DMCHO: JH:SPA-NY-14-0034-Approval

November 13, 2017

Jason A. Helgerson
State Medicaid Director
Deputy Commissioner
Office of Health Insurance Programs
NYS Department of Health
Empire State Plaza
Corning Tower (OCP-1211)
Albany, NY 12237

Dear Commissioner Helgerson:

This is to notify you that New York State Plan Amendment (SPA) #14-0034 has been approved for adoption into the State Medicaid Plan with an effective date of July 1, 2014. This SPA amends and updates the State's APG system for Freestanding Clinic services.

Enclosed are copies of the Plan Pages for SPA #14-0034 and the HCFA-179 form, as approved.

If you have any questions regarding this amendment, please call Joanne Hounsell at 212.616.2446 or e-mail at joanne.hounsell@cms.hhs.gov.

Sincerely,

Michael Melendez, LMSW
Associate Regional Administrator
Division of Medicaid and Children's Health Operations

2(k)****Reimbursement Methodology – Freestanding Clinics**

- I. The criteria for using a procedure-based weight or the relative weight in the methodology is as follows: If a procedure-based weight is available for a particular procedure code, then the procedure-based weight is used. If a procedure-based weight is not available for a particular procedure code, then the relative weight (i.e., "APG weight") is used.
- II. The initial calculation of the APG relative weights were developed using line level charges from 2005 New York Medicaid hospital claims converted to cost using the ratio of cost to charges methodology. The line level costs were brought up to the APG level to determine the average cost of each APG.
 - a. The APG relative weights shall be updated no less frequently than every [two] three years based on hospital claims data. These APG and weights are set as of September 1, 2009, and are effective for specified services on and after that date. A link to the list of APGs and their relative weights is available in the APG Reimbursement Methodology – Freestanding Clinics section.
 - b. The APG relative weights shall be re-weighted prospectively. The initial reweighting will be based on Medicaid claims data for hospitals from the December 1, 2008 through September 30, 2009 period. Subsequent reweightings will be based on Medicaid hospital claims data from the most recent twelve month period and will be based on complete and accurate line level procedure and charge data and ratio of cost to charge data.
 - c. The Department shall correct material errors of any given APG relative weight. Such corrections shall make use of benchmarking data consisting of payment information from other payers (including Medicare) reimbursing comparable services. Corrections to material errors in individual APG relative weights shall be made on a prospective basis.
- III. The case mix index is an expression of the average paid APG weight for a given peer group after consolidation, packaging, and discounting. Case mix indices shall be calculated by running applicable freestanding D&TC and ambulatory surgery center claims data through the latest version of the APG software to determine the average final APG weight of the visits. Outlier claims or claim lines may be excluded from this calculation to assure overall accuracy of the final case mix index. Recalculations of case mix indices for periods prior to January 1, 2010, will be based on freestanding D&TC and ambulatory surgery center Medicaid data for 2007. Such revisions for the period commencing January 1, 2010, will be based on such data from the January 1, 2009 through November 15, 2009 period. Subsequent recalculations will be based on freestanding D&TC and ambulatory surgery center Medicaid claims data from the most recent twelve month period.
