

New York State Hospitals' Community Service Plan Summaries

2014

Introduction: The New York State Department of Health developed summaries of the Community Service Plans submitted by hospitals in November 2013. Each report was reviewed by at least two reviewers. Reviewers noted priorities, goals and interventions identified in the reports. Their observations and comments were consolidated into this summary. This summary was provided to hospitals in conjunction with the year one Prevention Agenda 2013-2017 update survey for feedback and corrections which were then incorporated into this updated report.

On the following page, please find the county name of interest in the Hospital List; hold the Ctrl key on your key board and click on the county name to go to the summary of its community health improvement plan.

Hospital List

Albany.....	8
Albany Medical Center.....	8
St. Peter's Health Partners - Northeast Health: Albany Memorial Hospital.....	8
St. Peter's Health Partners: St. Peter's Hospital	9
Allegany.....	10
Jones Memorial Hospital.....	10
Cuba Memorial Hospital.....	10
Broome.....	11
Our Lady of Lourdes Memorial Hospital	11
United Health Services: United Health Services Hospitals (Wilson Medical Center, Binghamton General Hospital, and Physician Practices).....	11
Cattaraugus	12
Olean General Hospital.....	12
Cayuga	12
Auburn Community Hospital	12
Chautauqua	13
Allegheny Health Network: Westfield Memorial Hospital	13
Lake Shore Hospital-TLC Health Network	13
Women's Christian Association Hospital	13
Chemung.....	14
Arnot Health: Arnot Ogden Medical Center, Ira Davenport Memorial Hospital, St. Joseph's Hospital, and Arnot Medical Services	14
Chenango	15
United Health Services: Chenango Memorial Hospital.....	15
Clinton.....	15
Champlain Valley Physicians Hospital and Medical Center	15
Columbia.....	16
Columbia Memorial Hospital	16
Cortland.....	16
Cortland Regional Medical Center	16
Delaware	17
Bassett Healthcare Network: O'Connor Hospital	17
Bassett Healthcare Network: Tri-Town Regional Hospital	17
HealthAlliance of Hudson Valley: Margaretville Hospital.....	17
United Health Services: Delaware Valley Hospital	18

Dutchess	19
HealthQuest: Vassar Brothers Medical Center and Northern Dutchess Hospital	19
MidHudson Regional Hospital	19
Erie	20
Bertrand Chaffee Hospital	20

2014 New York State Hospital's Selected Prevention Agenda Priorities, Areas of Focus, Goal and Interventions

County	Hospital	Priorities	Focus Areas	Goals	Interventions
				Prevent underage drinking, non-medical use of prescription pain relievers drugs by youth, and excessive alcohol consumption by adults	Promote smoking cessation among people with mental health disabilities through partnerships with the NYS Office of Mental Health.
	South Nassau Community Hospital CSP posted at: http://www.southnassau.org/news/communityServicePlan.cfm	Preventing Chronic Diseases	Increase access to high quality chronic disease preventive care and management in both clinical and community settings	Other chronic disease goal: Each September South Nassau Hospital conducts its annual 5K Run/Walk and Multicultural Health Fair Event draws nearly 2000 people. The overarching theme will focus on prevent chronic illness	Other preventing chronic disease strategy--In October of each year, Senator Dean Skelos of Rockville Centre sponsors and Annual "Golden Gathering a health fair for senior citizens in which South Nassau sponsors and distributes over 800 flu vaccines. Additional educational programs will be offered
Niagara	Kaleida Health: DeGraff Memorial Hospital CSP posted at: http://www.kaleidalth.org/community/CommHealthRprt-2014-16.pdf	Preventing Chronic Diseases	Increase access to high quality chronic disease preventive care and management in both clinical and community settings	Increase screening rates for cardiovascular diseases; diabetes; and breast, cervical and colorectal cancers, especially among populations experiencing health disparities	Other preventing chronic disease strategy--Identify cardiovascular disease risk at annual OB/GYN visit; offer educational materials and programs through Spirit of Women and HeartCaring
		Promote a Healthy and Safe Environment	Injuries, Violence and Occupational Health	Reduce fall risks among vulnerable populations	Promote community-based programs for fall prevention.
	Mount St. Mary's Hospital Health Center CSP posted at: http://www.msmh.org/files/9913/8557/1596/Community_Service_Plan_-_2014-17_FINAL.pdf	Preventing Chronic Diseases	Reduce illness, disability and death related to tobacco use and secondhand smoke exposure	Increase screening rates for cardiovascular diseases; diabetes; and breast, cervical and colorectal cancers, especially among populations experiencing health disparities.	Other preventing chronic disease strategy--Hospital specific programs but no details given
		Promote a Healthy and Safe Environment	Injuries, Violence and Occupational Health	Reduce fall risks among vulnerable populations	The CSP indicated another intervention was being employed that was unspecified and did not match a specific intervention identified in the Prevention Agenda
	Niagara Falls Memorial Medical Center	Preventing Chronic Diseases	Reduce illness, disability and death related to tobacco use and	Promote culturally relevant chronic disease self-management education. Promote evidence-based care.	Other preventing chronic disease strategy--Monitoring of Mental Health Patients with Schizophrenia and diabetes into health home programs

2014 New York State Hospital's Selected Prevention Agenda Priorities, Areas of Focus, Goal and Interventions

County	Hospital	Priorities	Focus Areas	Goals	Interventions
	CSP posted at: http://www.nfmmc.org/CommunityServicePlan		secondhand smoke exposure		Promoting NYS Smokers' Quitline.
		Promote a Healthy and Safe Environment	Injuries, Violence and Occupational Health	Reduce fall risks among vulnerable populations	Other healthy environment strategy-- also Nursing Home Programs Promote community-based programs for fall prevention.
Oneida	Mohawk Valley Health System: Faxton-St. Luke's Healthcare CSP posted at: http://www.faxtonstluke.com/about-faxton-st-lukes-healthcare	Preventing Chronic Diseases	Reduce illness, disability and death related to tobacco use and secondhand smoke exposure	Other chronic disease goal: Increase the number of Oneida County adults who are referred to smoking cessation programs Promote tobacco use cessation, especially among low SES populations and those with poor mental health.	Other preventing chronic disease strategy--1. Promoting Tri-County Quits Smoking Cessation Program. 2. Develop and distribute communication tools to local media about dangers of tobacco use. 3. Collaborating partners meet quarterly to review progress, gather feedback and make suggestions to improve the process Promoting NYS Smokers' Quitline.
		Promote Healthy Women, Infants and Children	Maternal and Infant Health	Increase the proportion of NYS babies who are breastfed.	Implement maternity care practices consistent with the World Health Organization's Ten Steps to Successful Breastfeeding and increase the number of Baby Friendly Hospitals in NYS. Link pregnant or postpartum low-income women to local WIC services for breastfeeding and other nutritional supports Other maternal/infant health strategy-- 1. Coordinate and implement Breastfeeding Conference to promote baby-friendly policies and increase exclusive breastfeeding. 2. Communicate availability of private rooms at hospital for women to breastfeed infants or pump breast milk. Provide structured, comprehensive breastfeeding education and professional lactation counseling and support during pregnancy, in the hospital and at home

2014 New York State Hospital's Selected Prevention Agenda Priorities, Areas of Focus, Goal and Interventions

County	Hospital	Priorities	Focus Areas	Goals	Interventions
	Rome Memorial Hospital CSP posted at: http://www.romehospital.org/CommunityServicePlan.aspx	Preventing Chronic Diseases	Reduce illness, disability and death related to tobacco use and secondhand smoke exposure	Promote tobacco use cessation, especially among low SES populations and those with poor mental health.	Other preventing chronic disease strategy--To increase cessation, the hospital will promote the Fax-to-Quit and Opt-to-Quit referral processes using a variety of methods, including training a respiratory therapist to become a tobacco cessation counselor, encouraging use of EMRs, and providing tobacco cessation counseling. Promoting NYS Smokers' Quitline. Promoting of policies and practices in support of breastfeeding
	St. Elizabeth Medical Center CSP posted at: http://www.stemc.org/about-us/community-service-plan/	Preventing Chronic Diseases	Reduce obesity in children and adults Reduce illness, disability and death related to tobacco use and secondhand smoke exposure	Promote tobacco use cessation, especially among low SES populations and those with poor mental health. Other chronic disease goal: Increase the number of Oneida County adults referred to smoking cessation programs	Promoting NYS Smokers' Quitline. Other preventing chronic disease strategy--Use media to highlight dangers of tobacco use Use EMRs to prompt completion of tobacco assessment Employ brief counseling and refer to Quitline Fax-to-Quit referrals Opt-to-Quit policy
Onondaga	Crouse Hospital CSP posted at: http://www.crouse.org/news/publications/community-service-report/?src=commreport	Preventing Chronic Diseases	Reduce obesity in children and adults	Create community environments that promote and support healthy food and beverage choices and physical activity. Eliminate exposure to secondhand smoke. Expand the role of public and private employers in obesity prevention. Prevent childhood obesity through early child-care and schools.	Increasing adoption and use of food standards Other preventing chronic disease strategy--ACHIEVE grant activities; increase CE for city school medical staff; environmental changes to promote physical activity.- child care providers; smoking cessation among women of childbearing age. Adopting tobacco-free outdoor policies. Increasing the availability, accessibility and use of evidence-based interventions in self-care management in clinical and community settings
		Promote Mental Health and Prevent Substance Abuse	Prevent Substance Abuse and other Mental Emotional Behavioral Disorders	Prevent and reduce occurrence of mental, emotional and behavioral disorders among youth and adults Strengthen infrastructure for MEB health promotion and MEB disorder prevention Support collaboration among leaders, professionals and community members	Other strategy to support mental health/ prevent substance abuse-- Focus on NAS through community coalitions of providers; OMH; district attorney; SBIRT training; screening and brief intervention (SBI) to pregnant women reporting alcohol use.

		Promote Mental Health and Prevent Substance Abuse	Prevent Substance Abuse and other Mental Emotional Behavioral Disorders	Prevent underage drinking, non-medical use of prescription pain relievers drugs by youth, and excessive alcohol consumption by adults	Develop social marketing and anti stigma campaigns that promotes the importance of early identification and intervention Establish linkages with the OMH Early Recognition and Screening Initiative in the region. Other strategy to support mental health/ prevent substance abuse-- Social Host Law; drug free communities; universal screening for children Participating in community trial intervention to reduce high-risk drinking Promote smoking cessation among people with mental health disabilities through partnerships with the NYS Office of Mental Health.
New York City	Bronx-Lebanon Hospital Center CSP posted at: http://www.bronx-leb.org/PDFs/Bronx-Lebanon_2013%20Community%20Health%20Needs%20Assessment.pdf	Preventing Chronic Diseases	Increase access to high quality chronic disease preventive care and management in both clinical and community settings	Other goals: Reduce high and unnecessary use of costly acute and emergency room services Reduce health disparities in the medically underserved Reinforce Bronx-Lebanon's BronxCare Network of outpatient practices, including the Dr. Martin Luther King, Jr. Health Center	Other preventing chronic disease strategy-- Develop a comprehensive ambulatory care building (Health and Wellness Center) and expand access to preventive, primary, and specialty health care services. Continue to expand and refine initiatives aimed at preventive and chronic health for the hospital's medically underserved, and ethnically diverse community. Additional efforts are directed to asthma, diabetes, and obesity, as well as other chronic care initiatives.

2014 New York State Hospital's Selected Prevention Agenda Priorities, Areas of Focus, Goal and Interventions

County	Hospital	Priorities	Focus Areas	Goals	Interventions
		Promote Mental Health and Prevent Substance Abuse	Strengthen Infrastructure across Systems	Other goals: Create a continuum of care for mental health/chemical dependency services within Bronx-Lebanon's Psychiatry Program. Expand access to community based treatment. Address the major needs in the Bronx Community for chemical dependency services. Reduce use of costly inpatient levels of care. Reduce fragmentation of care in the mental health/chemical dependency area.	Other strategy to support mental health/ prevent substance abuse-- The Completion of the Bronx-Lebanon Life Recovery Center, which integrates and coordinates inpatient, outpatient, and residential treatment for chemical dependency and related mental health disorders. It is one of only a few facilities in New York State to offer these chemical dependency services in one setting. Other initiatives related to this focus area include the Health Home, as well as Community Health Interventions with the New York State Office of Alcoholism and Substance Abuse Services, New York State Office of Mental Health, New York State Department of Health, New York City Departments of Health and Mental Hygiene, and other community groups.
	Brookdale University Hospital and Medical Center CSP posted at: http://www.brookdalehospital.org/community/service-plan.html	Prevent HIV/STDs, Vaccine-Preventable Diseases and Healthcare-Associated Infections	Prevent HIV and STDs	Prevent HIV and STDs	Other communicable disease prevention strategy-- Update and renew Memoranda of Understanding and linkages with community groups Identify and build new community relationships and strengthen existing relationships with CBOS, FBOs, community providers and community leaders.
		Preventing Chronic Diseases	Increase access to high quality chronic disease preventive care and management in both clinical and community settings Reduce illness, disability and death related to tobacco use and secondhand smoke exposure	The CSP indicated another goal was being employed that was unspecified and did not match a specific goal identified in the Prevention Agenda	The CSP indicated another intervention was being employed that was unspecified and did not match a specific intervention identified in the Prevention Agenda
