

The Future of Integrated Care In New York State

Agenda:

- **The Future of Integrated Care In New York State**
Andrew Segal, Division of Long Term Care, Department of Health
- **The Medicare-Medicaid Financial Alignment Initiative: Overview and Status Update**
Lindsay Barnette, Medicare-Medicaid Coordination Office, Centers for Medicare & Medicaid Services
- **Other State Approaches to Integrating Medicare and Medicaid for Dually Eligible Beneficiaries: Implications for the New York State FIDA Demonstration**
James Verdier, Mathematica Policy Research
Ann Mary Philip, Center for Health Care Strategies
- **Questions and Discussion**
Erin Kate Calicchia, Division of Long Term Care, Department of Health

The Future of Integrated Care in New York State

The Future of Integrated Care In New York State

- The Department's goal is to increase integration of services, providers, payments, and delivery systems
- Integration:
 - Advances quality, access, and value
 - Promotes a Total Cost of Care approach
 - Aligns with goals of VBP

Current Landscape of Integrated Care

- **Medicaid Redesign Team**

- Priority placed on Medicaid and Medicare alignment prompted FIDA Demonstration and PACE/MAP expansion
- FIDA/PACE/MAP boast success in the following areas:
 - Coordination of care
 - Financial alignment
 - Elimination of service duplication
 - Enhancement of community-based care
 - Minimized reliance on institutional care
 - Increased health value and quality of life

Current Landscape of Integrated Care

- **FIDA:**

- Offers the most robust managed care service package available in NYS
- Delivers a streamlined experience for participants and providers
- Provides a person-centered care planning process and interdisciplinary team (IDT) approach
- Includes flexibilities unavailable in other programs
 - Fully integrated appeals and grievances processes

Current Landscape of Integrated Care

- **MAP:**

- Combines the State's standalone MLTC Partial Plan with a Medicare Advantage Plan
- Manages and coordinates care through a care manager
 - Includes MLTC benefit package plus Medicare services
 - Does not include all Medicaid physical health services, Medicaid behavioral health, Medicaid HCBS Waiver services

Current Landscape of Integrated Care

- **PACE:**

- Person-centered care planning process
- Interdisciplinary Team (IDT) approach
- Services provided in an adult day health center
 - The adult day health center is supplemented by in-home and referral services
 - Health services are provided by a health care team of providers
- New York is set to lead the nation in PACE advancement and growth

Value of Integrated Care

- **Experience of Care**
 - Person-Centered Service Plan (PCSP)
 - Interdisciplinary Care Team (IDT) model
 - Tailored care management
 - Comprehensive provider networks
- **Experience of Providers**
 - Increased participation in care coordination and planning

Value of Integrated Care (continued)

- **Alignment of Incentives**
 - Enhancing the value proposition
 - Plan incentives
- **The Total Cost of Care**
 - Individuals live safely in their homes and communities
 - Financial alignment
 - Value-Based Payment (VBP) could apply to integrated Plans

Challenges of Multiple Managed Care Products

- Confusion amongst stakeholders and participants
- Inefficiencies and duplication of efforts
- Potential for cost shifting across payors for products that are not fully integrated

Objectives for Future Integration Planning Process

- Achieve the greatest level of Medicare and Medicaid physical, behavioral, and LTSS integration possible
 - Identify platforms and incorporate best elements for integration
 - Offer stakeholders opportunities to help shape the future of integrated care
 - Allow sufficient lead time to ensure a smooth transition

Next Steps: Mapping a Strategy to Reach Integration Objectives

- Learn about available platforms for integrated care
- Review lessons learned from FIDA
- Obtain input into future stakeholder process to collaborate on:
 - Finding the best vehicle to drive one integrated care product
 - Incorporating the best features of existing programs
 - Envisioning the transition process
 - Continue to work collaboratively with CMS
