DMCHO: SA

December 14, 2018

Donna Frescatore
Medicaid Director
New York State Department of Health
One Commerce Plaza, Suite 1211
Albany, NY 12210.

Dear Ms. Frescatore:

This is to notify you that New York State Plan Amendment (SPA) #18-0056 has been approved for adoption into the State Medicaid Plan with an effective date of July 1, 2018. This SPA revises the Ambulatory Patient Group (APG) methodology for hospital-based clinic and ambulatory surgery services, including emergency room services, to reflect recalculated weights with component updates. It also revises the reweighting requirement using updated Medicaid claims data from no less frequently than every six years to no less frequently than every seven years.

If you have any questions, please contact me or Stephen Abbott of this office. I may be reached at (212) 264-2430, and Mr. Abbott at (518) 396-3810, ext. 113.

Sincerely,

Michael Melendez, LMSW
Associate Regional Administrator
Division of Medicaid and Children's Health Operations

cc: R. Holligan R. Dayette
 R. Weaver S. Abbott
 M. Tabakov M. Lopez

Reimbursement Methodology – Hospital Outpatient

- I. The criteria for using a procedure-based weight or the relative weight in the methodology is as follows: If a procedure-based weight is available for a particular procedure code, then the procedure-based weight is used. If a procedure-based weight is not available for a particular procedure code, then the relative weight (i.e., "APG weight") is used.
- II. The initial calculation of the APG relative weights were developed using line level charges from 2005 New York Medicaid claims converted to cost using the ratio of cost to charges methodology. The line level costs were brought up to the APG level to determine the average cost of each APG.
- a. The APG relative weights will be updated no less frequently than every [six] seven years. These APG and weights are set as of December 1, 2008, and are effective for specified services on and after that date. A link to the list of APGs and their relative weights is available in the APG Reimbursement Methodology – Reimbursement Components section.
 - b. The APG relative weights will be reweighted prospectively. The initial reweighting will be based on Medicaid claims data from the December 1, 2008 through September 30, 2009 period. Subsequent reweighting's will be based on Medicaid claims data from the most recent twelve-month period and will be based on complete and accurate line level procedure and charge data and ratio of cost to charge data.
 - c. The Department will correct material errors of any given APG relative weight. Such corrections will make use of benchmarking data consisting of payment information from other payers (including Medicare) reimbursing comparable services. Corrections to material errors in individual APG relative weights will be made on a prospective basis.
- III. Case mix index is an expression of the average paid APG weight for a given peer group after consolidation, packaging, and discounting. Case mix indices will be calculated by running applicable claims data through the latest version of the APG software to determine the average final APG weight of the visits. Outlier claims or claim lines may be excluded from this calculation to assure overall accuracy of the final case mix. The initial calculation of case mix indices for periods prior to January 1, 2010, will be based on Medicaid data from the December 1, 2008, through April 30, 2009 period. The January 1, 2010, calculation of case-mix indices will be based on Medicaid data for the period December 1, 2008, through September 30, 2009. Subsequent calculations will be based on Medicaid claims data from the most recent twelve-month period.
