHC Compliance Officer	Oversight and advice on the compliance plan and audits	Oversight and advice on financial compliance and audit
BPHC Senior Director of Quality Management and Analytics	Accountable for providing required quality data in a timely manner	Quality data support
SBH IT team	Support the financial functions with the existing IT infrastructure and data streams	Support with the technical infrastructure
BPHC member organizations	Work within financial models to ensure BPHC success	Provide services according to master contract requirements
External Stakeholders		
External Auditor - Ernst & Young	Conduct the annual audit	Complete audit documentation and recommendation
Hudson Valley PPS	Align financial models for paying and incenting providers and provider organizations with those developed by BPHC	Financial models and master contract agreements
Bronx Chamber of Commerce	Coordinate with the BCC in order for local businesses to increase employment opportunities for the local community.	Participating in events geared towards employment opportunities that foster local community development.
Bronx Business Improvement Districts	Working with Bronx BIDs and local CBOs to increase their involvement in local economic empowerment of the community.	Meeting with Bronx BIDs such as Fordham BID, Belmont BID and others to identify programs and opportunities that the community can benefit from.
Community Boards	Community Boards will participate in identifying the local community needs and concerns.	BPHC will participate in Local Community Board Meeting, Educate them about DSRIP and learn from them about the community needs and how to improve them.
Bronx Elected Officials	Work with the various Bronx Elected Officials and CBOs to address social determinants of health to improve the overall health of Bronx residents.	Work with Bronx Elected Officials and CBOs to host forums in addressing how to improve the overall health and economics of the community.

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Medicaid Managed Care Health Plans	Monitor performance of financial models and use them to develop value-based contracting	Initiate development of value-based contracting with PPS hospitals and their providers

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

✅ IPQR Module 3.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

The PPS will require appropriate IT systems to support central and PPS-wide reporting capabilities to support performance reporting, track PPS and project-level budgets and funds flow, and monitor financial sustainability. The systems will need to support PPS financial analysis reports, performance metrics reporting, and PPS-specific financial statements. When conducive, BPHC will leverage existing back-office systems within St. Barnabas Hospital and Montefiore. In terms of funds flow, treasury and general ledger, however, SBH has created a separate general ledger platform and banking arrangement to ensure that the restrictive nature and purpose of the intended funds are directed accurately with complete documentation for audit purposes. PPS-wide IT systems and health information exchanges that support care management and population health management will be required to enable partners to improve patient outcomes that will drive the transition to value-based payment with Medicaid MCOs and other payers.

✅ IPQR Module 3.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The success of this workstream will be measured on the financial stability of the participants in the PPS, PPS adherence to a compliance plan consistent with NY State Social Services Law 363-d, and the migration from the current level of VBP across PPS provider participants to 90% of the total MCO-PPS payments captured in at least Level 1 VBPs, with more than 70% in Level 2 VBPs or higher.

The PPS has already done an initial assessment of the financial stability of its lead organization and its partners. It is currently expanding this initial assessment to new partners that have joined the PPS since the first assessment was completed. The assessment itself will be evaluated for potential updates and will be administered to all PPS participants annually. The Finance and Sustainability Sub-Committee will be charged with updating the assessment as required, administering the evaluation and analyzing the results of the assessments. It will determine the need for potential interventions and initiate more robust monitoring of any financially fragile partners. The provider engagement team of the CSO and the Finance and Sustainability Sub-Committee will report findings from the assessment and monitoring activities regularly to the Executive Committee.

The PPS will publish its compliance plan and conduct quarterly compliance meetings. There will be quarterly and annual compliance reports as well as an annual review of the compliance plan itself to determine if additional changes are required.

The PPS has good visibility into the VBPs of its lead organization as well as some of the larger provider organizations participating in the PPS. It will develop an initial assessment to develop a complete baseline assessment of revenue linked to VBPs across all participants. The PPS will implement reporting requirements to monitor revenue linked to VBPs to regularly assess our performance against our plan to achieving 90% VBPs.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Starting in DY1, Q3 the PPS began to engage MCOs and providers to develop the appropriate reporting requirements and procedures to meet the quarterly reporting requirements to the state.

Section 04 – Cultural Competency & Health Literacy

✓ IPQR Module 4.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement. Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Note some milestones include minimum expected completion dates.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Finalize cultural competency / health literacy strategy.	Completed	This milestone must be completed by 12/31/2015. Cultural competency / health literacy strategy signed off by PPS Board. The strategy should: -- Identify priority groups experiencing health disparities (based on your CNA and other analyses); -- Identify key factors to improve access to quality primary, behavioral health, and preventive health care -- Define plans for two-way communication with the population and community groups through specific community forums -- Identify assessments and tools to assist patients with self-management of conditions (considering cultural, linguistic and literacy factors); and -- Identify community-based interventions to reduce health disparities and improve outcomes.	04/01/2015	12/31/2015	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	YES
Task Initiate QCIS to support CC/HL strategy.	Completed	Establish and convene a Quality and Care Innovation Sub-Committee (QCIS) to support development of a PPS-wide cultural competency and health literacy strategy (CC/HL).	06/05/2015	06/30/2015	06/05/2015	06/30/2015	06/30/2015	DY1 Q1	
Task Inventory existing CC/HL programs in PPS	Completed	Conduct an inventory of existing CC/HL programs across PPS members and identify assets and gaps that should be addressed in CC/HL strategy.	04/01/2015	06/30/2015	04/01/2015	06/30/2015	06/30/2015	DY1 Q1	
Task Identify priority populations and locations	Completed	Through CNA and PPS member surveys, identify priority populations and neighborhoods experiencing health disparities and having low literacy. Particular attention to be focused on immigrant populations and populations	05/18/2015	09/30/2015	05/18/2015	09/30/2015	09/30/2015	DY1 Q2

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Finalize cultural competency / health literacy strategy.	<p>During Q4, BPHC leadership has been working with community based organizations to develop community forums for input regarding barriers to care and their experience as healthcare consumers. We have also reviewed the PCMH gap analysis that were conducted at our seven largest primary care organization partners and their respective sites, in order to assess the needs for providing culturally competent and linguistic services specific to our organizations.</p> <p>We have also reconstituted our Cultural Competency/Health Literacy Work Group by naming Dr. Nicole Hollingsworth, AVP of Community and Population Health at Montefiore as co- chairperson of the work group. We have also added new membership from the Workforce Sub Committee with training expertise to work jointly on developing the cultural competency training strategy.</p> <p>Another critical consideration has been how the PPS can best structure and organize the work that we do on cultural competency and health literacy to maximize impact and continuity across our many organizations. This work continues into DY2Q1 as we consider BPHC structures including organizational champions, PPS values, standards and policies for cultural competency and health literacy.</p>
Develop a training strategy focused on addressing the drivers of health disparities (beyond the availability of language-appropriate material).	<p>This quarter, BPHC has focused on several important elements to finalize the cultural competency training strategy focused on addressing the drivers of health disparities. The first has been to survey best practice training aligned with our strategy that exist both within and external to the PPS. Because our initial survey sent out in early 2015 yielded limited results, we are setting up meetings with our partners who have been identified as having programs to determine whether we can support extending them to other organizations.</p> <p>We have also, along with our training vendor the 1199 Training and Employment Funds, explored and experienced other programing available in NYC and elsewhere. We have developed an RFP for the Jewish Board and other potential training vendors that the CC/HL Work Group and the Workforce Subcommittee are considering.</p> <p>The reconstruction of the work group caused minor delays in the finalization of the training strategy and reporting plan, however a series of meeting has been established to ensure the finalization and approval of the training strategy. We are on target for milestone completion in DY2Q1.</p>

✔ IPQR Module 4.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing your cultural competency / health literacy strategy and addressing the specific health disparities you are targeting (based on your CNA), and achieving the milestones described above - including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Extremely Diverse Linguistic Requirements and Low Literacy: The Bronx is one of the most diverse counties in NYS, and this rich diversity demands a culturally responsive system of care. However, CNA findings indicate that immigrant and limited English-speaking populations in the Bronx experience barriers to accessing health care, including low quality language services, lack of culturally and linguistically competent providers, low literacy, and distrust of the healthcare system. Such barriers are particularly challenging among smaller populations, including Albanian, Bengali, Chinese, Creole, Korean, Mandingo, and Russian speakers. Together, these issues could undermine the PPS's ability to engage patients in care. BPHC has developed mitigation strategies to address patient engagement, including plans to develop and disseminate plain-language, accessible, and culturally competent materials at 4th– to 6th-grade reading levels across the PPS; convene a work group to identify best practices on Patient Engagement led by an expert practitioner to develop, test, and promote health literacy standards and advise partner organizations on best practices; and develop culturally competent training materials that meet the needs of various subpopulations, such as age, language, and ethnic groups. PPS plans to deploy community health workers (CHWs) or health educators on site in provider offices.

Recruiting and Workforce Challenges: Securing a culturally competent workforce is key to patient engagement and DSRIP's success more broadly. Yet hiring and recruiting locally-based, bilingual and/or otherwise culturally identifying frontline workers will be challenging, due both to the general shortage of qualified health workers and competition for similar workers among PPSs. BPHC has developed mitigation strategies to address recruiting and workforce issues, including working with local colleges to promote community-based English Speakers of Other Languages (ESOL) and GED training programs for new workers; working with 1199 TEF and PPS member organizations that have expertise recruiting local, peer-based, and other frontline staff; developing culturally competent training materials that address the health, cultural, and linguistic needs of various subpopulations; and recruiting community members to enroll in healthcare worker training courses. Recruitment of community members, particularly through CBOs, applies particularly to CHWs, critical to our cultural competency strategy.

Provider Engagement: Clinical and administrative leadership within organizations may become overtaxed and resistant to adopting new protocols, which could in turn reduce providers' participation in and compliance with health literacy and cultural competency standards. In addition, some providers may have insufficient time and resources for training. BPHC will incorporate cultural competency and health literacy training and standards into the design of DSRIP projects and project-based trainings to minimize the number of trainings in which PPS providers must participate. BPHC's Director of Collaboration and Senior Director of Care Delivery and Practice Innovations will be responsible for conducting ongoing assessment of the PPS's cultural competency activities and will provide technical assistance to providers in need of additional resources and support.

✔ IPQR Module 4.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

BPHC's cultural competency and health literacy strategy has interdependencies with the workforce, IT, and clinical project workstreams.

- **Workforce Workstream Dependencies:** The provision of culturally competent care will depend on the success of the PPS's Bronx-centric recruitment and training strategy. As discussed, the PPS will work with 1199 TEF, CUNY, and contracted CBOs to develop training curricula that meet cultural competency and health literacy standards and incorporate these trainings into all new hire orientations, refresher courses, and provider agreements.
- **Practitioner Engagement Workstream Dependencies:** Practitioners play a key role in providing culturally competent care to patients. The importance of providing culturally competent care and best practices for how to do so will be a key part of the practitioner communication and engagement plan, which will include regular webinars, in-person, peer-to-peer learning forums, and participation in project-specific and a Patient Engagement-focused Rapid Deployment Collaborative. It will also be included in the training/education plan targeting practitioners and other professional groups as part of educating them about the DSRIP program and the PPS-specific quality improvement agenda.
- **IT and Population Health Management Workstream Dependencies:** Connecting patients to culturally competent resources is critical to improving patient outcomes. BPHC's care management technology will include fields to record patients' linguistic and cultural needs so that patients are matched to care managers, providers, and community-based organizations that can appropriately serve them.
- **Clinical Workstreams Dependencies:** The PPS's success will be heavily reliant on the success of its clinical projects. The PPS's project referral protocols and resources must be able to address the social, linguistic, cultural, behavioral and physical needs of patients. The PPS will make available a Web-based PPS-wide directory of CBOs. These efforts will help to ensure PPS-wide tools and resources meet health literacy/cultural competency standards and address patients' social needs in a culturally competent manner.

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

✓ IPQR Module 4.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Partner organization Providers and Staff	Participate and contribute to CC/HL PPS initiatives	Comply with identified standards
CBO partner liaisons that represent a range of socioeconomic, cultural and demographic backgrounds	Provide input and feedback to create CC/HL initiatives and strategy	Community stakeholder participation in meetings, town halls, focus groups and BPHC Cultural Competency/Health Literacy Work Group
Dr. Nicole Hollingsworth	Advisor	Best practice guidance
Arlene Allende, SBH	Advisor	Best practice guidance
Leanette Alvarado	Advisor	Best practice guidance
External Stakeholders		
BPHC patients	Provide feedback by participating in surveys and focus groups	Focus groups and patient satisfaction survey responses
Other Bronx PPSs	Potential collaboration in developing Bronx-wide CC/HL strategy	Bronx-wide CC/HL strategy
Bronx Community at large	Greater use of primary care providers, health self-management for chronic conditions & participation in educational programs sponsored by the PPS	Improved health outcomes, more jobs with "living wages"
TEF-Rosa Mejias, Co Chair, BPHC workforce Subcommittee	Best practice training research and programming	Support for training strategy for CC/HL

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

✅ IPQR Module 4.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support the development and implementation of your cultural competency / health literacy strategy and the achievement of the milestones described above.

Community health workers and other PPS care management staff will use a planned commercial care coordination management solution (CCMS) to support culturally competent outreach, education, care coordination referral, advocacy and other information provided to PPS patients. Based on protocols tailored to patient cultural cohorts, and on individual care plans where available, the CCMS will be used for such activities as:

- Running periodic reports to monitor cultural makeup and requirements of PPS patients, based on data collected in screenings, assessments, etc.
- Providing multilingual, multicultural care navigation and support
- Tracking and assisting patients with practice selection, active engagement in DSRIP programs, utilization tracking and pediatric-adult transitions
- Assisting patients with locating and accessing community resources, including for palliative care
- Supporting transitions and warm handoffs at discharge, with follow-up tracking
- Educating patients and families about wellness and care, and supporting patients in self-management and shared decision making related to their health needs
- Surveying patients and families regarding care experience.

Providers and staff in other workforce segments will be trained regarding specific population needs and effective patient engagement approaches.

✅ IPQR Module 4.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

BPHC will measure the success of our cultural competency/health literacy strategy through members' successful achievement of the Domain 1 CC/HL milestones as well as the milestones referenced above. BPHC will also measure progress through providers' participation in contracting agreements, which will incorporate the PPS's health literacy and cultural competency standards. The Senior Director for Quality Management and Analytics within the CSO will be responsible for conducting ongoing assessment of the PPS's cultural competency activities and related quality-improvement efforts.

Related to patient engagement and clinical improvement, BPHC's QCIS will be charged with overseeing implementation of clinical projects and holding providers and the PPS accountable for achieving targeted metrics and clinical outcomes. Further, because all BPHC projects were selected based on health disparities data within the CNA, achieving broader clinical targets will reflect favorably upon the PPS's success reducing health disparities and creating a culturally competent and linguistically appropriate system of care.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Additionally, BPHC will obtain feedback from providers on the effectiveness of cultural competency strategies and training programs. BPHC will also include cultural competency in BPHC patient satisfaction surveys in order to understand BPHC patient needs.

IPQR Module 4.9 - IA Monitoring

Instructions :

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s).	A needs assessment document was compiled articulating the PPS's IT capabilities, which includes the central services organization (CSO) as well as individual member organizations. The information was collected from various sources such as surveys, interviews, NCQA for Patient Centered Medical Home (PCMH) achievement, Salient Interactive Miner (SIM), and SDOH (e.g. Meaningful Use status and safety net status), and with much input from Bronx RHIO, our Qualifying Entity (QE). The information was discussed and vetted at the monthly IT Subcommittee meetings. Staffing information was partially collected via our Request for Information (RFI) process, a needs assessment to plan/determine our funds flow to the largest 7 primary care organization partners. All the data are stored in the Salesforce, our network management system. The Salesforce database is being used by member organizations to update their profiles as needed. The CSO also updates information such as PCMH participation through a Salesforce portal. During the past month, there have not been material changes to the IT infrastructure of the PPS. Milestone is complete and will continue to be updated.

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop an IT Change Management Strategy.	An overarching policy for IT training/education and risk management has been developed and approved by the IT Subcommittee. It was originally thought that the Executive Committee would also approve the plan, however it has been determined that only the experts on the IT subcommittee would be required to conduct an in-depth review and approve the policy. This policy is reflected in part in the IT contracts being signed by the PPS with IT service providers such as Bronx RHIO. As the contracts of large systems such as the Bronx RHIO and Care Coordination and Management System (CCMS) come into effect, this document will need to be reviewed and revised, and we plan to do so real-time. The document addresses the current thinking on 1) leadership's involvement in the formulation of IT Change Management Strategy; 2) Steps to define approach to the governance of the change process; 3) Methods to engage stakeholders and end users to identify training needs; 4) a plan to conduct training as IT changes occur; 5) defined workflows for authorizing implementing IT changes; 6) a communication strategy to facilitate change management; 7) risk assessment of the IT System changes; and 8) provisions to share the approved IT change management strategy with stakeholders. There has not been any training executed in DY1Q4 due to a significant delay in the contracting process, with contracts either not being signed until late March 2016 or pending signing with expected dates in April 2016. Training will be a priority focus going forward. Milestone is complete and will continue to be updated.
Develop roadmap to achieving clinical data sharing and interoperable systems across PPS network	A roadmap to achieving clinical data sharing and interoperable systems has been presented to the IT subcommittee. We are collecting bi-directional Business Associate Agreements (BAA) between the PPS and all its member organizations to facilitate PHI transfer. The RHIO is also collecting consent forms that will allow the PPS to collect information on its member organizations. Our contract signed by the Bronx RHIO had and pending contract with Care Coordination and Management System (CCMS) will have training plans in place and these plans will be expanded as the need arises. To date there have not been formal training conducted by the PPS. Milestone is complete and will continue to be updated.
Develop a specific plan for engaging attributed members in Qualifying Entities	A plan for engaging attributed members in the Bronx RHIO, our Qualifying Entity (QE) has been approved by the IT Subcommittee and is attached. The plan has been refined in DY1Q4 based on our evolving understanding of the regulatory environment and strategic planning as a result of cross-Bronx PPS collaboration and development of best practices. We developed a strategy for individual patient consents to apply to the Central Services Organization which will allow us to effectively engage in population health and reporting. We also investigated best practices of the most successful organizations at collecting consent which provide services in hospital and ambulatory settings and guidelines are being drafted to assist other members with the work of capturing patient data-sharing consent documentation. We are now starting to implement controls and feedback mechanisms on our members' progress, which further inform the plan. Training for members is being developed. Milestone is complete and will continue to be updated.
Develop a data security and confidentiality plan.	We are submitting the third section of the SSP this quarter and are addressing the IA comments from the DY1Q3 submission. Milestone is on track for completion.

Milestone Review Status

Milestone #	Review Status	IA Formal Comments
Milestone #1	Pass & Complete	
Milestone #2	Pass & Complete	
Milestone #3	Pass (with Exception) & Ongoing	The IA does not consider this milestone complete. The PPS failed to provide evidence of a formal Board approval. In order to complete this milestone the PPS must obtain official Board approval of the Clinical Data Sharing and Interoperable Roadmap.

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

✓ IPQR Module 5.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in creating and implementing your IT governance structure, your plans for data sharing across your network, your approach to data security and confidentiality, and the achievement of the milestones described above, including the potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Based on collaborative IT work to date, we feel well prepared to continue to manage the challenges in evolving BPHC's current multi-stakeholder IT governance into an operational IT change management framework. While we anticipate reluctance on the part of some partners to agree to certain elements of network IT governance and requirements, we will educate partners on the need and justification for all requirements, processes and IT change management governance and have incorporated compliance provisions into Master DSRIP Service Agreements (MSAs) to eliminate ambiguity and make compliance contractually obligated.

Partners may be challenged to comply with data sharing obligations, especially those that had not previously participated in data exchange or whose IT infrastructures may not meet certified EHR MU requirements. Again, we will educate all partners on the importance of data sharing and compliance with data security and confidentiality policies and incorporate data sharing agreements into their MSAs.

We will work with Bronx RHIO, our predominant QE and a close partner of SBH and Montefiore, among other BPHC participants, to understand gaps in patient engagement, as measured by consent, and to implement targeted strategies for obtaining consent from more attributed patients. Partners may be challenged, however, to participate in the Bronx RHIO, to interface their disparate IT systems for health information exchange or to acquire certified EHR solutions capable of interoperating. Failure to achieve connectivity and data sharing objectives will have particular impact on Project 2.a.i, since clinical interoperability is critical to development of an integrated delivery system. BPHC will establish programs to assist in these areas, including monitoring and direct assistance to partners in achieving these interoperability and data sharing objectives.

✓ IPQR Module 5.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The IT workstream is dependent on strategies and requirements developed in the Performance Reporting, Clinical Integration and Population Health Management workstreams primarily, and to a lesser extent in all other organizational workstreams to the extent they identify IT expectations (e.g., for financial system enhancements in the Financial Sustainability workstream, or for workforce training and enablement using the planned care coordination management solution). In addition, the IT workstream will be highly interdependent with General Project Implementation and in particular for Domain 2 & 3 project-specific strategies and their Domain 1 requirements. Elements of IT governance may be dependent on the Governance workstream since the IT Sub-Committee and other elements of IT governance will be integrated into overall BPHC governance. BPHC considers IT integral to all aspects of PPS performance.

✓ IPQR Module 5.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Attributed Patients and Families/Caregivers	Recipient of care services delivered with support of effective IT	• Interaction sufficient to participate and take limited accountability for health and care-related activities
BPHC CSO Business Staff	Accountable for integration and effective use of IT in PPS services	• Oversight and integration of IT into BPHC operations
BPHC Governance Committee Members	Governance for effective integration and use of IT, centrally and across partners	• Oversight and integration of IT into BPHC operations
SBH Management/Leadership	Fiduciary oversight for effective integration and use of IT in BPHC operations	• Oversight and integration of IT into BPHC and SBH operations
SBH IT Leadership and Staff	Primary leadership, project management and support	• Coordinate, support and maintain coordinated BPHC (and SBH) IT solutions
Montefiore Management/Leadership	Accountable for integration of key Montefiore-supplied IT functionality for BPHC support	• Oversight and integration of Montefiore IT into BPHC operations
Montefiore CMO Staff	Effective use of BPHC IT to deliver care management services to patients	• Effective use of BPHC (and Montefiore) IT solutions
Montefiore Bronx Accountable Health Network Staff	Effective use of BPHC IT to deliver Health Home services to patients	• Effective use of BPHC (and Montefiore) IT solutions
Montefiore IT Leadership and Staff	Project management and support for integrated Montefiore IT	• Coordinate, support and maintain integrated Montefiore IT solutions
Partner Organization Providers and Staff	Integration, connectivity and effective use of BPHC IT solutions	• Adopt, implement use and support integrated BPHC IT solutions
External Stakeholders		
Bronx RHIO Management/Leadership and Staff	Accountable for integration of key Bronx RHIO-supplied IT functionality for BPHC support	• Oversight and integration of Bronx RHIO IT into BPHC operations
Bronx Community Advocates/Leaders/Elected Officials	Awareness of how IT is being used to effectively support BPHC and Bronx patients	• Consume stakeholder communication and participation in stakeholder events
Bronx Community Members/Public At-Large	Awareness of how IT is being used to effectively support BPHC and Bronx patients	• Consume stakeholder communication and participation in stakeholder events
Non-Partner Providers	Awareness of how IT is being used to effectively support Bronx patients and how they can participate in Bronx RHIO and other IT solutions related to BPHC	• Bronx RHIO or other QE participation as warranted to effectively treat patients
CBO partners with experience in MH/BH, I/DD and	Curriculum Development and/or training	Serve as subject matter experts to the vendor(s) or partner(s)

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

✓ IPQR Module 5.7 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

- IT workstream success will be measured according to the following:
- Governance – Multi-stakeholder representation and participation in IT Sub-Committee meetings, with timely decision-making for IT-related issues
 - Strategy/Solution Development – Timely completion of current state assessment, IT connectivity roadmap, data sharing plan, etc.
 - Strategy Monitoring – Progress against IT strategy objectives and milestones
 - QE Adoption and Integration – Percentages of providers using Bronx RHIO and patients consenting to disclosure
 - Partner IT Capabilities – Percentages of providers using certified EHR technology, Meaningful Use attestation, and PCMH 2014 recognition
 - Patient Engagement – Progress against achieving patient engagement goals and documented use of IT in achieving goals

Section 06 – Performance Reporting

✓ IPQR Module 6.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Establish reporting structure for PPS-wide performance reporting and communication.	Completed	Performance reporting and communications strategy, signed off by PPS Board. This should include: -- The identification of individuals responsible for clinical and financial outcomes of specific patient pathways; -- Your plans for the creation and use of clinical quality & performance dashboards -- Your approach to Rapid Cycle Evaluation	04/01/2015	03/31/2016	04/01/2015	03/31/2016	03/31/2016	DY1 Q4	NO
Task Establish reporting oversight responsibilities	Completed	Designate reporting oversight responsibilities to Executive Committee, Quality and Care Innovation Sub-Committee and Finance and Sustainability Sub-Committee. BPHC Senior Director for Quality Management and Analytics will be responsible for working with the Quality and Care Innovation Sub-Committee on performance reporting activities.	04/01/2015	06/30/2015	04/01/2015	06/30/2015	06/30/2015	DY1 Q1	
Task Develop reporting and communication requirements	Completed	Complete analysis of state guidance to develop comprehensive requirements related to reporting and communication across all workstreams and projects.	04/01/2015	06/30/2015	04/01/2015	06/30/2015	06/30/2015	DY1 Q1	
Task Define performance reporting categories	Completed	Define categories of reporting (beyond those that are state-mandated) necessary for PPS performance management and operations, including Rapid Cycle Evaluation and monitoring of overall performance of BPHC and its network partners.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Analyze reporting capacities across PPS	Completed	Assess existing reporting capabilities of BPHC and its network partners to identify gaps between requirements and current capabilities.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Analyze MCO data exchange capacity	Completed	Assess MCO capabilities for data exchange relative to requirements for performance metric submission.	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task	Completed	Identify CSO staff and network partner staff (i.e., end-users)	07/01/2015	09/30/2015	07/01/2015	09/30/2015	09/30/2015	DY1 Q2

SBH Health System (PPS ID:36)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
<p>Establish reporting structure for PPS-wide performance reporting and communication.</p>	<p>BPHC has completed this milestone. The Performance Reporting and Monitoring Structure was presented to the Executive Committee in March for review and approval. It describes the PPS vision for what information will be shared and with whom, and a description of the committee structure which will monitor the performance data. Policies and procedures are written that describe the data collection and reporting processes related to Rapid Cycle Evaluations (RCEs, which are generally operational process measures to be collected by the partners on a monthly basis) and Patient Engagement metrics reporting. It describes the current plans for creation of dashboards for clinical quality and performance metrics across our developing systems. Business Associate Agreements (BAAs) and Data Use Agreements have been put in place with all of our largest partners – between the partners and BPHC, as well as between the partners and Bronx RHIO.</p>
<p>Develop training program for organizations and individuals throughout the network, focused on clinical quality and performance reporting.</p>	<p>BPHC has identified and is contracting with a vendor, Joselyn Levy & Associates, to work with BPHC to develop a performance reporting and continuous quality improvement (CQI) training program for the CSO as well as our partner organizations and individuals within our PPS. BPHC has also identified roles, and available systems and data that may potentially be used for initial training sessions.</p> <p>As we develop the training program with Joselyn Levy & Associates, focus will be placed on ensuring that the plan includes reporting expectations by role and the methods and tools by which reports are generated. The initial training curriculum will use examples from available systems (not all PPS planned reporting systems have been developed yet) and available data (PHI is still restricted in NY State systems).</p> <p>Initial performance reporting examples and training may use the MAPP dashboards, Salesforce (BPHC's network management system), and Bronx RHIO's Spectrum, the RHIO data analytics platform. Understanding how to use these systems, what data they contain, and how to interpret the reports and analytics that they can produce will be the focus. This will provide users an opportunity to both use the systems and real data, and learn about how to interpret that data and make it actionable for their needs.</p> <p>The task to "Obtain approval on training program, Vet and finalize the initial training program with the Executive Committee" will not be performed. It was created prior to IA guidance regarding the milestone supporting documentation requirements, and the IA guidance does not specify that this training program should be presented to the Executive Committee. As the Executive Committee has many other tasks at hand, it was determined that Committee approval would not be required</p> <p>This milestone is on track for completion by DY2 Q2.</p>

SBH Health System (PPS ID:36)

✓ IPQR Module 6.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing performance reporting structures and processes and effective performance management within your network, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

1. Partners have varying levels of reporting capacity as well as interoperability, making it challenging to exchange standardized data and reports within BPHC's PPS. BPHC's assessment of partners' reporting capabilities as well as activities in the IT workstream will identify gaps in capabilities and BPHC will work closely with partners to close such gaps in time to meet DSRIP goals.
2. Partners have varying levels of analytical capabilities and will need to be brought up to a standard level of functioning in order to understand how to interpret reports and use them to improve clinical and financial outcomes. BPHC's training program will educate key personnel within each network partner and ongoing trainings will be made available as new personnel join or existing personnel have questions or require support with respect to performance reporting. In addition, staff from the CSO will supplement formal trainings by providing "on the ground" support for data collection and quality control while partner staff ramp up their reporting and interpretation skills.
3. It will be important to define and communicate the PPS's priorities and performance expectations throughout the CSO and between the CSO and network partners. Lack of understanding of the goals of BPHC and/or lack of understanding of how the day-to-day work of staff connects to those goals will lead to wasted and ineffective effort and will negatively affect the pace at which the goals of DSRIP are met. Because performance reporting and accountabilities are connected to every aspect of DSRIP implementation, there is a great need for an overarching vision for data analytics that serves the goals of the BPHC PPS. This vision must include clearly defined and articulated performance standards and expectations as well as a performance improvement strategy that articulates a feedback process between network partners and the CSO.
4. Because the PPSs will evolve and be a "learning entity," it will be challenging for the CSO to maintain focus on those goals and to orient new staff to the culture shift. BPHC is in the process of developing a PPS-wide communication plan that will address performance reporting expectations and processes. The communication plan will be continuously evaluated and updated to ensure BPHC is effectively reaching its partners through a range of methods (e.g., in-person meetings and webinars, newsletters and e-blasts, website updates, desk-side training and mentorship, etc.).

✓ IPQR Module 6.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

A clinical quality and performance reporting program will touch every aspect of the PPS. The PPS goals and performance standards, which will influence the structure of reporting, will be developed and approved by the committee structure implemented under the governance workstream. System improvements will be planned, deployed and monitored through the IT workstream. To be effective, the clinical quality and performance reporting program must be developed in tandem with the clinicians' engagement strategy because the reporting tools developed must be

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

championed by clinicians in order for the culture of change to take root. BPHC's approach to care management and population health management will inform the content of the dashboards and reports and the capabilities of the IT infrastructure will influence the types and timing of data available to be reported and analyzed. The program must also be developed with an eye towards the evolution of the PPS's workforce and serve the defined financial sustainability goals.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

IPQR Module 6.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Executive Director, CSO	Irene Kaufmann	BPHC overall performance management
Chief Financial Officer, CSO	Todd Gorlewski	Oversee financial metrics and outcome accountability
Senior Director, Quality Mgmt & Analytics, CSO	Dr. Amanda Ascher, CMO BPHC	Overall delivery of QM and analytics reporting
Senior Director, Care Delivery & Practice Innovations, CSO	Dr. J. Robin Moon	Seamless connecting with and strategy for the QM and clinical projects
Associate Director, Information Services, SBH (IT)	Jonathan Ong	IT infrastructure support and implementation
Key point person/project manager from provider organizations	Nicolette Guillou, Montefiore (ambulatory) Akwasiba Rafaelin (ED and IP) Twiggy Rodriguez, Acacia Network Irene Borgen, SBH Health System Zena Nelson, Institute for Family Health (IFH) Fernando Alonso, Bronx United IPA Nieves Madrid, Morris Heights Health Center (MHHC) Dean Bertone, Union Community Health Center (UCHC)	Integration and support of the reporting functions, reporting requirement adoption, implementation and communication with BPHC

☑ IPQR Module 6.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Executive Committee: Eric Appelbaum, SBH; Maxine Golub, IFH; Marianne Kennedy, VNSNY; Pamela Mattel, Acacia; Fernando Oliver, Bronx United; Tosan Orwariye, MHHC; Amanda Parsons, MMC; Paul Rosenfield, Centerlight; Stephen Rosenthal MMC; Charles Scaglione, Bronx RHIO; Eileen Torres, BronxWorks; Len Walsch, SBH; Pat Wang, HealthFirst; Gladys Wrenwick, 1199; Douglas York, UCHC	Leadership on all performance reporting areas	Overall oversight of reporting process, including IT infrastructure, clinical quality metrics and financial issues
IT Sub-Committee members Nicole Atanasio, Lott Residence; Jitendra Barmecha, SBH; Helen Dao, UCHC; Brian Hoch, MMC; Jeeny Job, SBH; Tracie Jones, BronxWorks; Kate Nixon, VNSNY; Elizabeth Lever, IFH; Uday Madasu, Jewish Board; Michael Matteo, CenterLight; Kathy Miller, Bronx RHIO; Edgardo Nieves, MHHC; Anthony Ramirez, Acaia; Sam sarkissian, UBA	Leadership on tech decisions around the reporting process	Oversight and integration of the reporting infrastructure for BPHC PPS
Quality and Care Innovation Sub-Committee members Todd Ostrow, CenterLight; Kenneth Jones, MHHC; Dharti Vaghela, Essen; Frank Maseli, Bronx United; Chris Norwood, HealthPeople; Megan Fogarty, BronxWorks; Michele Quigley, United Cerebral Palsy Assoc; Debbie Pantin, VIP; Pablo Idez, IFH; Anne Meara, MMC; David Collymore, Acacia; Ed Telzak, DBH; Beverly Mosquera, Communilife; Rona Shapiro, 1199; Lizica Troneci, SBH	Leadership over the QA team at BPHC CSO	Oversight of defining quality report requirement and logistics

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Finance and Sustainability Sub-Committee members Carol Bouton, IFH; Carol Cassell, ArchCare; Tomas Del Rio, Acacia; Max Francios, Bronx United; Marcus Freeman, MHHC; Donna Friedman, RMHA; Todd Gorlewski, SBH; Mary Hartnett, UCHC; Josephine Incorvaia, CenterLight; David Koschitzki, MJHS; David Menashy, MMC; Kity Khudkar, Schevier Nursing; Denise Nunez, Divino Nino; I Ravi Ramaswamy, Families on the Move	Leadership on financial metrics	Oversight of financial reporting issues
Montefiore leadership Amanda Parsons, Stephen Rosenthal, Anne Meara	Accountable for integrating Montefiore quality measures with BPHC	Oversight and coordination of quality reporting to BPHC PPS
BPHC CSO clinical team staff Amanda Ascher, Janine Dimitrikakis, J Robin Moon	Accountable for timely communication and coordination with the QM team	Oversight and integration of the reporting into the QM
BPHC Executive Committee members Eric Appelbaum, SBH; Maxine Golub, IFH; Marianne Kennedy, VNSNY; Pamela Mattel, Acacia; Fernando Oliver, Bronx United; Tosan Orwariye, MHHC; Amanda Parsons, MMC; Paul Rosenfield, Centerlight; Stephen Rosenthal MMC; Charles Scaglione, Bronx RHIO; Eileen Torres, BronxWorks; Len Walsch, SBH; Pat Wang, HealthFirst; Gladys Wrenwick, 1199; Douglas York, UCHC	Leadership for and oversight of BPHC performance	Oversight of quality reporting into BPHC
Partner organization providers and staff, including DSRIP Program Managers/Directors	Accountable for meeting the PPS partnership requirement	Delivery of quality reporting requirements to BPHC
External Stakeholders		
Bronx RHIO Leadership and staff Charles Scaglione, Kathy Miller, Nance Shatkin, Keela Shatkin	Accountable for integration of key Bronx RHIO-supplied IT functionality for BPHC support	Oversight and integration of Bronx RHIO IT into BPHC operations
Other PPSs in NYC: Bronx Lebanon, OneCity, Staten Island, Advocate, Mount Sinai (initial idea exchange)	Exchange of ideas and plans utilized and potentially share solutions	Participation in joint planning, requirement development and mitigation strategies
1199SEIU TEF (Training vendor)	Accountable for training partners for reporting requirement and compliance	Fully developed training program. Train all partners.

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

✅ IPQR Module 6.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support your approach to performance reporting.

BPHC intends to leverage shared data management and analytics infrastructure already present in the PPS, from Bronx RHIO. St. Barnabas Health System (SBH) has a close working and governance relationship with Bronx RHIO, as do Montefiore and Bronx Lebanon Hospital Center. Together, these organizations and others in the Bronx are already contributing data to Bronx RHIO, which manages the data for health information exchange and analytics, the latter under an ongoing Health Care Innovation Award from CMS. In either instance, the NYSDOH MAPP and Salient Interactive Miner (SIM) also contribute data utilized by BPHC's analytics team.

✅ IPQR Module 6.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The success of this organizational workstream will be measured as follows:

- Metric Submission – Successful and timely submission to DOH of performance measures and metrics that accurately reflect the progress of BPHC.
- Rapid Cycle Evaluation – Effectiveness of clinical quality and performance dashboard tools in enabling BPHC to monitor progress and identify areas of strength and areas for improvement.
- Analytics Staff Engagement and Communication – Training analytics staff to use the tools, to understand the goals of clinicians and leadership, and to communicate results to effectively translate metrics and measures into improved outcomes. This includes training on performance improvement and continuous quality improvement so that teams can take data that reflects poor or less-than-ideal performance and translate that into a PI project that will result in improved outcomes. As data reflects improved (or static) outcomes, continuous quality improvement strategies result in further PI projects.
- Staff and Leadership Engagement – Participation of clinicians and leadership in using clinical quality and performance measurement dashboards developed to improve care delivery and financial outcomes.
- Informed Decision-Making – Integration of performance reporting into decision-making through the governance process to drive improvements, deploy resources, and assess progress against overall program goals.
- Project level quality reporting--Successful and timely reporting to DOH of project level processes, outcomes, measures and metrics that accurately reflect the progress of each project.

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop Practitioners communication and engagement plan.	BPHC has completed this milestone. See attached Practitioner Communication and Engagement Plan. BPHC partner representatives, including senior clinical leadership and clinical practitioners, participate in our governance structure that is made up of the Executive committee and four subcommittees: Quality and Care Innovation Subcommittee (QCIS), IT Subcommittee, Finance & Sustainability Subcommittee, and Workforce Subcommittee. QCIS reviews various reports produced by the CSO clinical team, and reviews and approves clinical elements (including evidence-based guidelines for clinical practice) of the Clinical Operations Plans (COPs) developed in project-specific work groups. These workgroups are essentially PPS-wide professional groups called Implementation Work Groups, or IWGs ("rapid deployment collaboratives"), where practitioners serve as project-specific clinical quality councils, overseen by the QCIS. The Practitioner Communications and Engagement Plan includes mechanisms for standard performance reports to be created and distributed to appropriate practitioner groups and partners, to obtain feedback and aid in continuous quality improvement. Methods used for practitioner engagement include learning collaboratives, teaching webinars/clinical forums, Grand Rounds, in addition to the above-described opportunities for practitioners to participate in clinical guidelines/protocol development and to discuss, collaborate, and shape how DSRIP will affect their practices.
Develop training / education plan targeting practioners and other professional groups, designed to educate them about the DSRIP program and your PPS-specific quality improvement agenda.	Agreements have been developed with project-specific vendors who are also our partners (The Institute for Family Health, Montefiore's Care Management Organization [CMO], a.i.r. nyc, and Health People) to conduct trainings based on the Clinical Operations Plans (COPs) developed by the IWGs (described in Milestone 1 narrative). Chief Medical Officer achieved Continuing Medical Education credit in January 2016 for practitioner trainings. We are working with a vendor to create a Performance Reporting Training that will also be provided to our practitioners. A draft of the Practitioner training and education plan has been completed. Milestone is on track for completion.

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

✅ IPQR Module 7.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the current level of engagement of your physician community in the DSRIP program and describe the key challenges or risks that you foresee in implementing your plans for physician engagement and achieving the milestones described above. Describe any potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

BPHC has included both primary care and subspecialist clinicians from key partners throughout the planning and implementation process. A sample of clinicians participating include:

- Cardiovascular, diabetes, and asthma projects: Dr. Eric Appelbaum, Associate Medical Director at SBH Health System; Dr. David Collymore, Chief Medical Officer at Acacia Network; and Dr. Vanessa Pratomo, Associate Medical Director of Montefiore's Care Management Organization
- Primary care/behavioral health integration project: Dr. Brian Wong, Director of Adult Behavioral Health Services for the Montefiore Medical Group and Dr. Thomas Betzler, Executive Clinical Director, Montefiore Behavioral Health Center
- Care transitions, emergency department triage, and Health Home at-risk projects: Alex Alvarez, BSN, Senior Director, Network Care Management of Montefiore's Care Management Organization; Neil Pessin, Ph.D. of psychology, Vice President, Community Mental Health Services at Community Care Management Partners; Wanda Kelly, Director of Case Management, SBH Health System; and Donna Friedman, Ph.D. of psychology and LCSW, Deputy Executive Director of the Riverdale Mental Health Association

Overall, the range of practitioner types represented includes nurses, social workers, health educators, mental health professionals, and substance abuse professionals.

The PPS has held numerous "all member" webinars to educate practitioners about the transformative nature and resources that DSRIP will bring to the Bronx health care delivery system. We are expanding the number and types of practitioners included in the implementation planning process to include a broader group that has more physicians, nurses, social workers, care managers and behavioral health professionals.

The biggest risk to achieving the milestones is that practitioners will not feel able to take the time from their practice to participate in the Quality and Care Innovation Sub-Committee and/or to attend the educational and training sessions provided for each of the projects in which they have committed to participate. This is especially a risk for primary care practitioners (PCP) and their care team members to whom much of the training will be directed; virtually all of the DSRIP projects BPHC has selected impact PCPs in some way. BPHC hopes to mitigate this risk by offering trainings at various times and by potentially compensating practitioners who may be impacted by loss of income related to the training or participation in governing Committees, Sub-Committees, and/or Rapid Deployment Collaboratives. Provider turnover during the DSRIP period could also pose a risk to achieving DSRIP performance goals. We will implement a practitioner tracking system and provide regularly repeated orientations and briefings on the complexities of project implementation, which will be accompanied by a comprehensive implementation manual for new practitioners to use as a guide.

Another risk is that many BPHC practitioners will be participating in multiple clinical projects within our PPS and may also be participating in projects run by other PPSs. The sheer number of new projects to implement may be overwhelming for practitioners. To mitigate this risk, BPHC has conducted joint clinical planning efforts with other Bronx PPSs to align projects and project interventions. We plan to continue joint planning discussions over the course of DY1.

✅ IPQR Module 7.4 - Major Dependencies on Organizational Workstreams

Instructions :

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

It is difficult to point to a DSRIP workstream for which practitioner engagement is not interdependent. For example, IT use is fundamental to: practitioners adopting population health management, the CSO tracking quality metrics, practitioners monitoring patient activity between visits, and practitioners receiving alerts that enable quick follow up and communication when patients are in the hospital or emergency department. All of these capabilities advance BPHC's abilities to improve quality of care and patient outcomes that ultimately lead to cost reductions and financial sustainability. The long term success of clinical improvement projects in Domain 3 depends on practitioner willingness across the PPS network to adopt standardized clinical guidelines, processes and protocols proven to result in lower costs and better outcomes. Funds flow also is crucial for all practitioners' implementation of clinical projects, both for project operationalization and as a mechanism to reward practitioners for their commitment to the DSRIP projects. Finally, practitioners are a fundamental portion of the DSRIP workforce, and practitioner engagement is crucial to practitioner recruitment and retention efforts.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

✓ IPQR Module 7.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
BPHC CMO	Dr. Amanda Ascher	Provide oversight in the areas of the provider engagement and clinical/delivery strategy
Senior Director, Care Delivery and Practice Innovations	Dr. J. Robin Moon	Develop communication and support plans that are project-specific
BPHC Workforce Sub-Committee Co-Chairs	Mary Morris, Co-Chair, SBH Health System Rosa Mejias, Co-Chair, 1199 TEF	<ul style="list-style-type: none"> • Develop curriculum to support the quality agenda • Develop training materials that are project specific
Implementation Workgroups	Chairs of the IWGs	Solicit feedback from provider community on curriculum and quality agenda
Montefiore provider engagement liaison	Laura DeMaria	Assist in development and implementation of the communication and engagement plan
Bronx United IPA	Frank Maselli	Assist in development and implementation of the communication and engagement plan
NYSNA	Lourdes Blanco	Assist in development and implementation of the communication and engagement plan

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

✓ IPQR Module 7.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Provider partners	Recipients of training and education in BPHC's quality goals	Participate in the training sessions and demonstrate practice change in support of BPHC's quality agenda
CBO partners with experience in MH/BH, I/DD and SAS (e.g., ACMH, Community Access, Communilife, Cardinal McCloskey Community Services, EAC, Inc., St. Ann's Corner of Harm Reduction)	Curriculum Development and/or training	Serve as subject matter experts to the vendor(s) or partner(s) involved in curriculum development and training.
BPHC training vendors (including 1199 TEF), Montefiore CMO, Institute for Family Health, a.i.r. NYC	Training and retraining of the work force	<ul style="list-style-type: none"> • Develop curriculum to support the quality agenda • Develop training materials that are project specific
Provider partners: Amanda Parsons, Montefiore Medical Group; Frank Maselli, Bronx United IPA; David Collymore, Acacia; Erica Gayle, IFH; Nelson Eng, UCHC; Dr. Tosan Oruwariye, MHHC	Management staff of these key providers will lead organization efforts to engage practitioners in critical trainings	Practitioners participate in the training sessions and demonstrate practice change in support of BPHC's quality agenda
Quality and Care Innovation Sub-Committee members Chairs: Dr. David Collymore, Acacia; Debbie Pantin, VIP Community Services	Provide quality standards and strategy	Approve the strategy and content for communication and engagement plan
External Stakeholders		
Other PPSs Damara Gutnick, MHV PPS; Kallanna Manjunath, Albany PPS; Anna Flatteau, OneCity Health	Sharing best practices	Regular communication stream
GNHYA--Mary-Ann Etiebet	Convener of all PPS CMO/Medical Directors' meetings	Regular communication stream
Bronx Medical Society	Provide discussion and feedback on clinical changes.	Help to engage provider partners in transformation (PCMH)

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

✅ IPQR Module 7.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

BPHC will implement and utilize a commercial customer relationship management (CRM) system such as from Salesforce.com to manage our physician network, including support for physician communication and engagement.
BPHC will demo and otherwise build awareness among physicians of the capabilities of the planned commercial care coordination management solution (CCMS), focusing on how the infrastructure will be used to provide better service and outcomes to their patients and make their practices more efficient, allowing them to deliver higher quality patient care, along with:

- Providing multi-lingual, multi-cultural care navigation and support
- Tracking and assisting patients with practice selection, active engagement in DSRIP programs, utilization tracking and pediatric-adult transitions
- Assisting patients with locating and accessing community resources
- Support transitions and warm handoffs at discharge, with follow-up tracking
- Educating patients and families about wellness and care, and supporting patients in self-management and shared decision making related to their health needs
- Surveying patients and families regarding care experience

In addition, physician training in evidence-based medicine, care coordination, population health management and other topics pertinent to BPHC and DSRIP will be scheduled, delivered and tracked using a learning management system (LMS) administered by the BPHC CSO.

✅ IPQR Module 7.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

The PPS will measure the success of this workstream in four ways. First, at the most basic level, we will monitor attendance at education and training sessions, all-member webinars, and other learning forums provided by the CSO. We will track attendance at clinical governance meetings, including our implementation and quality workgroups. Second, we have developed CME-type post-training testing for practitioners to measure the success and effects of the training. Third, to track long-term success of the practitioner engagement trainings, the CSO will be tracking practitioner performance on each project through rapid cycle evaluation (RCE) and auditing adherence to evidence-based guidelines and processes and protocols on a periodic basis. (e.g. Behavioral Health Integration into Primary Care, Care Management referrals, Diabetic Outcomes, etc.) Fourth, we will periodically bring RCE results to the Rapid Deployment Collaboratives (Implementation Work Groups acting as clinical quality councils and reporting to the Quality and Care Innovations Subcommittee) to gain knowledge about provider experiences and concerns regarding DSRIP project implementation and impact on them and their patients.

Develop population health management roadmap.	<p>During the Q4, BPHC Central Services Organization (CSO) reviewed DSRIP startup needs for population health management (PHM) capabilities, IT infrastructure and staffing (clinical and non-clinical) among the largest 7 primary care organization partners via a Request for Information (RFI) process. The information received through this process has been used to assess the staffing and IT readiness and develop the initial draft of the PHM roadmap. The CSO reviewed all of the RFI responses and the respective budgets, and determined the startup allocations during DY1Q4. The PCMH consultants' activities to support practice redesign to achieve the PCMH 2014 level 3 have been underway for some time. The consultants have mostly signed contracts by the end of Q4 and are delving into the coaching process with the primary care practices in the workflow changes necessary to apply toward achieving the transformation.</p> <p>Additionally, BPHC has signed the contract with the Bronx RHIO in Q4. The Bronx RHIO has been a partner in BPHC from its inception. Six of the seven largest partners already had participation agreements with the Bronx RHIO prior to the PPS. In addition to working with them on increasing connectivity, we will also develop the Spectrum analytic product, one of the uses of which will be PHM. Milestone on track for completion by DY3Q4.</p>
Finalize PPS-wide bed reduction plan.	<p>BPHC remains in the planning phase for PPS-wide bed reduction. Analysis of hospital utilization patterns was delayed– due to limited systems, data quality issues in MAPP and its dashboards, and data access issues, the PPS only began analyzing inpatient utilization patterns at the end of the quarter. Subsequent analyses were started in Salient/SIM and will be continued in DY2Q1 for presentation to several groups within the PPS.</p>

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	Of note, BPHC leadership and SBH lead for ambulatory care met with the representatives from NYS OMH, OASAS and DOH last month to discuss BPHC's behavioral health vision and services, which included a conversation on psychiatric bed reduction. SBH has inpatient psych beds, half of which are used for substance abuse patients (short-term, not for longer-term substance abuse treatment). SBH is looking to reduce beds for substance abuse (24 total), and OMH and we agreed to start discussing transfer and overflow patients to state beds for longer-term stays/treatment. Milestone on track for completion by DY4Q3.

✓ IPQR Module 8.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in implementing these cross-cutting organizational strategies, including potential impacts on specific projects and, crucially, any risks that will undermine your ability to achieve outcome measure targets.

BPHC anticipates it will have to manage a number of risks while instituting population health management strategies.

(1) Many primary care providers and community-based organizations lack an understanding of how to achieve population health management. While achieving NCQA Level 3 PCMH recognition significantly moves practices towards full population health management, it does not completely achieve this goal. This lack of understanding among providers may impede provider acceptance of the need to adopt new technologies and workflows to support population health management. To mitigate this risk, the CSO will implement a communications and education strategy to enhance providers' understanding and acceptance of population health management. The CSO will also develop and centralize resources and technologies to support providers' transition to population health management.

(2) Providers' adoption of new technology will be slow and will require significant resources devoted to training and oversight to ensure optimization. Slow uptake of technology could result in delays in meeting DSRIP speed and scale targets for patient engagement and achievement of Domain 1 project requirements. To mitigate these risks, BPHC will be prepared to use a variety of training methods to reach providers, including in-person, web-based, and call-in technical support, to provide training and technical assistance during off-hours to meet provider needs. Further, challenges with RHIO and patient engagement are outlined in our IT workstream and overcoming these barriers as outlined there will be key to success of our PHM registries.

(3) There is a risk that not all primary care provider sites will achieve NCQA PCMH Level 3 recognition by the end of DY3. The process for achieving 2014 NCQA PCMH Level 3 recognition is time consuming and requires strong support from leadership. Many primary care practice organizations have small numbers of personnel in leadership and administrative positions, creating a risk that they will not be able to devote sufficient attention to the process for attaining PCMH recognition. Some of the smaller practices may not have adequate staffing to meet all of the NCQA Level 3 2014 requirements. To mitigate these risks, BPHC will provide technical assistance to and invest resources in practices to ensure that there is sufficient internal and external leadership support and basic staff resources to meet the NCQA 2014 PCMH goal within the DSRIP-required time period.

✓ IPQR Module 8.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

Population health management has the following major interdependencies with other workstreams.

Dependency #1: While IT systems alone will not yield a highly functioning population health management-based primary care practice, they are a necessary component of the change that will need to occur if population health management is to be successfully embedded into the daily

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

workflows of a primary care practice. Close alignment of IT architecture and its components with population health management goals must be central to planning. The selection of IT applications and phasing in of new technologies, along with training capabilities, are key to success in population health management.

Dependency #2: Clinical integration and the PCMH roadmap intersect with the population health management roadmap in multiple areas, specifically regarding conducting readiness assessments and the identification of data needs. For example, these workstreams require BPHC to integrate data from social service organizations, supportive housing providers and other community-based organizations into care planning and registry tools.

Dependency #3: BPHC's ability to achieve its vision of population health management will depend on its success at engaging and educating practitioners on how to use data effectively in improving outcomes and in implementing common protocols and processes to achieve DSRIP goals. In addition, BPHC must be successful in its performance reporting efforts.

Dependency #4: Timely implementation of our population health management roadmap is heavily dependent on our workforce strategy. For example, moving all primary care practices to NCQA Level 3 PCMH recognition by the end of DY3 will require adequate healthcare worker capacity in primary care sites and training to ensure that staff are functioning as a care team as envisioned by NCQA. In addition, the BPHC workforce will be heavily involved in planning efforts regarding PPS bed reduction. Finally, successful implementation of cultural competency and health literacy training and recruitment of culturally competent staff will be critical to patient engagement.

Dependency #5: The development of care coordination and care management programs as part of our clinical project implementation will be critical to the success of our primary care providers attaining Level 3 PCMH recognition and our PPS's success in moving to an integrated delivery system.

SBH Health System (PPS ID:36)

✓ IPQR Module 8.5 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational work stream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Quality and Care Innovation Sub-Committee	Sub-Committee members	Develop strategy for deploying effective population health for BPHC attributed patients and the communities it serves
Central Services Organization (CSO)	All CSO staff	Conduct assessment and gap analysis of BPHC provider capabilities in implementing population health strategies
CIO, BPHC	Dr. Jitendra Barmecha, CIO, SBH	Develop architecture of IT applications that can automate PHM functions, and integrate care management software with provider IT technologies
Senior Director, Quality Management and Analytics	Dr. Amanda Ascher, CMO BPHC	Produce patient cohorts that will be targeted for population health interventions including tactics surrounding predictive modeling and risk stratification
Senior Director, Care Delivery & Practice Innovations	Dr. J. Robin Moon	Deploy evidence-based tools and care management functions that support patient engagement and activation
IT Sub-Committee	Dr. Jitendra Barmecha, Chair, SBH Health System	Assist in selecting PHM related applications, developing phase in implementation schedule
Executive Committee	Len Walsh, Chair	Develop a bed reduction plan for BPHC member hospitals
Partner IT Liaisons	Nicole Atansasio, Lott, Inc; Helen Dao, Union; Brian Hoch, Montefiore; Jeeny Job, SBH; Tracie Jones, BronxWorks; Vipul Khamar, VNSNY; Elizabeth Lever, The Institute for Family Health; Uday Madasu, CBC IPA; Mike Matteo, Centerlight; Kathy Miller, Bronx RHIO; Edgardo Nieves, Morris Heights; Anthony Ramirez, Acacia; Sam Sarkissian, UBA; Uvette Walker, Allmed	Implement, adopt and integrate with BPHC population health tools

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

✓ IPQR Module 8.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Attributed patients	Recipients of services	Participate in care management
Providers in BPHC	Identify patients for care management	Participate in training on clinical and billing documentation to enable appropriate population identification and selection for PHM. Participate in technical assistance and project management for PCMH NCQA certification.
Care managers at partner organizations, including BAHN, CCMP and CBC	Manage risk reduction in identified populations	Create care plans and manage populations to reduce adverse outcomes including reductions in disease burden
CBOs	Promote health by actively engaging patient on social determinants	Intervene on patients identified with social determinants
External Stakeholders		
NYCDOHMH	Coordinating Domain 4 goal achievement	Coordinates and collaborates with NYC PPSs in developing strategies to improve MHSA infrastructure and retention in HIV care
State DOH	Oversees state DSRIP implementation and effectiveness	Creates timelines and deliverables for DSRIP program
Other PPSs participating in the same Domain 4 projects: OneCity, Community Care Brooklyn, Bronx Health Access, Mount Sinai, Brooklyn Bridges, NewYork Hospital Queens	Collaboration, information exchange, shared workforce development	Key deliverables/resps: Collaborate on shared projects and organizational initiatives, strategize on information exchange, and collaborate on shared workforce development

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

IPQR Module 8.7 - IT Expectations

Instructions :

Please describe the current Population Health Management IT capabilities in place throughout your PPS network and what your plans are at this stage for leveraging these capabilities and/or developing new IT infrastructure.

Current population health management IT capabilities in place in BPHC include Montefiore CMO's comprehensive care management system which is being used by 400 care management employees to coordinate care for more than 300,000 individuals across employer-sponsored coverage and Medicare and Medicaid managed care. In addition, care management agencies supporting our partner Health Home populations are using smaller scale care management solutions, while other partners are using homegrown analytics to track patients across settings and within condition cohorts. Finally, the Bronx RHIO has developed the Bronx Regional Analytics Database (BRAD) under a multi-year grant from the CMS Center for Medicare and Medicaid Innovation.

A primary BPHC objective is to develop a standardized approach to population health management on behalf of our attributed population across all PPS participants based on a new IT infrastructure – portions of which are being selected in collaboration with Montefiore CMO and Montefiore's Hudson Valley PPS and portions of which build on existing capabilities. Our plans for leveraging and developing a new and integrated IT infrastructure for population health management are based on the following:

- Central data management and analytics through the Bronx RHIO.
- Patient and provider matching and master data management through Bronx RHIO to provide a single integrated view of each patient and a unified, standard and navigable view of participating partners to each other.
- A common commercial care coordination management solution (CCMS) selected from among three finalist vendors being assessed by a cross-functional team of Montefiore and BPHC clinical, operational and technology subject matter experts.
- Health information exchange through Bronx RHIO to achieve required data sharing between electronic medical records and the CCMS, across BPHC and potentially with other PPSs.
- Performance management and metrics (analytics) for internal analysis and reporting and NYSDOH reporting, based on Bronx RHIO and Montefiore Enterprise Data Warehouse capabilities.
- Assessment, monitoring and support programs and resources to help partners implement certified EHRs, adopt and integrate with RHIO services and, if eligible, use the combined IT infrastructure to achieve PCMH 2014 recognition.
- A digital health strategy for patient engagement, including telehealth, remote monitoring, a patient portal and personal health record sharing and digital health apps that are culturally competent.

IPQR Module 8.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

BPHC will measure the success of the population health management workstream using the following metrics:

- The number of primary care practice team members who have begun training on population health management applications
- The number of primary care practice team members who have completed training on population health management applications
- The number of providers (primary care team, behavioral health teams and others) that actively use electronic medical records, care planning tools, and patient registries
- The number of primary care practices that have submitted to the CSO work plans and timelines for attaining NCQA 2014 PCMH recognition

- The number of primary care practices that have begun the process per their work plan for achieving NCQA Level 1, 2 or 3 PCMH recognition

- The number of primary practices that achieved NCQA Level 1, 2 or 3 PCMH recognition
- The approval of a bed reduction plan by the Executive Committee
- DSRIP project-specific metrics such as PQIs, PDIs, PPRs, PPVs, and HEDIS metrics such as hemoglobin A1c, LDL, flu shots, and others

Section 09 – Clinical Integration

✓ IPQR Module 9.1 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement.

Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Perform a clinical integration 'needs assessment'.	Completed	Clinical integration 'needs assessment' document, signed off by the Clinical Quality Committee, including: -- Mapping the providers in the network and their requirements for clinical integration (including clinical providers, care management and other providers impacting on social determinants of health) -- Identifying key data points for shared access and the key interfaces that will have an impact on clinical integration -- Identify other potential mechanisms to be used for driving clinical integration	04/01/2015	12/31/2015	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	NO
Task Envision clinical integration end-state	Completed	Define end-state clinical integration model, aligned with requirements for Project 2.a.i and IT Systems & Processes.	04/01/2015	09/30/2015	04/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Identify care protocols for clinical integration	Completed	Determine which project-specific care protocols require clinical integration. Protocols will be determined as outlined in second milestone "Developing a Clinical Integration Strategy."	06/01/2015	09/30/2015	06/01/2015	09/30/2015	09/30/2015	DY1 Q2	
Task Investigate gaps and needs across PPS related to clinical integration	Completed	Conduct data collection with partners to complete assessment of key DSRIP project requirements, clinical service gaps, workforce and process gaps, data sharing and interface needs, etc.	04/01/2015	12/31/2015	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task Establish definition of clinical integration for partners	Completed	Define clinical integration for our Provider Partners as the need for PPS-wide standardization and alignment with high-value treatment protocols that various provider partners can implement in their practices; this includes, but is not limited to, promoting effective care transitions.	04/01/2015	12/31/2015	04/01/2015	12/31/2015	12/31/2015	DY1 Q3	
Task Analyze data on gaps and needs across PPS	Completed	Complete analysis of data collected to identify clinical integration needs, potential strategies/programs and priorities,	06/01/2015	12/31/2015	06/01/2015	12/31/2015	12/31/2015	DY1 Q3

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Perform a clinical integration 'needs assessment'.	BPHC has completed this milestone. There have been no changes to the Clinical Integration Needs Assessment, and the list of providers who have been integrated has not changed. Meeting schedule template attached.
Develop a Clinical Integration strategy.	BPHC has completed this milestone. We have leveraged our Care Transitions design teams, Care Coordination Management Systems (CCMS) Solutions Workgroup to address the specific data-sharing systems and interoperability requirements for the PPS-wide Care Transitions Strategies included in our Clinical Integration Strategy. Further, we have created and continue to develop training curricula for providers of all types regarding clinical integration, communications tools and care coordination. Along with our Workforce counterparts, we have ensured incorporation in trainings held to date. We have signed a contract with the Bronx RHIO for PPS-wide development of their analytics and HIE platforms. We are nearing agreements with Acupera as a care coordination management system and referral management system, and are already using Salesforce as network management system.

IPQR Module 9.3 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges or risks that you foresee in improving the level of clinical integration throughout your network and achieving the milestones described above. Describe potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

Due to the cooperative nature of our partner relationship, we expect that network participants will embrace collaborative clinical integration assessment and strategy activities, and that they are eager to engage in greater clinical integration. We recognize, however, that our partners often already feel stretched thin by the operating requirements of their existing organizations and that creating and managing an effective integrated workflow across a high number of partners may present a challenge. The greatest risk will be to attempt to "boil the ocean" regarding clinical integration. We will mitigate against this risk by basing integration goals on specific project and organizational requirements identified in other workstreams, and on measures specified in program terms and conditions that can be measured to provide quantitative evidence of integration improving patient outcomes. We will also seek to define common and standardized workflows and protocols that make clinical integration achievable for all partners, without creating a substantial additional burden. Additional risks may arise from disparate technology and data sets and an inadequate workforce and resources. We will mitigate these risks by thoroughly assessing and analyzing partner interoperability and staff capabilities and readiness, as described in the IT Systems & Processes workstream, and providing formal PPS program support for achieving EHR implementation and integration, QE participation and PCMH recognition.

IPQR Module 9.4 - Major Dependencies on Organizational Workstreams

Instructions :

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

The strategies developed in the Clinical Integration workstream are closely related to requirements and strategies that will be identified in the Workforce Strategy, IT Systems and Processes, Performance Reporting, Physician Engagement and Population Health Management workstreams. In addition, the Clinical Integration workstream will be highly interdependent with General Project Implementation and in particular for Domain 2 & 3 project-specific strategies and their Domain 1 requirements, including primary care providers attaining 2014 Level 3 PCMH recognition. Many of the goals and requirements of project 2.a.i are closely related to clinical integration. Finally, physician engagement will be a core component and prerequisite for establishing a clinically integrated network.

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

✓ IPQR Module 9.6 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Bronx RHIO leadership: Kathryn Miller, Charles Scaglione	Health information exchange provider	Support in analyzing current state of IT interoperability and developing strategies to support, broaden and enhance future clinical integration with data exchange
IT team, SBH: Dr. Jitendra Barmecho, CIO, Jonathan Ong, Zane Last, Gregg Malloy	Provide data exchange, IT interoperability and systems integration strategy and support	Alignment with IT systems and processes related to clinical integration; input into data sharing and interoperability strategies, including IT interfaces and messaging to support clinical integration
Montefiore CMO: Anne Meara, Alex Alvarez, Peggy Czinger, John Willeford	Provide clinical integration experience and expertise from ongoing care	Lessons learned from and input into future team-based care management, care coordination and organizational supports (e.g., staffing, IT, contact center, etc.)
External Stakeholders		
NYC DOHMH	Support for the Domain 3 project's planning and execution	Domain 3 projects planning process
Other Bronx PPSs: Advocate PPS OneCity Health PPS Bronx Lebanon PPS	Accountability and sharing of best practices	Regular communication stream
OASAS	Support for PC/BH Integration and MHA	Support with review of clinical guidelines to align with best practices.

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

✅ IPQR Module 9.7 - IT Expectations

Instructions :

Please clearly describe how the development of shared IT infrastructure across the PPS will support this particular workstream.

Nearly all components of BPHC's shared IT infrastructure will support and are critical to clinical integration:

- Central data management and analytics through the Bronx RHIO will provide common data and outcomes measurement to bind together partners and help them track common integration results in a standardized way.
- Patient and provider matching and master data management through Bronx RHIO will provide a single integrated view of each patient and a unified, standard and navigable view of participating partners to each other.
- A common care coordination management solution (CCMS) will further present an integrated view of the patient and provide a common tool for interacting with patients and with other partners
- Data sharing and interoperability standards and protocols embedded in partner contracts will support transitions and care management and promote an integrated and longitudinal view of the patient through secure messaging, event notification and potential aggregated portal data sets and other patient- and provider-facing applications.

✅ IPQR Module 9.8 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

Clinical integration will be measured by: evidence of high value treatment protocols implemented by providers across the PPS; improvements in clinical outcomes (e.g., improved rates of LDL and HTN control in CVD patients, improved A1C rates in Diabetics, improved depression screening and improving PHQ9 scores in patients receiving care in a BH integrated model.) Clinical integration success will also be measured by the level of Provider based engagement in Continuous Quality improvement, as measured by our workgroups which serve as project-specific quality councils.

IPQR Module 9.9 - IA Monitoring:

Instructions :

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Section 10 – General Project Reporting

IPQR Module 10.1 - Overall approach to implementation

Instructions :

Please summarize your intended approach to the implementation of your chosen DSRIP projects, including considerations around how this approach will allow for the successful development of concurrently implementing DSRIP projects.

BPHC is committed to establishing a care delivery model with mutually reinforcing resources and capabilities across the PPS. These aim to measurably improve patient satisfaction, improve outcomes, lower costs and enable the transition from volume to value-based care. To this end: 1) BPHC is establishing a population health management-driven HIT architecture to allow electronic data sharing across providers and access to patient-level information. This will facilitate rapid treatment and care management decisions among collaborating providers and beneficiaries about physical, behavioral, and social problems that impact beneficiaries' lives and support attainment of PCMH Level 3 2014 standards. 2) BPHC is creating an analytics capability for access to timely performance reports, to help accountable parties measure and track the impact of their actions on both a patient and population level and identify areas for improvement. The analytics team monitors the PPS and partners' progress towards meeting project targets. 3) BPHC is developing a workforce recruitment and retention strategy including career paths, higher education incentives, and excellent training and competitive salaries for a culturally and linguistically competent care management staff to engage, educate, and support individuals in need of assistance in managing both medical and social chronic conditions. 4) BPHC is leveraging the clinical and administrative leadership within each PPS partner and will ensure they have adequate dedicated time to drive overall DSRIP implementation. Partners' clinical and administrative leadership will: educate and motivate staff to embrace evidence-based practices; use technology to help improve patient outcomes; ensure that staff engage in DSRIP project-related training; provide quality oversight; and oversee the achievement of PCMH NCQA Level 3 2014 recognition. 5) BPHC has established a Quality and Care Innovation Sub-Committee (QCIS) to act as BPHC's clinical governance body. The QCIS draws from key partners and include diverse, well-informed, activist practitioner thought leaders, ranging from PCPs, subspecialists, nurses, mental health professionals, and social workers. The QCIS analytics support team will acquire and present data to rapidly and decisively direct attention to high performers for best practices and to low performers for remediation. The clinical governance body will: provide clear direction and a strong voice in defining and implementing change at the provider level to create a culture of quality and accountability; advocate for clinical integration to improve care; and seize opportunities to collaborate with other PPSs. 6) BPHC is developing a financial sustainability plan that begins with a transparent and coordinated inter-project budgeting system that: supports DSRIP central services; accurately reflects needed investments in PPS provider staffing and IT infrastructure; accounts for overlapping project personnel and training curricula; and moves in phases to a total cost of care model that expands upon the risk-based model now in place for some PPS providers via Healthfirst and other MCO contracts. 7) BPHC is actively collaborating with other Bronx PPSs, including the HHC and Bronx-Lebanon-led PPSs and the Advocate Community Providers PPS, on multiple areas including clinical planning, workforce development, community engagement, and information sharing. 8) BPHC has established a Central Services Organization (CSO) to provide a range of services to PPS partners, including clinical supervision, information technology, financial, training, analytics, administrative, and care management/care coordination infrastructure services. The CSO will also ensure partners' compliance with project requirements and track the project implementation and patient engagement speed commitments across all projects.

IPQR Module 10.2 - Major dependencies between work streams and coordination of projects

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Instructions :

Please describe how your approach will handle interdependencies between complementary projects, as well as between projects and cross-cutting PPS initiatives - for example, an IT infrastructure upgrade, or the establishment of data sharing protocols.

BPHC sees its DSRIP projects as a suite of programs that enable one another and magnify the impact of individual projects and workstreams. Some of the major dependencies include the following: Population health management and IT systems & processes: Attaining PCMH Level 3 recognition is widely viewed among clinicians who have been involved in DSRIP planning as the "master DSRIP project milestone" off of which virtually all other DSRIP projects and elements are built, including patient engagement and follow up. The BPHC HIT architecture is geared to providing IT capabilities that support work flows and protocols used by high-functioning Level 3 PCMHs to transition to population health management, such as electronic medical records, best practice alerts, care planning systems, patient registries, and tracking and stratification tools. Underlying these capabilities are a central data storage and management plan, robust data governance, and RHIO connectivity. Project implementation, IT systems & processes, and financial sustainability: Clinical improvement projects focused on cardiovascular disease, diabetes, asthma, and behavioral health will be built upon the chronic care management foundation provided by a high functioning Level 3 PCMH. Key PCMH features that promote effective chronic care management include use of evidence-based guidelines selected by consensus of the clinical governance body and data sharing that enables practitioners and embedded care managers to assess and develop effective care plans for the target populations. Ultimately, the establishment of Level 3 PCMHs across the PPS will be the impetus for moving to value-based payments that build a sustainable delivery system. Implementation of clinical improvement projects will be designed to build upon IT, workflows and clinical training used in the NCQA PCMH recognition process. Performance reporting, clinical integration and practitioner engagement: Practitioner accountability will be built on performance reporting that provides provider-specific and comparative performance data on the patient, practice and population level. Performance reporting is a key provider engagement tactic. Workforce strategy: A robust and well-trained workforce, rooted in the diverse communities of the Bronx, and engaged in the transformative change required under DSRIP will be central to the success of DSRIP project implementation. BPHC has identified a four-part workforce strategy that will be fleshed out based on the needs of our clinical projects. Our strategy includes: (1) redeployment of workers to respond to shifting staffing needs and ensure any displaced workers are connected to new employment; (2) training and education to address the needs for both retraining of existing staff and onboarding those newly hired under DSRIP; (3) robust recruitment to attract new workers; and (4) active engagement of labor and frontline staff.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

✔ IPQR Module 10.3 - Project Roles and Responsibilities

Instructions :

Please outline the key individuals & organizations that play a role in the delivery of your PPS's DSRIP projects, as well as what their responsibilities are regarding governance, implementation, monitoring and reporting on your DSRIP projects.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Executive Director, CSO	Irene Kaufmann	<ul style="list-style-type: none"> • Oversee all of the PPS work and CSO activities to accomplish all of the projects' implementation. • Communicate with the Executive Committee, and represent the CSO to all of the Sub-Committees. • Project monitoring and performance reporting. • Support and report to BPHC governance. • Act as liaison to NYSDOH and other PPSs.
Chief Medical Officer, CSO	Dr. Amanda Ascher	<ul style="list-style-type: none"> • Oversee project-specific provider engagement and clinical/delivery strategies and monitoring of performance/ outcomes. • Collaborate with BPHC members' CMOs. • Liaison with other PPSs on evidence-based practice implementation.
Senior Director, Care Delivery & Practice Innovations, CSO	Dr. J. Robin Moon	<ul style="list-style-type: none"> • Oversee all of the clinical projects implementation (Domains 1-4), including monitoring and reporting. • Work closely with the Quality Management team. • Monitor speed and scale • Identify and promote care delivery and practice innovations.
Senior Director, Quality Management & Informatics, CSO	Janine Dimitrakakis	<ul style="list-style-type: none"> • Oversee the development of quality metrics, and monitoring and reporting of them. • Work closely with the clinical projects team and the SBH IT team.
BPHC Workforce Liaison	Mary Morris	<ul style="list-style-type: none"> • Work with project participants to implement workforce implementation plans to meet participants' recruitment, training and worker retention needs. • Collect and analyze workforce data and report on training effectiveness.
BPHC Director of Financial Planning	Ronald Sextus	<ul style="list-style-type: none"> • Conduct financial evaluation of each project. • Develop, implement and manage funds distribution methodologies.

SBH Health System (PPS ID:36)

✓ IPQR Module 10.4 - Overview of key stakeholders and how influenced by your DSRIP projects

Instructions :

In the below table, please set out who the key stakeholders are that play a major role across multiple DSRIP projects. Please give an indication of the role they play and how they impact your approach to delivering your DSRIP projects.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
SBH Health System Leonard Walsh Eric Appelbaum	Lead Applicant	Fiduciary for DSRIP; Chair of Executive Committee for BPHC
Montefiore Medical Center Steven Rosenthal Amanda Parsons	Largest provider in BPHC	Member of Executive Committee of BPHC; contractor to provide key technical assistance on projects 2.b.iii and 2.b.iv; committed provider in all DSRIP projects
Institute for Family Health Maxine Golub	FQHC providing primary care services in several high-need areas of the Bronx	Member of Executive Committee of BPHC; contractor to provide technical assistance on project 3.a.i; committed provider in DSRIP projects 2.a.i, 2.a.iii, 3.a.i, 3.b.i, 3.c.i, 3.d.ii
Acacia Network Pam Mattel	FQHC providing primary care services in several high-need areas of the Bronx; behavioral health provider, SNF and respite housing provider	Member of Executive Committee of BPHC; contractor to provide technical assistance on project 3.a.i; committed provider in DSRIP projects 2.a.i, 2.a.iii, 3.b.i, 3.c.i, 3.d.ii
Union Community Health Center Doug York	FQHC providing primary care services in several high-need areas of the Bronx	Member of Executive Committee of BPHC; contractor to provide technical assistance on project 3.a.i; committed provider in DSRIP projects 2.a.i, 2.a.iii, 3.b.i, 3.c.i, 3.d.ii
Bronx United IPA Fernando Oliver	IPA group providing primary care services in several high-need areas of the Bronx	Member of Executive Committee of BPHC; contractor to provide technical assistance on project 3.a.i; committed provider in DSRIP projects 2.a.i, 2.a.iii, 2.b.iv, 3.b.i, 3.c.i, 3.d.ii
Morris Heights Health Center Tosan Oruwariye	FQHC providing primary care services in several high-need areas of the Bronx	Member of Executive Committee of BPHC; contractor to provide technical assistance on project 3.a.i; committed provider in DSRIP projects 2.a.i, 2.a.iii, 2.b.iii, 3.b.i, 3.c.i, 3.d.ii
Health People Chris Norwood	CBO providing evidence-based education to patients in the Bronx with chronic illnesses	Member of DSRIP Quality and Care Innovation Sub-Committee and clinical work group; contractor for delivering Stanford Model program to target groups for projects 3.b.i and 3.c.i
VNSNY Marianne Kennedy	Home care provider and MLTC provider	Member of the BPHC Executive Committee; committed partner in project 2.b.iv
Bronx Works Eileen Torres	CBO that provides numerous support and social services	Member of the BPHC Executive Committee
Bronx RHIO Charles Scaglione	Non-profit organization that provides health information exchange, shared data management and supporting data analytics, and	Member of the BPHC Executive Committee

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
	performance monitoring	
CenterLight Paul Rosenfeld	Home care and MLTC provider	Member of the BPHC Executive Committee; committed partner in projects 2.a.iii and 2.b.iv
1199 TEF	Workforce vendor that will support execution of workforce planning and training related activities including participation on the Sub-Committee, best practices, information from other PPSs, helping to screen candidates for new hires, assessment, remediation and culture change, preparation of reports to the State and dispute resolution.	Member of BPHC Executive Committee; committed to being primary vendor for implementing BPHC workforce strategy including training, re-training, education programs and re-deployment support
Healthfirst Pat Wang	Managed care organization providing coverage to a majority of patients attributed to BPHC	Member of Executive Committee of BPHC; will work with PPS on movement to full risk-based contracting
External Stakeholders		
1199 TEF	Workforce vendor that will support execution of workforce planning and training related activities including participation on the Sub-Committee, best practices, information from other PPSs, helping to screen candidates for new hires, assessment, remediation and culture change, preparation of reports to the State and dispute resolution.	Committed to being primary vendor for implementing BPHC workforce strategy including training, re-training, education programs and re-deployment support

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

✅ IPQR Module 10.5 - IT Requirements

Instructions :

Information technology will play a crucial role in the development of an effective, integrated performing provider system. It is likely that most projects will require some level of supporting IT infrastructure. Please describe the key elements of IT infrastructure development that will play a role in multiple projects.

In order to support its projects and to act as an effective integrated performing provider system, BPHC will require and implement the following IT infrastructure: Care coordination & management: Collaboratively with the Montefiore CMO and the Montefiore-sponsored Hudson Valley PPS, BPHC is in the process of evaluating and procuring a care coordination management solution (CCMS) for population stratification, patient engagement, patient assessment, care planning, clinical and social service navigation, care transition management, patient registries and care management workflow, capacity and task management. Health information exchange (HIE): BPHC will build on the close governance and working relationship that SBH and key PPS partners have with Bronx RHIO to achieve project milestones related to health information exchange and data sharing. Bronx RHIO enjoys significant penetration with Bronx providers, including BPHC members. BPHC is working with Bronx RHIO to perform due diligence on its HIE capacity and capabilities and has undertaken further assessment of PPS partners' current level of integration with the RHIO and their readiness to achieve the level of integration required by BPHC projects. In addition, BPHC and Bronx RHIO are working on arrangements for cross-PPS/QE collaboration and will co-develop interfaces to the CCMS. Connections to the SHIN-NY are also being explored. Central data management: The Bronx RHIO will provide data governance, data specification and acquisition capabilities, data normalization/quality, patient and provider matching, master data management (MDM), central data storage and authorized access in an operational data store, and bi-directional data sharing with BPHC partners. Performance management and metrics (analytics): While much NYSDOH DSRIP metric reporting will be claims-based, and will be performed by the DOH in the Salient MAPP system, BPHC will need to identify its own required level of detail for performance monitoring. Assessment, monitoring and support programs and resources: Based on a current state assessment of PPS partner capabilities against BPHC and DOH requirements, the BPHC CSO will establish program management services for monitoring or assisting PPS partners as required with acquiring EHRs certified for Meaningful Use attestation, achieving PCMH 2014 recognition and participating and integrating with the Bronx RHIO for health information exchange. Digital health strategy for patient engagement: Beyond the IT discussed above, BPHC is developing strategies for implementing patient engagement and activation mechanisms to promote patient self-management in PPS/IDS programs. This may in the future include developing a comprehensive strategy for telehealth, remote monitoring and patient engagement through digital health apps that are culturally competent and sensitive to patient circumstances and needs. In addition, BPHC is exploring opportunities for connecting community-based organizations to the PPS's IT infrastructure to facilitate patient engagement, provider communication, and closed loop referral tracking.

✅ IPQR Module 10.6 - Performance Monitoring

Instructions :

Please explain how your DSRIP projects will fit into your development of a quality performance reporting system and culture.

The PPS's CSO analytics and IT staff, BPHC Chief Medical Officer, the CSO's Senior Director of Quality Management & Informatics, and the Quality & Care Innovation Sub-Committee (QCI) will work together closely to design reporting formats for three audiences—providers, CSO clinical

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

project team members and QCI Sub-Committee members—that integrate Domain 1 process metrics, Domain 2 and 3 quality and outcome metrics, and other internal PPS reporting metrics selected by the QCI into its performance reporting dashboard and resulting performance reports to be shared with PPS members. The rapid cycle evaluation process will be the basic method used to monitor progress and identify providers that appear to be at risk of missing performance targets. We will also work with our partners at the provider level to ensure that they have a continuous quality improvement process in place to detect and address operational problems in each of the projects they participate in on an ongoing basis. Under the leadership of the BPHC CMO and Senior Director of Quality Management & Informatics, the CSO will organize and support a continuous quality improvement process to be carried out both centrally and internally by participants. The continuous quality improvement process will include identifying areas for both partner-specific and cross-partner improvement strategies and tactics, monitoring progress against improvement targets, assisting with root cause analysis, and convening cross-PPS work groups on special topics that emerge from reporting via the analytics team.

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

✓ IPQR Module 10.7 - Community Engagement

Instructions :

Please describe your PPS's planned approach for driving community involvement in the DSRIP projects, how you will contract with CBOs for these projects, how community engagement will contribute to the success of the projects, and any risks associated with this.

Throughout implementation, BPHC will continue to encourage and insist upon extensive community involvement, which includes representation from a diverse group of Bronx provider & community-based organizations (CBOs) in its project advisory committee. BPHC has hired a multilingual Director of Collaboration with deep roots in the community, responsible for managing outreach to community stakeholders & CBOs. Our community engagement efforts provide bidirectional dialogue to ensure project implementation is achieving results & allow for course correction & innovation. These efforts aim to develop capacity within the community to ensure sustainability. We are creating new connections & resources through sharing of information, skills & tools, & collaboration with other Bronx PPSs. In addition, we are creating job opportunities & career pathways for community members. BPHC is undertaking the following steps to ensure that the Bronx community continues to be deeply involved: PPS has conducted a survey to enhance our knowledge of the services offered by & capacity of CBOs in our PPS, which will provide the basis for a web-based CBO service directory to facilitate direct referrals to support services. BPHC met regularly with CBOs to gain input & build a community engagement strategy. Through Community-based Discussion Sessions, members of the organizations defined aim-focused, common issues among licensed & grant-funded CBOs & organizations providing community-based services & to express participation needs & questions. Targeted participants included CBOs providing senior care, food pantries, social services, home health, legal, farmers markets, housing, education, behavioral health, developmental disabilities, & family & children services. Minutes & common themes from the sessions were distributed to participants, followed by an invitation to join the Community Engagement Plan Workgroup. The Workgroup identified the need for 3 additional groups: Communications Strategies (to create efficient & effective methods of communication from CBO to CBO & from CBO to PPS constituent, with additional focus on consumer involvement & patient engagement); Outreach & Engagement (conduct networking events, define level of CBO participation, & build proactive relationships on behalf of the PPS with new & existing CBOs); & Interconnectivity (continue to work on connecting CBO resources via available technology). All CBOs are invited to join the community engagement process. To engage the community stakeholders further, BPHC will encourage & solicit feedback through its website, presentations, publications, social media platforms, & public fora. BPHC produces & publishes a biweekly bulletin & a quarterly newsletter & will continue to host all-Member webinars. BPHC has begun contracting with CBOs that will be major contributors to the success of our DSRIP projects. BPHC is contracting with Health People: Community Preventive Health Institute (CBO specializing in evidence-based patient education for chronic disease management) & a.i.r. nyc (a CBO providing home-based services to families with asthma). In the Bronx, the biggest risk associated with community engagement is that the level of need for community resources, such as behavioral health & social support services, exceeds the resources available. Other risks may include insufficient infrastructure to manage the number of CBOs & people engaged, address the complexity associated with serving a diverse population in culturally meaningful ways, ensure rapid response to community need & suggestions, & support communication at the community level via information technology. However, DSRIP provides a unique opportunity to increase the reach & impact of existing resources & improve & build new infrastructure to engage our community in efforts to improve health in the Bronx.

Section 11 – Workforce

✔ IPQR Module 11.1 - Workforce Strategy Spending (Baseline)

Instructions :

Please include details on expected workforce spending on a semi-annual basis. Funds may be shifted from one funding type category to another within the workforce strategy spending table, as long as the PPS adheres to their overall spend commitments. However, the PPS may apply a 25% discount factor to the DY1 Workforce Strategy Spend target. If the PPS applies this discount in DY1, the PPS will be expected to reallocate those funds appropriately in DY2-4 to fully meet their DY1-4 total commitment.

Funding Type	Year/Quarter										Total Spending(\$)
	DY1(Q1/Q2)(\$)	DY1(Q3/Q4)(\$)	DY2(Q1/Q2)(\$)	DY2(Q3/Q4)(\$)	DY3(Q1/Q2)(\$)	DY3(Q3/Q4)(\$)	DY4(Q1/Q2)(\$)	DY4(Q3/Q4)(\$)	DY5(Q1/Q2)(\$)	DY5(Q3/Q4)(\$)	
Retraining	750,000.00	750,000.00	1,002,326.00	1,002,326.00	518,573.00	518,573.00	401,854.00	401,854.00	192,099.00	192,099.00	5,729,704.00

✔ IPQR Module 11.2 - Prescribed Milestones

Instructions :

Please enter and update target dates, as well as breakdown tasks with target dates for prescribed milestones. For milestones that are due within the reporting period, documentation is required to provide evidence of milestone achievement. Any explanations regarding altered or missed target commitments must be included within the textbox, not as narrative within uploaded documentation. Please note some milestones include minimum expected completion dates.

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter	AV
Milestone #1 Define target workforce state (in line with DSRIP program's goals).	In Progress	Finalized PPS target workforce state, signed off by PPS workforce governance body.	07/01/2015	06/30/2016	07/01/2015	06/30/2016	06/30/2016	DY2 Q1	NO
Task Establish and convene Workforce Project Team	Completed	Establish and convene Workforce Project Team (including Workforce Sub-Committee, Workforce Workgroups, workforce liaison and other supportive staff from the CSO, 1199 SEIU Training and Employment Funds (TEF), subject matter experts and stakeholders) responsible for implementing, executing and overseeing workforce activities.	07/01/2015	07/01/2015	07/01/2015	07/01/2015	09/30/2015	DY1 Q2	
Task Identify the requirements for each DSRIP project	In Progress	Identify the requirements for each DSRIP project and the new services that will be delivered, in conjunction with the Quality and Care Innovation Sub-Committee.	07/17/2015	06/30/2016	07/17/2015	06/30/2016	06/30/2016	DY2 Q1	
Task Identify types and numbers of workers needed for each DSRIP project	In Progress	Identify the types and numbers of workers needed for each DSRIP project.	07/17/2015	06/30/2016	07/17/2015	06/30/2016	06/30/2016	DY2 Q1	
Task Identify competencies, skills, training and roles required for each DSRIP project	In Progress	Identify the competencies, skills, training and roles required for each DSRIP project, with particular attention to developing common standards and definitions for care management roles.	07/31/2015	06/30/2016	07/31/2015	06/30/2016	06/30/2016	DY2 Q1	
Task Consolidate project-by-project analysis	Not Started	Consolidate project-by-project analysis to develop a comprehensive view of the workforce needs to support all DSRIP projects.	04/30/2016	06/30/2016	04/30/2016	06/30/2016	06/30/2016	DY2 Q1	
Task Finalize target workforce state	Not Started	Finalize target workforce state and receive signoff from Workforce Sub-Committee and Executive Committee.	04/30/2016	06/30/2016	04/30/2016	06/30/2016	06/30/2016	DY2 Q1	
Milestone #2 Create a workforce transition roadmap for achieving defined target workforce state.	In Progress	Completed workforce transition roadmap, signed off by PPS workforce governance body.	07/01/2015	09/30/2016	07/01/2015	09/30/2016	09/30/2016	DY2 Q2	NO
Task Convene Workforce Sub-Committee	Completed	Convene Workforce Sub-Committee to provide input on the approach for developing the workforce transition roadmap.	07/01/2015	09/09/2015	07/01/2015	09/09/2015	09/30/2015	DY1 Q2

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Define target workforce state (in line with DSRIP program's goals).	BPHC is continuing to work with its consulting partners on the collection and identification of the Target Workforce State deliverables. The PPS project leads and have been actively engaged, along with workforce subcommittee members, in determining the anticipated workforce impacts by DSRIP projects. BPHC has also worked with the other PPSs in our workforce consortium to review information on the future demand for Healthcare Services and Providers based on changing population counts and demographics, greater emphasis on healthcare delivery in primary care and community settings and VBP reimbursement, for use in microsimulation modeling. The PPS is concurrently working with partner organizations to identify the workforce needs to achieve future state targets. The information from these processes will be compared and reconciled to finalize the BPHC future state. It has been determined by the PPS that only the Workforce Subcommittee will be required to approve the target workforce state. This milestone is on target for completion in DY2Q1.
Create a workforce transition roadmap for achieving defined target workforce state.	BPHC and its vendors are compiling current state survey results and a reconciliation of initial microsimulation modeling with projected partner needs to summarize the gaps and factors contributing to the gaps. A review of training strategies under development will also be utilized to develop a transition roadmap template for initial PPS Workforce Subcommittee review and feedback early in the summer. It has been determined by the PPS that only the Workforce Subcommittee will be required to approve the workforce transition roadmap. This milestone is on track for completion in DY2Q2.

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Perform detailed gap analysis between current state assessment of workforce and projected future state.	The PPS has begun preliminary planning to outline the providers' needs as determined by the Current State Assessment which has been completed, and the Target State reports currently being developed to identify the Gap analysis report. It has been determined by the PPS that only the Workforce Subcommittee will be required to approve the gap analysis. This milestone is on track for completion in DY2Q2.
Produce a compensation and benefit analysis, covering impacts on both retrained and redeployed staff, as well as new hires, particularly focusing on full and partial placements.	<p>Compensation & Benefits Update DY1Q4</p> <p>The PPS has completed compensation and benefit survey and is currently aggregating survey results to identify the current compensation and benefit ranges for job titles. In addition, we are working with consulting partners to develop the future state compensation and benefit ranges for new hires, redeployed and retrained staff critical to DSRIP. It has been determined by the PPS that only the Workforce Subcommittee will be required to approve the compensation and benefit analysis. This milestone is on track for completion in DY2Q1.</p>
Develop training strategy.	BPHC and its Workforce Subcommittee have begun work with 1199 TEF, our workforce vendor, on the initial formatting and outline of the BPHC training strategy. It will largely be informed by the workforce transition roadmap with additional inputs from the PPS partners and focus groups being conducted with representatives from the PPS workforce. It has been determined by the PPS that only the Workforce Subcommittee will be required to approve the training strategy. This milestone is on track for completion in DY2Q2.

IPQR Module 11.4 - Major Risks to Implementation & Risk Mitigation Strategies

Instructions :

Please describe the key challenges and risks that you foresee in achieving the milestones set out above, including potential impacts on specific projects and any risks that will undermine your ability to achieve outcome measure targets.

A robust & well-trained workforce, rooted in the diverse communities of the Bronx & engaged in the transformative change required under DSRIP is central to the success of BPHC. There will be 3 major workforce challenges to address: 1) BPHC has a diverse, largely unionized workforce of approximately 35,000. Partner orgs have unique cultures, policies & collective bargaining agreements. These factors make engaging the workforce a challenge. The greatest risk to workforce strategy deployment is potential lack of buy-in from staff. The PPS will provide ongoing communication specifically geared to the workforce & continued opportunities for input & resolution of disputes with unions, employee groups & individuals. For unionized partners, staff engagement will be closely coordinated with union leadership, within the context of collective bargaining agreements. In addition to the Workforce Sub-Committee (made up of union, workforce experts including TEF, HR & training representatives from member orgs & frontline staff), three additional work groups have been formed to work with and be monitored by the sub-committee: the Workforce Communication Workgroup for development & implementation of communication/engagement strategies – including regular bulletins, new media campaigns, speakers at labor-management & town hall meetings and the Workforce Planning Work Group which meets regularly to analyze internal and external recruitment and training strategies for recommendations to the Workforce subcommittee. A third group, the Advisory Group (facilitated by the TEF Labor-Management Project) will provide a forum for input, dispute resolution & problem solving as needed. 2) BPHC has intense retraining and training needs. We anticipate 5,000-10,000 existing staff will need retraining to implement the PPS' clinical projects. BPHC also anticipates up to 750 new jobs created within the PPS, all of which will require training. To address the needs for both retraining of existing staff & onboarding new hires, BPHC will undertake a large-scale training initiative addressing care coordination, patient engagement, motivational interviewing, cultural competence, inter-disciplinary team care planning, chronic disease management, virtual & cross-sector communications & use of health information technology, as well as protocols associated with specific project interventions. Some training will result in certification/licensing for existing employees. 3) There is difficulty in recruitment & hiring. BPHC will need to recruit & hire staff for new positions. Historically, the Bronx has had difficulty recruiting healthcare professionals. The Bronx is the least healthy county in NYS & ranks worst in social & economic factors. These factors make Bronx residents an especially challenging population to treat, hindering recruitment efforts. In addition, compensation for Bronx health providers is reported to be less than surrounding counties in NY & NJ, so qualified candidates are lost to other locales. BPHC plans to develop common templates for job descriptions & postings for use by partners, create a job board on its website, provide technical assistance to partners on sourcing, recruiting, onboarding & retention strategies, & partner with local colleges, CBOs (e.g. Phipps Neighborhood & Bronx-Westchester Area Health Education Center), local high schools, & TEF to develop new & sustainable workforce talent pools. Because workforce challenges are consistent throughout the Bronx, BPHC also intends to collaborate with the other PPSs in the Bronx to develop & implement joint workforce strategies to the maximum extent possible. The Workforce Sub-Committee will be charged with monitoring the comprehensive workforce strategy to ensure BPHC retains, trains, & hires the staff necessary to support successful implementation of DSRIP projects & to mitigate associated risks.

IPQR Module 11.5 - Major Dependencies on Organizational Workstreams

Instructions :

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Please describe any interdependencies with other organizational workstreams (IT Systems and Processes, Clinical Integration, etc.)

BPHC's workforce strategy has interdependencies with many workstreams, including clinical project implementation, cultural competency, IT systems and processes, and finance and budgeting.

- **Project Implementation Interdependencies:** The number and types of staff that must be retrained or redeployed and the number and type of staff that needs to be newly hired depend on the needs and services of the clinical projects. As the implementation of the clinical projects evolves, it will be important to closely monitor any changes that could impact workforce needs.
- **Cultural Competency Workstream Interdependencies:** The success of the PPS' recruitment and training strategy will impact the provision of culturally competent care. The PPS will work with 1199 TEF, CUNY, and contracted CBOs to develop training curricula that meet cultural competency and health literacy standards and incorporate these trainings into all new hire orientations, refresher courses, and provider agreements.
- **IT Systems & Processes:** To support a robust IT infrastructure, BPHC is planning to implement an electronic care planning tool across the PPS. The success of this tool is heavily dependent on the ability of the healthcare workforce to use this platform to track and manage care. BPHC's CSO will institute extensive training for the care management workforce on the use of the care planning tool.
- **Finance and Budgeting:** BPHC anticipates that partners will require funding to hire and deploy additional staff and potentially to adjust compensation for existing staff critical to successful implementation of the DSRIP projects.
- **Governance:** Establishment of the Workforce Sub-committee will be critical to engaging workers and thus ensuring the success of each DSRIP project.

SBH Health System (PPS ID:36)

✓ IPQR Module 11.6 - Roles and Responsibilities

Instructions :

Please list and elaborate upon the key people/organizations responsible for this organizational workstream and describe what their responsibilities involve.

Role	Name of person / organization (if known at this stage)	Key deliverables / responsibilities
Director of Workforce Innovation, BPHC	Mary Morris	Responsible for the development and implementation of all workforce implementation plans including providing leadership and advisement to the Workforce Sub-Committee, reporting to the Executive Committee.
Director of Collaboration, BPHC	Albert Alvarez	Responsible for obtaining input from the community on workforce needs.
Workforce Sub-Committee	The WSC has 12-15 voting members including representation from unions, HR, workforce experts, frontline staff (for all names, please see Membership Template in Governance workstream).	Responsible for implementing the workforce strategy, including Workforce Communication and Workforce Advisory facilitated by the 1199 Labor Management staff to ensure workforce input and identify concerns and structural barriers for collaborative decision making.
Workforce Training Vendor	1199 Training and Employment Funds (Rosa Mejias)	TEF will support execution of workforce training related activities including participation on the Sub-Committee, providing research on training vendors, best practices, information from other PPSs, helping to screen candidates for new hires, assessment, remediation and case management for candidates, culture change, preparation of reports to the State and dispute resolution.
Labor Representatives	Representatives from 1199 SEIU, NYSNA and CIR (Tom Cloutier, Teresa Pica, Gladys Wrenick, Rosa Mejias, and others)	Provide expertise on CBAs, and insight in retraining, redeployment and hiring needs.

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

☑ IPQR Module 11.7 - Key Stakeholders

Instructions :

Please identify the key stakeholders involved in your workforce transformation plans, both within and outside the PPS.

Key stakeholders	Role in relation to this organizational workstream	Key deliverables / responsibilities
Internal Stakeholders		
Linda Reid, Annie Wiseman, Susan Roti	Training Leads in Partner Organizations	Provide best practice training approaches and guidance in program implementation
Erlinda Girado, Victoria Izaylevsky, Katrina Jones, Marc Wolf, Gloria Kenny	HR Leads in Partner Organizations	Support data collection for staff FTEs, comp and benefits, CBO information, hiring needs
Patricia Belair	SVP, Ambulatory Services and Strategy, SBH Health System	Advisor on ambulatory care competencies/jobs
External Stakeholders		
1199 SEIU, NYSNA, CIR	Labor Union Representatives	Facilitate worker engagement
Curtis Dann-Messier	CUNY liaison	Coordinate curriculum development, supply talent
Marilyn Aquirre-Molina, Executive Director, CUNY Institute for Health Equity	Connection to Bronx Borough President Ruben Diaz's Not 62 Campaign	Input for curriculum development. Provide action-research on the social determinants of health that contribute to the high rates of morbidity and mortality in the Bronx, and technical support for training curriculum to enable us to better address health equity.
Swawna Trager, Executive Director of the NY Alliance for Health Careers	Provide talent pool of new staff for CHWs and other "peer" roles.	Potential training funding source-city and federal funding including stipends for training, tuition reimbursement, wrap arounds and paid internships, Curriculum development consultation.
Jessica Hill, Director Bronx-Westchester AHEC	Provides Bronx resident talent pipelines for various PPS staff positions.	Creates community-based health professional training opportunities and public health programs. Strengthens community networks to increase minority representation in all healthcare professions.
GNVHA	Provide training on key areas of care coordination teams and cultural competency.	Provide research findings on NYC health issues.

New York State Department Of Health Delivery System Reform Incentive Payment Project

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

IPQR Module 11.8 - IT Expectations

Instructions :

Please describe how the development of shared IT infrastructure across the PPS will support your plans for workforce transformation.

The development of shared IT infrastructure across the PPS will be important in storing information, tracking progress on workforce transitions, and delivering and tracking training to ensure success of the DSRIP clinical projects. Shared IT infrastructure will be especially important given the high volume of training, redeployment and new hires that needs to take place in order to implement the DSRIP projects.

- 1) Storing Information. BPHC will need to document information from all of the PPS Partners regarding their current workforce state, including volume, competencies and skills. It will be important to have an IT platform that will store this large volume of information in an organized way.
- 2) Tracking. BPHC anticipates that there will be extensive movement and changes in the workforce that will need to be tracked over time in order to ensure that BPHC reaches the future targeted workforce state. It will be crucial to track these changes across the PPS. The IT infrastructure will be key in reporting workforce process measures in the quarterly reports.
- 3) Training. Providers and staff will be trained regarding specific population needs and effective patient engagement approaches. Training will be scheduled, delivered and tracked using a learning management system (LMS) administered by the BPHC CSO.
- 4) Job Listings. BPHC will also use the IT infrastructure to post job openings on the "job board" across the PPS in order to recruit and hire qualified staff.

IPQR Module 11.9 - Progress Reporting

Instructions :

Please describe how you will measure the success of this organizational workstream.

BPHC will measure the success of its workforce strategy through the milestones listed above. BPHC will focus on monitoring key workforce measures, such as the number and type of staff who are retrained or redeployed as well as new hires. The Workforce Sub-Committee will be charged with monitoring the comprehensive workforce strategy to ensure that BPHC retains, trains, and hires the staff necessary to support successful implementation of DSRIP projects. The Workforce Sub-Committee will be supported by two workgroups: 1) Workforce Communications Workgroup and 2) Workforce Advisory Workgroup that will support workforce efforts.

IPQR Module 11.11 - Workforce Strategy Spending (Quarterly):

Instructions :

Please include workforce spend dollar amounts for DY1. The workforce spend amounts should reflect only what was spent during the relevant quarters and is not cumulative across semi-annual periods. Funds may be shifted from one funding type category to another within the workforce strategy spending table; e.g., from Retraining to New Hires.

Benchmarks	
Year	Amount(\$)
Total DY1 Spending Commitment	3,262,500.00

Funding Type	Workforce Spending Actuals		Total Spending(\$)	Percent of Commitments Expended
	DY1(Q1/Q2)(\$)	DY1(Q3/Q4)(\$)		
Retraining	271,941.00	1,524,571.00	1,796,512.00	119.77%
Redeployment	0.00	0.00	0.00	0.00%
New Hires	198,849.00	207,847.00	406,696.00	216.90%
Other	0.00	558,693.00	558,693.00	37.25%
Total Expenditures	470,790.00	2,291,111.00	2,761,901.00	84.66%

Narrative Text :

For PPS to provide additional context regarding progress and/or updates to IA.

Bronx Partners for Healthy Communities has a Bronx-centric workforce strategy which aims to develop current staff to assume new and changing roles, and to hire and train Bronx community members to fill needed positions. For this reason, the PPS established a \$12,100,000 training budget with \$4,350,000 to be spent in DY1. We were able to establish some important training contracts to support the implementation of best practices for several of our clinical projects early in the year, to hire a workforce vendor and to begin training to support roles in primary care teams throughout the PPS. However, because building our PPS structure and membership extended well into year 1, the PPS recognized by mid-year that meeting

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

our workforce spending target was unrealistic. BPHC is grateful that the State DOH was responsive to the efforts of the GNYHA, 1199 TEF and various PPSs by allowing for the 25% discount and 80% spending commitment.

IPQR Module 11.12 - IA Monitoring:

Instructions :

New York State Department Of Health
Delivery System Reform Incentive Payment Project
DSRIP Implementation Plan Project
SBH Health System (PPS ID:36)

Project 2.a.i – Create Integrated Delivery Systems that are focused on Evidence-Based Medicine / Population Health Management

✓ IPQR Module 2.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Providers & BPHC may not agree on contract terms due to uncertainty around DSRIP. Potential Impact (PI): Providers cannot fully engage in BPHC; PPS cannot reach provider participation goal. Mitigation (M): BPHC works to understand provider capabilities & sets clear expectations. Providers enter into a standard pro forma Master Services Agreement early, deferring agreement on detailed requirements until they are known & incorporated in rolling Statement of Works addenda.

Payers/social service agencies not yet identified may need to participate in BPHC. PI: BPHC will not achieve its fullest potential in meeting IDS goals. M: BPHC collaborates with Coalition of NYS Public Health Plans to explore payer participation, undertakes/documents formal processes to identify & pursue payers/social service agencies for inclusion in PPS.

ACO/HHs may not have IT capabilities to implement IDS strategy. PI: ACO/HHs cannot fully participate in the IDS. M: BPHC assesses population health management (PHM) systems & capabilities of each attested ACO/HH, offering its own systems as needed.

Patients do not engage sufficiently to benefit from care delivery improvements. PI: BPHC may not achieve DSRIP health improvement goals for the community. M: BPHC offers focused, culturally relevant, evidence-based, easy-to-understand education to patients, integrates relevant materials into care management (CM) staff training. PCP team members, CBOs, patient educators, CHWs engage patients.

Providers do not fully embrace CM or PHM. PI: PCPs continue to provide patients non-coordinated care encouraged by fee-for-service system. M: BPHC provides training, support, tools for CM & PHM.

Providers/BPHC do not fully achieve DSRIP & PPS goals. PI: BPHC/State do not achieve performance goals, jeopardizing DSRIP funding & health system transformation. M: BPHC and partners select and vet evidence-based protocols via appropriate governance structures. Implementation of same protocols contractually required. PPS provides training, follow-up to ensure effective protocols deployment.

Providers do not implement EHR systems that meet MU & PCMH Level 3 standards &/or do not achieve PCMH 2014 Level 3 recognition by DY3Q4. PI: Providers cannot fully participate in planned interventions, CM, PHM across the IDS. M: BPHC uses gap analysis to develop a program to monitor & deploy assistance to providers at risk. BPHC supports practices; deploys internal community, external consulting resources; provides customized technical assistance, coaching, & care team training modules.

BxRHIO fails to develop services/satisfy partner demand for secure messaging, alerts & patient record look up, or Providers do not integrate & use secure messaging, alerts & patient record look up by DY3Q4. PI: Providers cannot fully participate in planned interventions, CM & PHM across the IDS; BPHC may fail/be delayed in achieving this IDS goal & state may fail to achieve a full return on its investment in RHIO development. M: BPHC completes due diligence regarding BxRHIO HIE capabilities & contracts to develop/deliver at risk services. Partner contracts with BPHC will include terms obliging them to integrate/adopt BxRHIO services. CSO monitors, assists PPS partners to participate/integrate with BxRHIO for HIE. BPHC will not attract/train sufficient management/workforce talent. PI: BPHC may fail/be delayed in reaching care transformation goals. M: BPHC coordinates with community colleges, 1199 Job Security Fund, Montefiore CMO, & NYSNA to identify and attract a broad pool of capable workers & use alternative employment tactics. Regulatory barriers may impede planned activities. PI: Care transformation goals are not met. M: BPHC applied for regulatory relief in various areas and included potential alternatives in its Organizational Application. Continue to monitor potential barriers in regulation/DSRIP guidance.

Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

IPQR Module 2.a.i.2 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	DY4 Q4	Project	N/A	In Progress	04/01/2015	06/30/2016	04/01/2015	06/30/2016	06/30/2016	DY2 Q1

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
<p>All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.</p>	<p>BPHC continues to gather documents and build relationships with members which provide diverse services to BPHC attributed patients. BPHC continues to develop standard processes, policies and procedures via collaboration between members and with the help of leadership groups representing these members. The PPS finalized the Master Services Agreement (MSA) structure, implemented processes for collecting them, and collected MSAs covering approximately 75% of our providers (who account for 97% of PCP services to BPHC attributed members). Schedule As (contracts attached to the MSA) have been developed and. A Request for Information ("RFI") has been solicited from these organizations, which detail the current and future state of IT, clinical and non-clinical workforce based on operational needs and PPS-adopted care management models. The RFIs were subsequently used to develop a funds distribution mechanism and method by the Central Service Organization (CSO) and communicated to the member organizations. The organizations are now compiling proposed budgets with narratives which are being negotiated and accepted by the CSO on a rolling basis. Five of the seven proposed budgets have already gone through this process and have been accepted and are ready for translation to Schedule A Contracts. Additionally, BPHC contracted with a.i.r. nyc and Institute for Family Health, the two community-based organizations (CBOs) to lead in the implementation of specific projects. Similarly, Montefiore's Care Management Organization (CMO) is contracted to work on two projects by Schedule A Contract. Finally, the PPS has entered in a contract with Bronx RHIO for services. Meanwhile, the Clinical Operation Plan (COP) have been developed to compile and communicate the collective policies and protocols developed, vetted, and agreed to by members of the PPS; we have been deploying the COP for all Domains 2 and 3 projects by this quarter. This milestone is on track for completion.</p>
<p>Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.</p>	<p>BPHC is working closely with its ACO partners and has undertaken a process to engage Health Homes in the Integrated Delivery System, utilizing existing capabilities to deepen PPS-wide clinical integration. The Vice President of Montefiore's Pioneer ACO is a member of BPHC's Executive Committee and our work is informed by Pioneer's experience building an integrated care management network. There are three Health Homes in the BPHC Integrated Delivery System: Bronx Accountable Healthcare Network (BAHN), Community Care Management Partners (CCMP), and Coordinated Behavioral Care (CBC). During initial individual meetings with the three Health Homes, BPHC explored the each Health Home's working model, links to primary care, and patient population. Additional meetings and interactions led to the following decisions with regard to how BPHC will engage with participating Health Homes: BPHC will facilitate linkages between PCPs and Health Homes for bottom-up referrals; Health Homes will provide Critical Time Intervention (CTI) services to seriously mentally ill (SMI) patients referred from BPHC Care Transitions program; Health Homes will provide Health Home At-Risk care management services to smaller PCP practices, for which embedded Health Home At-Risk care management teams are not feasible; BPHC will regularly convene a group of all three Health Homes for collaboration around training, CTI, and partnerships between HHs and PCPs; BPHC will facilitate PPS-wide meetings between PCPs and Health Homes to establish expectations and standards for communications and information sharing between HHs and PCPs; and BPHC will work with Health Homes to improve and expand education and training for PCPs and community organizations on the Health Home program. In order to formalize the PPS partnership with its participating Health Homes, BPHC is in the process of signing partnership agreements with all of the Health Homes to allow data and funds to flow between BPHC and the Health Homes. BPHC has shared updates on Health Home engagement progress with the Executive Committee, Quality and Care Innovations Subcommittee and during an All-Member Webinar. The milestone is on track for completion.</p>
<p>Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.</p>	<p>We are building an integrated delivery system (IDS) that has the capacity and diversity to ensure patients receive appropriate health care and community support. We developed the Clinical Operation Plan (COP) for all projects as well as for overarching, cross-cutting clinical/care delivery elements, and distributed them to our member organizations and PCMH consultants. The COP defines sets of narratives, policies and procedures of how members will provide various services to patients in a standardized, most effective way within the most efficient structure. We signed a contract with the Bronx RHIO and will leverage their technology as an encounter notification system (ENS). Some of our members are already piloting the system. Workforce has been continuing to work with consulting partners on the collection and identification of the target state deliverable. Utilizing proven models, literature review, project-specific projections and micro-simulation modeling using the national data, the PPS and consulting partners are currently identifying the needs of PPS member organizations in achieving future state targets. Compensation and benefits survey has been completed to aid in this process. Based on the workforce gap analysis for clinical projects, BPHC and its Workforce Subcommittee has already begun work with 1199 TEF, our workforce vendor, on the initial draft of the BPHC training strategy. On March 22, the first training program was launched which includes Medical Assistants and Medical Office Assistants from four major member organizations. Additionally, the Community Engagement Workgroup has helped formulate a needs assessment for the CBOs and a Curriculum for Care Coordination position in Care Management Staffing Model was created with more to follow. The milestone is on track for completion.</p>
<p>Ensure that all PPS safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and</p>	<p>We are executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes EHR support and connectivity of data captured therein. Our agreement with Bronx RHIO will serve as the foundation to achieve next quarter's tasks and those of the future to</p>

SBH Health System (PPS ID:36)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
<p>sharing health information among clinical partners, including directed exchange (secure messaging), alerts and patient record look up, by the end of Demonstration Year (DY) 3.</p>	<p>support this Milestone. This agreement has been signed this past quarter. We also have a strategy around funding the adoption of the health information exchange (HIE) by safety net providers, informed by an analysis of EHR and Qualifying Entity (QE) implementation and use by member organizations with DSRIP. We intend to use DSRIP funds and other funding sources. The DSRIP funds are being distributed via Schedule A Contracting. The agreement specifically touches on implementation, training and support. The milestone is on track for completion.</p>
<p>Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.</p>	<p>We are executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes EHR support and connectivity of data captured therein. A process has been started already to ensure all applicable providers meet PCMH recognition and MU accreditation and that we meet our obligation to the previously agreed tasks. We have hired and deployed expert PCMH consultants to perform detailed gap analyses with about 100 practices, with 80 locations already evaluated thus far. Funding has been earmarked for IT expansion and process for this funding's distribution have been developed and communicated to the member organizations. Schedule As (i.e., contracts) have been developed to distribute some of this funding as a result of the process. A MU strategy is being developed to ensure that our safety-net providers source EMRs and receive benefit. The milestone is on track for completion.</p>
<p>Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.</p>	<p>We are executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes use of targeted patient registries in conjunctions with our clinical projects. We have a comprehensive strategy in place for care management which includes the uses of registries, EHRs and IT platforms, and the completion of all agreed upon tasks on schedule. Last quarter we signed an agreement with the Bronx RHIO for services which will support population health management. We are confident that we are also very close to securing a Care Coordination and Management System (CCMS, Acupera) for the PPS. Our major partners are already sharing data with the Bronx RHIO and anticipate the quality and quantity of this data to increase. We have begun participating in beta-testing of Spectrum, Bronx RHIO's data analytics tool, onto which we will develop our population health management (PHM) platform. We are also simultaneously exploring potentials to utilize the MAPP/Salient resources to use as additional PHM source. Furthermore, a comprehensive Bronx RHIO patient consent strategy is increasing our attributed member participation in data-sharing and data agreements between member organizations are creating an environment where PHM will be easier to implement. Some specific metrics have also been prioritized during the Bronx RHIO contract negotiations. BPHC also deployed a rapid cycle evaluation (RCE) program and selected some measures which will promote PHM. The milestone is on track for completion.</p>
<p>Achieve 2014 Level 3 PCMH primary care certification and/or meet state-determined criteria for Advanced Primary Care Models for all participating PCPs, expand access to primary care providers, and meet EHR Meaningful Use standards by the end of DY 3.</p>	<p>We are executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes EHR support and connectivity of data captured therein. A process has been started to ensure all applicable providers meet PCMH recognition and MU accreditation where possible and that we meet our obligation to the previously agreed tasks. Consultants have been deployed to perform detailed gap analyses with about 100 practices, with 80 locations already evaluated thus far. Of those, 17 practices have already submitted their PCMH 2014 attestations, with 16 achieving level 3 and one still pending NCQA ruling. Contracting is complete or close to complete with six consulting groups for the work on the remaining practices. We are starting to also discuss Advance Primary Care with SDOH-certified consultants and are identifying locations which would be good candidates for the program. These six consulting groups are part of a Community of Practice ("CoP") we are organizing to build/establish best practices, share and collaborate with experts on PCMH transformation, and possibly transfer the experience and knowledge to other population health initiatives. The milestone is on track for completion.</p>
<p>Contract with Medicaid Managed Care Organizations and other payers, as appropriate, as an integrated system and establish value-based payment arrangements.</p>	<p>In conjunction with the Financial Sustainability milestone requirements, value-based payment (VBP) milestones were deferred to later dates. The milestone to complete a baseline assessment of revenue linked to VBP and preferred compensation models was shifted to DY2 Q2 (9/30/16) and the milestone to finalize a plan towards achieving 90% VBP across the network by year 5 is due DY2 Q4 (3/31/17). Any formal contracting as an integrated system is pending further evaluation and discussion within the BPHC and SBH senior leadership. For these reasons, any contracted VBP arrangements orchestrated through BPHC will be realized prospectively and will be in accordance to the approved plan as noted above.</p> <p>While VBP contracting as an integrated system is not yet in effect, BPHC is proactive in its communication and relationship with six Medicaid Managed Care Organizations (MCOs), particularly those that are the conduit for the Equity Infrastructure Program (EIP) and Equity Performance Program (EPP) funding. Quality measures and activities for EIP and EPP funding were chosen that work in concert with the BPHC's selected clinical projects and the healthcare needs of the population being served. In addition, the Finance & Sustainability Subcommittee has established a VBP Planning Workgroup that would meet regularly in preparation for the VBP milestones. The first such meeting took place on Feb 1, and will meet on a regular basis. As part of this workgroup, MCOs will be included in the discussions in working towards establishing various VBP arrangements. As BPHC partner organizations include hospitals, FQHCs, behavioral health providers and community-based organizations, the VBP workgroup allows</p>

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	<p>for broader collaboration and integration with the MCOs recognizing that VBP reimbursement will differ among provider partners.</p> <p>Through the EIP and EPP correspondence as well as the communication through the VBP Planning Workgroup, BPHC and MCOs will continue to work closely. This will serve as the foundation for when an integrated system and VBP arrangements are formally established. This milestone is on track for completion on time by DY2Q2. Deadlines under this milestone have been adjusted to align with the revised timeline under the Finance Workstream</p>
<p>Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform.</p>	<p>BPHC will be meeting with Medicaid MCOs once the BPHC PPS VBP workgroup finalize a strategy to discuss VBP. Monthly meetings with MCOs to discuss utilization and performance are a function that will exist once a formalized integrated system and VBP contracts are established. BPHC is committed to monitoring data and facilitating communication among partner organizations and the payers. By obtaining data from Salient and reviewing the project implementation milestones, BPHC is creating a process to push this information to its PPS members. The process will be enhanced over time with the long-term goal of serving as the data platform for evaluating and monitoring VBP arrangements. Deadlines under this milestone have been adjusted to align with the revised timeline under the Finance Workstream. This milestone is on track for completion on time.</p>
<p>Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes.</p>	<p>As noted elsewhere, the transition process towards value-based payment (VBP) reform is anticipated to take place over the next few years. During this time, BPHC stands ready to oversee the process and improve the communications and data sharing among the provider organizations in the PPS vis-à-vis our qualifying entity (Bronx RHIO). Through the work of the project management team and various implementation work groups (IWGs) as well as project advisory committees, BPHC will ensure that patient care continues to improve and that reimbursement is reconciled to quality and outcomes in the years ahead. BPHC will continue to reinforce and emphasize the importance of VBP reform and will facilitate and monitor the delivery milestones with Medicaid Managed Care Organizations (MCOs) and its provider partners. This milestone is on track for completion on time.</p>
<p>Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate.</p>	<p>BPHC continues to progress in this milestone. Through the Community Engagement Work Group held a focus group to discuss website redevelopment and what should be included in a resource directory, which would be an essential development in creating a referral management system. The resource directory will incorporate consolidated information that exists from various surveys conducted, research and identification of searchable features, existing directories and platforms. All of these have been addressed and completed. In the next steps, the initial phases of the resource directory, will be made available for comment by the work group and edits will be incorporated. This will serve to best prepare and upload a resource directory onto our website. The milestone is on track for completion.</p>

✓ IPQR Module 2.a.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

(1) A major risk we face in successfully implementing 2.a.iii is ensuring that participating providers have access to an electronic care management (CM) tool that can be shared across providers to effectively document and track patients engaged with CM services. Multiple IT systems and protocols are employed by Health Homes and PCMHs, and some partners do not have IT systems with the necessary capabilities. BPHC will leverage the MAPP tool, and will ensure that all community partners have access to an electronic care planning and management tool, which will facilitate documentation. The care planning tool will serve as a centralized resource for partners without the needed IT system in place, and a unifying resource for partners with varying IT systems. (2) Another risk to 2.a.iii is that patients lack an understanding about the long-term effects of chronic diseases, and as a result, many patients do not see the benefit to be gained from care management services. To overcome this barrier, BPHC will focus its patient education efforts on developing materials that integrate simply stated facts about the illness with evidence-based guidelines that take into account culturally relevant insight on topics such as self-management, diet, exercise, and medication adherence. These materials and topics will be integrated into CM staff training. BPHC will use patient level tactics such as motivational interviewing and incentives and population-level community-wide marketing strategies to inform and engage patients. Finally, BPHC recognizes that using culturally competent community-based outreach workers and peer educators along with evidence-based patient activation measure strategies are critical in engaging patients in CM services. (3) Reaching patients by phone and home visits is often difficult due to frequent changes in contact information. To overcome this challenge, BPHC will institute outreach standards that emphasize persistence and use of both telephonic outreach and in-person community outreach by primary care team members and partner community-based organizations. In addition, BPHC will identify strategies to provide high-risk patients with cell phones, mailboxes, and addresses. (4) Though CNA respondents reported availability of primary care, these services are unevenly spread across the borough, and significant shortages exist in some neighborhoods. SBH has recently signed an agreement with the Sophie Davis School of Biomedical Education at CUNY to be its primary hospital campus as it becomes a full-fledged medical school focused on the education of PCPs to serve diverse, needy communities. In addition, Montefiore operates a social medicine residency, which trains PCPs to work in the Bronx. BPHC also will recruit and train midlevel providers (i.e., nurse practitioners and physician assistants). We will collaborate with all Bronx PPSs to increase the number of PCPs recruited and retrained, and we will look at physician compensation models to identify ways to make the Bronx a more attractive place to practice. (5) It will be challenging to recruit and train sufficient CM staff to serve the needs of the Bronx. Recruiting Spanish-speaking CM staff will be a particular risk. BPHC's workforce strategy will be targeted towards mitigating this risk, such as through the CSO working with community colleges and coordinating with the 1199 Job Security Fund, Montefiore CMO, and NYSNA to identify capable workers and provide training in Spanish when needed. BPHC will also use alternative employment tactics, such as flexible hours and job sharing where feasible to attract a broader pool of workers. BPHC will coordinate with other Bronx PPSs on its workforce strategy, which will entail conducting joint recruitment efforts and better aligning compensation to ensure that Bronx PPSs are not competing against each other for care managers.

IPQR Module 2.a.iii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale
DY3,Q4	40,320

	Year,Quarter	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4
PPS Reported	Baseline Commitment	0	0	0	4,032
	Quarterly Update	0	0	0	2,796
	Percent(%) of Commitment				69.35%
IA Approved	Quarterly Update	0	0	0	2,796
	Percent(%) of Commitment				69.35%

Warning: PPS Reported - Please note that your patients engaged to date (2,796) does not meet your committed amount (4,032) for 'DY1,Q4'

IPQR Module 2.a.iii.3 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Develop a Health Home At-Risk Intervention Program, utilizing participating HHs as well as PCMH/APC PCPs in care coordination within the program.	DY2 Q4	Project	N/A	In Progress	04/01/2015	03/31/2017	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task A clear strategic plan is in place which includes, at a minimum: - Definition of the Health Home At-Risk Intervention Program - Development of comprehensive care management plan, with definition of roles of PCMH/APC PCPs and HHs		Project		In Progress	04/01/2015	03/31/2017	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Develop a workplan and timeline to develop the clinical operations plan (COPs) and implement a strategy for the HH at-risk population that aligns with the patient engagement speed and scale application submission		Project		Completed	04/01/2015	05/15/2015	04/01/2015	05/15/2015	06/30/2015	DY1 Q1
Task Convene representative group of PPS members including Health Homes (HH), PCMHs, SUD providers and SMEs, and others to participate in developing project plan for HH at-risk project (2.a.iii)		Project		Completed	05/01/2015	09/30/2015	05/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task Define the population to be targeted by the HH at-risk intervention, such as individuals with diabetes, substance use disorders, mild to moderate depression or other single uncontrolled chronic conditions (see requirement #5)		Project		Completed	05/01/2015	09/30/2015	05/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task Define a care management (CM) staffing model, in conjunction with Workforce Subcommittee, to address the needs of the target population including staff qualifications, care team roles (including PCP and care manager), functions, and panel size of team members		Project		Completed	05/01/2015	09/30/2015	05/01/2015	09/30/2015	09/30/2015	DY1 Q2
Task Develop financial model to cost out CM team		Project		Completed	05/01/2015	09/30/2015	05/01/2015	09/30/2015	09/30/2015	DY1 Q2

Develop a Health Home At-Risk Intervention Program, utilizing participating HHs as well as PCMH/APC PCPs in care coordination within the program.	The Health Home At-Risk Intervention Program Implementation Work Group (IWG) held its inaugural meeting in January 2016 and its second meeting in March. The IWG consists of subject matter experts from across Bronx Partners for Healthy Communities (BPHC) partner organizations, including experts on care management, clinical quality improvement, housing and homelessness, substance use, and decarceration. This group acts as a clinical quality council to monitor project progress and outcome data and provide expert insight into navigating implementation challenges. The IWG's first order of business was to approve the project launch materials, which were

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	<p>presented to Site-Specific Implementation Teams (SSITs) from BPHC's largest primary care organization partners during the Health Home At-Risk Kick-Off event on January 11th, 2016. In addition to introducing the Health Home At-Risk implementation plan, the project-specific Clinical Operations Plan (COP) was reviewed and distributed to the SSITs during the kick-off event. The COP contains policies and procedures that act as a roadmap for partner organizations to implement DSRIP projects at the site-level, in line with BPHC's vision for clinical integration. The COP chapters specific to Health Home At-Risk include: Target Conditions; Staffing; Patient Intake and Assessment; Patient Management; Transitioning Out of Care Management; Annual Update of the Care Plan; and Patient Reactivation in Care Management Services. In order to foster the conditions necessary to fully implement the embedded care management model outlined in the COP, the Central Services Organization (CSO) worked with above-mentioned partners' SSITs to determine their organizational care management staffing plan and submit requests for assistance in funding new positions. Partner organizations have begun recruiting or redeploying Care Coordinators, Nurse Care Management Supervisors, and Care Coordination Assistants. Job description language was provided to the partners to aid in this process. BPHC is also working closely with its Health Home partners to ensure bottom-up referrals are made to their downstream Care Management Agencies (CMAs) when Health Home-eligible patients are identified in primary care settings. Discussions with Health Homes are ongoing with regard to leveraging their CMAs to provide Health Home At-Risk care management services to patients of small and solo practices that do not have a panel size large enough to warrant embedded care coordination teams. This milestone remains on track for completion.</p>
<p>Ensure all primary care providers participating in the project meet NCQA (2011) accredited Patient Centered Medical Home, Level 3 standards and will achieve NCQA 2014 Level 3 PCMH and Advanced Primary Care accreditation by Demonstration Year (DY) 3.</p>	<p>BPHC is executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes EHR support and connectivity of data captured therein. A process has been started to ensure all applicable providers meet PCMH recognition and MU accreditation where possible and that we meet our obligation to the previously agreed tasks. Consultants have been deployed to perform detailed gap analyses with about 100 practices, with 80 locations already evaluated thus far. Of those, 17 practices have already submitted their PCMH 2014 attestations, with 16 achieving level 3 and one still pending NCQA ruling. Contracting is complete or close to complete with six consulting groups for the work on the remaining practices. We are starting to also discuss Advance Primary Care with SDOH-certified consultants and are identifying locations which would be good candidates for the program. These six consulting groups are part of a Community of Practice ("CoP") we are organizing to build/establish best practices, share and collaborate with experts on PCMH transformation, and possibly transfer the experience and knowledge to other population health initiatives. The milestone is on track for completion.</p>
<p>Ensure that all participating safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up.</p>	<p>BPHC is executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes EHR support and connectivity of data captured therein. Our agreement with Bronx RHIO will serve as the foundation to achieve next quarter's tasks and those of the future to support this Milestone. This agreement has been signed this past quarter. We also have a strategy around funding the adoption of the health information exchange (HIE) by safety net providers, informed by an analysis of EHR and Qualifying Entity (QE) implementation and use by member organizations with DSRIP. We intend to use DSRIP funds and other funding sources. The DSRIP funds are being distributed via Schedule A Contracting. The agreement specifically touches on implementation, training and support. The milestone is on track for completion.</p>
<p>Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM.</p>	<p>BPHC is executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes EHR support and connectivity of data captured therein. A process has been started already to ensure all applicable providers meet PCMH recognition and MU accreditation and that we meet our obligation to the previously agreed tasks. We have hired and deployed expert PCMH consultants to perform detailed gap analyses with about 100 practices, with 80 locations already evaluated thus far. Funding has been earmarked for IT expansion and process for this funding's distribution have been developed and communicated to the member organizations. Schedule As (i.e., contracts) have been developed to distribute some of this funding as a result of the process. A MU strategy is being developed to ensure that our safety-net providers source EMRs and receive benefit. The milestone is on track for completion.</p>
<p>Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.</p>	<p>BPHC is executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes use of targeted patient registries in conjunctions with our clinical projects. We have a comprehensive strategy in place for care management which includes the uses of registries, EHRs and IT platforms, and the completion of all agreed upon tasks on schedule. Last quarter we signed an agreement with the Bronx RHIO for services which will support population health management. We are confident that we are also very close to securing a Care Coordination and Management System (CCMS, Acupera) for the PPS. Our major partners are already sharing data with the Bronx RHIO and anticipate the quality and quantity of this data to increase. We have begun participating in beta-testing of Spectrum, Bronx RHIO's data analytics tool, onto which we will develop our population health management (PHM) platform. We are also simultaneously exploring potentials to utilize the MAPP/Salient resources to use as additional PHM source. Furthermore, a comprehensive Bronx RHIO patient consent strategy is increasing our attributed member participation in data-sharing and data agreements between member organizations are creating an environment where PHM will be easier to implement.</p>

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	Some specific metrics have also been prioritized during the Bronx RHIO contract negotiations. BPHC also deployed a rapid cycle evaluation (RCE) program and selected some measures which will promote PHM. The milestone is on track for completion.
Develop a comprehensive care management plan for each patient to engage him/her in care and to reduce patient risk factors.	Update: The BPHC Clinical Operations Plan for Health Home At-Risk describes the roles, responsibilities, and procedures for primary care practices to refer patients to care management services, assess patient needs, set goals with patients, and identify appropriate interventions. These elements make up the comprehensive care management plan for at-risk patients. An assessment tool and care management planning template have been provided to BPHC partners for their use in advance of the roll-out of BPHC's Care Coordination Management System (CCMS). Techniques for effective care planning and care coordination, including motivational interviewing, will be included in the training curriculum for Care Coordinators. The Workforce team, which includes leadership from the 1199 Training and Employment Fund (TEF), continued during this quarter to develop a standard Care Coordinator training curriculum using existing TEF modules and new resources recommended by BPHC partners and SDOH. Additional supervision-focused modules are also under development and will supplement the Care Coordinator training for Nurse Care Management Supervisors. All modules will be finalized and trainings will launch in DY2 Q1. BPHC also continued to convene a CCMS Pilot Development Work Group during DY1 Q4. This group mapped existing and future-state workflows for care management in the Health Home and Health Home At-Risk settings to define system requirements for BPHC's CCMS platform. This milestone remains on track for completion.
Establish partnerships between primary care providers and the local Health Home for care management services. This plan should clearly delineate roles and responsibilities for both parties.	Update: BPHC has undertaken a process to engage Health Homes in the Integrated Delivery System and utilize existing capabilities to deepen PPS-wide clinical integration. There are three Health Homes in the BPHC Integrated Delivery System: Bronx Accountable Healthcare Network (BAHN), Community Care Management Partners (CCMP), and Coordinated Behavioral Care (CBC). During initial individual meetings with the three Health Homes, BPHC explored the each Health Home's working model, links to primary care, and patient population. Additional meetings and interactions led to the following decisions with regard to how BPHC will engage with participating Health Homes: BPHC will facilitate linkages between PCPs and Health Homes for bottom-up referrals; Health Homes will provide Critical Time Intervention (CTI) services to seriously mentally ill (SMI) patients referred from BPHC's Care Transitions program; Health Homes will provide Health Home At-Risk care management services to smaller PCP practices, for which embedded Health Home At-Risk care management teams are not feasible; BPHC will regularly convene a group of all three Health Homes for collaboration around training, CTI, and partnerships between HHs and PCPs; BPHC will facilitate PPS-wide meetings between PCPs and Health Homes to establish expectations and standards for communications and information sharing between HHs and PCPs; finally BPHC will work with Health Homes to improve and expand education and training for PCPs and community organizations on the Health Home program. In order to formalize the PPS partnership with its participating Health Homes, BPHC is in the process of signing formal partnership agreements with all three Health Homes to allow data and funds to flow between BPHC and the Health Homes. BPHC has shared updates on its Health Home engagement progress with the Executive Committee, Quality and Care Innovations Subcommittee, and during an All-Member Webinar. This milestone remains on track for completion.
Establish partnerships between the primary care providers, in concert with the Health Home, with network resources for needed services. Where necessary, the provider will work with local government units (such as SPOAs and public health departments).	Update: BPHC's Community Engagement and Communications Group convened during this period to develop a directory of community resources that can be used by providers across the BPHC network and build a bridge between clinical and social services. BPHC seeks to embed this directory within its Care Coordination Management System (CCMS) to facilitate Care Coordinators' ability to rapidly identify appropriate services, make and track patient referrals, and bi-directionally share information with the referral agency via secure messaging. During this quarter, BPHC continued to work with its partners to implement closed loop referral tracking processes for all medical and social service referrals, in line with the policies and procedures described in the Clinical Operations Plan (COP). Social service organizations and PCPs are both represented on the Health Home At-Risk Implementation Work Group (IWG). The IWG is working to develop creative solutions to persistent challenges to ensure the at-risk population in the Bronx can gain access to the range of services necessary to manage their health and reduce risk factors. This milestone remains on track for completion.
Implement evidence-based practice guidelines to address risk factor reduction as well as to ensure appropriate management of chronic diseases. Develop educational materials consistent with cultural and linguistic needs of the population.	Update: The Health Home At-Risk Implementation Work Group (IWG) identified various evidence-based guidelines on care coordination. During the IWG's March meeting the group agreed to conduct an in-depth review of the Agency for Healthcare Research and Quality (AHRQ) paper, Designing and Implementing Medicaid Disease and Care Management Programs, with a particular focus on Section 8: The Care Management Evidence Base. During DY2 Q1 the group will vote on whether or not to recommend Section 8 to the Quality and Care Innovations Subcommittee to serve as BPHC's evidence-based guidelines for care coordination. The group will also decide whether to recommend the full paper as a implementation reference guide for practices engaged in the Health Home At-Risk Intervention Program. To determine the current state of culturally and linguistically appropriate patient education material use across the PPS, BPHC gathered existing patient education materials used by its largest primary care partners. The materials will be analyzed to identify gaps as well as best practices to determine specific needs for BPHC's development of new patient education materials. This milestone remains on track for completion.

Project 2.b.iii – ED care triage for at-risk populations

✓ IPQR Module 2.b.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

BPHC is implementing Project 2.b.iii through enhancement and expansion of the Montefiore Care Management Organization's existing Clinical Navigator program and the implementation of admission diversion strategies for patients with mental illness (e.g. Riverdale Mental Health Association's Parachute NYC program). Throughout DSRIP, BPHC seeks to address risks to the implementation of Project 2.b.iii using the mitigation strategies described below.

(1) A key risk associated with BPHC's strategy for 2.b.iii includes the possibility of delayed expansion of the Clinical Navigator program due to recruitment and training challenges. To mitigate this risk, Montefiore's CMO has been actively engaged in the DSRIP planning process and has created buy-in for the expansion of the Clinical Navigator program and modifications to customize it to DSRIP based on lessons learned. To further ease the transition, BPHC will stagger the DSRIP program expansion, beginning at Montefiore emergency departments (EDs) and then moving to the SBH ED. BPHC is contracting with the CMO to help lead program development, training, recruitment and hiring, and other programmatic functions to minimize delays and ensure proper programmatic oversight.

(2) Unstable housing/BH/SUD may impact patient compliance. CBOs can assist with mitigating these risks. Evidence-based programs such as Parachute NYC and Critical Time interventions, which provide alternatives to ED visits and assist with care transitions suffer from a lack of consistent funding sources. Discussions with MCOs regarding a payment mechanism to sustain programs like these will be crucial to their long term sustainability. To mitigate risks associated with funding challenges, BPHC will work with NYCDOHMH, Riverdale Mental Health Association, and the Visiting Nurse Service of New York to develop an approach to finalizing negotiations with MCOs regarding program payments and "marketing" such programs more intensively to ED physicians, psychiatrists, Health Homes, the New York Police Department, and CBOs.

(3) Many of the targeted patients for this project are in need of social as well as medical services. However, many arrive at the ED during off-hours, limiting the time in which staff can connect patients with primary care providers, urgent care centers, Health Homes and social service providers. In addition, ED providers often lack the knowledge and time to connect patients with social service agencies and the Parachute NYC program. To mitigate these risks, BPHC will expand the hours of the CMO's existing Clinical Navigator program to better account for individuals who arrive at the ED and need support services during "off hours." BPHC is also developing a web-based directory of preferred CBO providers that will provide a comprehensive source of information on the scope of social services provided across the PPS.

(4) IT challenges across providers present additional barriers to ED triage and care coordination efforts. Many of the alternatives to the ED, including urgent care centers, Parachute NYC, PCPs, and CBOs do not have EMR data sharing capabilities and are not connected to the Bronx RHIO. Without these capabilities, patient information is not accessible at the point of care and cannot be shared electronically with patients' existing PCPs. Based on strategies developed by the PPS's IT planning team, during DY 1 and 2, BPHC will implement common assessment and risk stratification tools; make a care planning application accessible to all providers with whom the patient is engaged; promote greater adoption and use of EHRs and HIE among providers; and utilize a patient portal.

IPQR Module 2.b.iii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale
DY3,Q4	13,720

	Year,Quarter	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4
PPS Reported	Baseline Commitment	0	0	350	2,744
	Quarterly Update	0	0	2,051	9,404
	Percent(%) of Commitment			586.00%	342.71%
IA Approved	Quarterly Update	0	0	2,051	7,757
	Percent(%) of Commitment			586.00%	282.69%

IPQR Module 2.b.iii.3 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Establish ED care triage program for at-risk populations	DY3 Q4	Project	N/A	In Progress	07/01/2015	03/31/2017	07/01/2015	03/31/2017	03/31/2017	DY2 Q4

Establish ED care triage program for at-risk populations	BPHC, with the assistance of Montefiore's Care Management Organization (CMO) acting as vendor and a joint SBH-Montefiore design team, has completed the design of the ED Care Triage project. Decisions made by the design team regarding project design will be reflected in the ED Care Triage Clinical Operations Plan (COP) which will be completed in DY2Q1. As well, the COP will include cross-cutting chapters on referrals to Health Homes and closed-loop referral tracking. The COP when completed will include detailed work flows and descriptions of the program as well as roles and responsibilities of critical staff - the ED Navigators. SBH and Montefiore have completed job descriptions for all staff in the project using a standard set of role specific competencies. ED Navigators will be responsible for redirecting patients to a community primary care provider as well as determining referrals to appropriate community based organization that will address the social determinants of health. Members of the SBH and Montefiore site specific implementation teams (SSIT) have reviewed templates of documentation ED Navigators will use and will share those templates with their respective IT departments during DY2Q1 in order to build the documentation within their EMR. As SBH and Montefiore hire staff, Montefiore's CMO will conduct a training based on core competencies agreed upon by the Implementation Work Group (IWG) as of the 1/25/16 meeting. BPHC will also provide training to the ED navigators to provide assistance to homeless patients as well as those experiencing a behavioral health crisis. BPHC is leveraging best practices developed by a SBH team participating in the Medicaid Accelerated eXchange (MAX) series to establish more formal referral partnerships with providers of behavioral health respite providers and transitional housing and involve those partners in developing training materials. As well training will be scheduled and provided to ED Navigators for the referral of patients who meet criteria into the home based asthma intervention (project 3.d.ii_Asthma Home-Based). Key stakeholders at Montefiore and SBH as well as critical community based organizations (CBOs) have been engaged and oriented to the project through meetings of the IWG. SBH and Montefiore have also provided orientations to their leadership as well as Root Cause Analysis (RCA) committees with the assistance of the CSO. Milestone is on track for completion.

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
<p>Participating EDs will establish partnerships to community primary care providers with an emphasis on those that are PCMHs and have open access scheduling.</p> <p>a. Achieve NCQA 2014 Level 3 Medical Home standards or NYS Advanced Primary Care Model standards by the end of DSRIP Year 3.</p> <p>b. Develop process and procedures to establish connectivity between the emergency department and community primary care providers.</p> <p>c. Ensure real time notification to a Health Home care manager as applicable</p>	<p>BPHC is executing a comprehensive plan to support safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes EHR support and connectivity of data captured therein. A process has been started to ensure all applicable providers meet PCMH recognition and MU accreditation where possible and that we meet our obligation to the previously agreed tasks. Consultants have been deployed to perform detailed gap analyses with about 100 practices, with 80 locations already evaluated thus far. Of those, 17 practices have already submitted their PCMH 2014 attestations, with 16 achieving level 3 and one still pending NCQA ruling. Contracting is complete or close to complete with six consulting groups for the work on the remaining practices. We are starting to also discuss Advance Primary Care with SDOH-certified consultants and are identifying locations which would be good candidates for the program. These six consulting groups are part of a Community of Practice ("CoP") we are organizing to build/establish best practices, share and collaborate with experts on PCMH transformation, and possibly transfer the experience and knowledge to other population health initiatives. The ED Care Triage Clinical Operations Plan when complete will detail processes and procedures to establish connectivity between the emergency department and community PCPs. Efforts are in place to share information with PCPs and notify the health home manager. We signed a contract with the Bronx RHIO and will leverage their technology as an encounter notification system (ENS) in order to ensure real time notification to Health Home and other outpatient care managers. Some of our members are already piloting the system. The milestone is on track for completion.</p>
<p>For patients presenting with minor illnesses who do not have a primary care provider:</p> <p>a. Patient navigators will assist the presenting patient to receive an immediate appointment with a primary care provider, after required medical screening examination, to validate a non-emergency need.</p> <p>b. Patient navigator will assist the patient with identifying and accessing needed community support resources.</p> <p>c. Patient navigator will assist the member in receiving a timely appointment with that provider's office (for patients with a primary care provider).</p>	
<p>Established protocols allowing ED and first responders - under supervision of the ED practitioners - to transport patients with non-acute disorders to alternate care sites including the PCMH to receive more appropriate level of care. (This requirement is optional.)</p>	
<p>Use EHRs and other technical platforms to track all patients engaged in the project.</p>	<p>We are executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes use of targeted patient registries in conjunctions with our clinical projects. We have a comprehensive strategy in place for care management which includes the uses of registries, EHRs and IT platforms, and the completion of all agreed upon tasks on schedule. Last quarter we signed an agreement with the Bronx RHIO for services which will support population health management. We are confident that we are also very close to securing a Care Coordination and Management System (CCMS, Acupera) for the PPS. Our major partners are already sharing data with the Bronx RHIO and anticipate the quality and quantity of this data to increase. We have begun participating in beta-testing of Spectrum, Bronx RHIO's data analytics tool, onto which we will develop our population health management (PHM) platform. We are also simultaneously exploring potentials to utilize the MAPP/Salient resources to use as additional PHM source. Furthermore, a comprehensive Bronx RHIO patient consent strategy is increasing our attributed member participation in data-sharing and data agreements between member organizations are creating an environment where PHM will be easier to implement. Some specific metrics have also been prioritized during the Bronx RHIO contract negotiations. BPHC also deployed a rapid cycle evaluation (RCE) program and selected some measures which will promote PHM. The milestone is on track for completion.</p>

Project 2.b.iv – Care transitions intervention model to reduce 30 day readmissions for chronic health conditions

IPQR Module 2.b.iv.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Hospitals often fail to link patients post discharge to the home-based services & patient self-management programs needed to meet DSRIP's targeted reduction in 30-day readmissions. PPS will enhance & expand the Care Management Resource Unit (CMRU) at Montefiore & assist SBH in establishing a CMRU-like function to expand access & links to care management resources & social services to help patients stay out of the hospital. These efforts will be bolstered by PPS policies & procedures that will require follow up for a 30-day period post discharge, as well as culturally & linguistically appropriate education materials.

PPS will assess the need for more medically complex units in skilled nursing facilities (SNFs) & additional SNF staff training to prevent frequent patient bounce back. There is often inadequate coordination & communication between hospitals, care transition nurses, Health Home (HH) care managers, physicians, & home health care agencies that are key to effective care transition services & appropriate "hand offs" among providers. In addition, hospital staff do not always recognize the value of CBOs in managing care transitions. Furthermore, economic, cultural, & linguistic barriers contribute to challenges in accessing the healthcare system, non-compliance with discharge regiments, & high readmission rates. To mitigate these risks, members of BPHC care teams will be able to access a web-based care planning tool & communicate easily with one another. PPS will support a communication plan to make care team members aware of the value of the tool in patients' transitions to care management through a SNF, HH, CBO, or other PPS provider. BPHC & Montefiore CMO will develop training & tools to address cultural competency, language barriers, & detail the elements of the care transitions model & roles of each care transition team member, including hospital-based staff, HH care managers, & CBOs providing social services, with particular attention to homeless individuals. Unstable housing/BH/SUD may impact readmissions; CBO partners will be actively engaged to assist in mitigating these risks.

Recruiting & training care management staff, particularly Spanish speaking staff with experience & training working with behavioral health patients presents a challenge to care coordination & readmission reduction efforts. According to the CNA, lack of funding & low salaries have made such hiring difficult. PPS will work with local community colleges, CBOs, 1199 training fund & NYSNA to help recruit & train a pipeline of care management staff & offer competitive salaries, flexible hours, & job sharing, as feasible, to improve recruitment & retention. PPS will work with workforce partners to train staff on the Critical Time Intervention to help address current gaps in identifying & treating behavioral health needs. Existing policies & procedures for early notification of planned discharges differ among hospitals. From interviews with hospital staff, we know that HH care managers are not always notified when their patients are being discharged (if they have consents), particularly if they are discharged earlier than expected or from a hospital not subscribed to RHIO alerts. PPS will require hospitals PCPs to have RHIO connectivity & use subscriptions/alerts & will establish protocols requiring notification of discharges to care team members within a specified time period. Protocols will also establish an early notification system to ensure patients who meet program criteria have a comprehensive care transition plan completed no later than the day prior to the projected discharge. IT resource gaps will be addressed by CSO, building on existing & adding new IT capabilities, including a care plan & management platform, patient registries, direct messaging, patient risk stratification, standardized e-discharge summaries, & expanded HIE

IPQR Module 2.b.iv.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.	BPHC continues to be actively engaged in working with its vendor organization—Montefiore's Care Management Organization (CMO) and has completed the design of the 30-day care transitions intervention on BPHC inpatient units and on a post discharge basis. Hospital partners have completed job descriptions as well as staffing and recruiting plans in order to begin recruiting staff. BPHC has completed criteria to generate a work list of "high risk for readmission" patients to be targeted for the intervention. BPHC hospitals will use an evidenced based risk stratification tool that takes into account Length of Stay, Acute admissions, Comorbidity and Emergency room visits (LACE). A high-level workflow model has been developed as part of the Clinical Operations Plan (COP). The COP also details roles and responsibilities of inpatient, post discharge and outpatient care coordinators to ensure a smooth transition and redirection from hospital discharge to community primary care and community based organizations. Completion of the COP has been instrumental in CMO developing a formal training for all incumbent and incoming staff that will be involved in the intervention. The CMO has provided drafts of both the training curriculum and presentations and has been actively tweaking the materials based on input from the joint Montefiore-SBH project task force. BPHC is actively working with its partner primary care sites to develop workflows that address transitions of care utilizing alerts through

Milestone Name	Narrative Text
	<p>the Bronx RHIO that tell a community physician their patient has recently been discharged from the hospital and leveraging best practices and workflows from primary care sites that already utilize alerts. Hospitals may communicate a transitional care plan/summary electronically with receiving PCPs and CBOs through secure email until capability through the Bronx RHIO or CCMS is available. During the quarter, BPHC has also made significant progress toward establishing a Critical Time Intervention program to address the transitions of care for behavioral health patients. BPHC has engaged subject matter experts (SMEs) in CTI from the CTI Institute, Maimonides PPS, Center for Urban Community Services (CUCS) and BronxWorks as part of due diligence. SMEs have instrumental advising BPHC to define the target population, complete the program design and develop a staffing model through BPHC member Health Homes. BPHC is finalizing an exact staffing and financial model. BPHC has also engaged Care Management Agencies (CMAs) within the Health Homes of Coordinated Behavioral Care (CBC) and Bronx Accountable Healthcare Network (BAHN) which already run CTI programs. The population BPHC will focus on for CTI will be Seriously Mentally Ill (SMI) patients with diagnoses that qualify for Health Home services with or without substance use disorder (SUD) who are known to be homeless, at risk for homelessness and/or recently decarcerated. BPHC will work directly with inpatient behavioral health providers and discharge planners to identify patients who meet the criteria of the target population to engage patients and provide a warm handoff to the CTI team while the patient is still in the hospital. Milestone is on track for completion.</p>
<p>Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.</p>	<p>The Finance and Sustainability Committee continues the process of identifying Managed Care Organizations (MCOs) that serve the PPS attributed population that have Value Based Payment (VBP) arrangements in place. The most recent financial health assessment survey included additional questions and data needs to determine the extent of managed care penetration and VBP arrangements within the PPS membership. The initial response to this survey indicated that 95% of PPS participants do not have any VBP arrangements. Only two of the respondents that have VBP arrangements, Montefiore and SBH, have more than 5% of its respective patient service revenue coming from value-based payment (VBP) arrangements.</p> <p>In addition to this survey, BPHC is also exploring various strategies for effectively engaging PPS providers in VBP arrangements and are canvassing interest of providers in the PPS who may be willing and are interested in participating in a BPHC-sponsored contracting vehicle. This process works in concert with the long-term strategy of ensuring 90% VBP across the network as BPHC outlined in the milestone below.</p> <p>On Feb 1, 2016 the VBP planning workgroup group met to discuss VBP arrangements with MCOs. This workgroup represents a subset of the Finance & Sustainability Subcommittee. As part of developing a baseline, the workgroup discussed BPHC's role and processes in assessing VBP readiness. Questions were added to include existing VBP revenue streams its percentage of total revenue in the financial health survey. With this as a baseline, it was determined that more detailed data on the providers that have existing VBP arrangements would be reviewed by the PPS in the months ahead to understand the various financial arrangements (i.e., full-risk vs shared savings models, subpopulations covered, levels of risk, etc.) and to understand which Medicaid Managed Care entities have the ability to administer this type of contracting. As more information and guidance is expected to be provided by the State through the updated VBP roadmap, it was agreed that the strategy around meeting milestones should be structured around several different measures that would be discussed in regular meetings going forward. The deadlines under this milestone have been adjusted to align with the revised timeline under the Finance Workstream. Milestone is on track for completion.</p>
<p>Ensure required social services participate in the project.</p>	<p>The Community-based organizations (CBOs) Engagement workgroup and BPHC CBO staff have been in the process of developing a web based directory of CBO/Social service providers. The Community Engagement Workgroup has helped formulate a needs assessment for the CBOs. In coordination with these partners, the PPS is creating a directory of available services that will be searchable by zip code and service to be shared throughout the network. A work plan is available as supporting documentation. The Regional Advancement of Interim Need organization (R.A.I.N) provides medically tailored home food services and is a member of the Implementation Work Group and will be included in the directory among other CBOs in the PPS. Efforts in progress continue from the last update. BPHC in coordination with its hospital partners continues to identify and compile a list of most frequently referred organizations to that will be shared with the CBO task force. Lists currently exist with both social work departments and online on Montefiore's intranet. Documentation and workflows for making closed loop referrals to CBOs have been created as part of the Clinical Operations Plan (COP). BPHC is developing relationship and moving towards establishing formal partnerships with Health Home Care Management Agencies (CMAs) and Skilled Nursing Facilities to whom many transitioning patients will likely be referred. CBOs that provide supportive housing, respite services as well as behavioral health treatment services have been engaged to provide specific transition assistance. More formal partnerships are in progress with those organizations as well. In particular, an effort is being made to provide assistance to homeless patients and those experiencing a behavioral health crisis. BPHC is leveraging best practices developed by a SBH team participating in the Medicaid Accelerated eXchange (MAX) series to establish more formal referral partnerships with providers of behavioral health respite providers</p>

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	and transitional housing. In addition as explained in Milestone 1 update, the Critical Time Intervention (CTI) model will also engage Health Homes and other CBOs in this project. Milestone is on track for completion.
Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services.	
Protocols will include care record transitions with timely updates provided to the members' providers, particularly primary care provider.	The Care Transitions design task force led by Montefiore's Care Management Organization (CMO) acting as vendor has developed and approved a final version of the transitional care plan to be included in the EMR and eventually to live in the care coordination management system (CCMS) and/or Bronx RHIO. Prior to the CCMS PPS-wide rollout, an interim solution using respective hospital EMRs will be used and secure email will be used to send transitional care plan summary to PCPs and/or relevant CBOs. BPHC is also investigating a means of utilizing the Bronx RHIO for exchange of discharge summaries and/or transitional care plans. Final templates for documentation and storage of the transitional care plan in each institution's EMR have been submitted to each organization's IT departments to begin discussions for development in DY2Q1. As described in the narrative for Milestone 3, the Critical Time Intervention (CTI) model is being evaluated for inclusion as an evidence-based practice and to be implemented as a community-based intervention among a high-risk seriously mentally ill (SMI) and/or homeless, substance use disorder (SUD) and recently decarcerated population. Criteria for CTI intervention are being finalized and will be discussed with the Implementation Workgroup in early May as well as with a subgroup of SMEs who will define the target population and drive the referral process in DY2Q1. Data have been collected to determine the size of the population for this intervention and efforts are being made to work with health homes to properly staff and train the appropriate number of staff to deliver the intervention through health homes as well as leverage existing community resources that run CTI programs within our PPS. The Implementation Work Group (IWG) will review rapid cycle evaluation metrics and will act as a clinical quality council. Milestone is on track for completion.
Ensure that a 30-day transition of care period is established.	
Use EHRs and other technical platforms to track all patients engaged in the project.	Partners that are using the Encounter Notification System (ENS) through Bronx RHIO have been identified and workflows to receive patients from inpatient discharges are in the process of being developed. We are executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes use of targeted patient registries in conjunctions with our clinical projects. We have a comprehensive strategy in place for care management which includes the uses of registries, EHRs and IT platforms, and the completion of all agreed upon tasks on schedule. Last quarter we signed an agreement with the Bronx RHIO for services which will support population health management. We are confident that we are also very close to securing a Care Coordination and Management System (CCMS, Acupera) for the PPS. Our major partners are already sharing data with the Bronx RHIO and anticipate the quality and quantity of this data to increase. We have begun participating in beta-testing of Spectrum, Bronx RHIO's data analytics tool, onto which we will develop our population health management (PHM) platform. We are also simultaneously exploring potentials to utilize the MAPP/Salient resources to use as additional PHM source. Furthermore, a comprehensive Bronx RHIO patient consent strategy is increasing our attributed member participation in data-sharing and data agreements between member organizations are creating an environment where PHM will be easier to implement. Some specific metrics have also been prioritized during the Bronx RHIO contract negotiations. BPHC also deployed a rapid cycle evaluation (RCE) program and selected some measures which will promote PHM. The ED Care Triage / Care Transitions Implementation Work Group approved target population criteria and worklist criteria as developed by the project design task forces at the 1/25 meeting in order to further define population health management (PHM) requirements for patient engagement and strategies for tracking through the RHIO and/or CCMS platform. Milestone is on track for completion.

Project 3.a.i – Integration of primary care and behavioral health services

IPQR Module 3.a.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

This project marks a significant cultural shift in how care is delivered to and experienced by patients. Provider buy-in will be critical for successful implementation. To accomplish this transition BPHC will: (1) provide required project-specific training and technical assistance on the IMPACT model processes and protocols to primary care physicians (PCPs) and their care teams and secure an experienced training consultant to assist these sites in adopting the model over a 6-month training period. Training and technical assistance will address how PCPs, care managers, and psychiatrists can work effectively as a team. In addition, the training and technical assistance will place an emphasis on providing culturally competent care for depression, including an understanding of cultural barriers to care and health literacy and stigma among the patient population; (2) provide technical assistance for those organizations seeking to introduce PC into BH sites or BH into PC sites. BPHC will pair organizations that have successfully co-located PC and BH with those who are newly implementing these interventions in order to provide technical assistance and coaching to PC and BH staff. BPHC will also seek ways to incentivize physician participation: e.g., offering access to care management services and connectivity through BPHC's care planning tool to minimize the time burden of implementing the new evidence-based standards. Technical assistance will include an emphasis on providing culturally competent care for BH issues; (3) address regulatory and reimbursement barriers currently in place that discourage effectively integrating PC and BH through co-location due to cost, paperwork, and length of approval process. BPHC requested and received the following waivers from the State that will facilitate implementation of this project: Article 28 (SDOH) facilities may provide mental health or substance abuse services so long as those services comprise no more than 49% of a facility's annual visits and the facility complies with various provisions of the new integrated services regulations; Article 31 (OMH) and 32 (OASAS) facilities may provide physical health services so long as those services comprise no more than 49% of a facility's annual visits and the facility complies with various provisions of the new integrated services regulations; Article 28 and Article 32 facilities may treat their patients in the home, but there is no system yet for them to be reimbursed for such visits. (Article 31 facilities cannot provide care in their patients' homes.). However, SDOH, OMH, and OASAS have yet to grant any waivers that would allow two different providers licensed by different agencies to share space (for example, a common waiting room used by an Article 28 and Article 31 facility). BPHC will continue to advocate to the State on these waivers to ensure that we meet project goals and milestones; and (4) identify solutions to the shortage of psychiatrists in our PPS, as noted by our CNA. BPHC will explore use of tele-psychiatry to increase the PPS's psychiatric capacity as implementation begins. Staff recruitment efforts will focus on identifying additional psychiatrists, but the PPS will also launch a recruitment program targeted towards attracting and retaining nurses, licensed clinical social workers (LCSWs), psychologists, and psychiatric NPs and PAs to perform the roles of therapist and depression care managers at participating sites. We will also consider recruiting for licensed master social workers (LMSWs) with the expectation that they pass the LCSW exam within a year of hire, and contracting with 1199 Training and Employment Funds to provide training. BPHC will also reach out to other PPSs in the region to collaborate on workforce issues that may impact recruitment strategies, including compensation.

IPQR Module 3.a.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale
DY3,Q4	64,260

	Year,Quarter	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4

screening positive, SBIRT) implemented for all patients to identify unmet needs.											
Task Screenings are conducted for all patients. Process workflows and operational protocols are in place to implement and document screenings.			Project		In Progress	09/01/2015	03/31/2018	09/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task Screenings are documented in Electronic Health Record.			Project		In Progress	03/31/2016	03/31/2018	03/31/2016	03/31/2018	03/31/2018	DY3 Q4
Task At least 90% of patients receive screenings at the established project sites (Screenings are defined as industry standard questionnaires such as PHQ-2 or 9 for those screening positive, SBIRT).			Project		In Progress	09/01/2015	03/31/2018	09/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task Positive screenings result in "warm transfer" to behavioral health provider as measured by documentation in Electronic Health Record.			Provider	Practitioner - Primary Care Provider (PCP)	In Progress	09/01/2015	03/31/2018	09/01/2015	03/31/2018	03/31/2018	DY3 Q4
Task Educate leadership within each participating organization around benefits of providing preventative care screenings using industry standard questionnaires regularly. Recognize that BH patients with conditions other than depression still require depression screening with industry standard questionnaires such as PHQ-2 or 9 for those screening positive, SBIRT. In this colocation model also educate around Primary Care preventive screenings including: age appropriate cancer screenings, alcohol, tobacco and substance use screenings, CVD and DM screenings, vaccinations, etc.			Project		Completed	10/01/2015	03/31/2016	10/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task Assess participating providers current process for identifying unmet physical needs of patients, The PPS will begin working with approximately 50 sites and their staff, including administrators, providers, and care team staff.			Project		In Progress	03/31/2016	12/31/2016	03/31/2016	12/31/2016	12/31/2016	DY2 Q3
Task Develop process to monitor progress towards completing industry standard			Project		Completed	09/01/2015	12/31/2015	09/01/2015	12/31/2015	12/31/2015	DY1 Q3

	<p>signatures to indicate leadership's commitment to this project. The Clinical Operations Plan (COP) has been reviewed and approved by the Primary Care/Behavioral Health Implementation Work Group, as well as the Quality and Care Innovations Subcommittee. IFH and Bronx Partners for Healthy Communities (BPHC) are working closely with partner organization leadership to ensure that training plans are being implemented and the COP adopted. We are executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes EHR support and connectivity of data captured therein. A process has been started to ensure all applicable providers meet PCMH recognition and MU accreditation where possible and that we meet our obligation to the previously agreed tasks. Consultants have been deployed to perform detailed gap analyses with about 100 practices, with 80 locations already evaluated thus far. Of those, 17 practices have already submitted their PCMH 2014 attestations, with 16 achieving level 3 and one still pending NCQA ruling. Contracting is complete or close to complete with six consulting groups for the work on the remaining practices. We are starting to also discuss Advance Primary Care with SDOH-certified consultants and are identifying locations which would be good candidates for the program. These six consulting groups are part of a Community of Practice ("CoP") we are organizing to build/establish best practices, share and collaborate with experts on PCMH transformation, and possibly transfer the experience and knowledge to other population health initiatives. This milestone is on track for completion.</p>
<p>Develop collaborative evidence-based standards of care including medication management and care engagement process.</p>	<p>The Clinical Operation Plan (COP) outlining policies and procedures for effective implementation of Primary Care/Behavioral Health co-location model has been reviewed and approved by the Primary Care/Behavioral Health Implementation Work Group (IWG), Quality and Care Innovation Subcommittee, and the CSO Chief Medical Officer. The COP also provides guidance and resources around medication management and care engagement, which will be reinforced through trainings delivered to participants. A presentation to the Workforce Subcommittee provided an overview of action plans for implementing workforce-specific strategies for collaborative care, including the implementation of the Training and Technical Assistance Plans. During this quarter, the needs assessments (gap analyses) for the largest 7 primary care organization partners and their respective sites (nearly 100) have been completed. To date, 74 site-specific assessment surveys were completed and data uploaded into Salesforce, our network management system. The IWG will continue to meet approximately bi-monthly and communicate with the Workforce Subcommittee around training plans. This milestone is on track for completion.</p>
<p>Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.</p>	<p>The Clinical Operations Plan (COP) for project 3ai, Primary Care/Behavioral Health Integration ("PCBH"), provides guidance for workflows around screening and documentation. The COP chapters specific to screening have been reviewed and approved by the Quality and Care Innovations Subcommittee. Through these assessments the vendor, Institute for Family Health was able to identify barriers to implementing workflows that can hinder screenings. Training and Technical Assistance Plans were developed for each organization and their respective sites to provide an overview of the topics and, when available, dates for trainings. Many sites are receiving PHQ 2/9 screening trainings, in addition to the guidance provided in the COP. The DSRIP Program Directors embedded at each of the largest 7 primary care organization partners are overseeing implementation and also reporting back to the CSO when challenges are observed. Trainings and the COP provide guidance on non-medical referrals to community-based providers. This milestone is on track for completion.</p>
<p>Use EHRs or other technical platforms to track all patients engaged in this project.</p>	<p>We are executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes use of targeted patient registries in conjunctions with our clinical projects. We have a comprehensive strategy in place for care management which includes the uses of registries, EHRs and IT platforms, and the completion of all agreed upon tasks on schedule. Last quarter we signed an agreement with the Bronx RHIO for services which will support population health management. We are confident that we are also very close to securing a Care Coordination and Management System (CCMS, Acupera) for the PPS. Our major partners are already sharing data with the Bronx RHIO and anticipate the quality and quantity of this data to increase. We have begun participating in beta-testing of Spectrum, Bronx RHIO's data analytics tool, onto which we will develop our population health management (PHM) platform. We are also simultaneously exploring potentials to utilize the MAPP/Salient resources to use as additional PHM source. Furthermore, a comprehensive Bronx RHIO patient consent strategy is increasing our attributed member participation in data-sharing and data agreements between member organizations are creating an environment where PHM will be easier to implement. Some specific metrics have also been prioritized during the Bronx RHIO contract negotiations. BPHC also deployed a rapid cycle evaluation (RCE) program and selected some measures which will promote PHM. The milestone is on track for completion.</p>
<p>Co-locate primary care services at behavioral health sites.</p>	<p>CSO staff and the vendor, Institute for Family Health, delivered an informational webinar in an effort to recruit more behavioral health providers into this project for Model 2, in addition to the Training and Technical Assistance Needs Assessments that were conducted for the gap analysis. Consistent with what has been observed across the state, Model 2 project commitment is comparatively lower. The majority of the 14 sites that have committed to Model 2 have an existing primary care practice physically co-located, but will need assistance through training to adopt the new workflows and the overall transformations laid out in project 3ai. In some cases, sites are seeking</p>

Some specific metrics have also been prioritized during the Bronx RHIO contract negotiations. BPHC also deployed a rapid cycle evaluation (RCE) program and selected some measures which will promote PHM. The milestone is on track for completion.</p>
<p>Implement IMPACT Model at Primary Care Sites.</p>	<p>Update: CSO Staff, along with the vendor, Institute for Family Health, conducted Training and Technical Assistance Needs Assessments at individual sites to determine which providers are interested and eligible to participate in this project. During the assessments, sites that selected Model 1 were encouraged to also commit to the IMPACT model and vice versa, as they are complementary to one another. Upon completion of the assessments, Training and Technical Assistance Plan were developed. The Plans included a signatory page for organizations to sign off on the plans. This document will serve as the organization's commitment to the Primary Care/Behavioral Health Integration project 3ai with the CSO. This milestone is on track for completion.</p>
<p>Utilize IMPACT Model collaborative care standards, including developing coordinated evidence-based care standards and policies and procedures for care engagement.</p>	<p>Update: The Clinical Operations Plan (COP), outlining policies and procedures for effective implementation of the IMPACT Model has been created and finalized by the CSO and the vendor, Institute for Family Health. The COP chapters include: 'Adoption of the IMPACT Model, evidence-based guidelines, and Intake-Assessment-Management,' 'IMPACT Staffing Plan P&P,' and 'Common Assessment Tools.' The COP was vetted with the Primary Care/Behavioral Health Implementation Workgroup (IWG). After the IWG's approval, they were presented to the Quality and Care Innovation Subcommittee and subsequently approved. This milestone is on track for completion.</p>
<p>Employ a trained Depression Care Manager meeting requirements of the IMPACT model.</p>	<p>Update: The CSO solicited funding needs through a Request for Information (RFI) process to partners who have a signed Master Services Agreement with the CSO. Responses were reviewed and analyzed by CSO leadership to determine support to be provided for staffing, IT, population health management, and other needs. The</p>

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	Training and Technical Assistance Needs Assessment addressed the sites' need for hiring and training staff to fulfill the Depression Care Manager role. The role requirements were also defined in collaboration with the Workforce Subcommittee and a job description has been developed. It was noted during meetings that some organizations may choose not to use the title "Depression Care Manager" as the external title, so as to avoid associated stigma. This milestone is on track for completion.
Designate a Psychiatrist meeting requirements of the IMPACT Model.	The role of the psychiatrist has been defined in the Clinical Operations Plan and a job description has been developed, both of which were approved by the Primary Care/Behavioral health Implementation Work Group and the Quality and Care Innovations Subcommittee. During the Training and Technical Assistance Needs Assessments, resources were provided to aid in the hiring of the psychiatrist, a key component of the IMPACT Model. The Institute for Family Health, in addition to conducting the trainings, provides assistance in identifying consulting Psychiatrists through a database that the organization maintains with behavioral health providers and consultants. This milestone is on track for completion.
Measure outcomes as required in the IMPACT Model.	The Training and Technical Assistance Needs Assessment specifically addressed the providers' current rates of patient assessment, with the focus PHQ 2/9. The CSO has continued to work closely with the DSRIP Program Directors (CSO liaison/operational lead) embedded at each of the largest 7 primary care organization partners , to create strategies for tracking important data via EHR's. Necessary changes to the EHR are being made across the sites to track screening rates. The depression registry will monitor the depression care status, screening, and improvement rates. This will also include integration of patient records between the primary care and behavioral health providers. This milestone is on track for completion.
Provide "stepped care" as required by the IMPACT Model.	The Clinical Operations Plan includes evidence-based guidelines on "stepped care" for sites implementing the IMPACT Model. The Training and Technical Assistance Needs Assessments informed the type of technical assistance and training required by each site to achieve the new workflows. "Stepped care" guidance was obtained through the Advancing Integrated Mental Health Solutions (AIMS) Center at the University of Washington. As a component of the COP, the evidence-based protocols for providing "stepped care" were approved by the Primary Care/Behavioral Health Implementation Work Group and the Quality and Care Innovations Subcommittee. This milestone is on track for completion.
Use EHRs or other technical platforms to track all patients engaged in this project.	We are executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes use of targeted patient registries in conjunctions with our clinical projects. We have a comprehensive strategy in place for care management which includes the uses of registries, EHRs and IT platforms, and the completion of all agreed upon tasks on schedule. Project 3.b.i – Evidence-based strategies for disease management in high risk/affected populations (adult only)

✓ IPQR Module 3.b.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

As we begin implementation, some practitioners may resist the imposition of standard treatment protocols and new workflows. To mitigate this risk, we have brought together stakeholders to develop clinical operation plans (COPs) for all of the projects. These include evidence-based (EB) guidelines protocols for each disease-specific intervention. Implementation of these protocols will be part of contractual agreements between partners & the PPS. These COPs have been designed to align with 2014 PCMH Level 3 recognition. The CSO has committed to providing technical and financial assistance, including IT support & training, to primary care practices as they work to attain PCMH Level 3 recognition. This includes resources toward project management staff at the participating organizations, and for PCMH "coaches."

Physicians & other PCMH care team members may not currently document self-management goals in the medical record as required, &/or they may be resistant to conducting additional documentation efforts. To address this risk, BPHC is working with our partners to update their respective EHRs to better capture this information consistently. In addition, the CSO may audit medical records to ensure that documentation is occurring.

As we begin building our care teams, recruiting and training sufficient care management staff to serve the needs of the Bronx population may be challenging. Recruiting Spanish-speaking care management staff will be a particular risk. BPHC's workforce strategy will be targeted towards mitigating this risk, such as through the CSO working with community colleges & coordinating with the 1199 Job Security Fund, Montefiore CMO, & NYSNA to identify capable workers & provide training in Spanish when needed. BPHC will also use alternative employment tactics, such as flexible hours, & job sharing, where feasible to attract a broader pool of workers.

Medication adherence is a chronic problem for individuals with chronic illness including those with CVD. Organizations that could be instrumental in helping patients with medication adherence, such as home care agencies & MCOs are handicapped by policies &/or regulations. To mitigate these risks, BPHC will work with MCOs to institute policy changes that will promote medication adherence.

Enhancing patient self-management & self-efficacy is anticipated to be a particular risk to the success of Project 3.b.i. It is challenging to effectively motivate & engage chronically ill patients to embrace changes in behavior & self-manage their condition. Many patients do not grasp the effects of cardiovascular disease & unmanaged hypertension, risks that are compounded in the Bronx population by low health literacy & educational attainment. To mitigate this risk BPHC will engage Health People, a Bronx-based CBO that provides EB education, to expand its own capacity to deploy the peer-based Stanford Model & to train other PPS members on the model to disseminate it broadly.

Providers may not implement EHR systems that meet MU & PCMH Level 3 standards, interoperability challenges may present &/or providers may resist participating in the IDS. BPHC will use gap analysis to develop a program to monitor & deploy assistance to providers at risk, support practices by deploying internal community, external consulting resources and provide customized technical assistance, coaching, & training modules.

IPQR Module 3.b.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks	
Actively Engaged Speed	Actively Engaged Scale
DY3,Q4	21,560

	Year,Quarter	DY1,Q1	DY1,Q2	DY1,Q3	DY1,Q4
PPS Reported	Baseline Commitment	0	0	2,695	5,390
	Quarterly Update	0	0	4,122	5,892
	Percent(%) of Commitment			152.95%	109.31%
IA Approved	Quarterly Update	0	0	4,122	5,881
	Percent(%) of Commitment			152.95%	109.11%

IPQR Module 3.b.i.3 - Prescribed Milestones

Instructions :

Please provide updates to baseline reporting on status, target dates, and work breakdown tasks for prescribed milestones. For milestones that are due and completed within the reporting period, documentation is required to provide evidence of project requirement achievement. Any explanations regarding altered or missed provider commitments should be included within the narrative box, not as text within uploaded documentation.

Project Requirements (Milestone/Task Name)	Prescribed Due Date	Reporting Level	Provider Type	Status	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Milestone #1 Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.	DY3 Q4	Project	N/A	In Progress	04/01/2015	03/31/2018	04/01/2015	03/31/2018	03/31/2018	DY3 Q4

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.	The Central Services Organization (CSO) continued developing the CVD Clinical Operations Plan (COP) and finalized it in December 2015. The COP is based on the DSRIP Domain 1 and 3 requirements and measures, using input from the CVD-Diabetes Transitional Work Group (TWG). It includes chapters on target population, evidence-based guidelines, guidance for at-home blood pressure monitoring, aspirin use, flu shots, patient-driven self-management goals, preferred drugs, referral protocols, patient flows, care team roles, patient/caregiver education and engagement, and practitioner engagement tools. The COP was presented and distributed to all partners at the CVD/Diabetes Project Launch in February 2016. This milestone is on track for completion by DY3, Q4.
Ensure that all PPS safety net providers are actively connected to EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the end of DY 3.	We are executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes EHR support and connectivity of data captured therein. Our agreement with Bronx RHIO will serve as the foundation to achieve next quarter's tasks and those of the future to support this Milestone. This agreement has been signed this past quarter. We also have a strategy around funding the adoption of the health information exchange (HIE) by safety net providers, informed by an analysis of EHR and Qualifying Entity (QE) implementation and use by member organizations with DSRIP. We intend to use DSRIP funds and other funding sources. The DSRIP funds are being distributed via Schedule A Contracting. The agreement specifically touches on implementation, training and support. The milestone is on track for completion by DY3, Q4.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.	We are executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes EHR support and connectivity of data captured therein. A process has been started already to ensure all applicable providers meet PCMH recognition and MU accreditation and that we meet our obligation to the previously agreed tasks. We have hired and deployed expert PCMH consultants to perform detailed gap analyses with about 100 practices, with 80 locations already evaluated thus far. Funding has been earmarked for IT expansion and process for this funding's distribution have been developed and communicated to the member organizations. Schedule As (i.e., contracts) have been developed to distribute some of this funding as a result of the process. A MU strategy is being developed to ensure that our safety-net providers source EMRs and receive benefit. The milestone is on track for completion by DY3, Q4.
Use EHRs or other technical platforms to track all patients engaged in this project.	BPHC plans to use the RHIO/SHIN-NY for population health and reporting and these topics are included in the Clinical Operations Plan (COP). There is a regular weekly meeting between stakeholders from the Bronx RHIO and BPHC to formulate the strategy for use and implementation of the RHIO and SHIN-NY. Additionally, the four Bronx PPSs (BPHC, Bronx Lebanon, HHC OneCity, ACP) meet monthly to discuss shared efforts and are working unified strategy for Qualifying Entity (QE) Engagement, including communications, operations and training. Improving RHIO consent penetration is one of the highest priority areas for BPHC in DY2, and we are exploring various solutions including leveraging our community-based organizations (CBOs) network. This milestone is on track for completion by DY2, Q4.
Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).	The CVD Clinical Operations Plan (COP) includes a chapter on this topic, written in Policy & Procedure (P&P) format as well as suggested resources. BPHC policy states that PCPs should ask about tobacco use and willingness to quit for all patients 12 years and up at every visit while pediatricians should ask about the tobacco use status of adolescent patients and family members. Patients who indicate they smoke or use tobacco some days or every day should be advised to quit and the PCP (or another designated member of staff) should discuss and/or provide cessation methods or strategies with patients who indicate a willingness to quit. The CVD/Diabetes Transitional Work Group (TWG) identified cessation strategies as health education, individual, group, and telephone counseling and cessation medications as any of the seven first-line medications for tobacco dependence that are approved by the FDA. To link to other project initiatives, the COP recommends referrals to the NYS Smokers Quitline (documented in the EHR) be offered to all eligible patients and recommends that smoking cessation should be added as a patient self-management goal where appropriate. Sites are working to assess the current state of any such referrals and implement a workflow meeting the COP requirements; this work will continue through DY2 Q2, with EHR updates being implemented as part of a coordinated strategy beginning by DY2, Q3. Sites are kicking off work on milestone by conducting a current state assessment and gap in April. This milestone is on track for completion by.
Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.	The Clinical Operations Pan (COP) was presented and distributed to all the participating member organizations of our PPS at the CVD/Diabetes Project Launch in February 2016. The COP is based on the DSRIP Domain 1 and 3 requirements and measures, using input from the CVD-Diabetes Transitional Work Group (TWG). It includes chapters on target population, evidence-based guidelines (EBGs), referral protocols, patient flows, care team roles, and patient/caregiver education and engagement. DPDs are beginning organization-specific processes to adopt evidence-based guidelines from COPs. The development of mechanisms for regular review of the EBGs is was approved by our BPHC Quality and Care Innovation Subcommittee in March. This milestone is on track for completion by DY2, Q4.
Develop care coordination teams including use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-management.	The model for care coordination teams was finalized last quarter and included in the Clinical Operations Plan (COP) for the Health Home At-Risk project (referenced in other project sections). The care coordination model was presented and distributed to all the participating member organizations of our PPS at the CVD/Diabetes Project Launch in February. This model includes the opportunity to add additional members of the care management team needed to fulfil the care coordination requirements of the CVD project, including community health works and clinical pharmacists, the funding for which is assessed and offered through our "Request for Information" (RFI) process. Since the implementation of team-based care is foundational to BPHC's primary care projects, this program launched last January to allow sites time to begin building their teams and making selected hires. The requirements of the Diabetes (and other primary care projects) were included in the assessment of need for additional staff members to prevent silo-ing and to build capacity for PCMH and Domain 3 DSRIP requirements. This quarter, partner organizations began incorporating the COP into the protocols and implementation by the medical care providers and care teams of the sites of the participating organizations began. This milestone is on track for completion by DY2, Q4.
Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.	The COP includes a chapter on this topic, written in Policy & Procedure (P&P) format. It also includes Million Hearts resources, case studies of successful implementation and strategies to ensure that Medicaid patients are not charged a co-payment for blood pressure checks. The work will continue into this year, as part of the work of the CVD/Diabetes Implementation Work Group which is meeting for the first time in April. This milestone is on track for completion by DY2, Q4.
Ensure that all staff involved in measuring and recording blood pressure are using correct measurement techniques and equipment.	The COP includes a chapter on this topic. Education in correct blood pressure measurement has been identified as one of the elements of the consolidated training curriculum being developed by the Workforce Subcommittee. The Workforce subcommittee is prioritizing training of medical assistants and will incorporate BPHC's

	evidence-based practices in the curriculum. This was also a topic of the cross-PPS CVD learning consortium, which is a monthly call with members of 7 PPSs participating in the CVD project). Following the meeting selected resources were exchanged and the PPSs continue to provide updates on this work during the subsequent calls. Following the launch of this project in February, sites have been asked to identify any training currently conducted at their organization around this topic. This milestone is on track for completion by DY2, Q4.
Identify patients who have repeated elevated blood pressure readings in the medical record but do not have a diagnosis of hypertension and schedule them for a hypertension visit.	As part of their Q2 work, the CVD/Diabetes TWG considered and recommended that the CVD component of the PPS-wide, cross-project registry being developed should be used to fulfill this requirement. As such, the data elements required to fulfill this task were considered and included in the data elements recommended for inclusion in the draft a PPS-wide strategy which was presented to and approved by the Quality and Care Innovation Subcommittee (QCIS) this quarter. Additionally, the Clinical Operations Plan (COP) includes a chapter on this specific activity (which should be fulfilled with the cross-project registry), written in Policy & Procedure (P&P) format. The COP was presented and distributed to all partners at the CVD/Diabetes Project Launch in February. This milestone is on track for completion by DY2,Q4.
Prescribe once-daily regimens or fixed-dose combination pills when appropriate.	The Clinical Operations Plan (COP) includes a chapter on this topic, written in Policy & Procedure (P&P) format, based on the CVD/Diabetes TWG's recommendation that where patients' insurance status allows and it is medically appropriate, PCPs will preferentially prescribe combination drugs, once-daily formulations, and 90-day supplies. Additionally, the COP included the recommendation by the TWG that where adherence is an issue, BPHC will assist patients in finding pharmacies that offer blister packs, and pill boxes, etc. Quality and Care Innovation Subcommittee (QCIS) approved this for adoption this quarter. The COP was presented and distributed to all partners at the CVD/Diabetes Project Launch in February. This milestone is on track for completion by DY2,Q4.
Document patient driven self-management goals in the medical record and review with patients at each visit.	The Clinical Operations Plan (COP) includes a chapter on this topic, written in Policy & Procedure (P&P) format, based on the CVD/Diabetes TWG's recommendation. The recommendations were based on and aligned with the NCQA PCMH 2013 guidance on patient self-management goals. As part of patient engagement data collection, BPHC conducted meetings with SBH and Montefiore to identify the current documentation for such goals and identify methods to allow for structured, consistent data collection in the future. The COP was presented and distributed to all partners at the CVD/Diabetes Project Launch in February. This milestone is on track for completion by DY2,Q4.
Follow up with referrals to community based programs to document participation and behavioral and health status changes.	The Clinical Operations Plan (COP) includes a chapter on this topic in the project "cross-cutting" section. Operationalizing this requirement will be a key activity for the CSO over the next year. This milestone is on track for completion by DY2,Q4. The Community-based organizations (CBOs) engagement task force and BPHC CBO staff have been in the process of developing a web based directory of CBO/Social service providers. In coordination with these partners, the PPS is creating a directory of available services that will be searchable by zip code and service to be shared throughout the network. BPHC in coordination with its partners continues to identify and compile a list of most frequently referred organizations to that will be shared with the CBO task force. Documentation and workflows for making closed loop referrals to CBOs have been created as part of the Clinical Operations Plan (COP). BPHC is developing relationship and moving towards establishing formal partnerships with Health Home Care Management Agencies (CMAs). CBOs that provide supportive housing, respite services as well as behavioral health treatment services have been engaged to provide specific transition assistance as part of Project 2.b.iv. More formal partnerships are in progress with those organizations as well. In particular, an effort is being made to provide assistance to homeless patients and those experiencing a behavioral health crisis. BPHC is leveraging best practices developed by a SBH team participating in the Medicaid Accelerated eXchange (MAX) series to establish more formal referral partnerships with providers of behavioral health respite providers and transitional housing. Milestone is on track for completion in DY2, Q4.
Develop and implement protocols for home blood pressure monitoring with follow up support.	The Clinical Operations Plan (COP) includes a chapter on this topic, written in Policy & Procedure (P&P) format, based on the CVD/Diabetes Transitional Work Group (TWG)'s recommendation. The COP identifies the Million Hearts guidelines for Self-Measured Blood Pressure Monitoring as the minimum SBPM program. All patients with hypertension must be prescribed a self-blood pressure monitor (SBPM). Practices are also strongly recommended (but not required) to carry out telephonic titration of blood pressure medications by a non-traditional provider (RN or Pharmacist) via standing orders or titration algorithms, which can be standardized for the practice or customized by the PCP for the specific patient. The COP was presented and distributed to all partners at the CVD/Diabetes Project Launch in February. This milestone is on track for completion by DY2, Q4.
Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.	As part of their Q2 work, the CVD/Diabetes TWG considered and recommended that the CVD component of the PPS-wide, cross-project registry being developed should be used to fulfill this requirement. As such, the data elements required to fulfill this task were considered and included in the data elements recommended for inclusion in the draft a PPS-wide strategy which was presented to and approved by the Quality and Care Innovation Subcommittee (QCIS) last quarter. Additionally, the Clinical Operations Plan (COP) includes a chapter on this specific activity (which should be fulfilled with the cross-project registry), written in Policy & Procedure (P&P) format. The

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
	COP was presented and distributed to all partners at the CVD/Diabetes Project Launch in February. Policy & Procedure: Beginning next quarter, participating sites must identify the individual(s) responsible at each organization responsible for performing such work, and to identify a workflow to identify and outreach to such patients in line with the COP. This represents an interim solution while the cross-project registry referenced above is being implemented. This milestone is on track for completion by DY2, Q4.
Facilitate referrals to NYS Smoker's Quitline.	The Clinical Operations Plan (COP) includes a chapter on this topic, based on the CVD/Diabetes Transitional Work Group (TWG)'s recommendation. The COP was presented and distributed to all the participating member organizations of our PPS at the CVD/Diabetes Project Launch in February. BPHC policy states that PCPs should ask about tobacco use and willingness to quit for all patients 12 years and up at every visit while pediatricians should ask about the tobacco use status of adolescent patients and family members. Patients who indicate they smoke or use tobacco some days or every day should be advised to quit and the PCP (or another designated member of staff) should discuss and/or provide cessation methods or strategies with patients who indicate a willingness to quit, including a referral to the NYS Smokers Quitline (documented in EMR). Sites are working to assess the current state of any such referral and implement a workflow meeting the COP requirements; this work will continue through DY2 Q2, with EHR updates being implemented as part of a coordinated strategy beginning by DY2, Q3. This milestone is on track for completion by DY2, Q4.
Perform additional actions including "hot spotting" strategies in high risk neighborhoods, linkages to Health Homes for the highest risk population, group visits, and implementation of the Stanford Model for chronic diseases.	The Clinical Operations Plan (COP) includes a chapter on this topic, written in Policy & Procedure (P&P) format, based on the CVD/Diabetes Transitional Work Group (TWG)'s recommendation. The Clinical Operations Plan (COP) was presented and distributed to all the participating member organizations of our PPS at the CVD/Diabetes Project Launch in February. BPHC has begun contracting with Health People to provide training and implementation of the Stanford Model for chronic diseases and we are exploring the possibility of 'hot-spotting' to identify and host classes in high-need areas, as well as hosting them at or near our provider sites. Health People will work with our member organizations as part of Project 3.c.i. to identify patients with diabetes to receive training to become peer educators, and lead the Diabetes self-management courses. Recruiting and training is expected to begin in May, with classes beginning in July or August. Based on the success of this undertaking, BPHC is planning on expanding course offering to the Chronic Disease Self-Management Program as well. This milestone is on track for completion by DY5, Q4.
Adopt strategies from the Million Hearts Campaign.	The CSO has written and finalized the Clinical Operations Plan (COP) based on the CVD/Diabetes Transitional Work Group (TWG)'s approved selected patient educational materials and provider tools from the Million Hearts Patient Tools and Educational materials for inclusion as recommended resources. The COP was presented and distributed to all the participating member organizations of our PPS at the CVD/Diabetes Project Launch in February. These tools from the Million Hearts Patient Tools and Education materials include algorithms for BP treatment, non-traditional visits, self-management and motivational interviewing. Million Hearts resources were also included in the COP chapters on home blood pressure monitoring, and No Co-Payment Drop-In BP Checks. These recommendations have been approved by Quality and Care Innovation Subcommittee (QCIS). This milestone is on track for completion by DY5, Q4.
Form agreements with the Medicaid Managed Care organizations serving the affected population to coordinate services under this project.	BPHC's Chief Medical Officer has continued to make the topic of partnership/agreements with Medicaid Managed Care Organizations (MCOs) a priority topic at the regularly-scheduled cross-PPS Clinical Leadership Forum series hosted by Greater New York Hospital Association (GNYHA). BPHC plans to collect information on selected initiatives (e.g., self-blood pressure monitoring programs) to potentially support coverage of such programs/equipment by MCOs in the future. We are also working to align and prioritize our activities, particularly around outcome measures, with the HealthFirst performance measures. This milestone is on track for completion by DY5, Q4.
Engage a majority (at least 80%) of primary care providers in this project.	Last quarter, BPHC confirmed participation in the CVD project for its 7 largest primary care organization partners, who encompass the majority of our PCPs and more than 90% of our primary care visits. Practices must commit to participating in the CVD project in order to qualify for the Patient-Centered Medical Home (PCMH) transformation support funding (in receiving the expert PCMH consultants). In our second wave of provider engagement with smaller organizations, project participation materials continue to emphasize that 3.b.i is required for all adult primary care practices. This milestone is on track for completion by DY2, Q4.

Project 3.c.i – Evidence-based strategies for disease management in high risk/affected populations (adults only)

✓ IPQR Module 3.c.i.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

As we begin implementation, some practitioners may resist the imposition of standard treatment protocols and new workflows. It will also be challenging to implement 2014 PCMH Level 3 recognition . To mitigate these risks, we have brought together stakeholders to develop clinical operation plans (COPs) for all of the projects. These include evidence-based (EB) guidelines protocols for each disease-specific intervention. Implementation of these protocols will be part of contractual agreements between partners & the PPS. These COPs have been designed to align with the 2014 PCMH elements. The CSO has committed to providing technical and financial assistance, including IT support & training, to primary care practices as they work to attain PCMH Level 3 recognition. This includes resources toward project management staff at the participating organizations, and for PCMH "coaches."

Physicians & other PCMH care team members may not currently document self-management goals in the medical record as required, &/or they may be resistant to conducting additional documentation efforts. To address this risk, BPHC is working with our partners to update their respective EHRs to better capture this information consistently. In addition, the CSO may audit medical records to ensure that documentation is occurring.

As we begin building our care teams, recruiting and training sufficient care management staff to serve the needs of the Bronx population may be challenging. Recruiting Spanish-speaking care management staff will be a particular risk. BPHC's workforce strategy will be targeted towards mitigating this risk, such as through the CSO working with community colleges & coordinating with the 1199 Job Security Fund, Montefiore CMO, & NYSNA to identify capable workers & provide training in Spanish when needed. BPHC will also use alternative employment tactics, such as flexible hours, & job sharing, where feasible to attract a broader pool of workers.

Medication adherence is a chronic problem for individuals with chronic illness including those with CVD. Organizations that could be instrumental in helping patients with medication adherence, such as home care agencies & MCOs are handicapped by policies &/or regulations. To mitigate these risks, BPHC will work with MCOs to institute policy changes that will promote medication adherence.

Enhancing patient self-management & self-efficacy is anticipated to be a particular risk to the success of Project 3.c.i. It is challenging to effectively motivate & engage chronically ill patients over the long term to embrace changes in behavior & self-manage their condition, risks that are compounded in the Bronx population by low health literacy & educational attainment. Among its mitigation tactics, is working with Health People, a CBO that is a certified Stanford Model trainer. In addition, Project 3.c.i in conjunction with Projects 2.a.iii & 3.b.i will enable BPHC to invest in more peer educators, care managers, & certified diabetes educators to educate patients & promote self-management. Hard-to-reach patients require dedicated staff to bond with the patient, & consistency is important. Health Homes will provide valuable long-term follow up to promote engagement.

IPQR Module 3.c.i.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Benchmarks

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Implement evidence-based best practices for disease management, specific to diabetes, in community and ambulatory care settings.	The Clinical Operations Plan (COP) was presented and distributed to all the participating member organizations of our PPS at the CVD/Diabetes Project Launch in February. The COP is based on the DSRIP Domain 1 and 3 measures, using input from the CVD-Diabetes Transitional Work Group (TWG). It includes chapters on target population, evidence-based guidelines (EBGs), referral protocols, patient flows, care team roles, and patient/caregiver education and engagement. DSRIP Program Directors (DPDs), our embedded liaison/program lead at the largest 7 primary care organization partners, are beginning organization-specific processes to adopt evidence-based guidelines from the COP. The development of mechanisms for regular review of the EBGs is was approved by our BPHC Quality and Care Innovation Subcommittee in March. This milestone is on track for completion by DY3, Q4.
Engage at least 80% of primary care providers within the PPS in the implementation of disease management evidence-based best practices.	Last quarter, BPHC confirmed participation in the Diabetes project for its 7 largest primary care organization partners, who encompass the majority of our PCPs and more than 90% of our primary care visits. Practices must commit to participating in the Diabetes project in order to qualify for the Patient-Centered Medical Home (PCMH) transformation support funding (in receiving the expert PCMH consultants). In our second wave of provider engagement with smaller organizations, project participation materials continue to emphasize that 3.c.i is required for all adult primary care practices. This milestone is on track for completion by DY2, Q4.
Develop care coordination teams (including diabetes educators, nursing staff, behavioral health providers, pharmacy, community health workers, and Health Home care managers) to improve health literacy, patient self-efficacy, and patient self-management.	The model for care coordination teams was finalized last quarter and included in the Clinical Operations Plan (COP) for the Health Home At-Risk project (referenced in other project sections). The care coordination model was presented and distributed to all the participating member organizations of our PPS at the CVD/Diabetes Project Launch in February. This model includes the opportunity to add additional members of the care management team needed to fulfil the care coordination requirements of the diabetes project, including certified diabetes educators (CDEs), the need and funding for which is assessed and offered through our "Request for Information" (RFI) process. Since the implementation of team-based care is foundational to BPHC's primary care projects, this program launched last January to allow sites time to begin building their teams and making selected hires. The requirements of the Diabetes (and other primary care projects) were included in the assessment of need for additional staff members to prevent silo-ing and to build capacity for PCMH and Domain 3 DSRIP requirements. This quarter, partner organizations began incorporating the COP into the protocols and implementation by the medical care providers and care teams of the sites of the participating organizations began. This milestone is on track for completion by DY2, Q4.
Develop "hot spotting" strategies, in concert with Health Homes, to implement programs such as the Stanford Model for chronic diseases in high risk neighborhoods.	The COP includes a chapter on this topic, written in policy & procedure (P&P) format, based on the CVD/Diabetes Transitional Work Group's (TWG) recommendation. The Clinical Operations Plan (COP) was presented and distributed to all the participating member organizations of our PPS at the CVD/Diabetes Project Launch in February. BPHC has begun contracting with Health People to provide training and implementation of the Stanford Model for chronic diseases and we are exploring the possibility of 'hot-spotting' to identify and host classes in high-need areas, as well as hosting them at or near our provider sites. Health People will work with our member organizations to identify patients with diabetes to receive training to become peer educators, and lead the Diabetes self-management courses. Recruiting and training is expected to begin in May, with classes beginning in July or August. This milestone is on track for completion by DY5, Q4.
Ensure coordination with the Medicaid Managed Care organizations serving the target population.	BPHC's Chief Medical Officer has continued to make the topic of partnership/agreements with Medicaid Managed Care Organizations (MCOs) a priority topic at the regularly-scheduled cross-PPS Clinical Leadership Forum series hosted by Greater New York Hospital Association (GNYHA). BPHC had initial conversations with HealthFirst this quarter around the topic of the Stanford model. BPHC plans to collect information on selected initiatives (e.g., Lower Extremity Amputation Prevention, or LEAP, classes) to potentially support coverage of such programs by MCOs in the future. We are also working to align and prioritize our activities, particularly around outcome measures, with the HealthFirst performance measures. This milestone is on track for completion by DY5, Q4.
Use EHRs or other technical platforms to track all patients engaged in this project.	BPHC plans to use the RHIO/SHIN-NY for population health and reporting and these topics are included in the Clinical Operations Plan (COP). There is a regular weekly meeting between stakeholders from the Bronx RHIO and BPHC to formulate the strategy for use and implementation of the RHIO and SHIN-NY. Additionally, the four Bronx PPSs (BPHC, Bronx Lebanon, HHC OneCity, ACP) meet monthly to discuss shared efforts and are working unified strategy for Qualifying Entity (QE) Engagement, including communications, operations and training. Improving RHIO consent penetration is one of the highest priority areas for BPHC in DY2, and we are exploring various solutions including leveraging our community-based organizations (CBOs) network. This milestone is on track for completion by DY2, Q4.
Meet Meaningful Use and PCMH Level 3 standards and/or ACPM by the end of Demonstration Year 3 for EHR systems used by participating safety net providers.	We are executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes EHR support and connectivity of data captured therein. A process has been started already to ensure all applicable providers meet PCMH recognition and MU accreditation and that we meet our obligation to the previously agreed tasks. We have hired and deployed expert PCMH consultants to perform detailed gap analyses with about 100 practices, with 80 locations already evaluated thus far. Funding has been earmarked for IT expansion and process for this funding's distribution have been developed and communicated to the member organizations. Schedule As (i.e., contracts) have been developed to distribute some of this funding as a result of the process. A MU strategy

Project 3.d.ii – Expansion of asthma home-based self-management program

✓ IPQR Module 3.d.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

Throughout DSRIP, BPHC will seek to address risks to the implementation of Project 3.d.ii using the mitigation strategies described below. (1) Parents and caregivers are unaware of symptoms that can lead to exacerbations and do not act fast enough to prevent an incident resulting in an ED visit. During home visits, community health workers (CHWs) will emphasize the importance of consistent medication use to control asthma and will demonstrate use of medication delivery devices. (2) This project is heavily reliant on CHWs being able to conduct home visits to inspect homes and engage and educate the target population. The experience of our primary vendor for this project, a.i.r nyc, indicates that 50% of affected individuals that they reach out to do not initially accept a home visit. This risk is most acute among the undocumented immigrant population. Trust building will require time, persistence, and tactics that are culturally sensitive and address the specific concerns of each family. To tackle this challenge, a.i.r nyc recruits CHWs from the geographic and ethnic communities to be served. CHW training focuses on building client trust, cultural competency, and positive impact of persistence as key to overcoming patients' fear. Additionally, we plan to "market" a.i.r. nyc services and to elevate their "brand" as a trusted partner to physicians, schools, and community organizations that have earned a high degree of community trust. As part of establishing this link, a.i.r. nyc will conduct an orientation on its services for sites identified as key referral sources to the project. A tactic may include incorporating logos of trusted PPS partners, including CBOs, on outreach and educational materials disseminated to patients. (3) Another challenge this project will face is integrating CHWs into two critical asthma patient contact points: hospital emergency departments (EDs) and discharge planning units. The experience of a.i.r nyc strongly suggests that effective integration will require a communication plan, including a clinician orientation, that educates ED and discharge planning staff on the goals, strategies, tactics and proven value of the intervention. (4) Capacity building will be a challenge for this project. a.i.r. nyc, our partner and vendor for this project, currently has a small staff and is planning to scale up its work to meet the needs of our PPS's patient population. To mitigate the risks associated with a.i.r. nyc's rapid expansion, BPHC's CSO will work with the organization to ensure that staff support and funding is available to rapidly plan, recruit, train and deploy CHWs to the field on a schedule that aligns with the patient engagement speed goals we have established. (5) Most providers do not have asthma registries or electronic care plan tools and do not participate in the RHIO to permit information sharing across providers. BPHC's CSO will address these issues by adding new IT capabilities, including a care planning and management platform and patient registries, and promoting RHIO participation. (6) Lifestyle choices could pose a challenge to patient compliance (e.g., passive smoking, environmental factors acting as asthma triggers such as pests, molds, etc.). Mitigation will include Community Health Workers referring patients and families to Quitline, for integrated pest management (IPM) services, etc.

IPQR Module 3.d.ii.2 - Patient Engagement Speed

Instructions :

Enter the number of patients actively engaged through the current quarter. The number entered into the "Quarterly Update" area needs to reflect the cumulative method of counting within a DSRIP year. For example, the number reported in this field for DY1 Q4 should include patients previously reported in DY1 Q3 plus new patients engaged in DY1 Q4. Any explanations regarding altered or missed patient commitments must be included within the narrative box, not as text within uploaded documentation.

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
Expand asthma home-based self-management program to include home environmental trigger reduction, self-monitoring, medication use, and medical follow-up.	BPHC continued to develop the strategy for this project with the support of its partner (and vendor) a.i.r. nyc, a community-based organization (CBO) with 10 years' experience in providing asthma home-based services. The contract with a.i.r. nyc, for the delivery of home-based asthma services was completed in March. In this quarter, the Clinical Operations Plan (COP) was presented and distributed to all the participating member organizations of our PPS at the Asthma Launch on March 11. This milestone is on track for completion by DY3, Q2.
Establish procedures to provide, coordinate, or link the client to resources for evidence-based trigger reduction interventions. Specifically, change the patient's indoor environment to reduce exposure to asthma triggers such as pests, mold, and second hand smoke.	The Clinical Operations Plan (COP) was presented and distributed to all the participating member organizations of our PPS at the Asthma Launch on March 11. The COP includes the evidence-based recommendations of the Task Force on Community Preventive Services for home-based, multi-trigger, multi-component interventions with an environmental focus. The COP also includes procedures for the referral of patients to a.i.r. nyc, as well the training that a.i.r. nyc's community health workers (CHWs) receive to perform such an assessment and the template for the Asthma Action plan which outlines steps to be taken to reduce exposure. This milestone is on track for completion by DY2, Q4.
Develop and implement evidence-based asthma management guidelines.	Clinical evidence-based guidelines (EBGs) and home-based services for asthma care and management were developed by our Asthma Transitional Work Group and recommended to the Quality and Care Innovation Subcommittee (QCIS) for adoption last quarter. The QCIS approved both sets of guidelines, and were incorporated into the Clinical Operations Plan (COP). The COP was presented and distributed to all the participating member organizations of our PPS at the Asthma Launch on March 11. Following the launch, the DSRIP Program Directors (DPDs), who are the embedded DSRIP liaison/coordinator for CSO at the largest 7 primary care organizations, have begun organization-specific processes to adopt evidence-based guidelines from the COP. The development of mechanisms for regular review of the EBGs was approved by our BPHC QCIS in March. This milestone is on track for completion by DY2, Q4.
Implement training and asthma self-management education services, including basic facts about asthma, proper medication use, identification and avoidance of environmental exposures that worsen asthma, self-monitoring of asthma symptoms and asthma control, and using written	a.i.r. nyc, our partner and vendor for the Asthma project, completed a comprehensive "Training & Practicum for Asthma Care Delivery in the Home Setting" last quarter. This guide contains thorough references to peer-reviewed literature to support its training and education strategy and complies with the National Standards for Asthma self-management. Our Clinical Integration Plan (COP) for asthma includes a chapter on patient education outlining the curriculum and specific resources. We expect excellent results for this milestone as a.i.r. nyc has 10 years of experience in the field and is recognized across the city as a leader in the area of training and comprehensive asthma

Prescribed Milestones Narrative Text

Milestone Name	Narrative Text
asthma action plans.	self-management education. This milestone is on track for completion by DY2, Q4.
Ensure coordinated care for asthma patients includes social services and support.	The Asthma Clinical Integration Plan (COP) includes chapters on clinical and care management protocols. The model for care coordination was finalized this quarter and included in the COP for the Health Home At-Risk program project (it is referenced in the asthma COP). The care team model is adaptable to add other people, including nursing staff, pharmacists, dieticians and community health workers. BPHC is also developing processes for close coordination with the a.i.r. nyc team. a.i.r. nyc Community Health Workers (CHWs) use evidence-based guidelines to directly engage an asthma patient in a series of action steps that lead to better health. CHW training focuses on four subject matters, including self-management education, social support services, care coordination and environmental assessment, education and mitigation. Asthma was identified as one of the priority areas for the Health Home At-Risk work. Since the implementation of team-based care is foundational to BPHC's primary care projects, this project launched last January to allow sites time to begin building their teams and making selected hires to build capacity for PCMH and Domain 3 (Chronic Disease Management) DSRIP requirements. The COP also includes chapters on the roles and responsibilities of a.i.r. nyc and workforce at sites, including tracking and reporting. Hiring for the care coordinator roles began at the partner sites this quarter and will continue through DY2. The planning for implementation of the system to support care coordination (Acupera) has continued this quarter as well. Montefiore Care Management Organization (CMO) and SBH, along with Encore Consulting is leading the efforts. They have conducted level-set discussions with BPHC to understand existing, ongoing initiatives and work to date. We are working together to establish the near-term plan for Acupera system implementation and identify preliminary scoping. In parallel, contract or MSA discussions restarted in February. This is on track for completion by DY3, Q2.
Implement periodic follow-up services, particularly after ED or hospital visit occurs, to provide patients with root cause analysis of what happened and how to avoid future events.	The Asthma Clinical Operations Plan (COP) was presented and distributed to all the participating member organizations of our PPS at the Asthma Launch on March 11. The COP dedicates chapters on root cause analyses after ED visits to avoid future events, including protocols on follow-up services. Implementing population health workflows is a key focus area for DY2. This is on track for completion by DY2, Q4.
Ensure communication, coordination, and continuity of care with Medicaid Managed Care plans, Health Home care managers, primary care providers, and specialty providers.	The model for care coordination was finalized last quarter and included in the Clinical Operations Plan (COP) for the Health Home At-Risk project (it is referenced in the asthma COP). The COP was presented and distributed to all the participating member organizations of our PPS at the Asthma Launch on March 11. Additionally, BPHC is developing an overarching, cross-project strategy for referrals to and communication between Health Home care managers, PCPs, specialty providers, contracted CBOs and potentially clinical pharmacists. Independent of the DSRIP work, HealthFirst has begun a pilot program with a.i.r. nyc recently to fund home-based asthma care, which may serve an impetus for other managed care organizations (MCOs) to similar fund these services. BPHC has continued discussion around identification of BPHC HealthFirst patients and will continue this work in future quarters. BPHC's Chief Medical Officer has made the topic of partnership/agreements with Medicaid MCOs a priority topic at the regularly scheduled cross-PPS meetings hosted by Greater New York Hospital Association (GNYHA), so some of these agreements may likely be a collaboration with other PPSs. This is on track for completion by DY3, Q2.
Use EHRs or other technical platforms to track all patients engaged in this project.	Tracking of actively engaged patients will be a coordinated effort between referring sites and a.i.r. nyc. It was presented at the Asthma project launch on March 11 and reviewed in detail in a webinar held on March 28. Actively engaged patients will be tracked by both the referring organization as well as a.i.r. bronx and and reported using data from a.i.r. nyc's case management system, which is built using the Salesforce platform. Finalization of initial closed-loop referral processes between a.i.r. nyc and providers is on track for completion in DY2 Q1. The milestone is on track for completion by DY2, Q4.

Project 4.a.iii – Strengthen Mental Health and Substance Abuse Infrastructure across Systems

✓ IPQR Module 4.a.iii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The primary risk associated with this project is that substance abuse and mental health services are siloed. The CNA identified pronounced silos in care, despite the co-morbidities in MH and SA. Further, various evidence-based trainings focus exclusively on mental health concerns. To mitigate this risk, BPHC and its MHP Collaborative Workgroup PPS partners – Community Care of Brooklyn, OneCity Health, and Bronx Health Access – will include content experts and substance abuse trainings/materials that address prevention of overdose and unprotected sex and other risky behaviors into core programming. Another risk is that PPS partners will be challenged in collaborating with NYC Department of Education (DOE). The PPSs have identified strong synergies between this project and DOE programming, such as DOE's investments in mental health infrastructure in approximately 100 community/renewal schools City-wide, but they will need to actively engage DOE to succeed in DSRIP-related transformations. The Workgroup has already been addressing this risk by engaging the Director of School Mental Health Services with the City's Office of School Health and individuals with the New York City Department of Health and Mental Hygiene (DOHMH) as advisory members of the Workgroup. The PPS partners will continue to engage both DOE and DOHMH in developing their approach to programming and staffing. Additional risks are that PPSs will lack the robust data set required to measure progress against goals and serve as an evidence base to demonstrate the cost-effectiveness of the activities and, relatedly, that MHP activities will not be sustainable beyond the demonstration period. The intervention aims to develop long-standing, sustainable school-based infrastructure to address MHP needs. Specifically, rather than engage in any direct delivery of care, the PPSs will enhance schools' resources to manage MHP needs for current and future students. The project design utilizes cost-effective staffing plans and trainings to prepare non-MD school-based staff to serve as effective coaches. Further, the PPSs have committed to working together to build an evidence-base to document results and cost-effectiveness. The PPSs have identified certain performance metrics, such as reductions in schools suspensions and 911 calls, that will be tracked. MCOs, SDOH, and DOE will be engaged in discussions regarding the program's cost-effectiveness and how to finance DSRIP staff and their related school-based activities under a value based payment system post-DSRIP. Another possible risk is that school-based staff will be disengaged, based on their own biases or misunderstanding of MHP-related disease, or fears of being held responsible for individual student outcomes related to MHP issues. To mitigate this risk, partnerships with teachers and school staff will be established at the ground level. Staff trainings will address issues like bias and stigma and will educate staff on the nature of MHP conditions. The PPSs will also train school-based staff on when to refer students with potentially more serious problems to available referral channels and help to ensure warm handoffs to appropriate community-based MHP services. Another possible risk is that BPHC will not be able to sustain a high level of commitment towards the project over the demonstration period. To mitigate this risk, the PPSs have made commitments, memorialized in a joint charter, to engage the MHP Collaborative Workgroup over the entire demonstration period to spearhead programming. The Workgroup's experience to date reflects a high level of engagement and interest that the PPSs intend to sustain.

PPS Defined Milestones Narrative Text

Milestone Name	Narrative Text
Participate in citywide MHSA Workgroup meetings	Update: Bronx Partners for Healthy Communities (BPHC) staff have continued to participate in all meetings of the cross-PPS collaborative. The Jewish Board for Family and Children Services (JBFCS) has begun to manage the implementation of this shared project. The cross-PPS collaborative will continue to meet regularly to vet plans and provide input on project implementation, led by JBFCS. At the MHSA Joint Planning Meeting, on February 13, 2015, Rahil Briggs introduced Montefiore's Behavioral Health Integration Program (BHIP). The audience included representatives from the PPS's, the Department of Health and Mental Hygiene (DOHMH), the Office of School Health (OSH), a joint program of the New York City Department of Education (DOE) and the DOHMH that provides health and preventive services to DOE students, and Manatt. The introduction led to further discussion about extending Montefiore's model to the school-based setting. This cross-PPS group continued to meet regularly to develop, implement, and monitor the collaborative MHSA interventions. Milestone is complete.
Establish cross-PPS Collaboration structure	Update: To complete this milestone ahead of schedule, Bronx Partners for Healthy Communities (BPHC) committed to the cross-PPS collaborative, including agreeing to the 'DSRIP MHSA Collaboration Agreement,' which outlines the governance structure of the cross-PPS workgroup. We also included the New York City Department of Health and Mental Hygiene (DOHMH), the New York City Department of Education (DOE), and the Office of School Health (OSH), a joint program of the DOE and DOHMH, in the development of the collaboration agreement, as they are major stakeholders in this project. Roles and responsibilities for all involved parties were defined and will guide the collaboration going forward. The inclusion of the city and state agencies in this process ensured subject-matter experts were participating and MHSA will be bolstered by their other initiatives on an ongoing basis. The project scope and deliverables were outlined in the collaboration agreement; this will guide the implementation of the project. Milestone completed on 12/31/2015 (DY1 Q3).
Review of existing programs	Update: Upon the review of existing programs and CBOs providing MHSA services, Bronx Partners for Healthy Communities (BPHC) recommended that the cross-PPS utilize Montefiore Medical Center's (MMC's) Behavioral Health Integration Program (BHIP) to inform the development of this project. The integrated program by MMC is the largest program for youth/adolescents in the country, which offers mental health services to more than 90,000 children across 19 clinics in the Bronx. In addition to BPHC's recommendation, the MHSA workgroup reviewed Maimonides Medical Center's Urgent Evaluation Service (UES), the Children's Hospital of Eastern Ontario's (CHEO) Urgent Care Service, and the rapid screening tool Home, Education, Activities/Peers, Drugs/Alcohol, Suicidality, Emotions/Behavior, Discharge Resources (HEADS ED). The workgroup stressed that the core universal interview should focus on better equipping school-based staff to address MHSA needs. The workgroup also suggested the use of a collaborative care-based model, like those reviewed could be adapted to fit this school-based intervention. The findings, along with workgroup suggestions, were incorporated into the concept paper that was drafted by the workgroup. Milestone is complete.
Develop operations plan	Update: The lead agency for the cross-PPS MHSA, Jewish Board for Family and Children Services (JBFCS) was selected based on their in-depth experience and resource-readiness articulated in response to the Request for Proposals (RFP). Their proposal was developed from the workgroup's concept paper, and included a detailed operational plan, project staffing and training curriculum, and the selection process for schools and community-based agencies. The contract with JBFCS has been fully executed on February 29, 2016. The concept paper drafted by the workgroup, with input from the New York City Department of Health and Mental Hygiene (DOHMH), the Department of Education (DOE), and the Office of School Health (OSH), a joint DOHMH and DOE program, was vetted with the lead agency, as they used it to inform their proposal. It was also vetted and approved by all participating PPS's leadership. Milestone is on track for completion by DY2 Q4.
Implement Collaborative Care (CC) Adaptation in schools	Update: The lead agency, in collaboration with New York City Department of Education (DOE) and the four participating PPSs have outlined the process of identifying evidence-based guidelines, training plans, school recruitment, staff recruitment, and project launch. The New York City Department of Health and Mental Hygiene (DOHMH), the New York City Department of Education (DOE), and the Office of School Health (OSH), a joint DOHMH and DOE program are key stakeholders in MHSA, as their current

	efforts will be bolstered, while also informing them of additional needs in the community. The Jewish Board for Family and Children Services (JBFCS), in their lead agency proposal, included the school and community-based agency selection process; this will guide the lead agency in the forming of contractual agreements for sites participating in MHSA. JBFCS plans to use a geographic or other natural community cluster approach to school selection. Milestone is on track for completion by DY3 Q2.
Design programs for young adults	UPDATE: The cross-PPS workgroup has discussed this milestone with the lead agency, Jewish Board for Family and Children Services (JBFCS). Initial project outlines have been created, but further planning is tabled until this milestone begins in DY2 Q3.

Project 4.c.ii – Increase early access to, and retention in, HIV care

✓ IPQR Module 4.c.ii.1 - Major Risks to Implementation and Mitigation Strategies

Instructions :

Please describe what the major risks are for this project, as well as the actions you plan to take to mitigate them.

The first major risk for this project is that the target population, HIV-positive individuals within the PPS service area, can be difficult to locate. HIV patients have a high prevalence of substance use disorder, homelessness, chronic trauma, behavioral health diagnoses and other chronic co-morbid conditions (e.g., diabetes, heart disease). Moreover, HIV disproportionately impacts ethnic/racial and gender minorities who often face stigma both in their communities and by providers. As a result, they may have to travel far from their community to receive culturally responsive care, which is not always feasible. To mitigate this risk, we plan to work closely with BPHC partners to identify HIV-positive individuals wherever they currently access services. We will ensure that partners have information about how to link these patients to appropriate care, not only for HIV services but to manage other conditions as well. We will also develop and provide training in cultural competency for providers and support staff, to expand the number of welcoming care delivery sites for HIV-positive individuals. Finally, we intend to establish peer support programs, particularly in ethnic/racial minority communities, as peers are often more effective in helping patients overcome cultural barriers to care. The second major risk for this project is that the demographics of the populations most in need of linkages to HIV services may change over time. To mitigate this risk, we intend to continue working with the Domain IV HIV Collaborative Workgroup which was formed by the PPSs during the Application Planning phase. Through this group we will continue to share information about new hotspots in local communities in order to recognize new trends early on. Once new sub-populations are identified, we will work together to adapt interventions and outreach strategies accordingly. The third major risk for this project is that PPSs will work in silos, creating a duplication of efforts and confusion for downstream providers. To mitigate this risk, the cross-PPS HIV Workgroup will continue collaborating to ensure that the PPSs effectively share knowledge, experience, and perspectives, to avoid service duplication, and improve project design and implementation. To be most effective we will need to ensure coordination across organizations and initiatives. This will entail breaking down silos between healthcare and supportive service providers as well as silos between providers offering the same services. For example, there are a number of community-based organizations that are instrumental in HIV care, but silos often lead to ineffective working relationships, lack of care coordination, and gaps in care. Organizations providing the same type of services (e.g., HIV testing) are also often unaware of how peer organizations provide the same services, therefore missing opportunities to share best practices and identify potential areas of collaboration. This is not efficient and can be confusing and detrimental to patients. We have a number of actions planned to break down silos. First, we plan to meet with all BPHC partners providing HIV services to get a better sense of current HIV work happening across the PPS. We will also continue meeting with the citywide cross-PPS HIV workgroup to foster continued collaboration and sharing of promising practices. Throughout the next five years, we will continue meeting with providers, colleagues and stakeholders to ensure that we remain coordinated, sharing challenges and best practices across all providers. Finally, we will leverage the workgroup to make progress toward alignment on common language and best practices whenever possible, in order to promote a standard for HIV-providers across the city.

SBH Health System (PPS ID:36)

Milestone/Task Name	Status	Description	Original Start Date	Original End Date	Start Date	End Date	Quarter End Date	DSRIP Reporting Year and Quarter
Collaborative								
Milestone Develop adherence protocol and staffing plans	In Progress	Engage with HHs and CM agencies to develop plans for PHM to improve retention in care and medication adherence to support VLS	09/01/2015	03/31/2017	09/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Develop workplan for Retention to Care Unit	In Progress	Retention to Care Unit will be comprised of Care Managers and peer workers to reach clients who have not achieved VLS, to supplement the care coordination that HHs and their partnering CM agencies are doing.	09/01/2015	03/31/2016	09/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task Review and develop protocols for evidence-based guidelines	Completed	Engage HHs and CM agencies in HIV workgroup (from milestone 1) to review evidence-based guidelines and develop protocols	09/01/2015	03/31/2016	09/01/2015	03/31/2016	03/31/2016	DY1 Q4
Task Establish partnerships	Completed	Establish partnerships with and participation of needed social service agencies and community resources that cover issues such as housing, substance abuse, Mental, Emotional and Behavioral health (MEBH), domestic violence, food access, etc.	02/01/2016	03/31/2016	02/01/2016	03/31/2016	03/31/2016	DY1 Q4
Task Identify sites for VLS intervention implementation	Not Started	Identify HHs and CM agencies to implement VLS interventions	04/15/2016	06/30/2016	04/15/2016	06/30/2016	06/30/2016	DY2 Q1
Task Conduct a gap analysis	In Progress	Conduct a gap analysis on staffing and resource needs	09/01/2015	06/30/2016	09/01/2015	06/30/2016	06/30/2016	DY2 Q1
Task Hire and train staff	Not Started	In conjunction with Workforce Subcommittee, recruit, hire and train existing and new staff. Include cultural competence around LGBTQ community and SUD.	05/01/2016	12/31/2016	05/01/2016	12/31/2016	12/31/2016	DY2 Q3
Task Recruit peer leaders	Not Started	Identify peer leaders who have achieved VLS to co-facilitate support groups, assist with education and outreach, and act as escorts for appointments	07/01/2016	03/31/2017	07/01/2016	03/31/2017	03/31/2017	DY2 Q4
Task Establish Retention to Care Unit.	Not Started	Establish Retention to Care Unit with trained staff and peer supports	04/01/2016	03/31/2017	04/01/2016	03/31/2017	03/31/2017	DY2 Q4
Task Implement interventions	Not Started	Identify and implement interventions targeting high-needs populations	09/01/2016	03/31/2017	09/01/2016	03/31/2017	03/31/2017	DY2 Q4
Task Develop and implement plans for CQI	Not Started	Develop feedback mechanisms for accountability and continuous quality improvement	09/01/2016	03/31/2017	09/01/2016	03/31/2017	03/31/2017	DY2 Q4
Milestone Utilize EHR and other IT platforms for population health management	In Progress	Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.	04/01/2015	03/31/2017	04/01/2015	03/31/2017	03/31/2017	DY2 Q4
Task Define population health management requirements	Completed	Define population health management (PHM) requirements, establish PHM function and recruit or contract with partner for PHM staff	04/01/2015	12/31/2015	04/01/2015	12/31/2015	12/31/2015	DY1 Q3

PPS Defined Milestones Narrative Text

Milestone Name	Narrative Text
Implement evidence based best practices for disease management, specific to HIV and viral load suppression, in community and	Update: The CSO has been actively engaging partners and the HIV Implementation Work Group (IWG) to develop and implement an evidence- and need-based program around retention to care and viral load suppression. Through this engagement clinical champions have been identified and are participating in the IWG, most notably the IWG

PPS Defined Milestones Narrative Text

Milestone Name	Narrative Text
ambulatory care settings.	Chair, Dr. Ed Telzak, who is Chair of SBH Health Systems' Department of Medicine and former HIV Director at Bronx Lebanon. With the approval of the IWG, the CSO has established a collaboration with NY Links of the AIDS Institute to design and implement a Regional Group around performance improvement in HIV care, with a specific emphasis on the State's Prevention Agenda/DSRIP measures. A draft assessment has been developed for review by the IWG and will be completed in DY2Q1, this task, "Prepare and disseminate gap analysis tool based on Clinical Operations Plan to participating providers to determine implementation support needs," is being pushed back as planning for HIV projects have been on hold due to extended time that has been required for the cross-PPS Coalition to establish the governance structure. The cross-PPS Coalition is now actively identifying priorities and areas of collaboration which will inform how each PPS will implement their local projects. Additionally, the task, "submit elements of implementation plan and timelines for Quality and Care Innovations Subcommittee approval" is being pushed back into DY2Q2 to allow time for more comprehensive assessments to be completed and the project implementation plans developed reflecting participant input. Although tasks must be pushed back to accommodate collaborative planning, this milestone is on track for completion.
Participate in a NYC cross-PPS Collaborative	Update: The New York City Department of Health and Mental Hygiene (DOHMH) will act as convener for the cross-PPS HIV Coalition. Bronx Partners for Healthy Communities (BPHC) is actively participating in meetings with the cross-PPS HIV Coalition. The cross-PPS Coalition is currently working towards establishing standing committees around topics where the PPSs can collaborate. These committees will decide how the PPSs will work together and develop associated workplans. All tasks in this quarter are pushed back to DY2Q1 as the cross-PPS Coalition had many challenges coordinating meeting times and required longer than expected to establish the governance structure for the Coalition. Presently the HIV Cross-PPS Coalition is focused on establishing standing committees around areas for potential collaboration. Although tasks must be pushed back to accommodate cross-PPS project development, this milestone is on track for completion.
Develop adherence protocol and staffing plans	Update: HIV Health Home and Care Management providers have been invited to join the HIV Implementation Work Group (IWG). Representation from Montefiore, Albert Einstein, Morris Heights Health Center, SBH Health System that participate in the Bronx Accountable Health Network (BAHN) Health Home are members of the IWG. The downstream care management agencies (CMAs) are also represented by Morris Heights Health Center, Montefiore Medical Center, Institute for Family Health, and Boom! Health are also members of the IWG to provide oversight and guidance on project development and implementation. The task around developing a workplan for Retention to Care Unit must also be pushed back to DY2Q1 to accommodate collaborative planning. Partnerships with community-based organizations are being developed and strengthened through the assessment and engagement process with NY Links, Bronx Partners for Healthy Communities (BPHC) already has an extensive roster of CBOs with whom partnerships will be facilitated for this project. BPHC is working closely with its ACO partners and has undertaken a process to engage Health Homes in the Integrated Delivery System, utilizing existing capabilities to deepen PPS-wide clinical integration. The Vice President of Montefiore's Pioneer ACO is a member of BPHC's Executive Committee and our work is informed by Pioneer's experience building an integrated care management network. This milestone is on track for completion.
Utilize EHR and other IT platforms for population health management	We are executing a comprehensive plan to support our safety net providers in Meaningful Use (MU) and Patient-Centered Medical Home (PCMH) which includes use of targeted patient registries in conjunctions with our clinical projects. We have a comprehensive strategy in place for care management which includes the uses of registries, EHRs and IT platforms, and the completion of all agreed upon tasks on schedule. Last quarter we signed an agreement with the Bronx RHIO for services which will support population health management. We are confident that we are also very close to securing a Care Coordination and Management System (CCMS, Acupera) for the PPS. Our major partners are already sharing data with the Bronx RHIO and anticipate the quality and quantity of this data to increase. We have begun participating in beta-testing of Spectrum, Bronx RHIO's data analytics tool, onto which we will develop our population health management (PHM) platform. We are also simultaneously exploring potentials to utilize the MAPP/Salient resources to use as additional PHM source. Furthermore, a comprehensive Bronx RHIO patient consent strategy is increasing our attributed member participation in data-sharing and data agreements between member organizations are creating an environment where PHM will be easier to implement. Some specific metrics have also been prioritized during the Bronx RHIO contract negotiations. BPHC also deployed a rapid cycle evaluation (RCE) program and selected some measures which will promote PHM. The milestone is on track for completion.
Implement peer-based supports	There is currently no narrative around this milestone and its associated tasks, as the start date is DY3 Q1.

Attestation

The Lead Representative has been designated by the Primary Lead PPS Provider (PPS Lead Entity) as the signing officiate for the DSRIP Quarterly Report. The Lead Representative has the authority to complete this attestation on behalf of the PPS network. The Lead Representative and PPS Lead Entity are responsible for the authenticity and accuracy of the material submitted in this report.

The Lead Representative of the Performing Provider System (PPS) must complete this attestation form in order for the project application to be accepted by the NYS Department of Health. Once the attestation is complete, the Quarterly Report will be locked down from any further editing. Do not complete this section until the entire Quarterly Report is complete.

If the Quarterly Report becomes locked in error and additional changes are necessary, please use the contact information on the Home Page to request that the Quarterly Report be unlocked.

To electronically sign this Quarterly Report, please enter the required information and check the box below:

I here by attest, as the Lead Representative of the 'SBH Health System', that all information provided on this Quarterly report is true and accurate to the best of my knowledge, and that, following initial submission in the current quarterly reporting period as defined by NY DOH, changes made to this report were pursuant only to documented instructions or documented approval of changes from DOH or DSRIP Independent Assessor.

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Section	Module Name / Milestone #	Review Status	
Section 01	Module 1.1 - PPS Budget Report (Baseline) - READ ONLY	Pass & Complete	
	Module 1.2 - PPS Budget Report (Quarterly)	Pass & Ongoing	
	Module 1.3 - PPS Flow of Funds (Baseline) - READ ONLY	Pass & Complete	
	Module 1.4 - PPS Flow of Funds (Ongoing) - DEFUNCT MODULE - READ ONLY	Pass & Ongoing	
	Module 1.5 - Prescribed Milestones		
	Milestone #1 Complete funds flow budget and distribution plan and communicate with network	Pass & Complete	
Section 02	Module 2.1 - Prescribed Milestones		
	Milestone #1 Finalize governance structure and sub-committee structure	Pass & Complete	
	Milestone #2 Establish a clinical governance structure, including clinical quality committees for each DSRIP project	Pass & Complete	
	Milestone #3 Finalize bylaws and policies or Committee Guidelines where applicable	Pass & Complete	
	Milestone #4 Establish governance structure reporting and monitoring processes	Pass & Complete	
	Milestone #5 Finalize community engagement plan, including communications with the public and non-provider organizations (e.g. schools, churches, homeless services, housing providers, law enforcement)	Pass & Complete	
	Milestone #6 Finalize partnership agreements or contracts with CBOs	Pass & Ongoing	
	Milestone #7 Finalize agency coordination plan aimed at engaging appropriate public sector agencies at state and local levels (e.g. local departments of health and mental hygiene, Social Services, Corrections, etc.)	Pass & Ongoing	
	Milestone #8 Finalize workforce communication and engagement plan	Pass & Complete	
Milestone #9 Inclusion of CBOs in PPS Implementation.	Pass & Ongoing		
Section 03	Module 3.1 - Prescribed Milestones		
	Milestone #1 Finalize PPS finance structure, including reporting structure	Pass & Complete	
	Milestone #2 Perform network financial health current state assessment and develop financial sustainability strategy to address key issues.	Pass & Complete	
	Milestone #3 Finalize Compliance Plan consistent with New York State Social Services Law 363-d	Pass & Complete	
	Milestone #4 Develop detailed baseline assessment of revenue linked to value-based payment, preferred compensation modalities for different provider-types and functions, and MCO strategy.	Pass & Ongoing	
	Milestone #5 Finalize a plan towards achieving 90% value-based payments across network by year 5 of the waiver at the latest	Pass & Ongoing	

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Section	Module Name / Milestone #	Review Status	
	Milestone #6 Put in place Level 1 VBP arrangement for PCMH/APC care and one other care bundle or subpopulation	Pass & Ongoing	
	Milestone #7 Contract 50% of care-costs through Level 1 VBPs, and >= 30% of these costs through Level 2 VBPs or higher	Pass & Ongoing	
	Milestone #8 >=90% of total MCO-PPS payments (in terms of total dollars) captured in at least Level 1 VBPs, and >= 70% of total costs captured in VBPs has to be in Level 2 VBPs or higher	Pass & Ongoing	
Section 04	Module 4.1 - Prescribed Milestones		
	Milestone #1 Finalize cultural competency / health literacy strategy.	Pass & Complete	
	Milestone #2 Develop a training strategy focused on addressing the drivers of health disparities (beyond the availability of language-appropriate material).	Pass & Ongoing	
Section 05	Module 5.1 - Prescribed Milestones		
	Milestone #1 Perform current state assessment of IT capabilities across network, identifying any critical gaps, including readiness for data sharing and the implementation of interoperable IT platform(s).	Pass & Complete	
	Milestone #2 Develop an IT Change Management Strategy.	Pass & Complete	
	Milestone #3 Develop roadmap to achieving clinical data sharing and interoperable systems across PPS network	Pass (with Exception) & Ongoing	
	Milestone #4 Develop a specific plan for engaging attributed members in Qualifying Entities	Pass & Complete	
	Milestone #5 Develop a data security and confidentiality plan.	Pass & Ongoing	
Section 06	Module 6.1 - Prescribed Milestones		
	Milestone #1 Establish reporting structure for PPS-wide performance reporting and communication.	Pass & Complete	
	Milestone #2 Develop training program for organizations and individuals throughout the network, focused on clinical quality and performance reporting.	Pass & Ongoing	
Section 07	Module 7.1 - Prescribed Milestones		
	Milestone #1 Develop Practitioners communication and engagement plan.	Pass & Complete	
	Milestone #2 Develop training / education plan targeting practioners and other professional groups, designed to educate them about the DSRIP program and your PPS-specific quality improvement agenda.	Pass & Ongoing	
Section 08	Module 8.1 - Prescribed Milestones		
	Milestone #1 Develop population health management roadmap.	Pass & Ongoing	
	Milestone #2 Finalize PPS-wide bed reduction plan.	Pass & Ongoing	
Section 09	Module 9.1 - Prescribed Milestones		
	Milestone #1 Perform a clinical integration 'needs assessment'.	Pass & Complete	

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Section	Module Name / Milestone #	Review Status	
	Milestone #2 Develop a Clinical Integration strategy.	Pass & Complete	 
Section 11	Module 11.1 - Workforce Strategy Spending (Baseline)	Pass & Complete	
	Module 11.2 - Prescribed Milestones		
	Milestone #1 Define target workforce state (in line with DSRIP program's goals).	Pass & Ongoing	
	Milestone #2 Create a workforce transition roadmap for achieving defined target workforce state.	Pass & Ongoing	
	Milestone #3 Perform detailed gap analysis between current state assessment of workforce and projected future state.	Pass & Ongoing	
	Milestone #4 Produce a compensation and benefit analysis, covering impacts on both retrained and redeployed staff, as well as new hires, particularly focusing on full and partial placements.	Pass & Ongoing	
	Milestone #5 Develop training strategy.	Pass & Ongoing	
	Module 11.11 - Workforce Strategy Spending (Quarterly)	Pass & Ongoing	 

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project ID	Module Name / Milestone #	Review Status	
2.a.i	Module 2.a.i.2 - Prescribed Milestones		
	Milestone #1 All PPS providers must be included in the Integrated Delivery System. The IDS should include all medical, behavioral, post-acute, long-term care, and community-based service providers within the PPS network; additionally, the IDS structure must include payers and social service organizations, as necessary to support its strategy.	Pass & Ongoing	
	Milestone #2 Utilize partnering HH and ACO population health management systems and capabilities to implement the PPS' strategy towards evolving into an IDS.	Pass & Complete	
	Milestone #3 Ensure patients receive appropriate health care and community support, including medical and behavioral health, post-acute care, long term care and public health services.	Pass & Ongoing	
	Milestone #4 Ensure that all PPS safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including directed exchange (secure messaging), alerts and patient record look up, by the end of Demonstration Year (DY) 3.	Pass & Ongoing	
	Milestone #5 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3.	Pass & Ongoing	
	Milestone #6 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.	Pass & Ongoing	
	Milestone #7 Achieve 2014 Level 3 PCMH primary care certification and/or meet state-determined criteria for Advanced Primary Care Models for all participating PCPs, expand access to primary care providers, and meet EHR Meaningful Use standards by the end of DY 3.	Pass & Ongoing	
	Milestone #8 Contract with Medicaid Managed Care Organizations and other payers, as appropriate, as an integrated system and establish value-based payment arrangements.	Pass & Ongoing	
	Milestone #9 Establish monthly meetings with Medicaid MCOs to discuss utilization trends, performance issues, and payment reform.	Pass & Ongoing	
	Milestone #10 Re-enforce the transition towards value-based payment reform by aligning provider compensation to patient outcomes.	Pass & Ongoing	
Milestone #11 Engage patients in the integrated delivery system through outreach and navigation activities, leveraging community health workers, peers, and culturally competent community-based organizations, as appropriate.	Pass & Ongoing		
2.a.iii	Module 2.a.iii.2 - Patient Engagement Speed	Fail	
	Module 2.a.iii.3 - Prescribed Milestones		
	Milestone #1 Develop a Health Home At-Risk Intervention Program, utilizing participating HHs as well as PCMH/APC PCPs in care coordination within the program.	Pass & Ongoing	
	Milestone #2 Ensure all primary care providers participating in the project meet NCQA (2011) accredited Patient Centered Medical Home, Level 3 standards and will achieve NCQA 2014 Level 3 PCMH and Advanced Primary Care accreditation by Demonstration Year (DY) 3.	Pass & Ongoing	

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project ID	Module Name / Milestone #	Review Status	
	Milestone #3 Ensure that all participating safety net providers are actively sharing EHR systems with local health information exchange/RHIO/SHIN-NY and sharing health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up.	Pass & Ongoing	
	Milestone #4 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or APCM.	Pass & Ongoing	
	Milestone #5 Perform population health management by actively using EHRs and other IT platforms, including use of targeted patient registries, for all participating safety net providers.	Pass & Ongoing	
	Milestone #6 Develop a comprehensive care management plan for each patient to engage him/her in care and to reduce patient risk factors.	Pass & Ongoing	
	Milestone #7 Establish partnerships between primary care providers and the local Health Home for care management services. This plan should clearly delineate roles and responsibilities for both parties.	Pass & Ongoing	
	Milestone #8 Establish partnerships between the primary care providers, in concert with the Health Home, with network resources for needed services. Where necessary, the provider will work with local government units (such as SPOAs and public health departments).	Pass & Ongoing	
	Milestone #9 Implement evidence-based practice guidelines to address risk factor reduction as well as to ensure appropriate management of chronic diseases. Develop educational materials consistent with cultural and linguistic needs of the population.	Pass & Ongoing	
2.b.iii	Module 2.b.iii.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 2.b.iii.3 - Prescribed Milestones		
	Milestone #1 Establish ED care triage program for at-risk populations	Pass & Ongoing	
	Milestone #2 Participating EDs will establish partnerships to community primary care providers with an emphasis on those that are PCMHs and have open access scheduling. a. Achieve NCQA 2014 Level 3 Medical Home standards or NYS Advanced Primary Care Model standards by the end of DSRIP Year 3. b. Develop process and procedures to establish connectivity between the emergency department and community primary care providers. c. Ensure real time notification to a Health Home care manager as applicable	Pass & Ongoing	
	Milestone #3 For patients presenting with minor illnesses who do not have a primary care provider: a. Patient navigators will assist the presenting patient to receive an immediate appointment with a primary care provider, after required medical screening examination, to validate a non-emergency need. b. Patient navigator will assist the patient with identifying and accessing needed community support resources. c. Patient navigator will assist the member in receiving a timely appointment with that provider's office (for patients with a primary care provider).	Pass & Ongoing	
	Milestone #4 Established protocols allowing ED and first responders - under supervision of the ED practitioners - to transport patients with non-acute disorders to alternate care sites including the PCMH to receive more appropriate level of care. (This requirement is optional.)	Pass & Ongoing	
	Milestone #5 Use EHRs and other technical platforms to track all patients engaged in the project.	Pass & Ongoing	

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project ID	Module Name / Milestone #	Review Status	
2.b.iv	Module 2.b.iv.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 2.b.iv.3 - Prescribed Milestones		
	Milestone #1 Develop standardized protocols for a Care Transitions Intervention Model with all participating hospitals, partnering with a home care service or other appropriate community agency.	Pass & Ongoing	
	Milestone #2 Engage with the Medicaid Managed Care Organizations and Health Homes to develop transition of care protocols that will ensure appropriate post-discharge protocols are followed.	Pass & Ongoing	
	Milestone #3 Ensure required social services participate in the project.	Pass & Ongoing	
	Milestone #4 Transition of care protocols will include early notification of planned discharges and the ability of the transition care manager to visit the patient in the hospital to develop the transition of care services.	Pass & Ongoing	
	Milestone #5 Protocols will include care record transitions with timely updates provided to the members' providers, particularly primary care provider.	Pass & Ongoing	
	Milestone #6 Ensure that a 30-day transition of care period is established.	Pass & Ongoing	
3.a.i	Module 3.a.i.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 3.a.i.3 - Prescribed Milestones		
	Milestone #1 Co-locate behavioral health services at primary care practice sites. All participating primary care practices must meet 2014 NCQA level 3 PCMH or Advance Primary Care Model standards by DY 3.	Pass & Ongoing	
	Milestone #2 Develop collaborative evidence-based standards of care including medication management and care engagement process.	Pass & Ongoing	
	Milestone #3 Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.	Pass & Ongoing	
	Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
	Milestone #5 Co-locate primary care services at behavioral health sites.	Pass & Ongoing	
	Milestone #6 Develop collaborative evidence-based standards of care including medication management and care engagement process.	Pass & Ongoing	
	Milestone #7 Conduct preventive care screenings, including behavioral health screenings (PHQ-2 or 9 for those screening positive, SBIRT) implemented for all patients to identify unmet needs.	Pass & Ongoing	
	Milestone #8 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
	Milestone #9 Implement IMPACT Model at Primary Care Sites.	Pass & Ongoing	
Milestone #10 Utilize IMPACT Model collaborative care standards, including developing coordinated evidence-based care standards and policies and procedures for care engagement.	Pass & Ongoing		

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project ID	Module Name / Milestone #	Review Status	
	Milestone #11 Employ a trained Depression Care Manager meeting requirements of the IMPACT model.	Pass & Ongoing	
	Milestone #12 Designate a Psychiatrist meeting requirements of the IMPACT Model.	Pass & Ongoing	
	Milestone #13 Measure outcomes as required in the IMPACT Model.	Pass & Ongoing	
	Milestone #14 Provide "stepped care" as required by the IMPACT Model.	Pass & Ongoing	
	Milestone #15 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
3.b.i	Module 3.b.i.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 3.b.i.3 - Prescribed Milestones		
	Milestone #1 Implement program to improve management of cardiovascular disease using evidence-based strategies in the ambulatory and community care setting.	Pass & Ongoing	
	Milestone #2 Ensure that all PPS safety net providers are actively connected to EHR systems with local health information exchange/RHIO/SHIN-NY and share health information among clinical partners, including direct exchange (secure messaging), alerts and patient record look up, by the end of DY 3.	Pass & Ongoing	
	Milestone #3 Ensure that EHR systems used by participating safety net providers meet Meaningful Use and PCMH Level 3 standards and/or ACPM by the end of Demonstration Year 3.	Pass & Ongoing	
	Milestone #4 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
	Milestone #5 Use the EHR to prompt providers to complete the 5 A's of tobacco control (Ask, Assess, Advise, Assist, and Arrange).	Pass & Ongoing	
	Milestone #6 Adopt and follow standardized treatment protocols for hypertension and elevated cholesterol.	Pass & Ongoing	
	Milestone #7 Develop care coordination teams including use of nursing staff, pharmacists, dieticians and community health workers to address lifestyle changes, medication adherence, health literacy issues, and patient self-efficacy and confidence in self-management.	Pass & Ongoing	
	Milestone #8 Provide opportunities for follow-up blood pressure checks without a copayment or advanced appointment.	Pass & Ongoing	
	Milestone #9 Ensure that all staff involved in measuring and recording blood pressure are using correct measurement techniques and equipment.	Pass & Ongoing	
	Milestone #10 Identify patients who have repeated elevated blood pressure readings in the medical record but do not have a diagnosis of hypertension and schedule them for a hypertension visit.	Pass & Ongoing	
	Milestone #11 Prescribe once-daily regimens or fixed-dose combination pills when appropriate.	Pass & Ongoing	
	Milestone #12 Document patient driven self-management goals in the medical record and review with patients at each visit.	Pass & Ongoing	
Milestone #13 Follow up with referrals to community based programs to document participation and behavioral and health status changes.	Pass & Ongoing		
Milestone #14 Develop and implement protocols for home blood pressure monitoring with follow up support.	Pass & Ongoing		

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project ID	Module Name / Milestone #	Review Status	
	Milestone #15 Generate lists of patients with hypertension who have not had a recent visit and schedule a follow up visit.	Pass & Ongoing	
	Milestone #16 Facilitate referrals to NYS Smoker's Quitline.	Pass & Ongoing	
	Milestone #17 Perform additional actions including "hot spotting" strategies in high risk neighborhoods, linkages to Health Homes for the highest risk population, group visits, and implementation of the Stanford Model for chronic diseases.	Pass & Ongoing	
	Milestone #18 Adopt strategies from the Million Hearts Campaign.	Pass & Ongoing	
	Milestone #19 Form agreements with the Medicaid Managed Care organizations serving the affected population to coordinate services under this project.	Pass & Ongoing	
	Milestone #20 Engage a majority (at least 80%) of primary care providers in this project.	Pass & Ongoing	
3.c.i	Module 3.c.i.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 3.c.i.3 - Prescribed Milestones		
	Milestone #1 Implement evidence-based best practices for disease management, specific to diabetes, in community and ambulatory care settings.	Pass & Ongoing	
	Milestone #2 Engage at least 80% of primary care providers within the PPS in the implementation of disease management evidence-based best practices.	Pass & Ongoing	
	Milestone #3 Develop care coordination teams (including diabetes educators, nursing staff, behavioral health providers, pharmacy, community health workers, and Health Home care managers) to improve health literacy, patient self-efficacy, and patient self-management.	Pass & Ongoing	
	Milestone #4 Develop "hot spotting" strategies, in concert with Health Homes, to implement programs such as the Stanford Model for chronic diseases in high risk neighborhoods.	Pass & Ongoing	
	Milestone #5 Ensure coordination with the Medicaid Managed Care organizations serving the target population.	Pass & Ongoing	
	Milestone #6 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing	
	Milestone #7 Meet Meaningful Use and PCMH Level 3 standards and/or APCM by the end of Demonstration Year 3 for EHR systems used by participating safety net providers.	Pass & Ongoing	
3.d.ii	Module 3.d.ii.2 - Patient Engagement Speed	Pass & Ongoing	
	Module 3.d.ii.3 - Prescribed Milestones		
	Milestone #1 Expand asthma home-based self-management program to include home environmental trigger reduction, self-monitoring, medication use, and medical follow-up.	Pass & Ongoing	
	Milestone #2 Establish procedures to provide, coordinate, or link the client to resources for evidence-based trigger reduction interventions. Specifically, change the patient's indoor environment to reduce exposure to asthma triggers such as pests, mold, and second hand smoke.	Pass & Ongoing	
	Milestone #3 Develop and implement evidence-based asthma management guidelines.	Pass & Ongoing	

**New York State Department Of Health
Delivery System Reform Incentive Payment Project**

DSRIP Implementation Plan Project

SBH Health System (PPS ID:36)

Project ID	Module Name / Milestone #	Review Status	
	Milestone #4 Implement training and asthma self-management education services, including basic facts about asthma, proper medication use, identification and avoidance of environmental exposures that worsen asthma, self-monitoring of asthma symptoms and asthma control, and using written asthma action plans.	Pass & Ongoing	
	Milestone #5 Ensure coordinated care for asthma patients includes social services and support.	Pass & Ongoing	
	Milestone #6 Implement periodic follow-up services, particularly after ED or hospital visit occurs, to provide patients with root cause analysis of what happened and how to avoid future events.	Pass & Ongoing	
	Milestone #7 Ensure communication, coordination, and continuity of care with Medicaid Managed Care plans, Health Home care managers, primary care providers, and specialty providers.	Pass & Ongoing	
	Milestone #8 Use EHRs or other technical platforms to track all patients engaged in this project.	Pass & Ongoing
